VOL. XX — CRESTON, B. C., FRIDAY, APRIL 21, 1933 — No. 5

Wynndel Co-Op. Annual Meeting

Decide to Increase Directorate to Nine Members—Erect New Warehouse Opposite Precooler—Irrigation District Meets.

Shareholders of Wynndel Co-Operative Fruit Growers Association were in annual session at the Wynndel community hall Tuesday evening, April 11th, with the president, John Wigen, in charge of proceedings.

Minutes of previous annual meeting along with the financial statement were adopted. Letters in connection with the effort being made to have the train schedule changed to better accommodate the berry growers were read, as well as the correspondence respecting express rates—l.c.l. and car lots—on which no satisfaction has as yet been obtained.

Nominations for directors to replace the three retiring (W. Greig, A. S. Joy and G. Huscroft) were then in order and at this point a resolution was submitted to enlarge the directorate to nine members. The chairman explained this could not be done without giving formal notice and holding another meeting. The idea of increased membership was to give the apple growers better representation on tne board. On the motion being put the vote was 32 to 21 in favor of enlargement. The ballot to fill the present three vacancies favored John Bathie, T. Sixsmith and A. Rudd, who were declared elected.

Fruit selling and apple packing charges were discussed, along with various financial problems. Decision was made to erect a warehouse opposite the pre cooler which willl fill a long felt want. Orders for supplies were taken, but orders for crates were left open until berries are uncovered and a better idea of the possible crop obtained.

The annual meeting of Wynndel Irrigation District was held the following evening, with E. Uri elected to preside. Minutes of previous meeting as well as financial statement were approved as read. Nominations for a trustee to replace John Wigen, whose term has expired resulted in the choice of T Sixsmith. A. E. Towson was elected secretary, but as he was not present A. Spencer was chosen. There was a discussion on the work done. Report of low funds made, with the growers asked to complete the waterworks at the same wages and they would be credited against assessment instead of cash.

Wynndel

Miss E. Hagen, who has been residing at Nelson, returned home on Friday.

Miss M. Glasier was a patient at Creston hospital at the weekend for a tonsils operation.

George Heller is a patient at Creston hospital, suffering from a stroke.

Mr. and Mrs. W. A. Pease of Alice Siding spent their Easter vacation with Mr. and Mrs. Dalbom.

J. B. Rumsey and family of Cranbrook have returned to take up residence at the Wynndel ranch.

The grader has been over the roads and travel is much better.

Mrs. M. Wigen is a Trail visitor this week with her sister, Mrs. H. Allan.

Miss Nesta Huscroft is an Easter week visitor at Creston, with her aunt, Mrs. H. Benney.

Meeting of Ladies' Aid was held at the home of Mrs. Slingsby on Thursday last. A contest, "kitchen utensils", was won by Mrs. A. Benedetti.

Rev. A. and Mrs. Walker of Creston were visitors here on Thursday last for the Ladies' Aid meeting.

Mrs. H. Benney and baby son, Glen, of Creston were visitors last week, guests of Mrs. Benney's sister, Mrs. G. Huscroft

Mrs. R. Dalbom was hostess at a delightful afternoon tea on Wednesday last. The invited guests were Mrs. Grady, Mrs. R. Uri, Mrs. G. Huscroft, Mrs. H. A. Bathie, Mrs. Greig, Miss Thomas, Mrs H. Benney, Creston, Mrs. Martell and Mrs. L. A. Davis. The hostess was assisted by Miss Eileen Dalbom in serving refreshments.

At the April meeting of the Woman's Auxiliary at the home of Mrs. Davidge two new members were enrolled. Final arrangements for chicken supper next month were made.

Miss Phyllis Foxall was a weekend visitor at Nelson where she attended the wedding of her brother, Robert, who was united in marriage with Miss Marguerite Crawford of Creston, at St. Saviour's Church on Saturday.

The biggest crowd Wynndel has seen at a dance in many months was in evidence Monday night for the K.K. Klub "hop," for which excellent music was provided by Messrs, Walde, Swensden and Goplin. Every place from Kitchener to Boswell was represented, the latter place and Creston sending quite large delegations. The Klub members served a fine lunch. All report a dandy time.

Alice Siding

Birth—On April 13th, to Mr. and Mrs. Hector Stewart, a son.

Birth—On April 15th, to Mr. and Mrs. C. S. Hester, a son.

Friends of Mrs. John R. Miller will be glad to hear that she continues to make steady improvement after her very critical illnes earlier in the month.

Miss Helen Moore, who teaches at Lumberton, is here for the Easter vacation with her mother, Mrs. H. Taylor.

Miss Gladys Webster, who is on the Michel-Natal consolidated school staff, is here for Easter with her parents, Mr. and Mrs. J. H. Webster.

Miss Jessie Parkin has arrived home from Michel, where she has been for the past few months.

Mr. Martin of Creston has the stump puller at work on the former Harshaw ranch, which he recently purchased.

J. J. Freeney, teacher at Alice Siding school, got away on Thursday for the Easter holidays at his home in Rossland.

Mr. and Mrs. E W. Payne have moved from Creston into the new residence just just completed on their radch.

The heavy road grader, from Boswell, was sent through as far as the Constable ranch last week, and travel west of here is in good shape.

R. Alderson, who has been here from Turner Valley for a couple of weeks earlier in the month, has made a great improvement to his place by the erection of a neat iron fence in front of the house.

Alice Siding had the usual Easter invasion by Crestonites on Saturday and Sunday in quest of yellow lilies, some of which were used for church decoration.

Frank Martin, who recently erected a new residence on t e acreage acquired fsom the Home Bank, moved into his new home at the middle of the week.

The young people have been having a busy time socially during the month. On the 7th Mr. and Mrs. John Miller, jr., had a housewarming dance at their new home, and on Monday night Mr. and Mrs. Ostendorf were at home at a dance.

The Easter report of Alice Siding school shows an enrolment of 29 pupils and an an average daily attendance of 28.28. The class leaders are: Grade 10—Betty Smith 65.4. Grade 9—Edward Argyle 73, Arthur Constable 72.2 Grade 8—Ethel Mather, Geoffrey Constable. Grade 7—Hazel Miller, Elsie Mather. Grade 6—Sidney Argyle, Carl McDougall. Grade 5—Joan Smith, Violet Parkin. Grade 4—Marion Smith, Ada Smith. Grade 2—Dick Smith, Billy Constable. Grade 1a—Frank Simister. Grade 1b—Joe Smith, Mabel Mather.

Those making perfect attendance in March: Betty Smith, Edward Argyle, Arthur Consta le, Geoffrey Constable, Gordon Smith, Hazel Miller, Elsie Mather, Sidney Argyle, Carl McDougall, Joan Smith, Violet Parkin, Alfred Parkin, Marion Smith, John Smith, Evelyn Mather, Dick Smith, Billy Constable, Wilbur Argyle, Robert McDougall, Frank Simister, Joe Smith, Mabel Mather, Martha Marshall, John Marshall.

Institute Bulb Show, May 6th

Institute Prodding Village Council to Appoint Health Officer—Will Have Enlarged Flower Show—See Angel Cake Made

April meeting of Creston and District Women's Institute was at the home of Mrs. Jas. Cherrington on Friday afternoon, with a good turnout of members, and the president, Mrs. C. F. Hayes, in the chair. A demonstration on making angel cake was a feature, and the date for the bulb show was set.

It was decided to pay a per capita levy of 15 cents to the provincial funds of the Women's Institute. Mrs. M. Young and Mrs. (Dr.) Warren were appointed a visiting committee for the next two months. First aid kits in schools have been replenished and it was decided to supply one of these kits to the school at Arrow Creek. Mrs. R. Stevens pointed out that many articles of needlework, knitting, crochet, etc., were needed to ensure sending a good exhibit to the Vancouver Exhibition in the effort to win the W.I. cup for the third time.

A resolution passed by the board of trade and forwarded the institute for endorsation was strongly supported, the resolution deals with the all important question of sanitation and urges the appointment of a health officer for the village.

May 6th was chosen as the date for the annual bulb show, with afternoon tea and sale of home cooking. Committees to take charge are: Flowers, Mrs. Cherrington and Mrs C. Murrell. Tea, Mrs. Warren. Home cooking, Mrs. M. Young and Mrs. T. M. Edmondson. Kitchen, Mrs. Mallandaine and Mrs. R. Stevens.

After some discussion it was decided that as there will be no fall fair in Creston this year, the Women's Institute should hold a flower show and children's fair, instead of the usual June flower show.

Mrs Cherrington gave a demonstration of making angel cake, which greatly interested all present. For her effort she was accorded a hearty vote of thanks. After adjournment tea was served by Mrs. W. Fraser and Mrs. Mallandaine. The freewill collection for the crippled children's fund was $1.50.

Canyon City

The many friends here of Mrs. W. Ridd will be glad to know she is recovering satisfactorily from a serious operation she underwent at a hospital in Edmonton Alberta, earlier in the month.

Mr. and Mrs. Matt Clayton and son, Bill, were weekend visitors with relatives and friends at Kimberley.

Mr. and Mrs. Jeff. Knott of Snoqualmie, Wash., arrived on Saturday on a visit with their parents, Mr. and Mrs. F. Knott and Mr. and Mrs. A. Halstead.

A. D. Pochin and son, Lester, of Nelson, arrived on Saturday and will be spending a month looking after spring work on the ranch.

School closed for the Easter week vacation on Thursday, but the teachers are spending the holidays in the valley.

Mr. Kjenstad is busy with the erection of a small residence on the former Richard Hurl ranch, which is now owned by John Gartland.

Mrs. Stallwood (nee Vera Lister) of Nelson was calling on many of her former pupils, and other friends, here at the first of the week.

The St. George's night celebration planned for Friday, 20st, has been cancelled, due to insufficient interest.

The crew at work for West Kootenay Power & Light Company at Goat River canyon, knocked off for the Easter holidays on Thursday evening, and resumed work again on Tuesday morning.

The damage done by frost last fall or winter to strawberries in the valley is quite serious in this section. J. Zachodnik has just ploughed up three acres of them. On some of the knolls the frost has also damaged the alfalfa, though the loss on this will not be extensive.

