THE CRESTON REVIEW

VOL. XXIV — CRESTON, B. C., FRIDAY, FEBRUARY 23, 1934 — No. 48

Badminton Talent Annexes Cup

Mrs. Chandler and Miss Jean Henderson Win Three Straight to Capture Consolation Honors—Best in Mixed Doubles

For the first venture into championship play Creston badminton club feels pretty good over their showing at the East Kootenay tournament at Cranbrook at the weekend, in which the consolation cup in the ladies' doubles was annexed by Mrs. R. M. Chandler and Miss Jean Henderson of Creston—with second place honors in this section also coming to Creston, Mrs. Levirs and Miss Cecille Olivier furnishing the opposition to Chandler-Henderson in the final consolation round play.

While Creston failed to snow in any of the main events, they were troublesome in the mixed doubles. Mrs. Chandler and W. R. Long forced the play into overtime in the opening set which ended 18-17, and captured the second set 3-15, dropping the third 15-11. Miss Jean Henderson and J. P. MacDonald gave an equally good account of themselves, going into overtime in the first set, winning the second handily but losing the third. Miss Hazel Hobden and C. H. Hare had a similiar experience, although no overtime was required to eliminate them.

The handsome piece of silverware in the consolation division was brought back to Creston and is now on display at the drugstore, along with the two vases that are the permanent property of Mrs. Chandler and Miss Henderson.

The club celebrated the auspicious occasion in fitting fashion at the club play at the pavilion on Monday night, at which a supper was served, and complimentary talks given President J. P. MacDonald and F. V. Staples.

Play at future tournaments was discussed at the Monday night session, and it was decided that more serious attention would be given to taking a hand in future tourneys. In this connection a committee of ten was named to determine the best plans to pursue, one of which will be to enlarge the playing floor, if possible, to four courts.

Arrow Creek

Mrs. W. Bouey left last week on a visit with her mother in California.

A masquerade dance on Saturday evening is the social fixture for this week

The road on the east side is now impossible for travel, except by foot, and even then one has to watch his step.

The roads are so bad that Pastor Story of the Full Gospel Tabernncle at Creston, makes his Sunday trips here by horse and rig.

Arrow Creek had its first surprise party of the month on the 12th, on which occasion they helped Mr. Strobel celebrate his birthday.

P. M. Wiltse is expected back this week from Lethbridge, Alberta, where he has been visiting since the marriage of his daughter, Miss Elizabeth which took place in that city on February 9th.

Sirdar

Mrs. Koliman was a visitor at Creston on Satufday.

G. Rohacs and son, Joe, were visitors to Creston on Saturday.

F. Staples of Creston was here on his way up the lake during the week.

J. S. Wilson, Frank Hamilton and H Osborne were Creston visitors the first of the week.

Harry VanAckeran of Canyon was a weekend visitor at the home of Mr and Mrs. James Wilson.

J. P. MacDonald of the forestry, dept was at Boulder Creek in connection with departmental matters.

The school attendance has just been enlarged by two more pupils in Pat Rogers and Jimmy Tamis.

E. Gardiner was here during the week shoeing the C. O. Rodgers horses at the Boulder creek lumber camp.

Miss Rose Pascuzzo returned from Trail on Saturday where she has spent the past week visiting with friends.

The water guage indicates 2.75, a fall of 0.17 for the week. The fall registered being much less than it should at this time of the year.

The grader has been over the roads much improving the surface, and is ready to increase the scope of operations as the surface dries out.

D. Pascuzzo, with some helpers, has been engaged during the past several days, constructing a new road from the flats to the government highway for the purpose of facilitating the annual haul of hay. The road will be a decided improvement over the existing one.

Frank Pelle, who has been on the sick list for some time, was at Creston between stages on Tuesday for medical treatment by Dr. Henderson.

Walter Jackson was a business visitor here and at points up the lake at the beginning of the week, in connection with the sale of nursery products.

C. Wigen of Wynndel passed through here with a team for his camp at Twin Bays, much work having to be done to get the camp in order for summer visitors.

A heavy fog hung over the valley for several days giving much concern to engineers and train attendants on the railway. An unusual spectacle was presented to those dwelling on bench land in that the fog was level with the ground there, while above was perfectly clear.

Wynndel

Hark for wedding bells at Wynndel this week

Stan. Gregory has this week installed an electric rado—a Mantle model.

Clyde Barclay of Mettaline Falls Wash., is visiting here, a guest of Mr. and Mrs. A. Glasier.

Hulme brothers are busy cutting wood, having obtained the contract to supply Wynndel school.

"Buster" Martell returned last week from Lethbridge, Alberta, making the trip by auto.

Mrs. Patalla, who has been in Creston hosbital the p st two weeks, arrived home on Saturday.

Miss Marie Hook has returned after a few days' visit with her grandmother. Mrs. J. J. Grady, to Spokane

A. Brett and Herman Ofner were home at the weekend from their traps and report fair catch to date.

The K.K. Klub are having a military whist and dance at the community hall, Friday evening, February 23rd, at 8 o'clock.

Miss Ida Glasier was a weekend visitor at Nelson. She was accompanied home by Nick Rollick of Blake, who is spending a few days here.

Miss Flo. Wood was hostess at bridge on Saturday evening. High score prizes went to Mrs. E. Uri, and G. Benedetti. Consolation honors fell to Miss O Hagen and L. Benedetti.

The Woman's Auxiliary February meeting took the form of a social evening, Wednesday last, at the home of Mrs. C. Gregory. The March hostess to the W. A. will be Mrs. Wood.

Mrs. R. Uri was at home to a party of friends at a St. Valentine tea on Wednesday last. The rooms were appropriately decorated for the occasion and the hostess was assisted in entertaining the party, who numbered 14, by her daughter, Miss Ellen, and Mrs. P. Lachat.

The school children had a valentine party Wednesday afternoon last. Games were played in the junior room, after which the val ntine box was opened and the valentines delivered by the postman. A number of former pupils and some of the parents were in attendance and all much enjoyed the afternoon.

Creston Men Eliminated

Creston senior men won their game against Kimberley, 28-22, but lost the series and the right to enter the second round by a total of 48-65.

Kimberley failed to bring along an umpire with the result that Referee Levirs had to handle the game alone. The teams took full advantage of his difficulty in covering the large local floor and there was plenty of rough staff pulled off by both sides. Seventeen personals were called and as many more missed.

The local team put up a good game, at one time leading by seven points, only to have the lead cut by a Kimberley rally. Doug. Corrie played beautifully at guard, and Holmes and Coulling made a good showing on the forward line. Creston lost their opportunity to pile up an impressive lead in the first ten minutes when shot after shot went wild in easy tries. After that the locals settled down, but so did Kimberley, and opportunity did not knock again. After that it was a rough, hard-checking, close struggle with every aspirant for shooting honours having literally to fight his way to the basket. The Teams:

Kimberley—McVicar 1, Oliver 12, Yolland 5, Foubister, Shannon 2, Nicholson 2: Total 22

Creston—H. Corrie, Coulling 4, Martello 2, Crawford 1, D. Corrie 6, Farris 4, Holmes 6. Total 23.

In a preliminary, a weakened Review team dropped a close decision to an all-star girls' team.

Ladies' Hospital Auxiliary Meets

Furnish Material and Pay for Minor Improvements—Raffle a Persian Lamb—Name Representative on Board Directors

The February meeting of Creston Hospital Women's Auxiliary was held on Thursday afternoon in Trinity United Church hall, with the president, Mrs. R. Stevens in the chair, and 9 members and one visitor present.

Fred Smith generously offered a Persian lamb to the Auxiliary, and it was agreed that this should be raffled, drawing to take place at the Easter Monday dance.

The Auxiliary agreed to pay for materials needed to make the lift at the hospital and to erect a booth to enclose the telephone. Some money will also be spent on other things needed.

Mrs. Fransen, Mrs. Maxwell and Mrs. Archibald donated chairs. Several donations of crockery have been made by Mrs. Archibald, Mrs. M. Young, Mrs. T Goodwin, Mrs. Maxwell and Mrs. W Cartwright. Miss Hanson has given feathers for a pair of pillows

Mrs. Chas. Murrell reported for the buying committee and Mrs. Maxwell for the visiting committee and for the next month the latter committee work will be in charge of Mrs. F. Staples and Mrs. G. Sinclair. Mrs. C. H. Hare was chosen to represent the Auxiliary on the hospital board, in place of Mrs. R. Stevens, who was elected a director at the annual meeting.

The military whist on February 9th was a success, cash intake amounting to about $54. Various plans for raising money were discussed, and preliminary arrangements were made for the Easter Monday dance. The tea hostessess were Mrs. Avery, Mrs. M. J Boyd, Mrs Kinkade and Mrs. Archibald. The free will offering was $3.45.

Board of Trade '34 Committees

Makeup of Six Standing Committees Approved—Two New Members Received—Stevens Fair Trade Move Endorsed.

Including President, W. L. Bell, who presided, the February session of Creston board of trade on Tuesday night attracted an attendance of an even dozen members, with the chief business having to do with the striking of the 1934 standing committees and confirming the appointment of R. J. Forbes as secretary, replacing G. R. John, who had tendered his resignation.

