THE CRESTON REVIEW

VOL. XIX. CRESTON, B. C., FRIDAY, SEPTEMBER 30, 1927 No. 32

Alice Siding

Victor Carr and Hugh Taylor were visitors at Nelson on Thursday, where they were attending a Liberal Association convention.

Mr. and Mrs. Mike Mike of Michel, who have been visitors at the Parkin home, left at the first of the week for Vancouver.

Bill Vaness motored in from the prairie on Friday last.

Mrs. W. H. Hilton was a visitor with Nelson friends a few days the latter part of the week.

Mr. and Mrs. Stevenson of Michel, who were here for the Parkin-Travers wedding on Saturday, returned at the first of the week.

Charlie Sutcliffe had the bad luck to get his thumb caught in a pulley while at haying work on Saturday, and the digit was so badly jammed that he had to have it amputated.

About seventy friends of Mr. and Mrs. John W. Parkin were very hospitably entertained at a dance at the Parkin home on Saturday night following the wedding for which the music was supplied by E. Ostrenski and H. Stewart on the accordeon, and between dances songs were contributed by Mrs. Rogers, and Messrs. Dennis, Bevan, Travis, Foster and the host. A splendid midnight lunch was served and the affair ended about 2.30 with the singing of Old Lang Syne.

Lister

Deer hunters should find this section a likely place to get a supply of venison, as these animals are doing rather too much damage in some of the Lister orchards.

Harry and Sedgewick Helme got back last week from a holiday visit in Spokane, where they were at the air derby.

Jos. W. Bell of Kimberley has been here the past week on his usual fall vacation, having spent the first week of the holidays at Spokane.

Fred Huscroft left a few days ago to help with Alberta harvest and threshing, and has struck a job near Granum.

Mrs. Pomford and Mrs. R. S. Smith of Moyie were visitors last week for a short stay with Mrs. Yerbury.

Chas. Ward and Mr. Switzer of Cranbrook, were here at the first of the week, writing up insurance for the Monarch Life Company for which the former is the East Kootenay representative.

Speery Phillips of the department of agriculture staff, Victoria, with his father, C. H. Phillips, Kimberley, are spending the week at the Phillips ranch.

Lister district is on the apple shipping list this year with quite a noticeable movement in Wealthy and McIntosh Red. The former variety has all moved and the latter are now going out. At least six places contribute to the outgo—Geo. Jacks, E. J. Malthouse, A. R. F. Bernard, Fred Powers and Bert Yerbury.

R. A. Hunt, secretary for the Land Settlement Board, Victoria, paid the Lister settlement a brief official visit on Wednesday.

There is considerable activity amongst Lister residents this week assembling exhibits in the fruit and vegetable line for the Creston fall fair.

Mr. Finlay received the sad news by wire on Monday of the death at St. Paul, Minn., of his daughter, Mrs. Jacks, which occurred the evening previous. Due to the short notice neither he nor his son, John, were able to attend the funeral.

Lister school will have an entry in the school districts' display section of Creston fall fair this week, and at a meeting at the school on Wednesday night last a committee of six was named to gather the fruit, grains and vegetables and stage same. Mrs. Fred Powers heads the committee, and is assisted by Mrs. Sinclair, Col. Fred Lister, M.P.P., E. J. Malthouse, R. Stevens, and Principal Parker.

Wynndel

Mr. and Mrs. E. Uri and Mr. and Mrs. R. Uri were visiting at Spokane last week taking in the air derby, returning on Friday.

Winlaw's sawmill resumed operations last week, and is finishing up the season's cut of ties.

Miss Dorothy Cam of Sirdar was a between train's visitor one day last week, with Mrs. G. Cam, jr.

Mrs. Vic. Johnson, who has been holidaying at Vancouver, returned home on Friday.

Misses Ringheim, Pensons, Payette and Benedette left on Sunday for Boswell for the apple harvest season.

E. LeBarge, who has been working at Trail, returned home on Sunday.

S. Benedette, who is working at Boswell, was a between trains visitor here on Sunday.

Mrs. Towson left last week for Barons, Alberta, where she will remain through the threshing season.

Mr. and Mrs. H. Bathie, jr., and family, who have been on holidays here, returned to their home at Rossland on Saturday.

Alex. Cameron was a visitor at Nelson on Thursday last, attending the Liberal convention held in that city that evening.

Canyon City

Mr. and Mrs. C. Walde with Mr. Wearmouth, were motor visitors to Spokane last week, and were the Canyon representatives at the big air derby.

BIRTH—On September 21st, to Mr. and Mrs. John Gartland, a son.

Rev. N. Chappel, who has been in charge at Cranbrook all summer, took the United Church service at Canyon on Sunday afternoon. This Sunday, at 3.30 there will be the usual monthly Church of England service.

Friday, 30th, has been declared a half holiday at the school and if the weather is fine there will be a large turnout of parents and children at the Creston fair. The pupils have been in training the past week, and should give a good account of themselves in the sports.

For the first time in many years Canyon is this season suffering from the operations of orchard thieves, who have been active the past week removing fruit left in the orchards over night. Phonse Huyggens has lost several boxes, as well as others, and those guilty of the thefts are suspected of being Canyon residents.

Manford Samuelson spent a couple of days at Nelson at the end of the week, attending the fall fair, and representing the Canyon at the Liberal convention in that city on Thursday night.

Erickson

Miss Charlotte Speaker, who has been holidaying at her home at Erickson, returned to Trail on Sunday.

Erickson school will make a strong bid to win the Jubilee Shield for the School Districts' display at Creston fair this week.

G. A. Hunt was here from Kitchener last week looking after operations on the Hunt ranch here.

Miss Winnie Palfreyman was favored with last week's surprise party. There was quite a large gathering and a most enjoyable time was spent.

D. A. MacDonald of Cranbrook is a visitor here this week, a guest of F. V. Staples.

Frank Celli of High River, Alberta, was a visitor here during the week, looking after the harvest and shipping of his apple crop.

Gerald Timmons, who is now working at Cranbrook, was home for the weekend, and Mrs. Timmons and children returned with him.

The road crew is making some needed repairs on the hard surface road east of the Putnam ranch. The big steam roller was shipped back from Rossland about the middle of the month.

LETTERS TO THE EDITOR

Demands British Justice

EDITOR REVIEW:

SIR,—As the undersigned happened to do the Danish consul work in Toronto, a very serious case comes to his attention in the affairs of Mrs. Minnie Olsen, a Norweigan mother with three children—all under seven years of age—who landed in Creston on Sunday, September 25th, from Cranbrook, where she was to meet her husband, George Olsen, on Saturday.

Failing to find him at Cranbrook she was advised to come to Creston to locate him, but without success, so on Tuesday, 27th, arrangements were made for tickets for their return to Cranbrook—together with some cash for expenses—and on September 28th news came that she had found her husband.

Now, Mr. Editor, what I wish to really call to your readers' attention is the most inhuman outrage ever committed on a mother with three little tots, by a truck driver who was taking them from Glenwood to Pincher Creek. His truck stuck in the mud nine miles from Pincher Creek at nine in the evening of September 23rd, and he deliberately left the truck and left the poor woman with her three children sitting in the front seat all night and until the next forenoon before again showing up.

The night was pitch dark, raining, and cold. There the poor mother was sitting all alone, crying the entire night, trying to keep the little ones from freezing, by sharing with them her own clothes, while that so-called human went to sleep in a warm bed, with absolutely no consideration for the mother and children's welfare; who might have perished from the wild beasts or through fright.

I hereby respectfully request and demand through your paper that the British justice be handed down, and the authorities see that Mrs. M. Olsen, care Queen's Hotel, Cranbrook, be paid a fair and handsome sum of money for the suffering this brave mother and her dear little ones went through, through the said driver's neglect.

In speaking to Major Mallandaine about this terrible thing, that could almost have cost human lives, he said the man ought to be in jail. Yours for what is right.

CAPT. C. O. PETERS.

Kitchener

J. McRobb, Creston, was a Friday visitor here, and on the same day S. M. Watson of the same town, was here on a business visit, along with Geo. Strong, proprietor of the Commercial Hotel in the same town.

Provincial Police H. McLaren of Creston and Geo. Huscroft, forestry patrol, were here on official business on Saturday.

Charlie Bush, Sid Abar and G. Foisy left for the prairie on Friday, where they have a harvest and threshing season job.

Kitchener had visits on Monday from the two local forestry officials, F. H. Pym of Cranbrook, and Capt. Oats of Creston.

Capt. Jos. W. Bell of Kimberley was renewing Kitchener acquaintances on Friday, coming in from Lister, where he is on a visit with Col. Fred and Mrs. Lister.

W. Crosby and Sam Bysouth, well known residents of Kuskanook, were Tuesday callers here.

Mr. and Mrs. Robinson of Creston were callers on Tuesday.

Mr. and Mrs. T. Foisy, with Cliff and Marion Foisy, of Lumberton, were motor visitors, Thursday.

Mr. and Mrs. B. Johnson were business callers at Creston on Thursday.

C. A. Bartlett of Vancouver, was a business visitor on Friday, along with C. A. MacMillan, the well known insurance representative, from the same city.

Local and Personal

Holy Mass will be celebrated in Holy Cross Church, Sunday, October 2nd.

PIGS FOR SALE—Yorkshire Whites, six weeks old Sept. 30th, $6. P. W. Foot, Creston.

Mr. and Mrs. Geo. Johnson were Thursday-Saturday visitors at the fair at Nelson. They report the exhibits not up to the standard of other years.

Christ Church will have the harvest thanksgiving service on Sunday, October 16th. As the day is also children's Day the service will have a twofold aspect.

Rev. Nelson Chappel, who has had charge of the United Church at Cranbrook the past three months, preached in Trinity Church, Creston, on Sunday evening.

WINTER VEGETABLES—Order your supply now. Prices, delivered, are: Carrots, $1.50 per 100 lbs. Beets, $2 per 100 lbs. Turnips, $1.50 per 100 lbs. Parsnips, $2.50 per 100 lbs. Richardson, Erickson.

It pays to advertise alright. In connection with the sale of lands in this district for arrears of taxes the provincial collector received almost $1200 in the week prior to the appearance of the advertising, this amount covering ten properties which were withdrawn from sale.

J. P. Cook this week reports this week something quite unusual in the animal kingdom—the birth of twin calves from a heifer just two and a half years old. The newcomers were Jerseys—a bull and a heifer.

Mr. and Mrs. McLaren and Mr. and Mrs. Hayes were motor visitors at Sandpoint, Idaho, on Monday. Farmers on the dyked lands at Bonners Ferry report their seed pea crops have withstood the September spell of wet weather with practically no damage.

Sirdar

Mrs. C. M. Goodman of Cranbrook was a visitor here a couple of days last week, a guest of her daughter, Mrs. Roy Proctor.

Mrs. H. Dibley was a between trains caller at Creston on Friday.

Mr. and Mrs. B. F. Whiteside are holidaying at prairie points, leaving last week.

Charlie, nine-year old son of Mr. and Mrs. Lombardo, had the misfortune to fall and break his left arm on Sunday. Principal Smith motored him to Creston where Dr. Henderson took care of the injured member, and Charlie is coming along nicely now.

