DEPARTMENT OF EDUCATION

OF THE PROVINCE OF BRITISH COLUMBIA

One Hundred and Fifth
Annual Report
JULY 1, 1975 TO JUNE 30, 1976

MINISTER OF EDUCATION
PROVINCE OF BRITISH COLUMBIA

Printed by K. M. MacDonald,
Printer to the Queen's Most Excellent
Majesty in right of the Province of
British Columbia
1976

VICTORIA

To Colonel the Honourable
Walter S. Owen, Q.C., LL.D.,
Lieutenant-Governor of British Columbia.

May it please Your Honour:

I beg respectfully to present the One Hundred and Fifth Report of the Department of Education.

Dr. Patrick L. McGeer
Minister of Education

RETIREMENTS

Miss N. W. Snape, Secretary to Minister of Education, after 46 years of service.

W. R. D. Hill, Clerk, Publications Services, after 35 years of service.

Miss D. E. Thompson, Instructor, Correspondence, after 33 years of service.

S. J. Graham, District Superintendent of Schools, School District No. 40 (New Westminster), after 29 years of service.

G. A. Batterbury, Registrar, Correspondence Education, after 25 years of service.

W. D. Robertson, Senior Cook, Jericho Hill Schools, after 24 years of service.

Miss I. A. Bowen, Teacher, Jericho Hill Schools, after 23 years of service.

Miss J. R. Irvine, Co-ordinator, Home Economics, after 20 years of service.

K. F. Alexander, District Superintendent of Schools, School District No. 75 (Mission), after 20 years of service.

Mrs. A. F. McCallion, Clerk, Correspondence Education, after 19 years of service.

R. S. Price, Assistant, School Board Affairs, after 18 years of service.

Mrs. A. Cooper, Secretary, Minister's Office, after 15 years of service.

Mrs. D. Robinson, Clerk, Correspondence Education, after 13 years of service.

I. Valen, Superintendent, Financial Services, after 13 years of service.

F. S. Aikens, Clerk, British Columbia Vocational School, Nelson, after 12 years of service.

D. G. Anstey, Co-ordinator, Adult Education, after 11 years of service.

C. G. Alexander, Instructor, British Columbia Vocational School, Burnaby, after 11 years of service.

R. B. Cox, District Superintendent of Schools, School District No. 71 (Courtenay), after 10 years of service.

A. C. Rutledge, District Superintendent of Schools, School District No. 14 (Southern Okanagan), after eight years of service.

E. C. Stewart, District Superintendent of Schools, School District No. 66 (Lake Cowichan), after eight years of service.

F. J. Brent, Stockman, British Columbia Vocational School, Burnaby, after eight years of service.

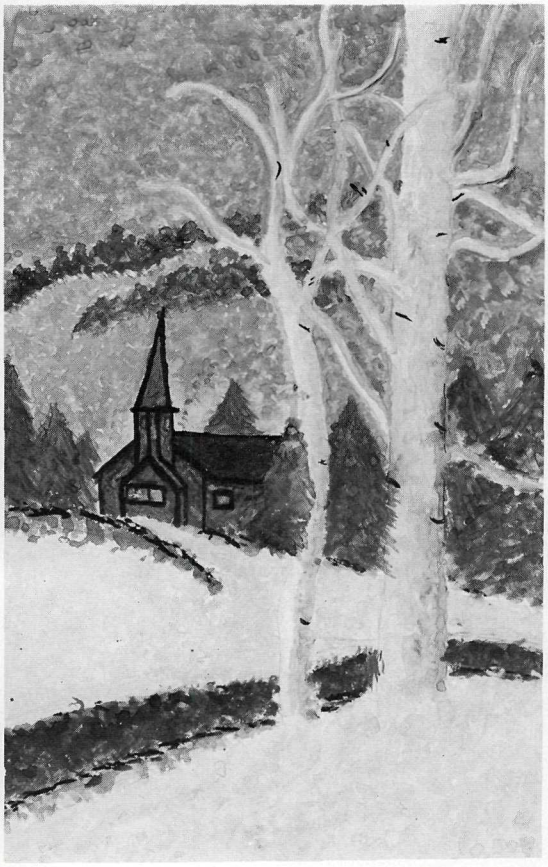
FROM THE MINISTER

I wish to begin my first Annual Report by paying tribute to and thanking all members of the Department of Education who facilitated my assumption of responsibility for the Department following the change of Government in December 1975.

One of the first steps resulting from the change in Governments was my appointment of Dr. Walter Hardwick, from the University of British Columbia, and a former Vancouver alderman, as Deputy Minister.

Coincidental with Dr. Hardwick's appointment was the reassignment of duties to the Associate Deputy Ministers. J. R. Fleming, whom Dr. Hardwick replaced, became Associate Deputy Minister, Finance and Administration; A. E. Soles became Associate Deputy Minister, Post-secondary, and J. Phillipson became Associate Deputy Minister, Schools.

Officials of the Department directed much of their time and effort during the school-year to improving educational, financial, and administrative accountability both in the schools and in the post-secondary areas.



Greg Bennett

The Kindergarten-to-Grade XII program received particular attention. A long-range learning assessment program was initiated early in the year so that the Department could assess the standards of education. Results of these assessments—the first of which is an examination into the English language arts—will be made available to school districts and the public, so that everyone will be able to contribute to the betterment of the education system if weaknesses are found.

In this respect I announced that a core curriculum for the K–XII program was being developed and that it will be in place by September 1977. The core curriculum will contain the specific learning objectives that should be attained at each level of schooling.

Despite financial restraint, educational spending during the school-year (and during the calendar and fiscal years that overlapped it) was higher than ever. Substantial grants were made to school districts and post-secondary institutions, and extra moneys were provided for the upgrading of school libraries and for the enrichment of Provincial Government scholarships. To ensure that funds would be appropriately allocated, planning was initiated on methods of improving the information systems needed to upgrade financial management.

The education of children with sight and hearing difficulties took place to an increasing extent in the school districts in which they live. This enabled them to live with their parents and to experience life in a community rather than in an institution. It also permitted the Jericho Hill Schools to better fulfil their function as a Provincial resource.

While the number of students in the K–XII system stabilized, education and training needs in the post-secondary system continued to grow. The Universities Council of B.C. reported directly to the Legislature on progress of the universities. On the important topic of the delivery of university programs to the non-metropolitan areas of British Columbia, I asked Dr. William Winegard, former president of the University of Guelph, to report on the need for such programs. Dr. Winegard's commission was asked to produce its report in the late summer of 1976.

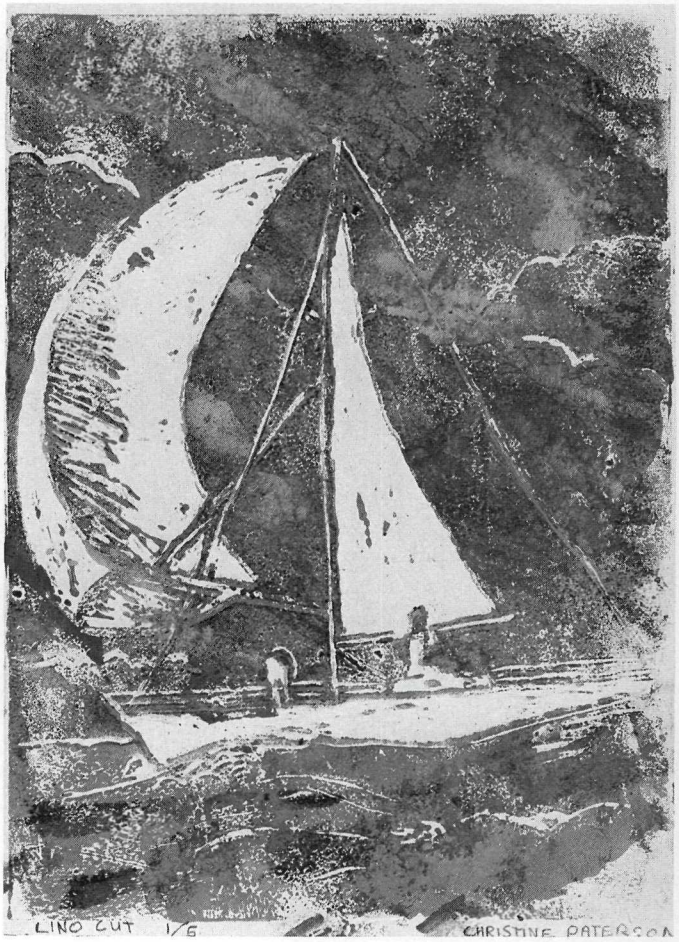
)uring the year, greater emphasis was :ed on vocational training. One of the malies that exists in this Province is that ıigh unemployment among youth when ıe same time there is a shortage of led labour to fill certain important itions. To assist with this problem, the ıey Correctional Centre was transferred n the Department of the Attorney-ıeral to become a vocational training tre.

As the year ended, plans for commissions vocational, technical, and trades train- and continuing and community cation were being contemplated. A rine Training Advisory Council was ointed to manage and make recom-ıdations regarding the Marine Training ıtre in Vancouver and the over-all future narine training in the Province.

