DEPARTMENT OF EDUCATION

OF THE PROVINCE OF BRITISH COLUMBIA

One Hundred and Third Annual Report

JULY 1, 1973, TO JUNE 30, 1974

By the Honourable the Minister of Education

Printed by K. M. MacDonald, Printer to the Queen's Most Excellent Majesty
in right of the Province of British Columbia.
1974

Cover Picture

The British Columbia Institute of Technology has been operated by the Department of Education since it opened its doors in 1964. Its system of government was changed by the Legislature in the spring of 1974 and in September it will begin operation under its own Board of Governors (see page 10). In 10 years under the direct supervision of the Department, more than 20,000 full-time day students enjoyed the BCIT campus.

To the Honourable WALTER S. OWEN, Q.C., LL.D.,
Lieutenant-Governor of British Columbia.

MAY IT PLEASE YOUR HONOUR:

I beg respectfully to present the One Hundred and Third Report of the Department of Education.

EILEEN E. DAILLY
Minister of Education

PERSONNEL, JUNE 30, 1974

Minister of Education:
THE HONOURABLE EILEEN E. DAILLY.

Executive Assistant:
MRS. H. M. FREEZE.

Research Consultant:
F. R. SHEPHERD, B.A.

Deputy Minister of Education:
J. R. FLEMING, B.A.

Associate Deputy Minister—Educational Operations:
J. PHILLIPSON, B.A., B.ED.

Associate Deputy Minister—Educational Programmes:
A. E. SOLES, B.A., M.ED.

Superintendents of Educational Services:

Administrative Services:
J. L. CANTY, B.A., M.ED.

Field Personnel:
W. D. REID, B.A., M.ED.

Financial Services:
I. VALEN, C.G.A.

Educational Programmes—Post-secondary:
Vacant.

Educational Programmes—Schools:
J. R. MEREDITH, B.A., M.ED.

Integrated and Supportive Services:
J. WALSH, B.SC., M.ED.

Communications:
Vacant.

Administrative Services:

Senior Administrative Officer: F. J. KEOGH, DIP.SCH.ADMIN.
Assistant, School Board Affairs: R. S. PRICE, B.A., B.COM.
Director of Facilities Planning—Schools: F. B. SIMPSON, M.R.A.I.C., A.R.I.B.A.
Director of Facilities Planning—Colleges: D. S. MCLELLAND, M.R.A.I.C
Personnel Officer: J. A. HOLMES.

Field Personnel:

Director of Home Economics: MISS J. R. IRVINE, B.SC.
Inspectors of Home Economics:
MISS J. CAMPBELL, B.SC., M.A., DIP.ED.; MRS. H. KRUEGER, B.SC.
Director of Vocational and Industrial Education: J. JUPP.
Inspectors of Technical Classes: M. J. C. TIDMARSH, R. C. SMITH.

Financial Services:

Senior Audit Accountant: G. GAMBLE, R.I.A.

Educational Programmes—Schools:

Director of Audio-Visual Services: B. A. BLACK.
Director of Curriculum Development: W. B. NAYLOR, B.A.
Assistant Director of Curriculum: W. D. OLIVER, B.A.
Director of Curriculum Resources: D. W. C. HUGGINS, C.G.A.
Registrar and Director of Examinations and Teacher Certification: E. A. KILLOUGH, B.ED., M.A.
Assistant Director, Teacher Certification: E. D. CHERRINGTON, B.A.
Assistant Director, Examinations: H. C. D. CHALMERS, B.SC., PH.C.
Director of Research and Standards: C. B. CONWAY, B.SC., M.S., D.PÆD.
Assistant Director, Learning Assessment Programmes: J. J. MUSSIO, M.A., PH.D.
Research Officer: R. C. MAY, B.A., M.SC.
Librarian: MRS. A. ARMSTRONG, B.A.

Educational Programmes—Post-secondary:

Assistant Superintendent: V. E. RICKARD, B.ED.
Director of Academic Programmes: J. F. NEWBERRY, B.ED., M.ED., PH.D.
Director Finance and Administration: R. A. MUNRO, B.COM., C.A.
Co-ordinator of Adult Technical and Vocational Training: D. G. ANSTEY.
Supervisor, Adult Technical and Vocational Education: P. C. MACGREGOR.
Director, Division of Technical and Vocational Curriculum: D. N. FRANKLIN.

Integrated and Supportive Services:

Director of Correspondence Education: J. R. HIND, B.A., B.PÆD.

Communications:

Public Relations Administrative Officer: S. R. HALTON, B.A.

District Superintendents of Schools:

K. F. ALEXANDER, B.SC., B.ED., Mission City.
N. A. ALLEN, B.A., West Vancouver.
W. W. BALDRY, B.A., M.ED., Ashcroft.
L. BEDUZ, B.A., M.ED., Shuswap.
R. S. BOYLE, B.A., B.ED., Qualicum Beach.
C. A. BRUCE, B.A., B.ED., Kamloops.
J. J. BURDIKIN, B.A., M.ED., A.C.E., Smithers.
A. D. CAMPBELL, B.A., B.ED., Vanderhoof.
E. M. CARLIN, B.ED., M.ED., Grand Forks.
R. B. COX, B.A., Courtenay.
H. E. CULLIS, B.SC., M.A., Squamish.
C. CUTHBERT, B.ACC., B.ED., M.ED., Langley.
D. E. A. ELDRED, B.ED., M.ED., Campbell River.
T. G. ELLWOOD, B.ED., M.ED., Castlegar.
F. L. FLEMING (MRS.), B.ED., M.ED., Quesnel.
R. E. FLOWER, B.A., B.ED., Nelson.
S. J. GRAHAM, B.A., New Westminster.
P. C. GRANT, B.A., B.ED., Vernon.
R. R. HANNA, B.A., B.ED., Sechelt.
D. L. HARTWIG, B.A., Fernie.
W. L. B. HAWKER, B.A., B.ED., Maple Ridge.
N. B. HOADLEY, B.ED., M.ED., Williams Lake.
C. HOLOB, B.S.A., M.ED., Richmond.
C. HOPPER, B.ED., M.ED., Hope.
R. W. HUESTIS, B.COM., B.ED., Port Hardy.
W. B. JOHNSTON, B.ED., M.ED., Trail.
E. E. LEWIS, B.A., B.PÆD., Sidney.
J. M. LOWE, B.ED., M.ED., Kimberley.
R. F. LUCAS, B.A., B.ED., M.ED., Prince Rupert.
R. G. LYON, B.ED., M.ED., Port Alberni.
J. I. MACDOUGALL, B.A., M.A., M.ED., D.PÆD., Chilliwack.
D. H. MACKIRDY, D.F.C., B.A., B.ED., M.ED., Duncan.
J. T. MCBURNEY, B.COM., M.ED., Fort Nelson.
N. W. MCDONALD, B.A., M.ED., North Thompson.
D. E. MCFEE, B.A., M.A., Merritt.
A. P. MCKAY, B.COM., M.ED., Revelstoke.
C. S. MCKENZIE, B.A., Delta.
P. G. MCLOUGHLIN, B.A., DIP.ED., B.ED., Fort St. John.
E. A. MAGLIO, B.COM., B.ED., Dawson Creek.
F. T. MIDDLETON, B.A. B.ED., Creston.
W. J. MOUAT, B.A., M.ED., Abbotsford.
G. H. NELSON, B.A., B.ED., Penticton.
P. B. PULLINGER, B.A., B.ED., Sooke.
W. F. RAMSAY, B.A., B.ED., Relieving District Superintendent, Victoria.
A. C. RUTLEDGE, B.ED., M.ED., Oliver.
H. SAYERS, M.A., M.ED., Cranbrook.
D. R. SMYTH, B.P.E., M.ED., Terrace.
E. C. STEWART, B.A., B.ED., Lake Cowichan.
M. V. THORSELL, B.A., M.ED., Jericho Hill Schools.
D. P. TODD, B.A., B.ED., Prince George.
R. E. J. WATSON, B.ED., M.A., Powell River.
B. W. WEBBER, B.A., M.A., Kitimat.
D. N. WEICKER, B.A., B.ED., M.ED., Nanaimo.
C. C. WRIGHT, B.A., Salmon Arm.
W. J. ZOELLNER, B.A. B.ED., Kelowna.

STATISTICAL TABLES:

See page 45 for details.

FROM THE MINISTER OF EDUCATION

Most departments of government account for their activities and measure their achievements in terms of fiscal or calendar years, or both. The Department of Education uses the school-year, the closing of which at the end of June coincides with the traditional closing of public schools for the summer break. Though the June date brings no respite from the continuing examination of policies and procedures, it does provide the Minister and her senior officials an opportunity to review major policy implementations.

That is the purpose of this section of the 103rd Annual Report of the Department of Education. It is supplemented by more detailed accounts by the Department's various divisions and branches and by extensive information contained in a section devoted to statistical tables.

During the school-year ended June 30, 1974, much major policy implementation did in fact take place. All of it was designed to bring about a synthesis of the best in the established education system with new concepts and practices that have developed in recent years.

To effect this synthesis, to meet the demand for increased educational services, and to develop new educational services to meet future needs, it was apparent to me that the Department of Education would have to be reorganized and enlarged. I announced on September 11, 1973, that a major restructuring would take place. On that date A. E. Soles and J. Phillipson, both senior members of the Department, became Associate Deputy Ministers of Education with responsibilities, respectively, for educational programmes and operations. In December, J. R. Fleming was appointed Deputy Minister.

Planning was started immediately for the development of seven superintendencies — administrative services; communications; educational programmes, schools; educational programmes, post-secondary; field personnel; financial services, and integrated and supportive services. Although there were some changes of name involved, and some realignment of responsibilities, only the superintendency of communications, which is to include the administration of media services to educational institutions, was new. Another addition was a Research and Development Division.

While considerable time was spent on the restructuring programme it will not be fully implemented until the next school-year. In the meantime, however, senior officials of the Department, many of whom have given long service, continued to make significant progress in the direction of a fully responsive educational system. The present public school system and the major criteria for its improvement were described in a white paper which I tabled in the Legislature during its 1974 Spring Session. The document, entitled *The Public School System—Directions for Change,* pointed out that while the school system provides a satisfactory educational experience for many pupils there are others who leave it, often before completing Grade XII, without having attained a satisfactory degree of literacy or confidence in themselves. The paper suggested that in some cases this might be the fault of the schools, rather than the pupils, and said that a major function of the schools should be to provide a measure of success for *every* student—to make him or her an effective person.

"To be effective," the paper said, "every person must be functionally literate, that is, every person must be able to read, to write, to compute, to hear, to understand, and to judge."

The paper went on to describe specific areas in which change should be examined—in the field of authority and responsibility where the central relationship must be between the teacher, the student, and the parent; and in the fields of educational programmes, the right to education, organization and administration, and finance.

The process was actually begun at the same Legislative Session at which the paper was tabled. The *Public Schools Act* was amended at that time to permit school districts to introduce locally developed courses into their schools without specific ministerial approval as required in the past. The Department will continue to be responsible for a core curriculum. The intent of the measure was to remove some of the limitations on the authority of elected school trustees and at the same time permit them to be more directly responsive to local educational requirements.

The amendment reflected in broad terms the Government's philosophy of sharing responsibility between local and Provincial levels of government where feasible. Another section of the same amending Bill, introduced on February 28 and subsequently passed, also increased local autonomy. It eliminated the requirement that school districts hold referenda to seek approval for capital expenditure for schools. As a result capital expenditure proposals required only the approval of the Minister and the publication of the planned building programme.

The introduction of increased local programming authority, combined with the phasing out of Departmental examinations for Grade XII graduation, necessitated the development of new methods for assessment of programmes and student achievement. A specialist in assessment and evaluation procedures was appointed to the staff, and planning was started for the establishment of a committee on evaluation on which the British Columbia Teachers' Federation and the British Columbia School Trustees Association would have representation.

