THE CRESTON REVIEW

VOL. XXIV — CRESTON, B. C., FRIDAY, AUGUST 18, 1933 — No. 22

August Council Meeting Brief

Business Disposed of in About Half-Hour—Send Cheque for $1000 to New Hospital—July Ordinary Accounts Light.

The August session of the village council Monday evening was the shortest in at least the past two years, all the business offeri g being cleaned up and adjournment taken before 8.45. Reeve McFarland presided, and was assisted in promptly disposing of the business by Councillor F H. Jack on.

Accounts passed forpayment totalled $1164, the big figure being accounted for in the sending of the promised $1000 cheque for the new hospital building. With this overlooked the regular expenditure for July was but $164, and of this about $72 was for electricity. On financial matters the chairman of the park committee reported Park pavilion had been leased on a 50-50 basis to Crestonian orchestra for Saturday night dances, and was averaging $12 per night nett.

The comptroller of water rights sent along quite a snappy letter telling the council their protest in connection with the formal approval of the Goat River canyon development plans of West Kootenay Power & Light Company was not in order and would not be considered

J. F. Coates of Nelson, electrical inspector, complained of the abuse of temporary permits given in connection with electric installation pedding official inspection, and asked that the by-law in that connection be enforced, which by resolution the council decided to do. Mr. Coates will also tighten up on the issuing of these certificates

R. Baird, inspector of municipalities, was heard from in connection with the proposed assessment of Creston Electric Company plant and lines. He advised the engines would classify as personal property and could not be taxed, but that the building and lines were subject to municipal taxation.

The royal commission of three appointed by the Victoria government to enquire into municipal financing in particular, and municipal administration in general, will sit at Nelson on September 11th, and the council decided to send a representative from Creston to take a hand if necessary in the commission's deliberations.

Sanitary matters were informally discussed and the council was quite agreed that the time had about arrived for better sanitat on, either by way of a sewer system or the putting on of an official to handle work of this sort.

Erickson

Miss Margaret Stewart returned to Cranbrook after a visit with her father at the ranch.

Mr. and Mrs. H. M. Smith and family of Bellvue, Alberta, were here for a few days at the first of the week, looking over their ranch property.

Rod. Putnam, Lance aud Raplh Madeas and Roy Penson, who have been camping at Kuskanook, returned home at the first of the week.

Miss Ruth Cartwright is spending a few days this week at Twin Bays, a guest of Miss Madeline Putnam.

Mrs. S. Eraser left on Tuesday for a week's visit with Kimberley friends.

Miss Ruby Martin was at Crescent Beach last week with a party of young people from Creston who were under canvas there in charge of Mr. and Mrs. F. Knott.

Mrs. R. Hetherington of Snoqualme, Wash., is a motor visitor with Erickson friends, and is accompanied by her two children.

Rev. M. T C. Percival held Church of England service at the schoolhouse Sunday afternoon, which was fairly well attended.

Alvin McMasters of Cranbrook is a visitor with Erickson friends this week.

Mrs. Kemp and Miss Betty Kemp are spending the week at Destiny Bay near Boswell, on a camping holiday.

Another notable sale of Erickson orchard property was completed at the end of the week in which Ed Martin disposed of his 13-acre ranch to H. Langston of Creston, who will get possession at the end of the month. The place is one of the many ones in this section being well planted and with good buildings. It is reported Mr. Martin and family are to move to eastern Canada, Ed. having taken an option on a farm near his old home in Quebec while in the east last month.

A very genuine sympathy is extended Mr. and Mrs. Thomas Kirk in the death of their only son, Billy, which occurred at Creston Valley public hospital on Tuesday morning after a very brief illness. The little fellow was but five years of age, whose sunny disposition and other lovable juvenile characteristics made him a great favorite in the home and with all who knew him, and his death comes as a severe blow to both parents and grandparents alike. The funeral takes place this (Thursday) afternoon from his home, with interment in Creston cemetery.

Alice Siding

Word has been received from the department of education at Victoria that the petition asking that high school work be discontinued has been received too late, and that for this year higher education will again be available.

Most reports are to the effect that the local owners of hay cuts on the flats will not harvest the usual heavy crop this year. Permits will be issued at the end of next week.

Mrs. E. W. and Miss Kate Payne are spending a holiday in camp with friends at Destiny Bay, near Boswell.

The Transparent apple crop will be pretty well all moved by the early part of the week. Duchess are coloring and sizing and should be going out some time next week.

Chas. Sutcliffe was busy at the first of the week rounding up the cattle owners, most of whom are in the Yahk section looking after a fire that threatened to destroy the pasture lands of the Stockbreeders' Association at that point.

Mr. Stewart, the water diviner, was operating in this section on Thursday last, a d at 40 and 60 feet depths he located desirable spots at which to put down wells, on the J. C. Martin, W. A McMurtrie and J. H. Webster ranches.

It is reported that insufficient funds were collected to go ahead with having this section declared a pound district, and that the project will likely be dropped until early next year.

Wynndel

Mr. and Mrs. R. Uri and family returned last week from an auto trip to Nakusp and Arrow Lakes points, where they were visiting friends.

Fred Ryckman, indian agent, of Cranbrook, was a business visitor here last week, as was also Constable R. H. Hassard of Creston.

Mr. and Mrs. Eric Wood of Kimberley were visitors at the weekend at the homes of Mrs. Ringheim and Mr. and Mrs. J. Wood.

The symphony orchestra was out on Wednesday evening to serenade the newlyweds, Mr. and Mrs. Paul Ofner, jr.

Work started last week on the Co-Operative Fruit Growers As ociation new warehouse.

Meeting of the Women's Auxiliary was held at the home of Mrs. C. Gregory at which work for fall sale was given out to be embroidered and made up. Date of sale discussed but not settled. A turkey supper for Thanksgiving was mentioned.

Mr. and Mrs. McGregor, who have been holidaying in Nelson, returned at the end of the week.

The J. B. Winlaw sawmill has been shut down. A. Wickholm, planerman, of Canyon, had the misfortune to have part of a finger amputated.

Sirdar

Alex. Strachen, caretaker at the Borosoto cattle ranch, was at Atbara arranging for another shipment of cattle to the meat market at Trail.

The smelter returns from the last car of ore of the Canada smelters, Ltd., from the Sanca mines, are reported as even more satisfactory than the first car.

Miss Gwen Wilson returned from Vernon and Spokane, where she has been visiting friends.

A sturgeon caught last Tuesday morning at Slough bridge tipped the scales at forty pounds two ounces.

Frank Hamilton of Kootenay Landing was a business visitor to Nelson last week.

T. Rogers has returned from a three weeks' holiday spent at Spokane, Seattle and coast points.

D. Pascuzzo is a visitor at Cranbrook, making the trip by car.

Since the large busses of the Canadian Greyhound Company have permanently taken over the run to Nelson, their popularity is evidenced by capacity loads on about all trips.

The water guage at Slough bridge stands at 7.23 a fall of 1.68 for the week.

James S. Wilson and son, Charles, are business visitors at Cranbrook.

A party of younger folks intend leaving for Cultis creek where a camping holiday will be spent.

Officials Make Local Inspection

Inspect Hospitals—Pleased with New Structure—Look Over K.V. Route North and South Highway—District Impresses.

On Thursday last, piloted by supervising engineer, A. E. Dalgas, of the provincial public works department, Brig. Gen. H.H. Matthews, D.S.O., of M.D. No. 13, Calgary, Alberta, arrived in Creston, accompanied by Major Murray, chief medical officer, and Major Harcourt, supervisor of aviation fields, on an inspection tour of the relief camps and roadwork, and aviation fields, all of which are now under the federal government.

The party was met by W. L. Bell, president of Creston Board of Trade, and Col. Mallandaine. Major Murry made an inspection of the present village hospital, and also went over the plans of the new hospital now building, and expressed his approval.

Brig. Matthews made a tour of the Creston-Porthill highway with a view to seeing for himself the actual entrance into Canada via Rykerts and returned to meet his party at Erickson returning via the Lister area.

The brigadier was very much surprised at the area of arable land contiguous to Creston, and was astonished to note the large orchards and amount of land under cultivation. In respect to the roads add highways, which under the Dominion administration come directly under his control, the brigadier was non-committal, but evidenced great interest and a friendly attitude toward the project brought to his notice by members of the board of trade.

Kitchener

Mrs. A. Lepage and son, Ronald, left on Tuesday for Fort Steele on a visit with her sister, Mrs. Allan Moore.

Alex. Ellis left last week on a visit with relatives in Vancouver.

Mrs. H. H. Redmile was a Cranbrook and Fort Steele visitor a few days last week.

Mrs B. Johnson was a Kimberley visitor a few days last week, driving her sister, Mrs. Barr and sons, Robert and Charlie, to their home at Kimberley, after an extended visit at the home of Mr. and Mrs. B. Johnson.

Dan MacDonald, one of the foremen at the airport, left on Friday for Nelson on a two weeks' holiday.

Z. Geroux, who has been on a visit at Ross Spur, with his daughter, Mrs. Viau, returned home on Friday.

G. Cady, Sid Ross and party of Nelson spent the weekend looking over some claims on the iron range, accompanied by C. Senesael They returned on Monday.

C. Senesael Fred Smith, and L. Simpson, who are working at Fort Steele, spent the weekend at their home here.

Mr. and Mrs. VanAckeran and daughter, Ethel, and Phonse Huygens of Canyon, were visiting at the home of Mrs. C. Senesael, Sunday.

Miss Vivian Langlois, who is at business college at Nelson, spent the weekend on a visit with Kitchener friends.

Chas. Simpson, manager for the Sash & Door Company at Hazel Creek, spent the weekend at Cranbrook.

Canyon ladies' softball team journeyed here on Sunday for a game with the Pine Katz that evening, in which Kitchener, won 38-8. The local battery was Mrs. J. Hankey and Miss Hazel McGonegal. The local girls put up a good game, with heavy hitting by Edith Nelson, Alta Blair, Helen Oja and Hazel McGonegal each having home runs.

Lister

Misses Hazel and Agnes Hobden were weekend visitors with Mr. and Mrs. C. H. Hare at their summer cottage at Kuskanook.

Lister had both Anglican and Lutheran services on Sunday. At the latter the pastor, Rev. C. Baase, baptized the two children of Mr. and Mrs. Hans. Lindhorst.

J. W. Bell, accompanied by Mr. Burrin of the Selkirk Motors, Kimberley, were visitors at the former's ranch at the weekend.

Mr. and Mrs. C. H. Phillips of Kimberley are spending this week at their Camp Lister ranch.