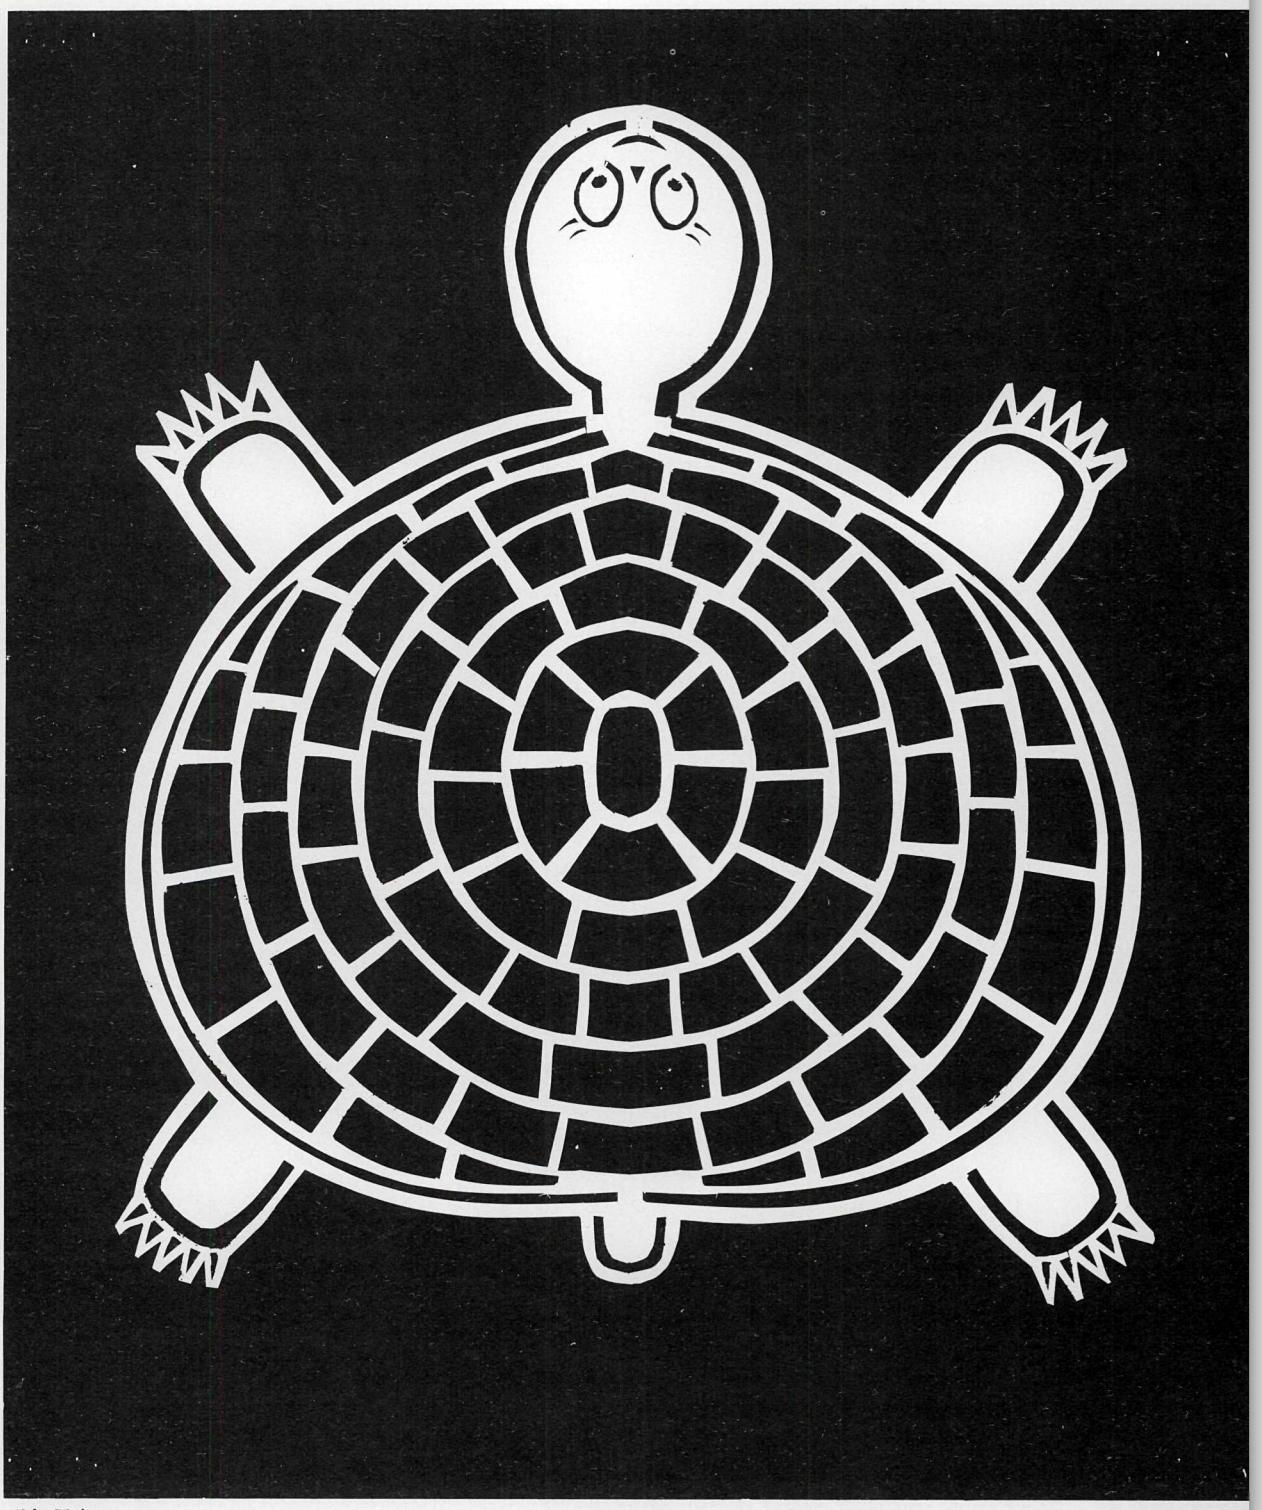
These are only a few of many responsi-ties that have occupied the Department ing the year, and me for half of it. I e found it interesting and rewarding. The t annual report will more closely reflect priorities and plans that have emerged :e I became Minister.

To all, and particularly our dedicated :hers who have helped to make public cation better—in the schools, in the eges, in the vocational and technical itutions and in the universities—I express sincerest appreciation.

DR. PATRICK L. McGEER
Minister of Education



Christine Paterson



Liz Frisse

SCHOOLS

The functions and responsibilities of the Department of Education fall into three categories broadly defined as schools, post-secondary education, and finance and administration. Although each is the responsibility of one of the three Associate Deputy Ministers, there are many areas of mutual concern and a high degree of collegiality in the operation of the Department.

Of the Department's seven operational divisions, three—Educational Programs—Schools, Integrated and Supportive Services, and Field Personnel—are the responsibility of the Associate Deputy Minister, Schools. These divisions administer programs of curriculum development, learning assessment, industrial education, special education including the Jericho Hill Schools for the Deaf and the Blind, and correspondence education. They also supervise Provincially appointed personnel in the school districts and the certification of teachers. The work of the various branches, which deal mostly but not entirely with the Kindergarten-to-Grade XII program, is recorded in the following pages.

DIVISION OF EDUCATIONAL PROGRAMS—SCHOOLS

During the 1975/76 school-year the work of the Division of Educational Programs—Schools centred primarily on core curriculum and learning assessment. Core curriculum activities involved a considerable amount of preliminary developmental work by the staff of the Curriculum Development Branch. Specific aspects of the branch's activities are elaborated in the following sections of this report. The Provincial learning assessment program continued. Assessment of both educational goals and selected areas of pupil performance was completed during the year and the analysis and interpretation stages were well under way for preparation of the final reporting phase of the program.

A new Grade XII scholarship program was implemented during the year. An increase in the amount of the scholarship award and provisions for local school district as well as Provincial scholarships were the major changes.

Service to the field continued to be a high priority for the division. The work of the consultative staff in home economics and industrial education is outlined in the reports of the Home Economics Branch and the Industrial Education Branch. Members of the Curriculum Development Branch prepared a *Program Development Model* which was utilized extensively in in-service programs directed toward local curriculum development. Further assistance in the area of local programming also resulted from the branch's draft publication *A Checklist for Locally Developed Courses*. The French programs co-ordinator also provided extensive consultative assistance to school districts, particularly with respect to the initiation and administration of programs under the current Federal-Provincial Agreement.

Specific funding for French language programs included the distribution of $1,048,700 to 62 school districts for French language support grants; the expenditure and commitment of $180,966 from the program for bursaries to second language and minority language teachers (718 teachers were involved in workshops and in receipt of bursaries as a result of these provisions); 157 Grade XII students received bursaries from the summer language bursary program; 17 students from British Columbia were accepted in other provinces and British Columbia accepted 43 francophone students under provisions of the inter-provincial second language monitor program; the amount of $1,761,264 was awarded under the special projects program.

An active Provincial accreditation program operated through the co-operative efforts of the Division of Field Personnel and the Division of Educational Programs—Schools. The Provincial Accreditation Committee had a relatively light agenda in respect to the review of individual school reports, but it did initiate steps toward the review and revision of the present accreditation booklet and process. External evaluation teams were very busy with four such teams visiting secondary schools in Clearwater, Fort St. John, Kamloops, Kitimat, Masset, Prince Rupert, Rutland, and Trail.

CURRICULUM DEVELOPMENT BRANCH

The term, core curriculum, took on a special meaning for the staff of the Curriculum Development Branch this year. The staff undertook to develop an initial working paper outlining what could be considered to be essential learning for all pupils in the public school system. The paper, redrafted several times, will be the vehicle used to obtain public and professional reaction and input toward the eventual goal of preparing a clearly stated set of learnings goals to be prescribed for all pupils.

In addition to its involvement in core curriculum the branch has carried on with its regular work of curriculum development and identification of resource materials to support Provincially developed programs. During the year under review new programs were prepared in Elementary School French, Secondary School English, Secondary School German, Secondary School Latin, and Secondary School Industrial Education. New or revised courses were also developed in Mathematics,

Geology, and Western Civilisation 12. Eighty-two new textbooks were added to the list prescribed for schools.

In the work of curriculum development, the professional staff of the branch was assisted by a number of advisory committees of teachers and other experts.

