THE CRESTON REVIEW

VOL. XXV — CRESTON, B. C., FRIDAY, JUNE 15, 1934 — No. 12

Highway Matters Before Council

Betterments on Canyon Street Discussed but No Action is Taken—Curfew Still Alive—Propose Increase Licenses.

There was considerable variety to the business transacted at the June meeting of the village council on Monday evening, at which Reeve F. H. Jackson presided, and Councillors C. Murrell and A. Comfort in attendance. Highway matters, proposed changes in charges under the Trade License By-Law, swimming pool, curfew, practice nights at Exhibition Park, and bus parking were all to the fore.

The longest discussion of the session was over hard surfacing of Canyon street. Councillor Murrell introduced the matter, stating that the government was anxious to get on with the work but would not do anything until a new water main was laid along the the street from the Hi-Way garage to Creston Mercantile Company store. If the village would compensate the company in the sum of $150 for the removal of its pipe and putting in of a six inch main the way was clear for getting on with this work immediately, a d Councillors Comfort and Murrell favored making the compensation payment in order to get on with this much needed improv.ment. Reeve Jackson stoutly opposed such a payment, and it was finally agreed to let the matter stand over to Wednesday morning when the council will meet in committee to consider the whole water and highway situation.

Frank Romano wrote stating he would donate a ten foot sirip along 379 feet of frontage on Canyon street, east of the Sinclair hardware store provided the town would remit the 1934 taxes of about $60, widen the street and lay sidewalk within 60 days. The matter was favorably considered but no action taken.

It was decided to buy the 25-foot lot from the Lutheran Church on Creston Avenue, opposite the hospital, and the surveyor will be put to work at once. K. Paulson will be seen with a view to purchasing an additional 25-feet to imprave the highway situation in that locality.

The department at Victoria will be asked to put through an order in council amending the Highway Act as it applies to Creston village so that stop signs may be placed at Barton and Victoria Avenues, along with "No U turn" signs at the same locati ns, as well as signs notifying that the speed limit is 20 miles an hour. Some suggested parking regulations will be sent the managers of the bus lines operating into Croeston for their consideration and adoption, with a view to doing away with conjested traffic on Canyon street when the busses are in.

Counciliors Murrell and Comfort, who early in the year were named a committee to revise the Trade License By-Law, submitted a report and on notice of motion will be considered at the July meeting. Amongst those affected by the suggested changes are milk dealers, blacksmiths, oil companies, express companies drug stores, lawyers, banks and department stores. The amendments recommended follow:

Sec. (e), with an additional payment of $5 for each line of goods carried, each six months.

Sec. (n), each bank $100 for each six months.

Sec. (x), each solicitor $15 for each six months.

And that the following be specified and included in the by-law:

Each oil company doing a wholesale or retail business, $15 each six months.

Each drug store $25 for each six months.

C.P.R. Express Co., $25.00 for each six months

Each blacksmith shop $5.00 for each six months.

Anyone selling milk, 1 to 3 cows, $5.00; more than 3 cows $10 each six months.

There was another letter from the Women's Institute urging action in connection with the Curfew by-law, with the matter shelved for an ther month. In the meantime the clerk will write the B.C. Municipalities Association of which the village is a member asking that the association solicitor give a ruling as to Crestoh having or not having power to pass such a aw. If the village is powerless Councillor Murrell intimated that at the 1935 session of the legislature an amendment to the Village Act would be asked for to clear the matter up.

In connection with Exhibition Park nights for softball practices were allocated as follows: Wildcats, Monday; Knights of Pythias, Tuesday; United Young People, Wednesday. These are to use what is known as the small diamond. Representatives of the Athletics and Intermediate baseball clubs will confer with the council as to the use of the diamond for Sunday games.

A. H. Green & Company, Nelson, notified that they would be here to make the sewer survey some time during the week, and would lose no time in submitting a report. J. P. Coates, former electrical inspector, promised to complete some deferred inspections at once. He has been on the sick list of late, hence the delay.