A feature of the Easter service at the United Church was the baptisim of the young son of Mr. and Mrs. Jas. Bateman. The music was particularly appropriate to the day. Miss June Browell contributing a solo, as a special number; and there was a fine chorus by the Sunday school under the direction of Mrs. O. M. Samuelson.

Sirdar

This week has seen a great increase in cars passing through here.

The Boswell grader is at work in the Wynndel area. The good weather also of great help in getting that district's roads into shape.

Judging by the continuous tapping of the air hammers rivettting is going ahead at the new span at Kootenay Landing.

H. VanAckeran of Canyon was a visitor during the week with Mr. and Mrs. J. S. Wilson.

Mrs. Syd. McCabe formerly of Sirdar, but now of Grand Forks, passed through here during the week on her way to Cowley, Alberta, and expects to spend a few days on her return here.

J. Manarino was a business visitor at Wynndel inspecting this ranch and arranging for cropping it this year.

Miss Gwen and Charles Wilson were week end visitors at the home of Mr. and Mrs. VanAckeran at Canyon.

Misses Sylvia and Frances Talarico are home for the Easter vacation with their parents.

Wayne Travis, an assistant engineer of the United States geodetic survey, spent part of Monday inspecting the water gauges at Athara and Kootenay Landing leaving for Nelson that afternoon.

The cool weather, especially nights and mornings, is reflected by the water gauge at the slough bridge, Atabara. The height of water at the weekend was 1.71 feet or a rise of approximately .06 inches for the previous week.

Adam Robertson, principal of Sirdar school, made a genial host when he entertained the school children at a party on Thursday evening Games were indulged in by the children followed by refreshments. Many adults were also guests and all voted the evening a most enjoyable one. School broke up on Thursday for the usual ten days Easter holidays.

The usual fortnightly Ten Cent social was held in the community hall on Saturday. Cards and dancing were the features of the evening followed by refreshments. The attendance was good, many coming from Creston and Wynndel. Prize winners were: Ladies high, Lena Cherbo. Gent's high, Rudolph Benedette. Consolation, Allenby Cam. The music was supplied by Waldie and Svenson.

FISHING PRIZES

1933

TACKLE BOX—For the largest Black Bass caught during the season.

GAFF HOOK Complete—For second largest Black Bass caught during season.

CASTING REEL, Level Wind Bait—F r largest Rainbow, Cutthroat, or Brook Trout caught during season.

FLY BOOK, Vest Pocket—For largest Silver Trout caught during season.

SPECIAL PRIZE—Boys under 14 years, 3-piece Steel Rod and Reel for the largest Squaw Fish caught during the season.

Competitors must purchase 50c. worth of tackle, or more, at this store. Have your name registered when you make your first purchase of tackle. Boys under 14 years must purchase ten cents worth of tackle to compete for special prize.

Any persons who won a prize during the seasons of 1930-31-32 will not be able to compete in the same class in 1933.

All fish must be brought in as taken from the water to be weighed and measured.

Prizes will be awarded Nov. 15, 1933.

V. MAWSON

April Meeting Board of Trade

Name Delegates to Associated Boards' Convention—Request Village Improve Sanitation—New Train Schedule Doubtful

President W. L. Bell had the assistance of ten members in disposing of the business coming before Creston Board of Trade at the April meeting on Tuesday night, said business having to do chiefly with matters of purely local concern. W. McL. Cooper was elected to membership.

For the publicity committee S. A Speers reported that the annual meeting of the Red Trail Association was to be held at Fernie later in the month, and asked for a grant of $25 to pay for the board's affiliation. This was granted, with Councillor F. H. Jackson expressing the opinion that the village would make a donation of this amount to take care of the matter. Although the committee on agriculture was expected to report on ways and means to re-establish apple production on former day basis, deputy chairman C. O. Rodgers reported no meeting of the committee had been held.

C. W. Allan, chairman of a select committee that has in hand the matter of getting a more suitable eastbound train schedule, reported that the berry shippers would be in a bad position if the present timetable were maintained. Berries would have to be picked at the heat of the day and would reach Lethbridge and Medicine Hat one day later than in the past. He had the matter up with C.P.R. Superintendent Manson but as yet had no definite reply to the request for a change.

For the 1933 meeting of the Associated Boards at Trail in May, Col. Mallandaine and C. O. Rodgers, along with President Bell will be delegates, and if a substitute is required S. A Speers will fill in. A resolutions committee was named consisting of C. O. Rodgers, J. G. Connell, R. J. Forbes and Geo Johnson.

The provincial minister of agriculture will be asked to name an inspector at Rykerts-Porthill in order that California fruits may come in by that route direct from Spokane. At present there is no inspector and local retailers are forced to buy these fruits in Nelson at a price somewhat higher than they could lay them down in Creston were the inspection service available. In order to incur little, if any, expense in this connection the minister was asked to name Chas. Davis the officer at Rykerts, to act as inspector.

The unsanitary condition of the village in the area just north of Canyon street, due to defective toilets, was brought to the attention of the board and after some discussion passed along a resolution to the village council asking for action to abate the nuisance at once by the naming of a health officer. A le ter was sent the Women's Institute asking them to use their influence on the village council for immediate action.

Some time ago the board wired W. K. Esling, M.P., asking him to use his best endeavors to have the English pound sterling legislation extended to include fruit. They also asked him to work hard to have the sales tax of two cents a pound on sugar removed, as it would seriously cut down the demand for this commodity for fruit preserving. Mr. Esling replied that he was bestirring himself about the stabilization of the pound, but he was as mum as an oyster concerning what he proposed to do regarding the removal of the sugar tax.

A resolution from Burnaby regarding legislation to help out the unemployment situation found the going a bit rough and was eventually ordered filed.

BABY'S OWN SOAP
Best for Baby — Best for You

WORLD HAPPENINGS BRIEFLY TOLD

The Salta Observatory reported that volcanoes in the central Chilean mountain region were moderately active, with indications of intense activity in the near future.

Prof. Albert Einstein, who renounced his German citizenship because of anti-semitism in Germany, has accepted an invitation to become a member of the faculty of University of Madrid.

The French naval air force was ordered to help maintain order along the frontier of Djibouti territory in French Somaliland, Africa, where several rebellious Abyssinian tribes threatened trouble.

The honor of being the first woman professor in Scotland has fallen on Miss Cecilia J. MacTaggart, of Glasgow, who has just been appointed to the chair of Biology in the Anderson College of Medicine, Glasgow.

Calgary school board will take court action against parents who keep their children from attending school in protest against the city reverting to the summer unemployment relief schedule.

Wyoming has lost a titled ranchman and England has gained an earl. Oliver Henry Wallop, 72, renounced his allegiance to the United States, placed his chaps in mothballs and became the Earl of Portsmouth, the 99th ranking peer of England.

Alberta will have only two district courts if an amendment to the Districts Courts Act, submitted to the legislature, is approved. At present, there is a district court in each of the 16 judicial districts of the province.

Poultry raisers in Western Canada are finding a market for their products in Great Britain. In the last two months of 1932, 1,500,000 pounds of fresh Saskatchewan and Manitoba turkeys were shipped to British markets.

Arthur Bierwagen, of Stettler, Alberta, has been awarded the Elizabeth Imrie memorial scholarship for 1933 at the University of Alberta. This entitles the holder to journey to Geneva for a summer course at the Zimmern School of International Affairs.

Argentine Delicacies

One Called "Palmito" Entails Cutting Down Palm Tree

The visit of the Argentine Mission to London has already had its influence on restaurants. Many are specializing in dishes and delicacies peculiar to South America. One of these is "palmito," an hors-d'oeuvre very popular with the Prince of Wales. He first tasted it in Buenos Aires three years ago. Its preparation entails cutting down a palm tree. The heart is then cut into cubes, soaked in oil, and served with lemon, anchovies, and sliced olives.

"What an appropriate-looking hot-dog stand!"

"Yes; it's made of dogwood and covered with bark."

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS
Wake up your Liver Bile
—No Calomel needed
When you feel blue, depressed, sour on the world, that's your liver which isn't pouring its daily two pounds of liquid bile into your bowels.
Digestion and elimination are being slowed up, food is accumulating and decaying inside you and making you feel wretched.
Mere bowel-movers like salts, oil, mineral water, laxative candy or chewing gum, or roughage, don't go far enough.
You need a liver stimulant. Carter's Little Liver Pills is the best one. Safe. Purely vegetable. Sure. Ask for them by name. Refuse substitutes. 25c. at all druggists. 52

A Cold Summer

Prediction That the Sun Will Show Less Heat For the Next Two Years

A prediction the sun will be colder for the next two years, with the possibility the earth will be affected in a way as yet unknown, was issued by Dr. Charles G. Abbot, secretary of the Smithsonian Institution.

Dr. Abbot already has had some success as a predictor of the sun's "weather." In 1930 he forecast two warm years on the sun, which in general has been fulfilled. Measurements have shown the sun has been giving out considerably more heat than normal since then.

Dr. Abbot's prediction is based on long study of periodical rises and falls in the sun's heat.

CHARMING DAY WEAR IN JUMPER MODEL—AFFECTS PRINCESS LINES

Loveliness for daughter or for mother.

Jumper dresses are so smart! Of course you'll want this princess model, so youthfully charming.

It's carried out in navy blue crinkly crepe silk. The guimpe is maize plaided organdie. It's cunning the way it buttons down the back with tiny yellow ball buttons.

Pin tucks make the waistline fitting of the jumper. And incidentally, the jumper is a one-piece affair. Made in a jiffy!

A printed crepe silk would be effective for the jumper with the guimpe of plain toning crepe.

Style No. 554 is designed in sizes 14, 16, 18 ,20 years, 36, 38 and 40 inches bust.

Size 16 requires 2⅞ yards 35 or 39-inch, with 1¼ yards 39-inch for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Barter Party Is Latest

Social Event Held Recently In Buffalo Proved a Success

Bartering has reached the stage of social function in Buffalo, not merely because adapting amusement to hard times is a fashion of the day, but also because there is fun in novel experiences.

The Currents Event Club, made up of women who hardly are in the economic stage which makes bartering necessary, has set the example with a barter party, and the members had such a good time that they voted to make it an annual event. The objects offered for barter were bracelets, necklaces, book ends, preserves, cakes use of automobiles, offers to sew and mend, orders for gasoline, bridge lessons and a multitude of other things representing the activities of the modern woman.

