PROVINCE OF BRITISH COLUMBIA

THE MILK BOARD

ANNUAL REPORT

for the

YEAR ENDED DECEMBER 31

1974

Printed by K. M. MacDonald, Printer to the Queen's Most Excellent Majesty
in right of the Province of British Columbia.
1975

To His Honour the Lieutenant-Governor in Council
of the Province of British Columbia

MAY IT PLEASE YOUR HONOUR:

SIR: We have the honour to transmit herewith, in accordance with section 56 of the *Milk Industry Act,* the Twenty-ninth Annual Report of the Milk Board under that Act for the year ended December 31, 1974.

THE MILK BOARD

E. D. DAUM, *Chairman*
J. D. HONEYMAN, *Member*
C. H. P. KILLICK, *Member*

Vancouver, B.C., February 27, 1975.

Twenty-ninth Annual Report of the Milk Board

For the Year Ended December 31, 1974

This Report of the Milk Board is made in accordance with section 56 of the *Milk Industry Act* and covers the calendar year ended December 31, 1974.

LEGISLATION

Milk Industry Act

The Thirtieth Legislative Assembly did not pass any amendments to the *Milk Industry Act* during the Third and Fourth Sessions.

Milk Board General Orders

General Order 56 (B.C. Reg. 157/74), made on January 31, 1974, amending General Order 46 (B.C. Reg. 126/70), came into operation on February 1, 1974. The effect of this order was to repeal General Order 54 (B.C. Reg. 281/73) and to subdivide the classes of milk utilized for manufacturing. Class II milk remained as in previous orders with the exception that it was made applicable in the Cariboo and Central British Columbia area only. Class III milk is defined as all milk not used for the specific purposes provided in Classes IIIA, IIIB, and IIIC and carried an accounting value of $5.80 per hundred pounds of milk of 3.5 per cent butterfat content. Milk utilized in the manufacture of butter and skim-milk powder as a simultaneous operation was assigned Class IIIA with an accounting value of $5 per hundred pounds of milk of 3.5 per cent butterfat content. Evaporated milk was assigned Class IIIB, also with a $5 per hundred pounds accounting value for milk of 3.5 per cent butterfat content. Milk utilized in the manufacture of cheddar cheese was assigned Class IIIC, and carried an accounting value of $6.25 per hundred pounds of milk of 3.5 per cent butterfat content. The butterfat differential for Classes II, III, IIIA, IIIB, and IIIC was established at 7.1 cents per pound butterfat.

General Order 57 (B.C. Reg. 277/74), made on April 29, 1974, replaced and consolidated all former orders of the Milk Board. Thus General Orders 46 (B.C. Reg. 126/72), 51 (B.C. Reg. 162/72), 53 (B.C. Reg. 107/73), 55 (B.C. Reg. 471/73), and 56 (B.C. Reg. 157/74) were repealed. This order established the new base period of 1964/73 and the new base period values. It increased the Class II minimum accounting value per 100 pounds of milk of 3.5 per cent butterfat content to $2.70. It increased the Class III minimum accounting value per 100 pounds of milk of 3.5 per cent butterfat content to $6.80. It increased the Classes IIIA and IIIB minimum accounting values per hundred pounds of 3.5 per cent butterfat content to $6 per hundred pounds and increased the accounting value for Class IIIC milk of 3.5 per cent butterfat content to $6.35 per hundred pounds. The butterfat differential for Classes II, III, IIIA, IIIB, and IIIC milk was increased to 7.7 cents. The Class I butterfat differential remained at 8.5 cents as in previous orders.

General Order 58 (B.C. Reg. 599/74) made on August 28, 1974, amending General Order 57 (B.C. Reg. 277/74), came into operation on September 1, 1974. The effect of this order was to increase the Class II minimum accounting value per 100 pounds of milk of 3.5 per cent butterfat content to $3. The minimum accounting value per hundred pounds of Class III milk of 3.5 per cent butterfat content was increased to $7.45. The accounting value per hundred pounds of Class IIIA, and

Class IIIB milk of 3.5 per cent butterfat content, was increased to $6.65. The accounting value for 100 pounds of Class IIIC milk of 3.5 per cent butterfat content was increased to $6.50. It increased the butterfat differentials for Classes II, III, IIIA, IIIB, and IIIC milk to 8.5 cents. The butterfat differential for Class I milk remained at 85 cents per pound butterfat as in previous orders. The increases in the accounting values were made necessary due to changes in the support price for butter and nonfat milk powder announced by the Canadian Dairy Commission.

General Order 59 (B.C. Reg. 676/74), made on September 27, 1974, amending General Order 57 (B.C. Reg. 277/74), came into operation on October 1, 1974. The effect of this order was to establish new base period values which more accurately reflected current prices of factors of production.