The practice was continued whereby outstanding teachers in the Province were released by boards of school trustees to work with the Curriculum Development Branch as curriculum consultants. This year's appointees were Mrs. S. M. Hoenson (Saanich); W. G. Dunlop (North Vancouver), who completed his third year in this capacity; and Mrs. H. D. Cruchley (Abbotsford), who completed a second year.

LEARNING ASSESSMENT BRANCH

Following extensive consultation with a number of organizations over the past two years, the Minister of Education, in the spring of 1976, announced a five-year assessment time-table (*see* below).

The learning assessment program is designed to provide credible information on the extent to which the performance of groups of students meets the desired goals and objectives of the public school system. The fundamental purpose of the program is to facilitate educational decision-making in areas such as curriculum development, fiscal management, teacher education, and research.

The pilot study in the language arts, which was started in the fall of 1974, neared completion and reports were being prepared on goals of the language arts, instructional practices, test results for reading at the Grade IV level, and writing at the Grade VIII and XII levels. In addition, each district received a report dealing with the over-all district results for the Grade IV reading test which was administered in January 1976.

Assessment Time-table[1]

	Content Area	Grade	Smallest Reporting Unit	Publication of Report
1975/76 (pilot study)	Reading	4	district	summer 1976
	Writing	8, 12	Province	
1976/77	Functional Skills 1 (Reading, Math.)	4, 8, 12	school[2]	summer 1977
	Social Studies/ Citizenship	4, 8, 12	Province	
1977/78	Functional Skills 2 (Writing)	4, 8, 12	Province	summer 1978
	Physical Sciences	4, 8, 12	school[2]	
1978/79	Functional Skills 1 (Reading, Math.)	4, 8, 12	school[2]	summer 1979
	Career and Occupational Development	8, 12	Province	
1979/80	Functional Skills 2 (Writing)	4, 8, 12	Province	summer 1980
	Recreational and Health Education	4, 8, 12	Province	

[1] Note that functional skills (reading, mathematics, writing) are assessed over a two-year cycle; if possible, other related skills such as speaking and listening will be assessed under the heading of functional skills. Content areas such as social studies, physical sciences, or even the fine arts will be assessed over a five or six-year cycle and may not be assessed in conventional fashion (instruments other than paper and pencil tests may be used).

[2] Optional reporting unit; results provided at district request. Provincial and district results will automatically be made available to the board.

The branch continued to provide consultative services to schools and districts by way of periodic in-service workshops. It also continued to supply schools and districts with tests prepared in British Columbia. For the first time in its operations the branch was able to utilize the services of a consultant seconded from a school district in the person of J. Alex Holm. The co-operation of School District No. 80 (Kitimat) was genuinely appreciated.

EXAMINATIONS BRANCH

The Examinations Branch has four areas of responsibility—the Grade XII scholarship program, the general educational development testing program, the issuance of transcripts, and secondary school education evaluation.

A new Grade XII scholarship program was introduced for the school-year 1975/76. The major changes were the introduction of a second competition to supplement the Province-wide scholarship examinations administered through the Department. It was a district-wide competition administered by each district.

In both competitions it was necessary for a candidate to show evidence of an acceptable standard of English.

A total of 4,049 candidates entered the scholarship competitions and 1,877 completed the requirements. A total of 938 $500 awards were made.

John Cameron Stout, of New Westminster Secondary School, ranked first in the 1975/76 Provincial competition and won the Governor General's silver medal with an average of 94.67 per cent. The Governor General's bronze medal was awarded to Timothy Michael Hegedus, a student at Mount Douglas Secondary School in Victoria, who ranked second with an average of 86.67 per cent.

The general educational testing program has now completed its third year and remains extremely popular as an adult program by which British Columbia residents 19 years of age and over may obtain Grade XII equivalency. During the school-year, 4,591 candidates applied to write the battery of five standardized tests. Of these, 3,324 qualified. Since the inception of the program, 15,110 candidates have applied, and of these 10,868 have been granted the British Columbia Department of Education Grade XII equivalency certificate.

During the school-year, copies of 6,870 secondary school transcripts were issued and 259 official evaluations of secondary school education from all parts of the world were made.

Cheryl Baxter

INDUSTRIAL EDUCATION BRANCH

Industrial education courses taken by students in secondary schools in 1975/76 continued to expand. The total enrolment for the year was 156,245, an increase of 3.5 per cent over the previous year.

There has been a renewed interest in programs for particular occupations, and many districts are planning to include in-depth programs as soon as practical. The main objective of programs for particular occupations is to prepare students to enter further training in an apprenticeship or obtain immediate employment in automotive work, carpentry, or cooking. Students take a minimum of six courses of the required 12 at the Grade XI and XII levels in the particular program. Six courses (650 hours) are equal to the pre-apprenticeship time stipulated by the Department of Labour. Graduates may receive up to six months' credit toward an apprenticeship in the particular trade area. Such credit is negotiable between the student, the Apprenticeship Branch of the Department of Labour, and the employer. The three

eas—automotive, carpentry, and cooking -are emphasized because of the many nployment opportunities in the mechanical, nstruction, and service industries.

The extension of industrial education cilities to small schools, mentioned in the st annual report, is proceeding well, and any students in the smaller school districts e now benefiting from courses in industrial lucation and home economics.

Some districts are now experimenting ith a multi-craft type of program at the rades V, VI, and VII levels. A Vancouver ogram with a mobile classroom is ntinuing to be most successful. With the ailability of space in some elementary hools, a more practical craft program obably will emerge. Practical courses ve played a major role in providing some udents with success in secondary schools, d it is hoped this approach can be ccessful at an earlier age.

A new organization for industrial lucation was issued to all schools and may implemented in September 1976 on a rmissive basis. All programs become andatory in September 1977. The ghlight of the new programs is expected be the technology courses in Grades XI d XII. These courses are designed to able teachers to develop a technology ost suited to the particular school district. echnologies envisaged are forestry, riculture, marine, mechanical, and iation.

A total of 1,244 teachers were employed industrial education in the 1975/76 hool-year, an increase of 5.7 per cent over 74/75. Surveys indicate a need for an ditional 85 teachers per year for the xt three years.

The branch's long and successful volvement with the British Columbia wood oducts overseas program continued, and ll culminate when Japanese carpenters ke a five-week training program at the itish Columbia Vocational School, rnaby, in the summer.

These carpenters are familiar with the ditional Japanese post-and-beam nstruction methods, and they will return Japan qualified to instruct other rpenters in Canadian platform-frame nstruction.

HOME ECONOMICS BRANCH

During the 1975/76 school-year the total course enrolment in home economics (excluding Community Recreation 12) was 109,701, an increase of 3,908. The greatest numerical increases in home economics courses were in Foods and Nutrition 9, Home Economics 8, Foods 11, and Textiles 11. Statistics on home economics course enrolment indicated a trend toward increased student preference for food courses.

Home economics departments were operated in 312 schools, an increase of nine over the previous year. The number of teachers of home economics courses increased by 28, making a total of 898.

In keeping with the national changeover to metric measurement, home economics classes are being equipped with metric measures for use in conjunction with the new metric textbook in home economics, *Management and Foods,* produced by the Department of Education.

In addition to regular field work, the consultants of the Home Economics Branch co-operated with the Faculty of Education of The University of British Columbia by visiting and advising the home economics graduates on the integrated teacher training program, who were employed, on letters of permission, in many schools throughout the Province.

Field work also included visits to teaching cafeteria kitchens, a visit to a home economics department in the native village of Port Simpson, and in-service home economics workshops in some school districts.

In a few schools, some locally developed courses in home economics were implemented.

The home economics consultants gave technical and practical advice to ensure that adequate and efficient facilities would be provided for home economics programs in new or renovated school buildings.

DIVISION OF INTEGRATED AND SUPPORTIVE SERVICES

Under the authority of section 180 of the *Public Schools Act,* the Division of Integrated and Supportive Services continued to approve and support large numbers of local programs developed by boards of school trustees in their endeavours to meet the educational needs of every child in their school districts.

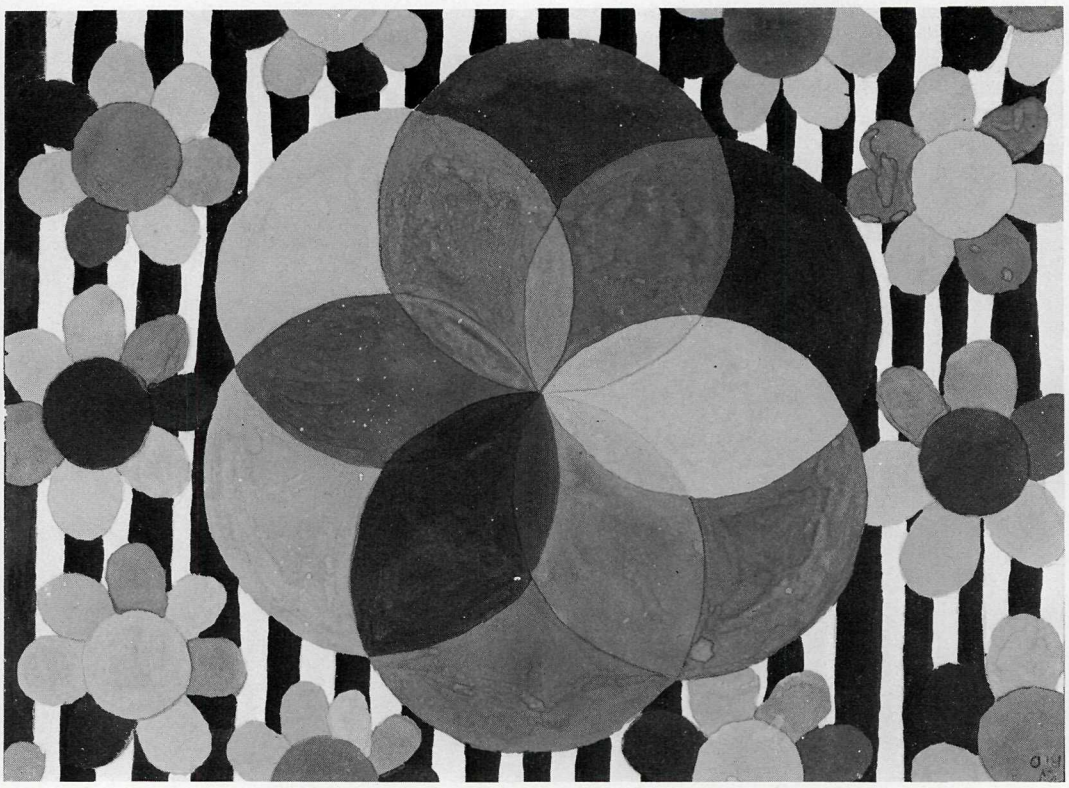
Educators throughout the Province are developing public and professional awareness of the potential for academic and social growth of handicapped children through these learning assistance programs, for which there were 1,136 special approvals, each worth approximately $17,000, during the school-year.