To Take Precautions

Parts Of Saskatchewan Threatened With Hopper Plague

Early precautions against the outbreak of a grasshopper plague in parts of Saskatchewan are urged upon farmers by officials of the department of agriculture.

Severe outbreaks of the plague are expected in southeastern Saskatchewan in the Estevan area, comprising a semi-circular tract of land including the towns of Torquay, Huntoon, Willmar, Nottingham and Carnduff. The badly affected area also takes in a longitudinal strip up the centre of the province, starting in the south at Assiniboia and stretching far north in a narrow area to the southern boundary of Saskatoon. Lesser ares are located at Neidpath, Piapot and Sceptre.

Protection For 'Planes

Ice Umbrella Will Shield Hub Of the Propeller

An ice umbrella for propeller hubs, a device said to overcome the last remaining ice peril for aeroplanes, was announced at Cornell University.

This umbrella shields the hub of the propeller.

The danger is not from the ice on or directly in front of the hub, but the danger is from the ice spreading in both directions outward along the whirling blades.

Has Bullet-Proof Car

Viscount Makoto Saito, Japan's elderly Premier, has bought a large armored American automobile. It is bullet proof against small weapons. The machine, costing $6,000, is a closed limousine with bullet-proof glass. Threats against the Premier's life have been increasingly frequent. His two predecessors were assassinated by nationalist fanatics.

SUNDAY SCHOOL LESSON

APRIL 23

CHRIST APPEARS TO SIMON PETER

Golden Text: "Because I live, ye shall live also."—John 14:19.

Lesson: 1 Corinthians 15:1-8, 20-26.

Devotional Reading: 1 Corinthians 15:51-58.

Explanations and Comments

The Historical Evidence Of the Resurrection Of Christ, verses 1-8.—"Now, brothers, I declare unto you the good tidings which I preached while I was with you at Corinth," Paul wrote his church there. The Corinthians were not in danger of denying Christianity, but of not accepting its true teachings as Paul had proclaimed them, and so he continued: "The good tidings which you received, to which you subscribe, if you remain true to my preaching—unless you believed in vain."

"If I believed in immortality as you believe in it, as you profess to do, I should live a far better life than you appear to live. I should strive more earnestly and bear more patiently. I do not think I should ever be troubled with a fear, or worried with an earthly burden. I think I would be all sunlight and joy if I believed as you do in eternal things—in resurrection and a life beyond in which all things will be made right."—Harriet Martineau.

Most important of all the good tidings which I declared unto you, which I was told [probably by Peter and James on his visit to Jerusalem recorded in Acts 9:27, 28], is that Christ died to atone for our sins according to the scriptures, that He was buried; and that he was raised on the third day.

"Oh, vanquished grave of Jesus whose chill could work no change upon His heart!
Oh, deep, deep grave of Jesus whose depths can hide a whole world's sin!
Oh, glorious grave of Jesus through whose gloom lies the pathway to Immortal Life!"—Ralph Connor.

That He appeared to Simon Peter (Luke 24:34); to The Twelve (Paul keeps the symbolical number, though Judas was dead); then to more than five hundred at once; (usually identified with Matthew 28:7, 16-20), some of whom are dead, but the greater number are still living (and you can have their direct testimony, if you wish). Then He appeared to James, the brother of Jesus Acts 15:13; Gal. 1:19); then to all the apostles, just before the Ascension (Acts 1:4). And last of all, as to the child untimely born, He appeared to me also, in the way to Damascus (Acts 9).

Celebrating Its Jubilee

Alexandra Club Was Started In London By Women

The Alexandra Club, oldest of women's clubs in London, is about to celebrate its jubilee. It was launched in a day when women of good social position could not stay at hotels unless they were formidably chaperoned. As to eating a meal in the public dining-room of an hotel or restaurant in 1883, it was simply not done by "gentlewomen." The Alexandra Club was started by a bold band of pioneers, who were irked by those restrictions. So carefully was it conducted that no man was allowed to enter the premises. To this day men are only tolerated at teatime.

Disease-Resistant Wheats

Small Quantities Of Seed Are Now Made Available

Highly disease-resistant wheats have now been produced that are perfectly satisfactory from the standpoint of quality and agronomic behavior, the associate committee on field crop diseases announced at the conclusion of its fifth annual meeting in the Dominion Rust Research Laboratory in Winnipeg, Dr. C. H. Goulden, of the laboratory, presented the report.

"It seems that out of 33 strains in the co-operative tests of 1932 at least six are suitable for distribution to farmers, but only small quantities of seed are available at present, and it will take two seasons to increase the quantity available to the required point," the statement read. "In the meantime, commercial milling tests will be made on the strains selected and further field tests, with a view to reducing their number to two or three adapted to the varying conditions to be found in the wheat-growing area.

"Every effort will be made from now on to increase the seed of these wheats as rapidly as possible."

Sharing Large Houses

Fashion Introduced In London By Duke Of Connaught

In these hard-up times people in London are trying to solve the problem of being saddled with houses too large for them by dividing them into family flats. Instead of young married couples taking small houses in Chelsea or elsewhere, they instal themselves in part of the parental home with separate housekeeping of their own. The idea was started by the Duke of Connaught, who gave Lady Patricia Ramsay, an "apartment" in Clarence House when she married.

Made Success Of Hobby

A striking record was made by Constable Carl F. Wallden, of Stockholm. He recovered 21,000 lost or stolen bicycles in his thirty-two years of service. He has just retired on a pension. Finding missing wheels was a hobby with Wallden.

CHAPTER IX.—Continued.

A little after gray dawn Alan rebuilt the fire, cooked breakfast, and reluctantly awakened his partner.

Later, when they skirled out to the 'plane, Buzzard glanced at the tanks and remarked tersely:

"I hope your buddy, this Hardsock, has got some gas and oil out to that lake. It'll be our finish if he hasn't."

"Bill will have it there," Alan assured. "He may not be there himself, he's probably on duty; but we agreed exactly where to cache it. It'll be waiting for us."

They cdimbed in, taxied twice around the lake to warm the spluttering motor, took off and headed north toward Goose Point at Lake En Traverse.

With the heavy rains stopped and the insect scoruges abating, Alan knew the bandits were on the move again or shortly would be. When they did stir, he wanted to be there on the Big Alooska to look out for Joyce.

Ever since he came to believe that Dave MacMillan knew nothing of the crime, he had been puzzling about that pack of stolen furs. Something dark and sinister lay behind that pack. There was some connection between the trader and those criminals. but what?

Alan reasoned: "Those furs didn't get in that shed by accident. Those men might have had a grudge against Dave MacMillan and planted them there. They might have figured he'd show them to us and get in hot water. That guess is at least possible. If it's true, then their grudge might lead them to strike at Joyce."

If they intended anything against Joyce, they doubtlessly would attempt it just before they started eastward on their trek through the Great Barrens and Strong-Woods. Alan had dreamed of that, dreamed of her being captured and taken along, as the bandits had captured Margaret Fournier.

With Haskell refusing to extend her any protection whatsoever, Alan felt that he and he alone stood between her and a terrible danger. If anything happened to the 'plane, or to him and Buzzard. . . . .

Looking ahead through the propeller disk, he glimpsed the great blue lake of his rendezvous with Bill. A few minutes later on the northern shore he sighted Goose Point reaching out into the sunlit waters of En Traverse.

Leaning forward, he pointed out the promontory to Buzzard and shouted into his partner's ear:

"That's the place. Glide down and light, close in as you can. I don't see Bill there, but he probably couldn't get away from duty to wait for us. Our supplies are cached in that red-willow thicket back next to the wood. We'll go ashore and get them."

Buzzard cut off the ignition. The engine roar stopped. As the 'plane glided down at a mile-long tangent and swept over Goose Point, Alan leaned out into the slip-stream and looked under keel, searching the flag-and-willow headland for a possible sight of Bill Hardsock.

Hardly expecting to meet Bill, he was not surprised when his old partner failed to show up. But as the machine glided silently over the point, his eyes were caught by an object there on the muddy landwash. At a second glance he saw it was a large gasoline drum lying in full view at the very tip of the headland.

The sight of the drum startled him. He queried silently: "Why the devil did Bill put that thing out there so glaring? He didn't need to draw my attention; we arranged about the cache."

Beyond the point the 'plane touched the surface, plowed on through a shower of spray and came to a stop three hundred yards off the landwash.

In the scarlet-and-gold police launch, hidden behind a low-sweeping balsam at water edge, Inspector Haskell and Corporal Whipple watched the machine whirr low over the point. As it came down and down, Haskell clutched his rifle a little tighter and watched intently.

His heart leaped as the machine touched the wavelets ,skimmed on a little distance, and came to a stop.

"They're going ashore," he breathed exultantly to Whipple, as though unable to believe his incredible luck. "We'll skim out and ram the 'plane. Get ready!"

Uneasy, Alan stood up in the cockpit and searched the headland with his glasses. Over and over he kept telling himself that it wasn't like Bill his cautious old patrol partner, to roll that drum of gas out there.

While he was searching the point, he felt Buzzard excitedly grasp his arm.

"Alan! Look! . . . Lord's sake!—look over there!"

Alan whirled and looked where he pointed, at the southern shore of the lake eight miles away.

On a long timbered headland there a sudden sheet of flame had leaped up nearly sixty feet into the air and stood out above the tree tops, with a fiery puff and cloudlet of smoke visible for miles and miles across the open water. A few seconds later the flame died down a little, as though it had been of explosive origin, but a clump of paper birches up which the flame had raced still continued to burn like a gigantic torch.

Focusing on that distant headland, Alan saw nothing except the fire-wrapped birches. As he brought the glasses down, mystified, frowning, his uneasiness swept through him again, sharp and insistent. That suspicious drum of gasoline—Bill surely wouldn-t have rolled it out there. That huge burst of fire across the lake—it had some meaning.

"Buzzard, something's wrong here! All wrong! I don't like the idea of going ashore here. If something's wrong, you don't know what we might be walking into."

"Well, what're you going to do? We've got seven gallons of gas in the wing tank and five in the emergency, and we can't get far on that!"