Col Fred Lister got away on Tuesday on a visit at Nelson and points west.

Peter McKay, jr., a son of the late Peter McKay, a former well known early-day resident of Camp Lister, is renewing acquaintances here at present. He is now with the U.S. army, and enlisted from San Antonio, Texas. Until 1927 he was a resident at Tellachee, Idaho.

Henry Bollinger has returned to Nelson, after spending the past month in the area.

Hans Hellwigg, who has had the form-Burgess place for the past three years, is leaving this week on his return to Germany, where he expects to again take ub residence.

Chas. Seeley, who has been developing the acreage purchased from H. Helme some months ago, left this week for Claresholm, Alberta, where he will help with harvest and threshing operations.

Mrs. A. Hobden, accompanied by her daughters, Misses Hazel and Agnes, left on Tuesday by motor on a visit at Calgary and other Alberta points, and will be away until the end of the month.

The settlers were in session at a hastily called meeting on Tuesday night to talk over matters that are to be taken up with Hon. Joshua Hinchcliffe, minister of lands, who is to meet the settlers at a meeting at the schoolhouse Thursday morning, 17th.

Mr. Buell, a federal plant pathologist, of Victoria, whose duty is in connection with certification of seed potatoes, was here on Thursday, and among other activities gave a demonstration and talk on seed potatoes at the Mike Reidlmayer ranch. He made his official inspection of the Frank Baker seed potatoes and found six patches 100 per cent. free of disease.

Canyon City

Mrs. Guy Browell of Nelson arrived this week on a visit with her parents, Mr. and Mrs. T. Hickey.

Mr. and Mrs. Kolthammer and Mrs. John Nygaard, are holidaying at Spokane this week.

E. Barnes and H. Young combined business with pleasure on a visit at Cranbrook on Monday.

Dance at Canyon Community Hall. Friday, August 18th, with music by Walde's orchestra, under auspices of Canyon Hall Association. Gents 50 cents, ladies 25c., supper included.

Canyon ladies' softball team ran into a bad beating in the game at Kitchener on Sunday evening. The score was 38-8 in Kitchener's favor.

The Swedish young people's picnic, which was scheduled for earlier in the month and had to be postponed, will be held at Diamond park this Wednesday afternoon, 16th.

Tom Daly, who has been at Calgary, Alberta, for the past three months, returned at the end of the week and is again making his home at the Mrs. C. A Robinson ranch.

Miss Mary Goodwin, teacher of Division 2 of Canyon school got back this week from a six weeks' vacation at California points.

Andy Wickholm is going about with right hand heavily bandaged. While at work at the Winlaw sawmill at Wynndel Wednesday last he lost about half an inch of his forefinger while operating the planer.

The last cement for the West Kootenay Power & Light Company dam at Goat River canyon was poured on Thursday last and the workmen are now busy removing the plank forms. Work will now be pushed on the power house. Wiring the transmission pole line on the sideroads is occupying the time of the pole line crew this week.

Miss June Browell left at the end of the week for Watrous, Sask., where she expects to spend the next few months. Prior to her departure the young people of Canyon, with reinforcements from Kitchener and Creston, tendered her a surprise party on Thursday evening, which was a great social success, cards, music and lunch being features of the affair.

Institute Arranges Fair

The August meeting of Creston and District Women's Institute was held at the home of Mrs. M. Young on Friday afternoon, with quite a good turnout of members, and the president, Mrs. C F. Hayes, in charge of proceedings.

The time of the meeting was largely occupied with business in connection with the flower show and school fair to be held at Park pavilion on Saturday, September 23rd. It is hoped the general public will co-operate in making this a great success.

To the great regret of the membership Mrs. (Dr.) Warren, vice-president, tendered her resignation as a member of the executive, due her approaching departure from town. The vacancy was filled by the unanmous choice of Mrs. W. H. Crawford.

At the close of the meeting tea was served by Mrs. J. E. Johnston and Mrs. Mallandaine.

Swimming Pool Popular Resort

Youngsters and Grownups Alike Keen for Swimming — Cost Almost $1000—Backers of Project Asked to Pay Guarantees.

Without form or ceremony Creston's fine new community swimming pool at Exhibition Park went into use on August 9th, and with the sweltering weather that has prevailed since that date the pool has been by long odds most popular spot in town for a small army of youngsters of all ages and no small number of grownups.

The pool is 35x80 feet, two feet deep at the shallow end and sloping down to a depth of almost eight feet. It is of cement construction with walls eight inches thick with wire reinforcement and the cement floor is four inches in thickness.

Drainage is by a 4-inch steel pipe for a distance of 60 feet and then is taken care of in 4-inch wood pipe, emptying into the gully in the vicinity of the W. M. Archibald place, Mr. Archibald having cheerfully consented to this system of disposing of the waste water. The overflow is via steel pipe and connects up with the drainage pipe some 70 feet from the pool. The water to supply the pool is from a one-inch pipe connected with the main, but the intention is to considerably augment the supply before the next swimming season comes around.

There are dressing rooms for men and ladies at the north end, and on the four sides of the pool there is a four-foot wooden platform for the convenience of the bathers and those with children in the pool. A four foot wire fence keeps out stray animals.

General supervision of constructi on throughout was placed in charge of C ol. Mallandaine, with Frank Lewis hav ing the contract, fo the excavation and the cement work contract awarded Axel Anderson. It is expected that when all the bills are in the total cost will be in the neighborhood of $1000, and those w o have promised money to defray this expense are asked to send in their promised contributions at o ce.

The idea of the pool originated with Wild Rose Lodge Knights of Pythias, and a committee of its members, consisting of F. V. Staples, W. J Craig, Art Reed, W. V. Jackson and Col. Mallandaine, did the initial work of looking up possible sites and ascertaining constrution costs, after which a meeting of all interested was held and the project became a community proposition, with the original K.P committee delegated to push onstruction with all possible speed, and once the required sum seemed reasonably sure of being subscribed no time was lost in commencing construction.

Naples Trims Creston A's

By an 8-6 margin Creston Athletics took their first home game beating of the season at Exhibition Park, on Sunday afternoon, at the hands of the highly rated Naples, Idaho, nine, an aggregation that has been trimming everything in northern Idaho all season.

Inability to hit, and especially when hits meant runs, was the big factor in Creston's downfall. At defensive play the locals outclassed Naples considerably, playing a great defensive game both in the infield and outfield after the first innings, when a high heave by Schade to get a runner at second gave Naples their first counter.

The situation, too, might have been helped had Herb Couling been taken out of the box earlier. Naples had little trouble solving his delivery but were not so fortunate with Cherrington who went in late in the second, and in addition to steady heaving contributed some nifty fielding of the position. Earl Christie played sensational ball all day at short and hit in timely fashion, connecting for a homer over the curling rink in the opening inning. Johnny LaBelle was also noticeable with the stick, connecting for a triple in the first stanza.

Hall, a veteran, from Bonners Ferry held the locals well in hand after the first inning, but his support was wabbly at times, catcher Huestaed having altogether too many passed balls. First baseman Chick did some timely hitting for the winners.

Due to practically no advertising the game was rather poorly attended. The A's are at Naples for the return game this Sunday.

FOR RENT—Residence, four rooms, pantry and bath, close to school. A. Anderson, Victoria Ave., Creston.

OFFERED—15 head of good milking strain Shorthorns, owners's guarantee, $37.50 each, or will trade part in fruit. See secretary Creston Farmers' Institute.

BULBS FOR SALE—Daffodil bulbs, assorted, healthy stock, order early and avoid disappointment. Prices on request. Phone 60T. Stark's Bulb Farm, Creston.

Lessons Of The World Grain Show.

The great World Grain Exhibition and Conference has become a matter of history, but to the thousands of visitors who were privileged to view its wonderful display it will long be remembered as one of their most delightful and instructive experiences. Western Canadians, in particular, who had never had the opportunity of visiting the other provinces of their own Dominion must have been deeply impressed with the variety, magnitude and richness of the resources of their country, and to have obtained through the various provincial exhibits a renewed confidence in the future of Canada.

A tour of the British Columbia exhibit could not fail to have impressed one with the amazing wealth of resources in that great province. Divided into three sections, the exhibit depicted first the forest and mineral wealth of the Pacific Coast province; then the magnificent fruit products, with their attractive orchard scenes, and finally the fisheries whose products are known and in demand the world over.

Or, jumping over the prairie provinces and into Ontario, the visitor found, not an amazing display of manufactured products from that great industrial province, but they were impressed with the wealth which is being produced from the mines of the province as indicated by the thousands of dollars' worth of minerals on display. They learned how Ontario was proceeding with a vigorous reforestation policy to maintain its forest wealth, how forest fires are fought, and other steps taken to conserve this great natural resource.

Studying the Quebec exhibit, depicting the quiet pastoral life of the people away from the industrial centres, one could not fail to get a new understanding of the ancient province, and to realize what a steadying influence it is bound to exert upon the national life of the Dominion. The teeming commerce on the mighty St. Lawrence, its great maritime ports, with the neat, intensively cultivated farms stretching back from the river banks, all conveyed a picture of beauty, strength and progress, the homes of contented thrifty people.

To visitors from other provinces and countries, the exhibits of the prairie provinces must have been a revelation indeed. Holding the view, as undoubtedly many such visitors did, that these provinces produce nothing but grain and other agricultural products, they certainly had their ideas expanded. Manitoba devoted its exhibit to a display of the wild bird and animal life of that province, extending from its southern prairie fields to the arctic circle. It was one of the show exhibits of the Exhibition and people stood before it in interested crowds lost in admiration.

Alberta demonstrated that it could grow wheat by carrying off the world's wheat championship, but it also let visitors know that 14 per cent. of all the coal supplies in the world were located within its borders, that it produces tens of millions of pounds of beet sugar annually, that its lakes and rivers teem with fish, that its timber areas are very large.

And Saskatchewan, populaly known as the "bread basket| of the Empire," which in normal years produces more than one-half of all the wheat grown in Canada, and more than any other single province or state in the world, surprised everybody with its wonderful exhibit of huge logs from its timbered regions, its many varieties of fish, and big fish at that which would do credit to a province by the sea, its mineral wealth of coal and clays in the south and richer metals in the north, its wild bird and animal life, its scenic beauty spots.

The usually accepted picture of the prairies as flat, uninteresting fields of grain, and nothing else, was dissipated by these truly wonderful exhibits. Even to the people living on these prairies they were a revelation. And to unite the whole were the comprehensive exhibits of the Dominion Government revealing in all their richness and variety the magnitude of the resources and products of Canada.