Sirdar residents whose memory goes back about fifteen years will hear with regret of the death of a former resident, Stephen O. Watson, which took place at Bonners Ferry, Idaho, early in the month. He was employed here for some years, leaving in 1903 for Bonners Ferry, where he went poultry farming, and at the time of his death was operating a flock of close to 2000. He was 60 years of age, and is survived by a widow and one sister

Parkin-Travis Wedding

Christ Church, Creston, was the scene of a very pretty wedding on Saturday afternoon, when the rector, Rev. S. Newby, united in marriage, Marguerite (Rita), daughter of Mr. and Mrs. J. W. Parkin of Alice Siding, with Frank Travis of Natal, the happy event being witnessed by a company of relatives and friends of the contracting parties. The church was prettily decorated for the occasion, and the bride was given away by her father. The bride's costume was of crepe de chene with overdress of same material, and bridal veil with orange blossoms, carrying a boquet of white carnations. The bridesmaid was her sister, Miss Annie Parkin, who wore ivory silk and carried white asters. The flower girls were little Misses Violet Parkin and Marguerite Elko, sister and niece of the bride, who bore baskets of sweet peas. The best man was Mr. Stevenson of Michel. Immediately after the service the bridal party and invited guests returned to the bride's home where a sumptious wedding dinner was served, and in the evening a dance was given in honor of Mr. and Mrs. Travis, who were the recipients of many useful presents. The newlyweds left for their home at Natal on Monday and take with them the best wishes of all for a long and happy wedded life.

WORLD HAPPENINGS BRIEFLY TOLD

Peter Verigin, the younger, has arrived from Russia to assume leadership of the Doukhobors in Canada.

The Canadian Government has proposed to Poland conclusion of a treaty of commierrce and it is understood that negotiations will begin shorty.

Admiral Baron Sadakichi Kato, who commanded the Japanese fleet during the siege of Tsingtao, China, in the World War, is dead. He was a former chief of the Japanese naval board of education.

Dr. Edward Sapir, Canadian anthropologist, has been appointed to a full professorship at the University of Chicago, where he is in charge of the department of sociology and anthropology.

Five new commissioners for oaths have been appointed in Saskatchewan. They are: Peter Gross, St. Boswells; William H. Bruce, Kisbey; John F. Maloughney, Holdfast; Hugh Ellis, Saskatoon, and Walter W. Robertson, Saskatoon.

The memorial to Lieut. Richard Douglas Sandford, V.C., who drove the submarine G3, loaded with 15 tons of high explosive, into the pile work of the mole at Zeebrugge and blew a breach 150 feet wide, has been unveiled on the mole in Belgium.

Commander Richard E. Byrd says that he plans to leave New York next August on his South Pole expedition and that Floyd Bennett, who accompanied him on his flight to the North Pole, would be second in command of the party.

More than 1,243,000 gross tons of shipping, consisting of 656 motorships and steamers and 182 sailing vessels of 100 tons or more, were lost, broken up or condemned throughout the world in 1926, according to the annual wreck statistics report of Lloyd's Register of shipping.

Definite announcement was made at Calgary, Alta., that the Russian Government has renewed arrangements for purchasing 4,000 horses in Western Canada, including British Columbia. The animals will be of a higher standard than those shipped last year, and higher in price.

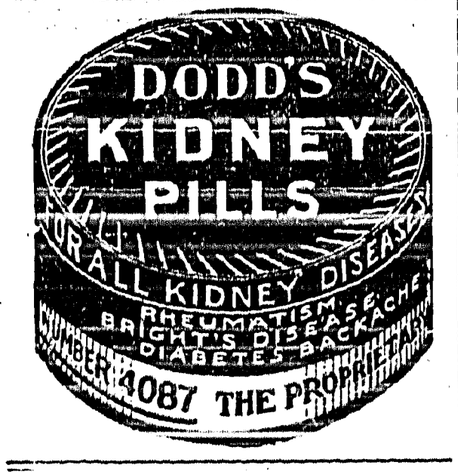
Homestead entries for the first five months of the present year in the four western provinces total 2,261, as against 2,381 for the corresponding five months of last year. Saskatchewan heads the list with 1,038 entries, followed by Alberta with 913, Manitoba with 273, and British Columbia with 37.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

The highest railroad in the world is the Central Railway of Peru, which reaches an altitude of 15,684 feet and maintains a station of 15,665 feet.

Minard's Liniment for Asthma.

If the average man was as good as he thinks other men ought to be it wouldn't be long until his vanity made him topheavy.



Beauties Of Natural World

People Who See Them More Than Fortunate Says Viscount Grey

"Of all the joys of life which may fairly come under the head of recreation there is nothing more great, more refreshing, more beneficial in the widest sense of the word than real love of the beauty of the world," writes Viscount Grey in "Fallodon Papers."

"Some people cannot feel it. To such people I can only say, as Turner once said to a lady who complained that she could not see sunsets as he painted them, "Don't you wish you could, madam?" But to those who have some feeling that the natural world has beauty in it I would say, cultivate this feeling and encourage it in every way you can. Consider the seasons, the joy of the spring, the splendor of the summer, the sunset colors of the autumn, the delicate and graceful bareness of winter trees, the beauty of snow, the beauty of light upon water, what the old Greek called the smiling of the sea.

When we are bored, when we are out of tune, when we have little worries, it clears our feelings and changes our mood if we can get in touch with the beauty of the natural world."

Princess Enjoyed Joke

Princess Mary was among those who appreciated the joke when the band at a Manchester ceremony she was attending struck up the tune, "Let's all go to Mary's house." The Princess had just laid a foundation stone at Manchester Infirmary, and as she stepped down from the platform the song was played. At once some of the onlookers took up the refrain and sang lustily the words, "And let's have a real good time."

Big Land Deal

Negotiations for the sale of 6,000 acres of land in the Madison district of Saskatchewan, 160 miles southwest of Saskatoon, were opened recently by the Canada Colonization Association, the purchasers being twenty Mennonite families, all in the Dominion but living in scattered districts.

Winnipeg Newspaper Union Fashions

A Modish Frock

Charmingly graceful is this attractive frock, having a tunic at each side of the slightly flared skirt. The bodice has gathers at the shoulders, a vestee and scalloped collar. The long sleeves are dart-fitted, loose, or gathto wrist-bands, and a wide belt is finished with buttons at the front. No. 1651 is in sizes 36, 38, 40, 42 and 44 inches bust. If the dress is made of one material only, size 38 requires 3⅞ yards 39-inch, or 3⅛ yards 54-inch material. Views A and B, size 38, require 3 yards 39-inch, or 2⅔ yards 54-inch material for the dress, and 1⅛ yards 39-inch, or ⅞ yard 54-inch contrasting. Price 20 cents the pattern.

May Add Airplanes To Present Service

Matter Said To Be Under Consideration By C. P. R. Officials

Is Canada about to adopt the airplane as a supplement to the transcontinental flyer, on a commercial scale? Are the day and night cross country trips to be cut in half or third, as at present over a considerable section of Western Europe? Is air-mail for the Dominion an early development?

Immediate steps in these directions seems to be indicated by the movement being made to urge the Canadian Pacific Railway to add an air branch to its present service which, it is said, is being pushed by Major-General J. H. MacBrien, former chief of staff. General MacBrien is at present provisional chairman of the Canadian Air League.

It is expected that MacBrien will be placed in charge of the railway's aerial department, if it materializes. He is himself a licensed air-pilot, having taken the course at Camp Borden a year or so ago, and, in addition, has made an intensive study of aeronautics.

MacBrien's plans, it is said, have been studied and endorsed by C.P.R. officials. The railway is sounding out the federal government to see if it is prepared to assist in the early heavy expenditures by means of subsidies.

The announcement is being watched with the keenest interest, and there is much speculation as to whether the railway that was the pioneer in transcontinental development will also be a pioneer in this spectacular advance step for future transportation.

A Corrector of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will ally inflammation in the bronchial tubes.

Donates Flying Ambulance

A flying ambulance for the isolated inhabitants of Lapland, in Northern Sweden, has been donated by a Swedish railroad builder, on the occasion of his birthday. One aerial ambulance already has been maintained in Lapland for the last three years. From the frozen wastes, it has made many rescues, carrying patients to the military hospital at Boden, Sweden's chief stronghold on the edge of the Arctic zone.

Fox hunters of the south do not kill their quarry with firearms, but practice the hunt as do the English sportsmen.

SUNDAY SCHOOL LESSON

OCTOBER 2

ELIJAH ON MOUNT CARMEL

Golden Text: "Choose you this day whom ye will serve."—Joshua 24.15.

Lesson: I Kings 18.

Devotional Reading: Psalm 115.1-3, 9-11.

Explanations and Comments

I. Elijah's Meeting With Ahab, verses 1-20.—After three years of severe famine in Samaria because of the drought, Ahab called Obadiah, his superintendent, and told him to go in search of water for their perishing horses and mules. He was met by Elijah, who ordered him to inform Ahab that rain was coming. Ahab came to meet Elijah. "Thou troubler of Israel!" were the king's angry words of greeting. Boldly Elijah retorted that the king was the real troubler of the nation, for he had forsaken the commandments of the Lord and had followed the gods of Jezebed.

"Thus even in ancient days the age-long dispute continued among contending factions assigning to one another the responsibility for evils among God's people. In Christ's day it was the charge of the Pharisees that he troubled Israel with teachings that were subversive of the traditions of the elders. With passing generations the expression of bigotry changes; the spirit of anti-Christian intolerance and bigotry, however, is constant. The most effective way to meet error is the restatement of truth. When 'loyalty to truth' finds expression in malicious attacks upon those holding different views, the object is frustrated."—Record of Christian Work.

Then Elijah ordered the king to assemble on Mount Carmel all the priests of Baal and of the Asherah. The king did the prophet's bidding.

Old Popular Pastime May Be Revived

Throwing Horseshoes Not Expensive and Tests One's Skill

The good old game of throwing horseshoes is being revived and bids fair to become one of the most popular pastimes of the day.

Votaries of the game will be interested to learn that the world's record for women was broken at Bloomington, Illinois, when Mrs. Lenham, former world's champion, pitched six consecutive double ringers, beating the former record of five and making an average of 833 points in one game.

The game of horseshoes is neither strenuous nor expensive, yet furnishes plenty of opportunity for testing one's skill and judgment along its own peculiar lines. So, if you are not in the golf class, try horseshoes.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Reaper-Thresher Machines

Reaper-thresher machines are being introduced throughout the Brandon district. One company carried over 54 machines from last year and brought in 275 additional this year, nearly all of which have been shipped out to farmers. The majority are going to Saskatchewan with a number to Alberta.

Why Suffer from HEMORRHOIDS? (Piles)

Quick and positive relief is available through the use of Anusol Suppositories.

Your physician will tell you that there is no safer or better non-surgical treatment of Piles. The need of surgical attention is often obviated through the healing effect of these remedial Suppositories.

Half a century of success in the treatment of Hemorrhoids (Piles), is your assurance of good results. Ask your druggist. Or write us for one dozen, postpaid, $1.50. Canadian & Foreign Agency Company, Unity Building, Montreal.

ANUSOL SUPPOSITORIES

Vastness Is An Asset

Canada Has Bridged Gaps That Were Obstacles To Nation-Building

In days gone by, Canada's vastness was a drawback and a liability. At one time it seemed almost impossible that a country of such widespread territory could be moulded along national lines. The terrific gaps between centres of population, the wilderness of the north country, the forbidding mountains of the far West, all loomed as obstacles to nation-building.

But the gaps were bridged, the wilderness pierced and the mountains crossed or tunneled. Canada's vastness is now an asset. In this great country almost every natural resource may be found. And there is room for all our people and many millions more.

Some day, many wise thinkers believe, Canada will be the centre, the chief nation, of the British Commonwealth of Nations. Many stranger things have come to pass.