Several other important studies were launched during the school-year, some of which were concluded and acted upon. The development of colleges received major attention. In the summer of 1973 a task force was set up to conduct a feasibility study for a college to service the Upper Fraser Valley area. Its positive recommendations resulted in steps being taken to assure the opening of such a college in September 1974. A larger task force began an investigation into the need for further colleges in various areas of the Province. In May I announced that a related study was to be undertaken in conjunction with the Province of Alberta, to study co-ordination of post-secondary services in the Peace River areas of both provinces. Another committee was to look at post-secondary requirements in the Kootenay districts and the respective roles of Selkirk College and Notre Dame University.

Two other important investigations were started. A Department of Education committee on the educational problems of comparatively small and remote senior secondary schools throughout the Province, and a one-man inquiry commission is investigating the operation of the Jericho Hill Schools for deaf and blind pupils.

Two other committees completed their work with significant results. The Committee on University Governance began its consideration of the internal and external forms of university governance in August 1973, and many of its recommendations were incorporated into a new *Universities Act* in the spring of 1974. The Act enlarges the Board of Governors of the public universities and provides for the establishment of a Universities Council to advise the Government and to act

as an intermediary between the Government and the universities and among the universities themselves. A second committee recommended that a system of governance for the Department-operated British Columbia Institute of Technology be given more autonomy and be operated by a 15-member Board of Governors. These and other recommendations were incorporated into a new *Institute of Technology (British Columbia) Act,* also passed at the spring session of the Legislature.

As was expected, not only did the range and effectiveness of the education system increase, but also the cost. Grants to school districts in the 1973 calendar year increased by 16 per cent over the previous year to $217,800,000, while grants to colleges increased by almost 26 per cent to $20,000,000.

The increase in expenditure helped bring about many improvements, not the least of which was a decrease in the pupil-teacher ratio. While the June net enrolment of pupils went up by only 2.2 per cent from 1973 to 1974 the number of teachers, on a full-time equivalent basis, increased by 6.3 per cent to 24,405.7. The actual ratio of pupils to teachers decreased by 1.04 between June 1973 and June 1974.

Over-all expenditures for public education, exclusive of capital expenditures from by-law funds, increased from $612,800,000 in 1972 to $694,400,000 in 1973, a total of $81.6 million or 13.3 per cent.

Minister of Education

RESEARCH AND STANDARDS BRANCH

With this 103rd Annual Report the Department of Education is introducing what is expected to become a regular feature—a special section, longer and more detailed than usual, on a particular branch or division or activity of the Department. For historical reasons this year's feature is on the Research and Standards Branch, which is being phased out in its present form though its work will be continued and expanded in a restructured Department of Education. The author is C. B. Conway, B.Sc., M.S., D.Pæd., Director of the Branch, who will retire at the end of 1974.

Early in 1939, Dr. S. J. Willis, Superintendent of Education, reported that "On December 1st, 1938, C. B. Conway, Instructor in Statistics, Ontario College of Education, University of Toronto, was appointed Inspector of Schools. Dr. Conway was given headquarters in Victoria and was assigned to the *Bureau of Educational Research,* Department of Education." The *Bureau of Educational Research* has been italicized because no such bureau actually existed or was funded until April 1, 1947. Until October 1946 it consisted of one person and one desk.

That does not mean that nothing was accomplished before it became the "Division of Tests and Standards," however. There were schools to be investigated, student-teachers to teach at summer school, examinations to be made up and marked, and numerous studies to be made. The first of these, a *Report on the Junior and Senior Matriculation Examinations, June 1939,* covered 63 pages. Province-wide testing of reading and grammar was carried out, the first surveys since the Putman-Weir Report of 1925/26. Arithmetic and general science tests and French and Latin vocabulary tests were produced. The Canadian Army was developing the "Army M-Test" under General Brock Chisholm and tens of thousands of officers and recruits were tested and the papers marked personally by the inspector under army security regulations. This experience led to the development of chain-scoring systems and scoring keys that were applied later to the marking of matriculation examinations and literally millions of Provincial test-papers.

For five and one-half years, from 1941 to 1945, the additional jobs of Director of the Summer School of Education and In-service Training of Teachers were undertaken by the Director and twice he acted as Registrar of the Department for several months during the illnesses of T. W. Hall and T. F. Robson. He also substituted for J. E. Brown as Inspector of Schools for Saanich. These activities naturally interfered with research activities to a great extent but, in November 1944, a Royal Commission on School Finance was established which led to the greatest involvement in research and development that ever has occurred in British Columbia.

Dr. Maxwell A. Cameron produced his report in November 1945, and the one-man "Bureau" was given the job of conducting the research and producing the data that were necessary to implement the recommendations by May 1946. It involved the complete reassessment, by the Provincial Assessor and the Department of Municipal Affairs, of all land and improvements in the Province, and total revision of the *Public Schools Act* in collaboration with the recently retired Dr. S. J. Willis and the Attorney-General's Department. And out of the research came the SA, SB . . . ET classification of teachers' certificates, a series of salary-grant scales, capital and transportation grants, and the greatest consolidation of school districts that ever had occurred in Canada. Side effects were an increase in mobility of teachers as rural and urban salary scales became closer, and a tremendous increase in enrolment in education courses as teachers upgraded their qualifications.

Later, there was research involvement with the Gordon, the Goldenberg, and the McLean Commissions, and in 1958 a broad testing programme and a study of kindergarten and nonkindergarten children to provide information that was incorporated in the Chant, Liersch, Walrod Commission's Report.

The McLean Commission's 1947/48 studies, which do not seem to be widely known, involved a study of the grant system set up in Saskatchewan and the costs of education in all other provinces. Probable costs of education and classroom requirements were projected for British Columbia on the basis of estimated birth rates and immigration, and family-allowance transfers were investigated as a method of determining interprovincial migration. The latter was adopted a few years later by the Education Division of Statistics Canada, and eventually by the Census Bureau. It is interesting to note how modest these projections and estimates were, and the fact that although they seemed startling at the time, they never came up to the actual inflow to the Province that has taken place since 1948.

At the same time what has become known as the "cohort-retention method" of forecasting was developed. With many later modifications and controls this is now the basis of our computerized forecasts of enrolment that are produced annually for each school district by the British Columbia Research Council. These methods also were the ones that permitted us to broadcast warnings in the 1964/65 Annual Report of the decreases in elementary-school enrolment that are now taking place.

The 1950's and 1960's were years of tremendous effort to increase the accuracy and fairness of matriculation examinations. Scaling methods were developed, at first graphically and later on computers, that incorporated the scholastic aptitude of the groups writing different subjects, the numbers of students who were recommended or were writing for scholarships, and the proportions from accredited and nonaccredited schools. They were highly effective in correcting imbalances in failure rates in what had always been known as "hard" or "easy" subjects and in upsetting the tendency for most scholarships to go to those who wrote mathematics or physics.

Those years were also the age of survey testing. Between 1946 and 1973 almost 100 Province-wide surveys were conducted, and one and one-half million pupils were tested and 75 tests were standardized for British Columbia. Each survey had a triple purpose—to determine current strengths and weaknesses for curricular revision and teaching emphasis, to standardize tests which teachers and administrators could use, and to provide bases for future comparisons. For example, we were able to make direct and quite favourable comparisons between 1958 and 1948 populations of pupils for the Chant Commission, and some unfavourable comparisons between old and new mathematics, and between semestered and nonsemestered schools. Over the years we have tested almost every testable subject, from shorthand and typing to English literature, from Grade III reading to Grade XII aural French.

After the reversion of Grade VII to elementary schools, as recommended by the Chant Commission in 1958/59, there were tremendous increases in the volume of testing, particularly at that level. The peak year was 1964/65 when tests were administered to 89,400 pupils in Grades IV, VII, XI, and XII. During the four years, from 1961 to 1965, over 63,000,000 items were marked. Some experimentation was done with machine scoring, but most of the items were marked by hand. Hand-scoring permits greater flexibility in the construction of items, and when carefully controlled it was found to be more accurate.

The tremendous growth of the Province and the need for additional data resulted in greater emphasis on the demographic and financial aspects of education

in the later 1960's. A study of "Potential Community College Enrolments in B.C." forecast in 1966/67 that the demand would double within nine years. That, too, proved to be a distinct under-estimate, as were our estimates of kindergarten enrolments which were based on the assumption that they would be provided only in urban school districts, and our estimates of costs that did not allow for inflation.

Throughout the years a constant stream of mimeographed materials has been produced and circulated so that they now constitute a "five-foot shelf." Most of them were related to Standards: *A Comparison of Mathematics 91 and Mathematics 91E Students, Diagnostic and Remedial Procedures in Reading, The Use and Abuse of Test Results, A Simplified Method of Approximating Scaled Scores, A Comparison of Teachers' Letter Grades with Examination Results,* and many others. Some 14 articles and speeches have found their way into print, some in books, such as *Leadership in Action* and *Canadian Education Today,* and others in periodicals all the way from University of British Columbia's *Journal of Education* and the British Columbia Educational Research Council's and Educational Research Institute of British Columbia's *Studies and Reports* to the Province of Quebec's *Educational Record* and the World Book Company's *Test Service Bulletin.*