Applications for membership from A. Corrie and Cecil Moore were favorably received, and accounts totalling $29.75 were passed for payment. Letters from Trail board of trade, Hon. H. H. Stevens and W. K. Esling, M.P.P., in connection with resolution forwarded them in January in connection with Creston Reclamation Company dyking project were read and ordered fyled.

A suitable letter was ordered sent Hon. H. Stevens commending him upon his action in bringing the matter of fair trading, or the menace of unethical or unfair trading practices to the attention of the Dominion government. On motion of Chas. Murrell—Jas. Cook, the standing committees for the year were approved as follows:

Publicity—C. F. Hayes, S. A. Speers, R. J. Forbes.

Municipal and Hospital—Jas. Cook, Jas. Cherrington, Chas. Murrell.

Transportanion—Col. Mallandaine, F. V. Staples, G. Sinclair.

Industries—C. O. Rodgers, C. W. Allan, J. G. Connell.

Agriculture—F. H. Jackson, Guy Constable, W. McL. Cooper.

Membership and Entertainment—Geo. Johnson, John Murrell, Dr. McKenzie.

The windup of the session was an informal discussion of the dyking of Kootenay flats, including industries to locate in Creston. The Erickson and Alice Siding highways came up for consideration, but no action was taken.

The letter from W. K. Esling, M.P., in connection with the dyking resolution, pointed out that Creston district now being in East Kootenay, which is represented by Hon. H. H. Stevens, minister of trade and commerce, the dyking communication had passed on to the East Kootenay member. The letter from Trail board of trade advised the atter would come up at the February meeting of that organization

SEND IN YOUR BALLOT

Orchatdists who have not, as yet, returned their ballot in connection with the Growers' Stabilization Committee 1934 marketing plan are asked to turn them in to the local board secretary, L. Littlejohn, Erickson, not later than Friday, March 2nd.

Reports from the Okanagan at the middle of last week indicated that more than 50 per cent. of the ballots had come in and it is stated that 97 per cent. of these are in favor of the plan.

Canyon City

Mrs. J. G. Wearmouth and Miss Holly Bond, who have been patients ae Creston hospital for some days past, were able to return home during the week.

Mrs. Willoughby is a visitor with Nelson friends this week, leaving for that city on Friday.

Right now the roads in Canyon district are just as bad as the worst ever known, which was during the logging operations in the very wet and early spring of 1917.

The electric light was turned on at the community hall for the first time on Tuesday night at the C.C.F. meeting, and makes a wonderful improvement. The work was almost entirely voluntary and was done under the supervision of Messrs. A. Spencer and W. E. Searle.

Canyon is looking for a large influx of play goers on Thursday night, March 1st, for the Canyon Players presentation of the stellar comedy, "Yimmy Yonson's Yob," which is being produced to secure funds for paying for wiring the hall. Curtain is at 8 o'clock, and the admission is 35 and 25 cents.

There was a good turnout for the annual meeting of the C.C.F. organization at Canyon at the hall on Tuesday night, at which most of the old officers were re-elected, as follows: President, F. Knott; vice-president, Jas. Simister; secretary-treasurer, O. M. Samuelson. Executive, Mrs. F. Knott, G. Messinger, W. F. Searle. Reports submitted showed that Dr. Walley, the C.C.F. candidate in the November eleltion, had conducted the entire campaign at a cost of $216. Arrangements are being made for an open meeting on March 9th, at which Jas. Sims of Cranbrook, a well known labor leader will be the speaker.

Wynndel W.I. Meeting

The February meeting of Wynndel Women's Institute was held ou Tuesday afternoon at the United Church, with a good attendance. Arrangements were made for the dance to be held St Patrick's eve, March 16th. Special prizes will be given for novelty dances, with R. Walde's four-piece orchestra supplying the music.

The sixth anniversary of the Institute was arranged for March 29th when the entire adult population of the district will be guests of the Institute. Entertainment will consist of a musical programme, military whist and dance, with lunch.

Wynndel's annual fall fair was up for discussion. The members decided to call a public meeting for Monday, February 26th, in the hall annex. With a 2000 entry last year it was thought best to have a strong men's committee to work with the ladies for a still larger and better fair for 1934.

The meeting endorsed the recommendation that Miss Charlotte Whitton be appointed to the vacancy on the Child Welfare Board caused by the retirement of Dr. Helen McMurchy. Tea hostesses were Mrs P. Hagenf Mrs. and Miss Betty Hulme.

Women's Institute Meets

The February meeting of Creston and District Women's Institute was held on Friday afternoon at the home of Mrs. M. Young. The president, Mrs. H. W. McLaren was in charge, and there was a splendid turnout of members.

The Institute endorsed a resolution from the North Fraser W.I. which recommends the appointment of Miss Charlotte Witton as secretary of the National Council of Child Welfare. There was an interesting display of children's clothing. The articles had all been remade from old clothes.

The prize list for the 1934 school fair is being drawn up and will shortly be ready for distribution to the various scho ls.

After the business session a practical talk on gardening was given by C. B. Twigg, district agriculturist, who was accorded a well deserved vote of thanks for his effort. The March meeting is to be at the home of Mrs. M. Ross on Friday, 9th.

Tea hostesses for the afternoon were Mrs. H. W. McLaren and Mrs. W. Fraser.

F. V. Staples New Hospital Head

Unanimous Choice for President—Col. Mallandaine Declined Stand—Finances Improve—January Busy Month.

The new board of directors of Creston Valley Hospital Association had its inaugural meeting on Wednesday evening at the board room at the new hospital, with an attendance of 12 members of the board of management.

Col. Mallandaine, president of the hospital since its opening in 1930, reviewed the hospital work since its inception, and paid tribute to the efficient service rendered by the staff. He also drew attention to the valuable assets built up in spite of depressed business conditions. In concluding Col. Mallandaine stated that due to pressure of his own business affairs he would not stand for re election.

Election of 1934 officers followed, and resulted in the unanimous choice of F. V. Staples as president, F. H. Jackson as vice-president, with H. A. Powell continuing as secretary-treasurer. It was announced Mrs. C. H. Hare had been named to represent the Hospital Women's Auxiliary, and that Councillor Chas. Murrell would be the village representatiae. Announcement of the government's nominee for the board is expected this month.

A hearty vote of thanks was accorded the retiring president, and F. V. Staples in assuming the board chairmanship complimented his predecessor and previous directors on the strong financial position of the hospital, and outlined plans for a drive to obtain the $2129 needed to clear the new hospital building of debt.

The secretary reported January a busy month with 181 hospital days, showing excess of income over expenditure and an encouraging response for appeals for payment of accounts that had made a great reduction in the amount of accounts outstanding at the end of the year. The same favorable showing is being maintained in February, which further confirms the board's contention that the hospital can sustain itself in so far as operating costs go.

Votes of thanks were accorded R. R. Eastlake for donation of an electric refrigerator, West Kootenay Power & Light Company for wiring the second floor, J. F. Coates for electrical equipment and inspection services, the United Church for use of basement for meetings, and Mrs. Archibald and W. H. Avery for vegetables.

Erickson

Jack Connell is a visitor at Nelson this week.

Anglican Church service at the schoolhouse on Sunday afternoon at 3 o'clock

Mr. Kotz of Cranbrook is a visitor this week, a guest of Mr. and Mrs. A. E. Penson.

Mrs. L. Leveque of Medicine Hat, Alberta, arrived on Monday on a visit with Mr. and Mrs. L. T. Leveque.

Miss Marion Heric, who has been visiting friends in Crankrook and Kimberley for the past month, arrived home on Friday.

Frank Putnam, M.P.P., got away on Thursday last for Victoria, where he is in attendance at he session of the legislative assembly, which opened on Tuesday.

The Tuesday Pancake Tea and sale of cooking at the home of Mrs F. Putnam, in aid of Christ Church Erickson Ladies' Guild was a success. The cash intake was about $25.

The many friends of Mrs. L. T. Leveque are pleased to learn that she was able, at the end of the week, to return home from Creston hospital, where she has been a patient for a couple of weeks.

The Erickson Ladies' Hospital Auxiliary were hossesses, at the home of Mrs. F. Celli, on Wednesday last, at a miscellaneous shower in honor of Mrs. Bert Hendy (nee Florence Craigie). The recent bride received many useful gifts. A lunch was served to close proceedings.

Miss Madeline Putnam left on Friday for Vancouver where she expects to remain for some time. The evening previous she was guest at a farewell party given in her honor at the Telford home by Misses Marcella Sanford and Ruth Cartwright. Bridge was the feature, and high score prizes went to Miss Nora Payne and Perley Putnam. Consolation prizes were captured by Miss Kate Payne and Harry Webster. Following cards the guest of the evening was remembered with a suitable gift, and lunch was served to close a much-enjoyed evening.

Prevention Of War

As this article is written flaring headlines in the daily newspapers tell of rioting in the streets of Paris and in many of the provincial cities and towns of France; of barricaded streets and buildings in Vienna and other Austrian centres of population where Government forces resist and seek to put down an uprising on the part of Socialists in that country; of warlike preparations on the part of Russia in Siberia in anticipation of a struggle with Japan. In a word, reports from both Europe and Asia seem to indicate that just below the surface of things there is a seething volcano that may at any moment burst forth to spread death and destruction among the nations on a scale that might surpass the Great War of 1914-1918.