In addition to the learning assistance approvals, 936 approvals were arranged for groups of children with specific problems such as deafness, blindness, speech impairment, physical handicap, or severe retardation. Programs were supported for Indian children and children who came into the public school system without adequate English.

During the year, rehabilitation programs, jointly sponsored by the Department of Human Resources, the Department of the Attorney-General, and the Department of Education served more than 1,500 students.

The work of the division was enhanced by the addition of two directors to the existing staff. Mrs. Jacqueline Leo, former Chief Counsellor of the Kyoquot Indian band, was appointed Director of Indian Education for the Department. During her brief stay in office she travelled extensively throughout the Province, noting and encouraging such progressive steps as the hiring of remedial teachers, the use of home-school co-ordinators and special counsellors, and utilization of local Indian materials in local curricula.

The second appointment was that of Dr. J. A. G. Gittins as Director of Special Education. At the time of his appointment he was visiting lecturer in special education at the University of British Columbia.



Karina Voitchowsky

)RK STUDY—
)RK EXPERIENCE

Work study—work experience programs 're introduced in 1974, and continued to elop through the 1975/76 school-year. grams were offered in 64 school districts h 259 schools and 11,481 students taking t.

t became quite clear during the year that vernment and community agencies are oming much more aware of the ustment problems of those seeking ployment after leaving school. Numerous ncies and committees are seeking to e the problems, and a major need for ordination of activities is evident.

nvolvement in the invitational First ional Consultation on Vocational nselling, sponsored by the Department Manpower and Immigration in Ottawa in vember 1975, provided familiarization h CHOICES, a computer-assisted career nselling program developed by the partment of Manpower and Immigration. eral meetings with Government and rict personnel were held with the result a pilot project should be ready in early 7 for two urban centres in British umbia.

RICHO '75 SUMMER PROGRAM

The Jericho Hill Schools campus in ncouver was the location for the partment-sponsored Jericho '75 fessional development summer program. six weeks during the summer of 1975, nine non-credit and four University of ish Columbia credit courses, designed rovide leadership skills for teachers ed upon to work with exceptional dren, were attended by 170 participants.

n addition to the leadership training rses, housing, cafeteria, gymnasium, and ing-field facilities were made available the youth development camp of the B.C. eration of Athletic Associations. The one-week camps (for rugby, soccer, ' volleyball, boys' volleyball) were nded by 295 students between the ages 4 and 16, from all parts of the Province.

lassroom and playground facilities were provided for 30 learning-disabled children and five deaf-blind children attending a special summer program. Facilities were provided for workshops conducted by the Vancouver Association for Children with Learning Disabilities and the Pacific Association for Autistic Children.

JERICHO HILL SCHOOLS

The pupil population of Jericho Hill Schools for the Deaf and the Blind continued to decrease. This trend is a result of several factors. Increased medical knowledge and vastly improved facilities at local levels are reducing the number of handicapped children requesting admittance to Provincial institutions. A lack of enthusiasm on the part of many parents to relinquish their handicapped child and a willingness on the part of enlightened school districts to devise educational programs for the child has, over the years, reduced the need for a single, centralized, Provincial institution. In June 1976 the Provincial School for the Blind was serving only 21 day students and 29 resident students. The Provincial School for the Deaf was serving 81 day students and 64 residential students. Students attending Jericho Hill off-campus classes numbered 51. One hundred and sixty-five regularly employed staff served them.

Parents and interested persons formed a board for the School for the Blind to act in an advisory capacity to the Minister. This group produced a useful handbook for blind pupils, their teachers, and parents, which was published by the Department of Education for wide distribution.

Mrs. Doris Corrigan, Principal of the School for the Blind, made a Province-wide survey of the education of blind children which is expected to have tangible results in an increase in resource centre service to these pupils.

The principal of the School for the Deaf resigned to join the public school system. John Anderson was appointed Acting Co-ordinator of the Education of the Hearing-impaired for the entire Province, charged with overseeing the off-campus and school district programs with a view to recommending improvement.

CORRESPONDENCE EDUCATION BRANCH

This division is responsible for the Department of Education's Correspondence Education Branch, which has served students in remote areas for nearly 40 years and has developed an international reputation for excellence. Its methods have been copied by correspondence schools as far away as New Zealand and Rhodesia, and have been examined by the Open University in England. During 1975 a number of Canadian sources requested permission to incorporate British Columbia course material into training manuals.

During 1975 the branch had a total of 190 courses available. Of these, 40 were undergoing revision and two new courses, Biology 11 and Brain and Behaviour, were being developed.

One hundred and eight students in isolated areas were gathered together in what are called "Section 20" schools throughout the Province under the supervision of 20 teacher assistants. Principals of regular schools were urged to appoint some member of staff to supervise correspondence students in attendance at school and to conduct seminar and question periods as required.

An interesting experiment this year was the formation of a Section 20 school for British Columbia students living in Iran. The Canadian company operating there was prepared to provide study quarters, a library, and qualified teachers at the site of the giant pulp-mill under construction. The number of students in the Iranian school using correspondence material is 30 now and will rise to 150 next year.

The enrolment figures for the year were as follows:

General enrolment:

	1974-75	1975-76
Grades VIII–XII and special vocational courses	13,879	15,084
Kindergarten	93	85
Grades I–VII (Victoria)	1,137	1,019
Grades I–VII (Dawson Creek)	105	126
Total students	15,214	16,314

Certain groups for whom free instruction was provided:

Inmates	269	380
Social Assistance cases	109	106
Special illness	288	363
Recent immigrants	113	104
Needed at home	9	5
Distance cases	484	399
	1,272	1,357

The free instruction above represented a waiving of enrolment fees in the amout of $54,836.50.

STUDENT FINANCIAL SERVICES

Modifications in the student assistance program from July 1, 1975, to June 30, 1976, enabled students to receive up to $3,300 for each educational year. This represented a $400 increase over the previous year.

The total number of students authorized to receive funds increased by 16 per cent over 1974/75. During the most recent year, 19,509 loans were authorized, amounting to $17.4 million. In addition, 16,294 grants-in-aid, valued at approximately $9.1 million, were awarded. The total student aid authorization for the full-time program of assistance totalled $26.5 million.

A special committee was established by the B.C. Student Loan Committee to adjudicate appeals. Membership included representatives of financial awards officers at the educational institutions, students, and Department officials.

The special assistance program continued to benefit individuals pursuing a post-secondary program of study on a part-time basis. It also served to help low-income families and individuals receiving partial educational funding from the Department of Human Resources.

The Student Services Branch administered the distribution of about 970 second-language bursaries in co-operation with the Council of Ministers of Education of Canada, and with the Federal-Provincial bilingual training program.

)IVISION OF FIELD PERSONNEL

The Division of Field Personnel was re-
:ganized during the past year and new
:sponsibilities were incorporated into its
ructure. Previously the division was
:sponsible for the supervision of
rovincially appointed school district
dministrative personnel, teacher certifica-
on, international teacher exchange
rograms, the evaluation of instructional
rograms at the secondary level, and inter-
rovincial liaison on matters related to the
vision's responsibility. The reorganization
dded responsibility for administering the
epartmental involvement in teacher
aining at both the pre-service and in-
:rvice levels and co-ordinating in-service
rograms developed by other divisions of the
epartment.

Early in the year, Dr. R. J. Leskiw
ssumed the position of Superintendent of
ield Personnel. At the same time,
. A. Andrews was appointed Director of
eacher Services. These two appointments
artially completed the proposed
:organization of the division.