"Maybe so, but I'm not walking into any trap. Somebody's over there where we saw that big gob of fire. I'm suggesting we get into the air again and hop across and have a look-see. That's our best bet. This layout here is all off-color and I know it."

"All right. We'll hop across. But a couple more hops around over this landscape, and we'll be rocking on the wavelets."

From the height of a hundred feet Alan looked ahead through his glasses, scrutinizing that timbered point where the birches were still ablaze.

He started as the glasses picked up a tiny man-figure far away on that headland. Watching he saw it rush out upon the extreme rock tip. With the 'plane whirling nearer, he caught the figure in sharper focus—and recognized Bill Hardsock!

Waving his arms, hat and part of a pine tree, Bill was frantically trying to draw their attention.

Alan, leaned forward, cupped his hands and shouted to Buzzard:

"That's Bill! There on the headland. Light and taxi in. He's waving us down, so it must be safe. We'll soon see what the trouble is."

They angled down on the water and skimmed close in ashore. In a canoe Bill came paddling out to meet them.

"I knowed you'd make it, Alan!" he panted, looking with marvelling eyes at Buzzard and the 'plane. "I knowed you'd show up sometime. The gas and oil—that is, most of it—it's right ashore here, ready for you. There's more cached up the Alooska, too. I was scared. . . . When you lit down over there . . . Lord! I was afraid you were a goner!"

Hastily inttroducing a new partner to an old one, Alan demanded: "What d'you mean, Bill? What under heaven are you doing over here? What happened? Man, you're all shot!"

"Am half-dead," Bill admitted. His voice was thick, he could hardly stand up. With the long strain over, a fearful reaction had set in. He looked ready to fall down dead asleep.

"But what happened?" Alan repeated.

"Alan, that Johnny Jump-up caught onto our trick. He was out to bag this air machine and nail you two. And he came skittish close to doing it. Lemme tell it:

"I had those drums cached over there on Goose Point like we arranged, and I was waiting there, never suspecting a thing. One evening . . . Must've been four or five days ago; Ive'd—an near lost track of time . ." Anyway, I was sitting there in the willows slapping mosquitoes and listening to a couple whisky-jacks raise Cain with something back at the timber edge.

"I hadn't nothing much to do, so I sort of moseyed back that way to see what all the fuss was about. When I got up pretty close I all at once smelled tobacco smoke, cigarette smoke. Just a faint whiff, but no mistake about it.

"'What the h—l?' says I. 'Who's smoking Turkey tobacco around here?'. It made me leery right away. I followed my nose up-wind and snuck up real careful. There in the first drogue of balsam was a Smoky, that Ogi-Tomax, sitting against a tree, lighting one cigarette on the butt of the last. They were that kind of cigarette that Haskell gets clear from Paris, Alan.

"When he finally got wise to somebody being near, he grabbed for his rifle. But I jumped for him too quick and hit a couple times, and while he was coming out of it I lopped that gun of his around a tree. Then I collared him and asked him what the condamnsternation his intentions might be. At first he closed up like an oyster and wouldn't do nothing but grunt and look sour. I was suspicious of him laying low there watching me, so I up and lammed h—l out of him then and there till he did pry open his jaws.

"Haskell had hired him to shadow me and spy out what I was doing. He must have got hep somehow to me taking that gas. And he and that fishworm Whipple were coming there to Goose Point in the launch to get me, gas, oil, then lay low and nail you two when you lit down. Two bits to a shirt button they're over there right now!"

As he thought how close he and Buzzard had come to going ashore and being captured, Alan shuddered.

Bill went on: "When the Smoky told me that . . . Say, did I make some tall tracks? I never got such a wiggle on in my life. With the Smoky helping, I made two trips across the lake and snaked the drums all away—all except one drum when I heard the launch coming and didn't have time to take—"

"It's still over there," Alan interrupted. "They rolled it out in plain sight like a decoy, but instead of that it made me suspicious. They overplayed. But what got you all sot this way, Bill?"

(To Be Continued).

for BURNS

Mix equal parts of Minard's and sweet oil, castor oil, or cream. Spread on brown paper. Apply to burn or scald. Before long the painful smarting stops

MINARD'S "KING OF PAIN" LINIMENT

WOMAN LOSES 28 lbs.

Trips Upstairs Like a 2-Year-Old

A woman writes:—"Three months ago, after much argument, I was persuaded against my will to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. After three weeks of Kruschen I had lost 5 lbs. 4 ozs., and I felt five years younger. I really must say I feel a different woman. My age is 37 years. I have now lost 28 lbs. to date, and while before, to go upstairs was a great effort, now, as my husband says, I trip up like a two-year-old."—(Mrs.) S.G.B.

Kruschen Salts keep the system free from encumbering waste matter. Unless this wastage is regularly expelled it will give rise to rheumatic and other body poisons. And Nature is liable to take the defensive measure of storing this poison-breeding material out of the way in the form of fatty tissue. Unlike most salts, Kruschen is not merely a laxative. It is a combination of six salts which have a tonic influence upon every organ, gland, nerve and fibre of your body.

Guard Your Child Against Diphtheria

Toxoid Treatment Is Simple and Harmless

Diphtheria is a serious disease of the nose and throat caused by germs. It selects young children as its victims. Many children who have had diphtheria are left with some weakness, serious heart trouble, or even paralysis.

Protect your child against this foe of happy childhood.

Toxoid treatment will protect your child.

This treatment is given in 3 visits, and is simple, harmless, and lasting.

Your family doctor can give your child this protection.

If you have no family doctor, ask your health officer to advise you.

THE RHYMING OPTIMIST

By Aline Michaelis

OASIS

As trees are in the desert,
As island in the sea,
Or the first star at twilight hour,
So are you, my love, to me!

The traveller on Sahara
Where all is burning, bare,
Who finds a group of waving palms
Has gained an Eden there.

The captain of a vessel
Long tossed by wave and wind
Who sights at last a little isle,
Leaves fear and care behind.

To you, my cool oasis,
My fruitful isle of rest,
I turn always with rapture's torch
Ablaze within my breast.

The drink within the desert,
The little isle at sea,
These things, and more, are you, my love,
Through all of life to me!

Left Large Estate

John Galsworthy, prominent British novelist and playwright, who died last January 31, left an estate of £88,587 (about $442,945 at par). Details of the division of the estate were not revealed, excepting a provision no biography of the great author, who won the 1932 Nobel prize for literature, be written without consent of his widow.

Branded Beef Sales

For the month of February of this year the total amount of branded beef sold in Canada was 2,299,968 pounds. This represents an advance of 756,410 pounds on the figure of 1,549,558 pounds for February, 1932, and much more than double of the 983,571 pounds in 1931. In other words, the sales of February in two years' time have doubled by more than 332,826 pounds.—Department of Agriculture, Ottawa.

It's SAFE!

Everyone accepts the fact that Aspirin is the swiftest form of relief for headaches, neuralgia, neuritis, periodic pain, and other suffering. If you've tried it, you know. But no one need hesitate to take these tablets because of their speed. *They are perfectly safe.* They do not depress the heart. They have no ill effect of any kind. The rapid relief they bring is due to the rapidity with which they dissolve.

So, keep these tablets handy, and keep your engagements—free from pain or discomfort. Carry the pocket tin for emergencies; buy the bottle of 100 for economy. The new reduced price has removed the last reason for trying any substitute for Aspirin.

ASPIRIN
Trade-mark Reg.

Little Helps For This Week

"Judge not, that ye be not judged."—Matthew 7:1.

"Why beholdest thou the mote that is in thy brother's eye; but perceivest not the beam that is in thine own eye?"—Luke 6:41.

Judge not; the working of his brain
And of his heart thou canst not see;
What looks to thy dim eyes a stain,
In God's pure light may only be
A scar, brought from some well-won field,
Where thou wouldst only faint and yield.—Adelaide A. Proctor.

When you behold an aspect for whose constant gloom and frown you cannot account, whose unvarying cloud exasperates you by its apparent carelessness, be sure there is a canker someplace, and a canker not the less deeply corroding because it is concealed.—Charlotte Bronte.

While we are coldly discussing a man's career, sneering at his mistakes, blaming his rashness, and labelling his opinions "Evangelical and Narrow," that man in his solitude is perhaps shedding hot tears because his sacrifice is a hard one, because strength and patience are failing him to speak the difficult word, and do the difficult deed.—George Elliot.

Dry For Many Years

Old Deed Bars Sale Of Liquor In Pennsylvania Town

A city of nearly 12,000 people, Vandergrift, Pennsylvania, may be destined to remain dry for the next sixty-two years. Even if the Eighteenth Amendment is repealed. The city was founded in 1896 on land deeded to the Vandergrift Land and Improvement Company by the old Apollo Iron and Steel Company. A provision of the deed is that "for a term of ninety-nine years from date no malt, vinous or spirituous liquors, shall be sold on this property." Under its terms, property on which that clause is violated would revert to the general owners.

"Your rolls are too small. I can put a whole one in my mouth."

"Yes, but that is not the fault of the rolls."

NERVOUS WOMEN
Take Lydia E. Pinkham's Vegetable Compound

"I am so nervous it seems as though I should fly" . . . "My nerves are all on edge" . . . "I wish I were dead" . . . how often have we heard these expressions from some woman who has become so tired and run-down that her nerves can no longer stand the strain.

No woman should allow herself to drift into this condition if she can help herself. She should give Lydia E. Pinkham's Vegetable Compound a trial. For nearly sixty years women have taken this wonderful tonic to give them renewed strength and vigor.

98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

She telephoned in the nick of time

"The little girl will be alright now," said Doctor Davis to the child's mother, "but you telephoned me just in the nick of time. A few minutes' delay might have proved fatal."

Again the telephone had proved a faithful friend in an emergency.

When time is precious and a delay may mean death, the value of your telephone is immeasurable. It's a great protection at a small cost.

BACK OF BEYOND

By OPTIMIST

Part X.