And while the front pages of the daily papers feature these alarming reports, inside pages in many of the larger papers are devoted to the presentation of hundreds of pictures of actual scenes taken in the Great War, and with particular reference to the part taken in that grim struggle by the manhood of this Dominion. Many of these pictures are terrible, shocking, gruesome. They depict little or nothing of what used to be regarded as the glamour and glory of war; instead, they reveal a life passed in the midst and hourly expectation of death, or mutiliation worse than death, and in surroundings such as the meanest beast would not tolerate. These pictures illustrate modern war for the awful thing it is, and no doubt the object in presenting these pictures to the public at this time is to develop a horror of war and to strengthen the determination of the people of Canada to resist any future outbreak of hostilities with all the influence it is possible for them to exert.

Admitting the very worthy motive actuating the publication of these pictures, the question nonetheless does intrude itself as to whether such publication will serve the desired purpose; rather, whether the pictures, despite their gory and repulsive nature, may not have exactly the opposite of the desired effect with many persons. It is to be remembered that we are living in very difficult times; that thousands of men are out of employment, living in idleness upon relief payments from the State; that, in particular, the youth of the country to a very great extent are unable to find avenues in which to employ their stored up energies and give full play to their initiative and ambitions. To many of them comes the feeling, amounting almost to a conviction, that anything would be better than the deadening routine of a life of having nothing to do.

Faced at such a time with a pictorial review of all the activity, the excitement, the new experiences and thrills, and the adventure inseparable from war, is there not grave danger that, instead of shocking our youth with the horrors and sufferings of war, we may not actually develop in the minds of many the thought that they would not be averse to undergoing the hardships, sufferings and possible death inseparable from war in order to substitute for their present routine of idlenes the experiences, excitements and adventures of war.

In all of us there is a longing for adventure. We all desire to visit foreign lands, to see and experience something new and different. Down through the centuries, and probably never more so than in this present age, men,—even women,—enjoy speed, action, thrills. Danger means nothing in these days to people desirous of establishing some new record; people are ready to risk their lives in almost every conceivable kind of an enterprise.

Is it wise, therefore, no matter how laudable the object sought to be served, to present to the youth of Canada at a time when, temporarily at least, thousands of young men in their late teens and early twenties are at loose ends, with nothing to do, daily instalments of a pictorial history of the greatest war of all times showing what their fathers and elder brothers experienced of action and adventure as well as of suffering and death.

There is no glory in war; there is no gain in war. Victor suffers almost as greatly as the vanguished. The last Great War has surely impressed that fact upon the nations. And the aftermath of war, the enormous financial and economic destruction and loss which inevitably follows all wars, brings sorrows, sufferings and ever accumulating losses almost as great as the toll of war itself. Indeed, war instead of solving problems only creates new and even greater ones, leading inevitably to another war. That is the basic cause of the unprecedented length of the present depression, because the apparent inevitability of another world war prevents any return of confidence; rather every person and every nation is planning and preparing for themselves in the light of what may happen and the happening of which is beyond their own control.

The Canadian people do not want war. If the other nations of the world spent no more money or thought on armaments and preparation for war than Canada does, there would be little danger of another war afflicting this old world. The Canadian people are opposed to war, and are desirous of doing everything they can to prevent it. The question is: Are we going about our educational work of prevention in the right way? Rather, is there not a considerable degree of danger that, quite unintentionally, we are creating an impression in certain quarters that, after all, another war might not be wholly undesirable.

About a quarter-million sea-going passengers arrive and depart from London in a year.

Criticize yourself to-day and others tomorrow.

Buildings erected in Shanghai, China, last year are estimated to have cost over $40,000,000.

Oh, well, some fenders were on pleasure bent, says the Brandon Sun.

A Tired, Worn Out Woman Can't Make a Happy Home

MILBURN'S HEALTH AND NERVE PILLS

There is no happiness in the home when the mother is sick and worried by the never ending household duties. She gets run down and becomes nervous and irritable, has shortness of breath, faint and dizzy, can't sleep, and gets up in the morning feeling as tired as she went to bed, and is downhearted and discouraged.

Milburn's H. & N. Pills will soon convince women it is not necessary to suffer, as they build up the nervous system and bring back the former health and vigor.

Will Attempt Daring Aeronautical Feat

British Parachutist Anxious To Make Drop From Stratosphere

"I want to be the first man to drop from the stratosphere and I'm ready to gamble my life on a jump from a height of 25 miles."

John Tranum, the British parachutist who has survived more than 2,000 jumps, announced in these words the most daring aeronautical feat as yet planned by man. He is appealing to M. E. Ridge, youthful American, who intends to ascend 25 miles by balloon, for passage in the open basket in order to make the leap.

Experts say he will have only a 50-50 chance of emerging alive from the drop, even if Ridge should pierce the stratosphere with his daring passenger.

Tranum is tired of "experts" and maintains that a healthy man can safetly pass through the terriffic ordeal of a 25-mile drop if properly clothed and equipped with a special breathing apparatus. If Ridge accepts the offer, the feat will be attempted in England during 1934. Such distinguished scientists as Prof. J. B. S. Haldane, respiration authority, and Sir Robert Davis, are heartily supporting Ridge in his efforts to arrange for the 25-mile balloon ascent in an open basket. That is twice the height achieved so far in a sealed gondola.

"I've already been up to heights of more than four miles and my record delayed drop was from a height of three and a half miles," said Tranum.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile —No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c. at all druggists. 54

Want St. Paul's Protected

No Excavation In London Cathedral Area Should Be Allowed

Excavation and operations in the subsoil within a defined area around St. Paul's Cathedral (London), should be controlled by Act of Parliament. This suggestion follows publication of the full report which is based upon investigations of Sir Alexander Gibb and Ralph Freeman, British engineers. The suggestion is that a "sacred area" should be established around St. Paul's in which area "some control is essential, up to the point of prohibition in an extreme construction of all underground works." The report expreses the desirability of avoiding traffic vibrations in the vicinity of the cathedral and urges that means be devised to this end. Dangers to the immense and ancient fabric of St. Paul's Cathedral have been present for many years.

Indigestion, Gas

Mrs. Elizabeth Stewart of 129 S. Caroline St., Hamilton, Ont., says: "I had indigestion most all the while, and was continually bloated with gas. At times I had heartburn and I would become dizzy-headed frequently. But Dr. Pierce's Golden Medical Discovery built up my system and entirely rid me of the stomach distress. I have had no stomach trouble in years." All druggists. Write Dr. Pierce's Clinic, Buffalo, N. Y.

The Beak Too

"I don't want to eat this egg. It's not a nice egg," protested the six-year-old daughter of the house at the breakfast table.

"Mary," said her mother sternly, "you are always complaining of your food. Eat what is placed before you —every bite of it—without another word, or else I'll have to give you a good spanking."

All was quiet for some minutes. Then from the other end of the table sounded a mournful voice:

"Mother, dear, do I have to eat the beak too?"

For economy and satisfaction, choose the tobacco that burns longer in your pipe and that you can cut coarse or flakey to suit your own particular taste.

DIXIE

PLUG SMOKING TOBACCO

Better Than Adrenalin

Inventor Describes Electric Needle To Revive Person Apparnetly Dead

Electricity as a means of resuscitating apparently dead persons was described to physicians at Philadelphia by Dr. Albert S. Hyman, of New York, inventor, who asserted several experiments have been successful.

Dr. Hyman uses a slender golden needle charged with the amount of electricity produced by the normal beating heart. This is plunged directly into the heart, he said, in the same manner that the adrenalin has been injetced for years.

Adrenalin, Dr. Hyman said, has been used with indifferent success, but the electrical invention has raised the probability of success to between 40 and 45 per cent. The instrument has proved successful in cases where death was caused by shock, in accident, child birth or operations while under ether, according to the inventor. In cases, however, where death was caused by constitutional deterioration the needle is ineffective.

GOOD RECIPE FOR CURRY

2 tablespoons chutney
1 tablespoon curry powder
2 onions
1 apple
1 tablespoon Benson's golden syrup
1 teaspoon salt
½ cup sultana raisins
2 cups stock
Mazola
Cold cooked meat, such as rabbit of chicken, cut into dice.

Slice the onions thinly and cook until brown in the mazola, add the chopped apple and other ingredients. Simmer gently for three hours, then serve with boiled rice.

Ancient Skates Found

Pastime First Known In England During Thirteenth Century

Skating in England was not heard of before the thirteenth century, and the skates used were made of the leg bones of animals. Thongs of leather fastened these to the feet. The skater would then push himself over the ice by means of an iron shod pole. Some of these bone skates have been discovered of recent years in Moorfields and in Finsbury. This probably means these places were at one time marshy fields, where the youths of London foregathered in winter for skating.

Two-Hundred-Mile Shadow

The longest shadow in the world is that of El Tilton Peak on Teneriffe, the largest of the Canary Isands. This peak rises abruptly 12,200 feet above the Atlantic and at sunrise and sunset it casts shadow more than 200 miles.