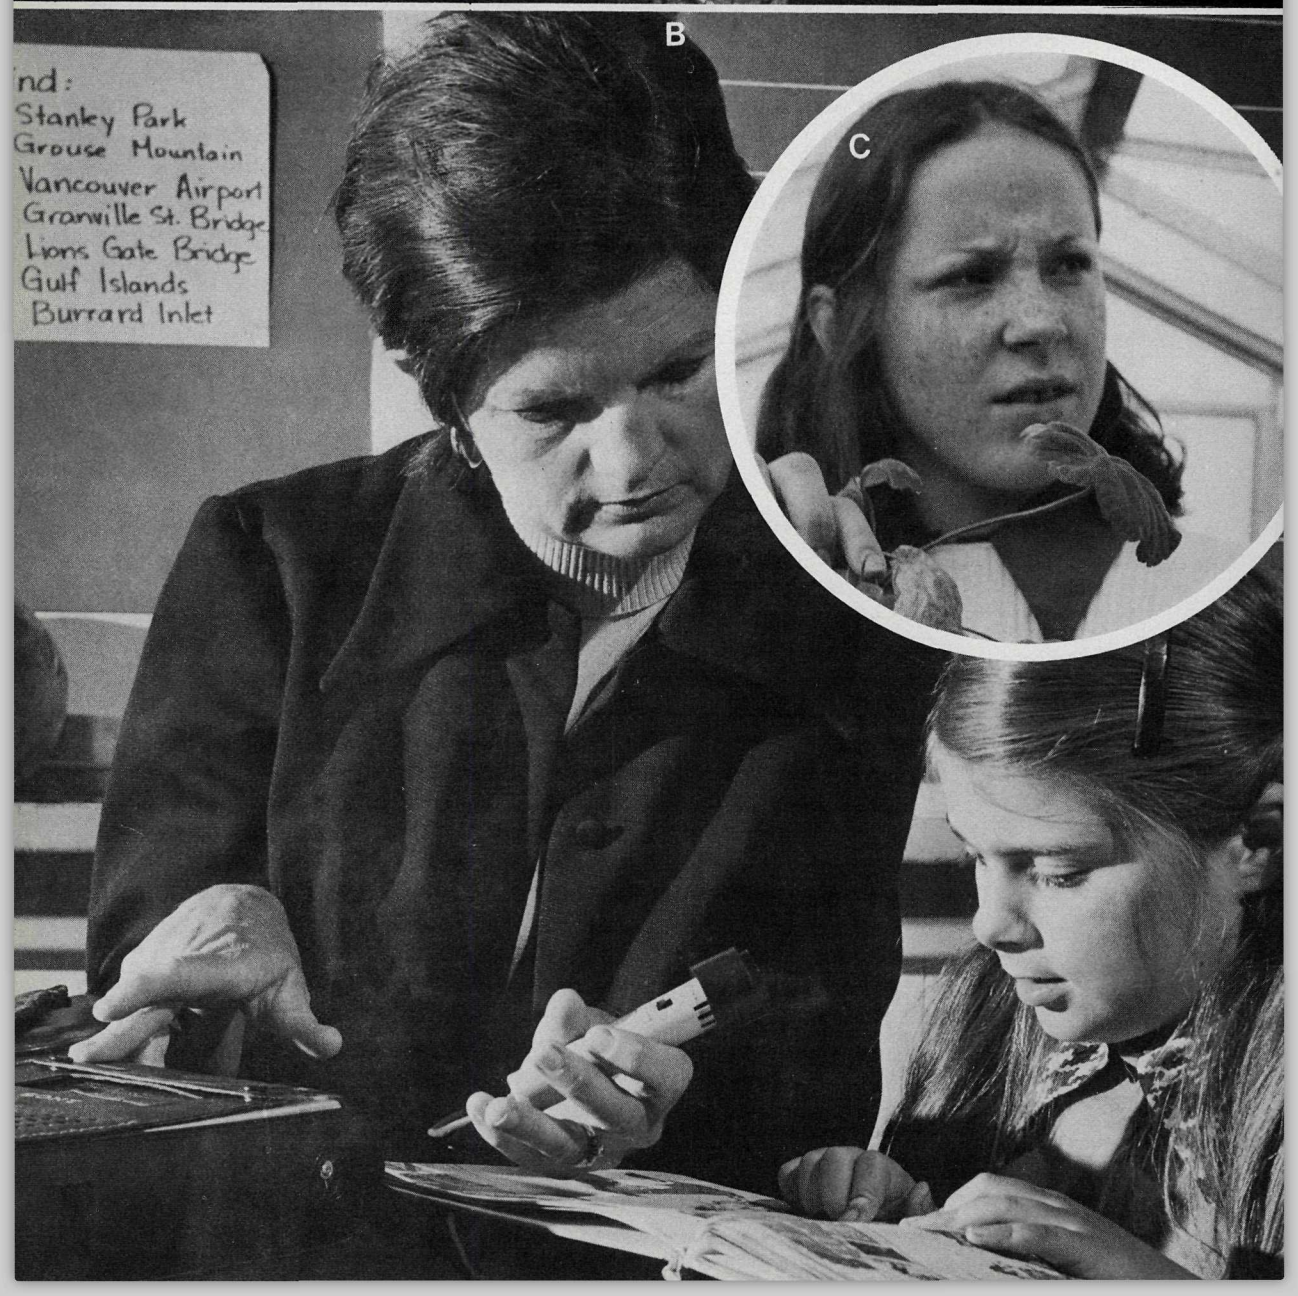
The year 1973/74 was notable for the fact that the Division underwent greater expansion in one year than in the previous 25. Three offices were added to the space that had not been changed since 1951. Furniture and equipment were upgraded. Two assistant directors were appointed: Dr. J. Mussio, who is in charge of Assessment Programmes, and R. May, who is responsible for Information and Data Collection—the collection and computerized compilation of data on pupils, teachers, certificates, and course enrolments. He will work closely with the British Columbia Research Council on school district forecasts. During the year the 1971 census data by school district began to come in and be processed, and a survey of centralized school libraries was conducted in collaboration with Statistics Canada. That followed the establishment of a local committee to revise the forms and a national conference on library statistics held in Ottawa. A letter of understanding was agreed upon regarding forms printed and processed by the Education, Science, and Culture Division of Statistics Canada and formal agreements for data sharing were made with the British Columbia School Trustees Association and the British Columbia Teachers' Federation in order to reduce duplication of data collection.

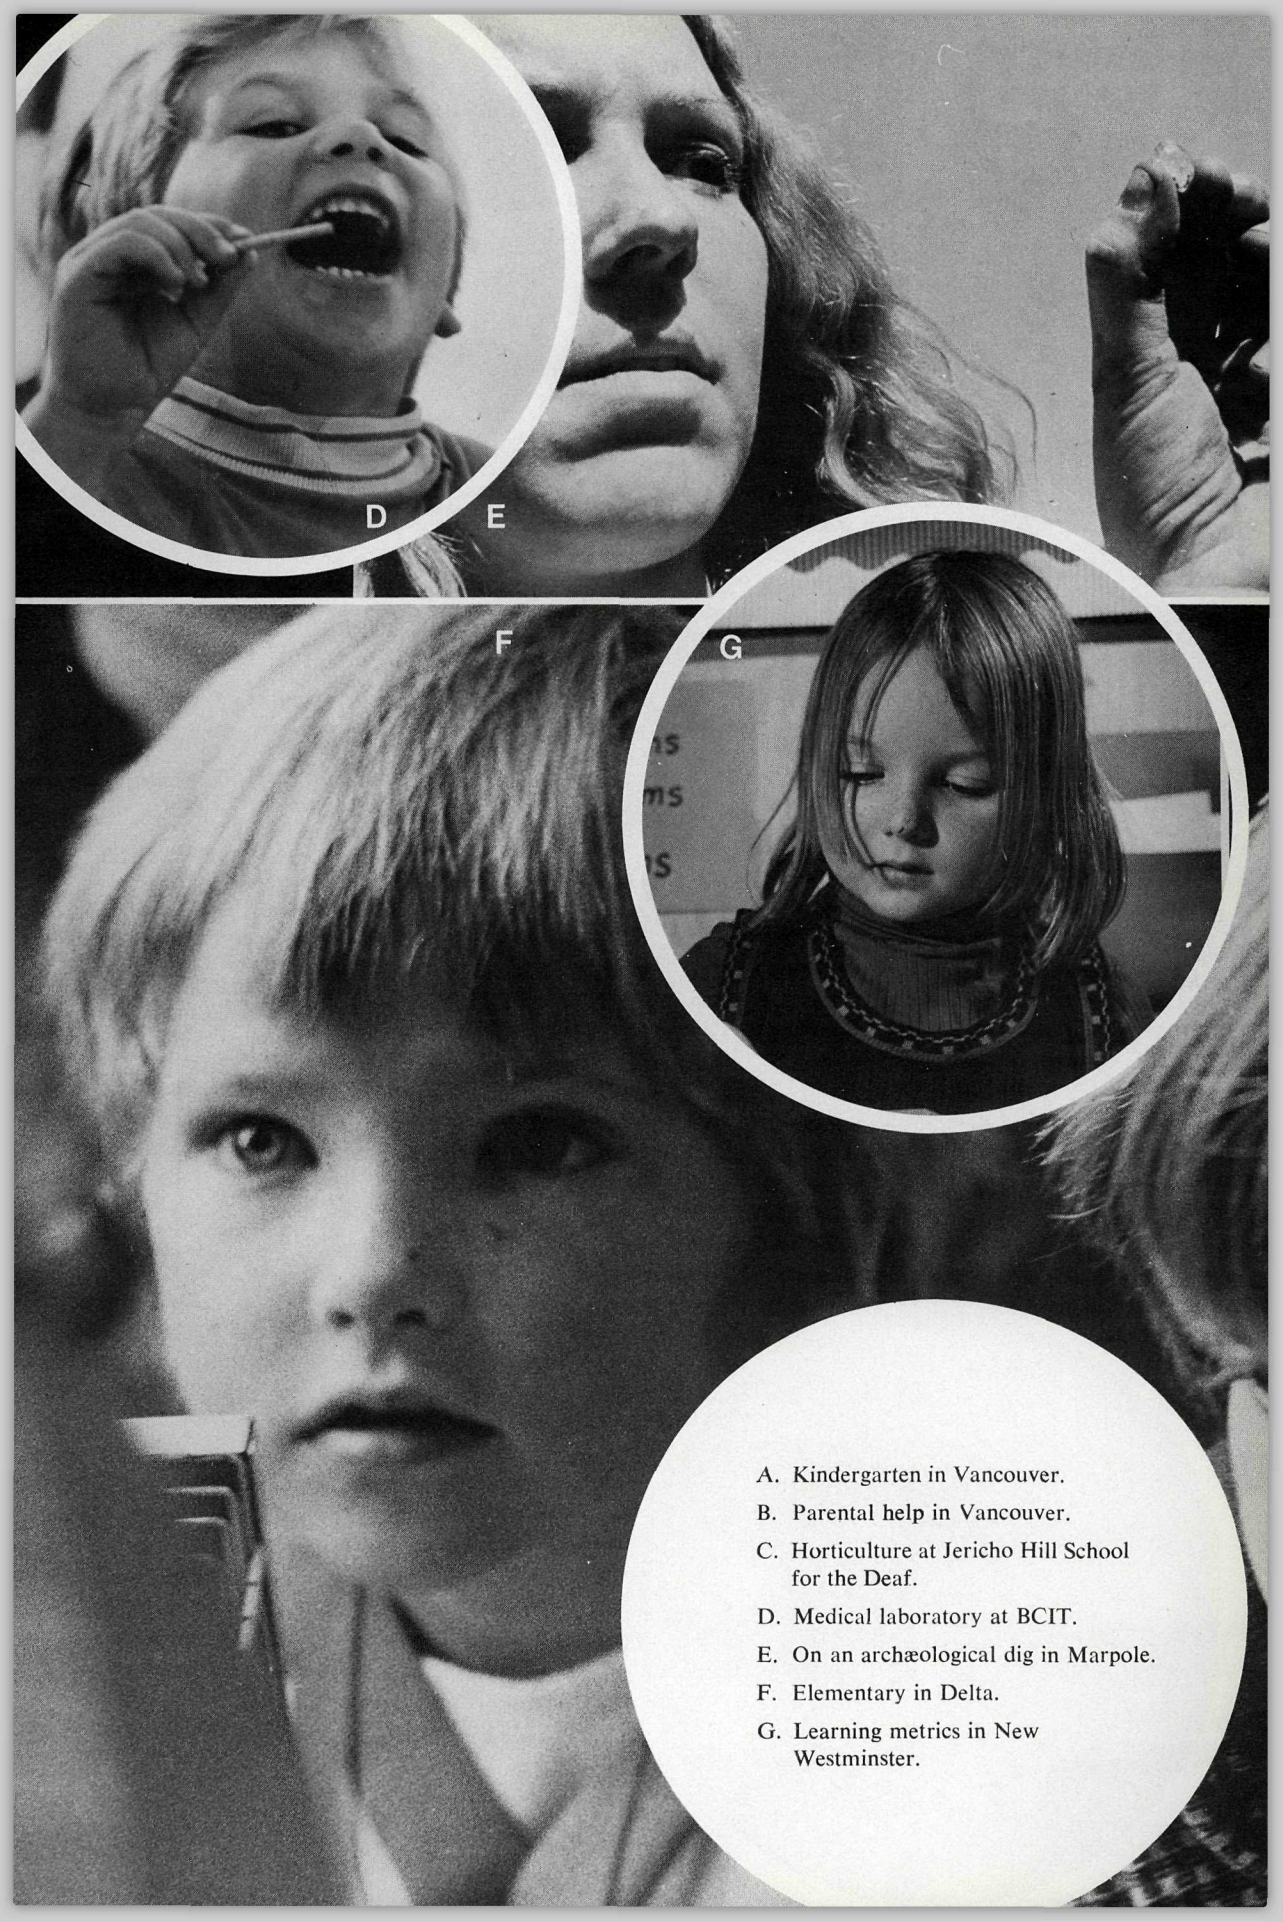
A series of objective-referenced or mastery tests was developed in collaboration with the Mathematics Revision Committee for the purpose of Province-wide assessment at a later date. Work also began on similar tests in the language arts-English area in preparation for a major study involving teachers and university staff members. Similarly, the Branch is attempting to consult with other curriculum revision committees in an effort to relate the evaluation process to curriculum revision, and to expand its consulting services to the school districts. The Branch was represented by Dr. Mussio on a special advisory committee which completed a draft report on the maintenance and dissemination of school records. At the same time the Director was serving as chairman of a similar national committee of the Council of Ministers of Education on Privacy and the Maintenance of School Records, and on the statistics committee of the same Council. Toward the end of the year the Director was seconded to the Western Canadian section of the study of education in Canada being conducted for the Organization for Economic Co-operation and Development.

