THE CRESTON REVIEW

Vol. XXIV CRESTON, B. C., FRIDAY, SEPTEMBER 1, 1933 No. 23

Wynndel Fair Looks Promising

Exhibitors from Outside Points Allowed Compete — Opening Day and Judges Arranged—Large Entry Now Assured.

With the fall fair just three weeks distant reports from Wynndel are to the effect that even greater interest than that manifest in connection with the 1932 exhibition is already in evidence, and there is every reason to anticipate a still bigger and better showing in all classes than a year ago.

Arrangements for the fair are shaping up nicely. Judges have been already arranged for, and they will be much the same as last year. Mr. Twigg will make the awards in fruits, vegetables and flowers, and Mrs. Boyd and Mrs. Hayes will be back again to place the tickets in the sewing, canned goods and cooking classes, and it is expected Col. Mallandaine of Creston will make the address in connection with the official opening.

With many of the ranches now under irrigation there is no doube of an iecreased showing in the roots and vegetables classes with an equally noticeable improvement in quality. And with the irrigation and the ideal weather that has prevailed to put the color into the apples the fruit showing should also show both an increase and better quality.

With the past winter rather quieter than usual in social activities and with considerable interest shown in rug and built making there should be an increase in the needlecraft display, and with better prizes to tempt the housewives the show of canned goods, particularly, is likely to be larger.

The directors have been fortunate in securing a donation of ten 5-pound cartons of Elephant brand fertilizer from the Consolidated Mining & Smelting Co., Limited, Trail, to be distributed among exhibitors only, and the lucky numbers will be drawn.

The fair management has decided that any person, whether belonging to Creston valley or otherwise, is eligible to exhibit, and a remind is issued that enteries close on Monday, Septembe 18th, with the secretary, Miss Olga Hagen. Prize lists and entry forms may be had from any of the directors, as well as Your Cash Store at Wynndel, and S. A. Speers and Burns & Co., Creston.

Sirdar

Joe Lombardo is leaving this week for a business visit at Nelson and Revelstoke.

The Workmen's meat market of Trail have taken their weekly shipment of beef and expect to be back before the week end for another.

Miss Margaret Rogers left on Wednesday for Grand Forks, where she will be the guest of Miss Nettie McCabe.

Mr. and Mrs. Martello, new school principal, have taken a lease of the Colombo home, the latter moving out to another house during the week.

Mr. and Mrs. Hackman and young son of Calgary, Alberta, were visitors with Mr. and Mrs. James S. Wilson the beginning of the week.

Another landmark is being removed from Sirdar in the removal of the round house, which is in course of debolition at present, the lumber being shipped to Creston by truck.

T. Rogers returned from Nelson on Saturday, where he spent a few days combining business with pleasure.

A. Whitehouse, assistant district engineer, water branch, was a business visitor at Kootenay Landing on Monday.

A truck load of pigs of various ages arrived here for the Borosoto ranch, but owing to the road being soft to the river, these had to be sent Creston on the flats.

Great activity is shown by the haymakers here, in th placing of the three ferries and approaches, used for transporting the loads across the river.

The water guage at Slough bridge registers 5.65 a drop of 1.07 for the week.

Mrs. T. Rogers was a visitor at Creston on Monday.

Mr, and Mrs. R. Blumaneaur and family were visitors at Boswell on Sunday.

Clifford Neil and his cousins, the Misses Rutledge, who are visiting from the east with their uncle and aunt, Mr. and Mrs. C. Neil Kuskanook, were visitors at Creston the latter part of the week.

The construction of the outbuildings for the Sirdar school trustees is completed and Joe Lombardo, the contractor, has secured the flooring job. This is in hand and is expected to be finished in good time for school reopening.

Miss Nettie McCabe, who has been spending part of her summer holidays, the guest of Mr. and Mrs. T. Rogers, returned to her home in Grand Forks last Wednesday. While here Nettie was one of a party who went camping across the lake.

Sirdar motored up to Boswell on Sunday for a game of softball and again returned the victors, by a 17-8 score. Charles Wilson was umpire. Boswell team was at a disadvantage owing to many of their players being out of town, but a return game here is looked forward to.

Alice Siding

Guy Constable returned on Sunday from a few days business visit at Nelson.

Miss Gladys Webster left on Monday for Calgary for a week's visit with her sister, Mrs. H. H. MacDonald, before going to Natal, where she will teach again this year.

Mrs. J. H. Webster got back on Saturday from a six weeks' visit with friends in Vancouver.

School is due to re-open on Tuesday morning with an attendance on a par with last year.

Most of our citizens were at Creston on Saturday getting the usual permit to cut hay on the flats, with starting day fixed for Tuesday, September 5th.

Mr. and Mrs. Wiess of DelBonito, Alberta, who has been looking the valley over with a view to acquiring an orchard property, paid this section a visit the past week.

Mr. and Mrs. MacDonald of Calgary, Alberta, who has been visiting with the latter's parents, Mr. and Mrs. J. H. Webster, left for home at the first of the week.

Word has just been received here of the death, at Spokane, early last month of Mrs. Ned Parker, a former resident of Alice Siding on the Bartholemew and Matthews places—who left here some fifteen years ago to reside at Nelson, later moving to Spokane, where she has been ill for some months past.

In honor of Mrs. McNeil and Mrs. Moul of Vancouver and Mrs. Bill Kelly of Elko, who have been on a visit with their mother, Mrs. John Marshall, the past month, parties have been given at the homes of Mr. and Mrs. R. Stewart as well as the home of their mother, at which dancing was the feature and very enjoyable times were rsported. All the ladies have now left for home. During this visit Mrs. Marshall had the pleasure of entertaining 19 grandchildren.

P. Argyle and N. Husband are at present confined to beds following an auto accident on Satureay night. While returning from Arrow Creek at which point the former had been delivering flour and feed, their car went over the bank inflicting painful injuries to the two but, fortunately Jim Taylor, who was also in the party, was only badly shaken up and was able to come to town for a doctor and a car to bring in the injured.

Lister

Birth—On Auggust 25th, to Mr. and Mrs. Martin Byrne, a daughter.

Rosemary Wolfrum has just arrived from Wynndel on a visit to Lister, and is a guest of Alice Wellspring.

Ernest Stevens nas returned to Trail after a few days' stay with his father, R. Stevens.

Miss Margaret Sinclair is home from a three weeks' holiday visit with Miss Lily Fisher and other Nelson friends.

Col. Lister returned on Sunday from Nelsod, where he spent most of last week attending the sittings of the Waterways Commission.

Most of the German settlers were at Creston on Sunday for the open air mission festival of the Lutheran church, held on the flats south of that town.

Geo. Jacks has pretty well moved his crop of Wealthy apples which have gone out in a few carloads loaded at Creston at the end of the week.

School is due to re-open at 9 a.m. Tuesday, September 5th, and there is promise of quite a large cla s of new beginners.

The trustees have let the contract for a supply of 27 ricks of wood for school use this winter to Frank Dodgson and Douglas Sinclair. Deliveries will commence late in the fall.

John Huscroft this week started alfalfa baling with the new power baler he has recently purchased. He is shipping out four carloads of this feed to the C.M.&S. dairy farm at Marysville, near Kimberley.

Mrs. Knott and Mrs. Jacks and son, Eric, are at Spokane this week, where Eric is consulting an eye specialist.

Wealthy Apples Moving Rapidly

Figure Prominently in Mixed Cars—Six Rolled at Weekend—Tomatoes Coming Slowly—Packers Now Wrapping Pears

Shipping of mixed carloads of fruits and vegetables got off to a good start at the end of the week, both Long, Allan & Long and Creston Co-Operative Fruit Exchange rolling three cars each before midnight on Saturday, and it is hoped the movement will be fully as heavy this week.

The half dozen cars were loaded heavy to Wealthys, each of them carrying about 400 boxes, as local selling concerns are out to clean up this variety before the Okanagan starts shipping McIntosh, which is likely to be around the middle of the month, with no control in sight. Along with the Wealthys the Exchange shipped some Gravenstiens, Transcendant crabapples, Clapp's Favorite pears, cucumbers, peppers and tomatoes. Long, Allan & Long cars were much the same, except they had a few boxes of Bartlett pears.

The weather does not seem to be just right for tomatoes, receipts last week at both housees being lighter than anticipated, and tbeir slow maturity is crippling business as the mixed car specifications require about 150 crates of tomatoes per car.

The Wealthy apples going out are picked with due regard for both size and color, and appear to be giving satisfaction to the jobbers, the half-dozen rolled at the weekend going to the trade at Calgary, Lethbridge, Medicine Hat, Alberta, and Swift Currant, Sask.

At both packing houses a small staff of girls went to work at the first of the week on the wrap of pears. So far the Clapp's have been keeping them busy, but the Bartletts will be coming along in some quantity early next week.

Although newspaper advices from the Okanagan would indicate that the bulk movement of Wealthys is liable to be the more profitable, as yet neither of the local firms have had to resort to the bulk movement to effect sales.

Outside of the commodities moving in mixed cars Bradshaw plums are the only other fruit on the shipping list. With the plum and prune crop 25 per cent. lighter than a year ago, the demand for the e continues good. At the Rodgers box factory the orders coming along for pear boxes would indicate that the estimate of a 10,000 box crop is liable to prove about correct. In view of the reported surplus of boxes on account of last year's very heavy bulk movement, orders for apple boxes would also indicate a crop well up to the revised estimate of 145,500 boxes.

Kitchener

Mrs. Clarence Knowles and children, Marjorie and Florence, of Jaffray, arrived on Thursday on a visit with Mrs. C. Senesael.

Miss Joan Geroux of Moyie is here on a visit with her aunt, Mrs. C. Foisy, arriving on Saturday.

Mr. and Mrs. H. H Redmile, Robert Johnson and Jack Cavanuagh were Moyie visitors on Friday.

Mrs. E. Driffil visited in Creston a few days last week. Mrs. G. A. Young returned with her for the weekend.

Mrs. N. P. Molander and Mrs. C. Senesael were joint hostesses at the latter's home Saturday afternoon at a smart tea in honor of Mrs. A Howard, who has just celebrated her seventy-fourth birthday, at which she was presented with a suitable gift commemorating the happy occasion, and which she suitably acknowledged. The guests were Mesdames B. Johnson, E. Driffil, A. Simpson, G. A. Hunt, L. Nowlin, Chas. Nelson, E Blair, S. Aber, Carl Anderson, John Renzie, F. Molander, G. McPhail, C. Foisy, H. Redmile and Mrs. G. Young of Creston.