But why recall these things now the Exhibition is over? Because one of the objects of the Exhibition was to bring this knowledge in its most interesting and fascinating and compelling form to the people of Canada and the world. Seeing is believing, and those who saw Canada on parade at Regina cannot fail to have been impressed and convinced of the development and prosperity which the future has in store for this Dominion, and for every part of it.

And such conviction was reinforced by the peeps into the past which were also afforded. One had only to stick their head through the window of the old Hudson Bay trading post and examine its contents, or gaze upon the means of transportation in the days of the pioneers,—not so very long ago at that,—the old Red River cart, the dog sled, the Esquimo boat, and contrast them with the great Hudson Bay stores at Winnipeg and Calgary, to mention only two, and with the C.P.R. and C.N.R. exhibits and the automobile exhibits of modern means of transportation, to appreciate the fact that Canada has made amazing progress in the short span of its national existence. Such progress offers but a glimpse and a promise of the still greater progress and development that is to be.

Thus in the midst of a depression which has to some extent at least shaken the confidence of many of our people, the World Grain Exhibition came with its wonderful and beautiful story. It also brought a message. It is not a message of despair, but of hope. A message that, trying and difficult as times may temporarily be, they are, after all, only temporary because a nation with such resources, with such culture, with such virile and progressive people, cannot fail to surmount any and all difficulties. Canada is for the moment caught in the maelstrom of world events and conditions beyond our control, but it will win through and rise to greater, grander heights than ever before.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhœa, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has received the endorsement of legions of Canadian mothers during the 86 years it has been on the market. Don't experiment. Get "Dr. Fowler's" and be on the safe side.

Manufactured only by The T. Milburn Co., Ltd., Toronto, Ont.

Eskimo Slaying

Village Bad Man Killed By Other Members Of the Tribe

Story of the slaying of an Eskimo village "bad man" by other members of the tribe, is told in a wireless report received at Royal Canadian Mounted police headquarters at Ottawa from Inspector T. Sandys' Wunsch, on board the Northern supply steamer "Nascopie."

Oo-Shoak-Juke, an Eskimo who 13 years ago killed a fellow-aborigine at Cape Dorset, in Baffin Land, met retribution six months ago, when his own life was taken by a trio of Eskimos whom Oo-Shoak-Juke had been threatening.

The dead native was regarded as insane. He had shot at his wife some time before his own death, and for no apparent reason he had informed the three men who eventually killed him that he intended shooting them.

The trio forestalled him, and took the law into their own hands. They decided that the tribe would be better off without Oo-Shoak-Juke, and forthwith shot him.

When Inspector Sandys-Wunsch reached Wolstenholme on board the "Nascopie," the tribal chieftain and all interested parties were produced and an inquiry set on foot. The inspector informed headquarters that a complete report would be mailed when the "Nascopie" reached Moosonee on her homeward trip.

WIFE'S DELIGHT AT HUSBAND'S LOSS

30 Pounds of Fat!

Here is something all wives of fat men will be glad to know. It is the experience of a woman whose husband recently weighed 230 lbs. She writes:—

"I really feel I must write and tell you that, after taking Kruschen Salts for nearly 3 months, my husband has got his weight down from 230 lbs. to 200 lbs. This has been achieved by nothing else but Kruschen. I am too heavy also, and I started taking Kruschen only three weeks ago. Already I have got down from 153 lbs. to 144 lbs. We are delighted." — (Mrs.) C.

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly — to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

Nothing To Worry Them

Newfoundland Is Lucky To Have Backing Of Mother Country

It may be a bit of a shock to Newfoundlander's pride that for a time they areto have their dominion status virtually taken away from them and the country placed under a commission which will perform all the essential functions of government. This, at anyrate, is the recommendation of Lord Amulree's commission which came out to Newfoundland to investigate, and it is likely to be adopted.

But Newfoundland should not worry. Newfoundlanders should be very happy to think that somebody else is going to take over the job of straightening out the tangle into which they have gotten themselves. What has happened is simply this: One of John Bull's family has got into a financial mess, and the old man is coming to the rescue. He says in effect: "Here, just stand aside for a while until I put you on your feet, and when I see that you are all right I'll step out and you can run your own house again."

That is one of the advantages of being able to look to a Mother Country." — St. Thomas Times-Journal.

How the Rule Works

National Problem Doubly Eased When Man Obtains Job

As a national problem a man thrown out of work is only half the mischief done. It means one less worker to carry the burden of one more dependent. Fortunately, the rule works the other way when it comes to increased employment. A man in a new job means for the whole nation one more worker to carry one less dependent.

Supposing that at the depth of the depression in March we had 12,000,000 persons idle, it would mean that we had 36,000,000 persons at work. We had three people with jobs to carry one without a job. If today employment has increased by 3,500,000 jobs, it means very nearly 10,000,000 persons at work, against 8,500,000 persons still idle. We have almost five workers to carry one idle person. The social burden is almost cut in two.—New York Times.

Britain May Capture Coveted American Cup

New All-Steel Cutter Revives Hope Of Sportsmen

A beautiful new streamlined racing cutter, winning race after race by spectacular margins, suddenly has revived British hopes of capturing the American cup.

The cup—"that old mug" so persistently pursued by Sir Thomas Lipton for 33 years—probably is more coveted by British sportsmen than any other trophy in the world. Why Britain never has been able to regain it since it crossed the Atlantic in 1851 is a riddle.

But Britishers believe that the answer has been found in "Velsheda," ultra-modern all-steel creation of Charles E. Nicholson, who designed the last two Shamrocks for Sir Thomas Lipton. "Velsheda" embodies all the lessons Nicholson learned from the defeat of "Shamrock V." by Harold Vanderbilt's "Enterprise" in 1930.

The success of the new cutter has made it almost certain that her owner, W. L. Stephenson, will succeed the picturesque and beloved Sir Thomas as challenger for the cup. Stephenson, chairman of the British subsidiary of F. W. Woolworth & Co., named the yacht after his three daughters, Velma, Sheila and Daphne

No contest could be held this year, since the challenge must be made at least nine months before the race, but British yachtsmen believe Stephenson will issue it in the fall if "Velsheda" keeps on winning. In the great Scottish racing festival known as the "Clyde Fortnight," which just ended, "Velsheda" won five firsts and three seconds out of nine races over "Shamrock V." and King George's Britannia. The two wins "Shamrock" scored over "Velsheda" were by margins of only a few seconds, while all "Velsheda's" victories were decisive

"Velsheda's" chief feature, aside from her steel hull, is the now-famous "Park Avenue" boom, frankly copied from the "Enterprise" with a few new ideas added. It greatly speeds up handling of the material. Moreover, she is equipped with all the other time-saving mechanical devices which Lipton said were responsible for "Enterprise's" victory, in the last cup race.

Almost a sure sign "Velsheda" was built to challenge for the cup is the fact that it is 88 feet on the waterline and 127 feet overall. That is longer than "Shamrock V." which felt the need of more length in the rougher American waters where the cup course is laid. "Shamrock," moreover, was noticeably inferior to "Enterprise" in sailing to windward. "Velsheda" is an improvement in this respect.

Otherwise the new cutter adheres pretty much to the international specifications for "J" class yachts. It is of slightly more than 200 tons, has a sail area of 7,500 feet, a 158-foot mast, a beam of 21 feet and draft of 15 Its lead keel weighs about 80 tons.

"The Other Club"

Distinguished Organization In London Celebrates Twenty-First Birthday

One of the most distinguished dining clubs in the world, known as "The Other Club," has just celebrated its 21st birthday by a dinner at the Savoy Hotel, London, England, among the guests being Sir William Jowitt, former Attorney-General, and Lord Kyslant, former President of the Federation of Chambers of Commerce of the British Empire, General Jan Christian Smutts, South African statesman, presided at the coming-of-age party.

The club founded by Winston Churchill, and the late Lord Birkenhead meets once a fortnight for dinner in a private room at the Savoy during the time that Parliament is sitting. It was intended to provide a ground whereon political opponents might meet. One of the rules is that "nothing in the intercourse of the members shall be allowed to interfere with the full asperities of party politics."

Doctor's Hand Valuable

Loss of the use of his right hand in an automobile accident has brought to Dr. Abraham Coldfoot, of Cheltenham, England, a verdict of $50,000 damages. His wrist was broken when he was struck by an automobile. Unable to write prescriptions he has to take an assistant with him wherever he goes.

Smoke Best—and you'll soon be an Ogden's Cut Plug fan.

It makes no difference what kind of a pipe you smoke. It will be a far better and more satisfying pipe when you light up a bowlful of Ogden's Cut Plug.

It's fragrant . . . and cool . . . and mellow — as chummy a pipe tobacco as you ever touched a light to!

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chantecler cigarette papers

Ambassador To Russia

Viscount Chilston To Represent Britain At Moscow

The king has approved the appointment of Viscount Chilston as ambassador to Russia, succeeding Sir Esmond Ovey. His majesty received the new ambassador in audience at Buckingham Palace.

Lord Chilston has been minister at Budapest since 1928. He will leave for Moscow in September, when for the first time since March 30 the United Kingdom will be represented in Russia by a full-fledged ambassador.

The world is too small for the man who knows it all.

BANK INQUIRY SESSIONS TO BE HELD IN WEST

Ottawa, Ont.—The royal commission on banking and currency concluded the public session in Ottawa for time being, and proceeded to Victoria to open the transcontinental series of public and private hearings.

Dr. W. C. Clark, deputy minister of finance, and C. S Tompkins, inspector-general of banks for the federal government, were the witnesses and the information covered an interpretation of the functions of the government in relation to the banks as laid down in various Dominion Statutes.

Calgary will be visited on the 18, and Edmonton on the 21. The commission will then proceed to Saskatoon, Regina, and Winnipeg. Precise dates for the hearing in the latter places will be announced later.

Lord Macmillan, chairman of the commission, Sir Thomas White and Beaudrey Leman questioned the deputy minister on particular functions and practices in which they were interested.

Dr. Clark outlined functions of the treasury board, a small section of cabinet council presided over by the minister of finance.

Lord Macmillan brought up the question of possible friction between provinces and the federal government in respect to banking and currency.

"Would it be possible to evolve an economic policy that would be applicable to all Canada and not subject to conflicting provincial policies?" the chairman asked.

Dr. Clark asked that he be excused from giving evidence on that point.

Lord Macmillan recognized the question was premature, but decided to keep it to the forefront in the minds of the commission members.

Dr. Clark described the actual legal tender of Canada in complete detail, and also described the operations of the mint and replacement of currency.