It is expected that this will be the final report of the Research and Standards Branch before it is divided into separate learning assessment and information and data collection sections. They will continue and will expand the responsibilities we have acquired over a long period. Before leaving I must express my appreciation

to all those in the Department of Education and in other Government departments with whom we have collaborated and worked. In particular, there are three long-time colleagues whose service to this Branch totals 62 years and to whom any expression of appreciation would be an understatement. They are Mrs. Eleanore Davidson (recently retired); Mrs. Olga Bowes, for many years the Department's only expert in French; and Miss Lorna Aitkens, secretary, who began work for the Branch in October 1946 before it actually was established. Their loyalty and conscientiousness and the happy relationship we have had over the years just cannot be described.

Faces of Learning





A. Kindergarten in Vancouver.

B. Parental help in Vancouver.

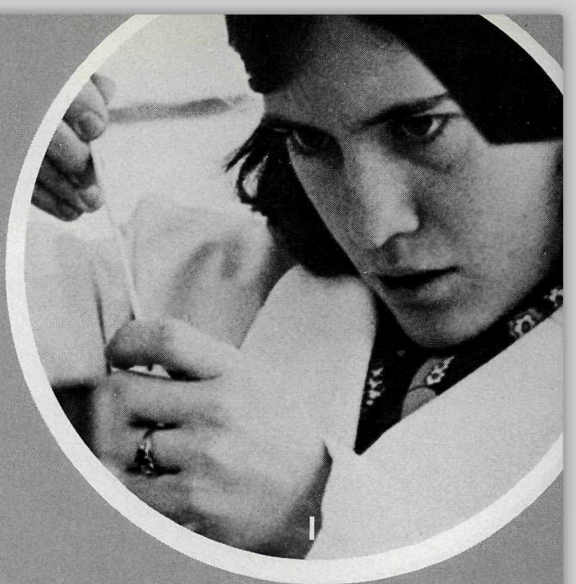
C. Horticulture at Jericho Hill School for the Deaf.

D. Medical laboratory at BCIT.

E. On an archæological dig in Marpole.

F. Elementary in Delta.

G. Learning metrics in New Westminster.



H. Library at BCIT.
I. Kindergarten in Victoria.
J. Primary at Langley.
K. Reading lesson at Prince George.
L. Grade II in New Westminster.
M. Adult education in the Okanagan.

DIVISIONAL REPORTS

DIVISION OF ADMINISTRATIVE SERVICES

The Capital Needs Survey teams continued to visit all school districts in the Province in regard to the determination of the capital facilities required to provide accommodation for students, for the necessary specialist teaching areas, and for any other essential buildings and areas needed for the various auxiliary services.

The survey teams endeavoured to provide every assistance to all boards of school trustees in their problems in planning for future schools, and for additions to existing schools.

Amendments to the *Public Schools Act,* introduced in the 1974 Spring Session of the Legislature, provided for measures to accelerate the pace of school capital programmes by eliminating the need for school districts to go through the referenda process in regard to future capital expenditure programmes.

Another amendment to the Act brought school district trustee election procedures in line with those for municipal elections by abolishing the corporate vote and making residence rather than property ownership the voting requirement. Voting eligibility is the same as for a Provincial election.

A provision in the Act which prevented school districts from providing transportation for children attending schools operated by the British Columbia Association for the Mentally Retarded was also removed, and such transportation is now provided on the same basis as for other school children.

Regulations were amended to provide substantial increases in the shareable dollar amounts school districts could expend on the purchase of necessary school buses. Transportation assistance, in areas where there are insufficient pupils to establish either a school or a bus route, were also substantially increased.

The Facilities Planning Branch, apart from involvement in the Capital Needs Surveys, processed a large number of projects to the contract stage. More than 100 of these were major projects.

Capital expenditures for the 1973 calendar year (section 190 approvals) were finalized:

Site purchase and improvement	$5,444,717
Buildings (construction)	54,739,679
Equipment	10,858,977
Plans and supervision	2,848,966
	$73,892,339

This was an increase of about $14,000,000 over the total amount of approvals for the previous year.

SCHOOL BOARD ORGANIZATION

During the school-year ending June 30, 1974, the number of school districts in the Province remained at 74. At the end of June there were 69 municipal school districts and five rural districts.

There were no three-member boards. Twenty-one boards had five members, 36 had seven members and 16 had nine members.

Effective July 1, 1973, School District No. 56 was renamed Nechako, and effective January 1, 1974, School District No. 27 was renamed Cariboo-Chilcotin.

Redefinition of the boundaries for School District No. 55 (Burns Lake), School District No. 56 (Nechako), School District No. 87 (Stikine), and School District No. 88 (Skeena-Cassiar) became effective January 1, 1974.

TRANSPORTATION, CONVEYANCE OF PUPILS

The following statistics give details of the conveyance of school-children during the 1973/74 school-year.

(1) Number of large school districts providing transportation	71
(2) Total number of vehicles	950
(*a*) District-owned	685
(*b*) Contract	260
(*c*) Other (water taxis, etc.)	5
(3) Total daily approved mileage	64,280
(4) Total number of "shareable" pupils carried daily	95,679
(5) Total number of "nonshareable" pupils carried daily	13,419
(6) Total number of all pupils carried daily	109,098

Transportation assistance is made available to the parents of pupils who reside in isolated areas of the Province where there are insufficient pupils to establish a bus route or a school with the appropriate grade. In the 1973/74 school-year, the Province shared transportation to the value of $958,654 for 3,089 pupils in 63 school districts.

Effective January 1973, school districts became eligible for over $1.9 million for a special cold weather transportation allowance to increase local flexibility in setting walk limits and providing additional transportation services during the cold winter months.

BOARDING ALLOWANCES AND DORMITORIES

A school board may provide boarding allowances for pupils who are not able to utilize transportation or dormitory facilities. Although a board may pay an allowance it considers appropriate, the amount which the Department will accept as eligible for Provincial grants is $50 a month. In the 1973/74 school-year, the Province shared in boarding allowances for 436 pupils in 35 school districts at a cost of $204,290.

The need for dormitory accommodation is continuing to decline and the dormitories in Burns Lake and McBride are no longer operated as dormitories.

A summary of dormitory data for the 1973/74 school-year will be found among the statistical tables in this Report.

STAFF APPOINTMENTS AND PROMOTIONS

HEADQUARTERS

J. R. Fleming appointed Deputy Minister of Education from Superintendent of Financial Services.

J. Phillipson appointed Associate Deputy Minister—Educational Operations from Deputy Minister, Education.

A. E. Soles appointed Associate Deputy Minister—Educational Programmes from Superintendent of Educational Programmes—Post-secondary.

I. Valen promoted to Superintendent of Financial Services from Assistant Comptroller of Expenditures.

Dr. J. J. Mussio appointed to the position of Assistant Director, Learning Assessment Programmes.

Field

L. Beduz appointed to the position of District Superintendent of Schools, Shuswap.

E. M. Carlin appointed to the position of District Superintendent of Schools, Grand Forks.

T. G. Ellwood appointed to the position of District Superintendent of Schools, Castlegar.

Mrs. F. L. Fleming appointed to the position of District Superintendent of Schools, Quesnel.

N. B. Hoadley appointed to the position of District Superintendent of Schools, Williams Lake.

J. M. Lowe appointed to the position of District Superintendent of Schools, Kimberley.

N. W. McDonald appointed to the position of District Superintendent of Schools, North Thompson.

R. E. J. Watson appointed to the position of District Superintendent of Schools, Powell River.

B. G. Webber appointed to the position of District Superintendent of Schools, Kitimat.

Retirements

M. J. Davis, Audit Accountant (Financial Services), after 34 years of service.

H. C. Ferguson, District Superintendent of Schools, School District No. 47 (Powell River), after 26 years of service.

Mrs. M. E. Davidson, Clerk (Research and Standards), after 21 years of service.

Mrs. M. E. Forsyth, Instructor (Correspondence Education Branch), after 17 years of service.

C. C. Wright, District Superintendent of Schools, School District No. 89 (Shuswap), after 14 years of service.

G. C. Bissell, District Superintendent of Schools, School District No. 10 (Arrow Lakes), after 13 years of service.

A. L. Cartier, Co-ordinatory of Adult Education (Post-secondary Education), after 11 years of service.

Mrs. L. Rogers, Teacher (Jericho Hill Schools), after nine years of service.

Miss H. Richert, Ward Assistant (Jericho Hill Schools), after nine years of service.

R. S. Carey, Chief of Technological Planning (BCIT), after eight years of service.

Mrs. H. L. Bray, (Correspondence Education Branch), after eight years of service.

D. H. Goard, Principal, BCIT, after seven years of service.

H. M. Dale, Clerk (British Columbia Vocational School, Victoria), after six years of service.

Mrs. M. J. Foster, Kitchen Maid (Jericho Hill Schools), after five years of service.

Dr. G. L. Mares, Course Writer (Correspondence Education Branch), after four years of service.

Twenty-five-year Continuous Service Certificates

H. C. Ferguson, D. W. C. Huggins, F. J. Keogh, E. E. Hyndman.

Public Administration Course Graduate

A. Bosma.

DIVISION OF FIELD PERSONNEL

There were a number of notable activities and changes in the Division of Field Personnel in the 1973/74 school-year.

A number of changes in field staff occurred. They are reported under personnel in another part of this Report. The number of changes this year was greater than usual and resulted in the recruitment of many new members for the field staff, a term which covers district superintendents who serve in the field on behalf of the Department of Education.

Perhaps the most significant change in the Field Personnel Division was the introduction of local employment of superintendents of schools in five additional school districts in the Province. The Minister of Education authorized the establishment of locally appointed superintendents of schools and assistant superintendents of schools in the following school districts, all having enrolments of more than 20,000 pupils. The districts were Coquitlam, Burnaby, Surrey, North Vancouver, and Greater Victoria. Vancouver, of course, had enjoyed the local appointment of its superintendent of schools for many years. It should be noted that locally appointed superintendents of schools and assistant superintendents of schools bear the same responsibilities and relationships in general terms to the Department of Education as do district superintendents of schools.

The Zone Conferences of District Superintendents and Superintendents of Schools were held in the fall in the six zones in the Province and again in the spring of the year. The zones are Vancouver Island, Metropolitan Vancouver, the Fraser Valley, the Northern Zone, the Okanagan Zone, and the Kootenay Zone. These conferences are of particular value in that those attending have problems of a common nature and, in the one or two-day conferences, there is adequate opportunity for each member of the relatively small groups to participate fully in the discussions. As in the past the Superintendent of Field Personnel attended these conferences.

The Department of Education again organized a Field Personnel Conference which was held in Victoria on March 27 and 28, 1974. This conference was attended by the Honourable the Minister of Education, the Deputy Minister, and all of the senior officers of the Department, as well as all district superintendents and superintendents of schools. The major theme of the conference was new directions in education, on which the Minister made the keynote address. The conference spent much of its time in small group discussion.

The University of Victoria again sponsored a Workshop at Harrison Hot Springs from January 23 to 25, 1974. The theme of this year's conference was "The Superintendency at the Crossroads." Approximately 30 superintendents and district superintendents attended. The Department of Education is indebted to the University of Victoria and its Faculty of Education for continuing to offer professional services to superintendents.