Accounts passed for payment totalled $672 of which $290 was spent on the pipe line for the new water supply to the swimming pool, and a new pipe line to take care of draining the water off. Mr. Baldwin, who did the work, is to be interviewed by the reeve in connection with labor charges, as it was understood t e price of the pipe was 13½ cents per foot installed. In connection with water supply the village will make formal application to the irrigation district for the use of the water, and will confer with Messrs. Martin and Pridham, who are the two landowners directly affected, as to the night or nights, each week, they prefer to have the water taken for filling purposes.

Kitchener

Mrs. H. H. Redmile, who has been on an extended visit at Cranbrook, returned home on Monday.

Kitchener baseball nine played Alice Siding at that point on Sunday afternoon, and won by the score of 5-0.

The dance in Hunt's hall on Friday night was largely attended, guests being presens from Moyie, Yahk and Creston

B. J. O'Grady, the Kootenay district mining engineer, of Nelson, was here during the week, and took look over the operations at the Sullivan mine.

H. H. Redmile has purchased N. K Devlin's general store, and took possession on Monday, and is ready to serve the public with all lines usually carried in a general store.

Wildcats softbal' team from Creston played the Pine Katz on Kitchener diamond, Friday evening, the Pine Katz winning 26 25 The Kitchener battery was Misses Jessie White and Hazel McGonegal. Creston—Wightman and Levirs.

Kitchener school had an attendance of 19 pupils during May, according to the report issued by the principal, Miss Jessie White, with the following taking the high standings: Grade 7—Frank Huson 76, Kate Thompson 70, Helen Oja 68, Leonard Bohan 68, Robert Johnson 56, Alta Blair 45. Grade 5—James Huson 68, Alice Bohan 64, Jean Blair 60 Grade 3 Jim Thompson 73, Mary Bohan 69. Grade 2—Ralph Abar 76, Marjorie Blair 71, Maxine Nowlin 65, Jack Huson 63. Harold Nelson 61, Alton Nowlin 49, Robert Thompson 46, Jim Bohan 33.

Erickson

W R. Long was business visitor at Nelson a couple of days at the end of the week.

Lawrence Leadbetter has beeu named junior fire warden for Erickson school district for 1934.

Rev. M.T.C.Percival was here on Sunday afternoon for Anglican Chuch service at the schoolhouse.

The painters are busy on the R. M. Telford residence, which looks handsome in its new dress of paint.

Strawberries are moving in laage quantities now. Arrow Creek commenced shipping at the middle of the week.

Mr and Mrs. T. W. Bu dy returned on Friday from their three weeks' vacation, which took them as far west as Nanaimo.

W. V. Jackson resumed work as fruit inspector at the first of the week, and is busy on strawberries at Wynndel, Creston and Erickson.

Jim Handley has joined the sales staff of the C.V. Co-Op store at Creston. He is substituting for Mrs. Langston, who is taking holidays this month.

Christ Chuch Ladies' Guild are having the annual lawn social at the grounds of W H. Kemp on Wednesday, June 20th, at 2.30 to 5 30 p'm. Ice cream, afternoon tea, etc. Everybody invited.

A tea towel shower featured the June meeting of rickson Ladies' Hospital Auxilary, Wednesday afternoon last, at the home of Mr . E. Botterill. It was decided to cancel regular meetings for July and August.

Mr. and Mrs. Burrows of Winnipeg, Man., arrived this week on a visit with their son-in-law and daughter, Mr. and Mrs. H. Langston, and are accompanied by Mrs. Burrows' two sisters' Misses Lowe, of Blackpool, England, who are at pr sent holidaying in Canada.

In the list of St. Eugene hospital nurses pass list as published in last weeks' Courier, the name of Miss Beulah J. Penson was inadvertently omitted. Miss Penson was among those scoring the highest points in the provincial board examinations, passing with honors Her record, one of the highest marks in the nursing profession in British Columbia, totalled 83 5 6 per cent.—Cranbrook Courier.

W.I. School Fair September 12th

Earlier Date Assures Better Flower Show—Aid Salvation Army Rescue Work—Name Group Assist Girl Guides.

There was a fair turnout of members at the June meeting of Creston and District Women's Institute on Friday afternoon, at the home of Mrs Jas. Cook, with the president, Mrs. H. W. Mc Laren, in the chair.

It was decided to have the 1934 flower show and school fair on Wednesday, September 12th, at Park pavilion, along with a line of children's spor's and events at the swimming pool. Creston and Erickson schools have already notified of a large entry and the other schools are counted upon to also participate.

