THE CRESTON REVIEW

Vol. XXV CRESTON, B. C., FRIDAY, MAY 4, 1934 No. 6

Creston Assured Pre-Cooler June 1

Exchange to Inatall Modern Electric Operated Three-Casload Capacity Plant—Cost $4,000.00 —$15 Month to Operate.

Pre cooling (or cold storage) fruit handling and shipping facilities will be provided at Creston by June 1st. This was decided upon at the annual meeting of Creston Co-Operative Fruit Fxchange on Thursday afternoon last, when, by unanimous vote, the directors and management were authorized to at once proceed with the installation of a three-car capacity, air-conditioned, electrically operated cold storage plant to be ready for use by the end of May.

The new plant will be erected in the frostproof storage warehouse, and will be constructed so that extra units of any desired size can be added as required. the first unit will be 40 x 18 x 8½ feet, and the estimated cost of the plant completely installed is $4000, and the cost of operating placed at $15 a month. these are figures of the Canadian General Electric Company, Limited, who are installing the plant and West Kootenay Power & Light Company, Limited who will supply the "juice."

The plant is operated by two motors—one of two and the other of five h.p. capacity—and is automatic The construction of the precooler is simplified greatly in that it will be located within an area of the warehouse that is already frostproof. It is built of spruce shiplap with 4-inch cork insuallation, sided up with spruce shiplap. A temperature of 36 degrees is recommended and the mechanism of the plant is such that the air in addition to being cooled is also cleansed, humidified and returned to circulation once every ten seconds. The air circulation is so perfect that the makers guarantee that Limburger cheese and butter can be stored in it side by side and the butter will not show the least taint.

The benefits to be derived from the pre cooler will confer upon the fruit shippers are almost too numerous to mention. Perhaps its outstanding usefulness at Creston will be in connection with the shipping of pears, which can be placed in storage and go out in mixed cars. In the past, due the quick ripening propensities of pears they had to move in carlots almost as quick as they arrived at the warehouse, and have never been marketed to good advantage under those circumstances, as buyers for carloads of pears are almost unknown.

For cherries it will be equally valuable These can now be held in torage for carload shipping and be disposed of on the distant market, which has always been good for 50 or 75 cents per crate more than places that can be reached by l.c.l. shipping.

Berries will benefit in much the same fashion, and with this fruit it will have the extra advantage of taking care of the surplus that piles up with l.c.l. shipping always light Saturday, to say nothing of Domnion Day, which comes in the strawberry season. With berries prompt pre cooling takes away the natural field heat in the fruit and will enable them to stand up an extra 24 hours even if sent l.c.l.

With pre cooling facilities it will be possible to handle prunes almost tree ripe, and now flowers are becoming prominent in shipping it should be possible to handle these so as to have the blooms that come in early in the week held back to supply the big demand at the weekend.

The Exchange pre cooler will cater to all lines of storage and should be of great benefit to those in the egg shipping trade., as well as all other lines where storage is of this sort is desired.

With this quality cold storage it will now be possible for the Exchange to carry over into each new year the several carloads of apples that are required to supply the natural market along the Crow during the winter—a line of remunerative trade that Creston has had to pass up in the past due to having no adequate storage facilities.

Wynndel

S. Benedetti was a visitor in Cranbrook last week.

J. B. Rudd left last week on a business visit at Alberta points.

Miss H. Andostad was renewing acquaintances in Nelson last week.

The hot weather came to an end Thursday evening when a much need rain fell.

Capt. Manning, school inspector, was here on his semi-annual inspectoral visit Thursday.

Wynndel has a new postmaster. The office is now in charge of H. F. Packman, who took charge on Tuesday.

Mr. and Mrs. K. Dewar and son of Rossland are visiting here with Mrs. Dewar's father, John Bathie.

Wynndel had two churches on Sunday, Rev. A. Walker was here for the usual United Church service in the morning, and Rev. M.C.T. Percival took Anglican worship in the afternoon.

Mrs. Howell is a patient at Creston hospital, where she underwent an operation for appendicitis last week.

O. Hagen and C. Ward of Shaunavon, Sask., who have been visiting with J. Franklin, left for home on Thursday.

It is currently reported that the ranch property of the late Geo. Heller has been purchased by Mrs. Murrell of Creston.

Van San strawberries are in full bloom, and promise a heavy crop. Tree fruits promise well—provided there is no frost damage.

Mrs. Harvey, who has been a guest of Mr. and Mrs. G. W. Taylor the past few weeks, returned to Lethbridge, Alberta, Saturday.

Alice Siding

Mrs. R. Davis of Elko was a visitor at the home of Mrs. J. Marchall one day last week.

Alice Siding baseball nine handed the Wynndel team a 12-11 beating in an exciting game on Sanday afternoon.

A dance in aid of purchasing baseball equipment will be held at the home of Mr. and Mrs. A. J. Collis, Friday evening.

Jack Miller, jr., is at work in the Lakeview district, skidding out logs for new buildings to be erected by George Willis and Joe Miller.

Bill Mather will be in charge of herding the Stockbreeders' Association cattle which are now ranging in the country back of Yahk.

The roundup of cattle off the flats was completed at th end of the week, and the herders all got back on Sunday. The cattle have been taken to the hills this year, just one on month earlier than in 1933.

Evelyn Mather is expected home this week from Cranbrook, where she recently underwent an operation for appendicitis. She is recovering nicely but may not return to school until after the holidays

Canyon City

Bill Clayton was a weekend visitor at Kimberley, with his brother, Bob.

Grover Kifer left at the first of the week on a business visit to Kimberley.

John Nygeard, jr., has just left for the Reno mine, near Nelson, where he has secured employment

The heat of last week has shortened up the bloom, and by the end of the week even many of the apple trees will have shed their blossoms.

Canyon tennis club are having a dance in the hall this (Friday) evening. Good music and an dmission of 50 and 25 cents, which includes supper

Jock McRobb was on the staff of the Reed blacksmith shop at Creston a few days last week, in the absence of Ed Gardiner, at Kellogg, Idaho.

Arvid Samuelson is busy with his truck hauling posts to the canyon for his father, A. G. Samuelson, who is shipping on an average of a carload a week

Canyon tennis club are at work on th. lot opposite the postoffice on which they are getting space in shape to take care of a couple of courts. Officers will be elected at a meeting later in the month.

The C.G.I.T. group at the United Church has recently been reorganized into a Junior Ladies' Aid and will widen the scope of their activities in helping the church. The girls are being supervised by Mrs. Messinger, with Annie Gartland as president, and Agnes Johnson, secretary.

Followers of the United Front party observed May Day with a meeting in the hall on Tuesday night at which Tom Mountford, defeated candidate, was the chief speaker, with K. Demchuk of Huscroft occupying the chair. Interest in the cause seems to be on the wane as the total attendance was only about 30.

The sympathy of Canyon residents goes out to Louis Faulkner of Cranbrook in the death of his wife who passed away in that town on April 19th, after but a very brief illness. A family of two sons and two daughters survive. Mr. Faulkner was mill foreman for Canyon City Lumber Company, Limited, for many years, and is very highly respected.

The log jam above the West Kootenay Power & Light Company dam, which was backing the water up as far as the C.P.R. bridge, was successfully cleared on Thursday last. A cable was strung from the dam to a point on shore opposite the log pile and with three men operating from a boat which was connected up to the cable, it was possible to clear away the key logs and release the others. It is reported that when the water was at its peak it threatened to enter the power house and bulheads were put in to prevent flooding.

Arrow Creek

W. Ramm is having trouble witn the deer in his hay field. The animals have just about ruined one field.

Mel. Jorde is opening a store in the former hall building. He expects the stock to arrive this week.

Public school inspector Manning of Cranbrook, made his official visit at Arrow Creek school, Tuesday last.

P. M. Wilton, who lost two foxes last week recaptured one but the animal had been accidently killed. The other is still at large.

Nearly all the cows on the east side took a trip to Canyon on Saturday, but were herded back on Sunday by Mr. Strobel and Mr. Ward.

The Wilson home was favored with a visit from a quartette of Canyon people on Friday. In the party were Mrs. L. W. Stephens, Mrs. Kolthammer and Mr. and Mrs. Knott.

Erickson

Mr. and Mrs. T. R. Wi son spent a few days with the former's parents, in Fernie, last week.

Mrs. Clarence Bundy of Cowley, Alta., was a weekend guest of Mr. and Mrs. T. W. Bundy.

Mr and Mrs. Sherwood and family have settled on their ranch in the Connell sub-division.

Mrs. T. R. Wilson left by auto on Monday on a month's holiday with her parents in Vancouver.

Mrs. R. M. Telford returned at the first of the week from a two weeks' visit at Champion, Alberta.

T. Wilson of Cranbrook arrived on Sunday on a visit at the home of Mr and Mrs. J. E. Healey.

J. Alton left at the end of the week for [illegible] where he was a surgical patient at Creston last week.

Asparagus is on the move in considerable quantity from the Mrs. G. Cartwright, L. T. Leveque, W. G Littlejohn and H. Cowling ranches.

