THE CRESTON REVIEW

Vol. XXIV — CRESTON, B. C., FRIDAY, JULY 14, 1933 — No. 17

School to Cost $8125 This Year

H. W. McLaren New Trustee—Teachers' Salaries are Cut 10 Per Cent—Year Closed with Substantial Surplus.

Teachers' and janitor's salaries cut 10 per cent.; secretary's salary cut 20 per cent; $8,125 voted for the year's running expenses; H. W. McLaren elected trustee, to replace Jas. Cook, who declined re-election; J. W. Hamilton re-elected auditor. Very briefly stated this is the business transacted at the annual meeting of the ratepayers of Creston school district at the schoolhouse Wednesday evening, at which Jas. Compton presided. The attendance was the largest seen at a gathering of the sort in almost 15 years.

Trustee Jas. Cook, chairman of the board, presented a concise but carefully pr pared statement covering the year's operations, indicating much good work in connection with improvements to grounds and buildings. The conduct of the school was highly praised by both public and high school inspectors, attendances had been good, and discipline well maintained. All this h s been accomplished and the year's expenditures kept well within the estimates.

The financial statement was explained by trustee Geo. Nickel. It showed a balance of $2359, and $300 to come in from unpaid high school tuition fees. The chief critic of the budget was F. H. Jackson who urged that it would have been good business to take a considerable part of this surplus and pay off the loan on heating plant which is drawing seven per cent. interest. Mr. Jackson also maintained a saving could be made on the purchase of supplies. The financial statement:

RECEIPTS.

Balance from last year	$ 1690.93
Government of B.C.	9275.00
Tuition fees	577.79
	$11,543.72

EXPENDITURE

Salaries: Teachers, $4175.12; Secretary, $125; Janitor, $801	$ 5101.12
Payment on loan and interest	484.00
Supplies	1566 28
Fuel	477.78
Water	85.00
Insurance	53.55
Levelling school ground	221.11
Repairs, Painting, etc	698.95
Lumber for repairs	348.36
Labor on floors	60.64
Miscellaneous	87.75
Cash at bank	2359.18
	$11,543.72

The big argument of the evening, however, was on the teachers' salaries. Chairman Cook presented a motion to cut the stipends of the high school staff 10 per cent. and the public school instructors 15 per cent., and very clearly explained the reasons for the spread in the cut as between the two staffs. Trustee Mrs. Henderson read a letter from the teachers explaining their objections to she cut.

In the discussion that followed it was noticed that more than a few present were not in entire sympathy with salary reductions, and when this item in the estimates was voted on the cut to the public school staff was fixed at 10 per cent., rather than 15 per cent. a majority of the board favored. As adopted this year's salaries will be as below:

H.S. Principal Lewis	$1710
O. Sostad	1260
Miss Smith	1200
P.S. Principal Marriott	1350
Miss Meldrum	990
Miss Wade	1080
Miss Learmonth	900
Miss Hobden	900
Miss Holmes	900

With the salary item passed it was possible to bring in the estimates for 1633-34 at $8,125, but in view of the handsome surplus there was a motion to reduce this to $7000, but on the vote being taken a considerable majority favored the higher figure, which was adopted, made up as follows:

Water	$ 85.00
Insurance	200.00
Fuel	500.00
Repairs and Improvements	200.00
Payment on loan and interest	470.00
Janitor	810.00
Secretary	100.00
Teachers	4652.00
Supplies	1200.00

Pressure was brought to bear on Trustee Cook to stand for another three-year term, several speaking in complimentary terms of the splendid service he had rendered, but he refused re-nomination, and the choice of trustee fell upon H. W. McLaren, with J. W. Hamilton re-elected auditor. Before adjournement the usual vote of thanks was tendered the old board for its successful work during the past year

Swimming Pool!

A Public Meeting of all interested in a Swimming Pool will be held in the

United Church Basement

Friday, July 14

at EIGHT p.m.

Those who have subscribed money toward the project are specially asked to attend.

K.P. COMMITTEE

Sirdar

Mr. and Mrs. R. Blumaneaur and family were visitors to Creston on Saturday.

Mr. and Mrs. James Wilson and family were visitors at Creston and Canyon on Saturday.

Mike Talarico has left for Trail, where he has secured employment.

Mr. and Mrs. T. Rogers and young son, pat, and Mrs. E. Martin were visitors at Creston on Friday.

Mr. and Mrs. Dick Dennis have returned from Nelson, where Mrs. Dennis has been for the past week on account of her husband sustaining an injury to his foot.

Charles Ward of Cranbrook was a visitor to Sirdar during the week, proceeding as far as Grey Creek. He was accompanied by Mr. Dickson of the Imperial Oil Co.

The last of the bridges between Sirdar and Atbara has been removed, although it is still necessary to use the detour. The road however, should be completed in a short time.

The water guage stands at 17.35. This is a drop of 1.36 for the week. For the past several days high winds have been prevailing from the south, which has a tendency to lower the water.

Haymakers are beginning to get anxious about the slow run off of the water and as indications point at present hay cutting will be very late this season.

A large launch containing passengers from Porthill made the trip down the river to Kootenay Landing and completed a circular tour by way of the Slough.

John Rogers and Charlie Lombardo were Saturday night visitors at Creston, attending the show.

Aurther Lombardo is at present at Boswell, where he is employed picking cherries.

A arge brown bear was shot by Indians behind the Mannarino ranch west of Sirdar.

Canada Smelters, Limited, from their mines at Sanca, have shipped the first full car of ore to the smelter at Trail during the week. The ore is hauled from the mine to Atbara by truck. The mines are at present actively at work and shipping is expected to increase as soon as larger storage accomodation is completed at the mines, which is now in course of erection.

Council Hears Pool Deputation

Will Have Special Meeting to Dispose of Matter—Electric Light Company Representative Heard—Accounts Small

Discussing swimming pool construction and power matters with a couple of delegations was the feature of the July meeting of the village council on Monday evening at which Reeve McFarland presided, and Councillors Dr. Henderson and F. H. Jackson in attendance.

The swimming pool advocates were F. V. Staples, W. V. Jackson, W. J. Craig, Art.Reed, with the former as spokesman. He presented a list which showed that just over $600.00 had been guaranteed and felt sure when the canvass was complete there would be another $150 to add to the list. A pool 30 x 70 feet, or slightly larger, was the objective, and it might be placed in Exhibition park or on some lots advantageously located on the lower side of town.

Two types of pool had been investigated. One was of wood construction lined with galvanized iron soldered. This complete, with a couple of dressing rooms cost about $550. For a cement pool, the cement work alone would run to about $850, and another $150 at least to take care of excavating and dressing accommodation.

If the Park is used the council's help would be required to improve the water supply. If private property was acquired some village fuuds would be needed to assist with the purchase. The council gave the pool friends a very sympathetic hearing and it was agreed that a meeting of all interested would be held, possibly Friday night, at which the site would be decided upon, and a special meeting of the council will be called immediatel to decide the matter It is hoped construction can start next week.

The other delegation was made by A. C. Yuill of Vancouver, a director of Creston Electric Light Company, Limited, and the local manager, J. G. Farris. The possibility of West Kootenay Power & Light Company invading the town to distribute "juice" was discussed, and just what action the council should take in the matter. Mr. Yuill stated that his firm's legal advisers had assured him that the West Kootenay charter did not give them authority to e..ter the village without the consent of the municipal authorities, and Mr. Yuill contended his company was entitled to every support from the village to prevent West Kootenay competition. When business warranted it they would provide hydro power, and in the meantime betterments would be made at the existing plant to provide the best possible service. The only decision arrived at was that the council will file a formal protest against the West Kootenay Company's application for approval of its Goat River canyon project plans insofar as they relate to the "locality within which the business of the company is to be transacted" as including the village of Creston.

The necessary motion was passed declaring Wednesday, July 26th, a civic holiday, and Mr. Morabito will be written to asking that he abate the nuisance caused by the cess pool at the King George Hotel. A petition protesting against this nuisance was received from about 20 ratepayers in that locality.

The correspondence was light, most of it having to do with with tax payments from out of town property owners. The accounts passed for payment were $199.82.

Kitchener

C. H. Robinson of Nelson, fishery inspector for the Kootenays, was here on Friday and planted 20,000 eastern brook trout eyed eggs in Meadow Creek.

Mrs. G. Young of Creston spent the weekend here, a guest of her sister, Mrs. E. Driffil, returning on Monday.

Z. Geroux was at Moyie at the weekend, on a visit with his son, Omer Geroux.

Mr. and Mrs. W. L. Hathaway and Miss Hatton, of San Francisco, Calif., arrived on Saturday to spend a few weeks at Camp Hathaway here. Their chauffeur, Mr. Rice, completed the party. Miss Hanson of Creston is here in charge of the household.

Miss Sarah Brett left for her home at Canyon on Sunday, after a visit at the home of Mr. and Mrs. Jack Hankey.

A chariviri was staged on Mr. and Mrs. Kost, who were married on July 1st, and have just moved to Kitchener to make their nome. Mr. Kost is employed on the C.P.R. The yound people were given a great welcome.

The junior baseball club are having a bridge and dance on Friday, 14th, at Hunt's Hall. Ladies 15 cents, gents 35 cents.

The annual meeting of the ratepayers of Kitchener school district will be held on July 15th. At the previous meeting it was impossible to reach an agreement on teacher's salary and the ratepayers will have to vote on this matter.

Lister

H. Bollinger has returned from Nelson, and is accompanied by his friend, Mr. Garris.

Col. Lister left at the first of the week, on a visit to Nelson and points west.

John Bird is taking a two weeks' vacation this month, commencing on Monday, and the store and postoffice are at present in charge of Miss Curtis and Fred Powers.

Rev. M. T. C. Percival, the Kimberley-Creston English Church pastor, was here for service on Sunday morning, a feature of which was the baptisim of Alice Wellspring.

Mr. and Mrs. Jack Bullough of Calgary, Alberta, were visitors with Mr. and Mrs. Flement during the past week.

George Jacks and Alf. Wellspring will be having raspberries for shipping before the week is out, and report quite an average crop.

Lumber from the John Huscroft portable mill is being hauled to Creston and is being used on the construction of the new hospital in that town.

Miss Curtis and her sister, Catherine of Slocan City are here for a couple of weeks, the former having charge of the store, while Mr. Bird is enjoying a well earned vacation.