Device For Typing Music

New Machine Would Greatly Facilitate Work Of Composers

A machine by which composers will be able to type down their musical ideas in one or several copies, as easily as a letter is written by typewriter, has just been perfected by Lajos Viragh, a retired postal director. The model of the machine on which Mr Viragh has been at work for three years, is constructed of wood and rubber, and should the manufactured machines prove as satisfactory as the model, the work of composers and those obliged to read manuscript music will be enormously facilitated.

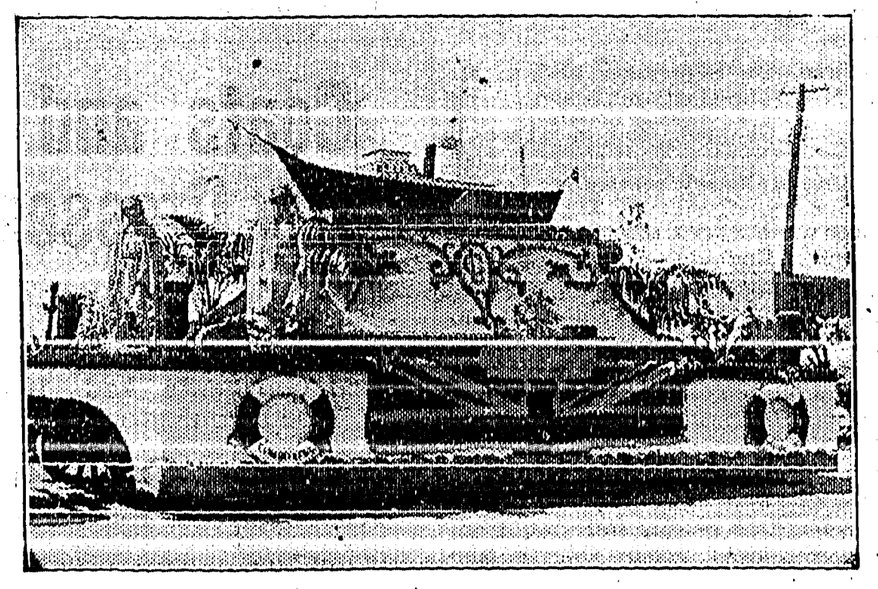
Looks Like Extermination

The 4,000 sportsmen who made returns to Saskatchewan gamekeepers department last year secured a total bag of 100,000 duck, 26,000 prairie chicken, 6,000 ruffed grouse, and 3,200 geese. In order to obtain some idea of the approximate bag of all hunters it is to be assumed that 12,000 who did not make returns secured the same average bags.

In the Woods

Hunters find Minard's an excellent remedy for sprains, cuts and wounds. Pack a bottle in your kit.

MINARD'S "KING OF PAIN" LINIMENT



FIRST CUNARD STEAMSHIP

This is an allegorical float of the first Cunard steamship, the Britannia, which in 1840 made its maiden voyage from Liverpool to Halifax, and inaugurated the first steamship service across the Atlantic. This float represented the Cunard Line in the recent pageant given before the princes, Premier and Mrs. Baldwin, at Ottawa, at the conclusion of the World's Poultry Congress. The pageant was held in honor of the delegates to the Congress, who came from all parts of the world.

A BROKEN DOWN SYSTEM.

This is a condition for diseases to which doctors give many names, but which few of them really understand. It is simply weakness—a breakdown, as it were, of the vital forces that sustain the system. No matter what may be its causes (they are almost numberless), its symptoms are much the same; the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what alone is absolutely essential in all such cases is increased vitality—vigour, vital strength and energy to throw off these morbid feelings, and as night succeeds the day this may be more certainly secured by a course of

THE NEW FRENCH REMEDY. THERAPION No. 3

than by any other known combination. So surely as it is taken in accordance with the directions accompanying it, will health be restored

THE EXPIRING LAMP OF LIFE LIGHTED UP AFRESH,

and a new existence imparted in place of what had so lately seemed worn-out, tired up, and valueless. This wonderful medicament is suitable for all ages constitutions and conditions, in either sex; and it is difficult to imagine a disease or derangement whose main feature is weakness, that will not be speedily and permanently overcome by this energetic essence, which is destined to cast into oblivion everything that had preceded it for this wide-spread & numerous class of human ailments.

Sold by leading Chemists everywhere. Not to be confounded with the Therapion of Messrs. Clarke Mfg. Co., Haverstock Rd., N.W.5, London.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VIII.—Continued

The Wymuths were exactly the same type, — black-eyed, pale, anaemic, with lustreless thin, black hair, through which a bloodless scalp showed blotchily; false teeth—no, not false—everyone could see what they were — artificial, rather — so white they were almost blue. They believed in hell and spoke of the "world" in a tone which implied both horror and contempt. They knew that Christ was coming soon to take His own out of the world, leaving the other odd millions to their well-merited punishment.

Mr. Wymuth satisfied the Board that he believed in discipline for wayward girls—discipline, repentance, and after that a life of meek and lowly spirit,—"And," said Mr. Wymuth, "my wife will be guided by me entirely," at which Mrs. Wymuth bowed her head and drew her thin lips more tightly over her blue teeth.

The Board breathed more freely. "It will be better now," said Dr. Smythe, "and I think it would be well to have the pastors appeal to the ladies to have a series of teas to raise money for the additional salary. I am sure the ladies will take care of it."

It was to the Girls' Friendly Home (under the Wymuth rule) that Helmi finally was committed. If she had been of the full age of eighteen years she would have been sent to jail.

The police matron, a silent woman, who held her job because she was no talker, came with her on the car. Helmi, with her clothes in a little green valise which Miss Abbie had given her, walked confidently down the path which led to the big oak door. The former matron's flowers bloomed at each side of her. They nodded a welcome to her, and she felt reassured and comforted. It must be a nice home where there were so many flowers. Helmi had put on her pleated skirt and white middy, which now had the monogram on it, just like the other girls. She wore it today, because it had always brought her a good time and was full of the vibrations of fun and fellowship. The Blue and Gold Book was in her valise, and her English learning book, too. She would be all right, and Miss Rodgers would come, and the girls, too.

Helmi had not yet given up hope that Mrs. St. John would come to her aid when she was better. She still thought of her as she had last seen her, heavy-eyed, distressed, ill, and told herself over and over again that this was why her dear friend had not come to her. She was still too sick to know what had happened. Helmi liked to picture the scene. Her friend in her slinky gown of black silk, with her pearls, would come; she would be wearing her green velvet cloak, the one that looked just like the ocean foam that had gone cutting away from the boat in creamy suds when she crossed the ocean, and her black hat with the silver arrow; she would come driving up in her big car and talk to the people in big swanky English words, making her eyes go snap like she could when she wanted the Doctor to do something. Everyone always did what Mrs. St. John wanted, and she would be so mad that people had been mean to Helmi, and she would call them names, and stamp her foot, and maybe swear a little — just a few good ones. And then she would turn and say "Come, Helmi, my poor, brave child."

Oh! it would be sweet.

As Helmi was the first case to be brought in since Mr. and Mrs. Wymuth came, the worthy couple were determined to show the Board the value of discipline. The history of the case had been given them. The girl had refused to tell why she was in the Chinese den.—It was evidently a stubborn case. Mr. and Mrs. Wymuth had dealt with stubborn cases before. The proud and froward spirit must be broken. And it could be. They were waiting eagerly for Helmi. The Board would expect results, and the Board would not be disappointed.

When the Police Matron and Helmi climbed the flight of stairs leading to the great front door and the bell was rung the lock was turned in the door and they were admitted into a dark hall. As they entered the door was shut again so promptly behind them that the corner of the Matron's cape was caught and had to be released. Then the big bolt shot into place, and in a whisper Mrs. Wymuth asked them to come this way, leading them down the hall to a gloomy room which she called her "Retreat." The door was shut and locked, and Helmi was told to sit down.

The Matron, living up to her reputation of being no talker, handed Helmi over with as much emotion as is shown by the ice man when he loosens his pincers from the square of ice and leaves it to drip its life out on your back step. His responsibility ceases when the step is reached.

"Good-bye, Helmi, be a good girl," she said, not without a degree of kindliness. Her last delivery to the Girls' Friendly Home had pulled a handful of hair out of her not too well covered head; so she felt kindly to Helmi.

Helmi wrote her name in the brown book Mrs. Wymuth showed her, quite proud of the fine big letters she was able to make. She wrote her address "c/o Miss Abbie Moore, 52 Chestnut St."

Mrs. Wymuth admired her writing. "And you can English speak?" she asked sweetly, feeling that if she transposed the words they would be more intelligible to the Finnish girl.

"A little,"—said Helmi, smiling back.

"You will learn more here," said Mrs. Wymuth: "all our good girls go to school. You like school?"

Helmi nodded.

"Now, dear I want to be your friend—I am a little mother to all the girls—I want you to tell me all about yourself."

Helmi told her about coming to Saint Paul—her aunt's death—her coming to Winnipeg—Miss Abbie Moore—the Girls' Club. Suddenly she stopped.

"Ye-e-e-s?" Mrs. Wymuth stretched the word out until it seemed like a sharpened pry which would be sure to lift another slab of conversation.

"That is all," said Helmi.

"Who sent you for the medicine, dear?" asked Mrs. Wymuth casually.

"I cannot tell," replied Helmi, looking her questioner straight in the eye.

"You mean you will not tell. Now, Helmi, trust me—I'm your little mother." She came over to the girl and laid her hand on her shoulder. Her touch made Helmi shiver, and when she bent nearer Helmi drew away from her.

"I will not tell," said Helmi again.

Mrs. Wymuth drew her lips tightly over her two plates. "We'll see," she said, and Helmi knew it was a threat.

That night Helmi met the girls at supper. The table had been turned diagonally across the room to get greater length, and it had a clean cloth, although it was not Sunday; Mrs. Wymuth had expected a visit from some members of the Board.

"Now, girls," said Mrs. Wymuth, in her sweet way, after a lengthy blessing had been called down from on high, "we have a new girl, Helmi Milander. She has come to us for a while, and I want you to be very good to her, and very kind. Let her know she is among friends here. Helmi and I have had a little difference already, which I wish to tell you about. In order to help her I must know her whole story, and this she refuses to tell me. I have coaxed her, but she reamins stubborn. Isn't she foolish, girls? I am here to help every girl, but the girls must let me. Isn't she foolish, girls?" she repeated.

"Yes, Mrs. Wymuth," said the girls in chorus. But they said it listlessly. Their days of mourning for the other matron were not ended.

Then Mrs. Wymuth proceeded to tell the story, the girls listening open-mouthed. A new girl's story was always interesting.

"Now we will all pray that Helmi's stubborn spirit may be melted. You will all pray, won't you girls?"

Helmi sat looking from one to the other helplessly. Had she not one friend anywhere?

Every night after the evening meal there followed this orgy of prayers, when every girl who wanted to stand well with the matron prayed. Much of it was meaningless, but as the prayers went on a certain excitement laid hold on them, and in their supplications they forgot that other ears than God's were listening, and unconsciously they revealed many things. The Matron, was hopeful that Helmi would be swept into the whirlpool of excitement, and would tell what she wanted to know. Helmi sat still and listened, but refused to pray.