Miss Sarah Brett of Canyon, who has been on the Pine Katz softball team all summer, was guest of the club a farewell reception at the home of Mrs. Senesael on Monday evening. Games and contests were played, and there were a number of musical selections, proceedings closing with a dainty midnight lunch. Miss Brett is leaving this week on a two months' holiday visit at prairie points and before lunch was presented with a gift from the Pine Katz girls which she suitably acknowledged. The invited guests Misses Clara Hunt, Beatrice Molander, Edith Nelson, Alta Blair, Myrtle Anderson, Helen Oja, Jean Blair, Hazel McGonegal, and Mrs. J. Hankey and Mrs. C. Foisy.

On Friday Pine Katz softball team motored to Moyie to play the Cranbrook Slaterville team, and were defeated by the narrow margin of 22.21. Kitchener played a wonderful game, not allowing Cranbrook to score until the third inning, and never allowing Cranbrook to take the lead until the final frame, when the winners collected seven runs. Kitchener also had a big last innings but was not enough to overcome the lead taken by Cranbrook in their batting spree. Home runs were made by Nellie Payne (2), and Hazel McGonegal, Mary Abbott and Margaret Torchia one each. Batteries, Pine Katz: Margaret Torchia and Hazel McGonegal; Cranbrook Slaterville: Dora Haley and Teena Williams. The Kitchener players, in addition to the battery were Clara Hunt, Helen Oja, Nellie Payne, Mary Abbott, Alta Blair, Edith Nelson, Beatrice Molander. Spares, Myrtle Anderson, Ruth Hankey, Jean Blair. After the game both teams were entertained by Moyie people at a dance

Dr. Lyle Telford

Everybody Invited

Erickson

G. P. Smith of Chauvin, Alberta, owner of the ranch occupied by Mr. and Mrs. McWilliams, spent a couple of days here at the end of the week.

Mr. and Mrs. H. Langston and family moved into the Martin ranch at the end of the week, and E. Langston, sr., is busy supervising the harvest of the orchard crop.

R Crisier and Ray McKelvey are away at Bull River on a fishing and hunting trip for a couple of weeks.

Mrs. S. Fraser got back on Thursday from a ten-day day holiday visit with friends at Kimberley.

Miss Chapman of Nelson was a Sunday visitor with her father, Fred Chapman.

Mr. and Mrs. Duane of Trail were here at the weekend on a short visit with the latter's mother, Mrs. Speaker. On their return home they are accompanied by Evelyn and Olive Speaker.

Mr. and Mrs. Mensinger, with their granddaughter, Phyllis returned to their home at Vulcan, Alberta, on Tuetday, after a two weeks' vacation with their son, A. G. Mensinger.

Mr. and Mrs. F. Putnam got back on Monday from a couple of days visit with friends at Salmo and Nelson.

Mildred and Bertha Fraser and Carol and Marion Healey, who have been holidaying near Gray Creek, returned home on Thursday last.

Residents of Erickson, as well as many others, will miss the bears that have, for the past couple of years, attracted attention at the Crisler garage. They were shipped to a Calgary, Alta., park last month.

Cranbrook Courier: Miss Marion Heric, of Erickson, is visiting in Cranbrook, the guest of Mrs. Neilly. Miss Heric underwent a critical operation here three years ago, when it was necessary to amputate a limb.

M. Sanford and son, Stanley, of Champion, Alberta, were here for a few days last week, guests of Mr. and Mrs. R. M. Telford. They made the trip by auto and were accompanied by Miss Marcella Sanford, who has been on a visit at Champion and other Alberta points.

Mr. and Mrs. Ed. Martin, accompanied by Miss Ruby and Edward jr., left on Thursday last for their new home near Montreal, Que., and in their departure the Erickson district has lost some well known, progressive and popular citizens The Martins first came to Erickson in 1909, but from 1916 to 1919 they were back at Red Deer, Alberta, in which district Ed. homesteaded in 1899. Since their return 14 years ago they have developed one of the best orchard properties here, have always been active in community effort, and will certainly be missed by a wide circle of friends.

Dyke Repair Work Approved

International Waterways Commission Permits Reclamation Farm Dyke Improvements to Proceed Without Delay.

The outcome of the three-day sitting of the International Waterways Commission at Nelson at the end of the week is that an order has been issued permitting the farmers on the Reclamation farm, through their agent G. L. Salter of Vancouver, trustee for the bankrupt Kootenay Valley Power & Development Company, Limited, to at once proceed with repairs to the old dyke and considerable new dyking that will prevent future flooding of the big 8000-acre farm.

The application by the the West Kootenay Power & Light Company for approval of the construction of their big new dam at Corra Linn, below Nelson, which will raise the low water level of Kootenay Lake a matter of six feet, and which was strenuously objected to by the dyked land farmers and other Idaho interests, will be taken into consideration, but no decision is looked for until March or April.

The Reclamation Farm had fairly smooth sailing, all the interests that might be affected, including Creston Reclamation Company, Limited, and West Kootenay Power and Light Company, not putting forward any objection while the Idaho farmers were quite agreeable to the work proceeding.

In withdrawing the objection of the West Kootenay Power & Light Company their solicitor, R. C. Crowe, pointed out that if the renabilitation was carried out, it would raise the extreme level of the Kootenay river .3 foot on the basis of the 1916 high water, and it was "just one more reasod why something should be done to decrease the flood levels."

In its reports of proceedings the Nelson News says, "A strong objection, however, of which Mr. Lett had had no notice, came to light when a letter from C. C. French of Creston, owner of a tract of 80 acres, over which it is proposed to dyke, was read. He claimed the result of existing work had been to so divert the water that a bridge used by him was taken out during the recent high water, and that the program of the company would flood his land.

It was conceded in discussion that the rights of a private owner could not be infringed, and would have to be protected in any order issued."

Wynndel

Mrs. Mason and son, Wilfred, of Kimberley, were visitors here last week, guests of Mr. and Mrs. W. J. Cooper.

Mrs. R. E. Cornwall and family of Rossland were visitors with the former's parents. Mr. and Mrs. L. A. Davis.

Mr. and Mrs. W. Greig, sr., and Miss Thomas left on Saturd y for Montreal, from which point they will sail on the Montclare for England. They intend making their home in Cornwall.

Miss E. Townson left on Sunday for Winnipeg, Man., on a visit with relatives and friends.

Mr. and Mrs. Boutry and daughter of Bellvue, Alberta, were auto visitors last week, guests of Mr. and Mrs. R. Dalbom.

F. McMullen, who has purchased the H. Sheppard ranch, returned to Winnipeg on Saturday. While here he was a guest of Mr. and Mr. H. A. Bathie. He expects no move his family to the ranch next month.

The home of Mr. and Mrs. A. Martell was the scene of a very enjoyable gathering Wednesday evening last the affair being in honor of Mr. and Mrs. Greig, sr., and Miss Thomas, prior to their departure for England. Bridge was the main feature of the evening, and high scores went to Mr. and Mrs. J. Johnson; consolations prizes to Mr. and Mrs. W. J. Greig, jr. After cards a sumptuous supper was served, the long tables being decorated with gladioli and salipiglosus, and the spacious drawingroom was a profusion of blooms. Assisting the hostess were Misses A. Davis a d Ellen Uri. A presentation of an enlarged group photo of close friends along with an autographed document well endorsed was made to the guests of the evening by Mrs. H. A. Bathie. After the presentation Mrs. Geo. Huscroft favored with a solo to the tune of "Red River Valley," which had been revised to suit this occasion. On behalf of Mrs Greig and Miss Thomas Mr. Greig expressed thanks for the gifts and the staunch fellowship that had been shown them since coming to Wynndel. The guests included Mrs. J. J. Grady, Mr. and Mrs J. Johnson, Mr. and Mrs. W. J. Greig, Mr. and Mrs. Martell, Mr. and Mrs. H A. Bathie and Ned, Mrs. G Huscroft, Mrs. L. A. Davis, Mrs. R. Uri, Mr. and Mrs. W. Greig, jr., F. McMullen, Winnipeg; W. Blair, Kitchener; Misses Margaret and Frances Fugnia, Lethbridge; Mrs. R E. Cornwall, Rossland; Misses Thomas, A. Davis and E. R. Uri.

You will prefer it

Canada As a Leader.

Judged in terms of years, Canada is a very young country, and this fact is brought home to any one who studies the histories of the countries of Europe and Asia. Canada, too, while a country great in area, is of sparse population and in this respect is nowise comparable to the older countries of Asia and Europe, or of the United States.

But during its brief history, Canada and the Canadian people have achieved some truly great things and pioneered in numerous fields which have resulted in conferring outstanding benefits upon all mankind.

Our thoughts are turned in this direction by the centenary of one very notable Canadian achievement. On August 5, 1933, Canadians celebrated the passing of one hundred years since the first vessel crossed the Atlantic Ocean,—any ocean in fact,—steaming the whole way. It was a Canadian vessel, the "Royal William," built at Quebec and launched on April 29, 1831, and with Canadian built machinery except the cranks and shaft, which made this epoch voyage, sailing from Pictou, Nova Scotia, on August 5, 1833, for London, England.

Other vessels had previously crossed the seas using steam to a certain extent, but no other vessel had ever made the voyage with "steam up" all the way. According to an account of this world-famous vessel appearing in the August number of the Canadian Geographical Journal, the "Royal William" actually established seven primary records,—two Canadian records, three foreign records, and two world records.

The "Royal William" was: (1) The first seagoing steamer ever built in Canada; (2) the first steamer that ever plied on intercolonial affairs,—from Quebec to Halifax; (3) the first steamer that ever entered a U.S. harbor under the Union Jack; (4) the first steam transport in Portugal; (5) the first steam man-of-war in Spain; (6) the first vessel in the world that ever fired a shot in action under steam; (7) the first vessel that ever crossed any ocean steaming the whole way.

In celebration of the centenary of this last mentioned achievement the Canadian Government has issued a special commemorative postage stamp which, unquestionably, will be greatly prized by stamp collectors throughout the world, and which will serve to bring to people in all lands knowledge of this great Canadian achievement of one hundred years ago.

This centenary of the "Royal William" also serves to remind one of other outstanding achievements standing to the credit of Canada, young in years as this Dominion is in relation to other nations. Canadians can recall with pride that it was one of their countrymen, Andrew Graham Bell, who invented the telephone, thus giving to the world one of its most useful and widely used means of communication.

It was a Canadian who developed Marquis wheat, the effect of which has been to greatly entend the area of the world's surface in which wheat can be successfully grown, and it has been Canadians who have continued that work and developed still earlier ripening varieties such as Garnet and Reward.