There was a fair turnout at the school district ratepayers' meeting on Wednesday evening with the school board chairman, John Bird, occupying the chair. Teachers' salaries were voted at $1000 for the Principal and $875 for the junior teacher, which is a cut of only $65 and $20 respectively. $740 was voted for operation expenses for the ensuing year, a reduction of $75. John Bird was re-elected trustee for the three-year term, and Mrs. Geo. Jacks succeeds Mrs. H. Langston, who resigned, for two years. W. P. Edwards was elected auditor.

Wynndel

Mrs. E. Uri and baby son returned from Creston hospital on Sunday.

R. Eakin was combining business with pleasure on a visit at Cranbrook the past week.

The fall fair prize list is now in the printer's hands and should be available for distribution before the end of the month.

Mrs. K. Dewar and son, Donald, of Trail, were visitors here last week, with the former's father, John Bathie.

Mr. and Mrs. R. Crane returned last week from Owen Sound, Ontario, to which point they accompanied the remains of their son, Neil, for burial, early in June.

There will be no meeting of Wynndel women's Institute this month.

Al's Four Aces orchestra will play for the Athletic Club dance at the hall this (Friday) evening, with an admission of 75 and 25 cents, supper included.

Mrs. M Gregory left last week for Wetaskiwin, Alberta, on a visit with her sister.

A representative of Ness Electric, Creston, was calling on residents here quoting prices on wiring houses for the coming of the West Kootenay electric light and power.

An electric storm was encountered on Sunday night, bringing with it a light hail and a rainfall of about a quarter inch.

Raspberry shipping got under way in some quantity at the first of the week. The strawberry season will be over before this week is out.

$130,000 W.K. Tax Assessment

This Information Given Out at Canyon School Meeting—Half Goes to Erickson—Canyon to Object to this Arrangement.

The annual meetiug of the ratepayers of Canyon school district was held at the schoolhouse on Saturday evening. Owing to many of the residents not having paid their 1932 taxes the attendance was the smallest in ten years.

Trustee W. E. Searle occupied the chair, and was called upon to cast the deciding vote between Mrs. Humble and J. E. VanAckeran (the latter's term having expired) for trustee, and the ballot was in favor of Mr. VanVckeran. C. Blair was elected auditor for 1933-34.

$1400 was voted to run the school the ensuing year—the same amount as voted a year ago. The school will receive another coat of paint. A small donation was voted toward CrestonValley School Athletic Association track meet, also the Women's Institute fall fair.

The chairman announced that the special school meeting on May 29.h was legal and quite in order, in spite of some who are not local ratepayers.

The meeting voted to pay teachers' salaries decided on at that meeting—$825 to junior teacher, and $1000 to principal.

In advertising the C.C.F. early in the spring the organizers made use of the school as a means of distributing notices. One of these found its way to the department of education. The trustees received a communication from the department advising them to take steps to end this way of spreading propaganda. It is hoped that this little episode does not injure the C.C.F. chances in the next provincial election.

A letter was read from the provincial tax collector advising the trustees that the assessment of West Kootenay Power & Light Company, whose plant is being erected in the Canyon school district, will be in the neighborhood of $130,000, half of which will go to Erickson school district and half to Canyon. A strong protest was made to this arrangement and the trustees were instructed to lodge a protest at Victoria. The dam and power plant are on land that has always been included in Canyon area and ratepayers could not understand why such an arrangement was contemplated.

WORLD HAPPENINGS BRIEFLY TOLD

The Canada-South Africa trade agreement, negotiated during the imperial economic conference in Ottawa, last summer, has become effective.

The world disarmament conference has been adjourned to Oct. 10 despite a protest by Rudolph Nadolny, Chancellor Hitler's representative, that the long recess amounted to a first-class funeral for disarment.

Approximately 2,500 single unemployed men are in Vancouver receiving no assistance from either city or province because of their refusal to go to relief camps or because they left these establishments.

E. L. Bushnell, director of radio station CKNG, Toronto, has been engaged by the Canadian radio broadcasting commission to make a tour of the western provinces to organize programmes from this area.

Detention for 28 days was the sentence meted out to Guardsman Harris, sentry at Windsor Castle, following a court martial. Harris was found asleep at his post while the royal family were in residence some time ago.

A plea for an even greater measure of co-operation between all nations in the fight against tuberculosis was made by Professor S. Lyle Cummins, of England, noted authority on the disease, at the annual dinner of the National Tuberculosis Association held in Toronto.

Dr. John M. Chapman, associate professor of banking at Columbia University, in an address before the round table on money, banking and financial situation, at the institute of public affairs, said that the United States "bank failure movement is not ended."

Seven speedy destroyers used by the United States coastguard for years to chase rum runners and other smugglers operating off the Atlantic coast have been returned to the navy because the government's economy programme necessitated a reduction in expenditures.

Has His Own Method

British General Taught Himself Eight Or Nine Languages

Lieutenant-General Sir Edmund Ironside has exchanged what was practically a sinecure at the Tower of London, England, for an active part by his new appointment as Quartermaster-General of the Forces in India. As the youngest general officer in the British Army for many years—still less than fifty-four years old—he will now have an opportunity to use his keeness to the full. He taught himself the eight or nine tongues he knows by a method of his own, memorizing every day a score of nouns and adjectives. Verbs come in their own good time, and if he is ever at a loss for one, he bridges the gap by an eloquent gesture and carries on calmly with the nouns.

Faith In Western Canada

Wrigley Company Breaks Even On Wheat Deal

Wheat taken by the William Wrigley, Jr., Company of Canada in payment of debts owing them in western Canada has now been sold without financial loss states Allan Ross, president of the company.

In December, 1930, the company announced all money owing it in the prairie provinces would be used to purchase 1,000,000 bushels of wheat. The announced intention was to leave the money in western Canada in wheat and the company's announcement declares its faith in Canada and her chief commodity had been more than justified.

Winnipeg Newspaper Union Fashion

Canadian Authors Tour Britain

Party Of Fifty Will Visit Literary Centres Of the British Isles

Following the annual convention of the Canadian Authors' Association which this year was held in Quebec City, a party of about 50 Canadian authors and their friends sailed (July 1st) on the "Empress of Britain" for a tour of the literary centres in the British Isles. They will be met by some of the most distinguished authors of Great Britain and will experience the advantages of personal contacts with the scenes depicted in English literature including the country of Hardy's "Tess" the spot where Keats wrote "Ode to the Nightingale," Westminster Abbey, Dr. Johnson's house, the inn made famous by Sam Weller, Stratford-on-Avon, Kenilworth Castle, Wordsworth's home, the Robert Burns' country, and other centres of literary interest.

Among those who, it is expected, will extend courtesies and greetings to the visiting Canadians will be Sir James Barrie, Rudyard Kipling, John Buchan, John Masefield, Sir Henry Newbolt, J. B Priestley, John Drinkwater, and George Bernard Shaw. There will also be recognition by leading public bodies and parliamentarians.

The Canadian Authors' Association was organized in 1921 with a view to promoting the interests and craftsmanship of Canadian authors. It has branches from coast to coast and a membership of about 800 The association has helped to disclose the very substantial contribution which Canadian writers are making to current literature—a contribution which had to some extent escaped observation due to the fact that a large part of Canada's literary production finds its way to the public through the channels afforded by publishing houses in the British Isles and the United States, with the result that numbers of well-known Canadian writers were commonly regarded as being Englishmen or Americans. During the 12 years since the association was organized great advances have been made in the Canadian publishing industry, particularly in the field of magazines and literary periodicals.

Great Masonic Gathering

Duke Of Connaught Opens New Headquarters In London

At one of the greatest Masonic gatherings which has been held in London, England, for many years, the Duke of Connaught, Grand Master, opened the new Masonic headquarters adjoining the old headquarters in Great Queen Street. The lofty tower of the new building rises above the not inconsiderable buildings of the neighboring Kingsway. There is a great inner temple surrounded by 15 lodge rooms, a large museum and library and extensive administrative offices. The cost which runs to well over £1,000,000, was raised on the suggestion of the Duke of Connaught just after the close of the war. The building will be a memorial both to the close of the war and to many Freemasons who fell in action.

SUNDAY SCHOOL LESSON

JULY 16

DEBORAH

Golden Text: "God is our refuge and strength. A very present help in trouble."—Psalm 46:1.

Lesson: Judges, Chapters 4, 5.

Devotional Reading: Psalm 46:1-3, 8-11.

Explanations and Comments

Israel Oppressed By Sisera, Captain Of Jabin, King Of Canaan, Chap. 4: 1-3.—"It is easy to fail to discover a great crisis between the verses of an old narrative, but this was a great crisis. Here was a weak and struggling people, whose future was of immense consequence to the whole history of religion, charged with a mighty spiritual destiny, and in danger of just ceasing to be anything at all before they had even begun to be what they were meant to be. Their spirits were broken; those chariots drove across their very soul. If ever their leaders came together, they said: 'It's no use, Sisera is too strong for us; we have only foot soldiers, poorly armed. If we should rise against Sisera, he would only ride us down the more fiercely.' And then, when the men were of no use at all, a woman turned the tide of history."

"Something very much like that happened in France five hundred years ago. England held France in the hollow of her hand; the spirit of the French was broken; the State was divided; the king was a poor weakling with no thought but of his own pleasure. Then a peasant girl 'heard' voices, and her soul kindled within her. She touched the smouldering spirit of her race with her own kindling fire; she saw her King crowned in grey old Rheims Cathedral; and, though sh herself died a martyr to the stupidity and treachery of her time, all the world remembers Joan of Arc. There is no limit to what a kindled soul can do when the time is ripe."—Gaius Glenn Atkins.

Deborah's Challenge To Barak, Chap. 4:4-7.—Deborah was a prophetess and the judge of Israel at this time. She was accustomed to sit under a palm tree (therefore known as the palm tree of Deborah) and declared what was the judgment of God in national affairs, and she also settled isputes among men. On a coin of the Roman Empire, which represented the capture of Jerusalem, Judea is pictured as a woman seated under a palm tree, captive and weeping. "It is the contrast of that figure which will best place before us the character and calling of Deborah," Dean Stanley writes. "It is the same Judean palm under whose shadow she sits, but not with downcast eyes and folded hands and extinguished hopes, but with all the fire of faith and energy, eager for the battle, confident of the victory."