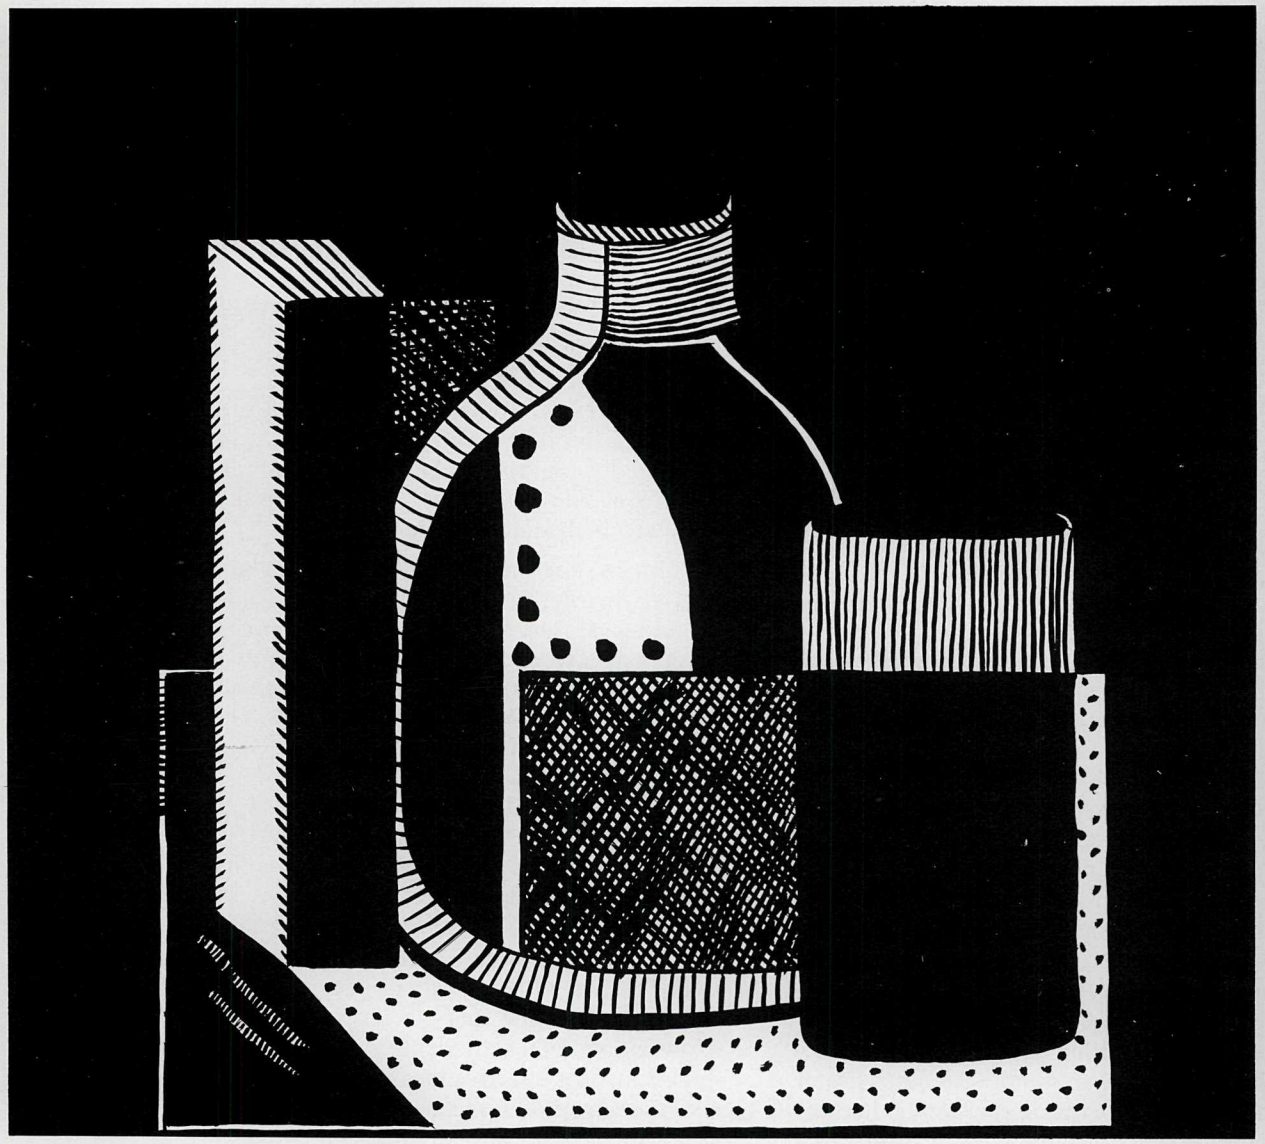
Since the reorganization a concerted
fort has been made to develop a profes-
onal development program that will
clude activities suitable for all persons
:rving the educational enterprise.
udgetary provisions were made to initiate
rograms on both a district-wide and
rovince-wide basis. Initial work included
lentifying existing programs and supple-
enting these as needed. To this end a
eek-long conference was scheduled for
arly fall for all district superintendents of
:hools and superintendents of schools. It is
oped that programs of this type can
ventually be arranged for other adminis-
ative groups within the public school
stem. Conferences and workshops are
lanned to deal with supervision and other
atters specific to administrative operation.
lans are now being formulated that will
oth permit and encourage superintendents
become involved in intensive professional
evelopment programs.

The Teacher Services Branch has
ssumed the responsibility for assessing
:acher supply and demand on a district-by-
istrict basis. As pupil enrolment continues
to decline the necessity of accurately pre-
dicting specific requirements at both the
district and Provincial level will increase.

Efforts, under district sponsorship, to up-
grade teachers presently working have been
under way for some time, and the division is
assisting these activities where possible,
as well as initiating direct sponsorship of
other activities. A program of in-service
workshops, conducted on a regional basis,
has already begun. It is hoped to expand
within the next few years the subject areas
covered by this program so as to include
all subject disciplines. In conjunction with
this program an examination was begun of
methods of serving teachers in subject fields
in which staffing has been difficult.

The division also began exploration of
means to resolve some of the many concerns
about teacher education which are
continually expressed. Discussions will
be conducted to ascertain approaches to be
followed in dealing with these concerns.

District superintendents continued to be
actively involved in many Provincial
committees. The school accreditation pro-
gram has been expanded in order to provide
more external committees to examine
programs offered in secondary schools. The
division has continued its study of the
small secondary school. On the basis of a
recently submitted report containing
significant statistical data, further study
was considered desirable in order to identify
more clearly the unique needs of these
small rural schools. As a result the division
has requested that the ERIBC examine two
specific areas of small school activity. The
purpose of the first study, a developmental
planning project, is to identify a set of
practical, cost-effective means of
overcoming, modifying, or offsetting the
disparities in educational opportunity which
exist for students in the most disadvantaged
of those schools enrolling Grades XI and
XII. The second study will provide
information with respect to the identification
of students' educational and occupational
aspirations, and parental expectations
regarding their children's educational and
occupational plans.



Debbie Dugdale

POST-SECONDARY EDUCATION

In British Columbia the term "post-secondary education" refers not only to academic and professional education at the universities and colleges but to a wide range of vocational and technological education available at 14 colleges, three vocational training centres, and the British Columbia Institute of Technology.

The Associate Deputy Minister, Post-secondary, bears much of the responsibility in these areas. He maintains liaison with the universities through the Universities Council, and with the colleges, and supervises the activities of the Division of Post-secondary Programs. The Division administers the Provincially operated vocational training centres, develops training programs as required, provides for co-operation with other Provincial departments and the Government of Canada in matters relating to manpower training, and has considerable involvement in adult and community education.

An account of post-secondary activities follows.

DIVISION OF EDUCATIONAL PROGRAMS-POST-SECONDARY

Restructuring of the Division of Educational Programs—Post-secondary, the assigning of personnel to new duties, and the secondment to the Department of Education of leading education figures from the field highlighted the activities of post-secondary education during 1975/76.

A. E. Soles, Associate Deputy Minister, Educational Programs, was appointed Associate Deputy Minister, Post-secondary Programs, in January 1976 and assumed over-all responsibility for the division in its diversified fields of activity.

H. E. Justesen, Superintendent, Educational Programs—Post-secondary, was assigned the task of developing programs and physical and administrative plans for vocational, career technical trades, and occupational training for the Lower Mainland of British Columbia.

Dr. J. F. Newberry, Assistant Superintendent, Educational Programs—Post-secondary, was assigned to lead the Management Services Section of the reorganized division.

Dr. R. L. Faris, Superintendent of Communications, was assigned responsibility for continuing and community education, and academic programs at community colleges. In addition, he served as the Department's representative on the Post-secondary Co-ordinating Committee chaired by Dr. Ian McTaggart-Cowan, and the Commission on the Delivery of University Programs to Non-metropolitan Areas, headed by Dr. William Winegard.

D. R. MacRae, former principal of the B.C. Vocational School, Dawson Creek, was appointed Director of Business and Industry Programs and D. S. Goard, former Division Head at Cariboo College, was appointed Director of Career Programs.

J. E. Cooper, formerly with the Vancouver School Board, was appointed principal of the B.C. Vocational School, Burnaby. The multi-discipline building at the school was placed in operation providing much needed additional training space. In addition, work was begun on the transfer of the aircraft maintenance program from the Willingdon campus to the Vancouver International Airport, where the Department purchased a hangar to accommodate the program.

R. A. Dawson, formerly with Vancouver Community College, was appointed principal of the Haney Educational Centre. The centre, which was formerly the Haney Correctional Centre, was acquired by the Department of Education from the Attorney-General's Department in October. Programs began at the site almost immediately and work was begun on a three-year plan which will result in Haney becoming a major vocational training centre.

Increased support in the form of student recruitment and job referral for graduates was offered to the B.C. Mining School in Rossland. Several advisory committee meetings were held during the year, bringing together Government, industry, and union representatives who assist in the general direction of the programs offered at the school. Virtually 100 per cent of the students completing training at the Mining School have obtained employment in the mining industry, a positive reflection on principal S. J. Hunter and the staff.

Efforts were made by the division during the year to improve accessibility to training opportunities for students seeking career-technical-vocational trades and occupational training. Additional short-term courses were mounted in an effort to reduce student waiting-lists and improved career counselling was developed.

A Marine Training Advisory Council was established to make recommendations on the future of marine training in British Columbia and to oversee the operation of the Marine Training Centre in Vancouver.

Agreement was reached with the Department of Health for the transfer of the education centre at Riverview to the Department of Education for use by Douglas College. The centre will form the Coquitlam campus of Douglas College,

hereby greatly improving the delivery of post-secondary education to residents on the north side of the Fraser River.

One of the most exciting developments of the school-year was the opening of the four new community colleges in Campbell River, Dawson Creek, Cranbrook, and Terrace. The four colleges—North Island, Northern Lights, East Kootenay, and Northwest—proved very valuable to the areas they served.

Enrolments in post-secondary education continued to increase in the last 12-month period. University enrolments have increased by 7 per cent for full-time students and 17 per cent for part-time students. College enrolments are up 3 per cent for full-time students and 18 per cent for part-time students. Enrolment at the B.C. Vocational School, Burnaby, was up 19 per cent.