Great in area but small in population and wealth, Canada has built up in the Canadian Pacific Railway the greatest transportation system in the world. There are other great railways, other great steamship companies, other great telegraph, express and hotel companies, but no other company in the world combines all these services to the same extent and with the same world-wide ramifications as does the C.P.R. The inauguration of the Canadian Pacific was a tremendous undertaking for a mere handful of people in an enormous but undeveloped country, and its success is a tribute to Canadian initiative, energy and determination.

A Canadian gave insulin to the world, that wonderful agency of relief to the diabetic sufferers of the world, and which has prolonged the life of thousands of people afflicted with such disease.

Nor is it a small matter that through the efforts of a few millions of people they have made their country, Canada, the fifth trading nation in a world of trading nations, surpassed only by older, much more populous and wealthier nations.

There are many other fields in which Canada, during its brief history, has led the world, but neither time nor space will permit of extending this recital; sufficient has been recorded here to establish the truth that Canadians have reason to entertain great pride in their country and in its achievements. Nay more, that there is evey reason why the people of Canada should have unbounded confidence in the future of their country. All nations throughout the world's history have suffered temporary reverses and setbacks; all have passed through periods of depression and hardship. But where the hearts of the people have been true, where they have not been given over to indulgence and sloth, where they have maintained their virility and strength, where they have been courageous and determined, they have always risen above their troubles and reverses, and gone forward to greater achievements, greater glory, greater prosperity and happiness.

All Canada's past history provides an incentive and encouragement to the Canadian people of today. Opportunity has not ceased to knock at the door of Canada. The future holds more of promise than anything yet realized if our people seize the occasion when "Opportunity" does knock.

Church thieves are busy in Scotland.

Norwegian fishermen caught 49,548,000 codfish this year.

Glasgow, Scotland, will establish a radio patrol police force.

All foreign workers have been prohibited entry into Spain.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unnatural discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 88 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

World's First Black Rose

No Sign Of Shading Appears In Fragrant Petals

Flowering under the watchful eyes of numerous park attendants, the world's first black rose, pride of the great Sangerhausen rosarium, is drawing throngs of visitors to this small Harz town.

The unique flower, the creation of which was recently announced, is a cross between two extremely dark varieties of roses—"Chateau de Clos Vougeot" and "Lord Castlereagh." It is of a velvety deep black-red hue, so dark—especially in dry, hot weather—that it may be described as black. Thet fragrant petals show no shading whatever.

Some 400,000 roses in 9,000 varieties are on display. Most of the credit for this achievement belongs to 80-year-old Professor Ewald Gnau, supervisor of the gardens, who is affectionately known as the "rosenvater" (father of the roses).

SHE LOST 32 lbs.

New Frocks No Longer Worried Her

"How did she lose that 32 lbs. of fat?" is what you will be asking. Let her tell you herself:—

"About 18 months ago I weighed 178 lbs.—which I can assure you annoyed me very much. Everything seemed a worry to me, especially new clothes. Nothing would fit me comfortably, and walking was unbearable. I was advised by a friend to try Kruschen Salts, and I am very glad I did, too. During the first ten months I lost 28 lbs. of fat. Now, for the last 6 months my weight has been 146 lbs., and I feel much better in health. I have all my weight tickets to substantiate my statements."—(Mrs.) M. P.

Kruschen contains those six mineral salts, proportionately balanced, found in the waters of those famous European Spas used by generations of fat people to reduce weight.

Kruschen helps blood, nerves, glands and body organs to function properly—you gain new strength and energy—feel years younger—look better, work better.

Poison Antidote

Discover Effective Medium To Offset Effects Of Carbon Monoxide Poisoning

Discovery of a sulphur-sodium antidote more effective against carbon monoxide poisoning than anything previously known is claimed in a report published in New York by John H. Draize of the University of Wyoming.

The antidote likewise surpasses anything else in effectiveness against cyanide poisoning, he says. He credits the cyanide discovery to B. Foresti, an Italian scientist.

The antidote is sodium tetrathionate, a well known synthetic chemical. Its constituents are sulphur and sodium. Draize used it by intravenous injection on poisoned rabbits.

Has Massive Program

Russia Planned Big Increase In Producion This Year

With the launching of the second Five-Year Plan, Russia has outlined a programme of massive production for this year. For 1933 big increases are planned in agriculture, electricity, coal, oil, iron and other metals, machinery, chemicals and in general manufacturing. Thus, whereas in 1932 about 64,000,000 tons of coal were produced, 84,000,000 are budgeted for this year, and the output of 6,000,000 tons of steel in 1932 is to be increased to nearly 9,000,000 tons. It is also planned to raise the number of cattle from less than 8,000,000 in 1932 to 9,000,000, and that of pigs from 4,000,000 to 5,000,000.

Land For Ships

Considerable backing has been given Australia to the proposal recently made by Dr. Duhig, the Roman Catholic Archbishop of Brisbane, that the mandated territory of New Guinea be handed back to Germany on condition that Germany contribute adequate ships for Australia's defence. Mandates for the former German possessions in the Pacific were divided among Autralia, Japan and New Zealand.

Back taxes are being paid in wood in Carintha, Austria.

Experiments In Taxation

Record Of English History Shows Very Few Things Escaped

There have been many strange experiments in taxation in English history. Henry the Eighth taxed beards, and graduated the tax according to the position of the wearer. The Sheriff of Canterbury was constrained to pay the sum of three shillings and fourpence for the privilege of wearing whiskers. Elizabeth likewise put a similar tax on every beard of over a fortnight's growth. Elizabeth was also bent on making the country of a religious turn of mind, and all who stayed away from church on Sunday rendered themselves liable to a fine. In 1695 it was decided that births should be taxed. The birth of a child to a Duke cost the proud father thirty pounds in taxes, whilst the coming of a commoner child into the world was made the occasion of a tax of two shillings. Bachelors and widowers were compelled to pay for the priviiege of single blessedness. It was William Pitt who instituted the window-tax. In the reign of George the First it was necessary to have a license in order to sell hats. Then there was a tax on hair powder and a tax on watches and clocks. In the reign of George the Third a duty of two shillings and sixpence was imposed on bricks. At a later period in the same reign bricks were divided, for the purpose of taxation, into common and dressed bricks, and the duty on each kind of brick was regulated according to its size.

Paid For Grumbling

Man In England Earns Good Living Finding Fault

A London man earns a living by going round the city finding fault with everything. One day he went into a big tea shop and found that the shape of the teacups they used was clumsy. It was impossible to drink out of them without spilling the tea. So he wrote to the company about it and the cups were changed. He wrote to the London Underground and told them that passengers could alight at a certain station without presenting a ticket. Upon another occasion he saw that a big sign in the West End of the city was not working properly. He told the company owning it that anyone standing on the other side of the street could not read it, and it was changed His job arose from a life-long habit. If ever he saw anything was wrong he used to write to the owner about it. He merely used to do it as a matter of principle, but when he was out of a job he suggested that if his criticisms were of any use he should be paid for them. Now he makes a handsome income from being a grumbler!

Good Crop Of Hay

Thousand Tons Cut At The Pas During Two Weeks

More than 1,000 tons of hay were cut for local use during two weeks in the Carrot River Triangle, all within a 15-mile radius of The Pas, according to estimates made there.

Several outfits have been operating in the area. Hay is good this year. High water did not affect it. It is of better quality than for many years past, haymen say.

A. St. Godard cut 400 tons, Transport Limited 200, and others including Frechette, Allard, as well as settlers of the Carrot River Valley, smaller lots.

The Indians of The Pass reserve have also garnered enough for winter fodder.

LUNCHEON TOMATOES

Two cups cooked tomatoes; ⅔ cup sweetened condensed milk; 2 cups dry bread, broken in pieces; 1 teaspoon salt; ¼ teaspoon pepper; Grated American Cheese. Heat tomatoes to boiling point. Add sweetened condensed milk and stir until well blended. Remove from fire, add bread and seasonings. Cover tightly two minutes. Pour into serving dish, sprinkle generously with grated cheese. Serve at once. Serves six. t

Radium contains a tremendous store of energy. Although it gradually breaks up, only half of a given quantity will disappear in 1,800 years.

Cyclists of New Zealand are to be compelled to observe traffic rules.

Deserves Another

This is what men say when they make the acquaintance of Ogden's fine cut cigarette tobacco.

It rolls more easily—that is the first thing that you discover—then light up, and learn the rest of the good news. Sweeter, more fragrant, mellower—all any smoker could ask in a fine cigarette.

That's why so many men have tried it—liked it—stuck to it. Use Chantecler cigarette papers with it and you will get a still better smoke.

SAVE THE POKER HANDS

Your Pipe Knows Ogden's Cut Plug

Tea Is Old Beverage

Beverage Used Long Before Beginning Of Christian Era

Tea was known long before the beginning of the Christian era, and though by the thirteenth century it was a universal drink in China it was not until nearly four hundred years later that Europe began to hear of tea through the Portuguese and the Dutch. The first Englishman to mention tea was a Mr. Wickham in 1615. He wrote from Japan to a friend asking for three silver porringers from which to drink tea. Tea was first sold publicly in England in 1657. It fetched from 15s. to 50s. a lb. in the leaf. It was also sold in liquid form, made, so the vendor said, according to the directions of the most knowing merchants and travellers in the East. The year 1839 was a date never to be forgotten in the history of the British Empire, for it was the year in which Empire-grown tea was first sold in England.

This Clock Is Different

A bronze lion, twelve feet high, which will roar at noon, and a cock, six feet high, which will crow at sunrise and sunset, are features of a huge new clock erected in Messina, Sicily.

RECOVERY SIGNS ARE NOTED IN BANK REVIEW

Toronto, Ont.—Signs of recovery in Canada are stressed in the current monthly reviews of both the Bank of Nova Scotia and the Bank of Montreal, made public here.

"After a period of almost four years in which the patient chronicler of events has been obliged to record conditions of ever-increasing gloom," stated the Bank of Nova Scotia, "it is with relief that he is at length able to present the reader with the fact of a definite increase in business activity."

Similarly, the Bank of Montreal letter states; "The past month has seen, on the whole, continuance of the favorable trend conscious since the spring; general business is now for the first time this year definitely above the level of the corresponding period of 1932 and this notwithstanding the decided check to the speculative upswing administered during July."

The Bank of Nova Scotia review considers the most significant feature the general rise in commodity prices, and the better equilibrium obtained as between the various groups of prices.