With faith in God's directing hand such as empowered Joan of Arc for her task, Deborah summoned Barak and ordered him to raise a force of ten thousand men from the tribes of Naphtali and Zebulun and attack Sisera with his chariots and his multitudes at the River Kishon. Only those two tribes were called because they were the most interested in defeating the oppressors, for their territory bordered the Plain of Esdraelon. "And I will deliver him unto they hand"—Deborah is speaking in the name of Jehovah.

Fruit Popular In Canada

Consumption Of Apples, Oranges and Bananas Is Heavy

Notwithstanding the fact that the people of Canada eat more eggs and butter than the people of any other country and register high as meat eaters, they also enjoy fruit. The statisticians of the Canadian Government have just released the figures on fruit consumption in Canada for the fiscal year ended March 31, 1933, which show that the domestic consumption of apples was 2,272,100 barrels, of oranges 2,683,471 boxes, and 3,325,900 stems of bananas. On the basis of the population of 10,506,000 the average per capita consumption was about one-fifth of a barrel of apples, more than one-quarter of a box of oranges, and less than one-third of a stem of bananas.

The total domestic consumption of the commercial apple crop grown in Canada has been fairly consistent during the past ten years, varying in somewhat the same manner as commercial production, whereas imports show a gradual decrease which has been more rapid during the last two years. Bananas show a steady increase in imports, but with a drop during the 1932-33 season to about the 1927-28 level, although the population has increased at a greater rate and during the last three years consumption per capita has declined. Imports of oranges vary from year to year and show no decided trend to decrease or increase, which trend is also lacking in the consumption per capita.

To Measure Wind Resistance

Seven Hundred Miles-An-Hour Tunnel Built At English Laboratory

Important improvements in the range and accuracy of shell and rifle fire will result, it is hoped, from a new 700 miles-an-hour wind tunnel, which is to be constructed at the National Physical Laboratory, Teddington, England.

The tunnel will provide the fastest stream of air which has yet been produced—with a velocity nearly equal to that at which sound travels through air. This will render it possible for the first time for wind resistances to be measured at speeds closely approximating to the highest muzzle velocities obtainable.

As a result research workers will be able to obtain exact data on the relative merits of projectiles constructed with various modifications to existing standard shapes. Instead of elaborate and costly gunfire trials with projectiles the whole work will be performed in the laboratory. The air will rush past the shell instead of the shell rushing through the air.

The chief directions in which improvement may be expected are in increased range in the case of shel fire, and greater resistance to "drift" due to a sideways wind, in the case of rifle-fire. In the latter case it will be possible to reproduce the full effect of lateral wind of any desired strength by placing the bullet to be tested at a small angle to the 700-miles-anr-hour gale.

The importance of such practical tests lies in the fact that hitherto it has proved impossible to make precise calculations of air resistance based on theory alone. With both ships and aircraft it has been found that important improvements can be obtained by apparently insignificant changes in design.

In the method which will be adopted, the projectile will be suspended in the wind tunnel by an apparatus which will automatically record the various forces exerted on the projectile. This record can be transmitted by electrical means to an observer outside, who has as full a knowledge of everything that is happening to the projectile as if he were in the tunnel.

The new tunnel is to be constructed, in order to make use of the enormous air pressure developed in the laboratory's compressed air tunnel for aircraft testing, which is ready to begin work.

When testing in this tunnel is completed, the air it contains, which exerts a pressure of 5,000 tons on the giant castings at either end, will be released through the new projectile tunnel. It is estimated that the blast of air will last for about twenty minutes at the full speed. In addition to projectile tests the tunnel will be used to measure the forces on the tops of aeroplane propellers, from which other improvements are expected.

The creation of the compressed air tunnel, which alone makes the projectile tunnel a possibility, is a minor triumph for the British steel industry. Its components are so large that it was necessary to build the containing building round it. The whole has been tested up to the record pressure of 550 pounds a square inch—more than forty-five times the normal pressure of the atmosphere.

Taking Wonderful Trip

Party Of Ten Hawaiian Boys On Way To Yukon

When R.H.S. Monowai docked in Vancouver, it was just the end of another journey for most of the passengers, but for 10 boys from Hawaiian Islands, it was arrival at the stepping-off place for magnificent adventure.

They are members of a party from Bunahoe school, under direction of Mr. Bayne Beauchamp, and their destination is Yukon and Alaska, where they will do nothing at all except:

Travel 1,600 miles on the Yukon River in small boats; prospect for gold; botanize; take samples of plankton (minute fish food); take moving pictures. They have arranged for some boats at Whitehorse, and will build others.

The boys, ranging in age from 14 to 17, were picked for their physical and mental ability. They will visit Dawson, Fort Yukon and Tanana on their trip down the Yukon.

CHAPTER XIII.—Continued.

"Now Jimmy was killed. I wasn't just an' acquaintance' of his; I was the nearest person in the world to him. He came from England; he had no relatives. That little tot of his . . Elizabeth, it's but four years old, it's helpless here in the North, it's dependent in a terrible sense."

With more harshness than he had ever shown her, he said sharply: "I'm going to look out for Jimmy's child. That's settled. If you don't like it, you don't have to, you know."

His coldness frightened her. It destroyed all her former assurance that she dominated him. She sensed he wanted to end their engagemnt and would do it here and now if she gave him sufficient cause. A whisper warned her:

"You may be right about that reward money and Jimmy's little tot. I didn't see your viewpoint, when I first came in here. I won't try to persuade you to do something you feel is wrong."

Watching him intently, she saw he was surprised, and deeply disappointed, at her yielding to him. He wanted to break with her! He wanted her to release him!

A little fearfully she broached the main purpose of her coming here.

"I heard you're going back into the Mounted."

"Who told you that?"

"I just heard. Several people said so."

"They were a bit hasty."

"Then you're not going back?"

He answered her indirectly. "Williamson offered to stop my buying-out papers at division headquarters or else re-enlist me as a constable and promote me to sergeant again. He said he'd write himself to Colonel Steele and explain, and ask Steele to release me, if I'd agree to come back into service."

In her heart Elizabeth was flinging at him, contemptuously: "If you go back into that ninety-a-month rut, I'll never marry you! I'll never live here in this backwoods and be shunted from barracks to barracks!" But her lips said to him, with admirable self-control: "You haven't decided? You want time to think it over?"

"You want me to go down to Victoria?" he demanded sharply.

Elizabeth was entirely too wise to deny that. "Yes, I do, Alan. I would rather we lived there. But you want to stay here, and I don't feel it's my right to dictate your life work."

"You're willing to stay here, then?"

"I'm willing to let you decide. I'm willing to stay here, if you want to."

Even while she spoke, she was wondering. . . . . Why had Haskell come to her tonight with the news about Alan? Against his former "affairs" and his untrustworthy nature, she weighed his passionate infatuation. The scales hung in the balance, uncertain, precarious. He would promise marriage; but once she was out in Edmonton or the big eastern cities, once she had broken with Alan and put herself in Haskell's power, how could she be sure he would carry out his promise?

She temporized: "I'm sorry I was so—so sharp about those other things, Alan. I'm dreadfully tired and worn out. This last week, not knowing where you were or if you were in danger—it was a nightmare. I think I'll go, if you'll excuse me. We can talk about this tomorrow, Alan, can't we?"

"Yes, tomorrow," he said dully. "We can talk about it then."

When she left the cabin and started down the terrace, a lightning flash revealed to her Constable Whipple still sitting forlorn and dismal at the edge of Mrs. Drummond's flower garden. By the window of his tiny study Father Caverley sat alone Joyce had gone. There was a light in Inspector Haskell's cabin; he must still be awake. . . . .

A few miles down river she heard the distant, long-drawn toot of the fur-trading steamer beating up to Endurance and on south to Resolution. The sound awoke a tumult of memories; it seemed like a voice of the outside, an echo of the civilization that all her being clamored for. She glanced again at Haskell's cabin. He was going south, south to the land of cities. It would be like a flight, an escape from this far North country, into the haven of that Ontario estate, his comfortable heritage, their winters in glittering Ottawa.

She htought of going over to his cabin on some pretext. But after her coldness of these last weeks, such an act would be too much an overture, even though she had talked with him this evening. Why couldn't she send Whipple to him? Haskell would surely come out to her. . . . . .

* * * * * *

In dull uncaring mood, Alan had flung himself down on the bed for a few moments. Elizabeth had not hinted at releasing him; she had given him no honest cause to break the engagement himself, but had yielded to him on every point. He felt that tomorrow, after Joyce had gone away, he would not greatly care whether she released him or not.

A timid knock at the door roused him. With a leaping hope that it might be Joyce, he got up hastily, stepped into the outer room and bade "Come in."

His visitor was Corporal Whipple.

With a hasty glance at the door, as though fearful of being overheard, the corporal said secretively:

"I came to tell you . . . . There's something I think you ought to know, sir. It's my duty to tell you."

"What's your game, fellow? Come out plain."

"I—I . . . Well, the superintendent says he's going to make me stay here at Endurance. He says it would be—well, punishment, because I told ——I said what the inspector ordered me to say about that patrol. I'd like—I thought you might help me. . . . . If I could only get transferred to some other post. . . . ."

"That's a wise ambition of yours," Alan commented. "D—d wise!—after the way you've lied and spied on us men. And you thought I'd help you get a transfer! While I'm thinking about it—if I go back in service here, you'd better yank those two stripes off in a hurry. It takes a man to wear that uniform down here and a h—l of a good man to wear those stripes on his arm. Now get out!" He turned away.

Goaded by the fearsome prospect of living here among these men, Whipple mad a last frantic effort.

"You've got to know about this, Sergeant Baker. I think it's shameful the way she's deceiving you and the way he's meeting her—out there, at night. I mean Miss Spaulring. She's meeting him, she's down there at the edge of the woods; she sent me to tell him where he could find her, and he went to her. He's there with her now."

He backed away from Alan hastily. The expression that came over Alan's face let him know he was fumbling with dynamite, and God pity him if he bungled it.

"D'you mean," Alan demanded, "that she's down there at the woods with Haskell? She sent you to bring him out there to her?"

"Yes, sir," Whipple stammered. "I'm telling you the truth, sir. They're out there now, Sergeant Baker. He's trying to get her to — well, to throw you over and go with him, but she's afraid he mightn't marry her and then she'd be—well, stranded if she throws you over."