Instead of the Institute directors acting as a sort of committee of management for the Girl Guides, three members, Mrs. J. E. Johnston, Mrs Hayes and Mrs. Stevens, were named to take over the work. Mrs. Stevens, and a partner she will choose, will be the visiting committee for the month, and a committee was mamed to make a report on the condition of the cemetery at the July meeting.

A donation of $5 was made the SalvationArmy for their Grace ho pital rescue home work. A resolution sent along by the Parks Association was endorsed. It asks that in the construction of the Big Bend highway that the big timber along the road be preserved for scenic effect.

Another letter was ordered sent the council urging them not to weary in well doing in connection with the Curfew bylaw. Mrs. Cook and Mrs. Mallandaine were named auditors for 1934. A boquet of peonies, donated by the form er, were raffled and the winning ticket was held by Mrs. Hayes. The Institute will secure a brass plate to be placed on the door of the Institute ward at Creston hospital. The July meeting will be at the home of Mrs Chas. Murrell.

Sirdar

James Pascuzzo is a visitor at Cranbrook and Crow points

Jock McRobb was at his home at Canyon for the weekend.

Miss Daisy Rogers was home from Creston for the weekend.

F. H. Whiteley of Vancouver was a visitor to Atbara and Sirdar.

R. H. Hassard of Creston was a business visitor during the week.

J. S. Wilson re urned from Kimberley and Cranbrook where he spent a few days on business.

Sam Kinachen of Washout Creek left for Sanca, Sunday, having secured employment at the Sanca Mines

Kuskanook presented its old animated summer appearance Sunday. The regular commutors are all in residence now.

The ffshing during the last few days has been poor, but now that the water is clearing good catches may be expected.

Robert Stewart, who has been on the sick list after an operation for appendicitis, has resumed work as watchman at Kootenay Landing.

JITNEY SERVICE from Creston Postoffice corner during afternoon.

EVERYBODY INVITED

Sirdar softball team met Kitchener air port Sunday afternoon, Sirdar being victors. Later they met Wynndel, inflicting a defeat to the latter.

The number of cars passing throngh here of late has increased. Cars from the prairie predominate.

V. M. Vasseur, who has been engaged in hauling logs with his team at Twin Bays, has completed the work and took the team back to Creston, Friday.

Mr. and Mrs. T. Rogers left for a few days vacation in Spokane, making the trip by stage. Sydney will be in charge of the store during Mr. Rngers' absense.

A lover of song birds states that they are more numerous than ever before in this district, and that it is difficult to classify several species either by song or appearance.

Miss Annie, James and Dominic Pascuzzo were visitors to Creston, Friday, making the trip by car. Charles Wilson was a business visitor to Creston at the week end.

The water as indicated by guage at slough bridge reads 16.55 a fall of 2.11 for the week, even with a hot spell it is not expected that the water will rise to any appreciable extent.

A. Palmer, road superintendent, Creston, was here meeting Mr. McKay, the assistant road engineer from Nelson. The compressor s in operation and much progress is being made in removing several bad bends that have always given concern to car drivers

The good work of the game warden is evidently responsible for the large number of deer to be met everywhere. These animals are very tame and can be seen almost anytime close to the men working on the roads, while around the ranches they are equally numerous.

Lister

H. Doddings, field inspector for the Soldier Settlement Board was here from Nelson during the past week, on official business.

A few from both Lister and Huscroft are working with the crew making betterments on the highway in the neighborhood of the customs house at Rykerts.

Revs. M. T. C. Percival and C. Baase of Creston held Anglican and Lutheran Church services here at the schoolhouse Sunday morning and afternoon respectively.

Alfalfa cutting is general in the Lister-Huscroft district. The crop is quite an average one, but the mild winter has had a tendency to encourage the grass to grow better than usual.

R. Stevens left this week for Trail where he joins his son, Ernest, on a trip to Vancouver, where the latter is attending the Oddfellows' grand lodge sessions, with which order he is prominently identified at Trail.

There was a fair attendance at the picnic at Huscroft on Sunday. The Intermediates from Creston won both baseball games beating Canyon 9-8 and then beating Creston Athletics 5-0. At softball Canyon trimmed the Lister-Huscroft Raiders.