"From a strictly Canadian viewpoint," the letter adds, "the better balance as between the prices of farm products and manufactured goods is especially important. It means, roughly, that what the farmer sells has a greater value in terms of what he buys than was the case say six months ago. This relative improvement should do much to mitigate the unfavorable effects of short grain crops in western Canada."

Ocean Route Possibility

Colonel Lindbergh Has Faith In North Atlantic Air Route

Reykjavik, Iceland. — Colonel Charles A. Lindbergh believes it will be technically possible to establish a north Atlantic air route to Europe within two years.

With good 'planes and experienced pilots, he said, flights will be practicable under any weather conditions, but there is the question whether the route would be feasible financially at present.

Copenhagen, Denmark. — Colonel Charles A. Lindbergh and his wife took off from Eski Fjord, eastern Iceland. It was reported, but not confirmed, that they were bound for the Faroe Islands.

Reduced Fare For Students

Railways Cut Rate For Those Attending Canadian Universities

Montreal, Quebec.—C. P. Riddell, chairman of the Canadian Passenger Association, announced that the Canadian railways propose establishing reduced fare arrangements for teachers and students attending univesities located in Canada. Sale dates of tickets will be from Sept. 1 to Oct. 15 inclusive each year, and the fare will be one and one-third of the regular one-way first class fare.

The return limit will permit the purchaser to return home at the close of the term between May 1 and June 30 of the year following date of issue of ticket.

American Vessel Seized

Victoria, B.C.—Taken into custody by the fisheries patrol vessel "Givenchy" in command of Capt. W. Redford, off the west coast of Vancouver Island while allegedly fishing in Canadian waters, the American halibut vessel "Curlew" of Seattle, and crew of five men, were brought here The seizure was made in the vicinity of San Josef Bay.

No Help Needed

Calgary, Alta.—Due to a combination of poor crop prospects and an ever-increasing influx of jobless from British Columbia, demand for harvest hands in Calgary district at present is the poorest in the history of the provincial government employment bureau, it was stated by employment officials.

W. N. U. 2000

Ship Returns For Repairs

Bay Vessel Delayed Through Leak In Hull

Churchill, Man.—The leak in the hull of the S.S. Sierentz, Dreyfus line, which necessitated the return of the ship to port, was caused by galvanic action, according to W. H. Harling, of Thomas Harling and Sons, shipping agents, Montreal.

The "Sierentz" departed from Churchill, bound for Europe with 265,000 bushels of grain. When the vessel was 60 miles northeast of Churchill, water started to pour into the engine room.

A survey of the ship disclosed a hole about an inch and a half in diameter in the bottom of the steel hull under the engine room. Repairs will be made here. It is not known how long the ship will be in port.

"It was purely a matter of corrosion, the action of water and air on metal," said Mr. Harling, agent for the owners. "It might have happened to any vessel anywhere." There was no ice in the region where the leak sprung.

Find Human Problem

Experts At Grain Conference Interrupted By Pathetic Incident

London, Eng.—Even world wheat conferences have their human episodes.

Technical experts from a dozen countries were gathered in earnest conclave at Canada House discussing plans to permit their peoples to eat better bread.

As they talked, a woebegone man entered the building. He explained he wanted to get back to his wife and six children in Lethbridge, Alta. He had tramped Scotland and back, 900 miles, looking for a job that wasn't there.

A Canada House official took him in hand to see what could be done.

And while the experts talked of granaries bursting with food, the man, a war veteran, wondered where he would get his next square meal.

Carriers Of Infection

Suspects Insects Are Spreading Sleeping Sickness Epidemic

St. Louis.—As the scope of a "sleeping sickness" epidemic in St. Louis widened to include victims in Oklahoma and Kansas, federal, state and city officials concentrated on a story of insects suspected as possible carriers of infection which has been fatal to 22 persons.

Science has been unable to learn much concerning the spread of encephalitis, and never has definitely established the mode of dissemination.

A total of 191 cases of sleeping sickness have been reported in the greater St. Louis area. Four deaths also have been reported at Wichita, Kas., Kansas City, Kas., and Warrensburg, Mo. Cases of the disease have been located at Maryville, Mo., and Muskogee, Okla.

Relief Problem

Five Municipalities In Manitoba In Need Of Assistance

Ottawa, Ont.—Hon. E. A. McPherson, provincial treasurer of Manitoba, conferred here with department of labor officials on a program of relief for southwest Manitoba. An area 30 miles square, embracing five municipalities, was hit this summer for the third year by drouth and grasshoppers, leaving hundreds of farmers destitute.

It was proposed by Manitoba the Dominion administer the dried-out area through the Saskatchewan relief commission, the federal treasury paying the whole cost. No definite reply was made by Hon. Wesley Gordon, minister of labor, but it has been understood here for some time the Dominion has intended closing down the Saskatchewan commission.

Salute For Premier Forbes

Chicago.—A welcoming salute of 19 guns was fired as Prime Minister Forbes of New Zealand arrived in Chicago to visit the World's Fair. He was accompanied by Mrs. Forbes and a party of eight, en route home from the London Economic Conference. They came by way of Canada and will remain two days.

PLANS BETTER WHEAT

Details of an extensive program to improve western wheat crops and thereby raise the premium which Canada obtains on world markets for her grain have been revealed by Dr. L. H. Newman (above) Dominion cerealist. He is at present doing research work in Western Canada.

Gandhi Is Released

Nationalist Leader Breaks Fast With Orange Juice

Poona, India—M. K. Gandhi was unconditionally released from custody by the authorities and shortly thereafter he broke a week's fast with a cup of orange juice.

The Nationalist leader had served only a little more than three weeks of a one-year prison sentence for initiating a new civil disobedience campaign against the government.

Gandhi was very weak and it was believed there were minor complications, but two Poona doctors who examined him said there was no cause for alarm over his condition.

(Gandhi was released from jail under similar circumstances last May 8.)

Gandhi was esting at the home of Lady Vitall das Thackersey, widow of a Bombay merchant, at Parnakuti.

Bandits Captured

Thugs Rob Quebec Bank Of $1,500 and Are Later Apprehended

Ste. Anne Des Plaines, Que.—A posse of citizens pursued and captured two bandits who an hour before had held up the manager of the Banque Provinciale here and robbed the bank of $1,500 after forcing him at the point of a gun to remove his trousers.

The two men entered the bank while R. Lavoie, the manager, was eating his lunch. They forced him to take off his trousers and open the safe. Removing $1,500 in cash from the strong-box, they slugged Lavoie over the head, tied him up in the basement and escaped. Pursuers surrounded the fleeing men. The $1,500 was recovered it was reported.

New Nova Scotia Cabinet

Personnel May Not Be Announced For Some Time

Halifax, N.S.—Although Angus L. Macdonald is not expected to announce the personnel of his new Liberal cabinet for about three weeks, many suggestions are going the rounds as a result of the party's 22 to 8 victory over the Conservative forces in the Nova Scotia elections.

The 43-year-old leader, to become Canada's youngest provincial premier, is expected to take the portfolio of provincial secretary-treasurer.

Dr. J. L. McIsaac, of Antigonish, and Dr, M. E. McGarry, of Inverness, both members of the last legislature, are mentioned for minister of health, and J. A. Macdonald, of Kings, is said to have been promised the portfolio of agriculture.

A. S. MacMillan, who held the highways portfolio in the Armstrong government previous to 1925, is expected to resume that assignment, and Michael Dwyer, Liberal, Cape Breton Centre, seems to be the favorite for minister of public works and mines. The post of attorney-general probably will be filled either by John S. Smiley, K.C., of Cumberland, or J. H. MacQuarrie, Pictou.

Have Right-Of-Way

Pedestrians In Vancouver Favored By Old Law

Vancouver, B.C.—Ordinary pedestrian or "jay-walker" has right-of-way in Vancouver over motor traffic at marked and unmarked points, at controlled or uncontrolled intersections, according to a decision in police court.

Traffic bylaws were designed to give the pedestrians right-of-way at marked intersections except those controlled by signals or police, but an old law prevents prosecution of the pedestrian or "jay-walker" no matter where or when he chooses to cross.

Percy C. Mumbry, as the first motorist charged with failing to give right-of-way, was allowed to go with a warning after paying $2.50 costs.

Conditions In Arctic Good

Major MacBrien States He Found Everything Quite Satisfactory

Ottawa, Ont.—Interviewed here on his return from Winnipeg after an 8,000-mile journey through the northwest which included visits to Great Bear Lake, the Copper Mine, Mackenzie River, Yukon Territory and Alaska, Major-General J. H. MacBrien, commissioner of the Royal Canadian Mounted Police, said he found conditions in the Arctic and sub-Arctic entirely satisfactory.

While at Shingle Point General MacBrien saw the reindeer herd awaiting resumption of its trek to Kittigazuit.

CHINESE WAR LORD INSPECTS BRITISH AIRCRAFT

Marshal Chang Hsueh-Liang, the Chinese War Lord, now visiting England with his sons, paid a visit to the Royal Air Force Station at Higgin Hill, Kent, to inspect aircraft and the establishment. He is shown here with folded arms, accompanied by his son (right), Wing Commander Willcock (left), and Squadron Leader Crowe, watching an air display.

COMMUNISM IS NEWEST TROUBLE FOR CUBANS

Havana.—Soldiers and police were ordered on guard in the streets and parks of the capital after authorities received a eport demonstrations were planned by Communists, the newest trouble of the new Cuban government.

The organization had been denied a permit to parade in observance of the execution of Nicola Sacco and Bartolomeo Vanzetti in the United States six years ago.

Speakers at Communist headquarters harangued an audience of negroes and whites, criticizing the provisional government of President Carlos Manuel De Cespedes, the A B C Secret Society, "Yankee imperialism" and capitalism.

Referring to the overthrow 10 days ago of the Gerardo Machado government, the speakers said: "The victory is not the A B C's. The victory is Labor's and the Communist party's."

Reports from eastern Cuba said United States Ambassador Sumner Welles' activities in mediation of the Cuban political situation were criticized in speeches and that President Carlos Manuel De Cespedes was attacked. Strikes have continued in that region. Employers blamed Communist influence.

Typhoid Fever Epidemic

Toll Of Four Lives Taken In Nunnery In Montreal

Montreal, Que.—Both the milk and water supply at the Mother House of the Sisters of the Congregation of Notre Dame have been tested and found in order and as a result Dr. Seraphin Boucher, director of the Montreal health department announced he was convinced the typhoid fever which has already taken a toll of four lives within the convent and now threatens 26 others, was introduced from an exterior source.