A horrible suspicion shot into Alan's mind. Here in his cabin a quarter-hour ago, why had Elizabeth come in so angry, and imperious, and then done a sudden about-face and so strangely yielded to him? Had she been weighing her chances with Haskell, thinking of marrying Haskell, even while she had talked of "our" home?

A thought burned through Alan like living flame: "Good God, it was for her, a mercenary like her, that I broke away from Joyce! I let her lead me, use me. It was for her I kept that promise sacred—"

Whipple pleaded timidly, as Alan started past him for the door: "About my transfer, sir—you'll help me? You'll do what you can for me, sir?"

Alan's answer fairly dazed him. "I'll get you a transfer! Before Williamson leaves! And still be in your debt!"

As he strode down the slope toward the woods ahead of him at the timber edge he made out the dim whiteness of Elizabeth's dress; and then by a lightning flash he saw her and Haskell sitting together under a low sweeping pine. He had an instant's glimpse of Haskell holding her hands, pleading with her. Of Elizabeth listening, uncertain of his passion, coolly drawing him on to a commitment.

When he loomed upon them out of the gusty darkness, they sprang to their feet. Elizabeth panic-stricken, Haskell with a snarl of anger.

"Put up the gun, Haskell!" Alan bade him, noticing the quick blurred movement. "I don't want to fight you. Not for her! I didn't come for that!"

A host of bitter and pitiless words had been surging through Alan's brain as he had come down the slope. He wanted to taunt her, not for having made herself dependent on him, but for taking his money while she harbored treachery in her heart. He swore to fling her sordidness into her face so that she would know he realized it now to its depths. He intended to remind her of that night in his cabin when she had offered herself to him out of motives akin to those of any paid woman.

But as he confronted the two of them, Alan checked the brutal words. Haskell had moved a little in front of Elizabeth. There was something of protection, of sheltering, in the act; something which came nearer making Alan respect the man than any act he had ever seen from Haskell.

He did not speak to Elizabeth at all, but ignored her.

"Don't think I came down here to interfere, Haskell," he said, in harsh cold voice. "You're welcome. And don't think you surprised me tonight. I haven't been blind You sent me away on those crazy patrols so you could be alone with her. You went sneaking around to her while I was keeping her and she was engaged to me."

"You've worked hard enough to get her. You fought me with lies and did me all the damage a man could do. What happened between you two while I was gone I don't know. I don't care what. But I can guess—finding you two out here together, sneaked away from the post at night. Now, after that . . . You've told her you wanted to marry her. That's what you're going to do. You're not going to put it off; you won't spring something about taking her out to Edmonton or Ottawa; you won't be given any benefit of the doubt. You'll marry her here at Endurance! Before you leave! You'll either do that, or I'll come down there to your cabin and I'll settle with you the way you thought I was going to do tonight!"

He turned on his heel and left them.

(To Be Continued).

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists. 49

Display Of Drinking Cups

Many Of Great Age and Beauty Exhibited In London

The glory of good liquor through 25 centuries was celebrated at the end of this month. On June 21, Princess Alice, Countess of Athlone, opened an exhibition of drinking vessels at the historic hall of the Vinters' Company in the heart of London city.

Cups, tankards, mugs, bottles, and decanters of every shape and size, used by 75 generations of men, were displayed. They were in gold, silver, bronze, pewter, wood, leather, and glass. No such assembly has ever before been arranged.

A fragile wineglass, tinted a rosy pink, contrasted with a giant "leather bottle." The glass is 2,500 years old, and was found about 60 years ago at Salamis. It was used by the ancient Greeks, and so perfect is its design that glasses of the same form are still made.

The "leather bottell" belonged to King Henry VIII. and seems to be connected with his first matrimonial venture; for it is adorned with both the Tudor rose and the pomegranate, the badge of Katherine of Aragon.

The bottles were dominated by a huge decanter, nearly two and a half feet high, with a capacity of 21 ordinary wine bottles. It was made in the eighteenth century for a coming-of-age party, and legend says that it was to be filled and emptied 21 times.

There were also a series of coconut cups of the fifteenth, sixteenth and seventeenth centuries. They are beautifully carved and mounted in silver. One of the finest was decorated with pineapples, a dolphin, and a mermaid. It was made in 1518. Coconuts were then regarded as rare curics.

The dazzling array of silver vessels dates from the sixteenth century onwards. The famous milkmaid cup of the Vinters is, perhaps, one of the most interesting pieces of this kind. It is in the shape of a girl whose skirts form one cup, and a pail which she holds above her head forms a second.

THE RHYMING OPTIMIST

By Aline Michaelis

SOUVENIR

It is the same, each well-loved scene of old,
The ships at anchor and ships sailing past
The Belver light, with gleams of red and gold
Against the twilight shadows, deepening fast.
No change I find in this remembered place
Whose every image in my heart is shrined;
No change, save in the absence of your face,
And (who can say?) this may be wholly kind.

Better, perhaps, that I can keep you so.
Always erect and young and proud and free;
Better, a hundredfold, that you should know
Only that other fairer, braver me!
Unchanged, the sea, the sand, lights red and gold,
And these dear memories God lets us hold!

Extermination Of Weeds

Summer Plowing With Double Strike-Out Method Most Effective

Summer plowing is an effective method of killing such weeds as sow thistle and twitch grass. Often, however, the strike-out leaves a strip of undisturbed weeds which again pollute the field. The double strike-out should be employed where possible, that is, first make a shallow dead furrow, then turn two light furrows back and complete the strike-out with two heavier furrows. This uproots all the soil and leaves no undisturbed strips on which the weeds may continue to thrive.—Farmer's Advocate.

Rations For Fifteen Years

The San Quentin Bulletin turned to statistics long enough to report one prisoner had kept track of all the food he had eaten during 15 years as an inmate of a California prison. His record shows 2,157 hamburger balls, 32,850 slices of bread, 4,075 cups of tea, 9,500 cups of coffee and 270,000 beans, the latter item averaging 50 beans a day.

Little Helps For This Week

"He that contemneth small things shall fall by little and little." —Ecclesiastes 19:1.

Even one finger breadth wil mar
A world of light in heaven afar,
A mote eclipse a glorious star,
An eyelid hide the sky.

A single sin, however apparently trifling, however hidden in some obscure corner of our consciousness, a sin which we do not intend to renounce, is enough to render true prayer impossible. A course of action not wholly upright and honorable, feelings not entirely kind and loving, habits not temperate, any of these are impassable obstacles. If we know of a kind act which we might, but do not intend to perform, if we are aware that our moral health requires the abandonment of some pleasure which we do not intend to abandon, here is cause enough for the loss of spiritual power.—F. P. Cobbe.

It is astonishing how soon the whole conscience begins to unravel if a single stitch drops; one little sin indulged makes a hole you could put your head through.—Charles Buxton.

Building Super Locomotive

English Engineer Claims It Will Surpass "Royal Scot"

A new super-locomotive, designed by W. Spanier, mechanical engineer of the London, Midland & Scottish Railway is nearing completion. It is stated that the new engine, constructed mainly at Crewe, will surpass in size and power anything that has yet been seen on an English railway. It was origially intended that the locomotive should be built in time to appear at the world's fair at Chicago, but several difficulties arose, and the "Royal Scot" was sent tto America instead.

The new locomotive does not follow th orthodox design, for the front part of the boiler gradually tapers off toward the buffers, and when finished it is claimed it will be far more imposing than the famous "Royal Scot." It will be approximately the same height but seven or eight feet longer, while its additional speed and pulling power will make it suitable for either fast passenger or heavy freight work.

Interested In Exhibits

The Special Canadian history exhibits held in the David Ross McCord Museum at McGill University attracted some 6,000 school children during the past school year. The exhibitions, the object of which was to make the history of the country more real and vivid to the children studying it, covered periods from the earliest explorations in Canada to the war.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank

The good news came by telephone

"Yes, I'm working," said Tom Wilson. "I was notified to report to the shop last week—and the good news came by telephone. I say that, because only a short while ago I was planning to have my telephone taken out. But a friend advised me to hang on to it if I possibly could. He said that my chances of being re-employed depended a great deal upon whether I could be reached by telephone.

"Well I took the advice, and, sure enough, when work developed I was notified by telephone. If I had acted on that first impulse I might not be working today."

The man with a telephone has the best chance of getting a job.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C Subscription: $2.50 a year in advance. $3.00 to U.S. points.

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, JULY 14

HOME BREW

For those who, on occasion, profess to get satisfaction out of knowing that possibly conditions are worse somewhere else, the following from the last issue of the Pensicton Herald may be of interest. Says Editor McDougall: "The fruit grower here is not without his worries. Poor returns last year, even from varieties ordinarily expected to show good results. A somewhat lowered soft fruit crop this season when soft fruits were particularly important. Also a reduced apple crop, although this is probably a blessing if the reduction is not too great. Then a hail storm which swept 800 acres, or one-third of Penticton's orchard area, very seriously damaging fruit on at least 150 acres and probably putting 300,000 boxes of fancy and extra fancy apples down to Cee grade from hail marks. Then rains which have split a tremendous lot of cherries."

Whatever profits there are in the manufacture and sale of the 3.2 American beer must be fairly well distributed amongst those directly and indirectly connected with the industry. About two weeks ago they commenced selling the amber fluid in Idaho, and according to the Bonners Ferry Herald the vendors there pay a town license of $12 per annum, a federal license of $20,, a state license of $1, along with an assesment of $5 per barrel collected by the federal authorities, and another 5 cents a gallon tax by the state. After paying for the raw materials and their manufacture, along with distributing expense, that the mixture can retail at ten cents a glass convinces one that Charlie Davis is right in saying the American beer may be alright for a mild sort of sociability, but it certainly hasn't the kick packed by the Cranbrook brew.

If the depression ever ends and former standards in baseball are demanded, Creston will have good reason to be gratefnl, in part, for the rather tough times that are being encountered just at present. Even up till two years ago t e town had to have the best senior ball or there was no turnout, and in the effort to give the crowd what they would pay for rather scant attention was paid to developing local talent on the wide scale that now prevails with semi-senior ball at such points as Canyon, Erickson, Wynndel and even Alice Siding. With the pick of the players from these points to draw on, Creston can now field a team that can hold its own in amateur company anywhere in East Kootenay, at any rate, and on the defensive feature of the game the improvement still continues. For this berterment in this line of sport full credit must be given the backers of the international league, whose Sunday games are certainly deserving of better support than has been accorded some of them during the 1933 season.