New members of the field staff visited the Department of Education for their initial introduction on August 1 before undertaking their various assignments in the Province. For one week in November the new members returned for an in-depth study of the Department of Education under the direction of the superintendents of each of the Department's major divisions. This in-service function appears to provide for real needs of newly appointed superintendents.

The Superintendent of Field Personnel was appointed by the Honourable the Minister of Education to act as Chairman of the Small Senior-secondary School Study Committee which had members representing the Field Staff, the British Columbia

School Trustees Association, and the British Columbia Teachers' Federation. The Committee met on several occasions during the year and anticipates providing the Minister with an interim report early in the school year 1974/1975. The Division also continued to be represented on the Canadian International Development Association panel which selects teachers for service in developing countries overseas.

VOCATIONAL AND INDUSTRIAL EDUCATION (SECONDARY SCHOOLS)

The total number of industrial education courses taken by students in secondary schools for the 1973/74 school-year was 134,016, an increase of 4.4 per cent over the previous year.

The policy of the Industrial Education Branch is constantly changing to meet the objectives of modern education. The prime function of the Branch is still to support the district superintendents of schools in the broad areas of technical education. It is interesting to note that the five school districts having a superintendent of schools continue to utilize the services provided. The Branch obtains an overview of current working conditions in each school by maintaining a liaison with all districts.

Eleven hundred and six teachers were employed in industrial education shops during the 1973/74 school-year, an increase of 4.3 per cent over 1972/73. Changes in the senior-secondary curriculum organization have had a marked effect on the number of students requesting shop courses. Girls are enrolling in many courses and the majority of academic students are taking advantage of vocational facilities to broaden their general knowledge. The emphasis today is on general education with sufficient background skills and experience to enable students to take a shorter period of training for a chosen career though many schools are on an extended day, some, unfortunately, cannot meet the needs of all students. The increased enrolment in IE courses has created a shortage of qualified shop teachers for September 1974.

The project system used for many years by industrial education teachers is rapidly moving toward a project-centred technology. Good examples of this approach are in Kelowna where a group of boys and girls have built an Accro Sport aircraft, and in Howe Sound where the whole school has been involved in creating a library to be located on the Stawamus Reserve. This type of project encourages individual activity whereby the student operates from the project centre and completes his work elsewhere in the shops or in other related areas in the school.

The Industrial Education Review Committee completed its study during the past school-year. A new Course Writing Committee has been established jointly by the BCTF and the Department, and a five-day course-writing session was held in June. The draft proposals will be distributed throughout the school system to obtain constructive reactions from all concerned before finalizing the committee recommendations.

Zone workshops for in-service training were held in Courtenay, Sooke, and Kelowna. Representatives from all schools attended and the main topic was the changing role of industrial education. The Kelowna workshop was centred around the almost completed Accro Sport, and the project technology approach was emphasized.

The 1973/74 school year saw the introduction of the internship programme and Education 465. The internship will be retained, but on a full school-year basis in order to allow more time for faculty members and trainees to complete the programme. Forty-five sponsored students will be entering the field in 1974/75 bring-

ing the industrial education teaching force to approximately 1,151 next year. The year was the most difficult one on record for recruiting although the minimum 54 persons have been enrolled for the sponsored programme commencing in September 1974. Nineteen persons have been recruited for the regular university programme. Regular programme students attend the Teacher Training Unit for two winter sessions and complete a Bachelor of Education degree prior to certification.

The Vocational and Industrial Education Branch continues to be engaged in activities of a technical nature. A significant contribution by the Branch this year has been the introduction of numerous Japanese visitors to the Burnaby Vocational School. It is proposed to build a Japanese house on the Burnaby campus using Canadian platform frame methods and the construction of the house will be filmed for technical showing in Japan. The house will be in its skeleton form for two years for display purposes and then completed as a building to emphasize the value of British Columbia wood products and current training programmes for British Columbia's major industries. Secondary school students should benefit considerably from visiting this unique building when touring the British Columbia Vocational School facilities in Burnaby.

HOME ECONOMICS

The total course enrolment in home economics and community services (including community recreation) was 109,829, an increase in the 1973/74 school-year of 9,981. The greatest numerical increases in home economics courses were in Child Care 12, Home Economics 8, and Foods and Nutrition 9.

Home economics departments were operated in 296 schools, an increase of 11 over the previous year. In Vancouver, a mobile unit was designed and equipped for teaching home economics to some Grade VII pupils at a few elementary schools.

The total number of teachers of home economics courses increased by 45, making a total of 804. Fifty-three per cent of these teachers had Masters degrees. There were 39 men teaching food courses.

Metric measures only are being used now in a foods and management textbook the Department of Education is producing.

At the University of British Columbia, home economics content courses requiring only Chemistry 11 as a prerequisite are being offered to certified teachers and to students who are on the Bachelor of Education programme. Teacher internship programmes, one of which applies to graduates in home economics from recognized universities, were introduced. Simon Fraser University developed courses for graduates in home economics which, along with other education courses, makes it possible to qualify for a teaching certificate. It is anticipated that these programmes will alleviate, to some extent, the shortage of home economics teachers.

DIVISION OF EDUCATIONAL PROGRAMMES—POST-SECONDARY

During the 1973/74 school-year the Division of Educational Programmes—Post-secondary continued to have the responsibility for programmes in the universities, colleges, British Columbia Institute of Technology, and the vocational schools. A. E. Soles became Associate Deputy Minister, Educational Programmes, and continued to carry the duties of Superintendent, Post-secondary Programmes.

A major development during the year was an increased involvement with other departments of Government and Governmental agencies, particularly the British Columbia Medical Centre.

Post-secondary educational institutions experienced a growth in enrolment during the year, a reversal of the stable or dropping enrolments of the previous year. Over-all university enrolment increased almost 6 per cent while part-time university enrolment increased 11 per cent. Over-all college enrolment increased 21 per cent with the part-time enrolment increasing 26 per cent. Part-time career programme enrolment showed the highest percentage increase at 34 per cent. Post-secondary enrolment details are in the statistical tables.

The universities have continued to provide valuable services through on-campus and off-campus programme offerings in addition to providing assistance to colleges and services on various committees and boards. Each of the presidents of the three Provincial universities, Dr. Walter Gage, of the University of British Columbia; Dr. Kenneth Strand, of Simon Fraser University; and Dr. Hugh Farquhar, of the University of Victoria; signified his intention to leave office. The outgoing presidents have made an outstanding contribution to higher education in this Province and they are to be highly commended for the leadership they have demonstrated during their tenure.

Dr. Pauline Jewett was selected as the new President of Simon Fraser University, the first woman to hold office as a university president in British Columbia.

A Universities Task Force, chaired by Dr. Walter Young of the University of Victoria, completed a study which led to the introduction of a new *Universities Act*. The most notable change incorporated in the new Act is provision for the establishment of a Universities Council.

The colleges have continued to grow in enrolment, number of programmes offered, and services given. The number of colleges has also grown with the establishment of Fraser Valley College which will serve the eastern area of the Fraser Valley. Preparations for the opening of the new college in September 1974 are advancing.

Two college principals, A. H. Glenesk, of Capilano College, and Dr. R. F. Grant, of Okanagan College, resigned during the year. Each has provided many years of excellent service to the community college movement in British Columbia.

The programme to provide permanent core facilities to each of the colleges, which was announced by the Minister last year is proceeding. Major construction projects at a number of colleges will begin in 1974.

The Minister announced the formation of the task force on the Community College chaired by Hazel L'Estrange, a council member at Douglas College. The task force was charged with the responsibility for examining all aspects of community colleges in the Province and for making recommendations leading to the creation of a Community Colleges Act. The task force travelled extensively both within the Province and in other provinces seeking views, opinions, and suggestions. A working paper, "Towards the Learning Community," was published and widely dis-

tributed. Approximately 100 public meetings were held by the task force during May at which people presented briefs and further suggestions. The final report of the task force will be presented to the Minister in the fall.

The Commission on Post-secondary Education in the Kootenays, chaired by Dean Ian McT. Cowan, completed its work and presented its findings. The joint study, with Alberta, on the provision of post-secondary educational services in the Peace River region was completed.

In the spring the Minister appointed an *ad hoc* Advisory Committee on Marine Training Programmes and Facilities. The committee is charged with the responsibility for advising the Minister on the development of a facility to offer training programmes for the marine industry.

The Academic Board, the Provincial Consultative Committee on Technical, Vocational, and Other Career Education, the College Principals Association, and the British Columbia Post-secondary Enrolment Forecasting Committee continued their work which greatly assisted the Division.

TECHNICAL AND VOCATIONAL PROGRAMMES

The Division of Educational Programmes—Post-secondary continued to be responsible for the co-ordination of vocational programmes in the colleges and unattached vocational schools. Close liaison was maintained with the Federal Department of Manpower and Immigration and the Provincial Department of Labour. Close liaison was also maintained with industry and the trade unions to assure relevance of programmes and curriculum.

The enrolment in vocational programmes rose to nearly 40,000 during the year, an increase of 14 per cent over the previous year. Of particular interest during the year was the continuing thrust toward individualized instruction in the Basic Training for Skills Development courses through the Vocational Adult Secondary Training programme.

The Curriculum Development Branch continued its work in the preparation and publication of new and revised course outlines and instructors' manuals, in addition to publishing publicity materials for programmes.

DEPARTMENT OF EDUCATION INSTITUTIONS

Two significant events occurred during the year concerning British Columbia Institute of Technology. Dean Goard, the Principal, retired after providing many years of leadership in technical education and earlier in vocational education. In the spring the *Institute of Technology (British Columbia) Act* was passed which gave the institute independent status with its own Board of Governors.

The enrolment at BCIT, particularly in the Extension and Industry Services Divisions, showed a marked increase over the past year. A Justice Training Programme was established in conjunction with the Department of the Attorney-General. The placement of graduates from all programmes remains very high.

The vocational schools have experienced increased demands for training in pre-apprentice, apprentice, and pre-employment programmes in addition to increasing demands for upgrading. The new Steel Trades Building at the British Columbia Vocational School, Burnaby, was completed and occupied. The Mining School in Rossland moved to a new site and a programme in underground mining was introduced.

CONTINUING EDUCATION

The participation of adults in continuing education operations in British Columbia continued to increase. Adult continuing education services are now provided by all 10 of our community colleges. School district adult education operations continue to experience an increased demand for services. Academic credit courses and English for New Canadians courses have increased enrolments while vocational course enrolments are down slightly. Community service and personal self-development courses are steadily increasing in popularity within both school district or college operations.

DIVISION OF EDUCATIONAL PROGRAMMES—SCHOOLS

During the 1972/73 school-year, considerable time was devoted to restructuring the organization of the Department of Education, the main objective being to facilitate greater co-ordination of planning and delivery of educational services at all levels. The former Division of Instructional Services has been reorganized and will be responsible primarily for the analysis, evaluation, and development of educational programmes for schools. The legislation enacted in 1974 providing for decentralization of decision-making in curriculum matters means that the Division's functions will be changing from those primarily concerned with prescribing and regulating courses to those concerned with providing a resource service to local authorities. A Provincial foundation programme will continue to be prescribed and regulations will be developed to ensure an orderly transition from central to local authority over curriculum. These measures are being taken to enable schools to respond more appropriately to the educational needs of students in the different communities of the Province.

In keeping with the general policy of bringing about greater co-ordination of educational services, changes were made in the regulations governing summer schools. Such schools formerly were operated only with Department of Education approval and for programming and financing purposes were considered separate from the regular school. The new regulations allow boards of school trustees to operate summer schools as an integral part of the school system. Thirteen boards did in fact operate summer schools in 32 different schools.