A nun of the order died Wednesday at a Montreal hospital, but she had been ill for many weeks and her disease was not typhoid, Dr. Boucher stated. A check-up in the isolated convent infirmary revealed 26 and not 33 nuns have been definitely diagnosed as suffering from typhoid.

Meanwhile, utmost precautions are being taken to prevent spread of the infection within the convent walls, while special prayers are being said hourly in the convent chapel for the recovery of the ill and for the repose of the dead.

Fine Crop At Peace River

Edmonton, Alta.—One of the greatest crops in the Peace River area will be harvested this year according to Charles Frederick, editor of the Peace River Record. A long cold wet summer followed by most remarkable ripening weather, he said, would result in a record-breaking crop this season.

Recovers From Injuries

Sutton, Ont.—Captain Errol Boyd, trans-Atlantic aeroplane pilot, was fully recovered from slight injuries received when his veteran aeroplane "Columbia" crashed a mile west of here. The Columbia, twice conqueror of the north Atlantic, was damaged to the extent of a broken propellor and crumpled left wing.

Nothing To Say

London, Eng.—Prime Minister R. B. Bennett, chairman o fthe world wheat conference, was asked if he cared to offer any comment on the defeat of the Conservative Government in Nova Scotia. "No," was Mr. Bennett's brief reply.

Work Active At Flin Flon

Flin Flon, Man.—More than half a million tons of ore will be loosened in the open pit of the Flin Flon mine when 150 tons of dynamite are fired in September, according to Mine Superintendent M. A. Roche.

Movie Strike Called Off

Washington.—The United States labor board announced that the strike of moving picture sound men had been called off and all striking employes would return to work immediately.

According to official announcement made at Victoria on Wednesday B.C's general election will be held on Thursday, November 2nd, with nominations three weeks earlier.

Mrs. Wells of Winnipeg, who has spent the past three weeks here with her brother and sister-in-law, Mr. and Mrs. M. J. Boyd, left on Wednesday for the Manitoba capital, and later will go on to eastern Canada, where she will probably spend the winter.

WANTED—Do you want to earn $30? If so, enquire Review office.

The big forest fire that has been raging in the Yahk section for the past two weeks is now under control, with the fighting crew reduced to about 40 men. At one time 185 men were employed, 100 of whom were from the U.S. side, with the local forester, J. P. MacDonald, directing operations.

The weather of the past week has been much cooler. Rain was in evidence Tuesday night and again on Wednesday night and Thnrsday morning, which will still further delay the already late haying season.

Creston local of the C.C.F. are having another rally at which the speaker will be Dr. Lyle Telford of Vancouver, one of the foremost workers of the federation in B.C. The gathering is at 8 p.m., Thursday, September 7th, in the United Church basement.

Col. Allan of Nelson, the district forester, was a visitor here on Saturday, in connection with the issuing of permits to cut hay on the flats at both Creston and Wynndel and was accompanied by H. E. Dronsfield, of the forestry office clerical staff, Nelson.

Hay cutting permits were issued at Wynndel and Creston on Friday and Saturday last when licenses to cut well over 1200 tons were given out, but it is not expecteo the total cut will run that high unless exceptionally fine weather materializes all this month.

Creston is lineing up a strong aggregation for the baseball tournament at Fernie on Labor Day, in defense of the Crows Nest Pass championship cup. Teams are already entered from Kimberley, Hosmer, Fernie, with Coleman, Alberta, and Eureka, Montana, still to be heard from.

The front of the former Imperial Groceteria building is much improved by a new coat of paint, looking nifty in its dress of sand color with a deep brown trim. The property is now owned by West Kootenay Power and Light Company, who will be opening out their sales depot in a few days.

LAND FOR SALE—Erickson land, adjoining siding. Block 31, 6 acres, $350; only $120 first payment. Block 32, 10 acres, $350, same terms; or both for $650—$250 down and balance in ten months—or $600 all cash secures title with last year's taxes paid. Capt. C. O. Peters, Miami, Fla., U.S.A.

Services at St Paul's Lutheran Church are all held in the morning now, in the following order: Sunday school at 9.45, English service at 10.30. German service at 11.30. Everybody is welcome at any of these services. On the third Sunday of every month services are dropped while the pastor is away at Kimberley.

Mrs. E. M. Warren, who leaves Creston shortly, was guest of honor at a reception tendered her by Creston and District Women's Institute at the home of the president, Mrs. C. F. Hayes, Wednesday evening, at which there was a large turnout of institute memders. Bridge was the main feature of the affair with the high score going to Mrs. H. W. McLaren. Previous to lunch being served Mrs. Warren was presented with a suitable gift, which she feelingly acknowledged. The guest of the evening has been active in Insti ute work since coming to Creston and will be greatly missed by all.

Dan O'Neil had the ill fortune to lose his residence and all its contents by fire at an early hour Wednesday morning. The O'Neil home is on the mission road about a mile south of Creston and the fire is a mysterious one. It would appear that petty thieving has been somewhat common in that section, with a decided preference for poultry, and in order to safeguard their flock the O'Neils have of late been sleeping in a tent, and about 5 a.m., Wednesday, were awakened to find their home in flames, with the fire so completely out of ontrol that it was impossible to save anything. It is understood no insurance was carried.

An important change in the business district takes place this morning when the agency for the Shell Oil Company will be taken over by W. R. Long of Erickson. Commencing on September 1st the Shell business at Creston is put on an agency business instead of being handled directly by the company, who have had W. H. Fortin as their local manager since the company established at Creston about four years ago. Mr. Fortin will be remaining for about ten days in order to acquaint the new owner with the work. Mr. Long, who is actively identified with the fruit shipping firm of Long, Allan & Long, Limited, will, for the present, have R. M. Chandler as his assistant, Dick taking charge of deliveries and office work.

Lutheran Mission Festival

Creston and district Lutherans were favored with ideal weather for their annual Mission Festival last Sunday. This was, perhaps, one reason for the unusually large crowd gathered on the old Mission road. Local Lutherans were out in gratifying numbers and representatives were present from such points as Kimberley and Nelson. The feature of the day was Rev. C. C. Janzow's mission sermons. In the German morning service he defined he church's work in this last era of the world. In the afternoon English sermon the speaker urged his hearers to pray for the cause of Christian missions on the text: Luke 10,2. He called attention to the fact that all the great missionaries, beginning with Paul, had been men of prayer. The speaker's earnest words were very thought-provoking. After the morning service all gathered in friendly groups for the lunch the ladies had brought. Coffee and lemonaee were served on the grounds. Many also ate their supper at the picnic grounds.

Canyon City

Kennard and F. Knott of Canyon, A. Barnhardt of Glenlilly and A. E. Penson of Erickson ieft tnis week for the Radium hot springs, for a short holiday.

The August tea of the Ladies' Hospital Auxiliary was at the home of Mrs C. Blair on Thursday afternoon, and was unusually well attended

Mr. and Mrs. Ward and family, who have been occupying the house on Mrs. Strong's ranch, left this week for their new home at Arrow Creek.

Mrs. E. Langston and three children, who have been holidaying with her parents, Mr. and Mrs. A. Halstead, left this week for their home at Coalhurst, Alberta.

Mr. and Mrs. Bob Clayton and children of Kimberley were here at the weekend, on a visit with his parents, Mr. and Mrs. Matt. Claytnn.

Misses Agnes and Helen Johnson are visitors at Yahk, at the home of Mr. and Mrs. Petersen.

Miss Haslam of of Cardston, Alberta, is a Canyon visitor this month, a guest of Mr. and Mrs. Gartland.

Glen Messinger and son, Glen, left a few days ago for the old home in North Dakota, where his mother is seriously ill.

Mr. and Mrs. W. H. Kolthammer and family got back at the end of the week from a ten-day holiday visit with Rev. and Mrs. R. E. Cribb, at Kimberley.

Canyon can no longer boast of flag station accommodation at thesiding. This week a wrecking crew has been at work and have the station loaded on a flat car ready to move to a new location. It has done duty here since 1912, when it was shipped in from McNeillie siding.

The Farmer's Institute have the September meeting at the home of A. A. Bond on Saturday night.

Arvid Samuelson has been busy for some days past on a truck haul of cedar poles to the Cranbrook section where they are being used in a new line being put in by Kootenay Telephone Company.

The Wealthy apple crop along with the Transendant crabs are just about all harvested and have been shipped in the mixed cars already rolled by the Fxchange and Long, Allan & Long, Limited. Bartlett pears will be on the move before the week is out.

Mrs Grover Kifer and young daughter of Canal Flats, are here on a visit at the home of her father, A. G. Samuelson, and will be remaining for some time, as the C.P.R. is shifting the mill at that point to a new location, where as yet there is no accommodation for the married employees.

Mrs. M. LeGrandeau, nee Myrtle Wickholm, whose marriage took place earlier in August, was guest of honor at a shower at the community hall on Wednesday evening last which was largely attended and proved a great social success. The hostesses of the evening were Mrs. Roy Browell, Mrs. T. LaBelle, Mrs. W. Cook and Mrs. McRobb. The decorative scheme was pink and white, and the features were a musical programme, followed by a dance, and a tasty lunch. Those taking part in the musical exercises were Mr. and Mrs. Kolthammer, Misses Holly Bond and Frances Knott and Messrs. T. Mawson and L. Moberg. Mrs. LeGrandeau was remembered with a large number of useful gifts, which she suitably acknowledged.

WORLD HAPPENINGS BRIEFLY TOLD

Russia had a favorable balance of trade for the first six months of 1933 —for the first time since 1929.

Gold held by the Minister of Finance on July 31 was $71,929,298 or $601,832 in excess of staturory requirements. Dominion notes in circulation totalled $182,113,558.

Twenty million feet of British Columbia lumber have left for world markets. Three-quarters of it is destined for China on the Dominion-subsidized service.

High import duties and other emergency measures will be continued as part of the Italian government's program to maintain a sound internal wheat market, Premier Mussolini has announced.

Raymond Poincare, France's war president, was serenaded by the town band while he received felicitations from neighbors in a quiet celebration of his 73rd birthday at his summer estate at Sampigny, France.

Caught in full foliage by a surprise snowstorm on August 21, trees were broken and flower gardens ruined at Butte, Montana. The maximum temperature for the day was 44 and the minimum 31.

Captain William J. Webber, 65, steward at Rideau Hall during the term of Earl Grey as governor-general, and for many years on the staff of the Dominion archives, died recently at his home in Ottawa.

New cosmic ray studies announced by Dr. Robert A. Millikan, of New York, indicate these rays constitute a power-house of energy from 30 to 300 times greater than all the rest of the radiant energy in the universe.