Mrs. W. Woodhall and daughter, Ann Louise, who have been visiting the former's parents, Mr. and Mrs. John Hall, returned to Nelson on Sunday.

The cooler weather that has obtained since Saturday last has slowed up the outgo of tulips from the W. G. Littlejohn farm. Shipments at the weekend, however, were unusually heavy

Mr. and Mrs. Geo. Currie and family have arrived from Fernie and are getting settled in the former Angus Cameron ranch, which they purchased last month, R. Walmsley, the well known Creston realtor, puttiug through the deal.

Miss Beulah Penson of Cranbrook arrived home on Sunday for a three weeks' holiday with her parents, Mr. and Mrs. A. Penson. She was one of five nurses in the graduating class of 1934 at St. Eugene Hospital in that town.

Lister

The John Huscroft sawmill shut down early last week, having sawn up the available supply of logs.

Creston Valley Post Canadian Legion had the May meeting here on Tuesday night, which was well attended.

Rev. M. C. T. Percival had a good turnout at the Anglican Church service Sunday morning, at which there was a celebration of Holy Communion.

Mr. and Mrs. C. H. Phillips of Kimberley were weekend visitors at their ranch, and arranging for the early season work on the place, which is looking remarkably well.

L. Kalina, who is placer mining in the neighborhood of Bull River, is here for a few weeks, a guest of Otto Becker. Due to high water in the stream he is forced to suspend operations.

The Community Socity wound up the series of bridge drives at the schoolhouse on Saturday night at which the high scores were made by Mrs. John Bird and Waddy Huscroft. Prizes for the highest aggregate scores of the winter went to Mrs. Chas. Huscroft and Waddy Huscroft.

Four enterprising ranchers at Huscroft have just purchased the 20 acres embraced in the Huscroft Recreation ground from a coast estate, which owns the property, R. Walmsley of Creston negotiating the sale. It is the intention to put the acreage in good shape for a real athletic field. The lots in the same locality are being surveyed and will be offered for sale.

Public school inspector Capt. Manning made his semi-annual viet to Lister school on Wednesday afternoon and his report to the trustees is most satisfactory. He has just presented the senior room with a framed picture of the Armorial Bearings of Canada, along with some booklets which fully explain the picture This is one of 50 such pictures given him by the Vancouver Canadian Club for distribution throughout the East Kootenay inspectorate.

Kitchener

Miss Clara Hunt spent the weekend with Cranbrook friends.

Miss Edith Nelson left on Monday for Calgary, Alberta, on a few weeks' visit.

Fred Belanger of Jaffray is here on a visit at the home of Mr. and Mrs. C. Senesael

Miss Jessie White, principal of Kitchener school, spent the weekend at her home at Fernie.

School inspector, Capt. Manning, made his semi-annual visit to Kitchener school on Friday.

H. H Redmile was a weekend visitor at Cranbrook. Mrs. Redmile is staying in that town on a visit.

The Ladies' Hospital Auxiliary are having a dance in Hunt's Hall, tonight, May 4th. Good music.

Misses Jean Henderson and Jean McCreath of Creston were Thursday visitors with Miss Clara Hunt.

Mrs Fred Belanger of Jaffray, with Mrs. C. Senesael were at Creston, Monday, renewing old acquaintances.

C. Senesael, who is working at Fort Steele, arrived home on Saturday, and will not be working until after the high water period.

Mrs. Allan Moore, of Fort Steele, who has been visiting her sister, Mrs. A. Lepage, the past two weeks, returned home on Saturday.

Dan McDonald, who has been employed at Kimberley airport, arrived last week and is now in charge at the airport replacing Col. Newcomen.

Col. and Mrs. Newcomen and children, Chelsea, Terence and Betty, left last weekend for Calgary, Alberta, where they are to again make their home. He has been in charge of the airport since it was started some 18 months ago.

Legion May Meeting

The May meeting of Creston Valley Post Canadian Legion was held at the schoolhouse at Lister on Tuesday evening 24 members were present and president John Bird was in the chair. A committee was appointed to draft resolutions for the zone convention at Cranbrook on May 6th. A Canada wide census of unemployed amongst ex-service men is being taken and those concerned are asked to notify secretary W. G. Hendy any afternoon between 3 and 5 o'clock at the public works office. H. A. Powell gave a short account of the visit of Canadian Legion members at Kellogg, Idaho, and the installation of Maple Leaf Post Canadian Legion which has been organized at that point. The president expressed the post's regret at the departure of John Finlay, who leaves shortly for Greenwood and of A. R. Bernard who is taking a position in the vicinity of Prince Pupert. After the meeting lunch was served by the Lister comrades.

The Kellogg Invasion

Members of Wild Rose Lodge Knights of Pythias and Creston Valley Post Canadian Legion were at Kellogg, Idaho, from April 23rd to April 25th. On arrival both delegations were entertained at a banquet served by the Pythian Sisters in the Oddfellows Hall, at which over 100 were present. Col. Mallandaine, who headed both delegations, replied to the address of welcome. During the meeting of Galena Lodge, K.P., which followed, visiting members of the Canadian Legion were entertained at a smoking concert by ex-service men in the Auditorium.

The following day the Creston visitors were shown over the smelter, and taken for a drive throug the surrounding country, and were guests of the Kiwanis Club at lunch at which Col. Mallandaine gave an address.

On Tuesday night, at the Wallace Memorial Hall, with impressive ceremonial Col. Mallandaine initiated 63 members of the recently formed Maple Leaf Post and installed its officers. This post is one of several Canadian Legion Posts of the British Colu bia Command in the western states, and has the wholehearted support of the American Legion, who lent their hall for the opening m eting. After the ceremony, which was attended by 800, and the installation address there was a musical programme followed by dancing which continued until an early hour.

The Creston visitors were house guests of individual members of Galena Lodge and Maple Leaf Post, and are loud in their praise of the hospitality extended them during their entire visit.

Fruit Exchange Business Expands

1933 Apple Shipments Increased —For 1934 will Handle Boswell Crop—Install New Grader—Finances Satisfactory.

With a 20 per cent. increase in apples handled, satisfactory g ing in its shipments in other lines, lowest packing charges in its history—and possibly the lowest in B.C.—all obligations on its buildings to be met this year, and a satisfactory cash balance after meeting all 1933 costs, are some of the high lights of the annual meeting of Co-Operative Fruit Exchange shareholders at Trinity Church hall on Thursday afternoon. The Exchange president, Jas. Compton presided, and there was a representative turnout of the 1933 Exchange shippers.

J. W. Hamilton submitted the financial statement, the feature of which was the presence of a $800 cash surplus after taking out $800 of 1933 earnings to take care of a new roof on the warehouse and the installation of a new grader.

Manager W. McL. Cooper presented the manager's report covering last year's operations and reviewing the 1934 outlook as it presents itself at the end of April. After pointing out the necessity of a new roof and a new grader, he brief y sketched the more important features of the past year's operations, taking special pride in the success attained by inaugurating a central pack of cherries.

For 1934, Mr Cooper is apprehensive of the berry market. With a bigger crop to handle and the prairie buying power little, if any, better than in 1933, he was not inclined to waxe enthusiastic. He was, however, quite optimistic as to apples.

With the new marketing legislation, prospect of real stabilization, a short crop in eastern Canada, and new regulations forcing a cleanup of the Australian and New Zealand crops in the Old country market by late summer, there was distinct hope for a much better export deal.

With a pre cooler assured Mr. Cooper warmed up to the possibilities of disposing of the cherry crop to good advantage, while as to pears the new storage facilities should mean almost an absolutely new era for the local pear shippers With other commodites the new cold storage would be splendidly beneficial even to the taking care of flowers on days when the supply exceeded the market demand.

Terms of three directors had expired H. A. Dodd and L. T. Leveque were re-elected, and E. W. Klingensmith, who wished to retire, is succeeded by J. M. Craigie, who comes back to the executive after a year's absence.

1934 crop from Boswell will be handled by the Exchange, an agreement to this effect having been entered into with the Boswell Fruit Growers, who last year had about 10,000 boxes of apples, 4000 crates of Bing and Lambert cherries, 350 crates of blackberries, and some other lines. It is expected the Boswell l.c.l. shipments will be handled from Sirdar, except those that have to be pre cooled and these will be taken care of at Wynndel. Carloads will go out from the C.P.R. siding at Athara.

The closing feature of the meeting was the unamimous vote of $4000 with which to at once install an electric pre cooler in the warehouse at Creston, which is to be ready for use by June 1st.

President Giegerich of Kaslo golf club has just ruled "that to play golf properly golfers should not be restricted in their language.

Wheat Prices And Economic Experiment

International experts of the wheat advisory commission have been engaged, at Rome, in studying ways and means of raising wheat prices, and, according to press despatches of recent date, have reached decisions which will be submitted to the governments of the signatory countries for approval and, it is presumed, concerted action. Decisions, it is stated, must be ratified in time to permit their implementation by June 1.