Resource services were provided in several special areas. Under the provisions of the Federal-Provincial bilingual programme, the Department's French Programme Co-ordinator assisted 27 school districts with their programmes, arranged conferences and workshops attended by over 80 per cent of the French teachers of the Province, processed Special Project Grants amounting to over $493,288.50, and administered the Second Language Monitor Programme involving the placing of some 19 Quebec university students as teaching assistants and the Summer Bursary Programme involving some 400 British Columbia teachers. The number of elementary classes is estimated to be 2,187 in 1974, bringing the total number of students receiving instruction in elementary schools to more than 100,000. A summer exchange programme involving 25 teachers from British Columbia and 25 from Quebec and under the sponsorship of the governments of the two provinces was also arranged.

Resource services are also being developed in the general area of equality of educational opportunity. A Provincial Advisory Committee on Sex Discrimination in Public Education was established and a Special Adviser, Ms. Reva Dexter, was appointed to assist the Department and the local school authorities in analysing school practices and learning materials to ensure that the learning environment avoids conditioning children to play stereotyped sex roles and provides equitable treatment for both boys and girls.

Resource services continued to be provided in the areas of curriculum development, learning evaluation, and learning materials. These are reported on in more specific detail elsewhere. It may be noted that June 1974 marked the first year that schools assumed full responsibility for graduating students without recourse to Provincial examinations.

It may also be noted that in the evaluation area, plans have been made for a research study and analysis of the Kindergarten to Grade XII programme in the

communications skills administered jointly by the Department of Education, the Faculty of Education, and representatives of the British Columbia Teachers' Federation. In the learning materials area, regulations were changed to provide that all prescribed textbooks will be free. In this field, too, inflation is creating problems. Out of a total of 807 textbooks, 400 increased in price with the smallest increase being 0.8 per cent and the largest 78.2 per cent.

A major study of school records was undertaken and a report containing tentative recommendations for changes was prepared and circulated to school districts for advice and suggestions. The committee, which was representative of teachers, trustees, and parents, has directed its efforts to devising a system which will ensure more effective collection and use of information necessary to improve educational decisions, and a clear policy regarding confidentiality and the protection of the rights of students and parents.

The volume of correspondence from the public continued at the same high level as last year. It tends to confirm conclusions reached by many research studies demonstrating the conflicting expectations people have for public schools. The general measures being taken to decentralize decision-making may facilitate the resolution of such differences of opinion at the community and the individual school level by bringing teachers, parents, and community leaders together in determining what is in the best educational interest of the children in a particular class. A definition of a "good" school is a matter of opinion and perhaps there is merit in having the teacher and the parents collectively determine what will make a "good" school.

CURRICULUM DEVELOPMENT BRANCH

The Curriculum Development Branch has general responsibility for the review and revision of existing courses, the development of new Provincial courses, the identification of resource material to support prescribed courses, and the establishment of general guidelines for the organization of the curriculum in both elementary and secondary schools. Associated tasks include the preparation and publication of curriculum guides outlining courses prescribed for public schools and the development of administrative bulletins and Departmental circulars outlining policy regarding curriculum organization and administration.

The small permanent staff of the Branch is assisted in its work by a number of advisory committees of teachers and other experts. The extent of this assistance, provided on a voluntary basis, can be illustrated by noting that a total of 17 committees, comprising 150 members, held 136 meetings during the year. An estimated 6,880 hours of members' time was devoted to this work. The policy of providing released time for teacher members of these committees was continued.

Course development and revision work were continued in the following curriculum areas—elementary school social studies, mathematics, biology, English, elementary school science, elementary school language arts, fine arts, Spanish, graphic communications, and community recreation. New studies were begun in the areas of business education, earth science, and secondary school social studies. Curriculum guides were prepared and distributed outlining revisions to 18 courses. A total of 90 new titles were added to the list of textbooks prescribed and provided to schools for pupils. An additional service was provided to schools by members of our two library book-review committees who reviewed a large number of books and, as a result, provided the basis for the preparation of annotated lists of suitable school library books.

Over the past few years, the Department has been actively pursuing a policy of decentralization of authority in curriculum matters. This policy has led to the development of course outlines which are less prescriptive and allow for greater opportunity for adaptation at the local level. New Provincial guidelines in the area of secondary school curriculum organization has given schools greater authority in the design of student programmes and decisions regarding graduation. In the 1973/74 school-year the policy change regarding locally developed courses represented a further step in the process of decentralization. The procedure requiring Provincial approval of locally developed courses was changed to make the local boards of school trustees the final authority in approving such courses. In addition, a decision was reached to establish a committee to advise the Department on further appropriate steps to be taken in this decentralized process.

One interesting aspect of the work of the past year has been the involvement of the Branch in Canada's conversion to the metric system as the official system of measurement for the nation. The Director has acted on committees at both National and Provincial levels formed to assist in the co-ordination of this change. The Branch has also been directly represented on a national task force formed to advise the Council of Ministers of Education on matters affecting the conversion. Curriculum changes are being planned to familiarize children with the metric system. Initial changes have been introduced at the elementary school level. Materials to assist teachers with the implementation of these changes have been identified and distributed.

Once again this school-year the practice of having two outstanding teachers released on loan by their boards of school trustees to work with the Curriculum Development Branch was continued. This year's appointees were W. C. Dunlop (North Vancouver) and J. A. Holm (Kitimat). Their enthusiasm and knowledge, combined with their practical experience and professional training, made an invaluable contribution to the work of the Branch.

AUDIO-VISUAL SERVICES BRANCH

The Audio-Visual Services Branch is engaged in the planning, development, selection, production, purchase, and distribution of a variety of audio-visual materials which are supportive to the instructional programme. In co-operation with other Departmental branches, curriculum committees, and teachers, decisions are made regarding the appropriate medium, technology, and materials required to meet specific educational goals.

Effective April 1, 1974, the Audio-Visual Services Branch became the Provincial Educational Media Centre. With the name change the full range of media services, including film and filmstrip loans, television production, television and radio broadcast, video-tape distribution, and consultative services came under a single organization. The year preceding this change saw the creation of the Media Centre as a production unit and the expansion and integration of these services into a balanced, cohesive, complementary whole.

The addition of a television production and video-tape distribution system has added a new dimension to the selection and production of educational materials. Video-tape distribution rights to many 16mm films have been acquired, thus allowing the Branch to concentrate its production energies on local and (or) curriculum correlated programming.

Approximately 1,500 films were previewed for possible inclusion in the film library with about 100 new titles being added to the collection.

Video-taping rights for approximately 200 16-mm film titles were negotiated. These included the British Broadcasting Corporation's "Civilization" and "The Ascent of Man" to expand and complement Civilization 12E and related Humanities programmes.

The traditional pattern of co-operative production of radio and television broadcasts with the Canadian Broadcasting Corporation was continued in the 1973/74 school-year. Approximately 18 new television and 75 new radio programmes were produced for broadcast.

The production studio completed over 70 television programmes for video-tape distribution. Many of the productions were additions to series begun in the previous year. A French series for senior grades was expanded and a number of new field trips for the elementary level and "Student Forums" for secondary schools were added. Pilot programmes in consumer education and in metrics were produced for classroom testing.

Distribution system were modified and diversified to accommodate the changing technology and to reflect the changing needs of teachers. Demand for loan of films and filmstrip kits remained very high. Circulation reports may be found in the statistical tables. An experimental delivery system was set up in Powell River, Courtenay, and Campbell River with good results and a number of different reservation and shipping patterns were established throughout the Province. The video-tape dubbing centre was expanded and the distribution operation was modified to meet district needs. More than 5,000 video-taped programmes were sold to school districts during the year, More than 300 locally, regionally, and nationally produced radio and television programmes were broadcast throughout British Columbia on CBC with several of the television programmes being offered through the video-tape dubbing centre as a supplement to broadcast service.

New film, filmstrips, and video-tape catalogues and teacher guidebooks for radio and television were printed and distributed to teachers. The Branch published

several editions of a newsletter, *re·views,* which were sent, through the British Columbia School Librarians' Association, to over 1,500 librarians and teachers.

Branch members worked with the elementary social studies and biology revision committees in the selection and production of audio-visual aids for the new curriculum. Branch officials also visited over 60 school districts to provide information on services and technology and to gain information on media needs at the district and school levels.

A two-day educational television conference was held in February with representatives from over 60 districts attending. Sessions were given by Branch personnel and by local and school district resource people.

The Director represented the Department at the Western Regional Conference on School Broadcasting and on committees serving the Council of Ministers of Education. The Assistant Director and the Supervisor of Distribution helped to co-ordinate the Sixth Vancouver Festival of Student Films. Branch members sat on the PEMC Media Advisory Committee, a group composed of teachers and school district personnel nominated by District Superintendents and the British Columbia Teachers' Federation.

CURRICULUM RESOURCES BRANCH

During the past year special designs of resource materials submitted by curriculum committees and accepted by the Curriculum Development Branch required exacting discussions with publishers' representatives to ensure that materials would meet educational needs and also remain within economic feasibility. As a result 23 new titles will be added at the elementary level, and 67 new titles at the secondary level for the 1974/75 school-year. Two previously prescribed texts will be withdrawn from each area.

It has been necessary to change the pattern of outflows from the Curriculum Resources Branch in order to assure the delivery to schools before the start of the new school-year. In April 1974, a provisional order form was issued to cover those areas of curriculum where no change could be expected and orders were filled from the beginning of May by the employment of temporary staff. In June a further form was issued to identify new titles listed in *Instructional Services Circulars* as well as to provide means for ordering maintenance supplies of some courses which had been under consideration for review but for which specific revisions had not been finalized. This innovation did not take place without some temporary inconvenience to schools and school districts but it is felt that the split-order process will enable the distribution of school opening requisitions to be completed in time to meet school requirements.

The commercial repair of textbooks continues with a service bindery located in Vancouver and another in Kelowna. These two organizations provide a service whereby almost 60 per cent of the student population is covered. Books are picked up, repaired, and returned to schools in the summer recess. Those schools involved in the programme are not required to get replacement copies from the Curriculum Resources Branch, thus easing the pressures experienced with the heavy seasonal outflows of books. Statistics compiled from payment vouchers show that not all schools are taking advantage of this service. The obvious economic benefit of repairing books instead of purchasing replacements from the publishers is supplemented by better service.

Total expenditures by the Branch for the purchasing of resources was $5,762,045. In addition to these expenditures, the Director was responsible for acting as purchasing agent for the British Columbia Institute of Technology and the vocational schools of the Province.

EXAMINATIONS AND TEACHER CERTIFICATION BRANCH

The Examinations and Teacher Certification Branch has responsibilities in two primary areas. It prepares, administers, and marks all Grade XII Department of Education scholarship examinations and issues awards to those qualifying in the scholarship competition, and administers and marks standardized tests available to those seeking Grade XII equivalency certificates and issues credentials to successful candidates. It also evaluates the academic and professional qualifications of all applicants for British Columbia teaching certificates, issues appropriate certificates to those who qualify, and maintains a Provincial registry of all certificated teachers.

In addition to the primary functions of Examinations and Teacher Certification, a number of related duties also are assumed by the Branch. The Registrar and Director is Officer-in-Charge of the Teacher Exchange Programme, Administrator of the General Educational Development Testing Programme for the Province, and serves as a Department of Education representative on several committees, including the Joint Board of Teacher Education, Provincial Accreditation Committee, British Columbia Student Aid Committee, Department of Education Examinations Committee, and Minister's Advisory Committee on section 18 (7) of the *Public Schools Act*. During the 1973/74 school-year the Registrar and Director again was a member of the External Evaluation Team which prepared comprehensive reports to the Provincial Accreditation Committee on several secondary schools under review for accreditation.

Examinations Section

The 1973/74 school-year was the first one during which Grade XII students competed for Provincial Government scholarships under revised regulations. Scholarship examinations were made available in both January and June rather than in June only as in past years, thereby providing greater opportunity for students who were attending schools organized on the semester system to enter the scholarship competition. Scholarship students also had opportunity to demonstrate a broader competency by writing scholarship examinations in at least three senior courses. In addition, all scholarship students wrote a special paper in English Composition which was marked on a pass/fail basis. Although the student's scholarship standing was calculated on the basis of performance on the three scholarship examinations written, a pass standing also had to be obtained on the English Composition paper to qualify for a scholarship award.