"Has the royal mint operated at a profit?" asked Beaudry Leman.

"Figures will have to be prepared," replied Dr. Clark. "The assay office at Vancouver has operated at a slight loss but I think the royal mint as a whole has made a profit."

Send Out Strike Ballots

Railway Running Trades Prepare For Momentous Struggle

Montreal, Que.—Members of the railroad running trades have set September 15 for one of the most momentous decisions in the history of Canadian railroads. On that day 24,000 members of the union will be instructed by their general chairman as to the advisability of striking — last legal step in fighting a second 10 per cent. reduction in wages enforced by both the Canadian National and Canadian Pacific Railways.

Ballots were mailed to engineers, conductors, trainmen, telegraphers and enginemen, marking the furthest step taken by any of the railroad unions in their fight against the reduction.

There is no change, it was stated, in the shop trades opposition to both the 10 per cent. reduction effected by the railroads at approximately a year's interval.

Survey Over For Season

Churchill, Man.—Now that the season of ice surveys is at an end, the federal government steamer "Ocean Eagle," under the command of Capt. William A. Poole, will soon be sailing through Hudson Straits on a voyage of some 3,000 miles with destination at some port in the St. Lawrence River or the maritimes. The "Ocean Eagle" will tow the dredge "Churchill No. 1" to the eastern seaboard.

Payment On War Debt

San Francisco.—Five million dollars in ingot silver—part payment of Great Britain's war debt instalment—has been taken to the United States mint here awaiting coinage. The metal arrived recently from Bombay. It had been trans-shipped at Hong Kong and again at Seattle.

London Wheat Confernce

Representatives Of Wheat Exporting Countries To Meet At Canada House

Ottawa, Ont.—Canada House in London, England, will be scene of the reconvened meeting of the representatives of the wheat exporting and importing countries on August 21, it was learned at the office of Rt. Hon. Sir George Perley, acting deputy minister. Sir George has aranged, at the request of Prime Minister R. B. Bennett, to have Hon. M. A. MacPherson, provincial treasurer of Saskatchewan, attend the next session, and Mr. MacPherson is now en route.

Mr. Bennett and Hon. G. H. Ferguson, Canadian High Commissioner in London, will attend the meeting, which is called to explore further the problems respecting wheat production and marketing.

It is understood Mr. Bennett will leave for Canada shortly after the conclusion of this meeting, and that he will be accompanied by Mr. Ferguson, who is expected to make a short visit to Ontario.

U.S. Grain Code

Proposal For Fair Competition For the Grain Exchanges

Washington.—A proposed code of fair competition for the grain exchanges, submitted to the farm adjustment administration, fixed definite minimum margins to be put up in virtually all speculative purchases of grain.

Other portions of the proposed code followed generally rules and regulations established since the recent drop in grain prices caused farm officials to ask the exchange officials to change the regulations.

Heretofore, however, the question of margin requirements on purchases has not been definitely fixed, the requirements being that the margin be "adequate."

The proposed code calls for regulation by the grain exchanges and the carrying into effect by their officials of the rules laid down.

Italian Aviator Victim Of Seaplane Accident

Motor Trouble Caused Machine To Overturn During Takeoff

Horta, Azores.—Four Italian aviators, members of General Italo Balbo's seaplane squadron, were hurt when their 'plane overturned during the takeoff for Lisbon, Portugal.

The flyers, Capt. Ranieri, the pilot; Lieut. Squaglia, Sergeant Cremaschi, mechanic, and Sergeant Boveri, radio operator, were taken to a hospital. Lieutenant Squaglia died as the result of congestion of the lungs.

Motor trouble caused the giant machine to turn over as it was leaving Ponta Delgada, Azores, with 14 others for Portugal and home, after flying thousands of miles from Italy to Chicago and back. In an accident at Amsterdam in the outward journey, one flyer was killed. The ill-fated ship was called the "I-Rani."

Summer In North Over

Churchill, Man.—Although midsummer heat waves are taking their toll south of here, fall winds are already blowing across the wastes north of Churchill. Autumn is fast approaching. This fact is brought home to residents of Churchill by the movements of trappers and birds. The trappers are moving north to their lines. The birds are moving south to the prairies.

Program Is Completed

Churchill, Man.—The week ending August fifth saw the summer program of the Hudson Bay Railway ballasting and re-conditioning operations practically at an end. During the week the industrial spur running along the Manitoba government townsite, was completed. This spur is about one mile in length.

May Turn To Britain

Winnipeg, Man.—Influenced by the cordial reception given the new Canadian loan of £15,000,000 in London, Winnipeg may seek to float further issues in the British market, Mayor Ralph Webb said. Since 1914 Winnipeg has depended on the Canadian and American markets for capital requirements.

CELERATES BIRTHDAY

Stanley Baldwin, Lord Presdent of the Council and one of the most popular leaders Great Britain has ever produced, was the recipient of birthday greetings recently when he passed the sixty-sixth milestone.

Eggs For Northern Port

Two Hundred Dozen Shipped To Chesterfield Inlet

Ituna, Sask.—Fresh eggs that likely won't be so fresh when they reach their destination, left Ituna recently. Two hundred and ten dozen were consigned to Sergeant Wight and Constable N. Yates at Chesterfield Inlet, N.W.T.

These eggs, packed in salt, will be food for these policemen in the north next winter. Eggs are scarce up there and fresh eggs unknown that far north.

Constable Yates, an Ituna farm lad, wrote home before he went north he never dreamt that he could eat "rejected" eggs but has learnt how since. Eggs packed in salt will keep good for over a year. They will go via railroad to Churchill and from there will be transported to Chesterfield Inlet, on a Hudson's Bay Company's service boat.

B.C. Orientals Grow Poppies

Mounted Police Said To Be Investigating Matter

Victoria, B.C.—Royal Canadian Mounted Police are believed to be investigating growth of poppies by Orientals on several tracts of land at Saanich near here. Under the law poppies may be grown but not harvested. Dried poppies brewed into tea have a morphine content of 8 per cent., according to medical authorities.

It is considered likely a test case may develop in anticipation of legislation at Ottawa forbidding growth of the flower altogether.

Bus Line To Churchill

Motor Bus Service Between The Pas and Northern Port Is Planned

Saskatoon, Sask.—Operation of a motor bus service between The Pas and Churchill during the 1933 navigation season is proposed by the federal department of railways and canals, it was learned here. It is believed transportation will be by motor bus operating on railway tracks.

The service will start August 10 and continue until October 15 and the post office department has made arrangements for weekly postal service between The Pas and Churchill, although intermediate points will not be served.

The mail-bearing bus will leave The Pas each Tuesday at 11 o'clock in the morning to arrive at Churchill the following evening; the return mail will leave Churchill each Saturday afternoon or Sunday morning to arrive at The Pas Monday afternoon.

Receive Warm Welcome

People In Peace River Country Travel Miles To Greet Bessboroughs

Edmonton, Alberta.—Along the far flung Peace River front ringing cheers welcomed to that country Canada's Governor-General, the Earl of Bessborough, accompanied by the Countess of Bessborough and party.

Their Excellencies were feted all along the route on their first day's tour of the country. People came from miles around displaying the spirit of the early pioneers, to vie with each other in welcoming the vice-regent and countess.

A warm welcome at McLennan, the first stop, was followed by receptions at Falher and Peace River.

Perfect weather prevailed to mark their Excellencies' visit to the north country, a visit which they had planned last year but which had to be postponed.

Banking Investigation

Most Important Matter Before Canadian People At Present Time

Winnipeg, Man.—"The royal commission on Canadian banking and currency is by far the most important matter before the Canadian people at the present time," in the opinion of Hon. Ian Mackenzie, M.P., Vancouver Centre, in Winnipeg en route to Vancouver from Great Britain.

Mr. Mackenzie, who has ardently pressed for the commission since 1930, declared "recovery from our present alarming situation will be based on a proper financial system" and expressed entire approval as to the choice of Lord Macmillan as chairman of the commission.

CHINESE MINISTER TO VISIT OTTAWA

Dr. T V. Soong (inset), Chinese Minister of Finance, who recently attended the World Economic Conference in London, England, has arrived at Ottawa to interview Hon. H. H. Stevens (above), Canadian Minister of Trade and Commerce, with a view to increasing the trade between Canada and the Orient.

STUDY OF U. S. RECOVERY PLAN IS URGED HERE

Victoria, B.C.—"A statement in the press that Canadian Business Association in Montreal are making a survey of the direct and indirect results of the United States national recovery act is very interesting," commented Premier S. F. Tolmie of British Columbia, recently.

"I think the whole of Canada is watching the present efforts of the country to the south of us to bring back prosperity. They are most interesting experiments which should be carefully observed and those which appear to be practical and of benefit to Canada might be adopted here.

"The depression has given us a new vision of conditions and standing out prominently in our experience of recent years is the fact that we cannot have real prosperity without a bigger share and steadier revenue fom the farmer and the wage earner.

"More orderly selling can play an important part here. The day of excessive profits appears to be past."

Winnipeg, Man.—Canada should study closely the policies involved in the United States national recovery act and their effects, and act at the earliest possible moment in the light of the experience gained, in the opinion of Premier John Bracken of Manitoba, expressed in a statement issued to the Canadian Press recently.

Mr. Bracken said, aside from lessening the barriers to trade, he could see no reasonable alternative to the adoption of some such policies in Canada, modified, where necessary, to meet different conditions, but having the same purposes in view.

New Public School Readers

To Introduce Change For Western Provinces When Conditions Permit

Banff, Alberta.—Introduction of new readers in public schools of the four western provinces will take place when financial conditions permit, it was decided at the meeting of the inter-provincial education committee here.

The committee consists of deputy ministers of education for the four western provinces. They are: Dr. Robert Fletcher, Manitoba; Dr. J. S. Huff, Saskatchewan; Dr. John T. Ross, Alberta; and Dr. S. J. Willis, British Columbia.

Hon. Perren Baker, minister of education for Alberta, also attended the meeting to discuss educational problems common to the four provinces.

A special committee studied the reader question and decided those now in use should be discarded in favor of up-to-date books when finances permit. The present readers have been in use for 15 years.

May Not Be Represented

Toronto, Ont.—Canada may not have a Bisley team next year, according to Col. F. F. Clarke, Montreal, chief range officer at the Ontario Rifle Association meet. The Dominion Rifle Association, which annually sends the team to Bisley, "is having a hard time to make both ends meet" since governmental grants to the association have been reduced.