"In the meantime, the applicant figuring that he has made the grade also makes for the door, but right there is where he gets fooled for the Scotchman is there with bells on and wearing his jewel of office. He is supported by the other fellow I mentioned and the pair of them are watched and guarded by several more. 'Hands up!, says Scot No. 1, and the poor trembling applicant obeys. Scotty then goes rapidly through his jeans and takes what the sock grabber has left and in return hands another paper to the hay-wanter, verifying the remarks of the cross-examiners, and he is then allowed to go free

"Having gained his freedom, the hay-wanter (having beaten what he classifies as that bunch of boobs) proceeds to celebrate, and to that end makes his way to the place where they sell brand new liquor with antique labels. All the European brands are stocked, and all the liquor is aged; nothing under ten years old at the least, and if by chance the twenty year old stuff is sold out they garantee to get some made and shipped in within a week.

"The hay-wanter, transformed for the time being into a booze wanter, digs into the secret recesses of his underwear, or perhaps into his boot, and produces another sock, from which he selects enough coin to buy headaches for a few days, and, incidentally, the courage to tell those who tried to cheat him of his legal lawful hay cut, where they get off at.

"Of course this business of allotting hay takes quite a time because so many people want it; some for raising horses, some for cattle, some for pigs and sheep and goats and chickens and strawberries and cushions and mattresses; in fact it seems to be wanted for everything and everybody.

"Of course the commissioners are tickled to death to see the customers roll up; they don't care if one thousand people want to pay for hay that isn't there, that's their funeral and so the jamboree lasts for several days. After the senators have gathered up all the loose coin they can get hold of, the special train is requisitioned again and away they go; leaving the field work to the resident members of the department. These gentlemen in due time, are kind enough, upon request, to instruct the hay-wanters where to look for hay and sometimes the looking is not so good. However I think thes fellows hand out a fair deal, of course they have their friends, who hasn't, but taking it all around they handle a rotten job with fairness and tact.

"I don't know what they are paid for doing the work, I imagine not much, for my experience is, that the fellow who does the work gets it in the, neck, and the fellow that plans gets the wad. However, speaking of hay has made me as though I want it, what do you say, strange," "Motion carried," said the stranger, "where do I sleep." The farmer motioned towards the room where the stranger had previously washed, and with the vision of the comfortable looking bed before his eves, he bade the farmet goodnight and made his way into the room.

For a little while sounds came to him of the farmer banking the stove and adjusting things in the living room, but presently these sounds ceased and all was quiet. The bed was as comfortable as it looked, and in a short while the stranger was soundly sleeping. If the roosters crowed the stranger didn't hear them, nor the dog barking, nor the door slamming; in fact none of the things which are supposed to awake people in books, had any effect upon the stranger He slept until the farmer shouted to him to come and get it.

Tumbling out of bed the stranger found the sun well up to gladden the eyes, a good smell of bacon and coffee to gladden the nose, and a basin of fresh warm water to gladden the body; in short, life was worth living. Dressing washing and making his toilet took more than a minute but not long enongh to bring another hail from the farmer, who was pouring coffee when the stranger entered the living room.

"And how did you sleep," he was greeted. "Like a log," replied the stranger. "Fine," said the farmer, "now sit down and eat like a logger" to which invitation the stranger needed no second bidding. As they ate the farmer talked, telling his companion that he was detailed to assist a neighbor that day, grading the road so that the neighbor could haul loads of hay to his place without danger of turning over.

"We do most of our own road work here," he explained, "and perhaps by doing so we rub that fellow's fur the wrong way, by showing our independence I mean the incompetent in town," he amended." he amended. "What hour do you have to be on your job," asked the stranger. "Well," replied the farmer, "my neighbor asked me to await his arrival here, as he wants to fix up some of his gear in my shop, so don't hurry yourself on my account."

"Fine," said the stranger, "I'm a glutton for facts, and there are a few things I would yet like to discover." "Shoot," said the farmer, "I'll do what I can to enlighten you." "Then," said the other, "why is that ferry ship christened the Nightmare?" "It's generally considered that the ferry is the result of a nightmare of fts designer, its a nightmare to every person who has to use it and like other nightmares everybody will be glad when it has gone.

"One load of hay is all that the boat has room for, and even at that its a tight squeeze, half the load is usually brushed off by the packing case and the side. The apron adjusting gear is a menace to the life of the man who operates it, and generally speaking the whole thing is a bad dream; not a single feature is designed to meet conditions as they exist." "Did the member have any hand in the design of the craft," he was asked. "I think not, stranger. The member has shown absolute indifference to this part of the world, in fact I doubt his knowledge of its existence, certainly his attitude conveys that impression. On the other hand he may be just biding his time to freeze us out, to make room for a few more of his "ian" friends, anyway he's as full of tricks as those ancestors of his, I mean the one's that Darwin credits us with, at least, I cannot help thinking so after hearing the story that was going the rounds some time ago. Anyway I'll relate the story and you can form your own opinion."

Preservation of Eggs

Eggs may be preserved in lime water provided they are kept in tall vessels; either stone crocks or butter tubs can be used. The liquid covering the eggs is made in the proportion of three gallons of water to one pound of salt and one quart of finely slacked lime, the lime and salt to be mixed in the water. This is to be stirred frequently for a period of one to two days. Following this the fiquid should be permitted to settle. The crock or tub is then almost filled with eggs, placed, as far possible, with the small end down. The clear liquid solution of lime and salt is poured over them until the surface of the water is fully an inch above the top of the eggs. The vessel should be kept in an out-of-the-way place where the temperature will never exceed 50 degrees Fahrenheit. A thin covering ol lime will form on top of the liquid. If undisturbed this covering will protect the contents from outer influences.—Creston Farmers' Institute.

"Horsehide" *means* HORSEHIDE *at* EATON'S

Ever since they first brought their message into the homes of the Canadian people, EATON Catalogues have been justly famous for

Truthful Description of Merchandise

Every Westerner knows that when EATON'S says an article is "Horsehide," or "Rustless," or "Silk," or "All-Wool," or "Colorfast"—then that statement may be accepted with the same confidence as an affidavit.

Before each Catalogue is printed, the EATON Research Bureau—a scientifically trained group of experts—reads every statement to be made regarding all merchandise presented, and rigidly strikes out any slightest exaggeration or hint of misrepresentation.

Today, when expenditures must be given more consideration, and purchases more closely examined than ever before, this unswerving honesty in description is the EATON customer's greatest assurance of getting exactly what is expected from every shopping dollar.

T. EATON Co. WINNIPEG CANADA

EATON'S

Local and Personal

Mr. and Mrs. J. A. Fortin of Vancouver were weekend visitors at Creston, guests of the former's brother, W. H. Fortin, manager for Shell Oil Company.

The annual meeting of Creston Tennis Club is postponed from Thursday until Monday, April 24th, at 8 p.m., at the town hall. All interested in tennis are invited to attend.

CUTHBERT RASPBERRIES—Registered stock, free from disease, $2 per 100 canes. C nes are at my ranch ready to take away. P. Boffey, Creston. representing B.C. Nurseries.

The basketball league dance postponed from Easter Monday till tonight (Friday, 21st), will have an admission of $1 per couple, which includes supper. Music by Crestonian orchestra.

F V. Staples retur ed on Saturday from Beaverdell to which point he had driven an auto truck which was put into service at the Bell mine. He was at Nelson a couple of days at the first of the week.

The Young Women's Hospital Auxiliary are having a Daffodil Tea and sale of flowers and candy, at the home of Mrs. R. Stevens on Saturday, April 29th. There will also be a musical programme.

Mrs. A. Mathews of Nelson spent a few days here last week a guest of her son, Cecil Moors, and on her return to Nelso is accompanied by her granddaughter, Irene Moore, for a week's holiday.

Miss Dorothy Olivier of Blairmore is a holiday visitor with her parents, Dr. and Mrs. J. Olivier. She came by auto with her father, who was at Blairmore, taking Miss Cecille to spend the holiday there with old friends.

Jas. Anderson of Vancouver was a visitor here a couple of days at the end of the week, on business in connection with the Reclamation farm and other Alexander interests. It is announced that on June 16th, at Nelson, the International Waterways Commission will sit to consider the application for permission to raise the farm dykes.

Creston Valley Post Canadian Legion reminds all ex-service men and their ladies that they are invited to an entertainment at 8 p.m., Tuesday, April 25th, at the Parish Hall, to meet R. Macnichol the provincial secretary. It is hoped all will avail themselves of this opportunity to discuss veterans' problems, and that there will be a record attendance to meet Mr. Macnichol.

H. K. Oatway, a well known Creston druggist, who left here about ten years ago to reside in Vancouver, died in that city on Thursday last at the age of 51, and was buried in Mountain View cemetery in that city on Monday. Besides his wife he leaves theee sons, Ray, Mervyn and Wallace, and two daughters, Muriel and (Jean) Mrs. Fletcher of North Vancouver.

FOR SALE—Plant now: Coreopsus (perennial) Yellow Hollyhock: mixed Oriental Poppy: red Columbine (long speared); Delphenium (Larkspur). bright shades of blue, all at 50c. per dozen. Asparagus, Mary Washington, one-year old, $2 per 100. Black Currants (Boosskoop) $2 per dozen, $10 per 100. Strawberry plants, British Sovereign and Parson's Beauty, $4 per 1000. H. F. Robson, Wynndel.

Nelson News: A quiet wedding was solemnized at the Church of the Redeemer, Fairview at 7 o'clock, Saturday evening by Rev. Silverwood, when Marguerite Ethel, eldest daughter of Mr. and Mrs. W. H. Crawford of Creston, B.C., was united in marriage, to Robert, only son of Mr. and Mrs. E. Foxall of Wynndel, B. C. They were attended by Miss Ruth Compton and Arthur B. Ronmark of this city. They will reside in Nelson.

George Murrell, youngest son of Mr. and Mrs. Chas. Murrell, who arrived home in November from Liverpool, England, where he had put in three years training in the Mercantile Marine, training ship, Conway in that port, graduating with cadet papers, left at the end of the week for Vancouver where he joined the crew of the C.P.R. Empress of Canada, and is due to sail on April 22nd, on his first trip to the Orient. He takes the post of junior cadet on that craft and is apprenticed for three years.