One of the men who discovered the route to Klondyke gold fields via Great Slave Lake and Yukon River, Robert Hogarth Milvain, 70, is dead at his home in Snowshill, England, according to word reaching Calgary. He was a pioneer resident of Calgary, locating there in 1886 to become a noted horseman and polo player.

Fragment Of First Cable

Fisherman Brings Up Piece Of Line Laid In 1855

While hauling his trawls off Cape Ray recently a fisherman dragged up from the ocean floor a fragment of the first submarine telegraph cable used in American waters. It was a piece of the line laid in 1855 by Professor Samuel Morse and Cyrus W. Field between Aspey Bay, Cape Breton, and Cape Ray. The cable was manufactured in England, the first stranded conductor ever made. Despite its long immersion, the insulation retained its odor of gutta percha. Until 1866 the eastern extremity of telegraphic communication was Cape Race. Off that point westbound ocean liners dropped overboard canisters containing European newspapers and dispatches and telegrams from passengers. A boat was always stationed there to pick up canisters. Newspaper men condensed the dispatches and put them on the wire, bringing news of world events to New York ahead of the steamships.

Speeding Up Mail

Fast 'Plane Is Undergoing Final Tests In England

Speedy mail 'plane which can fly at 200 miles an hour, is undergoing final tests in England. It is fitted with special apparatus for dropping and picking up mails while in flight, and in all 40,000 letters, weighing half-a-ton, can be carried. These could be flown from London to Capetown in 48 hours and from London to every country in Europe, with the exception of Turkey and Greece, in less than seven hours.

Knit Own Wool Blankets

The low price which Canadian farmers' wives receive for their wool has introduced the knitted blanket to Manitoba farm homes. The Manitoba Handicrafts Guild has shown them how to knit blankets from the raw wool pulled out into loose, thick strands.

Small mine owners in Bolivia find it difficult to get workers.

Aluminum Ore Found

Discovery Is Reported To Be First In Canada

Discovery in the Kinistino district of a great body of aluminum ore-bearing clay has been reported to the government by Dr. David Flood, geologist, who has spent six years investigating in the north country. He states that the discovery is one of the most important to have been made in the history of the province.

Early development of the area, which lies five miles northeast of Kinistino is forecast by Dr. Flood, who has made a full report to the government on his find.

The discovery also means, according to the geologist, the earlier development of the hydro-electric project east of Prince Albert, the proposed site of which is just 12 miles from the ore-bearing clay.

This is the first discovery of its kind in Canada, Mr. Flood said. There is a small deposit of aluminum in Arkansas, but the bulk of the world supply comes from British Guiana.

Dr. Flood, who is a native of Sweden, also touched upon the other mineral possibilities of Northern Saskatchewan and states that North Saskatchewan would one day produce gold, silver and nickel. He found them all, he declared, in his wanderings as chief geologist for a big syndicate.

Recipes For This Week

(By Betty Barclay)

EMERALD ECHO SALAD

1 package lime-flavored gelatin.
1 pint warm water.
¾ cup canned crushed pineapple, drained.
3 tablespoons pimiento, cut in strips.

Dissolve gelatin in warm water. Pour ½-inch layer in loaf pan. Chill until firm. Chill remaining gelatin mixture until cold and syrupy. Place in bowl of cracked ice or ice water and whip with rotary egg beater, until fluffy and thick like whipped cream. Fold in pineapple and pimiento. Pour over firm first layer. Chill until firm. Unmold on crisp lettuce or chicory. Serve with mayonnaise. Serves 8.

CORN SOUFFLE

Mix in a saucepan two tablespoons of flour with one tablespoon melted butter. Pour in slowly one cup of milk. Bring to the boiling point. Add one can of corn, one teaspoon sugar, one teaspoon salt, pepper to taste, and the well-beaten yolks of two eggs. Fold in the whites of the eggs, beaten stiff. Then turn into a buttered baking dish, and bake for thirty minutes in a moderate oven. Serve immediately.

Checking Up On Wild Fowl

United States Naturalist Makes Tour Of North Land

No estimate of the prospects awaiting local nimrods was forthcoming from Luther J. Goldman, field naturalist and biologist of the United States Department of Agriculture, who was in Prince Albert recently.

Mr. Goldman has been making an extensive trip studying migratory fowl conditions on behalf of his department.

"The vast areas of Canada's northland of which, because of its nature, we have only scratched the surface, forbids any estimate of increase or decrease in the number of ducks year by year," said the investigator.

The drouth conditions of the south, which have driven the birds from usual nesting places, will also have its effect on this year's duck breeding, thought Mr. Goldman.

Leaving California in June, Mr. Goldman has travelled over a large area including the southern portion of Alberta and Saskatchewan, then on into the north. He now expects to swing into northern Manitoba, then on to eastern Canada, and back to the States, where he will report on conditions prevailing in Canada which information is used by the United States department in setting the bag and time limits for the open season.

Linoleum does not have to be scrubbed so often if varnished or shellacked, then waxed.

AN EXCEEDINGLY WEARABLE DRESS

All you have to decide is the color.

Whether you want a dress for street, afternoons, or office wear, here's your number.

For town and office wear, it looks so smart and trim in light navy blue crepe silk. And it takes but ⅝ yards of 39-inch material for the 36-inch bust.

Prints in crepe silk in blue and white or in red and white are stunning too.

For afternoons, grey or beige crepe silk is especially nice.

Note the chic sleeve detail to give the fashionable wider shoulder line. And the bias seaming that makes the bodice "fitting."

It's a very simple model to make. There are so few major parts to the pattern.

Style No. 749 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Lays Foundation Of Fortune

Indiana Man Plants Walnut Trees As Legacy For Daughter

By planting, in his spare time, 14,000 walnut trees on 29 acres of cut-over land, J. E. Lemmon, of Washington, Indiana, has laid the foundation of a fortune for his young daughter.

In 40 years, according to the national forestry department, 8,000 of the trees should have survived and reached maturity. They will be worth, at present low prices, $160,000 as timber wood. Should the daughter wish to keep them, they should in 40 years be producing an average of one bushel of nuts each which at $1 per bushel will give her an annual $8,000 income.

Not To Be Caught

The company promoter was trying to raise capital for a new scheme.

"I'm telling you," he said to a financier, "it will make gigantic strides later on. Just now, of course, it's only in its infancy."

"Perhaps," replied the financier; "but I'm not in mine."

Wonderful models of aeroplanes used for official tests are made by a Reading, England, man in his kitchen.

SUNDAY SCHOOL LESSON

SEPTEMBER 3

DAVID

Golden Text: "Man looketh on the outward appearance, but Jehovah looketh on the heart."—1 Samuel 16.7.

Lesson: 1 Samuel 16:1-13; Psalm 78:70-72.

Devotional Reading: Psalm 101:1-8.

Explanations and Comments

Samuel's Mission To Bethelehem, verses 1-3.—Saul's failure caused Samuel sorrow. He realized that he must take definite action about Saul's successor, that this was God's will. He must go to Bethlehem with a flask (horn filled with oil) to anoint one of the sons of Jesse as the Lord's chosen king. Yet he hesitated to go. Would not Saul kill him if the fact became known? Then a way out of the difficulty came to his mind; as a matter of prudence he would give as the object of his visit the holding of sacrifice, and would keep silent about the more important reason for his coming. He would give one reason for his visit, which was a true one, and would say nothing about another reason, which he was under no obligation to divulge.

"It was not concealment the object of which was to mislead any one, or to induce anyone to do what he would not have done had the whole truth been known to him. When concealment is practiced in order to take an unfair advantage of any one, or to secure an unworthy advantage over him, it is detestable. But to conceal what you are under no obligation to reveal, when some important end is to be gained, is quite a different thing."—W. G. Blake.

"A man always is to be himself the judge of how much of his mind he will show to other men. There are impertinent inquiries made; your rule is, to leave the inquirer uninformed on that matter; not, if you can help it, misinformed but precisely as dark as he was."—Carlyle.

Samuel's Reception In Bethlehem, verses 4, 5.—When Samuel reached Bethlehem the elders of the city came to meet him trembling, and said, "Comest thou peaceably?" It had been Samuel's duty as judge to go from town to town to render judgment and punish offenders (1 Sam. 7:16), and the elders feared he had come to their town for that purpose. Samuel reassured them when he said: "I am come to sacrifice unto Jehovah; sanctify yourself, and come with me to the sacrifice." Before participating in any sacred act the Israelite "sanctified himself" by ablutions and by refraining from whatever would make him ceremonially unclean. Samuel himself superintended the purification of Jesse and his sons, and called them to the sacrifice. Jesse was now an old man, 1 Sam. 17:12.

The Selection Of The King, verses 6-12.—When they came to the sacrifice feast, Samuel looked upon Eliab and said to himself, "Surely Jehovah's anointed is before me." But Jehovah spoke to Samuel, we are told. The voice was an inward one. The prophet is described as carrying on in the depths of his conscience a dialogue with God, as the sons of Jesse, one after another, passed before him. Eliab was another Saul, tall and handsome, and the voice within Samuel's soul warned him. "Look not on his countenance, or on the height of his stature," it said: because I have rejected him; for Jehovah seeth not as man seeth; for man looketh on the outward appearance, but Jehovah looketh on the heart."

"An apple may look fair to the eye —quite red and ripe, and yet it may be full of rottenness within; so, on the other hand, the fruit may be brown, and flecked with spots, and burrowed into by wasps in search of its sweetness, but if we cut it open, and find it sweet in its substance and sound to the core, it is good. It is just the same with man in relation to his God." Man judges by seeing; Jehovah, by being. What thou art before thy God, that thou art and nothing more!

Abinadab, Shammah and four more of Jesse's sons passed before Samuel, and he rejected them all. "Are these all thy children?" he asked Jesse. On learning that the youngest was away keeping the sheep, Samuel ordered him sent for, declaring that they would not sit down to the feast which followed the sacrifice until he arrived. And Jesse sent for David.

David appeared—ruddy (this means either he had red cheeks or that his hair was auburn), and withal of a beautiful countenance, and Samuel knew at once that he was the chosen one.

"In the hour of David's anointing it dawned upon him that his was a selected life—that he was set apart for an unusual destiny; what thought is greater than this to a soul that is noble?"—C. C. Hall.

Calf Was Good Swimmer

Two of a load of calves being transported by truck across Montreal's harbor front recently escaped from the truck. One struck off through the city and was soon caught, but the other headed for the river and, swimming downstream had gone nearly a mile before being lassooed and brought to shore in a fast motorboat.