Reduce Tax Rate

Prince Albert.—Local tax payers heard good news when they learned the city council had approved tax rates for 1933 which reduced the mill rate 1.70 mills below last year's rate. Public school supporters will pay 48 mills, and separate school supporters 44.20 mills.

Sells Horses

Saratoga Springs, N.Y.—The entire stable of Victor Emanuel has been sold at public auction at the sales ring and 18 head sold for a total of $38,400 for an average of $2,133.

Radio Institute

Toronto, Ont.—The Telegram today states plans have been completed for the establishment of an institute of radio-therapy in London, Ont., to be in operation early next year.

No job for Joe ---he had no telephone

"I hear they took on a dozen more at the mill, Joe," said Tom. "You used to work there its a wonder they didn't want you back."

"That's the sad part of it," said Joe; they did want me back, but I didn't find out until it was too late. You see. I haven't got a telephone now. When they couldn't reach me by telephone, they gave the job to someone else."

The man with a telephone has the best chance of getting a job.

CRESTON, B.C., FRIDAY, AUG. 18

Prompt Decision Desired

Good news comes to this district in the announcement that International Waterways Commission is to sit at Nelson on August 24th to hear the application of the Reclamation Farm operators for permission to make improvements to the old kyke that will enable it to withstand flood conditions encountered most every year on the Kootenay River. On the surface there seems to be no reason for refusing to issue the necessary order that will allow the work to proceed immediately, and a prompt decision will be particularly welcomed by those operating at the south end of the farm, where last year's break in the dyke wrought damage that it will take some time to restore.

PHONE 22 for all information.

With wheat over the 70 cent mark today, and with the prospect of a short crop all across the North American continent, there is every reason to expect grain prices to at least maintain their present level and make the operation of the big farm profitable to the men who have stayed with it for four very trying years.

In connection with the hearing the district will hope that with the observations it has been possible to make in this year of high water an equally prompt and satisfactory decision will be forthcoming for the West Kootenay Power & Light Company, which will be asking for approval of their Corra Linn dam construction.

Last Chance to Register

There now seems no doubt whatever but that the long overdue provincial election will come late in October or early November, and should that be the case YOUR last chance to get on the voters list will be Monday next, 21st, and to be positive that your name will be recorded it will be needful for you to appear in person before F. H. Jackson, registrar of voters for the purpose of registration. If you have been in B.C. six months and in the Creston district one month and are 21 years of age you are entitled to be registered and vote, but this matter is entirely up to YOU. So far as we know there will be no effort made by any of the parties to provide transportation to the registrar's office. It's a case of help yourself or go without a vote in the most important election in B.C.'s history. Registration hours are from 10 a.m. to 4 p.m. Be on the job early.

Home Products Drive Going Strong

The Grand Theatre is co-operating with the Home Products Drive by accepting tickets bearing a 10% discount. Tickets are given away by the following firms:

S. A. Speers.
Creston Motors.
V. Mawson
Imperial Groceteria.
Creston Beauty Shop.
X. L. Cafe.
Ross Meat Market.

Simply buy $1 worth of merchandise and you will receive one of these tickets free. Present it at theatre box office. Buy one regular ticket, and pay 10 cents with merchant's ticket, and two people go to the show. List of pictures for campaign will be found in Home Products advertisement on page five. Please read this announcement.

AT THE HOSPITAL

Lionel Moore is progressing favorably.

Billy Kirk was admitted to the hospital Monday afternoon and underwent an operation. He passed away Tuesday morning at 10.30 a.m.

Helmut Patalla of Wynndel was admitted to hospital Tuesday for removal of tonsils, returning home the same day.

Kathleen Joyce was a patient on Sunday for removal of tonsils

Rose Kinkade had her tonsils removed, Wednesday morning.

110 students from an eastern college, who are touring B.C., put up at Cranbrook auto tourist camp one night last week, providing the bigge t night's business in the camp's history.

At G.and Forks the Gazette claims water is being consumed at a rate just a little faster than the mains are capable of delivering water from the river plus the flow into the reservoir.

The Courier believes prosperity could in some measure be restored in Cranbrook district if local citicens would spend about $50,000 diamond drilling gold properties in that district.

Unless a large number of boys and girls can get free board and room for services rendered, attendance at Bonners Ferry high school this year will be considerably reduced.

OUR K.B.O. BROADCAST

Fernie council will charge $25 a ton baled for the hay cut at the civic airport.

Some estimate as high as 1500 visitors at Nakusp for Legion Day, August 5th.

According to Vernon police crime conditions in that town are the best in 20 years.

The Courier complains of the untidy condition of show windows in vacant stores at Cranbrook.

Depression or no depression Fernie will have its usual Labor Day celebration on September 4th.

60 per cent. of Fernie 1933 taxes were paid at August 1st. This is 12 per cent less than last year.

According to the Vernon News many Okanagan prune trees look sick with foliage curled and off color.

Apricot stealing on an extensive scale is reported from Summerland orchards and packing sheds.

The heavy rain of August 5th ruined 80 per cent. of the Kaslo Lambert cherry crop through splitting.

Grand Forks' city owned electric power plant shows a profit of $3,538 for its first year of operations.

Kelowna had only $400 to spend on mosquito control this year, when $1000 was required to do a good job.

The Free Press reports the Fernie blue berry crop as heavy, and the fruit is retailing at 10 cents a pound.

57 cases were tried and 53 convictions secured in Penticton police court in July, but only $127 fines collected.

Duchess and Transparent crabapples commenced moving in bulk at Okanagan points at the end of last week.

The two lady beauty shops at Bonners Ferry have entered into a price agreement. Permanent waves will be $3.50.

The Shell Oil Company has invaded Golden and has put in two tanks, one of 10,000 and the other 3000 gallons capacity.

During July 8485 autos carrying 13,157 passengers passed through Kootenay national park at Sinclair Springs end.

An effort is being made to get Sandpoint and Bonners Ferry stores to agree to close at 5 o'clock every afternoon.

Kelowna, Penticton and Vernon beer parlors have had the price of the amber fluid reduced 15 cents per dozen bottles.

13 rattlesnakes were recently shipped from Vernon to the zoo in London England. The reptiles went 18 days without water.

The Okanagan is not in a real hurry to sell 1933 potatoes, It is believed frosts on the prairies will result in higher prices a little later.

Summerland residents claim that one night last week a rainbow with a complete arch was seen between 10 and 10.30 at night.

Bonners Ferry sportsmen have succeeded in getting the state game department to put out 1½ tons of salt for the deer at likely points in Boundary county.

According to the Star deer are getting to be quite common on the streets of Golden. Wednesday noon one stood on the main street till pedestrians scared it away.

40 people will be employed for a month taking the pits out of Royal Anne cherries at Summerland. 46 tons of these are being manufactured into Marchino cherries.

At Bonners Ferry, Boundary county, for assessment purposes, the valuation of milch cows is this year reduced from $25 to $20 per head, and range stock from $18 to $16.

The local huckleberry crop is being harvested and appears to be a good one. Large quantities are being peddled from house to house at 10 cents a pound. The fruit is of exceptional quality.

Kaslo intermediate baseball team will be here for a Sunday morning game at Exhibition Park with Creston Intermediate nine, which will be strengthened for the oc asion. The game is at 10.30 a.m.

Annual congregational and Sunday school picnic of St. Stephen's Presbyterian Church will be held Wednesday afternoon, Aug. 23rd at first bend of Goat River. Cars will leave church at 1.30 prompt.

Mr. Stewart, of the federal livestock department, who was here on official business the latter part of the week, was busy with his witch hazel water diviner in the Alice Siding section, and located water supplies at every ranch visited.

The weather has been hovering over the 90 in the shade mark since Monday, on which af ernoon quite a promising thunderstorm put in an appearance, but proved to be mostly noise, providing a rainfall hardly sufficient t lay the dust.

At a meeting of the directors of Creston Reclamation Company, Limited, president C. O. Rodgers was appointed to look after the company's interests at the sitting of the International Water ways Commission at Nelson, August 24th.

Mrs. John E. John ton re-opens her music classes on September 2nd, and has vacancies for a limited number of pupils Thorough knowledge of piano, achieveing outstanding success with pupils at music ai festivals. Studio, Hillside Road, Creston.

Permits t cut hay are to be issued at Creston, Saturday, August 26th, which is just one week later than permits were given out in 1932. A couple of nice rains since the flood water went off has helped clean off the hay and rushes considerably.

Boyd & Craig are at work putting a new foundation under and making some improvements to the exterior of the former Imperial groceteria building which will be occupied by West Kootenay Power & Light Company as a sales depot and office.

The reason for the resignation of Miss Helen Meldrum from the public school teaching staff is found in an announcement in Tuesday's Vancouver Province which announces her approaching m rriage to T. G. Currie of Sardis, the happy event to take place this month.

Mrs. O Parry reports a very busy weekend in connection with the opening of her new beauty shop which is in the former Alex. McKay residence, next the United Church, the building having been specially rebuilt to provide her with attractive and convenient beauty shop quarters

This Sunday, 20th, Creston Valley Post Canadian Legion are holding their picnic at the second bend of Goat River. For hose who need transpartation a truck will leave the postoffice corner at 1 p.m. Ice cream, tea, coffee and other light refreshments will be supplied by he Legion

About 100 children and grownups of the Anglican Church attended the annual picnic of Christ Church and Erickson Sunday schools at Twin Bay on Wednesday afternoon. The weather and the site on Kootenay Lake were ideal for such a gathering and all immensely enjoyed the outi g.

A meeting of the executive of Nelson Creston Conservatine Association is being held in Nelson this (Thursday) evening, at which matters in connection with this year's provincial election will be discussed. Creston Conservative Association executive met Tuesday night to de cide the local policy.

About a dozen of the members of the C.G.I.T. of Trinity United Church, Creston, in charge of Mrs. Walker and Mrs. W Fraser, got away on Thursday last for a ten-day camp at Lockhart beach, west of Boswell, using the same camp ground as the Trail Rangers and Tuxis Boys, who were there earlier in the month.

Brig. Gen. Mathews and Major Harcourt, who have supervision over work being done on airports and highways, under the new plan whereby the Dominion governmen handles the single unemployed, were here at the end of the week, and made an inspection of the K.V. north and south highway, among other possible work projects.

The village bank account was enlarged a matter of $1531 at the end of the week, this sum representing the cheques for the half-yearly instalment of liquor profits and the 1933 share of motor license fees from the finance minister at Victoria. The amount is $482 less than the same remembrance a year ago, and this will be the last liquor profits cheque that will come to hand as this grant has been discontinued. The two cheques were: Liquor profits, $849; motor licenses, $682.