Lister public school baseball team was at Canyon on Sunday afternoon and met defeat 30-22 at the hands of Canyon. Lister battery was Erwin Rylan, Kirk Beard, Douglas Sinclair A return game will be played at Huscroft picnic grounds Sunday afternoon.

A special meeting of the ratepayers of Lister school district is called for June 21st, at 8.30 p.m., for the purpose of electing trustees to replace Mrs. Geo. Jacks and A. R. Bernard, who have left the area, and an auditor to replace the late W. P. Edwards.

Canyon City

Mrs Jarvis of Nipawon, Sask., is reported to have purchased a five-acre tract from Mrs. Bedry.

F. Rosen is still a patient at Creston hospital, and is making rather slow progress toward recovery.

Cutting has started on the first crop of alfalfa. While it is of excellent quality the yield is rather light.

Mr. and Mrs. Guy Browell of Nelson were weekend visitors here, with the latter's parents, Mr. and Mrs. T. Hickey.

Eli and Jean Nouguier, who have been visiting with their parents, Mr. and Mr. Nouguier, for some months, have returned to Seattle.

In the heavy windstorm and rain on Friday afternoon and evening, some hail was encountered in close proximity to the mountain.

Jock McRobb is at present employed at Sirdar, where he is sharpening steel in connection with government road improvements in that area.

Mrs. Myles Hurl and two children, who have been visiting with her parents, Mr. and Mrs. W. Cook, for a couple of months, have returned to their home at Kirkaldy, Alberta.

The Farmers' Institute staged a successful dance at the hall on Friday evening, with music by the Bond-Kolthammer orch stra, and a very fine supper. The cash intake was about $25.

F. H. Shepherd, who has been spending some time with his son-in-law and daughter Mr. and Mrs. S. C. Parker, at the Canyon, left on Saturday on a trip to Seattle, Victoria and New Westminster, where he will spend the summer.

Principal Marriott of Creston public school, had about 30 of his pupils on a visit to the West Kootenay Power & Light Company power house and dam on Friday. They are asked to write a composition on this development in connection wich the 1934 school fair.

First Car Berries Rolls June 12th

Record Made for Early Carload Shipping—Price Not Advancing—Arrow Creek Growers Market Crop Individually.

The strawberry crop is on the move from all points in the valley. Arrow Creek, which is always later that other points, commenced shipping yesterday, while carloads of berries were moving out of Wynndel at the first of the week. The initial car rolled Tuesday morning, to Winnipeg, Manitoba, and another car went out Wednesday. With the warm weatuer now set in Wynndel should have at least one car daily for the next couple of weeks.

With Wynndel rolling berries in car lots, marketing the crop has been expedited somewhat for the Creston shippers, who now have the l.c.l. trade pretty much to themselves. Shipments from the coast are falling off but competition from this quarter is still keeping the price down. This week the Exchange has put on a truck to pick up berries from its shippers at Alice Siding, Erickson and Canyon, for the haul to Creston. Harry Compton is again in charge of this work. Reports from Arrow Creek indicate that the growers in that disrrict are this year selling independent, with much of the crop destined for an Edmonton, Alberta, brokerage house.

Raspberries are coming fast and will be heavier than in 1933, due new plantings in almost every section, but more particularly at Wyn del. Cherries are also sizing and some of the sours are just about ready to move.

During the month Creston has had calls from representatives of two Old Country firms who are looking for increased tonnage this year. The most optimistic is F M. Kniveton, of Liverpool, England, who spent a day in the valley. He states the English crop is light, as is the Eastern Canada yield, and with new arrangements by the Empire Marketing Board to clean up the Australian and New Zealand crops before Canadian apples arrive, there is every reason to look for better export prices than in 1933. He has a strong preference for Jonathan, Delicious and McIntosh Red, confining shipments to the sizes between 163 and 216, and buying on firm f.o.b. prices. The other visitor was Mr. Nottingham, representing the Conway-Shaw firm, who specialize in auction marketing.

Arrow Creek

Mrs. Edwards is at Creston, picking berries for Herb Lewis.

Arrow Creek district was favored with a much-needed rain Friday aftetnoon.

Strawberry picking has started, but it will not be general until the end of the week.