With the definite word that Tom Mountford of Wynndel will carry the banner of the United Front party in this year's provincial election, an announcement awaited with interest—in fact, with compound interest—has to do with the identity of the standard bearer of the Bowser-Donaghy non-partizan party. Creston is naturally curious in this connection as the rumor mildly persists that our former well known and highly respected citizen, C. B. Garland, now of Nelson, can have the nomination for his mere say-so. And should it so happen that Mr. Garland will seek the suffrage of the electors of Creston-Nelson on the non-partizan party platform Creston Valley can surely sit back and figure its best interests will be amply safeguarded—with Putnam, Lister and Mountford resident hereabouts, and the Nelson barrister with property interests here.

Speaking of the oncoming provincial election, the first forecast as to the makeup of the new legislature has just been made by the Monthly Bulletin, published at Vancouver, editor of which gives as his considered judgment the following figures: Liberals, 16 seats; C.C.F., 15 seats; Union Government (Tolmie), 6 seats; Conservatives, 6 seats; Independents, 4. Whether the Bulletin has any political leanings is not disclosed, but it must be a publication of some standing as its forecast has even attracted the attention of the ultra Conservative Rossland Miner. While the margin of superiority conceded the Liberals is not at all great it can be safely assumed that it is one of the straws that shows just which way the wind is blowing, and the elector who expresses concern as to the winning party having a majority over all other groups should govern himself accordingly.

As to the date of the provincial contest opinion is fairly unanimous that voting will not take place until at least early fall, while on Friday, H. D. Twigg, former Conservative organizer, who is closely in touch with what is left of the Tolmie wing of the Conservative party, announced that the election would not come until November. The way the Tolmieites have been hanging on to power would easily justify such a late date for an appeal to the people, but it is not good business for the province to have polling day so long delayed. Under such circumstances a new government would not take things over until the middle of December, and with the legislature due to meet early in the new year the time available is all too short to prepare legislation so urgently needed to start the province on the return trip to what Premier Tolmie so affectionately refers ta as a stable government—something so positively assured us in 1928, and something eminently fitting to expect from a horse doctor premier.

New Container Cherries Popular

8-Pound Basket Popular with Retail Trade—Raspberries are Moving Quite Freely—Strawberry Season Nearing End.

Cherries and raspberries now feature the fruit shipping from all valley points, with the last of the strawberries likely to roll by the first of next week, although Sunday night's rain has a tendency to lengthen out the life of the crop.

Up to now there is every prospect of the raspberry crop coming up to the estimate of 5000 crates, and with a short crop all over British Columbia shipping agencies feel sure prices will be more satisfactory than a year ago, and quite a big improvement over strawberries. The shipping of raspberries is being handled on the same basis as strawberries—refrigerator car service being provided on berries going east of Blairmore, Alberta.

Prices on cherries, too, should be better than in 1932, due, in part, to the short crop everywhere, and especially in the Okanagan, where the cannery cannot get enough to meet their requirements in Royal Annes. Locally the cherry crop will not be more than 60 per cent. of 1932 in both Bings and Annes.

Creston Co-Operative Fruit Exchange is meeting with great success in marketing a considerable part of the 1933 cherry crop in baskets that weigh about eight pounds. The fruit going into these is central packed and uniform size and maturity is assured. Dealers are enthusiastic about it, the handle-basket being especially popular with cash and carry grocery stores. Along with cherries some quantity of gooseberries have been moved by the Exchange in the 8-pound basket.

Small quantities of new potatoes have been moving at attractive price, but this will not hold as Okanagan's new spuds are going out at about $15 a ton and in a few days prairie centres will have supplies of their own home grown potatoes.

The Herald estimates that 35 per cent, of the Penticton cherry crop has been split by recent rains, and the cannery will not buy them.

WATER ACT

Notice of Application for the Approval of Plans

TAKE NOTICE that West Kootenay Power and Light Company Limited will apply to the Comptroller of Water Rights for the approval ofthe plans of the works to be constructed for the diversion of water from Goat River under application for a license for Power purpose which application was filed in the office of the Water Recorder at Nelson, B.C., on the 18th day of June, 1930.

The water is to be diverted from the said stream at a point 600 feet downstream from South boundary of Block 29 of Lot 812, and is to be used for the generation of electrical energy at a power site located on Block 30 of Lot 812, Kootenay District.

The locality within which the business of the Company is to be transacted is within a twenty-five mile radius of Power site, including the village of Creston.

The plans and specifications of the said works made pursuant to Authorization No. 1008 have been filed in the office of the Comptroller, and duplicates of such plans and specifications are now open to inspection at the office of the Water Recorder at Nelson, B.C.

Objections may be filed with the Comptroller at any time prior to the expiration of thirty days after the first publication of this notice.

The date of the first publication of this notice is June 30th, 1933.

NAVIGABLE WATERS' PROTECTION ACT

R.S.C. 1927
Chap. 140.

George Leonard Salter, Trustee in Bankruptcy of Kootenay Valley Power and Development Company Limited, hereby gives notice that he has under Sections (5) and (7) of the said Act deposited with the Minister of Public Works at Ottawa, and in the office of the District Registrar of the Land Registry District of Nelson at Nelson, B.C., a description of the site and the plans of the dykes and ditches proposed to be rehabilitated, reconstructed and repaired, and of dykes and ditches proposed to be constructed along the Northerly Bank of Boundary Creek, and the Westerly Bank of the Kootenay River and the Easterly Bank of the Big Slough, all on Lot 774. Kootenay District, B.C.

AND TAKE NOTICE that after the expiration of one month from the date of the first publication of this notice George Leonard Salter, Trustee in Bankruptcy of Kootenay Valley Power and Development Company Limited, will, under Sections (5) and (7) of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa for approval of the said site and plans and for leave to rehabilitate, reconstruct and repair the said existing dykes and ditches and to construct the said new dykes and ditches.

Dated this 20th day of June, A.D. 1933.

GEORGE LEONARD SALTER,
Trustee in Bankruptcy of Kootenay Valley Power and Development Company Limited.

Local and Personal

With Wynndel dropping out of the international baseball league it has been necessary to rearrange the schedule of games, and this Sunday Creston will see the Intermediates in act on against Porthill, Erickson will be at Canyon and the Athletics at Eastport.

NOTICE TO FRUIT GROWERS—Ship your Berries and Cherries; later mixed cars of fruit and vegetables, and get the benefit of dealing direct. We pay the highest market price, and returns are made promptly every Saturday. Royal Fruit Company, Regina, Sask.

On only three occasions in June did the weather warm up over 90 in the shade mark, the hottest spell coming on the 14th when the mercury reached 95. The coolest day was June 1st, when it went down to 29 above zero. The rainfall for June was just 1½ inches.

Mr. Bullough, musical director, pianist and teacher of music in all branches, has ppened a Summer Preparatory Course at special rates for all Associated Board and Toronto Conservatory exams., and would be pleased to meet all interested in any branch of music. Studio, Hillside Road and Creston Ave.

Mrs. E. Archibald and son, Frank, who have been guests of Mr. and Mrs. W. M. Archibald, along with Mrs. H. H. Wilks and three children Charlotte, Phyllis and Jack, are away on a visit with friends at Calgary, Stettler and other Alberta points, taking in the stampede in the former city this week.

Bandmaster W. G. Hendy announces that the band will give its next open air concert Saturday evening July 22nd. Recently another instrument has been added, an E flat brass horn, and from 18 to 20 musicians are now regular band members with a class of more than a dozen beginners making good headway.

Mr. and Mrs. G. H. Kelly were at Lethbridge, Alberta, a couple of days the latter part of the week, where Mr. Kelly was attending a convention of Rexall dealers in southern Alberta and eastern B.C. They were at Waterton Lake for the weekend and report a very large number of holiday makers at this well known resort.

Andrew Tracy of Spring Bay, Ontario, in company with Jas Parkin, a well known East Kootenay sawmill man, were visitors at Creston on Friday and made an interesting visit with the Review. Mr. Tracy contemplates moving into western Canada, and is very interested in securing about 100 acres of the dyked lands of Creston Reclamation Campany.

Dr. McGill of Ottawa, superintendent of Indian affairs, was here on Tuesday, being in the west on an inspection of Indian reserves in British Columbia. While here he was in conference with the directors of Creston Reclamation Company, Limited, at which the participation of the Indians in the local dyking project was fully discussed. While here Dr. McGill made an inspection of the dyked area at Porthill, and was greatly impressed with the pr. ductive qualities of the flats lands.

Mr. and Mrs. Bullough and two children, Patsy and Terry, have arrived from Calgary, Alberta, to make their permanent home in Creston, and are occupying the residence on Hillside road and Creston Avenue. Mr. Bullough will follow his professi n as music teacher at which he has had many years of successful experience in Winnipeg, Victoria and Calgary. In those cities he was for 28 years musical director for the Orpheum theatre, as well as a successful teacher of piano and music in all branches.

Miss Donna Tillotson, whose marriage takes place later in the month, was gue t of honor at a miscellaneous shower at the home of Mrs. L. C. McFarland on Wednesday evening, the affair being sponsored by the hostass and members of the Wildcats softball clud Contests and bridge made the evening pass pleasantly, the winners at cards being Miss Letty Couling and Miss Pearl Spencer. In the flower contest Miss Mary Maione was winner. The guest of honor was the recipient of many useful presents, which she suitably acknowledged. Refreshments were served at the close of the evening.

Alice Siding

Birth—On July 9th, to Mr. and Mrs. Tom Marshall, a son.

The raspberry shipping commenced at the first of the week, the R. Stewart & Son ranch being about the first to have berriee in some quantity.

Miss Helen Moore, who teaches at Lumberton, and Robert Moore, who is on the Fernie public school staff, are here for the summer vacation with their mother, Mrs. H. H. Taylor.

Cecil Hamilton, who is operating the Bourne ranch this season, has just purchased a work horse from Mr. Peltzer.

Apple thinning will be completed in this section by the end of the week. For so early in July apples are showing remarkable size.