Creston's new hospital building is now receiving the outside cont of stucco by contractor A. Bond. The lathing of the interior is being rapidly pushed. The electrica and plumbing contractors have about finished their work. R. Maxwell has the electrical wiring, and Art Reed the plumbing. The directors have decided to finish the upper floor now as it can be done cheaper than at a later date. The building presents quite a commanding appearance and many words of commendation are heard in respect of the site and building. It was hoped that the building would be ready for occupancy by the end of the month but it is likely, owing to unavoidable delays, the opening will be later.

The best turnout of the year was in evidence at Thursday night's meeting of Creston Lodge Knights of Pythias on the occasion of the official visit of E. A. Hill, grand chancellor, of Cranbrook, who was accompanied by H. White of Trail district deputy grand chancellor, and T. Balfour of Trail, grand outer guard. Appropriate addresses were given by the two former during the course of lodge proceedings, and all three were heard again in informal talks at the after-lodge banquet which was served in Trinity United Church basement by a committee of ladies from Blossom Temple Pythian Sisters.

The Creston troop of boy scouts, numbering ten in charge of (Rev.) N. G. Smith left on Monday for Moyie Lake, where they are to be in camp for ten days, along with some other scouts from East Kootenay points. The trip to Moyie was made by truck, but the intention is to make the return trip by a three-day hike. In the party are Michael and Johnny Joy, Sam Nastasi, August Morabito, Wilfred LaBelle, Clifford York, Bill Vigne, Egon Hollm and Jim Hills. News from the camp is to the effect that the boys are having the time of their lives but it isn't all sport. At the first of the week they had to demonstrate their oral and practical skill in scout work and it is satisfactory to know that all successfully passed the tenderfoot tests.

The latest addition to Creston's business section, the Beauty Shop, opened on Saturday under the management of Mrs. O. Parry, in the new premises on Victoria Avenue, ext the United Church. The shop is strictly modern in every way, and is equipped with the latest in permanent waving machine, large Cape dryer, and shampooing and facial equipment. The shop has suitable display window and cabinet for a full line of cosmetics. The place is tastefully decorated in mauve and blue, with waiting room separated from operating room by screens. The Beauty Shop in all its appointments is thoroughly modern and Mrs. Parry is being congratulated on all hands for her enterpries in providing Creston ladies with such up-to-date facilities for beauty culture.

Members of Creston L.O.L. and L.O.B.A. met in an open meeting on Friday evening at the hall in the Mercantile building, on the occasion of a visit from Mr. and Mrs. Knowles and Miss Williams of Vancouver, who were here primarily in the interests of the Loyal Protestant Home at New Westminister, of which the former is secretary, and the latter in charge of publicity work, in addition to which she is a past grand mistress of the B.C. grand lodge of the L.O.B.A. Mrs. J. Downes, worthy mistress of the local association, presided and timely talks on the good work and needs of the home were given by Mr. Knowles and Miss Williams, who also spoke informally at the banquet which the ladies served at the close of lodge proceedings.

Bonners Ferry sportsmen have succeeded in getting the state game department to put out 1½ tons of salt for the deer at likely points in Boundary county.

WORLD HAPPENINGS BRIEFLY TOLD

Decline of 21,500 in the number of persons on relief in British Columbia between March and June of this year, is recorded in official figures released.

Crow's Nest Pass Coal Company of Fernie, B.C., has secured the entire contract of the Winnipeg Electric Company for coke, amounting to 50,000 tons a year. Formerly United States supplied Winnipeg firm.

Three white Leghorn chickens, owned by Harry Knapp, have been sent from Sault Ste. Marie, Ont., to Rome, Italy, where they will be exhibited in the world's poultry congress.

British Columbia lumbermen, particularly shingle manufacturers, are perturbed over possibility of an embargo being placed on their products by United States under the new Recovery act code.

Because of the increasing importance of Canada and other American nations in Japan's foreign relations, the foreign office is planning to establish a new affairs bureau to handle dealings with nations in north, south and central America.

This year's cotton production in the United States was forecast by the Department of Agriculture at 12,314,000 bales of 500 pounds gross weight, compared with 23,002,508 bales last year.

John Copithorne, 72, veteran of the Riel Rebellion, died at Victoria recently. A native of Cork, Ireland, he came to Canada in 1883 and for many years owned a cattle ranch at Jumping Pound, Alberta. He has been a resident of Victoria for 19 years.

Britain's disarmament gesture in reducing her navy by much more than 50 per cent. since the war had been ignored and it was time she returned to safety, Earl Jellicoe, former admiral of the fleet, declared when he opened naval week at Portsmouth.

Naphtha, previously wasted, is being rescued by the new Imperial Oil absorption plant in the Turner Valley oil fields, to the extent of 571 barrels a day, equivalent of first class producing wells' output. A total of 80,000,000 cubic feet of waste gas is being run through the new plant daily, from which the valuable naphtha is obtained.

Serum Treatment

London Investigator Claims He Has Found Specific For Flu Pneumonia

Two cures of influenzal pneumonia by serum similar to that for immunizing ferrets against "flu" were claimed by Dr. Ronald Hare, a London investigator.

In telling how he treated two women, one of whom was dying, Dr Hare said "both cases reacted in a very dramatic fashion" and recovered.

The serum was prepared from humans convalescing from influenza.

Dr. Mare reported in The Lancet, British medical journal, that his first case, a woman of 27, was in a grave condition.

After two injections of serum four hours apart, he said, she began to improve. A third injection was made the following day. Thereafter her recovery was steady. In the second case also, Dr. Hare said, there was an uninterrupted recovery.

Peasants Had Good Idea

Easily Solved Problem Of Watermelon Surplus In Bulgaria

Overproduction of watermelons has been solved by the peasants near Peshtera, Bulgaria, without calling on economists for advice To the neighboring village of St. Constantine come thousands of summer visitors, all fond of watermelons. The peasants, who have more than they can sell, take their surplus to huge boxes nailed to trees in the woods and deposit them there. Over the box is a sign: "Take as many as you want, and leave as much money as you wish." Few fail to pay a reasonable sum for the melons, the rustic melon shop does a thriving business and no racketeers have yet robbed the till.

World 'Phone Lines Spread

Inauguration of telephone communication between India and Australia recently has continued the spread of the world service. Two days later India was connected with Palestine and South Africa. Since the opening of lines between India and England on May 1 an average of five calls a day have been made from Bombay.

A Novel Wireless

Conference Telephone Used At Stockholm Great Advantage To Delegates

At the World Power Conference held in the Stockholm concert house a striking technical novelty was introduced enabling audiences at conventions to listen to lectures in several languages simultaneously while moving about and without being disturbed by noises or by conversations between bystanders.

This new contrivance, called the conference telephone, constructed by the L. M. Ericsson Telephone Company, is a portable wireless receiver outfit of tiny dimensions consisting of a coil antenna, placed around the shoulder, a small receiver box fixed in the button-hole or placed in a pocket and a head 'phone The transmitter antenna is mounted around the walls of the conference room, so that the bearer of the receiver outfit can stand or move anywhere in the room while listening to the lecture, undisturbed by conversation of other members of the audience.

Another great advantage is the possibility of interpreting a lecture in different languages simultaneously. The interpreters sit in an adjoining room and send their interpretations over different wave-lengths for each language. The listener only has to choose the receiver outfit tuned for the wave-length of the language he prefers to hear This will naturally greatly shorten the duration of the proceedings and forms an elegant solution of the difficulties previously encountered at conferences when using the costly and complicated method with fixed telephone receivers at each seat with cords that are apt to get entangled and cause inconvenience.

This revolutionizing innovation was enthusiastically received by the 900 members of the conference, who also admired other electric installations, including signal lights in different colors indicating the different languages used and an automatic telephone system between the conference officials.—St. Thomas Times-Journal.

Recipes For This Week

(By Betty Barclay)

MARVEL LEMON PIE

1 package lemon-flavored gelatin.
Grated rind and juice of 2 lemons
2 egg yolks.
1¾ cups boiling water.
¼ teaspoon salt.
1 baked 9-inch pie shell.

Combine gelatin, sugar, salt, and lemon rind with 3 tablespoons water. Add egg yolks and stir well. Add remaining water, stirring until gelatin is dissolved Cool. Add lemon juice. Chill. When slightly thickened, turn into cold pie shell Chill until firm. Cover with Three-Minute Meringue or top whipped cream.

Three Minute Meringue

2 egg whites, unbeaten.
2 tablespoons water.
½ cup sugar.
Dash of salt.
Few drops vanila or almond extract

Put egg whites, sugar, salt, and water in upper part of double boiler. Beat with rotary egg beater until thoroughly mixed. Place over rapidly boiling water, and beat 1 minute; then remove from fire, and continue beating 2 minutes longer, or until mixture will stand in peaks. Add flavoring. Beat well Spread over top of pie.

PEACH PIE GLACE

8 (4 cups) fresh peaches, sliced.
1 package orange-flavored gelatin
Dash of salt.
¾ cup sugar.
1½ cups boiling water.
1 baked 9-inch pie shell.

Combine peaches and sugar and let stand 10 minutes. Dissolve gelatin in boiling water, add salt, and pour over peaches, stirring occasionally as mixture 'cools. Chill until slightly thickened. Turn into cold pie shell. Chill until firm. Cover with Three-Minute Meringue, or top with whipped cream

No Thought Reader

They were "sitting-out" at a dance, and for ten minutes he had sat gazing at her without uttering a word.

"Obviously," she thought, "he wants to kiss me, but is too shy. I'll give him a lead."

So she murmured: "I believe I can read your thoughts."

"Then why don't you use your powder puff," he said "I think nothing makes a woman look more unattractive than a shiny nose."

Winnipeg Newspaper Union Fashion

By Ruth Rogers

A SMART DRESS—SLENDERIZING AND CHARMING

It is amazing at how easily it is fashioned.

The moulded bodice cut in one to where the lower skirt joins, helps marvelously toward slenderness. It can be belted if you wish. Horizontal pin tucks accent the waistline. And note the flatness of the hipline. The pointed outline at back and front are decidedly length giving features.

Navy blue crepe silk so lovely for street, made the original. The trims are of blue and white crepe print.

Style No. 363 is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3⅝ yards of 39-inch material with ⅝ yard of 35-inch contrasting.

Thin woollens are nice mediums.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Has Praise For Russia

Canadian Journalist Says Country Will Command World Attention

One of Canada's noted journalists, Robert J. Cromie, who was in New York en route home from a European trip, said Russia's "great progress, for a number of years, is going to command world attention, world admiration and, along certain lines, world emulation."