Dr. J. Olivier, school health officer, made his official visit at the school on Friday.

Miss June Wiltse was hostess to the Ladies' Social Club at a meeting at her home Friday afternoon.

Mr. and Mrs. Hope, recently arrived from Saskatchewan, are picking berries at the E. Cardinal ranch.

Mrs. H. V. Thomp on and family of Coeur d'Alene, Idaho, were visitors at the first of the week, with her brother, Mr. Ward.

The school examinations are over for this term. Principal Kolthammer gave them early on account of so many pupils having to pick berries.

W. Ramm had the bad luck to lose his work horse by strangulation one day last week. It caught its hind shoe in the halter and was dead before the mishap was discovered.

BABY'S CRAMPS Banished!

"When I could not sleep at night with baby's cries, it was Baby's Own Tablets that cleared the little system of offending substance and gave sweet sleep and rest." That is what Mrs. Robert Greenhorn, Philipsville, Ontario, writes. Baby's Own Tablets are mild and soothing in action, yet most effective and always *safe* for colic, teething troubles, constipation, summer complaint, upset stomach, restlessness and simple fever. Price 25c everywhere. 176

Dr. Williams' BABY'S OWN TABLETS

WORLD HAPPENINGS BRIEFLY TOLD

Holland is reported to be concerned over the intensive trade invasion by Japan of the Dutch East Indies.

The oldest continuously published newspaper in Canada, The Montreal Gazette, recently celebrated its 156th birthday. Its first issue appeared June 3, 1778.

The calling of an imperial conference for the creation of an Empire air force will shortly be suggested by Lord Elibank in the House of Lords, it was learned.

Belgium may pay her 1934 war debt instalment to the United States with a $10,000,000 shipment of radium, according to an unconfirmed report at Brussels.

John L. Beckwith, former mayor of Victoria, and resident of British Columbia since 1884, died recently. He had engaged in the salmon canning business for 31 years. He was born in Cornwallis, N.S.

Wiley Post, round-the-world flyer now tuning up his plane for the London-to-Melbourne $750,000 air derby in October, recently announced he also has his eye on the world's altitude record.

The German version of the motion picture, "The Trial of Mary Dugan," was banned from theatres of the reich because it was regarded as a plea against capital punishment, it was learned. As such it was contrary to Nazi principles of law enforcement, it was explained.

The British House of Commons approved repeal of the duty on insulin, diabetes remedy discovered in Toronto by Sir Frederick Banting who was knighted in the King's birthday honors list. During debate on the move congratulatory references were made to Sir Frederick.

Two-and-a-half million feet of lumber will be shipped over the Hudson Bay Railway and through the port of Churchill in northern Manitoba to Great Britain by The Pas Lumber Company of The Pas, Man., according to D. D. Rosenberry, secretary-manager of the company at Prince Albert.

Thousands Always Ill

Reducing Funds For Public Health Not Sound Economy

Elimination of disease has done more to increase material prosperity than any other one thing, declared Dr. Gordon Bates, of Toronto, general director of the Canadian Social Hygiene Council, in an address in Ottawa. But even to-day two per cent. of the population was constantly ill, representing 160,000 adults in Canada. Parsimony in the expenditure of public funds for public health was unsound economy, maintained the doctor. The administering of toxoid to children who were well would prevent diphtheria. Compulsory pasteurization of milk was another preventative that should be insisted upon in the interests of national health.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile —No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c. at all druggists. 84

Agricultural Notes

Many Items Of Interest To The Western Farmer

While strawberries, like other fruits, are grown successfully on the prairies, they are not produced in commercial volume.

Sulphur has proved to be one of the most effective fungicides for the control of diseases caused by rust fungus.

Sales of hogs to stock yards and plant for the four months ended April 30 were approximately 19,000 more than for the corresponding period last year.

Of the clovers in 1933, red clover seed yielded particularly well in central and western Ontario, and this raised the total production in Canada above normal.

The basic reasons for the urge to form co-operative fruit associations in California during the past 60 odd years have been low prices to growers.

Shipments of livestock from Western to Eastern Canada for the first four months this year included 29,267 cattle; 164 calves; 82,908 hogs, and 40,423 sheep—all increases except hogs compared with last year.