Principal Freney, who is holidaying at Rossland, is taking a hand in baseball games in that town. Last week he figured on a barbers' team which was beaten by the Rossland butchers by a narrow margin—a very close shave, according to Mr. Freney.

The water is very slow going off the flats so far, and it looks as if hay cutting will be much later than usual.

Dick Smith is working with the crew in charge of repairs to bridges washed out in the high water at West Creston.

A noted addition has just been made to his dairy herd by Geo. Nickel, who has just purchased a 13 months' old registered Jersey bull from a well known Crawford Bay dairy farm. The animal is from a mother who has won two silver medals for high production, and looks due to capture a gold medal on the strength of her 1933 production.

There was a good attendance at the annual school meeting on Saturday night at which W. H Mather was re-elected trustee, and E. Ostrensky, auditor. It was decided to continue high school work as in the past year, and $350 was voted to carry on this year, a reduction of $50 over last year. Reports showed that the high school venture paid for itself Building and addition are paid for and $2 of a surplus over and above what it would cost to send pupils to Creston. Principal Freney is to receive the same salary as last year. Due to error this balance of $2 pas reported as being $22.

Erickson

Mrs. D. A. Macdonald and family of Greenwood are here on a visit with her mother, Mrs. G. Cartwright.

Mrs. W. Woodhall and young daughter of Trail, are spending a few days with her parents, Mr. and Mrs. John Hall

Miss Marcella Sanford left on Friday on a visit with old friends at Champion, Alberta.

Church of England service at the schoolhouse on Sunday afternoon was quite well attended.

Erickson baseball team took a close decision from Canyon in the league baseball game at Canyon Sunday afternoon. The score was 9-8. They play at Canyon again this Sabbath.

Mrs. Percival of Rosebery, accompanied by her grandchildren, Phyllis and Bob Percival of Cranbrook, arrived on Monday on a visit with Mrs. R. Dodds.

Miss Madeline Putnam, nurse in training at the General Hospital, Vancouver, arrived home on Sunday on a short holiday visit with her parents, Mr. and Mrs. Frank Putnam. Madeline is convalescing from a very severe attack of typhoid fever, and was accompanied by Miss Betty Scott of Abbotsford.

J. E. Healey, who has been a patient at Creston hospital for a couple of weeks following the accident he sustained while at work at the Rodgers mill at Creston, was able to return home on Tuesday last.

Mr. and Mrs. R. A. Palfreyman, Misses Edith and Winnie Palfreyman and Miss Cotterill, got back on Friday from a months' holiday visit with old friends at Illinois points. While in the east they visited the Century of Progress Exposition at Chicago.

Canyon City

At the school meeting on Saturday night, J. E. VanAckeran was re-elected trustee, and C. Blair was chosen auditor. $1400 was voted for running the school the ensuing year.

Misses Kathleen and Elsie and Bill Clayton were Sunday visitors at Kimberley with their brother, Bob.

Canyon lost out to Erickson 9-8 in the league baseball game here on Sunday afternoon. The same teams will meet again this Sabbath.

The United Church ladies aid had the annual ice cream social at the home of Mrs. Knott on Friday evening, at which the intake was $10. A musical programme featured the evening.

Creston provincial police were here on Sunday in connection with cherry thieving and interviewed a trio of Canyon youths, which it is expected will end the trouble for this year.

Comrade Brown was the chief speaker of the United Front party at a meeting in the hall on Friday night, which was rather poorly attended, and did not look at all encouraging for the party candidate, Tom Mountford.

Mr. and Mrs. Tom Blain of Prince Albert, Sask., are here on a visit with the latter's parents, Mr. and Mrs. G. Messinger.

Mr. and Mrs. Vance and Thelma, Kathleen Clayton, are Spokane visitors a few days the fore part of the week.

Harry VanAckeran has just left for Vernon, where he is now on the office staff of Crestland Fruit Company in that town

At the United Church Sunday afternoon the pastor, Rev. A. Walker, gave an address appropriate to the 12th of July, taking as his subject "Gideon's 300 who lapped but did not kneel."

TIMBER SALE X15776

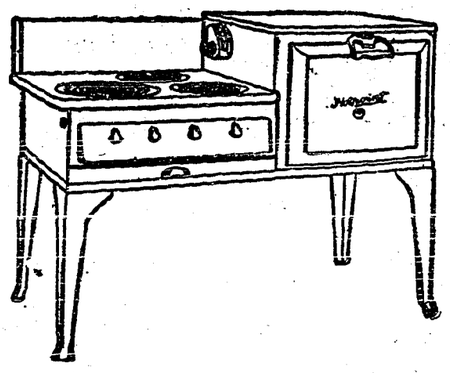
Sealed tenders will be received by the District Forester, Nelson, not later than noon on the 26th day of July, 1933, for the purchase of Licence X 15776 near Goatfell, B.C. to cut 10,020 Hewn Ties and 56,000 Posts.

Four (4) years will be allowed for removal of timber.

Further particulars of the Chief Forester, Victoria, B C. or the District Forester Nelson, B.C.

Announcement!

We have secured space temporarily in the store owned by Mr. S. A. Speers to display ELECTRICAL appliances. We have for sale



Hot Point Ranges
Westinghouse Refrigerators
General Electric Refrigerators
Washing Machines
Radios
and an assortment of
Floor and Table Lamps

We invite you to call and inspect the above Electrial Appliances.

The World's Grain Show.

From the beginning of time man's chief concern has been the obtaining of food to sustain life, and particularly that item of food which we have come to term the staff of life, bread. All down through the ages man has grown grains which, at first, by means of the crudest of methods he crushed and converted in a kind of flour. In the early years of the world's history wheat was recognized as the most acceptable of all grains for flour making purposes, the most highly prized of all grains. For thousands of years wheat has been a vitally important factor in the life of the human race; if there was a lack of it famine faced the people. Thus back in the days of Joseph the first storage elevators were built in order, in years of plenty, to provide for the lean years which always have come and always will come.

The growing, storage, transportation of wheat was a problem in those far off days, and it is one of the world's greatest problems today after the passage of thousands of years. It is engaging the attention of the statesmen of the world assembled at the World Economic Conference in London, England; it is the reason for the World's Grain Exhibition and Conference which opens at Regina on July 24. Rise and fall in the world supply and world prices of wheat is one of the great trade barometers of the world. Prices of other commodities fluctuate as the price of wheat fluctuates.

Therefore, the World's Grain Exhibition and Conference at Regina is an event of outstanding importance, and of particular importance to Canada as one of the great wheat producing and exporting nations. It is not a Regina exhibition, nor a Saskatchewan exhibition, nor a Canadian exhibiton, but a world exhibition in every sense. But of all sections of the globe none is more vitally interested in its success than the prairie provinces of Canada, in the very heart of which it is being held, and held at what may be regarded as a crisis in the history of the world's oldest and most important industry.

Years of planning and organization effort have been devoted to making this World's Grain Exhibition and Conference a notable event. As a result, it will undoubtedly prove to be one of the greatest world exhibitions devoted to a single phase of human endeavour ever held. While wheat will occupy the foremost place because, as already stated, it is the foremost grain in the economic life of the world, every known variety of grain will be on exhibition and in competition. Many tons of exhibits from a score or more of nations and from all continents, including comprehensive and representative national exhibits as well as the competitive exhibits, will be attractively displayed in the largest grain exhibition building in the world, built specially for this great show. This building contains several acres of floor space, and actually miles of frontage of exhibits.

This building in itself alone will repay a visit to this world exhibition. The scheme of decoration is unique. The interior of the huge structure is completely decorated in grains and grasses and seeds of every kind, description and color. It will be a veritable blaze of light and color, with huge colored transparencies,—the largest in the world, specially constructed in England,—and interesting devices too numerous to enumerate.

Apart from the exhibition proper, the conferences to be held on every important subject related to grain growing, financing, storage and transportation, and participated in by the leading experts and agricultural officials of governments the world over, will be of such a high educative value that people as deeply interested as Western Canadian farmers are, cannot afford to miss them. Such subjects as Present World Situation and Trends, World's Wheat Surplus, Retarding and Controlling Production, Financing World's Wheat Surpluses, World's Import Cereal Requirements, World's Wheat Import Standards, Merchandising Methods in Grain Marketing,—Can Improvements Be Effected? Greater Economy in Transportation and Storage of World Export Grains, Livestock—Its Place in Marketing Grain, and many others, will be discussed by men who are familiar with their subjects and who can speak authoritatively on them.

Morning sessions of this great world conference will be held in the Armories, located in the exhibition grounds, a beautiful building capable of seating 4,000 people comfortably. Afternoon sessions will take the form of joint meetings of various technical societies and groups, and will be held in Regina College and adjoining buildings.

As an exhibition city, the capital of Saskatchewan will be looking its best as the citizens are vying one with another, as well as working unitedly through various civic bodies, to beautify and decorate the city for this memorable occasion.

And there will be ample accommodation for all who may come. In addition to a "tent city" of 2,000 tents, with all sanitary conveniences, created adjacent to the exhibition grounds, thousands of city homes are being thrown open to exhibition guests and visitors, every room has been inspected, classified, rated and listed, so that people will know just what they can obtain and where and at what price.

Inasmuch as this World's Grain Exhibition is being held in conjunction with the annual Saskatchewan Provincial Fair, which has been greatly enlarged this year, and all within the same grounds, visitors will enjoy the advantages not only of the World Show but of the Provincial Fair as well, with all the varied attractions and amusements it will have to offer.

Western Canadians wishing to see a World's Exhibition have in the past always had to travel long distances and go to great expense to enjoy such a privilege. This year a World's Exhibition, and one in a class by itself will be in progress right in their midst. It s an opportunity that comes but once in a lifetime, and every person resident in the three prairie provinces who can possibly do so should take full advantage of it.

Weakening Diarrhœa
Dangerous Dysentery

DR. FOWLER'S EXT-OF WILD STRAWBERRY

Diarrhœa and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and braces up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Wheat In Two Countries

United States May Have To Import From Canada This Year

If the crop experts are correct in their predictions the United States will have to import wheat before the 1934 crop is harvested—and Canada has wheat for sale.

United States Government reports estimate total production for the present year at 603,000,000 bushels. Normal consumption is 620,000,000 bushels, and usually there are heavy exports, shipments to territories and insular possessions. Winter wheat is down 250,000,000 bushels from the average and spring wheat is "below normal."