Cromie, editor and owner of the Vancouver Sun, said the Russians, "are in the beginning of an economic honeymoon."

"If there is one country in the world today which has found a real job to do and is whole-heartedly doing it, that country is Russia," he declared.

Cromie said he felt the principle of capitalism is sound, "but capitalism as we have over-emphasized it in the United States and Canada and England curtails production and distribution and thereby prevents the growth of appetites and desires.

"Where our economy is so wrong is that, as I see it, we emphasize the preservation and turnover of capital instead of emphasizing the turnover of goods."

With her business growth ahead, the Canadian said, "Russia is the safest credit bet available in the world today As a business man or a nation, I should feel more comfortable having money coming to me from the U.S.S.R. than from any other place on this globe."

The Soviet Union, Cromie said, "has virility, ability and tremendous pride in the achievement and obligations of their new regime.

SUNDAY SCHOOL LESSON

August 20

SAMUEL

Golden Text: "Serve Jehovah with all your heart."—1 Samuel 12:20.

Lesson: 1 Samuel, Chapters 3, 7, 12.

Devotional Reading: Psalm 125.

Explanations and Comments

Samuel's Call, Chapter 3:1-9.—The Hebrew word translated "child" in the text is applied in the Bible to an infant and also to a man of forty. Josephus says Samuel had just completed his twelfth year when the word of the Lord came to him. If so, then he had reached the age that Jesus had when he dedicated himself to the Lord's business. Samuel helped Eli in the service of the temple, and seems to have been the special attendant of the aged man whose eyes had begun to grow dim.

The continuous growth of a character, from a child serving God, and to old age walking in the same path, is the great lesson which the story of Samuel teaches us. "The child is father of the man," and all his long days are 'bound each to each' by true religion. Pardon cleanses sin, and even turns the memory of it into an ally of holiness; but traces are left on character, and, at the best, years have been squandered which do not return. Samuel is the pattern of child religion and service. How beautiful his double obedience is expressed in the simple words! His service was 'unto the Lord,' and it was 'before Eli'; that is to say, he learned his work from the old man, and in obeying him he served God. The child's religion is largely obedience to human guides, and he serves God best by doing what is bid—a lesson needed in our days by both parents and children."—Alexander Maclaren.

"I Like To Go When I Have To Go"

Traveller Gives Some Reasons Why He Likes To Take a Train

When I make my plans to leave for somewhere at 7 o'clock I hate to wait around till 8:15 before the last member of the party is ready. It wastes my time, spoils my disposition, and makes me late at the other end. That's why I like to take the train—it starts on schedule and arrives on time.

I hate to sit cramped for hours, accommodating my legs and feet to extra luggage on the floor. I like to sit comfortably stretched out when I travel—and so I take the train.

I don't like to dodge around giant inter-city trucks. They frighten me. They look dangerous. They make good drivers nervous. They make strong men to swear and lovely ladies to scream It's almost as bad to be scared half to death as it is to be killed. Talk about road hogs—those inter-city trucks are more than hogs—they're insolent, roaring, swash-buskling bullies. They're so big they'll nose with any ordinary conveyance—but they never bother me when I ride on the train.

I don't like those drivers that are always looking for a road race. A race is all right at Indianapolis or Daytona Beach, but it's no good on Trunk Highway 15. Of course, every so often one of these speed boys races a train to a crossing, but I always feel sorry for the poor saps that were riding with him They'd be much bette off riding on the train.

I like to read as I travel.

I like to sleep at night stretched out horizontally.

I like to take my clothes off when I go to bed.

I have slept on the ground many a time—but when I'm travelling to arrive somewhere—on a business trip or the start of a vacation—I like to get sleep that leaves me rested.

I like to wash my face and hands at intervals, and it may be a foolish notion, but I like to dry them on a clean towel. On a private towel. That's why I take the train.

I like a drink of water when I'm thirsty. I may not care about it when somebody else is thirsty, or when we come to a drinking place on regular schedule, but when I, myself, am thirsty. And I can have it on the train.

I like to eat when I myself am hungry. They let me do that on the train.

I have never been able to schedule a business trip according to weather. Very often I am obliged to travel when it is bitter cold, or in the midst of heavy rain, snow or fogs. The train takes me through on schedule—rain or shine, hot or cold, day or night summer or winter, low ceiling or high. It's the dependable factor in travel.

Worst of all, I hate watchful waiting for the last twenty miles before the next rest stop. I know that everyone else is watching, waiting too. The air becomes tense. The situation nerve-racking. Friendship ceases. For when a lot of people want to go out at the same time, and there's only one door to go out through, and only one door to go in through, and only one or two you-knows when you get to the place—then, I say, friendship ceases and strife begins. Every man for himself, and devil (or cramps) take the hindmost.

No sir, I much prefer to go when I have to go. That's another reason why I take the train.

Marvels Of Science

Wizardy Of the Electric Eye Is Difficult For the Lay Mind To Grasp

The electric eye will get you if you don't watch out. At least that seems to be the moral from the latest magic of applied science. It has been put to use already in offices, factories, restaurants, homes and theatres.

It has been set into pavements where it registers your speed; and it is just too bad for you if you have been stepping on the gas. But it also turns on the parking lights when parking lights are indicated and it may when the sun sets switch on the street lights, and next morning turn them out again. It works automaterially in schools and factories, turning on and off the lights as necessity demands.

It is quite a busy entity around publishing offices where the 179 manual processes required to make a half-tone cut (photograph for printing) may be covered by the eye in a few moments. It can match colors of papers and inks, count logs, control the thickness of paper being produced and detects breaks in the rolls of paper going into the printing presses and instantly stop the machines.

Electric eyes turn on and off the lights giving the course to ships and they do the same thing for flying fields. The shadow of a girl on the door and it will open—if the electric eye is on its job—admitting the waitress and her tray.

How does it work? Scientists O. H. Caldwell, writing in the New York Times, says that it is through the selenium light sensitive cell. You illuminate a prepared bit of selenium and its resistance undergoes a sharp change; the electrical current that is flowing in the circuit suddenly increases and can be used to operate relays, which in turn work switches producing the desired result.

The electric eye isn't through yet; in fact it has just begun. Its destiny if it gets busy is to make eletctricity direct from sunlight Upon every foot of the earth's surface the sun delivers 175 watts. An ordinary roof 30 if it gets busy is to make electricity heat energy at the rate of 200 horsepower. It is computed that enough sunlight falls on the deck of the Atlantic liners to drive them at full speed.—Winnipeg Free Press.

Establish Weather Depots

Plan New Meteorological Stations Throughout the West

Proposals for the establishment of new meteorological stations throughout the west and for the providing of competent inspectors to provide accurate meteorological data in its relation to agriculture, are receiving the attention of both the federal and provincial governments.

Plans for the establishment of such a service were laid at a conference of federal and provincial authorities held in Regina, and announcement of them was made by Hon. J. F. Bryant, K.C., chairman of the Saskatchewan commission on conservation and afforestation, and chairman of the joint commission of the three prairie provinces.

The proposals embrace the establishment of meteorological stations with up-to-date equipment at the federal experimental farms, maintained by the provincial governments. The data and reports of these stations would be supplemented by data from similar stations located at strategic locations, in order to have records from all areas of the provinces concerned.

Grain Exhibition

Movement To Form Organization To Perpetuate Grain Conference

Formation of an international organization to perpetuate the World's Grain Exhibition and Conference is expected.

Success of the grain show in Regina has spurred international leaders to new plans.

It is understood that the federal government through its department of agriculture, would set up a small department as the basis for a World's Grain Exhibition and Conference.

Good Likeness Of Caesar

After careful study the German Archaeological Institute has pronounced the Roman bust found near Catania, Italy, a likeness of Julius Caesar. It had been resting on a shelf in the library of Acireale, not far from Catania, for more than 200 years. No one knew whom it represented, but now the German savants declare it to be the most life-like of all the images of Caesar that exist

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends.

(Now go on with the story)

CHAPTER IV.

Peter danced with Cathie, his arms aching for Camilla. He felt clumsy now, and self-conscious. But Cathie told him gushingly, "You're a marvelous dancer, Mr. Anson. I could dance with you all night."

"I'd never last that long. And I don't like to dance, anyway," he told her bluntly.

"Not even with me?" she pouted.

"Oh, you're all right. It's just that I don't like to dance."

"Then why did you bring Camilla here?"

"Because she wanted to come here, I believe."

"That's just like her. She gets everything she wants."

"I suppose so. But why shouldn't she?" defensively.

"That's what everyone seems to think. But she never troubles herself about making anyone else happy—any more," Cathie amended.

"Has she changed—recently?"

"She is more changed every time I see her, which isn't often. She doesn't play with the crowd like she used to, and she acts most of the time as if she were far away, when she is around."

"Perhaps she's getting serious about life and trying to find some definite work. I met her at National."

"I know. She's been going for the intellectual stuff in a big way and cutting the rest of us. She is downright snooty, lately," Cathie shrugged.

"Perhaps you just imagine it," Peter defended her. "Any kind of study takes a lot of one's time and mind. I'm sure she doesn't intend to high-hat you."

"You're pretty crazy about her, aren't you?" Cathie's eyes narrowed.

"Call me crazy if you like," he smiled.

"Well, she will treat you like all the rest Almost every fellow in our crowd has had his crush on Camilla, and his cure. They all get over it after she has kept them miserable for awhile."

"What nice sharp claws our kitten has!" thought Peter, and replied, "That makes it nice for me, that she gave them all the gate, because I might be the exception to the rule, after all." His eyes flashed sternly, "Take that slap in the face, now. You asked for it."

But nothing daunted Cathie. "Oh, yeah? Well, if she's too cruel, bring your wounds to me and I'll bandage them up for you. I might feel sorry for you because you're a nice boy. Heart wounds are serious."

"Thanks a lot, Miss Harris. You are very kind." She ignored the reproof in his voice, and when they danced again, spoke only in gay banter. Peter's eyes followed Camilla's lithe grace in Terry's arms, covetously He grudged the loss of one moment with her, the more because he knew he would never dare to take her out again.

The supper order appalled him. Lucky he had brought the extra money. He was in for it, all right. And he might expect the same thing to happen any time he made a date with Camilla. She had scores of wealthy friends whom they would encounter everywhere. As her escort, he had to be prepared to act as host any time.

Passing her on the floor, he sang to her with the orchestra, "Save the last dance for me, sweetheart."

She nodded smiling The last dance, he thought. Their last, forever, perhaps; and wondered if she would care much if it were.

Terry ordered more drinks when they returned to the table.