Details of the plan which have emanated, so far, from the conference at Rome, are not complete enough to warrant analysis with a view to computing their effects. Apparently, however, it is proposed to employ a price-fixing system to regulate exports rather than the commoner process of regulating exports to control price fluctuations. Apparently, too, the intention is to base the minimum price of wheat on the relation between export supplies and the month to month demand, with the London quotas rigorously adhered to by the exporting countries.

Nothing has been said so far as to the price objective. Undoubtedly, however, unless it be the 63.02 gold cent price computed as the "average price of all parcels of imported wheat of all grades sold during each week in all the ports of Great Britain", the terms of the London agreement, as they apply to the exporting countries, will be rendered nugatory. This is the price which, according to the agreement, must be reached and maintained over a period of sixteen weeks, before scaling down of customs tariffs begins.

Western Canada awaits with interest and expectation complete details of the proposals drafted by the experts for submission to the signatory nations. Price, of course, is a matter of paramount importance to the farmers of the prairie provinces, and if, by agreement, the world price can be raised and stabilized, a long step will have been taken towards stabilizing the agricultural industry in Western Canada. It is impossible here to talk of lowering production costs while debt and other charges remain as a high and uncontrolllable overhead factor in them.

Of scarcely less significance to the prairie farmer is the matter of lower customs duties against Canadian wheat in the importing countries of Europe. If then, in addition to raising world prices, there is an adjustment downward of tariffs associated with wholehearted efforts by the importing countries to increase consumption of wheat and at the same time to reduce domestic production, western agriculture may assume with some hope of fulfillment and success, the task of orienting itself to the new economic objective. That is to say, if the spirit of the London agreement is observed to the letter of its various terms, there is no obvious reason why, once the carryovers are disposed of, Canada's export quota should not progressively increase pari passu with her ability to consume the products of industries indigenous to her best customers. Signs already are conspicuous that the ultimate determinant of positive or negative reaction to the terms of the London agreement by the importing countries will be the "balance of trade".

Throughout the world, a series of exceedingly interesting and vitally important economic experiments are underway, with the various nations engaged in concerted efforts to set their own productive processes in order. The United States is seeking prosperity and stability through the agency of the Roosevelt "New Deal". Mussolini has his corporative state with industry, organized on a national basis, acting as "economic advisor" of the government. Germany is essaying recovery through a process of state intervention, and Austria apparently is preparing to adopt the Italian model. Russia, of course, is seeking to gear the productive machine to the needs of her people, through socialization. In Britain, the means to recovery is styled "rationalization". All the experiments have one element in common—government intervention, government control and government regulation. The same trend is patent in Canada, for recent legislation has laid foundations for a wide range of machinery for control and regulation, which is to be erected and made operative as conditions determine.

MILBURN'S HEALTH AND NERVE PILLS

Smothering Sensations

Faint and Dizzy Spells

Those feelings of faintness; those dizzy spells; those all-gone smothering, sinking sensations which come over people, from time to time, are warnings that should not go unheeded. They indicate an extremely weakened condition of the nerves and other vital organs, and should be given immediate attention.

Those suffering in this way will find in Milburn's H. and N. Pills a remedy with which to recuperate their health, build up their run down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. & N. Pills.

Thousand Miles An Hour

Astonishing Things Predicted By Sir Charles Kingsford-Smith

Whirling through the stratosphere at well over a thousand miles an hour in the hermetically-sealed cabin of a giant air liner, guided entirely by wireless control stations on earth—can you imagine the possibility. Sir Charles Kingsford-Smith, hero of the recent record-smashing flight to Australia, believes this not only possible, but likely. In an astonishing vision of aerial development within the next fifty years he foresees air travel brought to such a pitch that ships and railways will become semi-obsolete, their sole use being as carriers of heavy freight.

"There will be no human pilot, but gyroscopic control," said Sir Charles. "The huge flying liners which will move through the stratosphere at a uniform speed of 1,200 miles an hour, carrying 100 passengers in their luxurious cabins, will be fitted with super-efficiency, super-charged engines and variable pitch propellers.

"Risk will be negligible. Each 'plane will have ten, twelve or fifteen engines, all in the event of one cutting off, the officer in charge will simply declutch that engine from the propeller while the mechanics repair it en route. Crude oil will probably be used as fuel."

Actually, to accomplish the amazing speed of which Sir Charles speaks we do not require more powerful engines than some already built. The atmospheric density 60,000 feet above the earth is about a quarter of what it is here, so that an engine, which under normal conditions to-day attains the high speed of 350 miles an hour, would hurtle through the rarefied atmosphere at 1,400 miles an hour.

Rich Collection For Museum

B.C. University Receives Rare Specimens From Dr. Fraser

The University of British Columbia will be enriched by a collection of hundreds of species of marine life, many hitherto unknown to science as a result of an 8,500-mile cruise through the south Pacific by a scientific party of which Dr. C. McLean Fraser, professor of zoology, was a member.

Dr. Fraser returned to Vancouver after an absence of three months. He declared that the expedition involved very little romance, but much hard work. He expects the discoveries made in the comparatively virgin scientific field off the coast of South America will have important bearings in the study of marine flora and fauna.

The specimens collected ranged from snakes and monkeys found on shore to sea serpents, brilliantly tinted "angel" fish and crustaceans. Dr. Fraser, being a world authority on a minute form of sea life known as hydroids, brought back a large number of formerly unknown types for the university museum.

PRICES RISE BUT TEA STILL MOST ECONOMICAL

Three years of disastrously low prices for tea finally goaded the growers into action and committees were formed a few months ago to control production. Prices have already advanced and as soon as merchants have exhausted their present stocks the housewife will have to pay slightly more for her favourite beverage. Finest teas such as "Salada" still produce about 5 cups for a cent.

A Double Nasturtium

New Flower Developed By Successor To Luther Burbank

A double nasturtium that "looks like an azalea and ranges in color from lemon yellow to scarlet," has been developed at Philadelphia.

It was created by David Burpee, who has continued the work of Luther Burbank in developing new varieties of plants.

The new flowers have attracted considerable attention at the recent local flower shows, where they have been called "the poor man's orchid."

First book printed in America was the "Escala Espiritual de San Juan Climaco"; no copies are known to be in existence.

Quick Relief Now From Neuralgia

Real ASPIRIN *Starts Taking Hold in Few Minutes*

Now comes *amazingly quick* relief from headaches, rheumatism, neuritis, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And thus is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate.

What it does in this glass it does in your stomach. Hence its fast action.

MADE IN CANADA

Does Not Harm the Heart

Heavy Tourist Trade

Estimated Americans Spend $77,250,000 In Canada In One Year

Travel between the United States and Canada is greater than over any other international boundary in the world, according to a return just issued by the Canadian government dealing with the tourist traffic of Canada. During 1933 the number of automobiles from the United States which entered Canada for touring purposes was 3,096,887. Of these, 2,233,418 were admitted for a period not exceeding 24 hours; 863,136 for a period not exceeding 60 days; and 333 for a period not exceeding six months. From information received from various sources including co-operation with United States officials it is estimated that the average expenditure per car in the 24-hour class was $7.68; in the 60-day class, $59.80; in the six-months class, $234,07. Total expenditures by visitors by automobile from the United States during the year are placed at $77,250,000 in Canada funds.

Historic Treasure Prized

Old Sword Once Flashed At Battle Of Waterloo

An historic sabre that once flashed in battle under the colors of King Louis XVI. of France is a relic highly treasured today by Auguste de la Tremaundan, who was established at Montmartre, Sask., 1893.

It is the sabre of Baron de la Villabeau, Tremaundan's grand-uncle, who was breveted lieutenant by Louis XVI. in 1785. The baron took part in all the campaigns of Louis XVI, including those of Napoleon on the march to and from Moscow, the battle of Waterloo and the defeat of Bonaparte. He died in 1836 and the sabre passed on to Tremaundan.

The 94-year-old pioneer of this little village migrated from France in 1873 and established his home at Chrysostom, Chautaguay county, Quebec. He moved west 20 years later.

Like Good Old Days

Useful Home Production Idea Revived By Alberta Settlers

The "good old days" have come back to the rural district of Erskine, Alberta, with a return to useful home production. The same engine that has chopped a generous supply of wood for the summer months also runs a chopper that grinds wheat into breakfast food. From hides men fashion everything from moccasins to coats.

Sugar beets provide syrup which, combined with yeast, gives the settler vinegar, and women, so prolific in the knitting of socks, sweaters and caps, have revived talk of the old spinning wheel.

Yacht Cup Race

Mrs. Sopwith Will Act As Timekeeper On The Endeavor

Mrs. T. D. Sopwith, who will act as timekeeper on her husband's challenging yacht, the Endeavor, when it attempts to wrest the America's cup from the United States this summer off Newport, R.I., is anticipating the thrill of her life.