EXPECTANT MOTHERS

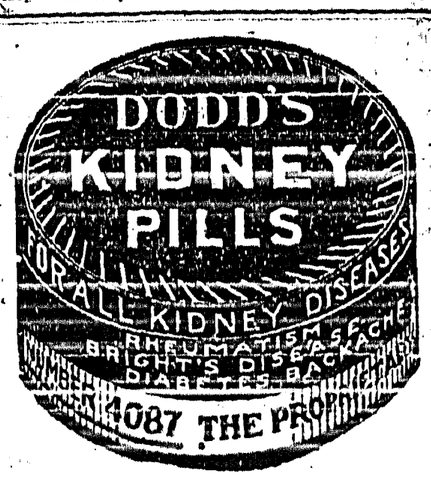
Read Mrs. Menard's Letter. Her Experience May Help

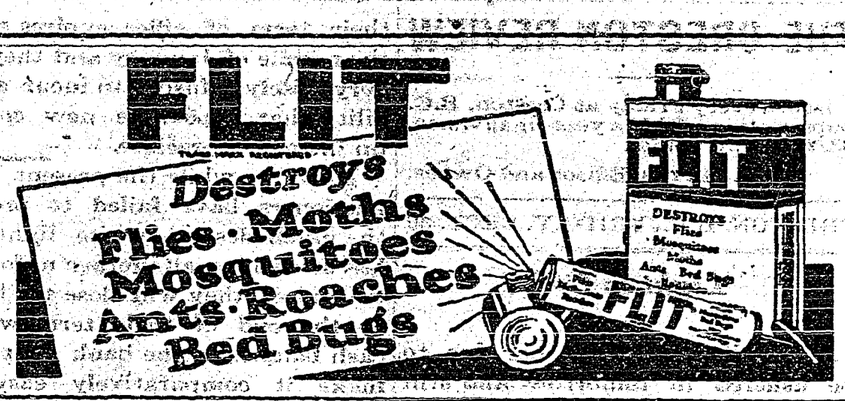
Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times."—Mrs. Oliver Menard, 21 Harvey St., Chatham, Ontario.

Worms sap the strength and undermine the vitally of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Testing Big Seaplane

The Westminster Gazette announces that the British ministry is trying out a 3,000 mile special seaplane development flight in the Baltic with a fleet of experimental flying boats as exhaustive tests for naval and commercial transport work. It is hoped, the Gazette adds, that the tests will involve huge all metal aerial battleships to act as the eyes of the fleet.





Dinner Sent By Air

Reno Rancher Ordered Sixty Plate Meal From San Francisco

The St. Francis Hotel at San Francisco received an order for a sixty-plate dinner to be delivered by aeroplane at the home of W. H. Moffit, cattle rancher near Reno, Nev.

Arrangements were made by telephone from the Moffit ranch to forward the meal in an express aeroplane, with electric heaters to keep the food hot, a head waiter to superintend the serving, and two aviators properly attired to serve.

A DOCTOR'S PRAISE

A Noted Doctor Strongly Endorses Dr. Williams' Pink Pills

The test of any remedy lies in its acceptance and employment by the qualified medical practitioner. No less an authority than Dr. Andrea Amici, physician to the Papal household, writing on the subject of anaemia, impoverishment of the nervous system and disorders attributable thereto, strongly endorses Dr. Williams' Pink Pills, recommending them as superior to other tonics.

Dr. Amici's testimony reads as follows:—"For several years I have made use of Dr. Williams' Pink Pills in my work and I have always found them efficacious in the treatment of disorders due to impoverishment of the nervous system, anaemia and neurasthenia, stomach weakness, retarded development in young women, and irregularities. There is no lack of tonic remedies, but in my experience no one of them manifests a superior efficacy to that of Dr. Williams' Pink Pills."

No more conclusive evidence of the value of Dr. Williams' Pink Pills could be asked for or given, than is found in the above endorsement of this noted European physician. Besides this, howevevr, this medicine has enjoyed a world-wide public confidence for more than a third of a century and has brought relief to thousands and thousands of weak and suffering people.

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness and stomach trouble. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

Let the word of Christ dwell in you richly in all wisdom.—Col. iii. 16.

'Tis not the skill of human art
Which gives me power my God to know;
The sacred lessons of the heart
Come not from instruments below;
Love is my teacher.
—Madame Guyon.

Every great teacher or leader lays stress on some single word of might,—the key, as it were, to his position. Buddha's great word was "renunciation." Zorcaster's, "purity." Menu's was "justice." The key to Confuclus is "moderation." Moses emphasized "law." Plato, "harmony." Socrates, "reason." The strong word of Epictetus was "reliance." Antoninus, "self-possession." But Jesus gives us the key to the inner chamber of His heart in a single, mighty, sweet word,—"love."—O. B. Frothingham.

Merely a Signature

A member of a congregation, becoming angry at a sermon the minister was preaching, wrote the single word, "Fool" on a sheet of paper, called an usher to him, and had it delivered to the minister in the middle of his sermon. The minister opened the paper and read what was written. Then he said: "An unusual thing has happened. A member of the congregation has signed his name without writing the letter.

Girls admire promising young men, but everybody else prefers those who pay cash.

Used by physicians—Minard's Liniment.

New Home Ready

Prince Of Wales To Take Up Residence In Marlborough House

The Prince of Wales will go into residence at Marlborough House soon after his return from Canada.

Marlborough House, an almost square, solid red brick building, was built by Sir Christopher Wren just over 200 years ago for the first Duke of Marlborough. Later it became the residence successively of various members of the royal family, and finally was acquired for King Edward VII, then Prince of Wales.

The present Prince of Wales will actually use only a small portion of the house himself. His suite will be on the first floor, which looks out on two acres of garden. A large room, which was formerly an audience chamber, will be converted into a combined reading room and study where the Prince will conduct the principal part of his correspondence.

On the ground floor is a large room which will be used for the entertainment of friends who are not of the Prince's intimate circle.

Queen Alexandra's boudoir and bedroom will remain exactly as they were in her lifetime, as will also the four state rooms with their pictures and statuary. The same course was followed with regard to Queen Victoria. Rooms at Osborne House, Isle of Wight, where she died—although her death took place more than a quarter of a century ago and although Osborne House as a whole has been put to different uses—remain as they were in her lifetime.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

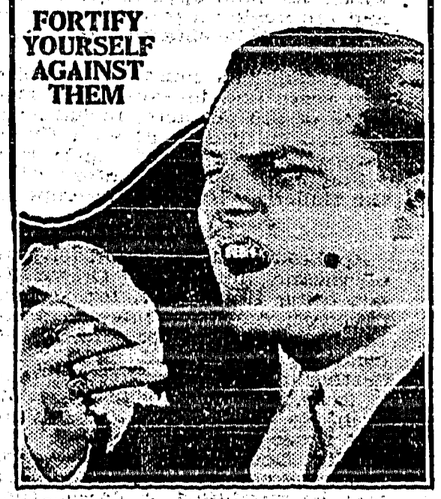
Was Interested In Photography

Queen Alexandra's interesting collection of photographs taken by herself has just been bound. Her late Majesty had a great gift of seizing a good picture, and would have made a name in this line were she born in a less exalted position. In the collection are pictures of every royalty in Europe, for more than half a century. Up to a few years before her death she kept up her interest in the camera.

Though unresponsive, as a rule, to natural beauty, Napoleon showed a marked preference for violets.

COLDS COST MONEY

FORTIFY YOURSELF AGAINST THEM



It is estimated that a sufferer from colds loses three days' time from work in a year.

At work, in the "movie," or at any entertainment, if your neighbor has a cold and sneezes or coughs, the air is full of germs and if you are not in good condition, you may become ill. The only protection you can have is to build resistance against disease forces. Take that splendid herbal tonic,

DR. PIERCE'S
GOLDEN MEDICAL DISCOVERY

It increases the appetite, stimulates the digestion, helps to enrich the blood and to improve the health generally.

Procure it from your druggist, in either liquid or tablet form. Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., if you desire free medical advice.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance. $3.00 to U.S. points.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, SEPT. 30

Light is Off

With the first of October due to be ushered in tomorrow and still no break in the deadlock that exists between the village commissioners and C. O. Rodgers, who was favored at the plebiscite earlier in the year for a five-year franchise, hope may as well be abandoned for electric light during 1927, at any rate.

So far as village owned plant is concerned the hands of the present commissioners are tied, in that their term of office expires about the middle of January and they are very wisely refusing to incur a liability that a possible new council might not appreciate.

However while the present commissioners have failed to provide the much desired white light, unless something altogether unforseen transpires, they will close the books at the end of their term with a cash balance in the bank that will make it comparatively easy for their successors to early in 1928 to put in a village plant if the new council cannot come to terms with Mr. Rodgers.

Insofar as a light and power goes villagers might as well wake up to the fact that there is only two sources of supply—a village owned plant, or from C.O.Rodgers or some other firm or individual. If the cost of developing Goat River canyon runs to the figures that have recently been adduced, light from that source is at present entirely out of the question in a small community like this.

Five years from now, however, development has some indication of being such that Goat River canyon would be possible, or with Arrow Creek irrigation system working there may be another hydro supply that would be fully adequate.

These are factors that tend to make a five year franchise look attractive—but, we trust, not so transcedently alluring as to postpone the advent of "juice" until 1933.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions, is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant, unreserved Crown Lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas not exceeding 20 acres may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers or travellers, up to ten head.

Sports All Arranged

The fall fair Sports Committee have things well in hand and unless the weather goes wrong an enjoyable afternoon should result. The various school teams are practicing hard and the youngsters are really keen to land the cup for their own school. Mr. Lucas of Alice Siding school will act as starter, and Messrs. Geo. Johnson, Oakeley and J. Cherrington will act as judges. No money prizes will be given and some of the first prizes are articles dear to the heart of a boy and worth winning. A football is the first prize in the tug of war, with a base ball and bat as second. W. K. Esling, M.P. for West Kootenay, will be asked to distribute the prizes.

SALE OF IMPOUNDED ANIMAL

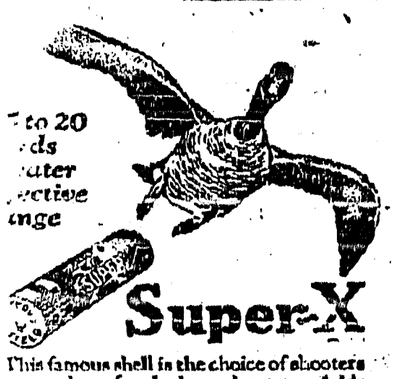
Notice is hereby given that, unless sooner redeemed, I will sell by auction at the Pound, in the Village of Creston, at 10 a.m., TUESDAY, OCTOBER 4, 1927, the below-described cow:

1 black cow, no brands.

W. G. HENDY, Poundkeeper.
Creston, Sept. 28.

GAINS EIGHT POUNDS SINCE TAKING VINOL

"I felt sluggish, drowsy and weak. A friend suggested Vinol. Now I feel fine and have gained 8 pounds."—R. H. Bailey. The very FIRST week you take Vinol, you begin to feel stronger, eat and sleep better. For over 25 years, this simple, strengthening iron and cod liver compound has been helping nervous, run-down women, tired men, and pale, sickly children. Creston Drug & Book Store.



This famous shell is the choice of shooters everywhere for ducks and geese. Adds 15 to 20 yards to the effective range of your shotgun. There's nothing like it. See us for the world's champion rifle, revolver and shotgun ammunition.

Western Ammunition

V. MAWSON

NELSON ASSESSMENT DISTRICT

I HEREBY GIVE NOTICE that, on Wednesday, the 12th day of October, 1927, at the hour of 10 a.m., at the Court-house, Nelson, B. C., I will sell at public auction the lands in the list hereinafter set out, of the persons in the said list hereinafter set out, for delinquent taxes unpaid by said persons on the 30th day of June, 1927, and for penalty, costs, and expenses, including the cost of advertising said sale, if the total amount due for the period ended December 31st, 1925 is not sooner paid.