"Nothing for me," Camilla declined.

As host, Peter felt obliged to join his guests. "Ginger ale," he said, and apologized to Terry "Eight o'clock class tomorrow and a headache won't go."

"Don't you hate the grind?" drawled Terry, luxuriously sipping his high ball.

"Grind!" Peter exclaimed with surprise.

"Mr. Anson is one of those rare people who likes to use his brains," Camilla explained.

Was she laughing at him, Peter wondered, and grew miserable. Perhaps Cathie was right. She was beginning already to punish him for his absurd hopes.

The waiter presented two bills, one for the food and one for the drinks. The total astounded Peter, but he paid without a flicker of hesitation. He had had his fling and it would last him for awhile. "Let that be a lesson to you," mocked the orchestra and the tenor soloist, in a sudden crescendo. It would be, he resolved.

But when he took Camilla into his arms for the last dance, he forgot bank balances that looked like supper charges and supper charges that looked to him like the figures of a bank's resources.

"Goodnight, sweetheart," sighed the music, "till we meet tomorrow," crooned the tenor's plaintive voice, "tears and parting may make us forlorn," echoed Peter's heart; then Camilla raised her eyes to meet his and his hopes lifted, "but with the dawn, a new day is born, so I'll say goodnight, sweetheart, goodnight."

The ride home was far too short in time and far too long by the taxi meter that ticked with jeering incessance. Peter wished that he might dismiss the cab and nonchalantly walk home after a lingering goodnight, but Camilla managed that.

"You needn't come in. It's very late and you have an eight o'clock class you know, I've had a lovely time, Mr Anson."

"Thanks, Miss Hoyt. So have I. Did we chase away your blackie-blues?"

Oh, yes, I'd forgotten them."

"That's good. Well, goodnight."

She placed her little white-gloved hand in his. The soft night air rumpled the bright hair on his bared head and she stifled a sudden impulse to reach up and smooth it. "Goodnight," she whispered, and was gone before he could think what more to say.

The pulsing motor of the cab recalled him to his senses. He sprang in and slammed the door. He rode only to the nearest car line and dismissed it, parting with his last ten dollars, half of which he received in change. It was all that was left of his "roll" that he had provided for appearances, promising himself to redeposit most of it on the following day. But it was gone, and all he had was a sweet memory that would have to last him for many months.

Camilla flung herself upon the high mahogany four-poster bed. Long ago, when she had first slept in that bed, she had felt like a fairy princess. It had symbolized the utmost in grandeur and luxury to her then. For the past three years, she had hated it more every night she slept there. But she was not thinking about that tonight. She was hating Peter. At least, that is what she declared to herself, over and over. That was because she was sure that she never could have him.

Then her memory exulted in the way he had looked at her when they danced, the dear words he had said. He was so precious, just as she had known he would be before he had talked to her that day. Was it only today that he had first spoken to her, and changed her whole world? How strange life was, that years could pass in which nothing of importance ever happened, and then a few hours could suddenly hold so much happiness and beauty!

"But he didn't ask to see you again!" her thoughts jeered, and she was plunged into misery again. He only had been sorry for her because of the incident in class that day, and taking her out was his chivalrous way of apologizing. Her face burned with remorse at the memory of his finding her in the park in tears. It angered her. She was angry and hurt—because she was in love and not at all sure of being loved. That was why she wanted to hate Peter.

(To Be Continued).

Thunder Storms Never Cease

About 1,800 Raging In Different Parts Of World Every Minute

It is estimated that the approximate number of thunderstorms occuring over the whole earth in the course of a year is 16,000,000.

This works out at 44,000 a day, and if we make allowance of an hour for the average duration of each, a simple calculation tells us that at any one minute there are probably some 1,800 storms raging simultaneously over the continents, islands and oceans.

From the known mean rate of electrical discharges it may also be deduced that in every second of time there must be about 100 flashes of lightning passing either from cloud to earth or from cloud to cloud in various corners of the globe.

Thunderstorms reach their greatest frequency in equatoial and tropical regions, where 100 to 150 a year is quite an ordinary number. In parts of Java and near the mouth of the Amazon the normal annual number is said to to exceed 200, and with such regularity do the storms break out there during the latter half of the day at certain seasons that in issuing invitations a week or two ahead it is customary to indicate whether guest are expected to arrive before or after the usual deluge.

One Air Banned

There is no man in the Navy more popular than Admiral Sir John Kelly. The stories told about him are legion. Once, when directing general drill, in which it is customary always to include at least one unorthodox order, he gave instructions: "Three bandsmen from each ship are to be sent to the flagship, and on arrival to play a popular air" There was added, above his signature, this note: "For the purpose of this exercise, 'Has anybody here seen Kelly?' will not be recognized as a popular air."

War Enemies Never Met

Foch and Hindenburg Disappointed When Plans Were Spoiled

Hindenburg and his great antagonist Foch never met.

Nor did the field-marshal-president ever have the opportunity of talking over the war with Petain, Joffre, Lyautey, Fayolle and Franchet d'Esperey, the other French marshals. Yet like a good professional soldier, he would have liked nothing better.

However, he came within an ace of meeting Foch, for whose character and tactical ability he had the highest regard. It took his elevation to the presidency of the Reich to forestall what would have been an historic encounter.

In the autumn of 1924, Foch told his aide, Major Rene L'Hopital, that he hoped some day to meet Hindenburg, "not as a Frenchman and a German, but as too old soldiers."

L'Hopital, who knows German as thoroughly as he knows English got busy. Through personal friends in Berlin, he had his chief's desire brought to Hindenburg's ears. The old marshal readily acquiesced

Then came the problem of how to arrange the meeting. Nationalistic feeling was running high in both France and Germany. Hindenburg's hobnobbing with the hereditary enemy would have caused a storm of protest. Foch's fraternizing with his German counterpart would have made the Third Republic rock.

L'Hopital, always a diplomat, found a way out. Foch was to go down to Strasburg ostensibly to inspect the view to take place in the early spring garrison. Hindenburg at the same time would be taking the cure in Baden-Baden. Overnight the ex-generalissimo of the Allies would motor over the Kehl bridge, unannounced, with L'Hopital to act as interpreter.

The stage was all set for the inter- of 1925. Then Hindenburg's fellow-countrymen elevated him to the presidency. And while a retired German army officer might very well meet a retired Fench army officer privately, it was natually out of the question for the president of Germany to receive Marshal Foch under any circumstances.

Foch regretted the missed opportunity until his dying day. "I have the highest regard for Hindenburg," he frequently told friends, "I considder him a really great man."

THE RHYMING OPTIMIST

By Aline Michaelis

PERSPECTIVE

Let me not ever live too near
The things that cause me fret and fear,
Lest enemies I look upon
May loom so vast they hide the sun.
And with dark shadows shut away
The glamour of the golden day.

Nor let me hold too near my heart
The loves which form life's happiest part;
Too much of brilliance blinds the eyes,
May I love well, yet still be wise
And go, undazzled by the gleam
Of love, which makes earth's loveliest dream.

Let me not ever live too near
The things most dreaded or most dear;
Too much of shade, too much of flame,
Sight, dimmed or dazzled, is the same.
Ah, let me see my bliss or strife
As part, but not the whole of life!

New Hybrid Oats

Experiments At University Of Saskatoon Produce Drouth Resistant Variety

New hybrid of oats under test at the University of Saskatchewan are showing much greater resistance to drouth than the standard varieties, Dr. J. B. Harrington, in charge of cereal experiments, observes. Several valeties of barley such as Colsess and Regal also show far more ability to withstand dry weather than O.A.C. 21 barley common grown.

Dr. Harrington believes that the experimental results this year while crops are small will provide valuable information on such questions as the smattering of grain varieties.

Needed Sea Trade

A Polish poet of the 16th century said that "a Pole need not know what the sea is if he ploughs diligently," but modern Poland has learnt that her prosperity demands sea trade, and 62 per cent. of her foreign trade is now sea-borne.

Little Helps For This Week

"The God of all grace who hath called us unto His eternal glory by Christ Jesus, after that ye have suffered awhile, make you perfect, stablish, strengthen and settle you." —Peter 5.10.

How shalt thou bear the cross that now
So dread a weight appears?
Keep quietly to God, and think
Upon the eternal years.

The world has no room for cowards. We must all be ready somehow to toil, to suffer, and to die. And yours is not the less noble life because no drum beats before you when you go out into your daily battlefields, and no crowd shouts about your coming when you return from the daily victory or defeat.—Robert Louis Stevenson.

We cannot say this or that trouble shall not befall, yet we may by help of the Spirit say nothing that doth befall shall make me do that which is unworthy of a Christian.—R. Sibbes.

Hero Glider Record

German University Student Remains In Air 36 Hours

Kurt Schmidt, Koenigsberg University student, flying a glider he built himself descended after setting a new world's record of 36 hours and 37 minutes.

He had remained at an altitude of 200 to 300 metres (650 to 1,000 feet) to beat the former record of Lieut Cocke, who established a mark of 21 hours and 34 minutes in Honolulu.

Schmidt, 27 years old, is a Nazi storm trooper whose home is at Alhenstein. When he tumbled out of his glider he was carried upon the shoulders of his enthusiastic companions to the Luftsport club. Apart from sore eyes, since he wore no goggles, he was in nowise exhausted.

SPANISH CORN PUDDING

Half cup sweetened condensed milk, 2½ cups corn cut from cob or canned corn, ¼ cup chopped green pepper, 2 tablespoons chopped pimento, 1 tablespoon chopped onion, 1 teaspoon salt, 2 eggs.

Blend sweetened condensed milk, corn, chopped green pepper, chopped pimento, chopped onion, salt and well-beaten eggs. Pour into buttered baking dish and bake 25 minutes in a moderate oven (350 degrees Fahrenheit). Serves six.

Royalty Learns To Box

Since it has become known that the Prince of Wales and his two nephews, Lord Lascelles, and the Hon. Gerald Lascelles, have learned to box, both boys and girls of prominent London families are learning the art of pugilism at the request of their parents. The princess royal attended a boxing exhibition in which Lady Mary Cambridge, the queen's great-niece, took part.

More for Your Money

With all the necessary features which go to make a store popular—PRICE, QUALITY, CLEANLINESS—Co-Op. also have the desire to serve you as they themselves would like to be treated. Buy the Co-Op. way. A fair deal all around.

SALMON, Quenelles, tin ..... $ .21
SHREDDED WHEAT, 2 pkgs ..... .23
COFFEE, Braid's Big 4 tin ..... .31
SOAP FLAKES, Princess, 2 large pkgs ..... .41