In every race of the series she will stand close beside Mr. Sopwith at the wheel, a stop-watch grasped in either hand, advising him to the second the time the Endeavor has made on each leg of the run, the time of its opponent, how they stand. It's important.

"I wouldn't miss it for anything in the world," she told the Associated Press when interviewed at the Sopwith's handsome town residence in Park Lane. "I always act as timekeeper in our races, but this, of course, will be the biggest of all."

"You may be sure I won't wear trousers," she said. "Just a skirt and blouse and jacket. If there's a heavy sea I have a waterproof."

School Age At Eight

Children should not be permitted to go to school until they reached the age of eight, in the opinion of Dr. Laurence P. Folsom, president of the New England Council of Optometrists. "The eyes of the human being," he says, "do not reach the state of maturity until the child is eight years of age, and much of the unnecessary strain to which we subject the eyes of children in the classroom should be avoided to insure healthy eyes among the future generations."

JAPAN'S POLICY IN CHINA IS NOW CLARIFIED

Tokyo.—The question of Japan's policy toward China was "clarified" by foreign minister Koki Hirota during a friendly talk with Sir Francis Lindley, British ambassador to Japan.

In response to the British request for a clarification of the foreign office spokesman's statement regarding China, Hirota told Sir Francis that although the spokesman's declaration was not official it was nevertheless a clear enunciation of Japan's policy regarding China.

This policy, previously espoused by Hirota himself in a trenchant speech before the Imperial Diet, is not a move toward exclusion by Japan of other countries from China, Hirota asserted. The open door doctrine, guaranteed under the nine-power treaty of 1922, is not affected, even by implication, except in so far as traffic in potential military materials is concerned, the foreign minister said.

London. — The United Kingdom eagerly scanned reports from Tokyo that the British ambassador had been informed the "hands off China" declaration was a clear exposition of Tokyo government policy, although unofficial at the time it was issued.

Sir John Simon, foreign secretary, was unable to give the House of Commons any information when he was questioned on the situation described as an ominous one by leading newspapers, declaring it would probably be some days before he would be able to present a report on the conversation between the British and Japanese governments.

Alberta Liquor Permits

Reduction In Fees To Take Effect May 1st

Edmonton.—Reductions of liquor permit fees from $2 to 50 cents will take effect May 1, it was announced by R. J. Dinning, chairman of the Alberta Liquor Control Board. On the same date, sales of bottled beer, to be taken off hotel premises, will be permitted.

The main vendors' stores in Edmonton and Calgary will remain open each night until midnight, commencing May 1, Mr. Dinning also announced.

Those who have already purchased $2 permits will be given a refund upon making application, but there will be no such refunds after the end of the year. The new 50-cent permit will be good for all liquor purchases by its holder until the end of 1934.

Reductions in permits for druggists, physicians, veterinarians and dentists from $2 to $1 also are to take effect May 1. For hospitals, sanitoriums and similar private institutions the permits are to cost 50 cents, instead of $1, previouly.

U.S. Navy Plans

Plan To Construct 20 To 95 Ships To Bring Navy To Strength

Washington.—Within four months the United States government expects to start building 20 of the 95 ships needed to bring the United States navy up to treaty limits.

President Roosevelt let it be known that the $1,000,000,000 appropriation bill he will submit to congress shortly would provide money for initial construction in the treaty navy program.

That bill, said Chairman Carl Vinson of the house naval committee, will carry about $40,000,000 for the first year's work on six submarines of 1,300 tons, 12 destroyers of 1,500 tons and two destroyer leaders of 1,850 tons.

Tax Applies To Old Gold

Ottawa.—The finance department has officially announced that the new tax on gold will apply to sales of old gold to the mint. Persons possessing old gold in the form of jewelry or oddments will have to pay the tax on precisely the same terms as the producers of new gold.

Assistance For Airways

Appeal Is Made To Government For Some Aid

Ottawa.—An appeal was made to the government to give assistance in the way of contracts of some nature to the Canadian Airways, Limited. At a meeting with Hon. Hugh Guthrie, minister of justice; Hon. R. J. Manion, minister of railways; J. A. Richardson, president of the company; Sir Charles Gordon and E. W. Beatty, the situation was canvassed.

It was contended the company was doing a great work in the north in the development of mining and in making communication possible in the remote districts. The company had been hard hit by the loss of air mail contracts and it was suggested that some work be provided by the government.

The Canadian Pacific and the Canadian National Railways each put $250,000 into one airways company. For some time reports have been current that the air mails would be resumed. It is understood the government took the company's request into consideration.

Hopper War

Proper Temperature Only Needed To Develop Eggs

Saskatoon.—Farmers and grasshoppers are engaged in a race in which the grasshoppers have now advanced 220 degree-hours in the Saskatoon district, according to K. M. King, in charge of the federal entomological laboratory here. The farmers must get their protective measures completed before the hoppers advance 5,000 degree-hours, he explains.

It all depends on the warmth. Half an inch below the surface of the soil, millions upon millions of grasshopper eggs are waiting. If the soil temperature remains below 62 degrees they will remain undeveloped indefinitely.

But above 62 degrees the eggs begin to develop and one hour at 10 degrees above 62 degrees produces as much effect as 10 hours at one degree above that point.

Marooned Air Party Reaches Dawson Creek

Spent Winter In North After 'Plane Crashed Last August

Dawson Creek, B.C.—Marooned in the snowbound north all winter after their aeroplane crashed August 21 last in the remote upper halfway country near Cypress Creek, Captain C. A. Simmons, Mrs. Betty Rossbach and Pilot John Bonnell, all of Chicago, have reached Dawson Creek in their rebuilt machine.

The party was exploring the possibilities of landing places between Fort St. John and the "tropical valley" last August when the motor of the machine quit cold above Cypress Creek. It was completely wrecked in the crash but none of the party was injured.

Complaints Are Laid

Montreal. — Armed with recent amendments to the Women's Minimum Wage Act providing for heavier penalties including imprisonment for labor employers who allow sweatshop conditions in their factories, Gus Francq, chairman of the Women's Minimum Wage Commission, and Lucien Rodier, K.C., counsel, prepared complaints against seven dressmaking firms and Judge Maurice Tetreau signed the necessary summons.

Seeding Almost Finished

Lethbridge.—In the Lethbridge section of southern Alberta, 50 per cent. of the wheat seeding has been completed and 24 per cent. of the sugar beet crop is in the ground, with early sown beets showing in the rows. Seed is going into a splendid seed bed and rapid germination of all crops is expected.

Use Snow Plows For Dust

Red Oak, Ia.—Snow plows were busy in Montgomery county, following the recent dust storm that lashed the states of Nebraska and Iowa and left the roads in this county clogged with dust, in some places one to three feet deep. The snow plows were called out to clear the roads.

ANZACS PREMIER

Prime Minister Forbes of New Zealand, who has announced that a royal commission will be appointed to investigate the New Zealand dairy industry and that a probe will be launched in the United Kingdom into causes of a discrepancy between prices for New Zealand dairy produce and those of competing countries.

Revolution In Wireless

Marconi Using Shorter Wave Lengths Than Any Yet Known

London.—A revolution in wireless communication may result from new experiments now being carried out by Guglielmo Marconi using much shorter waves than any yet known, the Morning Post said.

Senator Marconi is engaged in the first regular communication tests over distances of hundreds of miles between stations near Genoa and Leghorn in Italy, using wave-lengths of 50 and 60 centimetres.

The newspaper interviewed the inventor and was told the experimenters were obtaining "very fair reception, although not as good as we want."

There was no apparent difference between day and night reception on the new wave lengths, Senator Marconi told the newspapers representatives, but there were other variations the cause of which they had not yet discovered.

Senator Marconi added the new waves greatly extended the range and would probably be applicable to television. He concluded they would have this advantage, "That there would be no interference of any kind."

Going To English Home

Calgary.—Alberta's rancher Earl of Egmont, who had heretofore refused to have anything to do with his peers in England, plans to leave soon for the home of his ancestors, it was learned here. The Earl was out of town but the secretary to the countess said plans would be completed soon, although no date of departure had been set.

Business Picks Up

Economic Position Still Continues To Be More Favorable

Toronto. — An economic position "more favorable than at any time since about mid-summer of 1931" was reported by the Financial Post in its quarterly survey of Canadian business. "In the first two months of 1934 alone," the paper says, "jobs were found for over 105,000 men and women. These figures crystallize just how far business recovery is making headway in this country."

The paper's index, based on 47 factors in business and industry, shows a gain of 31 per cent. in the past year.

With the two major exceptions of export wheat movement and new building permits, improvement was well distributed. In the case of building permits, the paper notes that while totals for the first quarter of 1934 were down, March permits were higher than those of March last year.

For the first quarter, the survey shows, railway traffic improved by about 24 per cent. over the same period last year. Last week's carloadings in the western division were the highest reached this year, because of gains in livestock, lumber, pulp and paper, ore and wheat loadings.

The basic iron and steel industry has found new business from automobile companies, mines and export sources in recent months, the survey finds. Automobile plants have been carried on by good export business and lately a "deluge" of domestic orders.