At the same time, Canadian Government officials reported that in Saskatchewan and Manitoba crop prospects were "notably better" than a year ago, and in Alberta only very slightly below the corresponding date of '32.

On the basis, then, of present expectation, the United States will be off the export market for the next year, and in addition will have to import a considerable quantity of wheat. This situation should react to the distinct advantage of Canada, which goes into the new crop year with a heavy carry-over and the best outlook in a decade for a heavy and well-distributed production. Dollar wheat may not be so far away as it has seemed.—Ottawa Journal.

Concord Farmers Like Crows

Believe He Is Friend and Pays For His Keep

Uncle Sam's experts and states of Massachusetts and Maryland may be agin' 'em, but New Hampshire is a friend of the crow.

The farmers of the Old Granite state will have none of the new-fangled coal tar solutions for soaking seed corn and peas just to give Jim Crow the collywobbles.

They believe the crow is a friend of the farmer. He may steal a few kernels of planted corn, but most of the time when he is scratching in a field, he is probably digging for bugs, farmers here claim.

The damage they do is exaggerated, at least Commissioner of Agriculture Andrew L. Felker believes it is.

"Generally speaking, New Hampshire farmers aren't upset much over crows," he said. "We'll hear 'em cawing for many a springtime yet, and when last year's overalls are beyond all patching, we'll stuff them with straw, put a sugar bag head on top an have us a scarecrow for old time's sake.

"They pay for their keep by the insects they eat."

Influence Of Women

Thinks Conditions Would Be Much Better If World Was Guided By Women

"There is one thing of which I am absolutely positive," sai C. P. Howard, Indianapolis, in addressing the annual banquet of the Ontario and Quebec Conference of Typographical unions, at Toronto. "If women controlled the unions and politics of the world we wouldn't have millions unemployed, nor would we have hundreds of thousands starving while we have plenty to eat."

The influence of women, he said, "has kept men from being worse animals than they are."

President Franklin Roosevelt, he said, was the greatest dictator the world had ever seen. "You may take Stalin of Russia, Hitler of Germany, or Mussolini of Italy—none of these has the power of the president of the United States."

T.B. Infection

New Substance Reported Being Made To Determine Presence Of Tuberculosis

Research workers of the National Tuberculosis Association are perfecting and will shortly give the world a new substance to determine accurately the presence of tuberculosis infection in man, the Toronto Telegram said it has learned.

"This substance, it is understood, will contain no foreign elements other than the one the purpose of which is to indicate diagnostically the presence of infection," the newspaper said. "It has as yet been given no name and is not ready for commercial distribution."

New Clock Very Accurate

Master Timepiece Will Not Vary Second In Five Years

A master clock that will not gain or lose one second in five or six years, was described before the 219th meeting of the Physics Club of New York by O. H. Caldwell, former Federal Radio Commissioner. The clock was completed recently in Washington by engineers of the United States Government and will be installed at the Naval Observatory there to regulate all official clocks and correlate over government radio stations. In short, the new timepiece will set the pace for all activities ashore and afloat.

The clock operates on a unique principle. A slender bar of crystal quartz a few inches long is suspended in an air chamber, in which the temperature is kept constant to within a few hundreths of a degree. The arrangements of the quartz bar in the chamber is such that air vibrations react on it to produce what is called "accoustic feedback." The bar of quartz is delicately suspended on slender threads. An accuracy of one part in 100,000,000 is claimed.

"Clocks operated by other means are not nearly of such accuracy," said Mr. Caldwell. "Even the best pendulum timepieces have a daily error. They run fast and slow, in accordance with the attraction of the moon's mass. But the electronic clock, employing crystal, goes serenely on beating time, undisturbed by the effect of moon on earth. A clock employing such a principle is the most accurate known."

Foresight Of British Soldier

Made Possible Rapid Mobilization Of Army For Great War

A hundred years ago was born near Dublin, Ireland, Garnet Wolseley, a British soldier, whose chief title to fame was that he reorganized the army, modernized its system of training, prepared it for the emergency of war and made rapid mobilization possible. But for his persistency there would have been no expeditionary force—incomparable for efficiency, it has been called—to rush to France in August, 1914. The small but well-trained British Army rendered a great service by its fighting retreat from Mons; and at the first battle of the Marne, the report of its advance into the gap between the First and Second German Armies confused the tactics of the enemy, which believed that the British ranks had been broken and could not be reformed.—New York Times.

Prepare For Immigration

Look For Resumption Of Immigration From United Kingdom

Satisfied the provincial governments of Canada will shortly desire the resumption of immigration from the United Kingdom to Canada, Brig.-General M. L. Hornby, of Lethbridge, Alberta, announced his intention of sailing to England to lay proposed immigration plans before United Kingdom authorities.

"I wish to make it quite clear that I am not advocating increased immigration before the provincial governments have come to consider this advisable," said General Hornby in an interview in Montreal. "What I am advocating at the present time is that we should formulate a definite plan of action without any loss of time. For instance, there should be the acquisition of required land and the preparation of suitable farm homes."

Evolution Of Electric Lamps

New Type Is Very Different From Old Style Tungsten

Edison's tungsten electric lamp was one of the marvels of the 1893 Chicago World's Fair. A new type of electric lamp, the sodium-vapor bulb, promises to be the most significant scientific device on exhibit at the Century of Progress Fair, 40 years later. A Dutch sodium-vapor bulb exhibited at a New York scientific meeting the other night has 16 times the visibility of ordinary tungsten lamps and provides from three to four times as much light for the same amount of electricity. The new lamp provides an unusual yellow light, said to be helpful to vision.

Motor roads in the world now total 6,665,800 miles.

Planning Unusual Flight

Cobham May Attempt Great Refuelling Trip To Australia

Famous Sir Alan Cobham and Squadron Leader Helmore are proceeding methodically with the flying trials of a new single-engined monoplane in which later this year they may attempt to fly 10,000 miles non-stop. Probably to Australia. They plan to have the 'plane refueled in flight from "tanker" aircraft which will ascend to meet it from five or six aerodromes along the way. Thus the need to carry an enormous load of fuel at the start is avoided.

For orinary commercial use the airplane is intended to carry pilot, four or five passengers and luggage. Equipped for the proposed long distance flight it will have seats for the two pilots only, the remainder of the disposable load being represented by approximately 280 gallons of fuel, sufficient for about 26 hours' cruising at 130 to 140 miles per hour. Power is derived from a single 245 horsepower Armstrong Siddeley "Lynx" air-cooled engine. A Townsend ring-cowl around the engine is responsible for a gain of 15 miles per hour over the speed attained with an uncowled engine.

If Cobham and Helmore make for Australia and have good luck, they should reach the Australian mainland from England in less than four days.

Increase In Exports

Shipments To United Kingdom Show Heavy Increase During Past Year

An increase of nearly $30,000,000 in the exports of Canada to the United Kingdom for the 12-month period ending May 31, 1933, is shown in the leading commodities as compared with the same period of 1932, according to a statement issue by Hon. H. H. Stevens, Minister of Trade and Commerce, recently. For the year ended a month ago total exports of leading commodities to Great Britain had a value of $108,076,782, while for the corresponding period a year ago the value of these was $78,961,244.

The largest increase in value was wheat, which, at $65,744,808 this year, was more than $25,000,000 greater than last year.

The value of bacon exports increased from $1,613,029 to $2,855,028; of barley from $1,407,099 to $2,810,242; of hams from $1,574,614 to $2,272,862.

An increase of nearly $1,000,000 was shown in timber exports.

Great Boon To Outfitters

Nazi Brown Is Color Of Hour In Germany

Brown is all the rage today in Germany for everything from suits to shoes.

The triumph of the Nazi "brown shirts" has given men's outfitters an undreamed-of opportunity. Everywhere they are displaying cloth and leather goods of the color of the hour, coupled with printed exhortations to all good Germans to fall in line.

"Browns are trumps!" advertises one enterprising shoe store on Berlin's busy Friedrichstrasse. His window display does not contain even one pair of black footwear.

IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with wire-cuts or saddle boils, or cows have caked udder, the thing to do is get the Minard's bottle at once, as Mr. Dowd of Glenboro, Manitoba, knows. He writes:

"I like your Minard's Liniment. Like to have it in the house. I have found your Minard's Liniment especially good for barbed wire cuts on horses."

A family doctor prepared Minard's Liniment over 50 years ago. Still invaluable in every stable and every house. 89

POWERS AGREE TO SUSPEND WORLD PARLEY

London, Eng.—The great powers of the old and new world agreed to suspend the world economic conference until a more propitious time.

Thus, this historic assemblage, called together in an effort to improve economic conditions throughout the world, admitted itself defeated by a violent collision of monetary policies.

The final decision came in a meeting of the gold bloc nations where it was decided the American stand, as reiterated by the United States delegation after cable and telephone communication with President Roosevelt, only emphasized the differences which, temporarily at least, were irreconcilable.

While Americans expressed a firm conviction in the declaration addressed to the secretary-general of the League of Nations that the way was still open for the conference to continue with its labors, they informally expressed willingness to acquiesce to a recess. This was tentatively set for two months' duration.

The gold countries evidently were concerned over their inability to win over Great Britain, which maintained a neutral attitude while showing, with Canada and other dominions, a leaning toward the United States, and a statement issued from the yellow metal camp left wide a loophole for resumption of the conference.

The gold bloc's declaration said the American statement "will facilitate recalling of the conference" and permit it to resume later "in an atmosphere of sympathy."

"Revaluation of the dollar in terms of American commodities is an end from which the government and the people of the United States cannot be diverted," said a statement issued by the American delegation at the world monetary and economic conference.

Trade With Russia

British Government To Take Into Account Anglo-Canadian Agreement

London, Eng.—A questioner in the House of Commons was assured by a government spokesman that in trade talks between Britain and Russia, the British government will take into full account Article 21 of the Anglo-Canadian trade agreement.

This provides that where the imperial preferences are endangered by the importation of products sold at an unfair price because of state subsidies or state production, such commodities will be prohibited entry.

May Take Vacation

Health Of Sir John Simon Is Causing Anxiety

London, Eng.—The health of Sir John Simon, British Secretary for Foreign Affairs, is causing increasing anxiety to his friends and it is understood he may take a long vacation, probably at sea.