Another Surgical Triumph

Man Recovers Sight After Astounding Operation On Eyes

Henry Watson, 29 years old and blind since he was two, looks wonderingly on a world he had seen but forgotten. Behind his recovery was a triumph of modern surgery.

Watson lost his sight when disease attacked the corneas of his eye, the transparent shell that protects the exposed surface. His case remained apparently hopeless until Dr. Tudor Thomas, noted Cardiff specialist, became interested in him. From his sightless eyes Dr. Thomas peeled the diseased corneas, replacing them with healthy corneas from the eyes of two persons whose sight had failed from other causes.

Widespread interest in the case brought many famous surgeons to see Watson while he lay in hospital.

A new television station is nearing completion in Turin, Italy.

PRISON REVOLT THREATS COME FROM KINGSTON

Ottawa. — Communist agitators were at the bottom of recent threatened revolts at Kingston penitentiary, Minister of Justice Hugh Guthrie told the house of commons. It had become difficult to maintain order there because the Canadian Labor Defence League had attempted to create sympathy for the eight Toronto Reds sentenced to penitentiary more than a year ago, throughout different public channels.

"Time after time we have had threatened revolts there," said the minister, referring to the stonewalled prison on Portsmouth bar. "Every prisoner from Toronto has come there and said: 'Boys, the newspapers are for you, the churches are for you, everybody is for you. We will have another revolution and we'll all get out.' A very serious situation has resulted."

Thousands of appeals and demands, referring to the Toronto Communists, had been received by him in recent months, said Mr. Guthrie, most of them suggested or sponsored by the Canadian Labor Defence League and the Workers' Unity League.

At the same time he announced a scheme of segregation would be instituted in Canadian penitentiaries based on the plan of D. M. Ormond, superintendent of penitentiaries, which would include a board in each prison consisting of officials and a staff psychologist to examine each man.

Prison administration was discussed when Miss Agnes Macphail, the only woman in the house, proposed a parliamentary committee to inquire into prison life and the causes of crime. Debate on the motion was not concluded. Wages for convicts was proposed by Miss Macphail.

Charges that old-time barbarism was practised in Kingston penitentiary, were levelled by Gen. A. E. Ross, Conservative member for that city. He flourished a paddle, a strap used to punish recalcitrant prisoners, before the startled members and urged that wardens be prohibited from using it. Studded with holes, he claimed the paddle would lift the hide from a man's back, "shaking the flesh like a bowl of jelly."

The penitentiary, said Gen. Ross, possessed a dungeon or hole, five feet underground with restricted light ventilation only through a pipe extending to the warden's room. "That hole is there and let us remove it," he said.

Unique Collection

Sixty Parliament Houses Within The British Empire

London.—In one way or another the empire has 60 parliament houses, nearly every one following the rectangular model of the mother of parliament's debating chamber with the government and opposition facing each other.

This is well illustrated in the unique collection of pictures of the parliament houses of the empire, on exhibition at the press gallery at Westminster. The exhibition was opened by Captain Edward Fitzroy, speaker of the British house of commons.

Regulations Must Be Fair

Edmonton.—Western farmers should be compensated for reduction of wheat acreage, declared A. G. Andrews, U.F.A., Sedgewick, speaking in the legislature in the debate on the house throne speech. "Something must be done to curtail the production of wheat in order to get rid of the surplus but regulations must be fair to the farmers of the west," said Mr. Andrews.

Early Marriages

Ames, Iowa.—Prof. George H. Van Tungelin of the Iowa State College sociology department, said young people were marrying earlier and in increasing numbers. And, said the sociologist, "though one marriage in six breaks up, divorces are decreasing."

Trade With Russia

Anglo-Russian Pact To Stimulate Trade Between Countries

London.—Increased purchases of all kinds of British goods by Russia, it was learned, is the basis of an Anglo-Russian trade agreement.

The new pacts calls upon the Soviet Union to buy approximately as much as it sells to Great Britain.

This means an annual increase of About $20,000,000 in British exports, based on figures of the last normal trading year, 1932.

The correction in the present trade balance, which now heavily favors Russia, will not be made immediately, however.

It is understood the Soviets will be permitted to sell about $1,600,000 worth of goods to Great Britain for every $1,000,000 worth bought. This ratio will be gradually corrected until Russia buys as much as it sells here.

The balance will take into consideration the visible exports of each country, such as tourist trade.

To Assist Dairymen

Appeal To Government To Stop Price Cutting Of Creamery Butter

Edmonton.—An appeal to the Dominion government to provide legislation to stop price-cutting of creamery butter was made by the closing session of the 28th annual Alberta dairy convention here. The meeting elected T. M. Carlyle, of Calgary, president, and chose Calgary for the convention of 1935.

The meeting also ratified a resolution carried by the producers' section, asking for a federal marketing board and resolutions from both producers' and manufacturers' sections urging compulsory grading and marking of all butter sold at retail. The proviso was added that marking be made not effective in Alberta until implemented in British Columbia, and the resolution requested enabling legislation from Dominion and province and a copy was addressed to the B.C. Dairymen's association.

Big Fur Catch

Northern Trappers Report Largest Returns In History

Winnipeg.—Across Canada's vast northland, from the fringe of the Arctic through the barren lands and the wooded country further south, the fur trade is booming.

Northern traders reaching Winnipeg from frontier points declared the greatest fur catch in history was in progress. From widely scattered points in the isolated interior came word of phenomenal yields.

A Fort Chipewyan, Alta., trader already has 3,000 fox skins and none in that district have less than 1,000 skins, traders said. The stimulation of the trade has increased business throughout the north country. Outcoming plane and dog teams are laden with pelts.

The same story was told in northern Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

Alberta Cattle Shipment

Carload Will Be Sold By Auction In England

Edmonton.—As a result of efforts being made by the Dominion Holstein Association to find a market for surplus stock in Great Britain, one carload of southern Alberta cattle has been shipped and will be sold at auction in the Old Country, while a second car is now being selected for shipment from Edmonton. This was revealed in a report made at a meeting of the Alberta Holstein association by Harry Hays, Calgary, provincial fieldman.

Not So Many Tourists

Ottawa.—During the past calendar year 2,233,418 tourist automobiles entered Canada for a period of 34 hours; 863,136 for a period not exceeding 60 days, and 333 for a period exceeding 60 days, according to a statement issued by the department of national revenue. This showed a considerable falling-off as compared with 1932.

BLAMES LONDON TREATY

Admiral Sir Roger Keyes, who is National Conservative candidate in the North Portsmouth by-election, in an election speech, denounced the London Naval Treaty as having done "grievous harm" to the British Navy.

Long Deadlock Likely

Trade Situation At Standstill Between United Kingdom And France

London.—Indications were that a long commercial deadlock between the United Kingdom and France would result from the latest retaliatory measures between the two nations.

With a 20 per cent. increase in British duties on French goods in effect, and trade conventions giving British ships advantages in French ports denounced by France, it was considered likely in political circles that it would be a long time before there was any definite move to ease the situation.

The British government meanwhile let it be known the Anglo-Russian trade agreement, after months of painstaking negotiations, is now completely drafted ready for signature, after which it is to be ratified by the house of commons.

The pact provides for re-establishment of normal commercial relations between Britain and Russia, broken off since last April at the time of the celebrated espionage trials.

Promoted To Commander

Prince George Now Has High Rank In Royal Navy

London.—The admiralty has announced promotion of Prince George, now on a tour of South Africa, to rank of commander in the royal navy.

It is a double promotion for the king's youngest son, who has been a lieutenant for eight years. Prince George is naval aide-de-camp to His Majesty.

Farm Loan Loss

Winnipeg.—The Manitoba Farm Loans association sustained a net loss of $610,700 for the 12-month period ending April 30, 1933, according to the regular report tabled in the Manitoba legislature. The previous year's loss was $234,177.

Alberta Wheat Champion

W. J. Bryant Wins Honors at Provincial Seed Fair

Calgary.—Ten dollars won as first prize for sweet clover at last year's fair was used to purchase certified wheat seed which produced a sample of Reward that won for William J. Bryant, Boyle, Alta., the championship wheat title at the Alberta seed fair here.

It was the first time Bryant had shown wheat here but he is well known as sweet clover champion of Canada, having won first prize at the Royal Winter Fair, Toronto. He took third place in sweet clover at the World's Grain Show at Regina last year.

At the International Hay and Grain Show at Chicago, Bryant, who has only been farming for eight years, secured a second for sweet clover and a sixth for wheat. His sweet clover took first place at the Alberta fair.

Lethbridge growers took major honors. In the first judging awards announced, Hadlington Brothers of Lethbridge placed first in the spring wheat section, registered or certified. J. D. Morris, Hardisty, was second, and J. W. Shearer of Morrin, third. In the spring wheat class, early varieties, the Smith Farm, Limited, Lethbridge, placed second to P. J. Rock of Morrin, while W. S. Giffen, Lethbridge, was second in the winter wheat section, any hardy variety. John A. Neil of Morrin was first.

Top award in the open oats class, for junior grain clubs only, Grande Prairie was first, Edson second and Brightview third.