Freedom Of The Press

American Newspaper Publishers Urges Members To Be Vigilant

New York.—The American Newspaper Publishers Association unanimously adopted a resolution urging its members to be "increasingly vigilant" to protect the principles of the freedom of the press from impairment.

The resolution—watched closely in view of the fight waged by an A.N.P.A. committee for a free press clause in the daily newspaper code—avoided any criticism of the N.R.A. or United States government officials.

Will Net Large Sum

High Price Being Paid To Trappers For Muskrat Skins

Prince Albert, Sask.—First it was hogs, and now muskrats are contributing their bit to the return of better times here. Within three days approximately $25,000 has been paid out for skins and still they are coming in.

It is believed that at least 150,000 hides will be brought into the city within the next few weeks. These will net trappers approximately $112,500. Prices are double what they were last year.

BRITISH MINISTER OF AGRICULTURE WEDS

The Right Hon. Walter Elliot, British Minister of Agriculture, leaving St. Baldred's Episcopal Church, North Berwick, with his bride, the former Miss Katharine Tennant, half-sister of the Countess of Oxford and Asquith, after the marriage ceremony. Many members of Britain's nobility attended the wedding.

CONCESSIONS IN TARIFFS SOUGHT BY DELEGATES

Ottawa. — Delegations continue to haunt the offices of Hon. E. N. Rhodes, minister of finance, seeking concessions with respect to taxation and tariff announced in the budget. A large delegation of steel and coal men had a conference with the minister with respect to the reduced drawback on soft coal used for manufacturing coke, while another delegation of steel men objected to the widened empire preference on iron or steel plates.

The delegation representative of the Yukon Gold Company was introduced to the ministers by Hon. George Black, speaker of the House of Commons, who represents the Yukon. They added their objections to the protests against the 10 per cent. tax on gold.

Any changes the government decides to make with respect to budget resolution will be announced as customary, in the House of Commons. Mr. Rhodes promised the government's careful consideration of all representations.

New Party Alignments

Events Are Moving Behind The Political Scenes In Britain

London. — Behind the political scenes forces are moving to new alignments of parties preparing for battle.

Sir Thomas Inskip, attorney-general and true-blue Conservative, proposes creation of a new national party to fight Socialism.

Laborites meantime hail the recapture of the North Hammersmith seat as an emphatic condemnation of the National government and endorsement of the Labor party program.

Liberals meet at Bournemouth to consider policy and plans of campaign.

Sir Oswald Mosley's Fascists claim to be rapidly gaining ground, although not represented in the house.

May Hold Conference

Imperial Meeting In London Suggested For Next Year

London.—In a special despatch from its Canberra correspondent, the Times said the suggestion had arisen during the visit of Stanley Bruce, Australian minister to the United Kingdom, an imperial conference might be held next year in London to consider questions of defence and economic policy in the light of the Ottawa agreements.

The newspaper said feeling existed in Australia in view of an apparent standstill in disarmament negotiations the decline in empire defence had created a situation of grave importance.

Motion Was Defeated

Committee Rejects Move To Restrict Head Bankers' Pay

Ottawa.—The house banking and commerce committee defeated a motion by William Irvine, U.F.A. member for Wetaskiwin, which would restrict the salaries of high bank officials to the amount currently received as salary by the prime minister of Canada. The committee also defeated a motion by the same member which would authorize bank employees to organize for the purpose of negotiating with their employers with respect to salaries, hours of work and general working conditions.

Bombay Cotton Strike

Bombay.—The number of strikers in the cotton mill dispute had risen to 50,000 here and all of the city's 40 mills were either completely deserted or crippled. A detachment of British policemen was despatched to the scene of the trouble.

Declines Test For Age

Istanbul, Turkey. —Turkey's "Methusaleh," Zaro Agha, has declined to undergo a test to determine his age, fearing the experiment might detract from his fame as the world's oldest man.

A letter from Mother

An old lady in Stratford, Ontario, was writing a letter to her daughter in B.C.

"Oh, Mary," she wrote, "I'm so glad to learn that you're going to telephone me on Mother's Day. As I've said so many times, I can't tell you how much pleasure your telephoue call gave me last Mother's Day, and ever since you wrote that you we e planning to call again this year, I've been eagerly looking forward to hearing your voice. Now I'm counting the days."

Use the long-distance telephone to "go home" to Mother on Mother's Day, May 13.

Kootenay Telephone Co.
LIMITED

AT THE HOSPITAL

Mrs. T. LaBelle of Canyon was a patient for a few days.

Joe Alton of Erickson was discharged at the end of the week.

A. Wilkinson of Yahk relief camp, is a patient.

Mrs. Joe Howell of Wynndel was able to return home on Tuesday.

T. Lacey of Creston is improving.

Cecil Moore was able to leave the hospital on Friday.

Mrs. Jim Bateman of Canyon is undergoing treatment.

Mrs. B. Franklin and baby returned to Wynndel on Monday.

Local and Personal

Good selection of pot plants and cut flowers for Mother's Day at Cook's Greenhouse.

The weather of the past week has brought the only rain encountered during April. Showers that have prevailed since Saturday have brought about three-quarters of an inch of welcome moisture.

Sealed tenders will be received up to Saturday, May 5th, 1934, for the purchase of poultry house 14 x 24 feet and scratch shed 6 x 24 feet. Terms cash. For all other information apply Vic. Mawson, Creston.

H. Christensen was up from Lewiston, Idaho, last week, inspecting his acreage on the old Reclamation Farm. He anticipates that with such an early runoff of flood waters it will be possible to put in a crop this season.

The May meeting of Creston and District Women's Institute will be on Friday next, 11th, at 3 p.m., at the home of Mrs. T. M. Edmondson. There will will be a paper on Institute History, and some musical numbers.

H. Cartmel arrived from Kimberley on Saturday and replaces R. B. McKay as assistant provincial police at Creston. Mrs. Cartmel is expected this week, and they will occupy apartments in the Imperial groceteria block.

Mr. and Mrs. A. W. Dickinson are now occu ying the Mrs. M. Ross residence on Barton Avenue, Mrs. Dickinson arriving from Cranprook at the ffrst of the week. Mr. Dickinson recently purchased Creston Motors.

At the annual meeting of Creston Co-Operative Fruit Exchange on Thursday last the shareholders voted unanimously to at once proceed with the ins allation of an electrically operated cold storage plant, to be ready for the strawberry season

Rev. G. Kinney of Proctor will present the movie, "The Covered Wagon" and a comedy under United Church auspices at Canyon on Monday; Creston on Tuesday, and Wynndel on Wednesday. Silver collection will be taken to defray expenses.

Tonight's social attraction is the benefit bridge at the Parish Hall under the auspices of the basketball league, with cards to start at 8 o'clock, and an admission of 50 cents. The funds are required to enable the league to meet all the season's expenses.

FOR SALE—Cow, freshened De ember; heifer, will freshen November; horse, weighs about 1100 lbs., and harness; coal brooder, 900 chick size; table gramaphone and records; 20 one-year old Rhode Island Red hens. Mrs. Louise Hormann, Camp Lister.

Mrs. M Young has just disposed of her residential property on upper Hillside Road to H. A. Powell, who gets possession at the end of the month In addition to the house there is an acre of ground well developed, making the place one of the most desirable in the village. Mrs. Young will probably return to England to reside.

Announcement is made that commencing May 1st all federal fruit inspectors have been withdrawn from Canadian custome ports. For the past two years no such official was located at Rykerts and it was impossible to bring in fresh fruits, even in the smallest quantities. From now on the former order of things will prevail and fresh fruits and vegetables may be brought in, subject to customs charges, of course.

W. S. McAlpine, who is in charge of the Farmers' Institute hatc ery, is claiming a world's record for bringing out chicks. Early this week he discovered a few dozen healthy looking chicks on a tray i one of the incubators that had only been warmed up for 14 days. These were customs eggs and it is presumed the owner had had the eggs under a clucker for about a week before bringing them to the Institute hatchery.

Announcing the NEW 1934 CHEVROLET TRUCKS

IN 1933, Chevrolet sold more trucks than any other manufacturer. We predict even greater success for these new, 1934 Chevrolet Trucks, on display today in our showrooms! And here's why: Chevrolet offers you five new, improved truck chassis . . . with bigger, smarter, sturdier Chevrolet-built bodies. These new trucks are powered by an advanced new design of Chevrolet's famous truck engine . . . giving more torque, more power, more speed, with even greater economy. Frames and axles—transmissions, clutches and brakes—are truck-built and greatly improved. And the Chevrolet cabs are roomier and more convenient. See these new, 1934 Chevrolet Trucks—learn the typically low Chevrolet prices—today! You will agree that here is something new in the truck field . . . a bigger, sturdier low-priced truck—handsome, fast—and a record-breaker for economy!