A peerage for him has been mentioned if the low blood pressure, from which he is suffering, makes his continuation in office inadvisable.

He was reported to have sold his country estate, Fritwell Manor, in Oxford.

King Opening Big Dock

Southampton, Eng.—The greatest dry dock in the world, built at Southampton for the Southern railway at a cost of $10,000,000, will be opened by the King July 26. During the construction of the dock 2,000,000 tons of earth and mud were excavated from the site and 750,000 tons of concrete were used.

Ontario Dentists Robbed

Niagara Falls, Ont.—Five dental offices in Hamilton and Niagara Falls were broken into and ransacked for gold leaf, gold, scrap and false teeth by thieves. At Hamilton loss to three dentists through theft amounted to close to $400.

Plan New Processing Tax

U.S. Farm Officials Expect Large Returns From Levy On Hogs

Washington.—United States farm administrators have drafted tentative plans calling for a processing tax on hogs by Oct. 1 to provide up to $150,000,000 to finance application of the Farm Act to corn and swine.

The plans will not take final form until after a meeting of corn and hog producers and their representatives which secretary of agriculture Henry Wallace has suggested be called in mid-July to obtain a cross-section of sentiment regarding the relation of the act to the two related products of the corn belt that have suffered from low prices in recent years.

If the levy is approved in connection with a corn-hog program to be worked out by August 1, it would be the fourth processing tax to go into effect before winter sets in.

The 3-cent a bushel wheat tax became effective at midnight, July 8; a maximum processing tax on cotton, probably four cents, is to become effective on August 1 if the acreage reduction campaign now under way in the cotton belt succeeds, and a processing tax of about six cents a pound is to be levied on cigar leaf tobaccos by October 1.

Death Toll Was Heavy

Accidents Take 144 Lives In U.S. On Independence Day

New York.—Lives of 144 men, women and children paid for the celebration in United States of July 4th, 157th anniversary of the republic.

Automobiles accounted for 62 deaths; 46 persons drowned; six died as a result of fireworks, and 30 were killed from other accidental causes.

Thousands of other celebrants suffered injuries, many were critically hurt and property damage was heavy. Shootings, fights and aeroplane accidents contributed to the death toll.

In Chicago a parachute jumper fell to his death before 100,000 horrified spectators at the world's fair.

Peculiarly, Chicago, the play centre of the nation as the result of the Century of Progress, escaped with but three automobile fatalities despite traffic-closed streets that poured massive crowds into the world's fair ground.

Electrify Grain Elevators

Big Program Of Work Is Started In Alberta

Calgary, Alberta.—An electrification program for 175 Alberta grain elevators, to cost $125,000, has been started, according to the Calgary "Albertan." All switching and control equipment will be manufactured in Canada. Eastern manufacturers will turn out about 400 electrical motors, the paper adds, the co-operation of elevator companies, equipment manufacturers, contractors and officials of the Calgary Power Company, power supply source, making the program possible. The work will bring jobs to men at present unemployed, the paper concludes.

Demand For Canadian Wheat

World Grain Show Delegate Sees Good Market In Britain

Winnipeg, Man.—"I look for a much broader demand for Canadian wheat in the United Kingdom market in the near future," said William Smith, Edinburgh, Scotland, manager of the Scottish Co-Operative Wholesale Society, who arrived in Winnipeg. Accompanied by Neil Beaton, newly elected president of the society, Mr. Smith is en route to the World Grain Show at Regina this month.

To Repair Vessels

Kingston, Ont.—One hundred men will be employed for the next three weeks or a month repairing the Canada Steamship Lines grain carrier "Brentwood" at Kingston. Tuesday more than a score started work on the vessel, damaged when it ran aground a few weeks ago en route here with a cargo of grain. It was announced the job would cost between $70,000 and $80,000, the highest repair job in the district for some years.

HEADS ROTARY

John Nelson, native of Paisley, Ontario, and at one time editor or publisher of several leading Canadian newspapers, who was unanimously elected president of Rotary International at the meeting in Boston.

Whales From Churchill

To Be Placed On Exhibition At Chicago Fair

Saskatoon, Sask.—Saskatoon imported its first fish from Churchill—tasty saltwater herring for local dinner tables. And the herring will be eclipsed by three white whales, destined not for dinner tables but the world's fair at Chicago.

Procured for the Chicago show, the whales were caught off Churchill on June 29 and it is expected that they will make their first public appearance here during the next few days. S. H. Stebbings, Saskatoon, is endeavoring to make arrangements for showing them in a local cold storage plant.

The snowy whales are in ice for the train journey south.

Mr. Stebbings also expects to complete arrangements for a showing this summer on the class "A" western fairs circuit.

Tax Compacts

Duty Boosted On Imported Powder Puffs

Ottawa, Ont.—Milady's aids to beauty are going to cost her more. Recently the Minister of National Revenue boosted the excise tax on imported compacts and powder puffs from 3 to 10 per cent. More than that, this assault on the diminutive vanity case is retroactive to March 22, 1933, so that if Miss Canada has not already paid her 10 per cent. on the foreign compact, the importer will be required to do so.

The increased tax applies to compacts, compact cases, or vanity cases, whether or not they contain any toilet preparation, and on powder puffs and powder pads.

Receive Warm Welcome

Thornton and MacDonald Reach Home After Release From Soviet Prison

London, Eng.—Cheers, flowers and kisses awaited L. C. Thornton and William MacDonald as they arrived here, released by the Soviet authorities from prison where they were serving sentences imposed on conviction of bribery and espionage.

Thousands thronged the station platform to welcome back the men whose freedom was obtained by the British embargo on Russian trade.

Thornton's little daughter somehow was passed through the crowd to her daddy's car almost before the train stopped and was immediately in her father's embrace.

Thornton declared he and MacDonald were full of gratitude to the British government and the British people for so staunchly taking action which resulted in their release.

He also expressed gratitude to Sir Edmund Ovey, former British ambassador in Moscow and gratification at the confidence their own company had shown in the accused.

Would Become Citizen

Veregin To Apply For Naturalization Papers

Kamsack, Sask.—Making his first appearance in public since he was released by order of Mr. Justice R. A. Robson at Winnipeg from custody of immigration officials who had twice attempted to deport him as an alien, Peter Veregin, Doukhobor leader, told 2,000 of his followers from all parts of Saskatchewan and Manitoba, he had completed his five years' residence in Canada and he intends to apply for naturalization papers.

In the course of an address which dealt largely with religious matters, the spiritual as well as temporal head of the Christian Community of Universal Brotherhood, appealed to his audience to donate money to help suffering members of the community in Russia.

Independent Doukhobors at the meeting expressed the opinion the first duty of the community lay towards those of Canada's 16,000 Doukhobors who are suffering.

To Brave Niagara

Plans To Go Over the Falls In a Barrel

Niagara Falls, Ont.—Planning to venture over the foaming cataracts of Niagara Falls, Alfred Rioux, of this city, is scheduled this month to make the daring plunge, encased in an iron torpedo-shaped barrel.

The barrel Rioux intends to use, is of steel construction with a port-hole locking from the inside.

Rioux intends to plunge over the Horseshoe Falls and through the lower rapids to Queenston.

RUSSIAN DELEGATE AND HIS ENGLISH WIFE

Here we see V. Litvinoff, leader of the Soviet Union delegation to the World Economic Conference, leaving the Geological Museum, where the conference is in session, with his wife, who is an Englishwoman.

BUYING POWER OF WHEAT IS UP FIFTY PER CENT.

Winnipeg, Man.—Purchasing power of wheat in western Canada over "things that farmers buy" today stands at 70 per cent. of the 1913-14 price, compared with 40 per cent. in mid-April and only 22 per cent. on December 16, last year, when wheat fell to 38 cents per bushel in Winnipeg market and touched the lowest point in the history of the grain trade.

These figures are shown in the farmers' index chart compiled by the Searle Grain Company Limited. Index figures on livestock show cattle with purchasing power of 59 per cent. of the pre-war price; hogs 53 per cent.; and lambs 73 per cent.

Price of wheat used in the compilation is that paid to farmers at elevators in western Canada for No. 1 Northern on the basis of 25 cents per 100 pounds freight, which is 15 cents a bushel.

In the things farmers buy are listed 146 items essential to an average grower in the west to carry on production.

There are 16 items of groceries, 37 items of clothing, 29 items of household equipment, 51 items of farm equipment, 11 items of farm machinery, and two items of municipal taxes in the list.

The compilation notes that the index of things farmers buy is still 127 per cent. of the 1913-14 level.

Woman Will Supervise Refueling Of Monoplane

Minneapolis Girl To Aid Post At Two Siberian Points

New York.—Miss Fay Gillis, 23, of Minneapolis, will direct the refueling of Wiley Post's monoplane, "Winnie Mae of Oklahoma," at two Siberian points on his projected world solo flight.

Lee Trenholm, Post's representative, said Miss Gillis had left Moscow on June 25 for Novo-Sibirsk, where the aviator plans to stop after leaving Berlin. While Post eats and takes a short nap, she will supervise replenishment of the gas tanks and any adjustments the 'plane needs.

Princess Royal Must Rest

Only Daughter Of King George Cancels All Engagements

London, Eng.—It was announced today that the princess royal has cancelled all her engagements.

"There is no reason other than that her royal highness has to rest," it was stated at her London home.

The Countess of Harewood, the princess royal, is Mary, the only daughter of King George and Queen Mary of England.

Chinese Feel Insulted

Chicago.—The Chinese Consolidated Benevolent Association protested to the Century of Progress Exposition officials against the inclusion of the southern Manchukuo exhibit in the Japanese concession at the exposition. A letter signed by Chew Low, president of the association, called the exhibit "a direct insult" by the Japanese.

R.C.M.P. Promotions

Ottawa, Ont.—Two promotions to the rank of acting superintendent were announced from headquarters of the Royal Canadian Mounted Police here. Inspector V. A. M. Kemp, adjutant of the force here, and Inspector Herbert Darling, assistant to the director of criminal investigation in Ottawa, receive these appointments as from July 1.

Historical Pageant

Prince Albert, Sask.—Four hundred performers will take part in the historical pageant being prepared for the golden jubilee Prince Albert annual exhibition July 31 to August 3 inclusive. One hundred and eight small girls, 64 young men and 212 young women will be required for the production being prepared for presentation before the grand stand.