Quantity Kept Secret

U.S. Authorities Not Telling Amount Of Canadian Gold Received

New York.—Canadian gold is coming to the United States to gain the attractive price of $35 per fine ounce, but in what quantity remains a secret of the authorities.

The price of $35 is on delivery at the New York Reserve bank, the United States assay office here, or the federal mints. The seller pays freight and insurance, while the United States government deducts 1-4th of 1 per cent. for handling costs and makes miror discounts for assay charges.

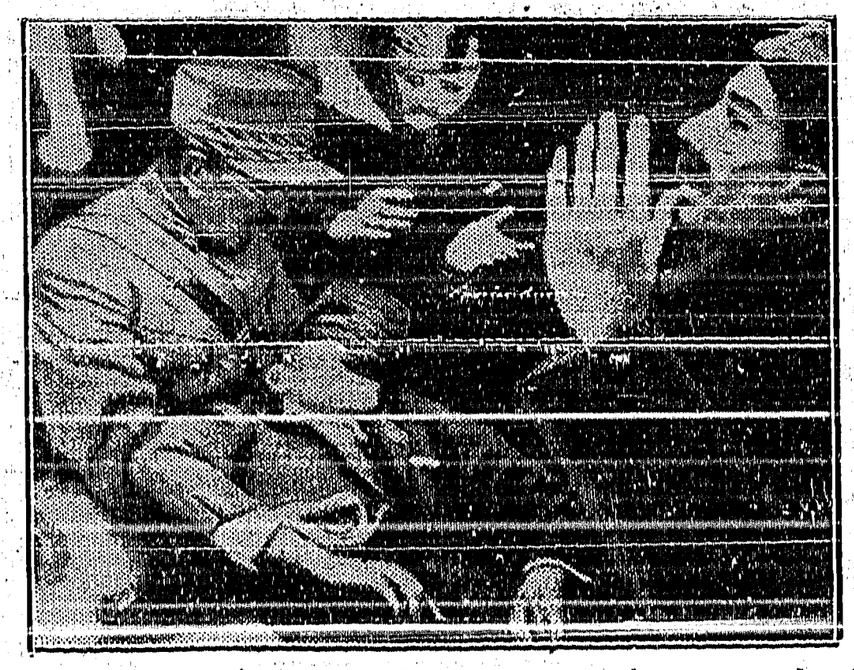
The United States government pays by cheque, 98 per cent. at the time of delivery and the remainder after the assay is completed.

Cow Testing Service

Alberta Will Provide A Limited Service To Farmers

Edmonton.—Alberta, starting April 1, will provide a limited cow testing service to farmers sending milk samples to Edmonton for testing, it was announced at the convention of the Alberta Dairymen's association. It was proposed to furnish monthly record sheets, sample bottles and preservative and transportation on samples sent by farmers under scheme. The farmer would have to go half way in keeping records of weighing and in submitting samples.

THE ASSASSINATION OF A KING



One of the most vivid assassination photographs ever made shows Mohammed Nadir Shah, King of Afghanistan, dying in the arms of a member of his staff after he had been shot in the gardens of Dilkusha Palace, Kabul, while addressing a gathering of students. The picture, made by a member of the king's entourage, was smuggled from Afghanistan through secret channels.

BRITAIN STANDS FOR JUSTICE OF AUSTRIA'S CAUSE

London.—The United Kingdom is in agreement with other nations, notably France and Italy, which hold that the integrity and independence of Austria must be maintained.

This was clearly set forth by Sir John Simon, secretary for foreign affairs, answering a question in the house of commons before eager listeners. He said the British government recognized the justice of the Austrian stand that she cannot tolerate any interference in her internal affairs "from any quarter."

At the same time the minister made it plain that Britain has assumed a "hands-off" policy toward the entire Austro-German situation until the matter is given consideration by the League of Nations council. The United Kingdom would not interfere in the internal affairs of any nation, he said.

Sir John was referring particularly to the Austrian declaration she will appeal to the League of Nations against what she considers German interference in her domestic affairs. Until the League has considered such an appeal the British government could not present its views on the situation, he added.

Photos Of Eclipse

Astronomers Conduct One Of The Most Successful Expeditions In History

Losap, Caroline Islands.—Scores of photographs which they believe will contribute greatly to further studies of light were obtained by Japanese and United States scientists during a total solar eclipse.

Because of cloudless skies and careful preparations the scientists who journeyed to this lonely mid-Pacific atoll declared themselves confident they had conducted one of the most successful expeditions in the history of astronomy.

They were sought to determine whether light of the sun's corona is direct or reflected and the angle of deflection of the sun's light—which bears on Professor Einstein's relativity theory.

Losap's 350 natives, equipped with smoke glasses which the scientists had taught them to make, took up poitions on the beach at dawn to await the promised show.

They clapped their hands in childish glee as the sun slowly disappeared, but when darkness came and a fiery crown later leaped from a blackened disk they were silent and solemn.

High Quality Seed

Certified Seed Improves Standing Of Canada's Export Wheat

Calgary.—The Alberta seed fair unanimously passed a resolution declaring that whatever system is devised to meet the provisions of the wheat reduction agreement it should not apply to wheat which is field inspected and sold for seed.

The resolution declared the production of registered and certified seed improves and maintains the quality of Canadian export wheat and the producer should be encouraged to continue the production of high quality seed.

Visiting Western Cities

Sir Henry Drayton Conducting Sound Public Finance Campaign

Toronto.—Conducting a "national crusade" in the interest of sound public finance, Sir Henry Drayton, chairman of the Canadian chamber of commerce committee on that subject, left Toronto with S. B. Gundy, Toronto, and W. McL. Clark, secretary of the chamber. They opened the campaign at Brandon, February 15, and are visiting Winnipeg, Regina, Saskatoon, Edmonton, Calgary, Lethbridge, Vancouver, Victoria and Fort William before returning to Toronto early in March.

The Stratfords are "stepping out" tonight

This is going to be a big night for Mr. and Mrs. Stratford. The Dunhills telephoned to invite them to a dinner dnnce, and they can hardly wait until its time to go.

"It's great to be going somewhere for a change," said Mr. Stratford. "This is the first invitation we've had for an age."

"And you know why," said his wife. "While we were without a telephone our friends couldn't get in touch with us. Now that we have one again, will be hearing from them often."

Nowadays most invitations come by telephone.

Kootenay Telephone Co.
LIMITED

Kitchener

Miss Jessie White was a weekend visitor with Erickson friends

C. Senesael, A. Lepage snd Fred Smith were here from Fort Steele for the weekend.

Mrs. G. A. Hunt and Miss Clara left on Sunday for a visit with friends in Cranbrook.

Brig. General Mathews and Major P. D. Harcourt of Calgary. Alberta, were here on airport business on Friday.

The ladies' hospital auxiliary are having a bridge Wednesday evening, and a dance on March 9th, with an admission of 35 and 25 cents.

Mrs. W. Slean and son, Billy, returned on Monday to their home in Corbin, after visiting a couple of weeks with her parents, Mr. and Mrs. N. P. Molander. Mrs. Molander went to Corbin with her.

The Pine Katz softball club gave Mrs. Claude Simpson (nee Beatrice Molander), a shower at the home of Mrs. C. Senesael. Bridge was played, with prizes going to Mrs. E. Driffil and Mrs. Senesael, and consolation to Miss Jessie White. The club girls served a dainty lunch, after which the guest of honor received the many useful gifts, for which she expressed full appreciation.

Pentecostal W.M.A.

There was a good turnout Wednesday afternoon at the Full Gospel Tabernacle for a meeting called for the purpose of organizing Woman's Auxiliary in connection with the Penticostal work in Creston and district. Pastor Story occupied the chair while the auxiliary constitution was being drafted, the organization starting with eght members and the following officers: President, Mrs. W. J. Truscott; vice-president, Mrs. F. G. M. Story; secretary-treasurer Miss Lillian Taylor. The organization is to be known as the Woman's Missionary Auxiliary of the Full Gospel Assembly and its object is to assist in ever possible and legitimate way in home and foreign missions, visiting the sick, caring for the needy, and helping in the work of the local assembly as much as possible. Regular meetings are to be held every second and fonrth Thursday. of every month at 2.30 p.m.

Double Wedding Wynndel Church

Daughters Mr. and Mrs. Arthur Glasier Brides and Bridesmaid in Unique Ceremony—First in Creston District's History

Matrimonial history was happily made at Wynndel on Wednesday afternoon, when the United Church in that town was the scene of the first church double wedding ever witnessed in at least the Creston district. In addition to being the first dual nuptial event the ceremony was also unique in that the contracting parties from amongst their own number provided both the bride and groom as well as bridesmaid and best man for the two ceremonies.

Rev. Andrew Walker, pastor of Trinity United Church, Creston, officiated and before a gathering that filled the edifice united Miss Ida Ada, second daughter of Mr. and Mrs. Arthur Glasier, in marriage with Nicholas Rollick of Blake, B.C. The bride was charmingly attired in white crepe de chine, with veil and orange blossoms, and were supported by the bride's sister, Miss Mabel Glasier and Clyde Barckley. With the completion of this ceremony the newlyweds retired slightly to make way for Miss Mabel Velverda, eldest daughter of Mr. and Mrs. Glasier, and to act as bridesmaid and best man while Rev. Mr. Walker was reading the marriage ceremony that made her wife of Mr. Clyde Barckley of Ione. Wash., the bride becomingly gowned in blue crepe back satin.