UNIVERSITIES COUNCIL OF BRITISH COLUMBIA

Liaison between the Department of Education and the universities is the responsibility of the Universities Council of British Columbia, which completed its first year of operation during the 1975/76 school-year.

Established under the *Universities Act* (1974), the Council acts as an independent Crown body to provide public accountability for the affairs of the public universities.

Membership of the Council is made up of 11 individuals, who are appointed for varying terms by Order in Council. Chairman of the Council is Dr. W. M. Armstrong, formerly of The University of British Columbia.

One of the major responsibilities of the Universities Council is to receive, review, and co-ordinate the operating and capital budget requests of the public universities. The Council, after examining the universities' requests, submits a consolidated budget to the Minister of Education. The Minister then approves a lump-sum payment to the Council, which allocates money to the universities.

The Council undertakes various studies and research projects related to matters within its jurisdiction. During its first year the Council produced a report on student housing. The Council is also actively involved in the planning and development of universities' academic offerings and facilities.

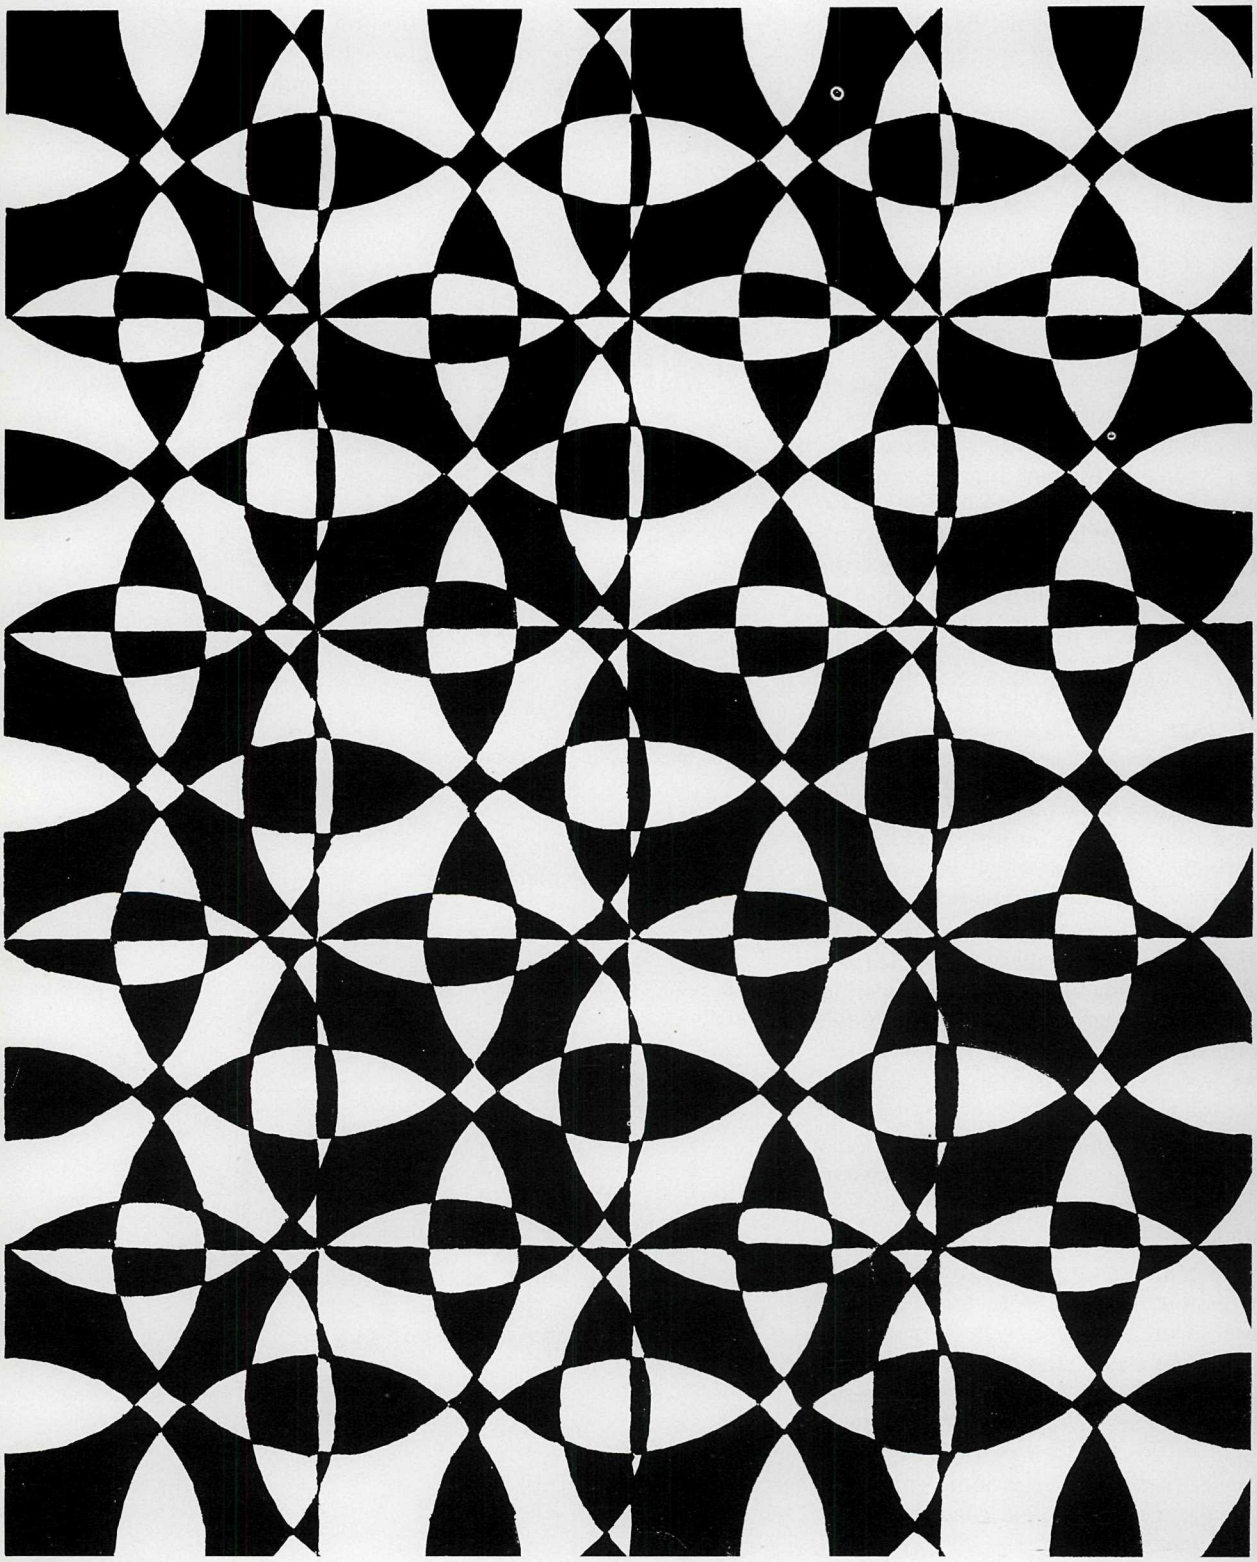
Dan Dobson



John McCartney

FINANCE AND ADMINISTRATION

The Department of Education employs more than 800 people; administers a budget which, including grants to school districts and universities, is more than three-quarters of a billion dollars, and maintains liaison with 75 school districts and 22 post-secondary institutions having more than 600,000 students. To do this the Department has three support divisions—Financial Services, Administrative Services, and Communications—which are responsible to the Associate Deputy Minister, Finance and Administration.

The Division of Financial Services is concerned not only with the allocation of grants and financial controls, both internally and externally, but for liaison with the Federal Government and the administration of financial agreements with the senior government. The Division of Administrative Services is responsible for liaison with school districts in administrative areas, including the provision of public school and post-secondary facilities and the conveyance of pupils. The Division of Communications is in charge of the Provincial Education Media Centre which supplies audio-visual materials to schools and colleges, the Publication Services Branch, which supplies textbooks and other materials, and the Data Services Branch.

Accounts of these divisional activities follow.

DIVISION OF FINANCIAL SERVICES

The Division of Financial Services, under the superintendency of Inge Valen until he retired late in the school-year, was reorganized into a number of directorates. John F. Currie became Director of Departmental Finance, George Gamble Director of School Finance, and R. A. Munro Director of Post-secondary Finance. Larry Ting, a consultant to the Department, was in charge of financial planning.

The Director of Departmental Finance is responsible for all internal financial matters, including budgetary control and the administration of the payroll office. He also prepares the Department's estimates, including internal and external expenditures, which, for the 1975/76 fiscal year, amounted to $777,350,709—more than 22 per cent of the entire Provincial Government budget.

The main function of the Directorate of School Finance is to monitor the expenditure of capital and operating funds within each school district. It analyses the budgetary requirements of school districts, calculates the value of the instructional unit (the basis on which operating grants to districts are determined), advises the Government on the effects of various funding levels and the mill rates which result in property taxes for school purposes, and calculates the grants payable to each district, once funds are approved.

In the area of operating budgets, members of the staff visit school districts to review budget proposals and analyse them.

During the 1975/76 period, 63 Capital Expense Proposals, amounting in total to more than $162 million, were processed. Capital Expense Proposals provide borrowing authority for the school districts for the acquisition of capital assets in the form of buildings and equipment. The actual cost is met by means of debentures sold to the School Districts Capital Financing Authority.

The Director of Post-secondary Finance has similar responsibilities in the post-secondary area.

During fiscal year 1975/76 the community college system increased by 40 per cent with the inception of two totally new colleges and two others which had previously been Provincial vocational schools. With this development came additional responsibilities in college budget administration and the accompanying monitoring of college financial matters. In addition to the increased number of colleges, there was considerable growth in other colleges, with the result that budgetary provisions for Government grants increased by 41 per cent over 1974/75 to a total of $95 million for operating and capital expenditures.