The outstanding social event of the season to date was that of Wednesday evening when Creston Masonic Lodge was at home to the members and visiting brethren at the Parish Hall, the affair enjoying a splendid attendance and proving a thoroughly enjoyable evening throughout. This year, in addition to bridge, there was a variety programme that, combined with cards, made a very pleasant change. At the short session at bridge the high score honors were annexed by Mrs. T. W. Bundy and Fred Chapman, and second prizes fell to Mr. and Mrs. S. A. Speers. On behalf of the master of the lodge, Col Mallandaine extended the customary welcome and also presided as master of ceremonies throughout the evening. He opened the entertainment with an address on the early history of the district. Others contributing were Miss Kathleen Bundy in a piano solo and who was also heard with Mrs. J. E. Johnston in a piano duett. There was a recitation by H. Young, humorous sketches by W. Donaldson and W. McL. Cooper, and a cornet solo by John Finlay. G. John, who was the accompanist of the evening was heard to advantage in a piano solo, and Mr. and Mrs. Harold Langston contributed vocal solos that were heartily encored. The outstanding feature of the programme was the dancing by Miss Clare Bundy of Cowley, who was assisted at the piano by Mrs. F. Putnam. A very fine lunch was served at the close of the evening. The committee in charge, Messrs. T. W. Bundy, W. L. Bell and H Langston, were commended on all hands for the able all around manner in which the affair was handled throughout.

J. P. ROSS MAIN STREET CRESTON

Kitchener

Miss Edith Nelson spent a few days last week visiting her brother, Harold, who is a patient at Cranbrook hospital, and returned on Monday.

Miss Joyce Arrowsmith, of Creston, is spending her Eacter holidays at the home of Mr. and Mrs. E. Driffil.

Mrs. Flodin and her son, Willie, of Bull River spent a few days visiting her sister, Mrs. N. P. Molander, returning home on Monday.

Chas. Harmer returned last week from Victoria last week, where he had been on business.

Mrs. A. Lepage left on Tuesday for Cranbrook to attend the wedding of her sister, Miss Mildred Andeen, who is being married that day.

B. Johnson is having the foundation of the Kitchener Hotel repaired, and a new cement walk placed in front of the hotel.

The government road received a much needed grading last week.

Harry Redmile left on Tuesday on a visit with friends in Cranbro k.

Misses Betty Kemp, Peggy Truscott, Fanny Lewis and Nellie Payne, of Erickson and Creston, hiked up on Good Friday on a visit with Miss Hazel McGonegal, returning the same evening.

Erickson

Principal D. Tully of Erikson school is spending the Easter holidays at his home in Fernie.

Miss Clare Bundy of Cowley, Alberta, is here for the holidays, a guest of Mr. and Mrs. T. W. Bundy

Miss Kitty Littlejohn left at the end of the week to spend the Easter holiday with Miss Curtis at Slocan City.

Mr. and Mrs. T. Allen returned on Monday from a weekend visit at Nelson.

W. C. Connell of Hamilton, North Dakota, is a visitor here at present with his brother, J. G. Connell.

Mrs. J. E. Healey was tendered a surprise party on Monday afternoon by a company of friends, on the occasion of her birthday. She was remembered with an attractive gift, and a dainty lunch brought a pleasant afternoon to a close.

Mrs. G. Cartwright was the victim of an unfortunate mishap on Monday when a dish of gasoline she was using for cleaning purposes exploded, burning her about the arms and hands. The blaze was extinguished before it did much damage.

Mrs F. Putnam, who has been at Vancouver for the past three weeks, due the serious illness of Miss Madeline, arrived home on Saturday. Madeline is reported to be recovering as quickly as can be expected.

All work at the West Kootenay P wer & Light Company dam at Goat River canyon was shut down Friday to Tuesday. A. Lambert, Fred Chapman, Jas. Reed and Sid Parker spending the holiday in Nelson.

Lister

Birth—On April 12th, to Mr. Mrs. Herman Sommerfeld, a daughter.

Mrs. A. Hobden, who has been a visitor with her daughter, Mrs. S. Whittaker, at Cranbrook, for the past few months, arrived home at the end of the week.

Ernest Stevens arrived from Trail at the weekend for a short visit with his parents, Mr. and Mrs. R. Stevens.

Mrs. B.B. Stallwood, Nelson, is spending the Easter week holiday with her parents, Col. and Mrs. Fred Lister.

The Community Society are having their Easter bridge at the schoolhouse on Saturday evening, with an admission of 15 and 10 cents.

The baseball fund benefit concert at the school on Wednesday afternoon last attracted a large turnout of parents who very much enjoyed the variety program submitted by the scholars. The collection taken amounted to $6.50. which will be used to purchase playing equipment.

Jos. W. Bell of Kimberley is here this month looking after improvements at his (Malthouse) ranch. He is having the house painted, and the four acres cleared and ploughed last fall is being planted to alfalfa.

The Jig-Saw Puzzle Of Life.

Have you participated in the prevailing rage or fad of these latter days of the depression.—the jig-saw puzzle?

If so, what did you get out of it? A few idle hours of lazy enjoyment as you sorted out the many and varigated colored pieces, cut in all their fantastic shapes, and sought to fit them together? Is that all you got for your money, your time, your intent concentration? If so, it was largely waste, and you would have been better employed in reading, or some light occupation, or even lying down in quiet and complete relaxation.

Or did you, as your fingers played with the fascinating bits of colored cardboard and you pieced them together until out of a jumble of colors the design of the artist began to emerge into a thing of beauty, allow your thoughts full sway, and even study your own reactions to the comparatively idle task in which you were engaged?

For example, as hour after hour slipped by while you selected this piece and that and manoeuvred them about the table, endeavoring to make them fit where it seemed they ought to fit, but would not, did you become more and more impatient, or were you actually and truly developing what has become to many people,—the lost art of patience? The question is: Did indulgence in this jig-saw pastime strengthen or weaken your will power to cope with the real puzzles which life itself presents?

Did working over the jig-saw suggest anything else to you? Did your employment in this form of recreation for tired bodies and troubled minds, lead to more serious thought, to a contemplation of the complications of life, the consolations of life, and, as you finally solved the puzzle, the rewards and the beauty of life? Did you pause in contemplation of your own life, and give some heed to the pattern you were weaving out of the many pieces under your control to make it a thing of beauty, or mar it with ugliness?

A well known authoress, writing in the current issue of a popular magazine, tells how she spent most of the night working over one of these intricate jig-saw puzzles. As she worked well into the small hours, the pattern of the puzzle continued to elude all her efforts; she could not make the design come together; it persistently lacked both coherence and purpose. She became discouraged as the hours went by, growing both impatient and inaccurate, until, at last, in extreme desperation, she laid one improbable piece against the other one, and brushed aside those sections she had nearly completed.

Having almost given up hope of successfully solving the puzzle, she saw a certain inoffensive fragment off to one side of the table. It was a tiny piece, and yet, when she had fitted it into the puzzle, her difficulties suddenly vanished. For that tiny fragment held the necessary clue to the puzzle's color and line. Set in its place, the pattern became clear and the design stood out in bold, brave fashion. In fact, in a very short time the jig-saw puzzle had ceased to be a puzzle; it had become a picture.

Surveying the finished picture, this authoress said to herself: "Life is pretty much this way. It is a mass of irregular, jagged pieces until we are able to find the secret of it. It seems absolutely without meaning until we've located the key piece."

The key piece—it is all important whether in working out the solution of a jig-saw puzzle of that still more intricate pattern of our lives. As the lady we have quoted further says, many of us work doggedly through the long darkness over the jig-saw puzzle called life. Often our profitless labor carries us well into the dawn, until we meet that hour when vitality is at its lowest ebb. We are prone at this time to grow confused and inaccurate, tearing up the bits that we have put in order, trying to fit impossible sections together in a foolish manner.

This is a dangerous period in our lives,—in the lives not only of individuals, but of communities and states. It is then we are inclined to engage in rash experiments, to forsake all the groundwork and experience of the past. We do not always realize that we are discouraged and confused because the key piece is missing. But it is there, and invariably, even though that piece has long eluded us, we will find it—if we have patience and vision. It is not the part of wisdom to destroy the whole picture, but to continue to hunt for the missing piece,—the key piece,—that will serve to point out where other pieces have been misplaced, where additional pieces should be placed, until the whole stands out strong and splendidly completed.

And here is the greatest and kindest truth in the whole world,—the key piece is usually a little thing that lies close at hand! This is true in a jig-saw puzzle employed to pass an idle hour; it is true of the key-stone of a great and beautiful building; it is true in life itself no matter how complicated and tangled it may seem.

As you work over your jig-saw puzzles, of what are you thinking? What are you making, what do you intend to make, of the all- important jig-saw puzzle of your own life?

Unlooked For Discovery

Tests At Cornell University Indicate Diet May Cause Heart Trouble

An unlooked for discovery that diet may cause heart disease comes to light with the death of "Depression," the prize synthetic diet goat of Cornell University.

Apparently in perfect vigor, "Depression" bot excited a few days ago and dropped dead. Autopsy showed death due to degenerated heart muscle, in the ventricle.

"Depression," moreover, was the sixth goat fed on the synthetic diet, and all the others died of heart disease. This was a 100 per cent. record for whatever caused the fatal diet deficiency.

The diet substitutes cellulose for hay. It includes starch, casein, the solid part of milk, various mineral salts, yeast and cod liver oil. It is fed to goats and other animals in the Department of Animal Nutrition under direction of Dr. L. A. Maynard and Dr. C .M. McCay. The object is to discover the food factors best for animals.

Depression was 10 months old, the first herbivorous animal in history to live any length of time on synthetic "hay." His age brought home the significance of the diet heart complex.

Whether there may be human lesions in the heart diet factor is not known. In view of the fact that heart troubles cause more than twice as many deaths annually in the United States as the next most fatal disease, cancer, scientists regard the goat experiment with interest.

FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hems; and as the part that had been turned under was darker than the rest, I redyed the entire dress, after having bleached the goods, following directions in the Diamond Dyes package.

"I used Diamond Dyes for the redyeing, of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors—fast to wear and washing. Friends think my things are new when I redye or tint them with Diamond Dyes. They do give the most gorgeous colors!"