Mrs. Slingsby presided at the organ, and after the happy event the contracting parties and invited guests repaired to the home of Mr. and Mrs. R. Dalbom, where a wedding luncheon was served and reception held. Later Mr. and Mrs. Rollick left on a wedding trip to Vancouver and coasts points before returning to Blake, where the groom if employed s C.P.R. watch, while Mr. and Mrs. Barckley left for their new home at Ione, Wash.

The brides have been residens of Wynndel for some years past where they are highly esteemed and have the best wishes of all for a very happy future.

Creston Valley Hospital

CONSOLIDATED ACCOUNT

For year ending December 31, 1933.

ASSETS

New building and grounds, cost to date	$7883.07	
Less: Accounts payable $1554.86; Wages due $268; loan, $306.59	2129.45	$5753.62
Surplus from Gen. acct		5550.52
		$11,304.14

LIABILITIES.

Capital acct., Surplus	$11,304.14

The above balance sheet shows that the hospital has cost $7883.07. To this amount we can add the sum of $2351.19, the value of the equipment as it stands today, making a total of $10,234.26.

In this amount it will be seen that we have not included any bills receivable for the reason that they are necessary to take care of operating expense.

Against these total assets of $10,234.26, some $2400.00 is taken care of by a loan, and $2129.45 is owing for materials and labor.

In order to retire this $2129.45 the board will find it necessary to ask everyone throughout the entire district for a cash contribution, and in order to make this a success it will be necessary to have help from each section of the entire district.

PROVINCE OF BRITISH COLUMBIA

INCOME TAX RETURNS

ARE NOW DUE TO BE FILED BY:

(1). Employers, respecting salaries and wages paid to employees during the calendar year 1933.
(2). Every person in receipt salary, wages, or investment income.

These Returns are required to be filed not later than

FEBRUARY 28, 1934

Taxpayers should obtain forms from any Provincial Government office or chartered bank in the Province.

An urgent request is made for these forms to be filed as much in advance of the final date as possible to enable the Department to give better service to taxpayers than can be provided during the rush of the last day.

Corporation, business, or profesional income is required to be returned within three months after the end of the taxpayer's fiscal year.

Victoria, B.C.

C. B. PETERSON
Commissioner of Income Tax

WORLD HAPPENINGS BRIEFLY TOLD

The prison population of Canada at the beginning of the current year numbered 4,587.

The Prince of Wales has become chief patron of the Public Schools Exploring Society, which last summer organized an expedition to northern Finland.

The "Winnie Mae," which Wiley Post twice has flown around the world, may be groomed for the British-sponsored air race between England and Australia this fall, the globe-girdling flyer indicated.

The estimated annual saving arising out of the reduction or cancellation of dependents' pensions caused by the pension review in 1932 and 1933 was $124,528. This information was given in the house of commons.

The Archbishop of Canterbury in the church assembly disclosed that $100,000 of the $250,000 sought from the public has already been raised towards the purchase price of the famous fourth-century biblical manuscript, the Codex Sinaiticus.

Because another 1,000 "war widows" receiving pensions were married during the past year the treasury will be able to save $250,000 in the new budget. There remain 134,650 war widows who have not remarried.

Reduction of interest rates on western farm mortgages and provision for intermediate agricultural credits were advocated as preliminary steps for the rehabilitation of the western provinces by John M. Imrie, managing director of the Edmonton Journal, in an address.

A committee of seven members of the house of commons will inquire into work of the Canadian Radio Broadcasting Commission this session, suggesting improvements. Premier R. B. Bennett gave notice of the government's intention to establish the committee.

Numbers Are Necessary

Reuss is an ancient principality in Thuringia, Germany, where for some unexplained reason all the men of the noble families are called Heinrich, or Henry. To distinguish themselves they have to add numerals to their names. All this is to explain why on the register of a Montreal hotel there appears the name "Princess Henry XXXIII of Reuss."

Safe Way To Reduce

39 lbs. Off—and She Feels Better

A woman who has found a sure, safe way to lose fat—without freak dieting or dangerous drugs—writes:—

"A year ago I was eaten up with rheumatism, and was far too fat. I weighed 154 lbs. and, as my height is only 5 feet 2 inches, you can judge my appearance. I have taken Kruschen regularly, and not dieted, and now I weigh 115 lbs., which is just nice, and, further, I feel better in health and my rheumatism has vanished."—(Mrs.) D. N.

Unlike certain drastic drugs, Kruschen does not aim to reduce by rushing food through the body; its action is not confined to a single part of the system. It has a tonic influence upon every organ of elimination, every gland, every nerve, every vein. Gently, but surely, it rids the system of all fat-forming food refuse, of all poisons and harmful acids which give rise to rheumatism, digestive disorders, and many other ills.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c. package.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorised to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

Little Journeys In Science

GUNPOWDER

(By Gordon H. Guest, M.A.)

To the average person the term "explosives" suggests the idea of war, but no industry producing explosives could exist if it were dependent on wars for its business. Explosives play an important part in our modern civiliaztion because they are used chiefly for constructive purposes, rather than destructive. Our supplies of coal, iron, and other metals are dependent upon the use of dynamite and gunpowder.

To the Chinese is given the credit of inventing black gunpowder, which is a mixture of saltpetre, charcoal, and sulphur. They used it hundreds of years ago in making firecrackers. It was first used in cannon by the English at the Battle of Crecy, in 1346. An historian of that period states that "The English guns made noise like thunder and caused much loss in men and horses." Many years passed before it was employed in blasting.

The saltpetre, known chemically as potassium nitrate, is an oxidizing agent. Now oxidizing agents are substances which furnish oxygen to other materials in a chemical reaction. Thus, when the gunpowder is ignited combustion is supported by the oxygen liberated from the saltpetre, and does not come from the oxygen of the air. When this very rapid chemical change takes place in guns, large volumes of gases such as carbon dioxide and sulphur dioxide are produced, due to the combining of sulphur and charcoal (carbon) in the gunpowder with the oxygen supplied by the nitrate. As a result of this rapid chemical reaction very high temperatures are produced. The heat causes the gases to expand, and thus they push the cannon ball out with great velocity.

In modern warfare the use of gunpowder is limited to bursting charges for shrapnel shell, to time fuses, and to priming charges for use with smokeless powder. Due to its low cost it is still used extensively by sportsmen in hunting. It is also in great demand for blasting purposes because of its cheapness and because it does not require a detonator. It lacks the power possessed by modern high explosives but has the marked advantage of being less shattering than most explosives.

Could Ascend Eighteen Miles

Noted Stratosphere Expert Says That Height Is Possible

It is possible for man to ascend 18 miles into the air, Prof. Auguste Piccard, noted stratosphere pioneer, said.

"The more you pay, the higher you go," he said. "Only lack of money prevents ascent to 30,000 meters (approximately 18 miles), which is not difficult except that it would be necessary to sacrifice the instruments at the higher levels. Above 30,000 metres, the air is too light to support a ship."

SUNDAY SCHOOL LESSON

FEBRUARY 25

THE TWELVE SENT FORTH

Golden Text: "The harvest indeed is plenteous, but the laborers are few. Pray ye therefore the Lord of the harvest, that he send forth laborers into his harvest." Matthew 9:37, 38.

Lesson: Matthew 9:35—11:1.

Devotional Reading: Romans 10:8b—15.

Explanations And Comments

The Twelve Sent Forth, 10:1-4. Jesus had already chosen the twelve disciples, and now he sent them out two by two, as Mark tells us, to help in this time of great need, and to gain training for their future work. He gave them authority to cast out demons and cure the sick.

Matthew now records the names of The Twelve. In all the lists given (Mt. 10:2-4; Mk. 3:16-19; Lk. 6:14-16, and Acts 1:13), the disciples are arranged in three groups; the first of the first group is always Peter; that of the second Philip; and that of the third, James the son of Alphaeus. The order of the remaining three in each group varies in the different lists, save that Judas Iscariot is always the last one given.

Simon, who is called Peter. He received the name of Peter, which means Rock or Stone, when first called. Peter was the spokesman of the group, "the Mouth of the Apostles," as Chrysostom calls him.

"Christ created ideal men by idealizing the real men, turning the impulsive Simon into Peter the rock, changing Pharisaic Saul into Paul, and the cursing son of thunder into the loving John. Cultivate Christ's idealism and you may repeat his highest miracle—the transformation of the character of your friends."—(James Bashford).

Andrew, Peter's brother. It was he who brought Peter to Jesus, "thus earning the distinction of being the first missionary of the Kingdom of Heaven." James and John, sons of Zebedee, Jesus called Boanerges, Sons of Thunder. James was the first disciple to suffer martyrdom (Acts 12:2). John is known as "the disciple whom Jesus loved." He is associated with Peter in the events narrated in the early chapters of The Acts.