During the 1973/74 school-year scholarship examinations covering 13 courses were prepared for each of January and June. This year's French scholarship papers included a special auditory section as well as a written section. Two editions of the English Composition paper also were provided.

A total of 3,798 examination papers were written by candidates in January and these were marked by 87 teachers during week-ends at a centre in Burnaby. A further 5,842 papers written in June were marked by 121 teachers at Victoria in July. In total, 1,780 students entered the 1973/74 scholarship competition writing the required number of papers, of whom 1,014 qualified for awards.

Brett Gordon Giles, of Salmon Arm Senior-secondary School, ranked first in the 1973/74 Provincial Government scholarship competition and won the Governor-General's Silver Medal with an average of 93.5 per cent. The Governor-General's Bronze Medal was awarded to Rhonda Lisa Nishiguchi, a student at Sir Winston Churchill Secondary School, Vancouver, who ranked second in the scholarship competition with an average of 91.2 per cent.

Commencing in September 1973 the Department of Education introduced a programme whereby adults who had not graduated from secondary school could qualify for a Grade XII equivalency certificate by successfully challenging a battery of five standardized tests designed to measure the major generalizations, ideas, and intellectual skills normally acquired through formal secondary school education. Those registering were able to write the tests at several regular testing sessions held in the various college centres. Additional testing sessions and centres also were provided in correctional institutions, at Armed Forces bases, and otherwise where there was sufficient demand.

During the first 12 months the programme was available, 3,066 adults sat for tests, of whom 2,610 or over 85 per cent qualified for a Grade XII equivalency certificate. The high proportion of successful candidates, as well as the rapidly increasing number of registrants for these tests, indicates the growing importance of this educational programme.

Teacher Certification Section

The 1973/74 school-year brought significant increases in the number of applications for teacher certification, in the number of certificates issued, and in the demand for additional teachers. In large part these increases were in response to the priority now being given to reducing the average pupil-teacher ratio. During each of the next three school-years the objective will be to reduce the average Provincial pupil-teacher ratio by 1.5 from its present level of 21.5 to 17.0 pupils per teacher. In addition to providing supplementary operating grants to school boards to permit appointment of additional teachers necessary to effect the desired reduction in the average pupil-teacher ratio for the next school-year, a number of special teacher preparation incentive grant programmes were introduced in the spring of 1974 to ensure availability of sufficient fully qualified teachers. Each incentive grant programme was designed to address particular teacher shortage problems—either those associated with certain teaching subject areas known to be in short supply (for example, home economics, and commerce) or those of geographic location, most severely experienced by some school boards removed from the larger metropolitan areas.

A total of $75,000 was allocated for grants of $250 each, available to fully qualified persons who had been out of teaching for several years and wished to undertake professional refresher studies to prepare themselves to re-enter teaching in September 1974. A further $65,000 was made available for grants of $250 each for partially trained persons who could complete their studies and become fully qualified teachers by September 1974. Another $145,000 was set aside for grants of $500 each available to students with at least four years of university but lacking professional teacher education, who would undertake the first phase of their preparation on campus during the summer. In September 1974 these partially trained persons were to enter the schools as interns paid by the school boards, teaching part-time under close supervision, and otherwise completing the second phase of their teacher education programmes.

Finally, $150,000 was allocated for travel and living allowance grants for student teachers not yet committed to teaching assignments if they would undertake their final practice teaching in more remote school districts during the 1974/75 school-year.

The funding of these special programmes was in addition to that provided through regular operational grants to the universities for established teacher prep-

aration programmes and for a number of innovative and new alternative programmes in teacher education now being implemented.

During this school-year, much consideration was given the matter of interim and permanent teacher certification. Under existing regulations, all initial certificates issued to applicants are interim, expiring after four years. To qualify for a permanent certificate the teacher must teach satisfactorily in a British Columbia school for at least two years during the period the interim certificate is valid and be recommended for permanency by the district superintendent or superintendent of schools.

Careful study indicated that with much longer and more intensive teacher preparation programmes now being offered within the Province, there is adequate opportunity to evaluate the classroom performance of teacher trainees before they are granted initial certification. It also was established that these regulations governing interim and permanent certification cause inconvenience and some hardship for certain newly certificated teachers who do not have an opportunity to teach for at least two years immediately following completion of their teacher preparation.

Under revised regulations to come into effect in the 1974/75 school-year, nonexpiring or continuing certificates rather than interim certificates will be issued initially to all British Columbia teacher trainees who complete preparaton programmes leading to qualification at the standard or professional certificate levels. Applicants for certification who undertake their teacher preparation outside British Columbia, however, will be required to demonstrate satisfactory teaching service in this Province's schools before they become eligible for nonexpiring certificates. These teachers initially will receive credentials valid for two years, but they may qualify for nonexpiring certificates either by teaching for one year and obtaining the recommendation of their district superintendent or superintendent of schools, or by teaching for the same school board for two years without being terminated or dismissed.

In September 1973 the full-time teaching force of the Province numbered 23,631, a net increase in teaching positions of 1,508 or 6.8 per cent over last year's 22,123. This represented the largest annual growth in the number of teachers ever recorded in the Province, and one of the highest annual percentage increases in teaching staff.

Of the September 1972 total teaching force, 19,882 or 89.9 per cent again were teaching in British Columbia in the new school-year, while 2,241 or 10.1 per cent retired or otherwise left teaching. Exclusive of staff changes during the school-year, new teacher appointees in September 1973 numbered 3,749.

Statistical tables elsewhere in this Report contain considerably more information on teacher qualifications, salary ranges, and related matters.

DIVISION OF INTEGRATED AND SUPPORTIVE SERVICES

The name of this Division, formerly called Special Services, was changed this year to Integrated and Supportive Services. The change in name recognizes the change in educational philosophy which has been taking place in our school system. Instead of the process of segregating children because of "special" differences, school districts have been substituting a process of supporting parents, teachers, and children so that children with disabilities can remain in regular schools and classes.

The Division has several areas of responsibility. It approves for the purposes of section 180 of the *Public Schools Act,* supportive programmes operated by boards of school trustees and programmes set up under section 20 of the *Public Schools Act.*

It is responsible at the Department level for health services provided by boards of school trustees and for liaison and the integration of services with other Government departments and private agencies in matters concerning the education of the handicapped. The Division has four branches: Jericho Hill School for the Deaf and the Blind, Correspondence Education, Indian Education, and Student Aid at the post-secondary level.

During the 1973/74 school-year, 1,588 approvals were granted. Eleven hundred and seventy-two of these were for learning assistance. These approvals allow school districts to deploy additional resources in ways designed to meet the specific needs of the particular districts. Four hundred and sixteen approvals were for very specific needs of certain groups of students—trainable mentally retarded, the communicatively impaired (hearing, sight, and speech), learning adjustment (non-English speaking and Indian children), hospital and rehabilitation students, those taking home instruction, and those in detention homes.

A continuing effort was made during the year to increase the quality of the supportive services. The Professional Development Section of the British Columbia Teachers' Federation and the Department continued to provide intensive in-service training to teachers and parents as well as to other disciplines.

During the year an examination of particular strategies was carried out. As a result, it has been recommended that a staggered entry system into kindergarten be tried on a pilot basis in several districts where there is a desire to experiment.

An examination was made into the value of extending work study and work experience programmes to more secondary students. The *Public Schools Act,* the *Workers' Compensation Act,* and the *Minimum Wage Act* have all been amended to allow school districts greater freedom in extending this option to their students.

A third inquiry was into the transportation system whereby children with very serious handicaps are transported within school districts or across school district boundaries to highly specialized treatment facilities. It was recommended that a re-examination of this system be undertaken.

During this year there was a major increase in the number of programmes which are jointly sponsored by the Department of Education and the Department of Human Resources, or Department of Health, or the Attorney-General's Department. Generalizing, the students on these programmes are between 12 and 16 years of age, largely boys, not unintelligent, but with serious behaviour problems. They are often in conflict with both school and society, with a long history of failure, a low self-image, sometimes out of school, and in danger of conflict with the law. There are close to 1,000 students on programmes of this kind.

INDIAN EDUCATION BRANCH

Three-quarters of the Indian children in the Province attend public schools.

In July 1973 the consultant to the Department of Education on Indian education was appointed Director. His functions were to assist in the development and assessment of school programmes which are designed to meet better the needs of those Indian children, and to make available to the school districts they attend the approvals of extra resources to meet their goals.

It has become clear that one of the most fundamental needs in the education of Indian children is a closer involvement at the local levels of their parents. The Department of Education, through the British Columbia Association of Non-Status Indians, sponsored two field workers to work at the local level and encourage local participation. As a result school districts have tended to use more Indian people as home-school co-ordinators.

A recommendation was made and accepted that one geographical section of the Province be set up as a school district having a largely Indian enrolment with a predominantly Indian School Board. This area, the Nishga, is scheduled to become officially a school district in January 1975. It will be able to serve as demonstration area for curriculum adjustments and other education strategies which may meet more fully the needs of Indian students. A further recommendation which was accepted was that 60 mature Indian people be admitted into a teacher training programme to commence in September 1974 and that the programme be specifically designed to meet the needs of these trainees.

CORRESPONDENCE BRANCH

Each annual report issued by the Correspondence Education Branch in recent years has dealt with some facet of the total operation, followed by the usual statistics. The 1973/74 report discussed the service offered to pupils in attendance at regular schools in the Province. This support role to the schools is perhaps not as well understood as the Branch's founding function of providing formal education for those who live in various states of isolation.

The better-known assistance to pupils already enrolled in schools includes registration of those who have time-table difficulties (867 pupils), *or* must repeat a course from the previous school-year or semester (229 pupils), *or* require a course that the school cannot provide (1,419 pupils), *or* wish courses additional to the usual work load (427 pupils), *or* need instruction in English as an additional language (27 pupils). A more recent development is aid to the growing number of pupils who opt out of the regular classroom but continue to be accommodated by school boards in special classes or are referred to agencies which have the leadership to do an effective job.

Pupils in the first grouping are chiefly enrolled in school courses which follow outlines suggested and prescribed by curriculum committees. The one exception is the concession made to those who wish courses "additional to the usual work load." Mostly gifted, they often display a natural curiosity for courses like air navigation, elementary astrophysics, and geology which are more especially designed for adults. Such students are encouraged, for their completion rate averages 91 to 100 per cent with no visible disruption of time-tabled studies.

Not all classroom pupils who are registered for courses are as well motivated. In general, they represent a more average pupil with some of the minor problems

which beset young people, or at least pupils who need the usual guidance and encouragement. Page 43 of the *Administrative Bulletin for Secondary Schools 1972* makes certain recommendations to schools when correspondence courses are provided. It suggests the appointment of a staff member to supervise the work, keep a register of papers as they are completed, admonish pupils who fall behind suggested schedules, and generally advise them about the quality of their work or resolve difficulties as they arise. Too often schools assume that because the correspondence papers are complete in themselves the pupil may be left to his own devices. When this occurs the completion rate may fall as low as 8 per cent. When administration of the courses is at an acceptable level the completion rate will average 60 to 86 per cent in public schools and as much as 100 per cent in certain independent schools.

High completion rates can apply also in the case of those pupils who are more prone to disciplinary problems or find a subject particularly difficult. The structured work of the courses is often what they require. The papers are concise enough to make each stage of the journey enjoyable and passable. A little prodding along the way will result in improved study habits. District superintendents often suggest that all pupils should be required to complete at least one correspondence course. The Branch is not averse to this suggestion.