In spite of the heavy decrease in Canadian exports of wheat to France in the past two years, this commodity still accounted for 61.56 per cent. of Canadian total sales to France in 1933.

The total value of the 1933 timothy seed crop is estimated at $163,000 as compared with $225,000 for the 1932 crop. The selling price per pound for the 1933 crop was about 6½ cents as compared with 5½ cents in 1932.

Grading and inspection of honey when exported are compulsory under the terms of the new Fruit and Honey Act. Honey, when shipped from one province to another, must also be graded but inspection is optional except for administrative purposes.

The increase in the sales of branded beef in Canada for the first four months of this year was considerably more than two million pounds compared with the corresponding period of last year, namely, 12,209,056 pounds this year; 10,167,515 pounds last year.

One factor which is favourable to the consumption of Canadian and other Empire tobaccos in the United Kingdom is the decision of the United States government to restrict tobacco acreage and to force leaf prices to a more economic level by increasing the price to smokers.

Air-dried peat and muck will absorb 2 to 6 times their weight of liquid, and in this respect they compare very favourably with straw, the bedding material almost universally used on the farm. Peat moss, commonly known as moss litter, may absorb ten to fifteen times its own weight of liquid.

The government of Canada first appointed an official entomologist in 1884, but the real development and expansion of the work did not begin until about 1909 when the finding of the dreaded brown tail moth in shipments of nursery stock from France necessitated the passing of legislation in 1910, giving the government power to inspect plant products entering Canada, and to take steps to prevent the spread of insect pests already prevalent in the Dominion.

Train Run By Electric Eye

Invention Tested By German State Railways May Be Adopted

Trains in Germany will be operated by an electric eye if an invention recently tested by the German State Railways is adopted. Control of a train is through photo-electric cells which operate the brakes by means of a light signal, but the light itself is provided by the engine. A dynamo on the locomotive feeds a lamp which throws an almost vertical cone of light into the air. Mirrors are arranged on upright supports at points along the line, and if the signal is against the train the mirrors will be in such a position as to meet the beam of light and throw it down on a pair of photo-cells mounted in the searchlight of the engine. The electric current from the cells operates a relay, and the brake magnets are opened and the train is brought to a standstill. The speed of the train can be automatically adjusted.

INTRIGUING NECKLINE—SMART COOL SLEEVES LINES THAT SLENDERIZE THE HEAVIER FIGURE

To-day's model is just perfect for hot weather wear.

Besides being unbelievably easy to make, it's surprisingly inexpensive. The pattern includes clear instructions as how to cut it out and put it together. The scalloped treatment is optional. The pattern also provides for the neckline, sleeves and hipline to be cut with a straight edge.

Carry it out as the original in a handkerchief-finish lawn print in blue on grey ground—you'll love it. The white orgadie vest gives it a dainty touch.

Striped seersucker can be worked out very effectively in this model.

Tub silks in white and pastels are charming too.

Style No. 867 is designed for sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 3⅜ yards of 30-inch material with ⅜ yard of 35-inch contrasting and 4½ yards of binding.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Fashion Show In Russia

Latest Paris Creations Shown To Thousands Of Women

The Dress and Lingerie Trust of Soviet Russia has just completed its first fashion show. Forty thousand women came from all over the country to gaze with critical admiration at 150 models, derived from the latest Paris creations. What further proof is needed that the Revolution is dead? The exhibition may be even more significant than recognition by the United States. It may mark a turning-point in the history of the Soviet. True, the frills and frumperies of M. Jean Patou were "modified" to suit Soviet women, but it was just as much a fashion show as if it had been held in some Fifth Avenue salon.—Washintgon Post.

An editor was dining out.

"Would you like some more pudding?" his hostess asked.

"No, thank you," replied the editor, absent-mindedly. "Owing to tremendous pressure on space, I am reluctantly compelled to decline."

SUNDAY SCHOOL LESSON

JUNE 17

THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: "Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit: teaching them to observe all things whatsoever I commanded you: and lo, I am with you always, even unto the end of the world." Matthew 28:19, 20.

Lesson: Matthew 28:1-20.

Devotional Reading: Psalm 116: 1-9.