Philip, who would be shown the Father (Jn. 14:8); Bartholomew (Nathanael), the Israelite in whom was no guile; Thomas "The Doubter," as he is often called; Matthew the publican, and writer of the Gospel we are studying; James the son of Alphaeus, who is called James the Less in Mark; Thaddaeus, more noted for his names than his deeds (Lk. 6:16; Jn. 14:22; Mk. 3:18); Simon the Cananaean, called also Simon Zelotes, or the Zealot; and Judas Iscariot (literally, Man of Kerioth, a village near Hebron), the only Judean among The Twelve, "who also betrayed him."

Had Poor Honey Season

Officials of the Victorian Apiarists' Association say the Australian season for honey production has been the worst since 1914. Reports from every district except Gippsland indicated there was an almost complete failure of the honey crop.

Marvels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 10—SENDING THE WHOLE CHILD TO SCHOOL

In years gone by the physical side of life was much more neglected than it is to-day. In recent years we have given more attention to the value, not only of life itself, but also of those things which make life worth living.

Most modern school systems have developed a health program, including on their staff health officers to look after the physical well-being of the students.

There are many physical defects which might retard the child in his school work but this article is intended to stress the prevalence of eyestrain and its attendant evils.

About three people out of every ten use glasses to-day for some purpose but it is estimated that seven out of ten should be wearing them. This almost universal need for assistance in modern civilized life is largely due to the constant use of the eyes at close range and almost constant exposure to "glare" from sidewalk, roads or buildings, printing on glossy paper and from high powered electric lights.

Modern life demands modern equipment and it is the constant use of the eyes for close work that has made scientific glass-fitting a great basic human need.

The strain of civilized life falls most heavily upon the eyes, the most delicate and the hardest worked of any of the organs of the body. This is especially true of school children because a child's eyes are immature; they are baby eyes until he has reached the age of proper development and too frequently he is required to do work which would mean a full load for mature eyes.

There are twenty-five million young people in the schools of this continent and it has been found by actual survey that twenty per cent. of them have eyes which are so completely out of focus that it is interfering with their progress in school and robbing them of their opportunity for proper preparation for life's work.

Millions of young people quit school earlier than they otherwise would, because of some physical handicap; millions of others are retarded in school work, finally graduating with indifferent grades, poorly equipped for the battle of life. These two types become recruits in the great army of misfits—square pegs in round holes, the cause of much of the world's misery. Retarded students retard the work of the entire class and indeed of the whole school, adding immensely to the work of the teacher as well as to the cost of operating schools, thus adding to the burden of the taxpayer. The physically defective child is therefore a burden to the community.

It is not the fault of school authorities that so many children are neglected on the physical side. The neglect is too frequently due to ignorance and lack of co-operation on the part of parents who are uninformed or prejudiced and who give too little attention to some of the physical needs of their children—not the least of which is—eyesight.

There is an intimate relation between eyestrain and ineffciency and physical ills. All the physical activities of the body are made possible only through the expenditure of nerve force which is our vital motor power. Where do we get this power? In a healthy normal individual it is automatically stored up during a night's sleep, sufficient for each day's use and any person who uses more nerve force each day than is stored up the night before is slowly but surely facing nervous bankruptcy. Nerve exhaustion is the cause of most of our physical ills and the eyes play a far greater part in this condition than is generally realized.

The examination of childrens' eyesight by school nurse or teacher is of limited value. At best they can only be expected to discover the worst cases of poor vision whereas a person might be able to read every letter on the test chart and yet be suffering from nervous exhaustion due to eyestrain. Such cases usually escape the notice of any but a skillful optometrist who knows what to look for and how to correct it. Such cases as described are the ones in greatest need of help.

May Build More 'Planes

U.S. Secretary For War Submits Plan To Congress

A new five-year-plan under which the United States Army Air Corps would be authorized to construct 1,000 aeroplanes and increase its personnel has been submitted to Congress by George Dern, secretary of war. The plan includes building up in the air corps a force comprising all military aviation elements and adequate to meet effectively the requirements of all military air and land operations.

The general staff was said to have found that the existing air corps strength was below requirements, and that the percentages of types of aircraft should be revised. It believed also that 1,800 serviceable planes would not permit the necessary allotment to overseas possessions and at the same time permit the organization of an effective military air force unit within the United States.

Will Need To Be

We have it on the word of a New York scientist that man will be bigger and brainier 500,000 years from now, and at the rate problems are being piled up for posterity he will need to be.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she coves of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Avis is stunned and Camilla's mother likewise. Camilla decides that she must leave the home of her adopted parents immediately and go to live with Rose, her sister, who is a file clerk in a business house. They decide to take an apartment. Bowman and Weeks, an advertsing agency, where Camilla has submitted some of her work, send for her and tell her they have a new account which requires unusual treatment of juvenile art. To Camilla's surprise she learns that the account is that of her foster father's company, which has decided on an extensive campaign to bolster up lagging business. After a conference with Mr. Bowman, Camilla decides to attempt the work. With ideas running riot in her head she goes home and spends the night sketching. In the morning, armed with her samples she sets out for the agency. The critics were enthusiastic about her work, and Mr. Weeks offers her a salary of $50.00 a week to start and a prospect of having it doubled. She goes to keep a dinner engagement with Peter.

(Now Go On With The Story)

CHAPTER XXXI.

"We were speaking yesterday," Camilla began steadily, glancing around the table at the men who faced her attentively, "of reaching the household buying public—the women—through the children. And, of course, we can't reach children with adult ideas. There is nothing so attractive to children as a story, and the more the story appeals to their imaginations, the better they like it."

Heads nodded silent and attentive agreement.

"So, I have worked out, very briefly, my suggestion for a story which will lend itself to indefinite time and at the same time make a complete effect from the beginning. At least, it seems that way to me. I am presuming with my judgment for the sake of explanation, of course," she smiled apology.

Six nodding heads encouraged her to continue.

"It is a picture story and the characters are the Tiny Tots of Tinyville, who are diminutive people. The general idea is not new, of course. All children are familiar with fairies, gnomes, kewpies, brownies and whatnot. But I have given to these individual names and characteristics and some new experiences that may appeal to youngsters. There are the chief Tiny Tot family and their relatives and friends—and enemies, presented in colored drawings that require very little text. Most of that is given in their own conversation."

She offered the first card of drawings to Mr. Weeks, then presented one to each of her critics. "I have first made a sketch of each principal character, then a series of stories. For the best results, they should run in weekly publications, so as to carry the thought easily from one publication to the next. For monthly advertising, a different series, like these, would be more suitable." She stopped and glanced anxiously at the faces of her judges, whose eyes were intent upon her drawings.

Almost simultaneously, the six men looked at her and then at each other. Without exception, their faces lighted with approval and the comments of approbation pattered about her like hailstones.

"Splendid!"

"Very clever—noval idea."

"Best thing I've seen for a long time."

"You had this idea worked out before?" Mr. Bowman inquired with surprise.

"Not at all. The idea came to me after I talked with you yesterday. As I say, the thought is not entirely new—but I think the presentation of it is."

"Very new," he agreed. "But you don't tell me you have done all these since you were here yesterday?"

"I did," she smiled. "Of course, I intend to improve them with more time and I should hope the whole project would work out better as I went along—that is, if the suggestion should be used," she added quickly.

Weeks and Bowman looked at each other, smiled and turned at Camilla. "I am afraid they will be used," said Mr. Weeks. "There will be some formality of submitting the plan to the advertising manager of the Wheatheart corporation, but we shall recommend the idea enthusiastically. I think, Miss Hoyt, that you have a position, and one which is going to keep you pretty busy for a while"

"Nothing could please me more," earnestly.

"But you won't have to do this much work in one day, remember," he chided pleasantly.

"I don't think I could do that much every day," she laughed. "This was an emergency, you see."

"You always meet emergencies, don't you?" he looked at her with admiration.

"That is quite important, isn't it?" soberly.

"Indeed it is. But the emergency is where most people fail. A sudden responsibility frightens the average person."

"Why," Camilla wondered, "it just does the opposite for me—it stimulates me, challenges me."

"Then you are the very person we need here, whether you draw Tiny Tots or lumbering giants," he decided. "Now, in regard to salary—much will depend upon the progress and the success of this campaign. Would you take fifty dollars a week to start, and if the returns are satisfactory within two months after the first publicity, we'll double that."

Camilla's head whirled crazily for an instant. She knew that fifty dollars or even a hundred dollars was no fortune, but that she—Camilla—could earn that much money for herself every week, seemed miraculous. She nodded, before her voice could command a sound. "Any arrangements you make are satisfactory to me." Anything, she thought, to get a start, to prove her ability to herself and others—oh, she would have accepted much less for the opportunity to begin her work.

"May I ask one favor of you, Mr. Weeks?" she added hesitantly.

"Why—of course—"

"When you submit these to your client," she indicated the drawings, "please don't tell anyone who made them. Your artists need not be known to your advertisers, I suppose?"

"No, not at all, if you prefer to have it that way. Our work goes out as a firm, but usually if an artist is very successful, her individual work attracts attention."

"In that case, it would be all right," she agreed, "but I much prefer to remain anonymous for the present."

Then she was shaking the hands and accepting the compliments of the executive board, and presently found herself in her own car driving toward home. Everything looked changed, different, she thought. As if the world had donned its holiday attire to celebrate her victory. And everywhere she glanced, her Tiny Tots printed themselves on the sky, the treetops, the buildings and pavement—waving their hands at her gleefully.