Confirmation at Holy Cross

Holy Cross Church, Creston, was very largely attended Sunday evening on the occasion of a visit from Archbishop Duke of Vancouver, whose diocese includes practically all of the B.C. mainland, who administered the sacrament of confirmation to a class of 34 candidates prepared and presented by Father L. Choinel, missionary priest in charge of the local parish.

The day was a very busy one for the visiting prelate, who officiated at similiar services at Cranbrook in the morning, Yahk in the early afternoon and later in the afternoon held a private service of the same nature at the indian mission.

After conferring the sacred rite his grace gave a timely talk to those confirmed, explaining the meaning of confimation and the responsibility carried with it to those receiving the sacrament, and this feature of his address terminated with him having the entire class take the pledge to abstain from spirituous liquors until they reached the age of 21 years.

The archbishop spoke briefly in apt fashion to the those previously confirmed, recalling the vows they had taken and urging them to keenly live up to their responsibilities both as membtrs of the church as well as setting a good example to those who had just been received into church membership.

The class of 34 were drawn from Canyon, Creston and Sirdar largely and the presentation of such a large numbe speaks eloquently of the effective work that is being done by Father Choinel, whose parish extends from Canal Flats to Kootenay Landing.

. . .AS ONLY THE NEW FORD V-8 CAN

The new Ford is more powerful, more efficient and even more economical than the 1933 Ford V-8. The new dual carburetion system is largely responsible for this and for the fact that it is easier to start in cold weather. Even in the coldest weather the V-8 warms up quickly and maintains an efficient operating temperature because of new thermostats in the water lines and thermostatic intake manifold heat control.

WORLD HAPPENINGS BRIEFLY TOLD

The new Italian 7,000-ton cruiser Emanuele Filiberto was launched recently.

Six Scotch lassies destined to become Canadian brides disembarked from the liner Duchess of York at Halifax recently.

Mrs. John Cherry, aunt of Arthur W. Cutten, Chicago wheat king, is dead at her home at Galt, Ont. Frank L. Cutten, Medicine Hat, Alta., is a brother.

German unemployment decreased last month by 719,588 persons, according to insurance companies, and 574,000, according to employment bureaux.

The Northwest Mounted Police force was established in 1873; it became the Royal Northwest Mounted Police in 1905 and has since been renamed the Royal Canadian Mounted Police.

Jews in various parts of London have appealed to the police for protection against persons who have been covering their houses and shopfronts with anti-Semitic labels.

Germany is placing extensive orders for aeroplane motors in England, the Daily Mail reported. Bids were called for and one manufacturer alone received an order for 180 motors.

One of the largest sums ever received as "conscience money" came to Hon. R. C. Matthews, minister of national revenue, in the form of a bank draft for $5,400. The letter containing the draft was postmarked Montreal.

Firing of the royal salute by cannon on land and answering barks from the guns of the warship Rochester, marked celebration April 24 of the centenary of St. Helena, the lonely little isle in the South Atlantic, as a crown colony. Napoleon died there in exile in 1821.

Precious Glass Of Water

University Of Michigan Values It At Ten Thousand Dollars

The most precious glassful of water in the world—$10,000 worth—is under lock and key in the University of Michigan laboratories, guarded as jealousy as radium.

It is "heavy water" in its pure state deuterium oxide, discovered only two years ago and valuable in the treatment of cancer. Profs. J. C. Halford, Leigh C. Anderson and John R. Bates have worked out a plan to increase the university's valuable supply to two quarts within two years.

A report on the process was given at the meeting of the American Chemical Society in St. Petersburg, Fla. Prof. Halford hopes that the water may some day prove valuable in curing the ailments of old age.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile —No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c. at all druggists. 54

Some Idiotic Contests

Craze For Needle Threading Is Most Foolish One Yet

We are told by the ladies who write pieces for the paper that the needle-threading craze has reached Vancouver.

This entertaining form of folly consists of an open competition in which the contestants vie with each other in seeing which one can jam the most threads through the eye of a needle.

We have had successively dance marathons, rocking chair marathons, hog-calling contests, rolling pin heaving matches, flagpole sitting, piano-playing marathons and even liars' contests.

But we respectfully submit that this frenzy for threading needles is the most asinine one of the lot.

Idiotic contests seem to be in our blood. We just can't shake them off.

So let's establish another one.

Instead of competing with each other to see who can dance longest or call a hog the loudest, why not compete to see who can devise the nuttiest kind of a contest to keep the other nuts busy?—Vancouver Sun.

SPRINGTIME PRINT — AND A PRECIOUS MODEL THAT ADAPTS ITSELF SO PERFECTLY FOR ALL-DAY WEAR

It is another little dress that you can slip into in the morning and wear right through an entire day.

You will see here are very modish sleeves cuffed in a most attractive manner. The neck is becomingly draped. And the skirt paneled at the front to give you a tall gracious appearance.

Later for frankly hot summer wear, you can make it with short sleeves as in wee sketch. There are numberless fresh washing silks for your choice, handkerchief linen prints and lovely cotton prints.

Style No. 696 is designed in sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3½ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

HOW TO FIND OUT IF YOU HAVE ACID STOMACH

HERE ARE THE SIGNS:

Nervousness, Neuralgia, Indigestion, Loss of Appetite, Nausea, Frequent Headaches, Feeling of Weakness, Sleeplessness, Mouth Acidity, Sour Stomach, Auto-intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoonfuls of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed.

OR—Take the new Phillips' Milk of Magnesia Tablets — *one tablet* for each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts *at once* to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine *Phillips'* Milk of Magnesia, or *Phillips'* Milk of Magnesia Tablets when you buy—25c and 50c sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

Little Journeys In Science

OXYGEN

(By Gordon H. Guest, M.A.)

It has been known for centuries that the air contains at least two components—an active and an inactive one. More than a thousand years ago the Chinese called the active part yin (oxygen). They discovered that this active gas combined with sulphur, with charcoal, and with some of the metals. The inactive part is nitrogen.

Experiments show that approximately one-fifth of the air is made up of this active gas known as oxygen. This element not only occurs in the air but is found most abundantly combined with other substances. It comprises nearly 50% of the earth's crust, about 89% of water, 65% of the human body, and a very large part of such substances as saltpetre, limestone, brick and mortar.

Oxygen is a gas without color, taste or odor. It is a little heavier than air and would be unsuitable for filling zeppelins. It is very slightly soluble in water, 100 cubic feet of water dissolving only about 4 cubic feet of the gas under ordinary conditions. There is, however, enough of the gas dissolved in water to supply the needs of fish, which are cold-blooded.

This gas does not burn itself, but it supports burning or combustion. It combines with a large number of other elements. This tendency is not very great at ordinary temperatures, but at higher temperatures oxygen reacts very vigorously, usually giving off heat and light. The substances produced when elements combine with oxygen are known as oxides, and the process is called oxidation. Many oxides occur in nature as valuable minerals and ores.

Oxygen is not only the most abundant element but the most useful, because life, heat, and light are largely dependent upon it. Considerable quantities of oxygen are used for cutting and welding metals by the oxy-acetylene blow torch. Oxygen in tanks is used to restore the supply in the air of submarine boats. It has been found that aviators who ascend to high altitudes, where the air is rarefied, get only half the usual amount of oxygen and so become "dopey". An equipment has been designed to supply the oxygen from a tank through a connecting tube to a face mask covering the mouth and nose.

Physicians sometimes use oxygen tanks for patients who are suffering from pneumonia or suffocation.

Good Advice For Parents

Dr. Norman O. Hutton, a pastor in Wellesley, Mass., said a wise thing when he declared: "You cannot guarantee the security of your children with wealth. Leave them moderately poor if you would do well by them. Bring them up to appreciate the finer things of life and let them live simply. These are the best guarantees you can leave them." And the beauty of the whole thing is that the average parent can live up fully to this ideal.

SUNDAY SCHOOL LESSON

MAY 6

JESUS ACCLAIMED AS KING

Golden Text: "Wherefore also God highly exalted him, and gave unto him the name which is above every name." Philippians 2:9.

Lesson: Matthew 21:1-46.

Devotional Reading: Hebrews 1: 8-12.

Explanations And Comments

Preparations for the Triumphal Entry, verses 1-6. When near Bethphage, not far from Jerusalem, Jesus sent two of his disciples on ahead to find in the village an ass tied, and a colt with her, which they were to loose and bring to him. If the owner objected, they had only to say "The Lord hath need of them," and he would allow the animals to be taken. Matthew added that this was done in fulfilment of the prophet Zechariah's words (12:14-16).

"As plainly as the crowning of a new monarch and the flourish of trumpets and the kissing of his hand by the great officers of state proclaim him king, so unmistakably does our Lord by riding into Jerusalem on an ass and by accepting the hosannas of the people proclaim himself the King promised to men through the Jews, as the King of peace who was to win men to his rule by love and sway them by a Divine Spirit." (Marcus Dods).

The man who owned the colt and let the disciples take it for Jesus' use, was a better follower of the Christ than many of those who acclaimed him at his triumphal entry of Jerusalem. Deeds often show the state of the heart better than words. Loyal service is better than hosannas.