[Continued on Page 7

Drained Lands Yields are High

Thirteen combined threshers and 11 steam threshing outfits are harvesting the wheat, oats and seed pea crops of the drainage districts of the Kootenai Valley and if the warm weather which started last Saturday continues the crop will all be harvested in another ten days or two weeks. The average wheat yield will be well over 40 bushels to the acre. In some sections the yield is over 60 bushels to the acre. Hank Spalding, in Draining District No. 4, on a measured tract of 15 acres, threshed 56 bushels of wheat per acre. McGlocklin Brothers secured 58 bushels an acre from a tract in Drainage District No. 4.

In Drainage District No. 1 five combined threshers and four steam threshing outfits are working. Some threshing started last Saturday. Three combines and two steam outfits are at work in Drainage District No. 4. Three combines and four steam threshers are harvesting the crops in Drainage District No. 8. One combine and one steam rig is working in District No. 5, and one combine and one steam thresher is working in District No. 3, and a combine and a steam rig is threshing in District No. 2.

Several buyers for large Spokane and coast grain dealers have been in the grain fields of the Kootenai Valley the past few days making tests of moisture content in the grain. The first grain threshed after the rainy spell of weather of three weeks duration, carried a high percentage of moisture. Monday and Tuesday grain tests showed from 15 to 18 per cent moisture. These tests were made on grain which stood in shocks during the rainy season and from the threshing outfits comes the reports that the grain is all drying rapidly and that probably all grain threshed from now on will grade No. 1, while a large proportion of grain threshed the first of the week will dry out in good shape in the sack. It is evident that the loss caused by the rainy weather to the grain crops of the Kootenai Valley will be much less than was at first predicted. According to all reports, the pea seed crops will be first class.

The Bonners Ferry Grain & Milling company has purchased a large grain dryer and cleaner which, Ralph Clapp stated yesterday, would probably be here ready for use by the latter part of this week. This machine will have a capacity of handling two carloads each 24 hour day. Thompson and Krause, farmers of the Copeland district in Drainage District No. 4, have just constructed a dryer and cleaner, with an average capacity of a bushel per minute. In this machine the grain passes over a long endless screen chain, operated by a gas engine. The heat is circulated through the chute through which the grain passes with a fan. The equipment has an elevator attachment so that all grain handled may be loaded directly into grain cars, if desired. A. B. Ashby, who saw this machine in operation, states that it is working most satisfactorily and will be a factor in reducing the percentage of moisture in grain.

C. D. Simonds, President of the First National Bank, stated Monday evening at the meeting of the Kootenai Valley Commercial Club that some $20,000 worth of grain is being harvested each day and that he thought it would take three weeks to complete harvesting work.—Bonners Ferry Herald.

FOR SALE—Milch cows, reasonable prices. A. G. Cox, Vaness Ranch (Alice Siding). Creston.

PIGS—Young pigs for sale, Berkshire-Duroc Jersey cross, ready for October delivery, going price. A. G. Cox, Vaness ranch (Alice Siding), Creston.

FOR SALE—1924 Superior Chevrolet in fine running order, all tires nearly new. It has never been abused by hard driving. If you want a good car come and try it. Carl Wigen, Wynndel.

CUSTOMS SALE BY PUBLIC AUCTION

To be sold by public auction under the provisions of the Customs Act at Customs Warehouse Canadian Pacific Railway freight sheds on WEDNESDAY, OCTOBER 19th, 1927 at 2 p.m. the following goods which have been forfeited or which are in default for payment of duties under the Customs laws: Viz:

Lot
1 3 pieces Steam chest and parts
2 2 crates Marble
3 3 pa. Stove castings
4 3 pieces Cable and Blocks
5 1 case Hardware
6 4 boxes Mechanic Tools
7 7 parts Galvanized Ironware
24 bundles Galvanized Buckets
8 1 box Tools
2 cartons Sickles
1 crate Wood Handles
4 cartons Hose Sprinklers
9 1 case Fishing Tackle
10 1 box Manufacturing Leather
11 34 packages Hardware
12 1 " Hardware
13 18 bundles Galvanized Iron Pails
12 " Shovels
2 " Coal Scoops
3 " Grain Scoops
14 1 case Manufacturing Brass
15 4 crates Sad Irons
1 " Hot Plates
1 " Hot Plates
16 20 cases Hardware
17 14 " Hardware
18 18 boxes and bundles Hardware
19 5 cases Fishing Tackle
20 3 " Hardware
21 4 cartons Iron Chain
22 1 box Hardware
1 " Harness Chain
23 8 crates Mechanic Tools
2 boxes Mitre Saws
24 8 cases Loaded Shells
2 boxes Flash Lights
25 4 " Vices
1 " Mechanic Tools
2 " Wrenches
2 " Chain Wrenches
26 1 case Fishing Tackle
27 2 " Iron Hinges
28 1 " Vices

W. J. STURGEON,
Provincial Collector.

BRITISH COLUMBIA

The Mineral Province of Western Canada

TO THE END OF DECEMBER, 1926

Has produced Minerals as follows: Placer Gold, $78,018,948; Lode Gold, $126,972,318, Silver, $80,787,003; Lead, $106,976,442; Copper $209,967,068; Zinc, $50,512,557; Coal and Coke, $264,699,133; Structural Materials and Miscellaneous Minerals, $50,175,407; making its mineral production to the end of 1925 show an

Aggregate Value of $988,108,470

Production for year ending December, 1926, $67,188,842

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES
VICTORIA, BRITISH COLUMBIA

N.B.—Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department o Mines, Victoria, B.C. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.

Reports covering each of the Six Mineral Survey Districts are published separately, and are available on application.

RED ROSE TEA "is good tea"

106

RED ROSE ORANGE PEKOE is the "best tea you can buy"—picked when only three days old—juicy, flavor-filled leaves. Now packed in *Aluminum*.

General Outlook Is Encouraging

The latest preliminary estimate of the yields of the principal grain crops, issued by the Canadian Government Bureau of Statistics, based upon reports from all parts of the Dominion, predicts a wheat crop of 458,741,000 for this year, the second largest crop ever grown in Canada. The record crop was in 1923, which totalled 474,199,000 bushels. This year's wheat crop is estimated at 48,930,000 bushels more than last year's yield and promises an average yield per acre of 20.4 bushels per acre.

The three great grain growing provinces of Canada, Manitoba, Saskatchewan and Alberta, will produce 432,223,000 bushels of this year's total crop of wheat as compared with 383,440,000 bushels in 1926.

There has been considerable damage from rust this year in various sections of Saskatchewan and Manitoba, and when final threshing returns are in, the government's estimate may be considerably lowered. The Manitoba Free Press estimates the wheat crop of the three prairie provinces for the year 1927 at 424,312,125, which is some eight million bushels less than the government estimate. This paper's estimate of the Oat crop of the three prairie provinces is also considerably lower than that of the government and in the final analysis may prove to be more nearly correct, as with the exception of Alberta and the western part of Saskatchewan, the oat crop has been rather disappointing. Rust and frost has caused a lot of damage. However, there can be no question but that this year's crop throughout the west will be well above the average.

A new high record of wheat production has been established in Alberta this season with a crop now estimated at 168,862,000 bushels, an increase of 24,028,000 bushels over the previous bumper crop grown in 1923. But not only wheat promises a bumper yield this year; oats, barley, rye and other grains as well as the whole range of field and orchard crops promise record returns. The 1927 crop of 16,524,000 tons of hay and clover from 10,187,836 acres is the largest yield ever recorded in Canada.

The yield of oats has also been good with an estimated production of 502,199,000 bushels, of which 332,494,000 bushels were produced in the Prairie Provinces. Particularly good crops are being harvested in both Saskatchewan and Alberta and the estimate for the Prairie Provinces is the second largest shown. In 1923 it was estimated that 391,756,000 bushels were harvested in Western Canada. The 1927 production of barley is expected to be 98,000,000 bushels, and rye 17,462,000 bushels.

Though good weather is still required for the completion of threshing operations, these have now advanced so far that over a considerable area threshing is finished. There is naturally a feeling of optimism among Canadian farmers and business men. Not for years has the general outlook been so encouraging in Canada as it is at present.

Japanese Royalty Engaged

Heir To Japanese Throne Is Betrothed To Daughter Of Prince

Prince Chichibu, 25, brother of the Japanese Emperor, and next in line to the throne, is reported betrothed to Mahako Ichijo, 17-year old daughter of Prince Ichijo, says a Tokio despatch to the Evening News.

Prince Ichijo is chief ritualist of the Imperial Court and a member of the ancient Kioto nobility.

The despatch says that an early engagement of the Prince is urged by court dignitaries and the lack of a son in the emperor's family (a second daughter was recently born) is felt to make the early marriage of Prince Chichibu desirable.

The first step is often so expensive that you can't afford to take the second.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of

Chas. H. Fletcher.

MUSICAL INSTRUMENTS

ULTRAPHONIC GRAMOPHONE, 33 selections, $165.00 for $65.00 Guaranteed. Polsson, 340 Mount-Royal East, Montreal

W. N. U. 1709

Device That Measures Billionth Of Inch

New Invention Also Records Millionth Degree Of Temperature

An instrument which measures a billionth of an inch or a millionth of a degree of temperature was exhibited by the Bell Telephone Laboratories. This device, the most refined measuring apparatus in existence, is the recently perfected development of P. P. Cloffi. It was constructed to measure the minute contraction or expansion which wires of different composition undergo when they are magnetized.

Before this was constructed the most delicate instrument for measuring length was the interferometer, which employs wave-lengths of light for measuring purposes. The Cloffi instrument is approximately a hundred times more sensitive than the interferometer to changes in length. A change in temperature of a thousandth part of a degree is sufficient to cause a spot of light to race across the measuring scale.

Mr. Cloffi was assigned by Dr. L. W. McKeehan of the Bell Laboratories to invent an instrument of this type for use in an extensive research into the nature of magnetism. Today nobody knows what magnetism is. A good deal of light has been thrown recently upon the matter in which all the atoms are lined up in such a way that each one exerts a magnetic pull in the same direction. A poor magnet is a substance in which the atoms are arranged at haphazard so that the magnetic pull exerted by one atom is cancelled by that exerted by another.

Money From the Clouds

Mayor Foster, of Toronto, while taking an airplane trip over the city, dropped ten marked-one dollar bills which he will redeem for $5 if returned to him at the city hall. This is being done to add interest to the flight which he is making in order to become a member of the Aeronautical Association, which began its convention in the city.

Lignite Utilization Board

Plant At Bienfait, Saskatchewan To Be Remodelled

Official announcement has been made by the minister in charge of the Bureau of Industries of the Government of Saskatchewan that the plant of the Lignite Utilization Board at Bienfait, Sask., has been acquired by the organized western Dominion Collieries Company of Winnipeg, which company will remodel the plant for commercial operations at the earliest possible date. Negotiations looking to this end have been carried on for some years following the experiments by the board from 1919 to 1923.

This Wonder Liquid Dissolves Corns Quickly

Makes them shrivel up, makes them drop off, makes your sore toes well in a day or two. Relief is instantaneous. Paint on a few drops of Putnam's Corn Extractor tonight—see how well your sore corns feel in the morning. It's a wonder liquid—a marvel-worker. Nothing so good for sore corns as Putnam's Corn Extractor. Get Putnam's from your druggist — today. Satisfaction guaranteed.

Saskatchewan Furs

The total estimated amount of money paid trappers of Saskatchewan for the many kinds of fur they brought in in 1926 is $1,366,706. The number of furs brought in was 650,742 the greatest being muskrat number 433,858 with a value of $580,629, and the next coyote with 30,475 pelts worth $274,275.