Mrs. G.C., Levis, Quebec

Helps With Inventions

Wife Of Noted Inventor Gives Him Valuable Assistance

Mrs. Alice Mary Herbert Russell Brown, who announces in the "London Gazette" that she intends to assume the Christian names of her husband, Mr. Sydney George Brown, F.R.S., instead of her own, is a most able lady, who has taken a leading part in developing her husband's amazing electrical and gyroscopic inventions. These have won him many distinctions. He is one of the greatest and most prolific inventors of modern times. By means of one of his inventions the Flying Corps first received wireless messages on airships and aeroplanes and his gyroscopic compass is one of the most interesting marine devices of the age.

An International Preacher

Has Church In Canada and Also In United States

With a church in British Columbia and another in Alaska, Rev. Frank H. Bushfield, formerly of Winnipeg, can claim to be working out church unity on an international scale.

One congregation worships in the United Church of Canada at Stewart, B.C., and the other, the Methodist Episcopal Church of United States, at Ryder, Alaska. Mr. Bushfield belongs to the Prince Rupert Presbytery of the United Church. He is a graduate of Victoria College, Toronto, and has served in Alberta and Vancouver.

A Good Egg Story

A versatile hen of New Rochelle, New York, laid two eggs, one of which was battleship grey and the other jet black. Then she laid an ordinary white one, much to the relief of Mrs. Michael Circelli, her owner. The white one had a double yolk. The colored eggs are not broken, so the state of their interiors is not known.

W. N. U. 1000

National Dairy Council

Allan C. Fraser, Of Calgary, Is Appointed Secretary-Treasury

Allan C. Fraser, well-known Calgary agriculturist, has been named secretary-treasurer of the National Dairy Council of Canada, succeeding W. F. Stephen, of Ottawa. Announcement followed the close of the two-day annual meeting of the council at Toronto.

W. H. Forster, of Hamilton, and P .C. Colquhoun, of Maple Creek, Sask., were returned as president and vice-president, respectively.

Feature of the annual meeting was the amendment to the constitution providing equal representation on the executive for producers and manufacturers. The latter had previously enjoyed two-thirds representation on the board. The number of voting delegates on the council was reduced from 33 to 18.

Producers named their executive members as follows: P. C. Colquhoun, of Maple Creek, Sask.; Norman Clarke, of Didsbury, Alberta; R. U. Hurford, of Courtney, B.C.; Hector Cutten, of Truro, N.S.; and W. L. Carr, of Huntingdon, Que.

Manufacturers' representatives on the executive are: Col. C. B. Price, of Montreal; W. H. Forster, of Hamilton; Robert Barbour, of Yorkton, Sask.; J. M. Carruthers, of Winnipeg, and W. G. Marritt, of Toronto.

Appointment of Mr. Fraser to succeed Mr. Stephen will take effect on the latter's 70th birthday, May 28.

Debate Via Radio

Speakers In Edmonton, Saskatoon and Winnipeg In Consecutive Discourse

The recent radio debate between representatives of the University of Alberta and the University of Manitoba was the first in local history and the third in a series. It was unique in that the public, listening in, heard speakers in Edmonton, Winnipeg and Saskatoon, in consecutive discource, without a hitch or mechanical difficulty.

Telephone wires connected the three stations; and four times during the broadcast the flow of sound between Edmonton and Winnipeg, and vice versa, had to be changed by reversing the repeaters. This operation, requiring thirty seconds each time, was acomplished so smoothly that the public was unaware of it. And as a flourish of mechanical perfection, the Saskatoon station broadcasted music, while the judges were arriving at their decision, which was heard by receivers tuning in on all three studios.

Such types of broadcasting are passing the stage of "stunting," since they reach the public completely and clearly. It is another indication of the possibilities becoming apparent in radio, of a serious and thought-provoking character.Winnipeg Free Press.

Bear Rugs Are Cheap

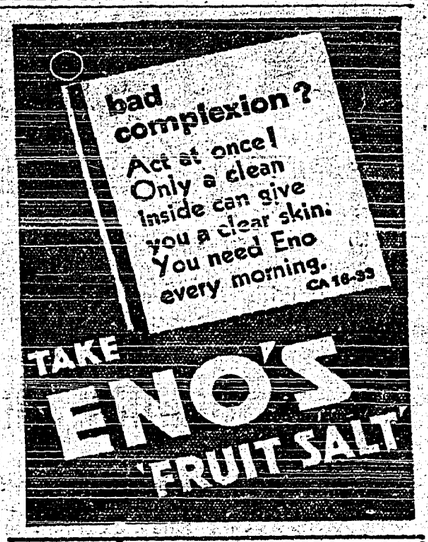
Some Selling At The Pas For Only Ten Dollars

Fur rugs for floor covering are coming back into style as the result of low prices for skins. Making of bear rugs and the mounting of heads and paws and claws has developed into quite an industry at The Pas.

Little white bear rugs, a novelty of the Churchill country, sell as low as $10. Little black bear rugs may be had for even less. A nice big polar bear rug is worth $75. Black timber wolves run up to $20.

Another Aid For Aviators

With the aid of radio apparatus it is now possible to take off at an airport, climb up through fog and storms and then, without once seeing the ground, to fly hundreds of miles to a certain destination, come down without seeing the ground and make a perfectly safe and normal landing.



Motorists Are Asking Outlet For Tourists

Seventeen Miles Now Limit For Driving Outside The Pas

Motorists of the thriving northland mining town of The Pas, are bitten with the wanderlust and yearn for new highways to conquer. The tired business man here who goes for a drive cannot travel far. Seventeen miles is his limit—to Clearwater Lake. Thus has arisen strong agitation for an outlet to the outside world, a project that would lay a 100-mile pathway through virgin wilderness to Hudson Bay Junction, in Saskatchewan.

A road of sorts to that point already exists but is not passable for cars. Brush has been cleared but grading has yet to be done. It is hoped to have this road opened up this summer and efforts are being made to have it graded as a relief measure. Motorists here have no opportunity to register high mileage figures on their speedometers. The traffic, made up of 80 automobiles and 35 trucks, occasionally gets into a jam owing to the restricted driving area.

The car driver has a choice of four highways at present. The road to Clearwater Lake, which is the longest, is the most popular. Two other roads stretch for three miles, the other highway measures but four.

Improving Wheat Section

Scientists Aim To Produce Same Quantity From Half the Acreage

Not the doubling of the wheat crop, but on the other hand producing the same quantity on half the acreage, and in that manner reducing the cost of production, is the aim of Dr. H. T. Gussow, Dominion botanist, who attended the conference of plant breeders, plant pathologists, and cereal chemists from Ottawa, and the western provinces held in Winnipeg.

Dr. Gussow said that while success is not yet achieved, its attainment appears within measurable distance, though several years' further research and experimentation will be needed before this aim can be said definitely to have been reached. Dr. Gussow's interests extend from the Atlantic to the Pacific, and he has assistants all over Canada working on new or improved varieties of different plants. He is now making a tour of the west inspecting the results secured at different points.

Potato Exports Heavy

Heavy shipments of potatoes from Prince Edward Island are being received at Halifax over the liens of the Canadian National Railways and indicate a strong revival in the export business in this line from the Nova Scotia port. About 300 carloads in all have been booked for export and steamers have been chartered to load full cargoes for southern ports.

The Maria, a fish that is plentiful in Lake Winnipeg, is sometimes called the fresh-water ling.

MILBURN'S HEART AND NERVE PILLS

Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes:—"My nerves were in such bad condition I found it almost impossible to get a good night's sleep.

I was also bothered with headaches and dizzy spells.

I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart and Nerve Pills I could hardly believe the change they had made in my condition."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

HITLER APPOINTS NAZI LEADERS AS GOVERNORS

Berlin, Germany.—Chancellor Adolf Hitler has added the post of governor of Prussia to his duties and immediately appointed Hermann Wilhelm Goering, one of the principal Nazi leaders and minister without portfolio in the federal cabinet, to serve as premier of the state.

The Hitler appointment as governor was approved by the cabinet, which also named General Franz von Epp, another Nazi, to serve as governor of Bavaria. The general has been acting as federal commissioner for that state.

Captain Goering, who is in Rome at present, is expected to present his Prussian cabinet list to the chancellor when he returns.

German scientists were angry about a letter written by Professor Albert Einstein from Belgium to the Prussian Academy of Sciences. In this letter, dated April 5, Professor Einstein described present day Germany as being "in a state of mass psychosis."

A report from Cologne said the Rhenish and Westphalian sections of the German People's party, which was founded by Dr. Gustav Stresemann, has decided to disband and urge its members to join the Nazi party. This was believed to spell the doom of the party, whose national executive committee will meet May 7.

The government published a law under which the terms of lay judges and jurymen will expire June 30, 1933, instead of ending normally December 31, 1934.

This means the ousting of both panels of Jews and Communists, and presumably also Socialists.

The same law prescribes the expiration on June 30 of the terms of office of all commerce courts judges.

An official denial was given here to reports in the Stockholm newspaper Social-Demokraten, which said that 247 persons, including 17 Nazis, 14 Jews and 216 Communists and Socialists had been slain in Germany from the time of the rechstag fire, February 27, until March 25.

The denial says: "The total political slain in March was not one-tenth thereof."

Mounties For Saskatoon

Unit Of Thirty-Five Sent From Training School At Regina

Saskatoon.—Thirty-five mounted R.C.M.P. men arrived by train from the training school at Regina, headquarters for Saskatchewan.

Under the command of Inspector L. J. Sampson, there are two corporals and 32 men in the group. All have horses, brought here in three horse cars over the Canadian Pacific Railway.

According to an official statement the Mounties were brought here to complete their training by mounted patrol work in districts tributary to Saskatoon. All the men have been billeted in a local hotel and their mounts have been stabled in a west side barn. Non-commissioned officers among the new arrivals are Corporals J. Hellofs and P. Cleary.

British Exports

Trade Figures Show Evidence Of Business Revival

London, Eng.—An improvement in British exports for March is announced.

Preliminary board of trade figures gave the March export total as £32,551,000, as compared with £27,928,000 for February, and £31,196,000 for March last year.

Imports show £56,346,000, as compared with £49,077,000 in February and £61,181,000 in March, 1932.

Death Of Scientist

Lausanne.—Jules Piccard, father of Dr. Auguste Piccard, explorer of the stratosphere, died here at the age of 68. He was a professor of chemistry in the University of Basel 40 years and was widely known for his scientific work.