The Triumphal Entry, verses 7-11. The disciples followed instructions and brought the ass. They put their loose outer robes upon it for Jesus to sit upon, and the multitude with them spread their garments in the way or cut branches from the trees and spread them down for Jesus to travel over. "Some have ridiculed the idea of spreading them down for Jesus to travel over. "Some have ridiculed the idea of spreading branches on the road as offering incredible obstructions and dangers; and yet the orthodox custom in Russia, in a funeral procession, is to spread the route with branches of fir." (W. A. Grist). Because of John 12:13, it has been generally supposed that the branches were palm branches, although John only mentions the fact that the people came out from Jerusalem to meet Jesus bearing branches of palm. We know from Revelation 7:9 that palms were carried as symbols of victory and rejoicing.

John tells us that many people, excited by the news of the raising of Lazarus (which he records), hurried from Jerusalem to meet and do honor to Jesus, while following with Jesus was this other multitude of Galileans on their way to Jerusalem to keep the Passover. Both crowds united in crying, "Hosanna to the Son of David!"

Recipes For This Week

(By Betty Barclay)

CARAMEL BON BONS

½ can sweetened condensed milk which has been caramelized
3 cups confectioner's (very fine ground) sugar
1 teaspoon vanilla
1 cup toasted cocoanut or chopped nut meats

To caramelize, place a can of sweetened condensed milk in a kettle of boiling water and keep at boiling point for three hours. Be sure the can is kept covered with water. You can prepare several cans at a time and open them from week to week as desired. Open up the can of caramelized sweetened condensed milk and blend the contents with sifted confectioners' sugar. Add vanilla. Drop by teaspoonfuls onto toasted cocoanut or chopped nut meats. Form into patties or balls. Chill in the refrigerator.

POTATOES, PEAS AND CARROTS

To two cups of mashed potato add one-quarter cup heavy cream, 1 teaspoon onion juice, 1 beaten egg yolk, 1 teaspoon sugar, salt and pepper to taste. Beat until light. Form a ring of this on a shallow buttered baking dish. Fill centre with cooked peas and carrots seasoned with sugar, salt and pepper. Dot potatoes with butter. Bake just long enough to heat thoroughly and lightly brown potato.

The "husks" eaten by the prodigal son in the Bible parable are identified in a Mediterranean legume with St. John's bread, says Llewelyn Williams, botanist.

Ogdens!

"Roll your Owners" from coast to coast will tell you that Ogden's Fine Cut is the star turn on the smoke enjoyment program.

Ogden's Fine Cut gives them what they want, tunes them in on finer flavour, finer fragrance, cooler smoking and easier rolling.

"C.B.C." (Canada's Better Cigarette) Tobacco — that's Ogden's Fine Cut. Try it — with "Chantecler" or "Vogue" papers. You'll never find a more satisfying combination for "rolling your own."

OGDEN'S FINE CUT

P.S.—At any Poker Hand Premium Store or by mail—you can get 5 large booklets of "Chantecler" or "Vogue" cigarette papers in exchange for one complete set of Poker Hands.

Banns Instead Of License

"Depression Practice" Cost Alberta $9,000 Last Year

Hamilton (Ont.) is not alone in its loss from marriage license revenue. The same condition exists in Alberta, and it cost the province $9,000 in 1933 because young couples had their marriage banns announced in church rather than pay the $6 license fee.

"All denominations are doing it now," said Donald Mackie, provincial statistics registrar. Hamilton city reported revenue loss of $1,000 because of the "depression practice."

DENICOTEA Cigarette Holder absorbs the nicotine, pyradine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refills — $1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Weeks, an advertising agency, where Camilla has submitted some of her work, send for her and offer her a salary of $50.00 a week to start and a prospect of having it doubled. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household. Avis Werth rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of $1,000.

(Now Go On With The Story)

CHAPTER XLI.

Camilla told Rose then of the disagreement between Peter and herself. She found some relief from her confidence in a sympathetic listener.

Rose nodded soberly. "I expected it. You might have known it would not work out."

"But, Rose, if this way doesn't, what would? It seemed to be the best plan in every way."

"The best plan would have been to wait until Peter was established before you married," emphatically.

"But that might be for years. And we love each other so!"

"Sure, that's just the trouble, no matter what class the man is in or whether it's a case of love or duty. The next best thing in your case would have been for you to let Peter take care of you and make the best of everything he could give you and anything he could do for you, even if you had to live on practically nothing but love."

"Oh, but that would have ruined Peter's career!"

"And what is your occasional wife plan doing for it?"

Camilla sighed and gestured helplessly. "I don't know. That's just it. Nothing is right."

Rose offered cheerfully, Oh, he will get over it and everything will be okay again until the next round. All husbands and wives have to quarrel about something once in awhile."

"Not the pure gold ones you were talking about. Rose, you didn't tell me what class Peter is in."

"You should know. Class three, of course. Peter is no man of habit—he's too clever. And if you ask me, I'd rather have a man who steps aside once in awhile because he has some brains and originality, than a man who is loyal because his wife is just like eating and sleeping, to him."

"You mean you wouldn't mind if he were untrue?"

"Oh, sure, I'd mind it. But what could I do about it? And who has everything just the way she wants it? I'm just saying that half a loaf is better than none and that if your man is in that first or second class, you have none. None of that romance and sentiment that women crave. That's why most of them have to get a substitute, like listening to radio crooners."

"But what shall I do about Peter?"

"Nothing. Just go to see him as usual and act as if nothing had happened. Men don't weigh and remember every word that's said like a woman does. They get over a quarrel as easily as they get into it. But don't mention money to him again. Let him sell apples for a living, if he wants to be so stubborn and independent." She laughed. "In a way, I admire him. I'm sorry for him, too. Peter's a grand guy, but he needs a lift somewhere. If he don't take it from you, maybe he will from someone else."

"Who?" Camilla inquired anxiously.

"Oh, someone will recognize his talent, perhaps, and get around his pride complex. I hope so, for his own sake, and yours."

The shrilling of the doorbell startled both of them. They looked at each other inquiringly, for they seldom had visitors.

"It's probably Peter," Rose observed. "If it is, I'll get out, so you two can talk."

"Please don't I don't think it could be Peter, though." Already, her heart was racing at the thought.

"Well, you won't know until you open the door." She smiled to herself at Camilla, who sat as if glued to her chair and yet looking as if she wanted to fly to the door. "Just a second until I get this sewing out of sight."

Camilla patted her hair and powdered her nose hurriedly before she called into the speaking tube, "Hello."

"Camilla?" inquired a voice that caused an exquisite delight to vibrate through her whole being. "It's Peter."

As if she didn't know! Already, she had pressed the electric button to release the downstairs lock, and was outside in the hall waiting when he reached the top of the stairs. His long legs always scorned less than two or three steps at a time.

He took both her outstretched hands and kissed her eagerly, drawing her into the room. "Darling!"

"Peter, I'm so glad to see you!" she whispered.

He tossed his hat onto a table and looked around. "Hello, Rose. Am I intruding?"

"Not at all. I'm tickled to death you came. I wanted to go out home and see Ma tonight, but Camilla did not feel like going and I didn't want to leave her alone. Now I can run along."

"Why, you never said—" Camilla began.

"Of course not. I knew you would insist on staying alone. I'd rather not come back tonight, either. Can't you stay, Peter?"

"Why—if Camilla wants me."

"Well you two can settle that. I think I know what the answer will be," she said roguishly. "I won't be back, anyway. I'll take my slip out and sew the lace on the machine. That will be much better and save me a lot of time." She was collecting her things as she talked. She stood before the mirror and adjusted a red beret over her soft black hair, buttoned the collar of a tweed coat under her chin. "Chilly out, isn't it?" she asked Peter.

"Rather," he replied. "You don't mind going out alone?"

"I should say not! It's early yet. Well, goodbye, you two, See that you treat our guest right," she admonished Camilla with a sly wink.

"Nice kid," said Peter, when she had gone. "Too bad she hadn't a chance like you."

"I don't know. In many ways, Rose is wiser than I. I envy her sometimes."

"Camilla, I came to apologize for the other day. I'm terribly sorry," he confessed.

"So am I, Peter. But that's all over. Let's forget it ever happened." She was in his arms, with her arms around his neck, close.

"My precious! I wish it hadn't happened. But we'll start all over again, just as if it hadn't. Except please, dear, don't say any more about—that." Which is the way men apologize and repent, with no retractions or concessions. They may regret what has happened, but somehow the woman is still wrong in their opinion.

But like all women in love, it was enough for Camilla that he once more held her close instead of drawing away from her, that his eyes looked deep into hers with confidence.

"It was I who had the blackie-blues that time. I haven't felt so low as long as I can remember. But everything is going to work out all right, somehow." His optimism was a happy surprise to Camilla. Heretofore, it had been she who encouraged him. This mood must be the rebound from the depths of his recent despair. It was so delicious to relax in his arms and in the buoyancy of his mood.