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.R. No. 6, Simcoe, Ont., writes:—"Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Ship Hens For Egg Contest

First Canadian Entry Left Vancouver Recently For England

The first Canadian entry to the International egg laying contest, which will open at Preston, Lancashire, England, shortly, left Vancouver in a specially equipped express car over the Canadian National Railway. The shipment was made up of thirteen white leghorns from the pens of Farrington Brothers, Burnaby, under the supervision of Prof. E. A. Lloyd, of the University of British Columbia.

During the long journey sufficient British Columbia apples were being carried to furnish each bird with one daily.

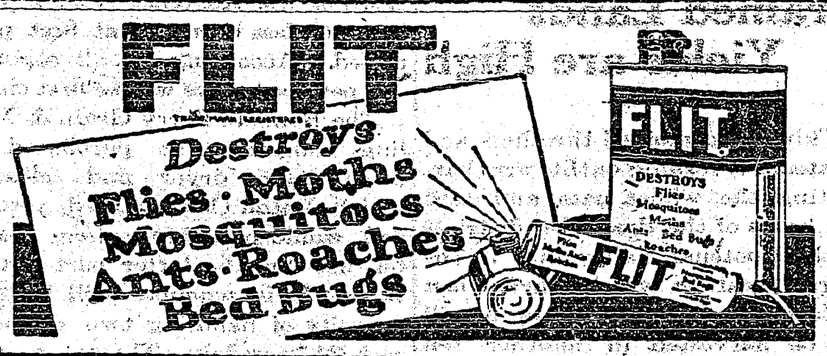
Seeking Ship For Commander Byrd

Arriving at Oslo, Norway, Lieut. Bernt Balchen, of Commander Richard E. Byrd's trans-Atlantic crew, answered as follows to an inquiry as to the purpose of his visit: "Commander Byrd asked me to come to Norway and find a ship which he intends to send to the Ross barrier this winter for reconnaisance before he starts the great antarctic expedition next year. In addition to the ship my task also is to find equipment and men, especially skiers, who are ready to leave for the Antarctic this autumn."

Alfalfa Meal Mill

Edmonton interests are looking to the possibility of establishing an alfalfa meal mill at Lethbridge, for the grinding of alfalfa and the making of mill feeds with ground alfalfa and syrup by-products from the Raymond sugar factory as a basis. The extending acreage of alfalfa in the irrigation districts about Lethbridge has roused this interest.

Relieves Sore Throat—Minard's Liniment.



Some Highways Over-Signed

Directions Necessary Only Where Road Is Doubtful Or Dangerous

"Signing the highways" has long been a topic for departmental consideration. Some have done little, others a good job, and some have "over-signed" their highways.

We read in newspapers of patients who take an overdose of doctor's medicine and die. The motorists in some localities are in the same position—overdoses of "signs" cause near death to many good trips, and travelling is "hard work."

Whoever is in charge of signs in your highway department should study the situation carefully, and erect signs at every place where the motorist can go wrong or is in danger. No other directions are necessary. One sign correctly placed is better than ten signs placed "hit or miss."

Is Efficient Store-Keeper

Blind Man At Salt Lake Expert In Disinguishing Coins

Charles A. Larson has been blind for 16 years, but he conducts his grocery store at the Salt Lake tourist park as efficiently as though his sight was unimpaired. His wife and two daughters assist at times, but he is not dependent upon them. Every commodity is put in a designated place and Larson is able to walk to any part of the store, select the article wanted by the customer, and return to the counter. He is an expert in distinguishing coins and has no difficulty in making change. Scores of tourists have bought supplies from him without learning of his affliction.

Manitoba Make Binder Twine

Five hundred acres of hemp are under cultivation within a radius of five miles of the plant of the Manitoba Cordage Company at Portage la Prairie. This year the company has been experimenting with binder-twine and, according to report, certain farmers are being supplied with a number of balls for trial purposes, to report on its quality after use.

A Praiseworthy Hobby

Giving away flowers to the sick has been the hobby of a man of Greenville, South Carolina, for the past twenty years. He estimates he has given 80,000 bouquets to the sick. Now a man of sixty-six years he spends early morning and evenings in his flower garden. Each Sunday he picks the flowers in bloom and makes his weekly round of Greenville hospitals and sick beds.

FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to their little ones—any medicine that will make the baby well and keep him well will always receive hearty recommendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers, throughout the country, not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the many minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion; break up colds and simple fevers; expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The fastest moving living creature is the deer or bot fly of North America and Europe. Entomologists say it can fly at the rate of 185 miles an hour.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

If you would retain a man's friendship don't try to show him that he isn't half as smart as he thinks he is.

It's an easy matter to get around any one you can see through.

FOR Colds

ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds	Neuritis
Pain	Toothache
Headache	Lumbago
Neuralgia	Rheumatism

DOES NOT AFFECT THE HEART

WARNING! Beware of Counterfeits

There is only one genuine "ASPIRIN" tablet. If a tablet is offered as "ASPIRIN" and is not stamped with the "Bayer Cross"—refuse it with contempt—it is not "ASPIRIN" at all! Don't take chances!

Safe

Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

"Aspirin" is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

152

Local and Personal

The turnout for the picture, "The Fire Brigade," was disappointingly small, as the film was a good one and half the profits were to go to the local fire fighters, whose share of the nett revenues will not be more than $10.

There will be a meeting on Saturday night, October 1st, in the hall over French's barber shop, to organize a branch of the Canadian Legion at Creston. All ex-service men are requested to be present. A. H. Bryant of Fernie, zone representative, will be in attendance.

Premier MacLean took the air at Creston on Thursday last, en route to Fernie, Cranbrook and Kimberley, where he held public meetings. He was met by a number of Creston Liberals and informed that he will be visiting Creston in about a month, when he will address a public meeting.

A marriage of interest to Creston people was solemnized at Cranbrook on Monday afternoon, when Miss Eleanor Mildred, eldest daughter of Mr. and Mrs. S. Burnett, was united in marriage with Frank Bridges of Cranbrook, Rev. M. S. Blackburn officiating. Miss Mary Bush of Creston was bridesmaid, while the groom was supported by J. A. Menzie of Cranbrook.

Provincial police H. McLaren, who has been on vacation since early in July, resumes his official duties on October 1st. Jock McRobb, who has been in charge, will be at work until the middle of October, and just now is making a clean-up of all the autos in the district to make sure their registration features are in accord with the information supplied when taking out licenses.

The football match on Saturday afternoon resulted in a draw with a score of one goal each. The play was not very high in quality but great credit belongs to the School team, who with the assistance of Jim Cherrington and Ben Crawford, for holding the High School team to a draw even when overtime was played. More attention should be paid to the referee's whistle and the game should go on unless the whistle blows, no matter what is claimed. There will be no match this week, but if possible a practice on Saturday afternoon. A match will be arranged for Saturday, October 8th, against one of the other schools.

McCLARY'S

Radiant Circulating Heater

Not only Circulates Heat all over the House—shedding forth a Cheery Glow that speaks of Coziness and Comfort

Imagine a heater that you can sit beside and enjoy the warmth that radiates from it—a heater that circulates warm air all over the house—a heater that glows with the cheery brightness of a coal fire! Such is the new McClary "Radiant" Heater—the heater that combines all these advantages—that is handsomely designed—an ornament to any room—and exceptionally low in price. Heats three to four rooms.

RED ROSE TEA "is good tea"

105-R

RED ROSE ORANGE PEKOE is extra good.

Fight the Fire Fiend

The week commencing October 9 has, by proclamation published in the Official Gazette at Ottawa, been declared Fire Prevention Week throughout Canada. The object is, of course, to focus public attention upon the enormous losses, both of life and property, resulting from fire with a view to the adoption of more effective safeguards against fire, and to educate all people, and especially children, against habits of carelessness in the handling of matches, gasoline and other combustibles, and in the disregard of common-sense methods in the matter of extinguishing camp fires, and such simple matters as throwing away the still lighted stubs of cigars and cigarettes.

At first glance it would seem to be quite unnecessary for the national government to officially set aside one week out of every fifty-two for the avowed purpose of teaching a presumably intelligent, educated and business-like people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire record proves conclusively that it is only too necessary to keep up a persistent campaign to awaken the people from their carelessness and indifference in this very vital matter.

Canada, which is so progressive in many ways, and has taken the leadership in numerous worthwhile movements, and can claim the honor of achievements, occupies a low place among the nations of the world when statistics of fire losses are studied. Few countries, if, indeed, any one, annually record the appalling fire losses which take place in Canada. This Dominion's fire loss per head of population is about the highest in the world, and the passing years do not reveal much improvement.

Canada has already sustained the loss not merely of millions but actually billions of dollars worth of forest wealth, some of which is gone forever, and where long periods of time will be required to make good the loss in other districts. And these forests are one of Canada's greatest assets, —one of the principal factors today, and for the future, in building up the Dominion's greatest industrial enterprises and providing a very large percentage of the Dominion's export trade.

The fire fiend takes a yearly, monthly, almost daily toll of human life, as well as leaving behind it a trail of lifelong suffering and economic loss in blinded and crippled humanity.

Because of the high ratio of fire losses, the people of Canada have to pay abnormally high rates for fire insurance. The insurance companies are not to blame for demanding high premiums They must protect themselves and their policy holders, and just so long as fires in Canada remain so numerous and costly, so long will the cost of insurance against fire remain a heavy drain upon the business of the Dominion.

Then, too, there is the further heavy burden imposed upon all urban communities in the maintenance of elaborate and expensive fire-fighting equipmemnt, and large expenditures to augment water supplies for fire-fighting purposes greatly in excess of the daily domestic requirements of cities and towns.

All these forms of protection are necessary, and must be paid for in our tax bills. But because of the frequency of fires largely the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be maintained on a much more extensive and expensive scale than would otherwise be necessary.

Fire Prevention Week should, therefore, be observed all over the country. Special attention should be paid to the subject in all schools, while each individual householder should devote a little time to a thorough examination of his premises and make a close check-up of conditions in and around all buildings. Rubbish should be cleared away, unprotected stove pipes, electric wires, gasoline and oil supplies attended to, and every member of the family cautioned to exercise the greatest care in handling of matches and all combustible materials, lighted lamps, and in the making and extinguishing of fires. Finally, all property should be adequately insured notwithstanding all precautions that may be taken.

Attention to these important matters now may save much loss and suffering in the future.

Giant Dirigible Damaged

Expansion Of Gas Through Weather Conditions Caused Peculiar Accident

A peculiar accident to the giant dirigible Los Angeles occurred while the huge airship was moored at her mast in Lakehurst, N.J. The temperature rose suddenly, causing the helium gas in her containers to expand rapidly, and the wind shifted 180 degrees in a few seconds. The result was that the ship threw her stern high into the air, almost at an angle of ninety degrees, and whirled around with the sudden change in the wind. The temperature went back to normal rapidly, so that the gas assumed its normal volume and the tail of the ship dropped down. Meanwhile, however, loose gear in the ship was thrown about, causing some damage.

Get Rid of HEMORRHOIDS (Piles)

Surgical operations for the relief of Piles can often be avoided by the use of Anusol Suppositories.

Your best assurance of their remedial effectiveness is the fact that Anusol Suppositories have a twenty-five years' record of success in the treatment of this painful condition.

Nothing injurious or habit-forming in the Anusol formula. Safe for people of every age. Sold only in red SEALED boxes.

Ask your druggist or write us for a dozen, postpaid, for $1.50. Canadian Foreign Agency Company, Unity Building, Montreal.

ANUSOL SUPPOSITORIES

Japan Needs Post Offices

Government Is Considering Plans For Increase In Number

More post offices are needed in Japan. For each 6,700 persons in the country there is only one post office. England and Germany have one to 2,000 persons. The Communications Department is considering plans for the increase in the number of offices and an appropriation is to be included in next year's Budget for the opening of 8,000 more post offices over a period extending ten years. At the end of ten years each village throughout Japan will have a post office all to itself.