Canada A Healthy Nation

Bulletin Of Life Insurance Company Gives Interesting Facts

The lowest mortality on record was registered for the first six months of 1933 among nearly 1,250,000 Canadian industrial policyholders of the Metropolitan Life Insurance Company and the prospect of a new minimum death rate being established in Canada in 1933 is considered excellent.

The death rate for all causes combined among this group of Canadians is 4.6 per cent. lower than for the first half of last year. Canadians are making a better health record this year than are United States industrial policyholders, for the death rate of the latter is running well over three per cent. higher than for the first six months of 1932.

Reductions among Canadian policyholders from previous low points for diseases of major interest, according to the insurance company's statistical bulletin, are as follows: diphtheria, 57 per cent.; tuberculosis, 1.6 per cent.; diarrheal conditions, 17 per cent.; typhoid fever, 57 per cent.; and measles, 12 per cent.

Pointing out a number of decided contrasts in the course of the death rates from important diseases this year in Canada and the United States, the bulletin says:

"The mortality from diabetes, which had been steadily rising in both countries for years, has recorded a considerable drop in Canada; in the United States the marked upward trend is still persisting.

The heart disease death rate is unchanged this year in Canada, whereas in the United States cardiac conditions have been responsible for many more deaths than in the like part of 1932.

"The cancer mortality rate has risen only negligibly in Canada; but it has come up appreciably in the United States. Deaths from pneumonia, on the other hand, have increased a little in Canada as compared with a pronounced drop in the United States to a new low point."

An Underground Farm

Mushrooms To Be Grown In Famous English Caves

England may soon have its first agricultural industry to be conducted 120 feet below ground. If experiments now under way are successful, the famous Chislehurst Caves, near Bromley, will be converted into the greatest mushroom growing centre in the country. The British Mushroom Company has been started to farm the caves. W. E. Masters, one of the principals, said: "The caves are ideal for growing mushrooms, which need darkness and an even temperature. Several miles of the tunnels will at first be under cultivation." Chislehurst Caves are among the most famous in the world. The remains of a prehistoric monster, which archaeologists believe to be 200,000 years old, are embedded in the rock.

Preventing Silver Waste

Loss In U.S. Runs To Thousands Of Dollars Annually

Science is endeavoring to find some convenient way to recover the one hundred tons of silver that is annually dissolved away in developing photographs in the United States. The value of the metal at current prices is nearly $800,000. Experiments by research workers indicate that the process of electrolysis proves more efficient than the other methods. Electrolytic methods employed at one large film studio saved $17,000 in six months Twelve hundred troy ounces of silver could be regained from every million feet of film developed.

A Minor Complaint

Mrs. Alva Johnson of Oklahoma City has asked for a divorce from her husband. The court asked her on what grounds she desired to lay the charge, and the lady replied that she had no particular complaint against him only he had not been home since 1920.

Thirty-three thousand, three hundred and seven sheep, 22,871 cattle, 162,248 hogs, and 82 calves were shipped from western to eastern Canada during the first twenty-four weeks of this year.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Jorette," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means, but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends. After taking her home, Peter resolves not to take Camilla out again, because of the expense. He is only a struggling artist. Camilla wonders why he did not ask her to go out again. In school they are cool to one another, and for a few days things go badly between them until he again meets her sitting in the park.

(Now Go On With the Story)

CHAPTER VI.

Camilla's shy smile was like an appeal to Peter to understand everything she knew and didn't know about herself. Some instinct told him that she needed him, yet he feared to remain. He glanced away through the lacy green of new leaves toward the glistening white walls of the museum.

"I live pretty much around here, day and night. You know I teach a beginner's class over there three evenings a week."

"Oh, do you?" her eager face lightened. "Then, that is why I haven't seen you, isn't it?"

"Yes, I've been—pretty busy," his words stumbled awkwardly. "I can't keep late hours often with so many responsibilities."

Then I shouldn't have kept you out late on Tuesday night," remorsefully.

"Oh, once in a while can't hurt me," he laughed, "and it's not that I can't stand the pace, but the profs won't stand for it."

"I'm sorry. Did you get razzed about Tuesday?"

"Oh, no."

"Why didn't you tell me you had classes of your own? I shouldn't have suggested—"

"We had a good time, didn't we?"

"Wonderful! Did you?"

"Best in my life!" he declared.

"Then—you haven't—avoided me because you were angry with me?" hesitantly.

"Of course not! And I haven't tried to avoid you," he prevaricated. "What made you think that?"

"Well," her eyes followed the toe of her slipper as it drew imaginary lines in the grass, "you didn't call again, or ask to see me."

"But I wanted to," the words were impulsive, and spoken before he knew it.

She looked up at him again with shining eyes. "Then it's all right," she said softly.

"You really cared that I didn't call on you?"

"Yes, very much."

"I'm sorry," he said gently. "I should have 'phoned you, even if I was busy."

"And please don't think you have to take me places that keep you out late, just to see me." She forfeited her last ounce of pride in a final desperate appeal.

"What could we do, then?"

"Why—we might sit here and just talk, or you could come to my house—"

"I'd prefer it here."

"So should I."

He wondered if he could be dreaming. Could it be possible that Camilla Hoyt preferred to come and sit in the park with him, to the society of her friends and their favorite haunts? "Do you mean that you would like to come here—and talk with me—sometimes?"

"Any time. I often come here and sit alone in the evening. I never knew, though, that you were teaching over there, so near me."

"And I never knew you were so near, either. Will you be here, tonight?"

"Do you want me to be?"

"Very much. I'll be finished at nine o'clock."

"Then I'll be here," she promised.

They walked on together to the parkway and separated happily in anticipation of the evening. Peter tried to reprove himself for what he had done. He had resolved that the only way to manage his attraction for Camilla was to forget her and stay away from her. It would be a long time before he could forget — probably he never could—but he had been determined not to see her alone again. Now, he had yielded again. But what could he do, when a girl who could go anywhere with anyone she chose declared that she preferred to sit and talk with him in the park? More than that — when he longed with an intense and twisting ache to be with her every moment that was possible.

He found her there as she had said she would be, when he hurried away from his class that evening. As he approached she arose and went slowly to meet him. She wore white—a soft woolly white jacket, of which the collar snuggled closely against her black hair. The night was breeze-cool. She was bareheaded, and the black hair in the depths of the white collar was like the blackness of her eyes in the depths of her white face. Her gayety was wistful, he thought, as she greeted him.

"You didn't expect I would be here," she challenged.

"I hoped you would be," he assured her.

"I've been here all the time you were teaching your class. It seemed a long time."

"It's about the longest hour I ever had," he confessed.

"Shall we walk a little? It's a marvelous night, isn't it?"

"Perfect. I like to walk around here at night. It all seems so different than in the daylight. Did you ever feel like that—as if a place that is very familiar to you in the day were a different place at night?"

"Yes, I've thought that, too. It's something like the difference between the way people appear to be and the way they are, isn't it?"

"Why," he exclaimed with surprise, "you funny little thing! I never knew you could be so serious."

"You see, I am like this park by day and by night—a dual personality. You know the me who sketches poorly in Professor Drake's class, but you don't know the me who comes to sit alone in the park and try to think things out."

"I like both of you." His voice was deeply tender with the effort of suppressed emotion.

"But you don't know either of me," she objected, holding up her finger in a warning gesture.

"Perhaps better than you think."

"But you must not like me very much."

He felt reprimanded for his boldness. "I know. I shouldn't be so presuming. But I wonder why you came here tonight to meet me."

"Because I have to tell you something that I want you to know about me. I just can't go on letting you think I'm—"

"Are you sure that you should tell me anything about yourself?" he interrupted hastily. "I shouldn't want you to tell me something you might regret later."

"You are not interested. You don't want to listen?"

"Of course," he assured her earnestly. "That is just the trouble. I am too interested in you. I have been, ever since the first day I saw you in Drake's class. I'll always remember the minute you walked into that room," he reminisced with pleasure. "You have been in my thoughts ever since."

She sighed softly. "I know. That is why I have to tell you about me. So that you can forget, too."

His heart beat quickly with fearful apprehension. Was she going to tell him that she was engaged to marry some other fellow in her price class? Probably. But she didn't act very happy about it. And why should she tell him—for sympathy? Was it possible that, even yet, girls were compelled to marry men they did not love because someone else expected them to? It sounded like medieval history of a fairy tale.

"Well, if telling me about yourself can help you any and make me forget, too, I'll listen to you," Peter finally consented.

"Let's go back to the bench where we first talked," Camilla suggested. "Perhaps the lilacs will help me to say what I have to tell you."

They walked back along the path in silence. He was mystified, but it was exquisite to be there with her in the sweet spring night with a new crescent moon filtering its light upon them through the gossamer filigree of new foliage. He knew that nothing she could tell him about herself would make him forget her, ever. And his heart was bitter with the thought that fate had arranged that she must belong to someone else. He hadn't realized until now how much a part of his ambition she had become. Why! what was the good of any of the rest of it, after all, if he couldn't have Camilla?

(To Be Continued).

He found her there as she had said she would be.

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It steadies the nerves . . . makes you eat better . . . sleep better . . . relieves periodic headache and backache . . . makes trying days endurable.

If you are not as well as you want to be, give this medicine a chance to help you. Get a bottle from your druggist today.

ROYAL YEAST CAKES

the best dry yeast for home baking . . .

Try this Easy-to-Make Recipe for FORM CAKE

Cream ¼ cup sugar with ¼ cup butter. Add to 1 beaten egg and beat until light. Add 1 cup lukewarm milk. Stir well. Add 1 cup Royal Yeast Sponge*, ¼ cup citron, ¼ cup raisins, ¼ cup chopped almonds, ¼ teaspoon salt, and enough flour to make soft dough (about 4 cups). Knead well. Cover and set aside in warm place free from draughts to rise until double in bulk (about 1½ hours). Knead down and place in well-greased tube pan. Brush top with egg and bake in moderate oven about 45 min.

*ROYAL YEAST SPONGE:

Soak 1 Royal Yeast Cake in ½ pint lukewarm water for 15 minutes. Dissolve 1 tablespoon sugar in ½ pint milk. Add to dissolved yeast cake. Add 1 quart bread flour. Beat thoroughly. Cover and let rise overnight to double in bulk, in warm place free from draughts. Makes 5 to 6 cups of batter.