In addition the directorate calculates and administers the cost of vocational training courses for the purpose of providing training to the B.C. Department of Labour and Canada Manpower, the latter governed by the provisions of the *Adult Occupational Training Act* and 1974 Agreement. It is to be noted that the Federal Government purchases approximately 40 per cent of all vocational training carried on in the Province.

Another area of Federal/Provincial financial participation is through the *Federal-Provincial Fiscal Arrangements Act,* whereby the Federal Government contributes to post-secondary education by way of return of personal, corporate, and non-resident income taxes paid by British Columbia residents and collected by the Federal Government. It is a direct responsibility of the directorate to prepare the claim under the Act and analyse the effects of changes on the financial framework of the post-secondary system. It is to be noted that total post-secondary expenditures have increased more than 70 per cent in the past four years.

›IVISION OF ›DMINISTRATIVE ERVICES

During the 1975/76 school-year the ivision of Administrative Services con- nued to maintain contact with school stricts to plan for the provision of capital cilities and equipment. A guide book was repared by the division to help school oards and their officials in the preparation submissions for capital programs. egional meetings with school board chair- en, district superintendents, and secretary- easurers were held following the stribution of the guide books. These eetings were useful forums for the indenti- cation of concerns and their clarification.

The Advisory Committee to the division, mposed of district superintendents and cretary-treasurers representing all zones of e Province, met several times during the ear. This committee acted as a valuable nk between the division and the hool districts and provided a most useful urce of expert advice to the division.

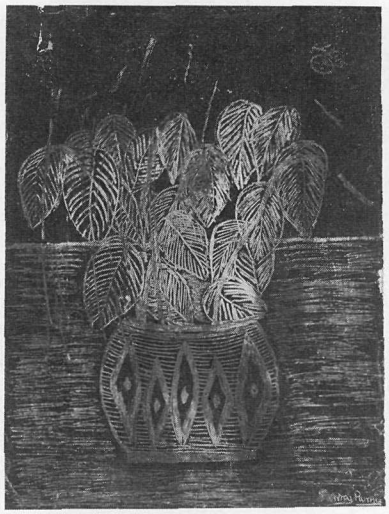
The division continued to assist districts providing consultative services in respect all aspects of capital development, cluding site acquisition and other aspects land matters, school buildings and her capital facilities, the furnishing and uipping of facilities, the problems inherent the provision of safe, efficient, and onomical transportation services, and on any other matters of general administrative ncern.

ACILITIES DEVELOPMENT— CHOOLS

The division's Facilities Development— hools Branch continued its normal task reviewing submissions from the school stricts for capital construction projects. In dition, members of the staff assisted stricts in the review of capital needs survey bmissions. Visits were made to various eas in the Province to assist districts and to rry out research on the effectiveness of ecific areas in existing schools.

Capital expenditures for the 1975 calendar year (section 190 approvals) were:

	$
Sites	13,705,567
Buildings	112,578,437
Equipment	12,217,118
Other	7,549,368
Total	146,050,490



Shiurai Panua

FACILITIES DEVELOPMENT— POST-SECONDARY

The 1975/76 school-year saw major campus expansion nearing completion at Malaspina College and under way at the College of New Caledonia. Cariboo College library and gymnasium buildings were completed, while Capilano College had major expansion in portable buildings and a four-storey facility. Douglas College proceeded with leasehold renovations to its Richmond campus, while Fraser Valley College completed leasehold developments at its Abbotsford and Chilliwack locations. The four new colleges—North Island, Northwest, Northern Lights, and East Kootenay —commenced operations in September, utilizing leased space and portable buildings.

Capital expenditures for the 1975 calendar year were:

	$
Sites	2,290,658
Buildings	16,098,052
Equipment	6,289,221
Other	794,585
Total	25,472,516

SCHOOL BOARD ORGANIZATION

During the school-year which ended June 30, 1976, the number of school districts in the Province remained at 75. There were 69 municipal school districts and six rural districts.

In regard to the size of school boards, two had three trustees, 18 had five, 36 had seven, 17 had nine, and two districts had Official Trustees.

TRANSPORTATION—CONVEYANCE OF PUPILS

The following statistics give details of the conveyance of school-children during the 1975/76 school-year:

(1)	Number of school districts providing transportation	72
(2)	Total number of vehicles	942
	(*a*) District-owned	672
	(*b*) Contract	266
	(*c*) Other (water taxis, etc.)	4
(3)	Total daily approved mileage	79,422.1
(4)	Total number of "shareable" pupils carried daily	98,998
(5)	Total number of "non-shareable" pupils carried daily	16,468
(6)	Total number of all pupils carried daily	115,466

Transportation assistance payments are made available by boards to the parents of pupils who reside in isolated areas of the Province where there are insufficient pupils to establish a bus route or a school with the appropriate grade. In the 1975/76 school-year, the Province provided grants of $1,737,656 for 3,922 pupils in 63 school districts to assist boards with these payments.

Effective January 1973, school districts became eligible for special grants for cold-weather transportation to increase local flexibility in setting walk limits and to provide additional transportation services during the cold months. Grants in the amount of $2,020,056 were made available for this purpose in 1975/76.

BOARDING ALLOWANCES AND DORMITORIES

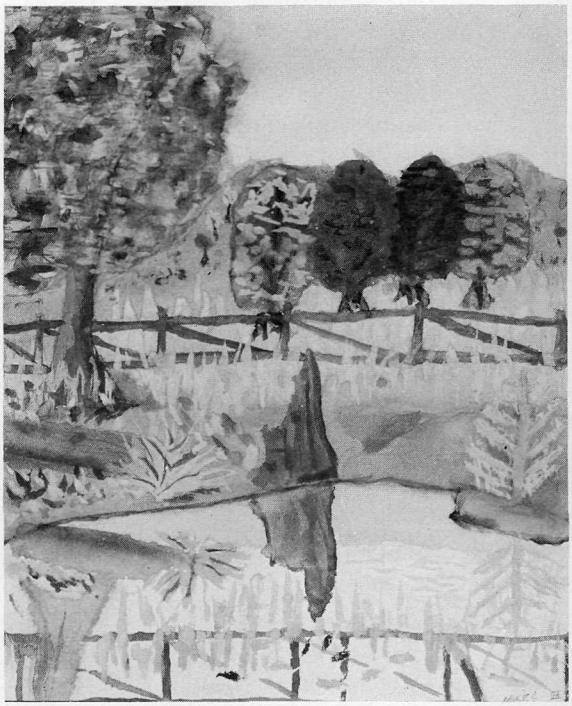
A school board may provide boarding allowances for pupils who are not able to utilize transportation or dormitory facilities. Although a board may pay an allowance it considers appropriate, the amount which the Department will accept as a shareable cost is $100 per month. In the 1975/76 school-year, the Province shared in boarding allowances for 369 pupils at a cost of $369,000.

The need for dormitory accommodation is continuing to decline. A summary of dormitory data for the year will be found among the statistical tables in this report (*see* Table 3.7).

ADULT SCHOOL-CROSSING GUARDS

In 1976 a total of 44 school districts received Department sharing in the employment of adult school-crossing guards for 236 crossing points. In addition the Department continued to supply standard equipment kits for each guard.

Changes made to the *Motor-vehicle Act* now provide adult school-crossing guards with legal authority to control traffic, thus enabling them to better carry out their function.



Mike Correia

ISION OF COMMUNICATIONS

e 1975/76 school-year was a pro-
ve one for all branches of the Division
mmunications.
rhaps the most noticeable project, from
ublic's point of view, was the tele-
ı series *Interface: Science and Society*
ıced by the Provincial Educational
e Publication Services Branch took
al steps to improve its operation,
ding the rental of warehousing
ies in Vancouver and the introduction
mputer services to its management
ms.
was a busy year also for the Data
ces Branch, which began work on a
nanagement information system to
the Department in the management of
hole education enterprise. The branch
xpended great effort toward improv-
e flow of data to other divisions,
tments, and governments, in both the
ls and post-secondary areas. Much of
ork was made easier with the co-
tion of the B.C. Public Schools
tics Committee and the B.C. Post-
dary Statistics Committee.
e Information Services Branch con-
d to publish the paper *Education Today*
hly during the school-year. It
ded informative and interesting articles
e Department's activities and policies
fessional educators and others.
e division also contributed on behalf of
epartment, to the B.C. School
rians' Association, enabling it to
ıct workshops throughout the Province
ist librarians with the selection of
ials.

VINCIAL EDUCATIONAL IA CENTRE

ıjor changes were introduced in the
bution services of the Provincial
ational Media Centre in 1975/76. The
f these was the use of a computer for
servation of films which also provides
ls and colleges with immediate con-
tion about the availability of films they
st. The second innovation offered
tion of a courier service in place of
ostal service for the delivery of films
ther media materials.

More than 250 new titles were added to the videotape catalogue and 75 to the film catalogue, following the previewing of 1,500 film and television programs. The catalogues, as well as teachers' guide-books for school broadcasts, and other supplementary print materials, were distributed to all schools and colleges.

Production of the 15-part television series *Interface: Science and Society* was completed during the year, and the series was made available to cable systems as well as to individual schools and colleges. The weekly cablecasts were supplemented by a full page of related news articles carried once a week by *The Vancouver Province* newspaper. This unique project resulted in the formation of community discussion groups using the newspaper and television programs as a basis for directed study.

The production unit produced several films for use in school broadcasts carried by the CBC. One of these, *Fish Farming,* from the four-part series *Marine Biology,* was awarded second prize at the international exhibition of aquaculture films in Kyoto, Japan. Radio production was also undertaken by the Provincial Educational Media Centre during the past year, with completion of the series *Kids' Radio,* written and performed by elementary school-children and carried by CBC in school broadcasts time periods.