Akron Naval Inquiry

Evidence Indicates That Mammoth Dirigible Broke In Mid-Air

Lakehurst, N.J.—A picture of the mammoth dirigible Akron dropping through darkness with its bow up at an angle of 35 degrees and hitting the water with a crash "like stepping on a penny box of matches," was given the United States naval court of inquiry here.

With the picturesque words of a sailor, Moody Erwin, aviation metalsmith second class, told the story of the flight that cost 73 lives. Erwin was one of three survivors of the disaster.

Erwin joined Richard E. Deal, boatswain, in telling of the breaking of longitudinal girders and the steep incline of the ill-fated airship following what both described as a terrific "gust of wind."

Both, too, testified the first break in the structure of the ship occurred in the air following the gust they described, whereas Lieutenant-Commander H. V. Wiley, the third survivor, changing his opinion, said the ship's framework did not break until the Akron struck the water. The break described by the two enlisted men was in longitudinal girders, on the right hand side, midway between the bottom and top.

Curb Reckless Skiing

More Stringent Regulations In Mountain Areas Are Recommended

Banff, Alberta.—Curbing of reckless skiing in mountain areas was sought as a consequence of the inquiry into the death of Dr. R. E. C. Paley, English scientist, who was killed in a fall from Fossil mountain while skiing over prohibited area.

A coroner's jury concluded its work with the finding Dr. Paley came to his death through misadventure while trying to traverse a steep snow slope on Fossil mountain. It added a rider the federal parks department draft stringent regulations governing skiing expeditions from all camps.

What action would be taken to safeguard skiiers within park limits was unknown here. Regulations barring skiiers from certain dangerous areas are now in force and all skiiers are warned of the prohibited areas by club officials on arrival at the camps. It was expected the department at Ottawa would obtain recommendations from the numerous ski clubs with a view to implementing local regulations.

Calgary Mill Rate

Property Tax For 1933 Set At Fifty Mills

Calgary, Alberta.—City council last night approved a property tax rate of 50 mills and asked the commissioners to redraft 1933 estimates on this basis.

Previously Mayor Davison feared the mill rate would be set at 53, the highest in the city's history, but council last night instructed the commissioners to lower the rate by one mill compared with last year.

Letter Of Forgiveness

Toronto, Ont.—In behalf of a group of Toronto clergy, a letter of forgiveness has been sent to John A. Machray at Stony Mountain penitentiary, to which he was sentenced to seven years for theft of funds from the University of Manitoba. Rev. H. F. Woodcock said the Oxford group had brought a "change of heart" to himself and fellow clergy, and it was decided to send a letter of forgiveness to Machray for the loss of church funds in his custody.

An Old Theory

Washington.—Cordell Hull, United States Secretary of State, described as antiquated, obsolete and bewhiskered the theory that a moderation of tariffs would flood the United States with the products of cheap foreign labor and drive down the U.S. standard of living.

Duties Against Cattle From Ireland

London, Eng.—A new scale of specific duties for live cattle for food imported from the Irish Free State was imposed by a treasury order. In future such cattle, instead of paying 10 per cent. ad valorem per head, will be divided into five classes.

ATTACKS SOVIET BILL

Sir Stafford Cripps, former Solicitor-General in the MacDonald Socialist Government, who declared himself opposed to the emergency bill passed by the British House, which gave wide powers to deal with the Soviet in the event that the forthcoming trial of six British subjects did not end satisfactorily. The bill received its third reading with a large majority.

No War Pension Reduction

To Effect Desired Economies Without Disrupting Present System

Ottawa, Ont.—No reduction in war pensions, but enactment of legislation which would effect desired economies without disrupting the present pension situation is under consideration by the government. Proposals that the income tax be applied to pensions and that, after a definite "deadline," no more dependents be added to the pensions list have replaced the government's move to suspend payment of pension to war-pensioners in the civil service.

The new plan is understood to have the approval of representatives of the Associated Veterans now in conference here. According to the ex-service men, the chief merit of the new economy lies in the fact that it will not affect existing pensioners, or at all events only those whose income is sufficiently large to bring them under the operations of the income tax. The small-salaried pensioners would not be disturbed.

Reindeer Trek Almost Ended

Ottawa, Ont.—The long trek of Canada's reindeer herd from western Alaska to the MacKenzie River delta is nearly ended. Hon. T. G. Murphy, minister of the interior, said recently the herd, which has been travelling since December, 1929, has arrived at the west bank of the Mackenzie River at the delta where it flows into the Arctic ocean.

Horse Breeders' Subsidy

Bonus To Assist Farm Horse Industry In Saskatchewan

Ottawa, Ont.—A bonus to owners of stallions in the province of Saskatchewan in which the Dominion and provincial governments will co-operate on a 50-50 basis was announced by Hon. Robert Weir, Minister of Agriculture.

The scarcity of good stallions in the prairie provinces and the shift by farmers from motor traction to the use of horses has made it necessary to assist the horse-breeding industry.

Because of conditions in the west with low grain prices many farmers found it difficult to finance the operations of tractors and in the spring of 1932 various horse breeders of the three prairie provinces approached Mr. Weir urging him uses be given to stallions which passed federal inspection.

"Each department agrees to pay 50 per cent. of grants to clubs formed this year under the federal club policy. They also agree to pay premiums to owners of all stallions which are not clubbed but that passed inspection by federal inspectors in 1932, and those that pass federal inspection this year," the statement reads.

The Soo Dominion

New Train To Operate Between Chicago and Vancouver

Chicago.—Co-ordination of railway services to the west to eliminate duplication will be undertaken with inauguration June 1 of the "Soo Dominion," a train to travel over the Chicago and Northwestern Railway, the Soo Line and the Canadian Pacific.

The train is intended to serve the Canadian Rockies region between Chicago and Vancouver.

R. Thomson, passenger traffic manager of the Northwestern road, said the co-ordination of train service between the Soo line and the Northwestern was "new to this region and is expected to prove beneficial to both roads."

The train will operate over the Chicago and Northwestern to St. Paul, over the Soo line to Portal, N.D., where it will be delivered to the Canadian Pacific, Thomson said.

Chicago Teachers Parade

Chicago.—Chanting "We want cash!" more than 1,000 demonstrators paraded through the Loop here in protest of non-payment of school teachers, stormed the offices of the board of education, and smashed their way through a door before seeing Orville Taylor, board president. The city owes teachers some $28,000,000 in back pay.

AKRON SURVIVORS IN WASHINGTON

Claude Swanson, United States Secretary of the Navy, is pictured as he congratulated Lieutenant-Commander Herbert Wiley and his two fellow-survivors, Richard E. Deal and Moody Erwin (background), on their narrow escape from death in the Akron disaster. The men flew from New York to Washington to give their official version of the catastrophe. They were referred to by Secretary Swanson as "members of as gallant a crew as ever served in the United States Navy."

INDIA WILL END TRADE TREATY WITH JAPAN

New Delhi, India.—The government of India announced steps had been taken to end the trade convention with Japan signed in 1905. The government has given Japan six months' notice of termination of the "most favored nation" clause of the convention.

Removal of Japan from the list of nations enjoying "most favored nation" treatment in the Indian customs tariff schedules is a protective measure to offset dumping, it was explained by Sir Joseph Bhore, commerce member of the viceroy's executive council.

The announcement was made while the legislative assembly was discussing Sir Joseph's motion for consideration of an anti-dumping bill.

The minister explained abrogation of the treaty with Japan was intended to offset the effect of special conditions such as Japan's depreciated currency, and other factors which resulted in the dumping of goods in this country at abnormally low rates.

India's greatest customer in recent years for her cotton has been Japan, but this is exported in the natural state and a great part of it is re-imported in cotton piece goods, Japan has gradually increased her advantage over the United Kingdom in selling cotton piece goods to India.

H.B. Co. Report

Improvement Is Shown Over Last Year In Annual Statement

London, Eng.—Substantial improvement over last year is shown in the annual report of the Hudson's Bay Company, Limited, for the year ended January 31, although a trading loss of £225,324 is reported after the allocation of £199,381 to depreciation.

Appropriate provision has been made for losses in respect of investments and also against stock values. In addition, the report tates, £106,297 has been provided against losses on sales and the disposal of properties. It has been decided to release properties which have become superfluous, although such sales may involve a book loss. Some of these properties were sold during the current year. Provision has, therefore, been made for the losses incurred and a reserve set up against further anticipated losses in this connection.

Currency Depreciation

Secretary For Dominions Refers To Situation In Australia and New Zealand

London, Eng.—J. H. Thomas, Secretary for the Dominions, told the House of Commons he does not think the depreciation of the Australian and New Zealand currencies were deliberate breaches of the agreements signed at Ottawa during the Imperial Economic Conference. Mr. Thomas said he did not think the question appropriate for the British government to make representations on. It was suggested it was done to help trade of those countries.

Alberta House Prorogues

Close Of Third Session Of Seventh Legislature

Edmonton, Alberta.—After putting 65 new acts on the statute books of this province, the provincial legislature was prorogued April 11th, by Hon. W. L. Walsh, Lieutenant-Governor.

The speech of his honor brought to a close the third session of the seventh legislature of Alberta which opened on February 9, just over two months ago.

Demand New Trial

New York.—The International Labor Defence League announced petitions to be presented to President Roosevelt would be nationally circulated demanding a new trial for Heywood Patterson, convicted at Decatur, Ala., in "the Scottsboro case," Patterson said he expected 1,000,000 signatures to the petitions within a week.

Local and Personal

List your property with J. G. Connell.

Order your spring plants early at Cook's Greenhouse.

Mrs. O. Parry spent a couple of days with friends in Nelson at the end of the week.

Miss Ada Lewis was an Easter weekend visitor with Nelson friends.

Now is the time to place your order for spring plants. Cook's Greenhouse.

FOR SALE—Baby's sulky, in good shape. Mrs. Bert Boffey, Creston.

Miss Merle McCaslin is spending the Easter holidays at her home in Salmo.

CRESTON CO-OPERATIVE FRUIT EXCHANGE

FREE PACKING SCHOOL

Those contemplating packing this season should enroll at the EXCHANGE Office now. Afternoon classes will commence very soon. Old packers are requested to attend at least some classes.

To ensure your position you must enroll now, and you will be advised as to time of commencement of classes.