Canada Favored For League Seat

London Paper Says Dominion Well Qualified For Seat On Council

The London Observer, commenting on Canada's candidacy for a seat on the League Council, says it would be hard to pick another candidate more powerfully qualified for the privilege. The great war was warrant enough of Canada's capacity for international service and she has played other parts since then.

In numbers and influence taken together, continues the Observer, Canada ranks high in the list of candidates; and above all, it would be invaluable for the league to have for the first time a direct representative from North America upon the council.

Toes Kept Free From Sore Corns

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of Putnam's Corn Extractor. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on "Putnam's" Corn Extractor. It does the work—and roots out the corn.

Self-Sustaining Air Services

Probably the only two self-sustaining air transport routes operated during 1926 in the Empire were in Canada—those from Haileybury to the Rouyn, and from Sioux Lookout to the Red Lake mining fields. These are on an absolutely commercial basis and have had no Government subsidies.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe ,as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes:—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Coal Not Merely a Fuel

German Scientists Discover Many Valuable By-Products

European scientists appreciate that "coal is not merely a fuel but contains raw products to make things out of," declared Dr. Thomas S. Baker, president of Carnegie Institute of Technology, upon his return from a trip abroad.

Coal's potentialities are particularly appreciated in Germany, according to Dr. Baker, where "there has been a most striking development in synthetic fertilizers in connection with coal—the outgrowth of the fixed nitrogen process developed during the war. It is a matter of very great economic force to the country and farm productivity has been materially increased.

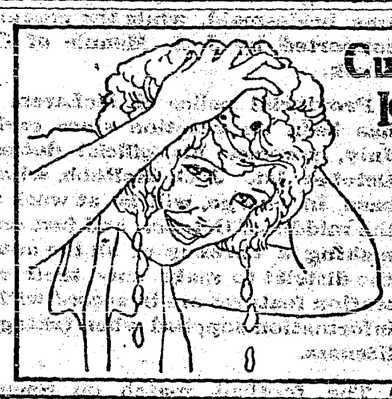
"A great deal of the enormous success that the German Chemical Trust is having centres around the chemistry of coal," Dr. Baker said.

"While Germany has lost its monopoly of dyes, it is developing other processes that are of great importance to modern industry. This trust is said to be producing synthetic gasoline on a commercial basis."

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Eclectric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsey have thus made themselves immune to attack.

The oldest university in the world is that at Pavia in Italy, founded in 825 A.D., by Lothair, grandson of Charlemagne.

Drives away pain — Minard's Liniment.



Cuticura Soap Shampoos Keep the Scalp Healthy

Regular shampoos with a suds of Cuticura Soap and hot water, preceded by light applications of Cuticura Ointment, are most effective. They do much to cleanse the scalp of dandruff, allay irritation, stimulate circulation and promote the healthy condition necessary to a luxuriant growth of hair.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

French Use Bicycles

Report Shows They Out-Number Automobiles Ten-To-One

The number of bicycles in use in France in 1925 amounted to 7,112,909, an increase of 5 per cent. over 1925, according to Trade Commissioner Louie Hall, Paris, in a report to the Detroit office of the Department of Commerce.

About half a million bicycles are now used in Greater Paris, the Department of the Seine having 476,665 registered, or two to every eight inhabitants. In the highly industrial departments of Northern France, a total of 856,000 bicycles are in use, or one to every five inhabitants. There are 10 times as many bicycles in France as automobiles.

Asthma is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvellous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Will Plead Law Cases In European Courts

American Woman Attorney Going To Paris, Athens and London

An American woman attorney will try cases in Paris, Athens and London while on a "vacation." She is Miss Grace H. Brown of Detroit, who plans to sail to Europe soon to carry out her legal plans. In Paris Miss Brown will represent an Armenian claiming $500,000 from the Turkish Government for land he alleges was confiscated. She has been retained in an immigration case in Athens and an involved estate will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

Some men waste a lot of valuable time explaining their actions.

Was Descended From Well Known Character

Direct Descendant Of Jack Horner Dies In England

Sir John Horner, lord of the manor of Wells and direct descendant of Jack Horner, died recently in Somerset, England, at the age of 84. Jack Horner, of nursery rhyme fame, was steward of the temporalities of the great Somerset Abbey of Glastonbury.

At the dissolution of monasteries, tradition says, the pie into which he put his thumb contained the title deeds to the manor of Wells, which was the plum that Jack pulled out and made himself owner of a large slice of monastic lands. Wells Park has been in the family nearly 500 years and the eldest son has always been named John.

The first year's salary of an early Michigan circuit rider consisted of hay, oats, socks, mittens and cash to the extent of $118.

Radio is Better with Battery Power

Ever since the inception of radio, batteries have been the accepted source of power. Pure DC current without hum or surge and correct voltage for all tubes and varying conditions are most conveniently and economically obtained today as in former years with batteries.

A, B & C BATTERIES

made by Eveready are the choice of radio users everywhere. There is an Eveready radio battery for every radio need. Your dealer recommends and sells Eveready Radio Batteries. Consult him about the correct batteries for your particular set.

COSGRAVE MAY CARRY ON FOR ANOTHER YEAR

Dublin. — President Cosgrave's Free State government, despite the disappointing outcome of the parliamentary elections, intends to carry on with the expectation of at least a year of life. In making this announcement, Hon. Ernest Blythe, vice-president of the council, stated that a new loan will be floated in December.

The ministers, all of whom were re-elected, are confident, it may be taken from this, that when the new Dail convenes October 11, it will approve the continuance of Mr. Cosgrave as president of the council and that he will accept the mandate.

There is no doubt, observers say, that such an outcome would meet with the wishes of the business community throughout the Free State, regardless of political affiliations.

It is realized, however, that the administration will have to go warily and that its success will depend upon how far it is able to carry with it one or more of the smaller groups in the Dail. Although the farmers, with six deputies, and the independents with twelve, are commonly ranked as government supporters in the Dail, their attitude is not one of solid adhesion.

In fact, P. F. Baxter, leader of the Farmers' Party, who lost his seat in the election, is quoted as saying at Cavan recently that as President Cosgrave had not secured a definite mandate from the country the alternative was to make way for the Fanna Fail and give Eamon de Valera a chance to prove his policy practicable.

There is a suggestion that Mr. Cosgrave may offer a government portfolio to a member of the Farmers' Party and that in this case the party would vote solidly for him.

League May Meet In Ottawa

Canada Planning To Invite Council To Meet Here

Geneva.—Canada, recently elected to a non-permanent seat on the council of the League of Nations, is reported to be planning to invite the council to sit at Ottawa. In fact there is a projected scheme to have the the whole League assembly meet there in order to give American newspapermen and League sympathizers a ready occasion to study its workings at first hand. This project is still in abeyance. It seems certain that one of the council's meetings in the near future will be held in Berlin.

The Maharajah of Kapurthala, one of the chief reigning princes of India, would like to see a session of the League council held in Delhi, India's capital, at some not too distant date.

Speaking to a correspondent today, he asserted the governing classes in India are doing all possible to interest their people in the aims and aspirations of the League.

Wheat Pool and Prices

Pool Will Not Be Used To Boost Prices To the Consumer

Ottawa.—There was no cause for alarm or reason to expect that the farmers would use the wheat pools to boost the price of wheat, Hon. W. R. Motherwell, federal Minister of Agriculture, told the convention of the Bread and Cake Bakers' Association in session here. Hon. Mr. Motherwell spoke on "Co-operation" and said the wheat pool was by far the best measure which had ever been taken by the farmers for their own prosperity and consequently for that of the entire country.

It would be virtually impossible, he said, for Canadian farmers to hold wheat for any length of time with a view to raising the price. Outside competition was too great from the point of view of exporters, he said.

Plane To Carry Sixty Passengers

Paris.—Charles A. Levine is planning to return to the United States on October 11 with three French engineers, with the intention of building a huge airplane capable of carrying sixty passengers across the Atlantic in regular flights, one of his closest advisers stated here. No further details of this project could be obtained.

Freight Rates Case

Reasons For Freight Cut Are Given By Board

Ottawa.—Reasons for judgment in the general freight rates case were made public by the Board of Railway Commissioners. The judgment itself was handed down on August 25 following an extensive investigation of railway freight rates throughout the Dominion. The judgment provided more or less extensive reductions in rates on grain and other commodities for export.

The reasons issued recently cover 200 pages and review in detail the hearings in the different parts of Canada, together with the conclusions arrived at by each of the commissioners. In the main, Chief Commissioner H. A. McKeown, Assistant Chief Commissioner McLean, and Commissioners Vien, Boyce and Lawrence are in agreement on the main points covered in the August judgment, namely: Transcontinental rate scale; terminal tariffs; different standard mileages, East and West; and domestic grain rates to British Columbia.

Commissioner Oliver submits a number of conclusions differing somewhat from those of other members on the board. A schedule dealing with 80 various individual applications is being prepared and will be issued by the board within the next week.

Impressed With Canada

Grandson Of Famous "Iron Chancellor" Paying Visit To Dominion

Ottawa.—Count Gottfried Von Bismarck, a tall, blonde, good-looking young German, whose grandfather, Prince Otto Eduard Leopold Von Bismarck, was the famous "Iron Chancellor," arrived in Ottawa from Chicago to spend the next few days in the capital. Count Bismarck is interested particularly in agriculture and he visited the Dominion Experimental farm here.

The young count has seen something of the Canadian west, as from Winnipeg he visited the Manitoba wheat fields. He said he had been greatly interested n the operations of the Canadian wheat pools and the Winnipeg Grain Exchange. He was impressed also with the extent to which machinery is used on the western farms—far more, he said, than in Germany, where farms were smaller and labor less expensive.

Silk Train Wrecked

Valuable Cargo Tumbles Down Embankment When Train Leaves Rails

Vancouver.—Raw silk valued at $2,500,000 was lying in the Fraser River and on the bank of the stream near Yale, east of here, as the result of the wreck of a Canadian Pacific Railway special silk train travelling east. The train, consisting of 18 cars destroyed telegraphic communication along the Canadian Pacific Railway track, when ten cars lurched down the bank.

Five cars tumbled into the turbulent waters of the Fraser River, while the five others were arrested in their fall by rocks and trees.

Suspend Code Sub-Section

Regina.—That subsection of the criminal code which forbids an alien to be in possession of a shot gun, rifle or ammunition is to be suspended in so far as it relates to the Northwest territories the Gazette notifies. The suspension is brought about by representations of the R.C.M.P. that to prohibit such weapons would be to deprive trappers of their means of livelihood. There were other considerations too.

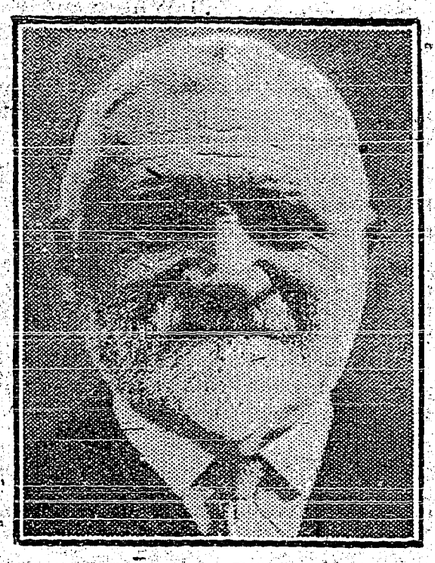
Study Einstein's Theory

Geneva.—Two Belgian scientists, Professor Piccard and Dr. Stahel, have installed a physics laboratory on the summit of Righi-Kulm, 5,905 feet above Lucerne. Their object, especially, is to make a study of Einstein's theory of relativity. American and English scientists are invited, it was said, to visit the new laboratory.