Milk Board Membership and Activities

Membership of the Board remained unchanged from the previous year, with Elmer D. Daum, B.A., C.A., as Chairman, and J. D. Honeyman and C. H. P. Killick, P.Ag., as the other members.

The Board held 19 meetings to discuss matters of policy and held numerous additional meetings with producers, vendors, and other interested parties to discuss matters pertinent to the milk industry.

Board representatives attended meetings of the Dairy Committee of the British Columbia Federation of Agriculture, and the Board members attended the Federation's Annual Convention.

The Board Chairman and Administrator attended the meeting held by the International Association of Milk Control Agencies which took place in Helena, Mont., U.S.A.

The Board Chairman and the Administrator, together with the producer members of the Market Share Advisory Committee, attended the meetings of the Canadian Dairy Commission Market Share Management Committee which, with the exception of one meeting in Banff, Alta., were held in Ottawa, Ont. The Administrator was appointed to the Secretariat of the Milk Market Share Management Committee in May and attended the meetings of this committee held subsequent to that date.

The Board would like to acknowledge and thank A. D. Rundle for his valued and tireless contributions as a member of the Market Share Advisory Committee. Due to ill health, Mr. Rundle found it necessary to resign as chairman of the committee at the end of September. His place as a member of the Market Share Committee was filled by J. Waardenburg. The other members of the committee are S. Hanson and J. Gilbert.

Areas of Production

During 1974 the four areas of production defined under the provisions of section 40 of the *Milk Industry Act* remained unchanged.

Statistical Information

Table I—Analysis of Quart Sales by Product Category

Total quart sales increased in all four controlled areas of production, with the total increase being 4.13 per cent.

In the Vancouver Area and the Vancouver Island Area, contrary to the trend of decreasing standard milk sales which started in 1966, the year of 1974 saw an increase in sales of this product which amounted to 1.26 per cent and 1.78 per

cent in each of the two areas respectively. Decreasing sales of standard milk continued in both the Okanagan-Kootenay Area and the Cariboo and Central British Columbia Area.

Buttermilk sales decreased in all areas except Vancouver Island.

For all other fluid-milk products, sales increased in all areas, with the exception of whipping cream in the Okanagan-Kootenay Area and chocolate drink in the Cariboo and Central British Columbia Area.

All controlled areas, with the exception of the Cariboo and Central British Columbia Area, continued to switch from retail to wholesale. The aggregate decrease in retail sales in the four controlled areas was 10.76 per cent, while the aggregate increase in wholesale sales was 7.88 per cent. Retail quart sales in the controlled areas accounted for 17.21 per cent of all quart sales and wholesale 82.79 per cent.

Table II—Analysis of Class I Sales, Including Inter-area Sales

Total Class I sales in pounds (which is the aggregate of all Class I sales in an area of production, whether made by the vendors within the area or by vendors located outside the area) increased in all areas of production during 1974. The aggregate increase was 5.07 per cent. Within Area Class I, sales increased in all controlled areas of production as did Inter-area Class I sales, with the exception of Vancouver Area sales in the Vancouver Island Area which decreased by 4.72 per cent compared to 1973 and Okanagan-Kootenay Area sales in the Cariboo and Central British Columbia Area which decreased by 10.45 per cent compared to 1973.

Table III—Analysis of Qualifying Milk: Production and Utilization

Total qualifying milk production during 1974 increased 3.54 per cent in the controlled areas of production.

Total quota milk receipts in the controlled areas of production were 79.65 per cent of total production during 1974, up from 77.73 per cent in 1973.

Total Class I utilization of quota receipts decreased from 88.91 per cent in 1973 to 87.71 per cent in 1974.

All areas of production experienced a larger increase in production than in Class I utilization, thereby creating an increase in the milk supply surplus to Class I requirements, which amounted to a total of 1.06 per cent for all four controlled areas.

Table IV—1974 Year-to-date Production and Class I Utilization Compared to 1973

This table is intended to show a month-by-month comparison of 1974 total production and Class I utilization to the same month in 1973 in both pounds of milk and percentage change.

Table V—Class I Accounting Value Formula and Producer Price

The contents of this table summarize the accounting value for each Class I utilization announced by the Milk Board for the calendar year 1974. Also shown are producer prices (before adjustments), calculated monthly by the Board. Details relative to Milk Board General Orders referred to in the table may be found in the comments applicable to legislation.

Table VI—Licensing Information

Under the provisions of the *Milk Industry Act* and General Order 57, the Milk Board issues Class I licences to vendors and milk jobbers and Class II licences to producers. Both classes of licences are issued April 1 each year for a 12-month period or portion thereof. A summary of the 1974/75 licences issued, cancelled, and in effect December 31, 1974, is contained in Table VI. There was a net decrease of 50 producers from December 1973 to December 1974, which is a 3.77-per-cent reduction from December 1973.