She turned into the park when she reached the entrance, and drove leisurely along the boulevards. Traffic was not heavy at this time of day, so driving was a pleasure. Later, it became a hazardous responsibility.

Camilla thought about Peter, and her dinner engagement with him tonight. How happy he would be over the news of her success! Six hours was a long time to wait to tell him, but she would make herself be patient. She would go home and rest for awhile before time to dress for dinner, she decided; and realized that she was quite weary, now that the stimulus of anxiety had been withdrawn and the first excitement of victory had passed.

Tomorrow, she would look for an apartment and get settled before Monday, when it had been temporarily arranged that she would begin her work. Rose would be happy over her good news, also. And the thought followed that she would be able to do much for Rose now—far more than she ever had been able to do when she lived with wealth surrounding her. Her social position always has commanded practically all of her allowance. She would be able, also, to slip her own mother an extra bill occasionally if her salary were doubled soon. That meant that she had to succeed. It meant that the Wheatheart Cereal corporation would prosper and expand. Some day, perhaps, she would acknowledge her part in the campaign to Alexander Hoyt, and deserve the words of approval that he had withheld, always. Why, she had often conjectured, but never decided.

For dinner with Peter that evening, she selected a frock of chartreuse yellow crepe, severely cut and very recherche for the occasion. She was celebrating not only an important event, but she was bidding farewell to the girl of the past who had been Camilla Hoyt, even as she had not done on the day when she had married Peter.

That day had marked a transition from youth to womanhood, from love's promise to love's fulfillment; this was a revolution from reluctant dependence to glorious independence.

(To Be Continued)

How Acid Stomach Makes Itself Known to You

HERE ARE THE SIGNS:

Nervousness, Neuralgia, Indigestion, Loss of Appetite, Nausea, Frequent Headaches, Feeling of Weakness, Sleeplessness, Mouth Acidity, Sour Stomach, Auto-intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoonfuls of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed.

OR—Take the new Phillips' Milk of Magnesia Tablets — *one tablet* for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts *at once* to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

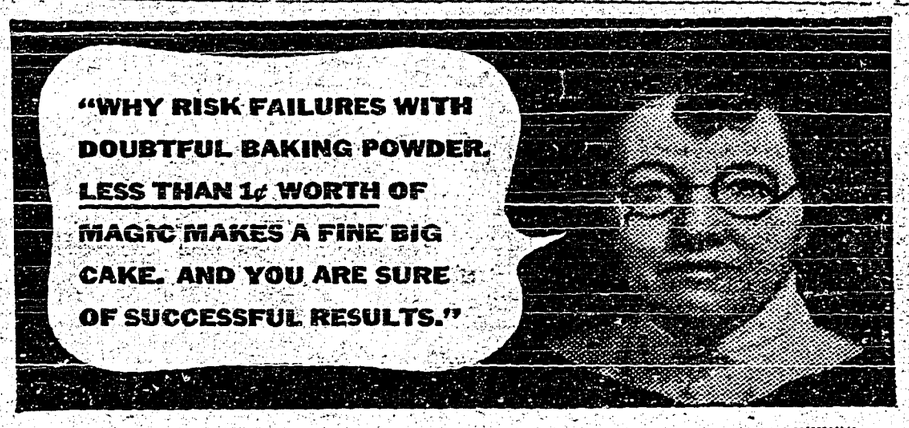
But—be careful you get REAL milk of magnesia when you buy—genuine PHILLIPS' Milk of Magnesia. See that the name "PHILLIPS" is on the label.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia



says MRS. CLARRY HUNT, Chief Dietitian for Gillett Products, Toronto

MAGIC costs so little! Just think—it actually takes *less than 1¢ worth* of Magic to make a delicious layer cake. Why take chances with doubtful baking powder? Bake with Magic and be sure!

MAGIC

MADE IN CANADA

"CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

Little Helps For This Week

"And what doth the Lord require of thee but to do justly, to love mercy, and to walk humbly with thy God."—Micah 6:8.

"Put on therefore kindness, humbleness of mind, meekness, longsuffering."—Col. 3:12.

Plant in us a humble mind,
Patient, pitiful and kind;
Meek and lowly let us be,
Full of goodness, full of Thee.
—C. Wesley.

There is no true and constant gentleness without humility; while we are so fond of ourselves we are easily offended with others. Let us be persuaded there is nothing due to us, and then nothing will disturb us. Let us often think of our own infirmities, and we shall become indulgent towards those of others.—Fenelon.

Endeavor to be patient in bearing with the defects and infirmities of others, of whatsoever sort they be; for thyself hath many failings which must be borne with by other people. If thou canst not make thyself such a one as thou wouldst, how canst thou expect to have another in all things to thy liking.—Thomas A. Kempis.

Pickled bats were a delicacy of Babylonian dining.

Trying Open-Air Method

Chinese Government Has New Cure For Opium Habit

From Canton, China, comes a new cure for the drug habit. It is an open-air method. The Canton government has issued an official proclamation that on and after March the first all opium addicts, if caught, will be forced to live in roofless houses and endure, so the edict says, "terrible exposure to the elements." As an opium smoker lies in a closely shuttered, stuffy room, exposure to an unlimited quantity of fresh air is to him the worst of tortures. So the Canton government counts on this aversion to fresh air to bring the opium addicts to their senses.

MATURITY—MATERNITY
MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.

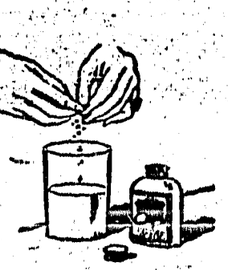
LYDIA E. PINKHAM'S VEGETABLE COMPOUND

World's Oil Supply

Will Last For Next Thirty Centuries Is Estimate

Petroleum in known deposits and at the rate of the present consumption is sufficient to last the world for the next 30 centuries, according to Dr. Gustave Egloff, of Chicago. With only two million acres of oil wells producing in the United States alone, Dr. Egloff points out that America has 1,100,000,000 acres of possible oil land that is yet to be explored and developed.

Now! Ease Sore Throat Instantly!



1 Crush and dissolve 3 Aspirin Tablets in half a glass of water.

2 GARGLE thoroughly — throw your head way back, allowing a little to trickle down your throat.

3 Repeat gargle and do not rinse mouth, allow gargle to remain on membranes of the throat for prolonged effect.

Remember: Only Medicine Helps Sore Throat

Modern medical science now throws an entirely new light on sore throat. A way that eases the pain, rawness and irritation in as little as *two or three minutes!*

It requires medicine—like ASPIRIN—to do these things! That is why throat specialists throughout the world are prescribing this ASPIRIN gargle in place of old-time ways.

Be careful, however, that you get Aspirin Tablets for this purpose. Aspirin is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve completely enough to gargle without leaving irritating particles.

ASPIRIN TABLETS ARE MADE IN CANADA

The silver cup won by Mrs. Chandler and Miss Jean Henderson in the consolation section of the ladies' doubles play at the East Kootenay badminton tournament at Cranbrook on Saturday last, is on display at Creston Drug & Book Store.

Mr. and Mrs. E. Wickstrom returned on Friday from a three months holiday visit at Pacific coast points, making headquarters at Snohomish, Wash. They visited at Vancouver and met up with a number of Creston people now residing in that city.

There was quite a good turnout of ladies for the world's day of prayer for missions observed Friday afternoon at Christ Church. Missionary organizations of the Anglican, Presbyterian and United Churches had charge of the devotional exercises.

At the badminton tournament at Cranbrook at the weekend Creston players had the sideline support of a half dozen Creston shuttle fans. Mrs. G. Sinclair, Mrs. C. H. Hare, Mrs. W. R. Long, Mrs. F. V. Staples, Misses Jean McCreath and Marion Staples, accompanied the players.

There was a representative turnout at the annual meeting of Creston C.C.F. Club in Murrell's hall on Tuesday evening, at which officers for 1934 were elected as follows: President, John Murrell; vice-president, A. F. Rudd; secretary-treasurer, Dr. E. M. Warren; executive, Mrs. Dodd, Jas. Compton, J. H. Eddy and E. Ostrensky.

By a one point lead Pharmacy captured third place in the ladies' basketball league championship in the final game with Creston Motors on Tuesday night. The real struggle of the championship playdowns takes place Tuesday, February 27th, when the league-leading Creston Review quintette stack up against the High School girls for the 1934 ladies' championship.

By failing to score a margin of nine points to overcome the 8-point adverse balance after the previous Saturday's game, Creston men's team was eliminated from the East Kootenay basketball league play. The score at Park pavilion on Saturday night was Creston 23, Kimberley 22. In the curtain raiser the Creston Review fell before the girls' all star quintette, 15 11. The attendance at the game was rather slim.

Creston's fire protection has been recently improved by Goat Mountain Waterworks Company installing new hydrants. There are three of them. One at the corner of Hillside Road and Creston Avenue, another on Creston Avenue at the end of the pipe line and the third at a point about 160 feet back of the new hospital. With these installed it is stated the insurance rate on the new hospital has been cut from $3.85 to $2.70