U.S. Ambassador To Mexico

Washington.—Dwight W. Morrow, the New York banker, has been selected by President Coolidge to be ambassador to Mexico. The Washington Government has obtained the Mexican Government's sanction of the selection. The post has been vacant since Ambassador Sheffield resigned last July.

Will Attend Convention



Acton Burrows, Toronto, Ontario, will be an interesting delegate at the Dominion Conserrvative party convention in Winnipeg. He was one of the secretaries at the Conservative convention in 1878—nearly half a century ago—when Sir John A. Macdonald's famous national policy was launched and he has the original of the resolution that was passed on that historic convention.

To Aid In Defence

New Zealand To Help Pay Expenses Of Singapore Naval Base

Wellington, N.Z.—Premier Coates introduced in the House of Representatives the government's naval defence proposals, of which the chief feature is a contribution by New Zealand to the Singapore naval base.

The premier said that the proposals would bring New Zealand's expenditure on naval defence up to ten shillings (about $2.50) per capita.

No affront to Japan was contemplated in any way by the construction of the Singapore base, he said, adding that Japan's action in the great war had been unforgettable, especially the visit of Japanese warships to New Zealand waters to assist in the convoying of troops.

Considering the long trade routes to be defended by Great Britain, Premier Coates said, New Zealand was going to shoulder a fair share of the imperial budget.

The proposals were adopted by the house 51 to 10.

Receive Higher Wages

Berlin.—Instead of taxing bachelors, Germany is considering paying bachelor employees of the government more than the married men. At a conference in the foreign office regarding a nation-wide increase in wages, the minority report asked higher wages for bachelors because living is more expensive for them, as they have no wives to cook for them and spend much more on amusements.

Protest Tariff Change

Manufacturers Of Cutters and Buggies Object To Reduction In Duty

Ottawa.—Manufacturers of buggies and cutters protested to the tariff board against the application of the Consumers' League for a reduction of the duty on these articles. The manufacturers asked that the present duty be retained and that the sales tax be removed. This would save the purchasers $4 to $6 on buggies and $1.50 to $3 on cutters. Approximately 3,200 buggies were sold in Canada every year, it was stated.

R. J. Beachman, of the Consumers' League, argued that the existing tariff was more than enough to protect the industry. A buggy that cost $96 in the United States cost $109 in Canada. The Canadian industry, he said, had a pretty full measure of protection.

Mission School Tragedy

Grey Nuns Sister and Nineteen Children Perish In Flames

Big River.—Death and desolation today stalk in the frontier outpost of civilization at Beauval, a hamlet 130 miles north of here.

There the bodies of 19 children ranging in ages from six to twelve and that of a woman lie waiting for a coroner's investigation. All were victims of a midnight blaze that swept the Roman Catholic mission.

From the meagre details the fire swept the three-story frame building with such rapidity that in three or four minutes the entire structure, tinder like, through lack of rain for some time, was enveloped.

The victims are 19 pupils of the school and Sister Lea in charge of the dormitory where the fire was first discovered. In addition, a priest was so badly burned in the rescue work that he is not expected to live.

Forty-six children were saved from the inferno.

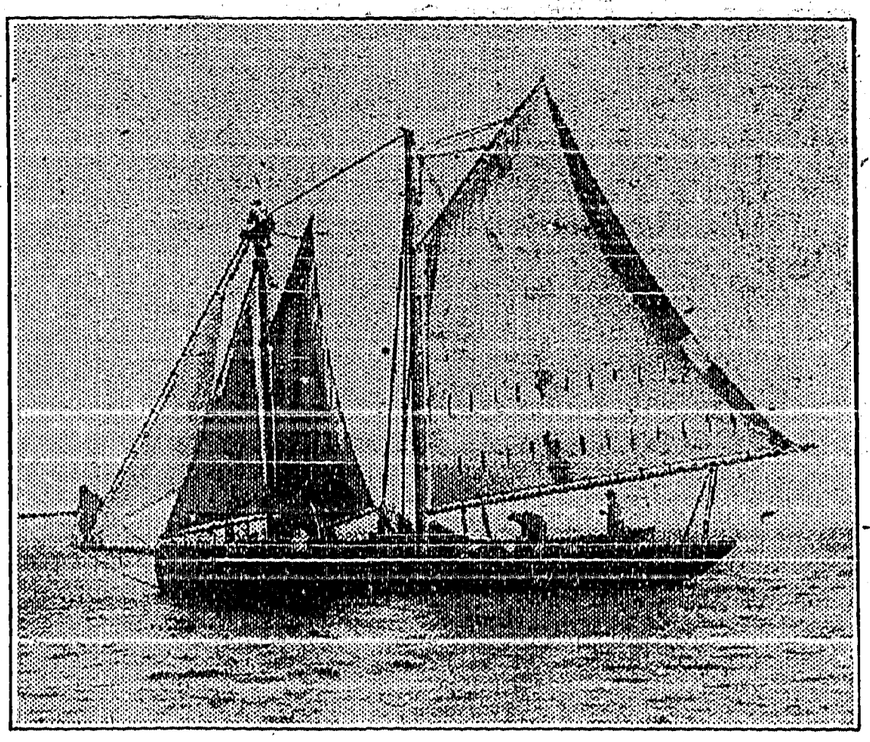
The fire is believed to have started in the centre of the building, close to the furnace, and spread towards the boys' dormitory.

To Set Slaves Free

New Ruling Gives Liberty To Slaves In Sierra Leone

London.—A new ordinance will be introduced in the legislative council of Sierra Leone, British protectorate on the west coast of Africa, which will have the effect of entirely freeing all the slaves in the protectorate after January 1, 1928. The new ordinance is the result of conversations between the British Government and the Sierra Leone Government.

Approximately 220,000 slaves will be able to leave their masters should they desire to do so as soon as the ordinance becomes a law, it was stated in official circles.



Baldwin Sees Whaler in Action

Premier Baldwin's bird's eye view of the phases of Canadian activity did not end as the Canadian Pacific Empress of Scotland steamed out of the harbor of North Sydney recently towards the Premier's homeshores. When only a short way out a seventy-five year old whaler seen above crossed the bows of the huge liner for the purpose of demonstrating to the Premier just how their operations are carried out. The photograph shows the old whaler off the starboard side of the Scotland. One fisherman is perched on top of the mast as the lookout while the harpooner is seen poised on the sail spar in front with the harpoon in hand.

The Empress of Scotland, bearing the helmsman of the British state home to England from his Canadian tour, was the largest ocean vessel ever to enter the harbor of North Sydney.

SOVIETS CAUSE STRONG PROTEST FROM FRANCE

Paris.—The storm which has been hovering over the head of Christian Rakovsky, Soviet ambassador to France, has burst at last, Le Matin announces that France has officially informed the Moscow government that Rakovsky's recall is an indispensable condition for a non-aggression pact with the Soviets.

Furthermore, the French ambassador, M. Herbette, was instructed to say the Soviets must give practical proof of their intention to live up, both in spirit and in letter, to their solemn undertaking, entered into in 1924, to abstain from all interference with France's internal affairs, by ordering their agents and those of the third or communist international, to cease activties in France.

In addition, France requires that the Soviets take active steps to bring to a conclusion the long drawn negotiations for settlement of Russia's debts to France.

Only when these conditions have been scrupulously fulfilled, Mr. Herbette was instructed to say, will France consent to open negotiations for the treaty of non-aggression recently proposed by the Soviet government.

The latest Franco-Russian crisis, thus brought to a head, began when Ambassador Rakovsky signed, as a member of a Russian communist party committee, a manifesto urging the soldiers of all nations to mutiny and overthrow the Bourgeois governments.

This raised a storm of protest in France and repeated representations were made to Moscow. Foreign Minister Tchitcherin, of the Soviet Government, at first disapproved, and then formally disavowed M. Rakovsky's action, but took no steps to recall him.

Instead, Tchitcherin offered to enter into a treaty of non-aggression and non-interference in internal affairs.

Three-Motor Plane Ready For Flight

Will Leave North Sea Island On Trans-Atlantic Trip

Berlin.—Despite vigorous denials by directors of the Junkers Aeroplane Works, it was learned from an unquestionable source that the G-24, a three-motor plane, has been made ready at Malmo, Sweden, for a trans-Atlantic flight and may arrive at any time at Norderney, the North Sea Island which was a German airplane base during the war.

The plane, it was learned, will be piloted by Friedrich Loose, one of the Bremen's pilots on the recent unsuccessful Junkers trans-Atlantic venture, and by Herr Starke, who is regularly employed at Lufthansa's test-station at Kiel, but who has taken a leave of absence to make the trans-Atlantic crossing.

The flight is planned to proceed in stages by way of Lisbon and the Azores, and then probably to Bermuda, although it is possible that the route may shift to Newfoundland.

Dessau, Germany—Junkers' officials here said that a type of their G-24 machine was ready for a trans-Atlantic flight to the United States, but insisted that the Junkers Corporation had nothing to do with the project.

They stated that they had merely sold the plane some time ago to a north German undertaking.

Canada's Auto Production

August Increase Fifteen Per Cent. Over July Output

Ottawa.—Production of automobiles in Canada during August totalled 12,526 cars, an increase of 15 per cent. over the output of 10,987 units in July, which was the lowest month this year, but 18 per cent. under the 15,261 cars reported for August of a year ago.

Production in August of this year included 2,485 open passenger cars, 7,002 closed passenger cars, 2,322 trucks and 716 chassis. Of the 716 chassis, 651 were intended for passenger cars, 12 for trucks, and 53 for either passenger or freight service.

E. D. Hamilton of Vancouver, western inspector of branches for the Bank of Commerce, paid the Creston branch an official visit on Friday last.

Up to the end of September there is a considerable falling off in the number of shooting licenses issued as compared with this date a year ago.

Mr. and Mrs. G. M. Argue of Cranbrook were Sunday visitors with Mr. and Mrs. C. H. Hare, including a call at Kuskanook in their itinerary.

Rev. Bryce Wallace, United Church pastor at Cranbrook, was a Creston visitor a couple of days at the first of the week, a guest of Rev. J. Herdman.

Mrs. (Rev.) Herdman, who underwent quite a serious operation at Cranbrook hospital at the end of the week, is reported to be making a very satisfactory recovery. Mr. Herdman, who accompanied her, returned on Monday.

Half a dozen of the local Liberals were at Nelson on Thursday evening last for a conference of the Liberals of Creston riding, at which it was again decided to postpone nominating a candidate until later in the year.

Don't Say it is Impossible

Q. Can you cure any disease?

A. Let it be understood, once for all, that Chiropractors do not cure, heal, or treat diseases, but by scientific adjustments they correct the cause of the disease and thereby open the way for Innate Intelligence to restore normal conditions to the body, and health follows naturally. Chiropractors adjusts the cause of the disease instead of treating the effect. There can be no effect without a cause. First the cause, then the effect. If you wish the effect to cease, get the cause adjusted. Don't say it is impossible. That's what they told Edison, Marconi, Wilbur Wright, and others. Chiropractic is Nature's assistant; adjustments free the nerve circulation, thereby causing the refure to be thrown out of the body through the natural channels. Chiropractic gives nature a chance to make you well. Adjustment is not treatment. Treatment is not adjustment.

Mp Creston office will be closed from Wednesday noon until Thursday evening of each week.