BUY MADE-IN-CANADA GOODS

ROYAL YEAST CAKES have been the standard for over 50 years. Keep a supply on hand to use when you bake at home. Sealed in air-tight waxed paper they keep fresh for months. And get your copy of the ROYAL YEAST BAKE BOOK containing 23 practical, tested recipes for delicious breads. Address Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Our free booklet, "The Royal Road to Better Health," tells how Royal Yeast Cakes will improve your health; and suggests pleasant ways to take them.

Little Helps For This Week

"I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you an expected end."—Jeretmiah 29.2.

Thy thoughts are good, and Thou art kind,
E'en when we think it not;
How many an anxious faithless mind
Sits grieving o'er its lot,
And frets and pines by day and night,
As though God lost it out of sight,
And all its wants forgot.

P. Gerhardt.

You should never complain of your birth, your training, your work, your hardships, never to think you could be something if only you had a different lot or sphere assigned you. For God understands His own plan, and He knows what you want a good deal better than you do. The very things you most deprecate as fatal limitations or obstructions, are probably what you most need. What you call hindrances, obstacles, and discouragements, are probably God's opportunities. Bring down your soul, or rather bring it up to receive God's will and do His work, under your cloud of obscurity, against your temptations, and then you shall find your condition is never opposed to your good, but really consistent with it.—H. Bushnell.

By a new law Spain will establish settlers on expropriated lands.

Rush Of Pilgrims To Wishing Well In Scotland

Strong denunciation by Highland ministers and the recent campaign by the Sabbath Observance Association against the famous Wishing Well at Culloden, in Scotland, has resulted in a rush of pilgrims to the well, which is the greatest in its history. Thousands are dropping coins into the water and making a wish. Some, according to ancient practice, tie a piece of cloth to nearby trees, and these are now almost covered with tiny piecets of textiles. The money dropped into the well is recovered and donated to charities, which are getting record amounts.

Homes Receive Profit

Profits received from the sale of the phonograph record of the inaugural speech of the King at the opening of the World's Monetary and Economic Conference, have been designated by His Majesty to Dr. Barnardo's Homes.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists. 43

You Can Afford New Creamed Dishes Every Day When You Use

ST. CHARLES MILK

Use Borden's St. Charles Milk —you will find it economical, convenient and wonderfully handy for making delicious creamed dishes. Every time you use it, you and your family will notice the improved flavor of your cooking. Use it whenever a recipe calls for milk.

Appleford PAPER PRODUCTS HAMILTON, ONTARIO

"I depend so much on my telephone"

"I've come to depend so much on my telephone," said Mrs. Cranthorpe. "When I need things from the grocer's or the drug store, its so easy to call and have them sent. When I'm feeling a bit lonely I can always call someone for a friendly chat, and, you know, most invitations come by telephone nowadays.

"And that time when Harriet was burned—it was a telephone call that brought the doctor so quickly.

"Yes, my telephone does so many things for me. I certainly wouldn't want to be without it."

CRESTON, B.C., FRIDAY, SEPT. 1

No Controlled Market

Three or four weeks ago, when selling agencies in the Okanagan were holding conferences that seemed to get nowhere in an endeavor to establish some plan of controlling 1933 marketing, the Review ventured the guess that there was little hope of any agreement until the shippers had a taste of uncontrolled selling of the Wealthys.

Up till this week there was a ray of hope that a slaughter of the Wealthys might be avoided by the formation of a jobber-controlled marketing plan, but now that has gone by the board and Okanagan papers are advising orchardists to be ready for the worst.

The Vernon News is particularly bitter, and among other things points out that "If the shippers were facing a struggle in which they would lose their own money they would not be long in getting together . . . . . These wars of the shippers will cease just as soon as it is their own funds that are being wasted The grower must decide when that will be . . . . . A movement to leave the apples on the trees might make it interesting for shippers who have made firm sales on Old Country markets."

Kaslo's New Cherry Deal

Dissappoined with the prospects of nothing better than a dollar a crate for their supper excellent Bing cherries, the Kaslo Kootenaian is urging the growers to make sure of better prices next season by putting on a couple of travellers to sell the fruit direct to the retailers and thus eliminate some of these familiar "middlemen's" profits.

So far as selling the very fine Kaslo cherries s concerned there is every reason to look for success, but on the all important matter of collecting for the fruit sold the scheme is not so attractive.

According to paper trade authorities, Premier Bennett had precisely the same idea a few years ago when he came into control of the Eddy Paper Company of Hull.

The jobbing houses, so Mr. Bennett thought, were not pushing the sale of Eddy paper products the way they should, and he put on travellers of his own to speed up sales. Forthwith the jobbers quit handling Eddy papers with the result that Mr. Bennett's travellers did a considerable business with firms whose ability to pay was at least doubtful, and after about a year the Eddy people had so many bad debts on the books that they took off their travellers and resumed trading in the old way.

Along with a competent selling force Kaslo cherry growers will do well to line up an equally efficient corps of collectors before going on their own in the matter of marketing.

Electrical Inspections

At this distance it wonld look as if the village council at the August meeting was only 50 per cent. efficient in putting through the resolution that the electrical inspection by-law will be enforced. Those directly interested are anxious to know how it is to be enforced, and by whom.

At present the inspector employed by the village is a resident of Nelson and while, in the past, he has been quite considerate in the matter of temporary permits in connection with wiring and the turning onof the "juice" pending a final inspection, his letter to the council would indicate that these permits are wittingly or otherwise being abused and that the time has come to call a halt on the leeway previously accorded electrical workers.

While the owner of any building can protect himself against monetary loss by refusing to pay until final approval has been given by the inspector, said owner should not be compelled to wait for a visit from the inspector before being allowed to turn on the light, which latter state of affairs the inspector threatens to enforce, according to the terms of his letter to the council. In order to avoid this latter inconvenience, especially, improved inspection facilities would seem to be in order.

Promises Insufficient

Not in a long time have we had a letter that has been so uniformly approved, especially by those who heard Wm. Irvine, M.P., at the C.C.F. rally a couple of weeks ago, as the one by Enquirer in last week's issue.

It is to be hoped, however, that other parties in the coming election contest will not miss the moral of the letter, which will apply to them as aptly as the C.C.F.

In their present humor most everyone is likely to demand the "when" and "how" of all the policies submitted, and unless something quite practical and definite is submitted the number of voters that will have to be classified as doubtful will be exceedingly large.

The public memory is not too short to recall Mr. Bennett's promise to relieve unemployment. and five times as many men walking the streets as compared with 1930. Or Premier Tolmie's familiar 1928 observation that things could hardly be worse—at which time relief and relief camps were undreamed of.

In the light of the change that has come over the electorate, the candidate with a reputation for common honesty, unselfish community effort and success at handling his own business affairs, should have little concern as to the outcome of the polls.

OUR K.B.O. BROADCAST

Neil MacDonald of Kaslo is displaying a dahlia bloom that measures ten inches across.

During some of the hot days in August Vernon residents used 750,000 gallons of water daily.

The 27,785 acres of dyked land in Bonners Ferry district carry an assessment of $707,897.

Cranbrook council has legislated that awnings must be not less than seven feet above sidewalk level.

The planer at Wardner sawmill has just shut down after a two months' run— the longest in two years.

Penticton crop report indicates an extensive gain over last year on pears, but plums and prunes are down.

Now the season is over Penticton reports its apricot crop 25 per cent. over the season's estimate.

Kaslo got 1.64 inches of rain in a downpour on August 20th—the heaviest rain ever recorded in that town.

Of the Okanagan's 135,000 box pear crop Penticton district will supply 75,000 Kelowna 52,000, and Vernon 9,000.

A largely signed petition is in circulation at Penticton asking for a vote on the opening of beer parlors in that town.

Both the town and provincial police at Kaslo are on the watch for folks who are stealing fishing tackle from boat houses.

Yahk will this year have superior school standing. Principal Parker will teach first and second year high school work.

Mrs. A. D. Bliss, who formerly had a restaurant at Porthill is opening out in the same line in fine new quarters at Bonners Ferry.

Kimberley Liberals are unanimous that F. H. MacPherson, present member, should carry the banner this year in Cranbrook riding.

The Bulman cannery at Vernon last year turned out $200,000 of canned goods and dehydrated apples, and paid in wages over $50,000.

Penticton growers, who have about 475,000 boxes of hail marked apples, will not be allowed to market them as orchard run hailed grade.

The Gazette is of the opinion that Grand Forks is rapidly becoming one of the leading onion, carrot and tomato seed producing sections of B.C.

According to the Bonners Ferry Herald the dyked lands in the Kootenay valley in that section represent an investment of $2,202,608.06.

Arrow Lakes Lumber Company are installing machinery for shingle making at their plant at Nakusp. Earlier in the year they went into box making.

According to the Penticton Herald present indications are that the most satisfactory returns for Wealthy apples are likely to be from the bulk deal.

Of the 1933 Okanagan apple crop the Herald claims Penticton district will supply 1,125,000 boxes, Kelowna, 1,500,000 boxes, and Vernon 750,000 boxes.

In order to keep out transient tonsoral artists who open in Penticton for a couple of months in the fruit shiping season, the barbers in that town have induced the council to insist on newcomers putting up a bond of $500 as a guarantee that they mean to stay in business.

The provincial government has designed to officially name the road between Rossland and Trail the Schofield highway, commemorating J. H. Schofield, M.P.P.

Of the 65 clubs in District No. 8 the Gyro Club at Kimberley had the best attendances at its weekly meetings for the year just closed, and has been presented with a silver cup.

The Kootenaian tells its readers that Kaslo's future prosperity depends very much on tourist trade and suggests the council should build a number of cabins for their accom nodation.

In the Okanagan the canneries are finding themselves short of tomatoes and the Bulman plant at Vernon is fearful that bootlegging will deprive them of considerable of their contracted supply.

If a deal now pending goes through Vernon will this year ship its first-ever car of watermelons, at $45 a ton. They are being grown near that town on 30 acres of indian land leased to the Chinese.

FORM No. 13.
(Section 39.)

LAND ACT

Notice of Intention to Apply to Purchase Land

In the Nelson Land Recording District of West Kootenay and situate on west side of Slocan River, at Shoreacres, B.C.

TAKE NOTICE that Wm. J. G. Oliver of Shoreacres, B.C.; occupation, rancher; intends to apply ror permission to purchase the following described lands: Commencing at a post planted on west side of Slocan River on the line between D.L. 302A and D.L. 303 about six chains east f the north-west corner of S L. 2 of D.L. 302A; thence 20 chains west; thence 20 chains north; thence 25 chains more or less east; thence south following west bank of Slocan River to post of commencement; and containing 40 acres more or less

WILLIAM J. G. OLIVER,
Dated August 7, 1933. Applicant.