Videotape duplication continued as a major function of PEMC, which provided nearly 10,000 videotape programs to schools and colleges.

Another service provided by the media centre was the negotiation of bulk film and videotape purchases on behalf of school districts and colleges. Savings of nearly 50 per cent were realized on purchases of more than 4,000 videotapes and 1,000 films.

EDUCATIONAL DATA SERVICES

During the 1975/76 school-year this branch, established in 1975, made considerable progress in improving the supply of educational data to the Department, to other departments of the Provincial Government, and to Federal and Provincial agencies and organizations in the education field.

The use of joint committees such as the B.C. Public Schools Statistics Committee and the B.C. Post-secondary Statistics Committee was an important factor in the development of responsive programs in data analysis. By means of these committees the branch was able to consult widely with representatives of organizations such as the B.C. School Trustees Association, the B.C. Teachers' Federation, and the B.C. Principals' and Vice-Principals' Association.

Working closely with the B.C. Research Council, the Educational Data Services Branch designed and developed a number of new and innovative data processing programs. These programs will enable the Department to utilize more fully existing data and further upgrade its services, particularly in the post-secondary area where much work has been done on improving data availability on vocational courses and career technical education.

The main concern of the post-secondary side of the branch was community college data, as the Universities Council of B.C. is already collecting university data. The main task of the year was the wholesale revision of Form TV-27, used to collect enrolment and training-days data for vocational programs.

In the public schools area, the B.C. Public Schools Statistics Committee continued to play a major role in the consolidation of forms and the elimination of duplication.

Several statistical reports were expanded, including the basic enrolment data booklet and the public school teacher information booklet. As well, a special report was prepared for the Division of Communications conference on the collections of library print and non-print materials in the public schools as well as the expenditures on collections and staff. This is the first time such detailed information has been available for public school libraries on a school district by school district basis.

Also in the 1975/76 school-year a five-digit school coding system was adopted which gives a unique code for every public school in the Province. Fifteen districts took advantage of the opportunities to integrate their coding systems with the Departmental system so that both would have the same code numbers for the schools.

A workshop was held in October 1975, at which time the Enrolment Forecasting Model and the Teacher Demand and Supply Model, both developed by the B.C. Research Council for the Department of Education, were presented to members of the educational community.

PUBLICATION SERVICES BRANCH

In the continuing struggle to maintain efficient outflows of learning resources to the schools of the Province, warehousing facilities were utilized in the Greater Vancouver area during the 1975/76 school-year. Selected materials were sent to the new Vancouver warehouse for redistribution in carton lots to the schools of Greater Vancouver, which have approximately 40 per cent of the student population of British Columbia.

Computer services were introduced into the operation and a data base is presently being established to permit more efficient inventory control and improvements in the ordering and supply service of the branch.

Purchases of learning materials during the 1975/76 school-year resulted in the payment of invoices in excess of $8 million.

During the year the Department's printing operation was placed under the control of the Publication Services Branch. Originally, print services evolved to meet specific and limited publication requirements of the Post-secondary Curriculum Development Branch. The shift to the Publication Services Branch allowed print services to serve the wider range of publication needs of the Department.

Doug Alton

STATISTICAL TABLES

[1] Actual enrolment is defined as the number of pupils actually enrolled for whom an attendance record is required to be kept as of the reporting date.

In addition to the number given above, there were enrolled:	
Secondary School Correspondence classes, regular students (exclusive of the 2,461 officially registered in other schools)	3,689
In the Elementary School Correspondence classes, regular students	1,009
Under section 20 of the Public Schools Act, pupils receiving instruction	226
	4,924

Adult Education

Canadian Vocational Training Program —	
Day	38,897
Night	14,574
Public School Adult Education	140,972[2]
Secondary School Correspondence (adults only)	8,875
Elementary School Correspondence (adults only)	36
Public colleges and British Columbia Institute of Technology —	
Full-time	14,632
Part-time	18,193
	236,179

[2] Includes 115,253 nonvocational.

TABLE 1.2 Distribution of Pupils by Grade and Sex

The following table provides a distribution of pupils by grade and sex for September, 1975 and a comparison of the totals with September, 1974.

Grade	Male	Female	Total Sept. 1975	Total Sept. 1974	Ratio 1975: 1974
Secondary					
Grade XII	17,180	17,683	34,863	32,915	1.059
Grade XI	20,044	19,905	39,949	38,555	1.036
Totals, Senior Secondary Grades	37,224	37,588	74,812	71,470	1.047
Grade X	22,619	22,058	44,677	43,196	1.034
Grade IX	23,497	23,055	46,552	46,909	0.992
Grade VIII	24,399	23,304	47,703	47,271	1.009
Totals, Grades VIII to X	70,515	68,417	138,932	137,376	1.011
Occupational 3	—	—	—	1,139	—
Occupational 2	—	—	—	1,283	—
Occupational 1	—	—	—	1,353	—
Totals, Occupational Classes	—	—	—	3,775	—
Secondary Special	3,519	1,962	5,481	—	—
Totals, Secondary Grades	111,258	107,967	219,225	212,621	1.031
Elementary					
Grade VII	23,284	22,334	45,618	45,383	1.005
Grade VI	22,639	21,681	44,320	45,574	0.973
Grade V	20,737	19,594	40,331	44,102	0.915
Grade IV	19,142	18,156	37,298	40,022	0.932
Totals, Grades IV to VII	85,802	81,765	167,567	175,081	0.957

Source: Form AD — Division of Financial Services.

Note: Calculation of F.T.E. pupils — each Grade I through XII pupil is counted as 1.0; each Kindergarten pupil is counted as 0.5. Calculation of F.T.E. teachers — part-time as well as full-time teachers are counted. Each part-time teacher is counted according to the appropriate decimal fraction of full time (i.e. a half-time teacher is counted as 0.5). All district-wide (i.e. directors of instruction, supervisors, teacher consultants, coordinators, district librarians, district counsellors, relieving teachers, etc.) as well as school-attached teachers (i.e. principals, vice-principals, department heads, librarians, counsellors, regular classroom teachers, etc.) are counted.

1. Average daily attendance as a percentage of FTE net enrolment. Since 1968/69 percentage of attendance is total actual attendance as a percentage of total possible attendance.
2. The total expenditure for public schools was borne by the Government.
3. Excluding unknown expenditure made for incidental expenses in city school districts.
4. Since 1922/23 this amount includes the annual grant from the Government to the provincial universities and since 1963/64 to school district and regional colleges.
5. Since 1955/56 this amount is exclusive of capital expenditures from by-law funds.
6. The numbers of teachers reported from 1966/67 on include district-wide teachers with supervisory and administrative duties. These district-wide teachers were excluded from this table prior to 1966/67.
7. Since 1973/74 the number of teachers is reported as of September 30th rather than June 30th.

TABLE 3.2 Expenditure for Education — Calendar Year 1975
(Exclusive of Capital Expenditure for By-Law Funds)

Total Expenditure by School Districts (including Colleges)				$ 795,058,251
Add:	Department of Education expenditure for administration, Correspondence Schools, Teachers' Pension Fund, free textbooks and maps, insurance, adult education, vocational and technical schools, grants to colleges, universities and School Districts, etc.		$710,534,271	
Less:	Government grants to School Districts included in School District expenditure:			
	Direct grants	$345,170,465		
	Grants to reduce local taxation	92,013,918		
	Total Government grants to School Districts		437,184,383	
	Gross total other Department of Education expenditures			273,349,888
Grand total expenditure				$1,068,408,139

TABLE 3.3 Cost Per Pupil — Calendar Year 1975

Grand Total Cost of Education			$1,068,408,139
Deduct:	School District expenditure not affecting pupil cost:		
	Colleges and other non-operating expenditures	$ 62,758,893	
	Debt charges	67,602,162	
	Current non-shareable capital	8,683,161	
	Total School District reduction	$139,044,216	
	Department of Education expenditures for post-secondary and adult education, correspondence schools, technical and vocational schools, grants to colleges not included in School District deduction, universities, etc.	224,524,616	363,568,832
	Total Operating Costs		$ 704,839,307

Operating cost per pupil based on average daily attendance of 495,715 ..... $1,421.86

TABLE 3.4 Expenditure by School District for The Calendar Year 1975

Summer Session, 1975	4,051	1,741	(4)	116	5,908
Interim Session	1,891	—	—	42	1,933
Totals	10,672	3,941	3,230	296	18,139
Grand Totals	30,652	9,452	9,942	695	50,741

Source: Departmental Annual Report Forms. Data reported as at December 31st, except for SFU; SFU data reported as at October 15th, February 15th, and June 15th.

Notes: [1]Excludes those enrolled in noncredit and other courses not leading toward a university degree.

[2]Simon Fraser Undergraduate enrolments are based on the sum of the enrolments for all 3 terms divided by 2; Graduate enrolments are based on the sum of the enrolments for all 3 terms divided by 3.

[3]U.B.C. Off Campus enrolment is included with On Campus enrolment.

[4]Simon Fraser Summer Session included in "full-time" and "part-time".

Source: TV-27 Enrolment Reports. Financial Services Division.

Notes: [1]Includes 3,751 on Register at June 30, 1975.

[2]Capilano enrolments are from December 1, 1975 to June 30, 1976.

[3]Enrolments for English Language Training at Vancouver Community College for 1973-74 and 1974-75 were incorrect. The enrolments for these two years should have been 928 and 925 respectively (instead of 5,228 and 15,226), and the total vocational enrolments for V.C.C. should have been 9,017 and 8,344 respectively.

Also, Welding Tests are excluded from this year's report, as these students are not full-time enrolments. Welding Tests accounted for 2,604 students in 1973-74 and 3,013 students in 1974-75.

Taking into account these two sets of changes, the total provincial enrolments that are comparable to this year's figures are 32,947 for 1973-74, and 36,868 for 1974-75.