Paragraph two mentions also pupils who wish to opt out of the school system. Sometimes they will stay in special classes provided by the school district. Frequently, they may be referred to an approved agency which allows them more freedom. By way of assistance the Branch often supplies courses originally designed for adults. It also supplies copies of the regular school courses which may be modified to meet special needs.

In dealing with the agencies during 1973/74 the Branch asked school officials to countersign applications submitted. It also suggested that the pupils be required to pay the nominal fee for the course as a means of making them responsible. Victoria Boys Club may be regarded as a model. There the boys are encouraged to take odd jobs to pay for their courses and to follow a definite schedule for their completion. The completion rate has been impressive.

Finally service is provided to pupils who are removed from the school as part of disciplinary action by the school board. Such pupils must visit the district superintendent and request his backing for enrolment. During the interview the district superintendent seeks assurance that the pupils wish to benefit from a second chance. Upon receipt of the application and assurance, the Branch allows one course on a trial basis. If the effort put forth is worth while, the pupil is told he may re-enter the regular school classes in the new school term. Approximately 20 per cent do so.

The principal administrative problem in 1973/74 was revolving mail strikes. These caused delays in the return of marked exercises which in turn interferes with one of the incentives to continue doing good work. During these strikes it was still possible to provide sufficient papers to keep pupils occupied.

The general regulations and description of courses appeared in the booklet, *Correspondence Education,* which was issued in July 1973. In addition to the usual offering, the booklet mentions three free short courses for adults. This continues the policy of encouraging adults to pursue private study on a continuing basis.

The enrolment figures for the year were as follows:

	1972/73	1973/74
General enrolment—		
Grades VIII–XII and special vocational courses	13,499	13,313
Kindergarten	not recorded	76
Grades I–VII (Victoria)	770	998
Grades I–VII (Pouce Coupe 1972) (Dawson Creek 1973)	111	169
Total students	14,380	14,556
Certain groups for whom free instruction was provided:		
Inmates of institutions	711	587
Social assistance cases	193	524
Special illness cases	431	342
Recent immigrants	22	124
Needed at home	14	8
Distance cases	337	424
	1,708	2,009

The free instruction above represented a waiving of enrolment fees in the amount of $39,576.

JERICHO HILL SCHOOLS

During the 1973/74 school-year the Jericho Hill Schools for the Deaf and Blind enrolled 272 students. Of these, 215 were deaf or hard of hearing, and 57 were blind or partially blind. This was a decrease in total enrolment of 13 pupils compared with the previous year. (In 1972/73 there were 223 deaf pupils and 62 blind pupils enrolled.) Approximately 130 students, almost half of the total, lived in residence at the school.

The School for the Blind and the School for the Deaf occupy the same campus, but all facilities, including dormitories, have been separated effectively and function as two independent schools, each under its own principal.

During the 1973/74 school-year, Ben Chud, Vancouver, was commissioned to conduct an inquiry into the operation of Jericho Hill Schools. His recommendations are expected to be considered by the Department during the next school-year.

YOUNG VOYAGEUR PROGRAMME

During the summer of 1974, 26 groups of Young Voyageurs, representing a total of 538 secondary school students and 56 adult escorts, travelled from British Columbia to spend a week sampling the life-styles of communities in other provinces of Canada. In turn, an equal number of out-of-province visitors were entertained in hosting centres around British Columbia.

Four of the 26 units were oriented toward special groups—two special exchanges for disabled students, one programme for "young foresters," and another project involving "young farmers."

Most student travellers spent three days in Ottawa and district, in addition to living for a week with a family in a different part of Canada.

The exchanges were distributed by province as follows: Quebec, nine groups; Ontario, nine; New Brunswick, two; Manitoba, two; Nova Scotia, one; Prince Edward Island, one; Saskatchewan, one; and Alberta, one.

Since its inception in 1964 under the name "Centennial Travellers," this programme has enabled 45,591 young Canadians to explore their country. This total represents 1,897 units, of which 225 have originated in British Columbia.

During the past 11 years, the Young Voyageur Programme has enjoyed remarkable success in combining travel with worthwhile educational experiences. Some of the programme's goals are to promote through travel a greater appreciation of Canada's varied geographical and cultural make-up; to develop the students' ability to live and work as members of a group; to broaden their horizons by introducing them to cultures, life-styles, and ideas which are different from their own; to give students the chance to make practical and responsible decisions; and to encourage students to learn more about their own Province so that they will be knowledgeable ambassadors of British Columbia.

STUDENT SERVICES BRANCH

During the 1973/74 school-year the structure of the Department of Education's scholarship and bursary programme was changed. Administrative procedures were broadened so that the British Columbia Student Assistance Programme could provide 50 per cent more grants to post-secondary students.

A Special Assistance Programme was introduced during the spring of 1974 to service part-time students. Additional funds were also made available to students who had exhausted the limits of the full-time programme. Scholastic awards were made to 17 per cent of the top applicants at the post-secondary level.

Meanwhile, a comprehensive programme of student assistance for post-secondary students was approved for the 1974/75 school-year to ensure that British Columbia residents are not denied the opportunity to reach their educational objectives due to financial barriers.

The maximum assistance for the full-time programme was set at $2,900 per educational year. The first $200 of assessed need ($100 in the case of single-semester applicants) will be provided in grant funds. The remaining need will be met on a 50-per-cent grant, 50-per-cent loan basis to a total maixmum grant of $1,500 (including the initial $200) and total loan of $1,400 per educational year.

A new special assistance programme will also be implemented to provide funds to eligible students undertaking less than 60 per cent of a full programme of study leading to a certificate, diploma, or first degree. Funds will also be available in special situations when the applicant is enrolled in courses designated as preparatory to future college or university work.

STATISTICS

July 1, 1973, to June 30, 1974

	Number	Value
Canada Student Loans	11,559	7,980,378
Provincial Grants-in-Aid	8,513	2,353,333
Provincial Scholastic Awards	7,655	1,540,665

Bilingual Programmes

The Student Services Branch administered the distribution of about 800 bursaries in co-operation with the Council of Ministers of Education of Canada. This programme provided an opportunity for British Columbians as well as residents of other provinces to participate in linguistic and cultural courses.

The Branch also participated in the Federal-Provincial Bilingual Training Programme. British Columbia students received fellowships up to $2,000 each to study in Francophone institutions. Funds were also provided to British Columbia Francophones to study at French-speaking universities.

1.7 Changes in Net Enrolment During the School-year, From September to September, and From June to June 126

TABLE 1.1 NET ENROLMENT[1] AND AVERAGE DAILY ATTENDANCE

Enrolment in the public schools rose from 537,106 in June 1973 to 548,999 in June 1974. An 8,925 increase in Kindergarten pupils combined with a 6,419 secondary increase outweighed a Grade I to VII decrease of 3,451.

Type of School	Number of Schools	Net Enrolment of Pupils				Attendance of Pupils	
		Boys	Girls	Total	Per Cent of Total	Mean Daily Attendance	Per Cent of FTE Net Enrolment
Senior secondary	24	11,597	11,589	23,186	4.2	18,441.4	79.54
Secondary	120	51,422	50,492	101,914	18.6	85,125.0	83.53
Junior secondary	123	40,435	38,561	78,996	14.4	69,448.9	87.91
Elementary-senior secondary	13	2,083	1,926	4,009	0.7	3,382.4	86.12
Elementary-junior secondary	46	6,531	6,130	12,661	2.3	11,121.3	89.39
Elementary	1,227	169,006	159,227	328,233	59.8	301,784.2	96.74
Totals	1,553	281,074	267,925	548,999	100.0	489,303.3	91.90

[1] Net enrolment is the total number of students on the register on the first day of school plus new arrivals during the school-year, minus those who transfer to another British Columbia public school or class.

In addition to the number given above, there were enrolled:

Secondary School Correspondence classes, regular students (exclusive of the 2,186 officially registered in other schools)	2,969
In the Elementary School Correspondence classes, regular students	1,101
Under section 20 of the *Public Schools Act,* pupils receiving instruction	66
	4,136

Adult Education

Canadian Vocational Training Programme—	
Day	39,851
Night	22,320
Public School Adult Education	129,623[2]

TABLE 2.1 DISTRIBUTION OF FULL-TIME EQUIVALENT PROFESSIONAL STAFF AND PUPIL/TEACHER RATIOS* BY TYPE OF SCHOOL.

The number of teachers employed in the different types of schools and the average number of pupils per teacher are shown in the following table. The over-all pupil/teacher ratio decreased by 1.04 from June 1973 to June 1974. This decrease is somewhat less than the 1.31 decrease experienced between September 1972 and September 1973, the reason being the definition of net enrolment, which increases steadily during the school-year because of positive net immigration.

Type of School	Number of Schools	Supervising Principals	Instructional Staff			Total Professional Staff	Average Number of Pupils per FTE Staff Member		
			Enrolling Divisions	Special Staff	Total Instructors		Enrolling a Division	Instructing	On Total Staff
Senior secondary	24	24	786.5	283.3	1,069.8	1,093.8	29.47	21.67	21.20
Secondary	120	114	3,591.5	1,257.3	4,848.8	4,962.8	28.38	21.02	20.54
Junior secondary	123	122	2,781.9	1,082.2	3,864.1	3,986.1	28.40	20.44	19.82
Elementary-senior secondary	13	12	155.0	43.1	198.1	210.1	25.34	19.83	18.69
Elementary-junior secondary	46	30	463.6	105.9	569.5	599.5	26.84	21.85	20.75

Source: Form AD—Division of Financial Services.

Calculation of FTE pupils—each Grade I through XII pupil is counted as 1.0, each Kindergarten pupil is counted as 0.5.

Calculation of FTE teachers—part-time as well as full-time teachers are counted. Each part-time teacher is counted according to the appropriate decimal fraction of full time (i.e., a half-time teacher is counted as 0.5). All district-wide (i.e., directors of instruction, supervisors, teacher consultants, co-ordinators, district librarians, district counsellors, relieving teachers, etc.) as well as school-attached teachers (i.e., principals, vice-principals, department heads, librarians, counsellors, regular classroom teachers, etc.) are counted.

[1] Average daily attendance as a percentage of FTE net enrolment.

[2] The total expenditure for public schools was borne by the Government.

[3] Excluding unknown expenditure made for incidental expenses in city school districts.

[4] Since 1922/23 this amount includes the annual grant from the Government to the Provincial universities and since 1963/64 to school district and regional colleges.

[5] Since 1955/56 this amount is exclusive of capital expenditures from by-law funds.

[6] The numbers of teachers reported from 1966/67 on include district-wide teachers with supervisory and administrative duties. These district-wide teachers were *excluded* from this table prior to 1966/67.

TABLE 3.2 EXPENDITURE FOR EDUCATION, CALENDAR YEAR 1973

(Exclusive of Capital Expenditure for By-law Funds)

		$	$
Total expenditure by school districts (including colleges)			530,411,068
Add Department of Education expenditure for administration, correspondence schools, Teachers' Pension Fund, free textbooks and maps, adult education, vocational and technical schools, grants to colleges, universities, and school districts, etc.		481,823,740	
Less Government grants to school districts included in school district expenditure:			
	$		
Direct grants	237,870,802		
Grants to reduce local taxation	80,006,845		
Total Government grants to school districts		317,877,647	
			163,946,093
Gross total other Department of Education expenditures			694,357,161

TABLE 3.3 COST PER PUPIL, CALENDAR YEAR 1973

Grand total cost of education		694,357,161
Deduct school district expenditure not affecting pupil cost:		
Colleges and other nonoperating expenditures	38,796,313	
Debt charges	54,163,666	
Current nonshareable capital	4,907,977	
Total school district reduction	97,867,956	
Department of Education expenditures for post-secondary and adult education, correspondence schools, technical and vocational schools, grants to colleges not included in school district deduction, universities, etc.	181,686,031	
		279,553,987
Total operating costs		414,803,174
Operating cost per pupil for year based on daily average attendance of 489,303		847.74