"You just forgot that the kind of thing you are doing can't be accomplished in a minute. And the best things in life always take time to accomplish."

"I don't mind waiting for a reasonable time, but I get panicky sometimes when I think about some of the old boys of the past who had to die before the world would recognize them. I may not be a genius in their class, but look at the fellows like Farquhar. He died penniless and writing a play that has survived for two centuries."

"Tell me about him. I dont' know the story," Camilla prompted.

"His story fits plenty of others like him. But he wrote his masterpiece on his deathbed, when he knew he was doomed to die, and in extreme poverty. The play was a tremendous success from the first, but he lived for only a month after the premiere. Imagine the irony of that—audiences roaring at the humor of his play while he suffered the last agonies of a slow death. And the play is still a success—just revived in London last season and made such a big hit that they're bringing it to America. Such is fame!"

"But, darling, genius gets a better break these days than it did two centuries ago."

He nodded. "That's what makes the struggle worth while; that, and hoping that even if I'm not recognized while I'm living, I might produce something that would add to the beauty of the future. Sculpture is more enduring, at least, than a book or a picture that can be hidden away or lost."

Had Camilla known what power sustained his hope and confidence, she might have been less happy in sharing it. But she supposed that Peter' naturally buoyant nature had righted itself in his contrition over their quarrel, and that he had worked out his problem to satisfy his own peculiar pride. She did not know that he had dined that evening with Avis, and had brought away with him some of her faith in himself and her own ultimate victory.

She was to discover in the days which followed, that if you once put love away for even a little while, and then take it out again—it is never the same. It is like a flower that is so fragrant and beautiful that you want to keep it forever and put it away between the pages of a book to treasure with memories; but when you take it out again, it is not at all the same gorgeous thing that you once had in your hands.

(To Be Continued)

"Blue" Spells

Reduce some women to the petulant shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies quivering nerves . . . helps to tone up the general health...gives them more pep . . . more charm.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

W. N. U. 2044

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

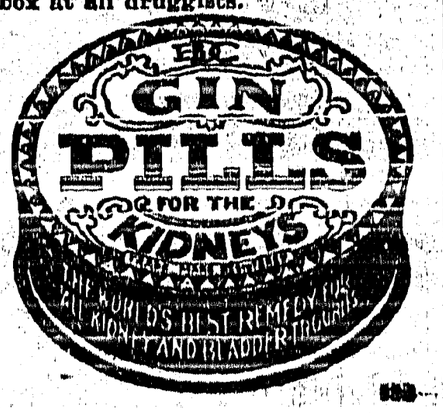
Everyone who is subject to any form of indigestion should know of this woman's experiences. Advice from one who has had such severe attacks is advice worth having. She writes:

"I suffered from indigestion, gastritis and constipation, and was so very ill, I had (on medical advice) to live on soda biscuits and milk for three months. Well, a friend advised me to take Kruschen, and now I am pleased to say my troubles are ended. I can eat and enjoy a good meal without any painful after-effects, my skin is clearer—in fact, quite clear—and there is no sign of constipation. I would advise anyone suffering the same to take Kruschen."—(Mrs.) M. R. L.

The immediate effect of the six salts in Kruschen is to promote a natural flow of the digestive and other vital juices of the body. Soon after you start on Kruschen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little daily dose," you will see that the relief which Kruschen brings is lasting relief.

Rheumatism

is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action—50c a box at all druggists.



Little Helps For This Week

"I was afraid and went and hid thy talent in the earth, lo, there thou hast that is thine." Matthew 25:25.

Time was I shrank from what was right,
From fear of what was wrong;
I would not brave the sacred fight,
Because the foe was strong.

But now I cast that finer sense
And sorer shame aside;
Such dread of sin was indolence,
Such aim at heaven was pride.
—J. H. Newman.

If the really devout man falls into some error he does not fret over it, but rising up with a humble spirit he goes anew on his way rejoicing. Were he to fall a hundred times in the day he would not despair, he would rather cry out lovingly to God appealing to His tender mercy and pity. The really devout man has a horror of evil, but he has still greater love for that which is good, he is more set on doing right than avoiding wrong. Generous, large-hearted, he is not afraid of danger in serving God, and would rather run the risk of doing His will imperfectly than not strive to serve Him lest he fail in the attempt.—Jean Nicolas Grou.

New Russian Loan

Big Domestic Loan Running Ten Years Announced By Soviet Government

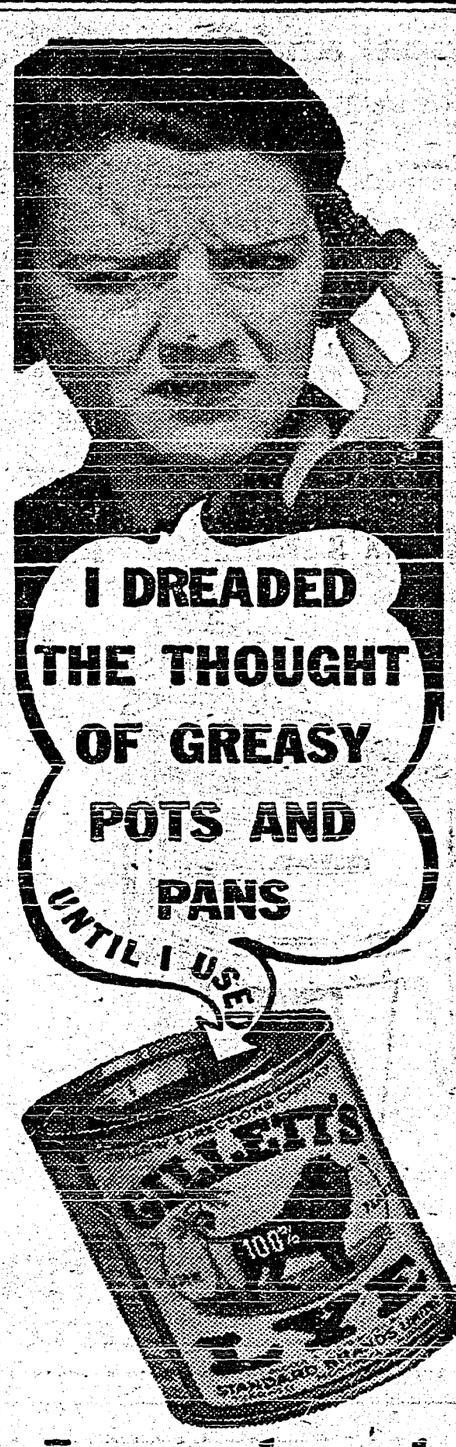
The issuance of a new domestic loan, aggregating 3,500,000,000 rubles and running 10 years, had been announced by the Soviet government.

It will be known as "the loan of the second year of the second five-year plan" and carries the optional choice of either a lottery or interest bearing bonds, which will pay 10 per cent. annually.

A panhandler approached a business man. "Let me have a dollar for a bite to eat, will you?" he asked.

"A dollar!" gasped the man. "For a bite to eat."

"Just say 'yes' or 'no'" replied the tramp. "Don't tell me how to run my business."



It cuts through grease—makes messy kitchen jobs easy!

DON'T be a slave to kitchen chores. Just use a solution of one teaspoonful of Gillett's Pure Flake Lye dissolved in a quart of cold* water. It puts an end to stubborn stains. Lifts grease and grime off like magic!

Gillett's Lye is indispensable for all your heavy cleaning . . . for stopped up drains . . . for toilet bowls. Order a tin from your grocer today. Say good-bye to hard rubbing and scrubbing!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Be sure to get the new revised Gillett's Lye Booklet . . . it tells how this powerful cleanser and disinfectant will lighten dozens of household tasks. Contains full information for soap making, thorough cleansing and other uses on the farm. Write for free copy to Standard Brands Limited, Fraser Ave. & Liberty St., Toronto, Ont.

GILLETT'S LYE EATS DIRT

Wins Unique Contest

Pipe smokers bestowed their praise on G. F. Jones, winner of a most unique contest at Calgary. By keeping his lowly corncob alight for one hour and 32 minutes he defeated 185 contestants in a race for a title of sorts. Only one match was used.

BRIGHTEN UP BY USING

Sherwin Williams Products

Their Paints have greater covering qualities, combined with lasting colors. These goods contain a greater per cent, of White Lead and Linseed Oil than the lower priced paints, and are consequently cheaper.

FAMILY PAINTS for outside and inside use. Sizes: Gallons, Half-Gallons, Quarts, Pints, Half-Pints.

SHER-WIL-LAC Stains and Varnishes: Dark Oak, Light Oak, Walnut and Mahogany.

ENAMELS: White, Ivory and colors. Pints, Half-Pints and Quarters.

VARNISHES include Rexspar, Marnot and Excello.

Fast dry Varnishes and Enamels.

Shellac,—Orange and White.

Aluminum and Gold Paints.

Linseed Oil, Turps and Dry Colors.

ALABASTINE—White and ten colors.