Explanations And Comments

The Empty Sepulcher and Its Message, verses 1-6. The Evangelists make no attempt to describe the resurrection of Jesus; they report it simply and briefly. Matthew tells of the visit of Mary Magdalene and the other Mary to the sepulcher late on Saturday night (the Jewish Sabbath), as the first day of the week began to dawn. Mary Magdalene was from Magdala, a city on the western shore of the Sea of Galilee. She had been freed from "seven demons," Lk. 8:2, and is often wrongly confounded with "the woman who was a sinner" of Luke 7. The "other Mary" was the mother of James, Mk. 16:1. They had both been present at the crucifixion and at the burial, Mt. 27:56, 61.

The messenger "answered" the look of fear and amazement of the woman and said: "Fear not ye, for I know that ye seek Jesus, who hath been crucified." "The for gives a reason for the soothing tone of the address. He recognizes them as friends of The Crucified" (A. B. Bruce). Then he added the amazing news: "He is not here; for he is risen even as he said." Recall Mt. 12:40; 16:21; 27:63. "Come," he further added, "see the place where the Lord lay." The condition of the tomb as seen by Peter and John is described in Jn. 20: 5-7.

The Risen Christ Appears to the Women, verses 9, 10. The women departed quickly with fear and great joy (how natural were both emotions here) and hastened to bring the disciples word. Their emotions were greatly augmented when Jesus himself met them, saying, "All hail!" Casting themselves down before him, they took hold of his feet and worshipped him. Kindly Jesus reassured them: "Fear not; go tell my brethren that they depart into Galilee, and there shall they see me."

The Final Interview and Commission, verses 16-20. The eleven decipies went to the mountain in Galilee where Jesus had had appointed a meeting. It was a well-known meeting place, and there Jesus came to them—the appearance which probably is to be identified with the one mentioned by Paul in I Cor. 15:6, when he was seen by "about five hundred at once."

"All authority hath been given unto me in heaven and on earth": in these words Jesus asserted his right to command.

The future of his kingdom was Christ's supreme concern, and he issued his royal order: "Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit: teaching them to observe all things whatsoever I commanded you."

And lo, I am with you always, even unto the end of the world. May these words become to us not only a belief, but an experience.

A Remarkable Pilgrim

Woman Walked Twelve Times From Oberammergau To Rome

With the death at Oberammergau of Catherine Kopp, the most remarkable pilgrim of modern times has passed away. Of peasant stock, she lived to be eighty-four, and made, on foot, twelve pilgrimages to Rome. She knew three Popes and had planned another pilgrimage for this spring. Each journey, involved walking over 1,200 miles. On reaching Rome she went straight to St. Peter's to pray at the Apostle's tomb. On one occasion she started on her homeward walk an hour after the late Pope Pius X. had received her. She made her first pilgrimage when she had passed her seventeenth birthday.

Not American Innovation

The London Daily Telegraph says an invitation card, sent out by the Duke of Wellington, at the exhibition in the Royal United Service Museum, is a reminder that the dropping of the "u" in such words as "honour" and "labour" is not an American innovation. Like so many Americanisms it has Anglo-Saxon antecedents. The card asks for the "honor" of the company of Lieutenant-Governor Sir James Macdonell at the dinner given by the Duke to celebrate the anniversary of Waterloo.

Don't Read This

Unless you are interested in a medicine which has helped over 700,000 women and girls. Take it before and after childbirth, at the Change or whenever you are nervous and rundown. 98 out of 100 say, "It helps me!"

Little Journeys In Science

HELIUM

(By Gordon H. Guest, M.A.)

It is a very interesting fact that scientists observed a new element in the sun long before it was discovered on the earth. This new gas was given the name helium, from the Greek word "helios", meaning the sun. It was detected in the sun by means of the spectroscope, an instrument which the scientist uses to determine what elements are present in any light-giving body.

This gas occurs only in very small amounts in the air, but it is found in larger amounts (as much as one per cent.) in the natural gas of Texas, Kansas and Alberta. It is about seven times lighter than air and hence is used for inflating balloons and dirigibles. It will not burn and so is safer than hydrogen, which is a very inflammable gas. Helium is obtained from natural gas by freezing out or liquefaction of the combustible gases. At Calgary, Alberta, are located such plants, each of which can liquefy 60,000 cubic feet of gas per hour. The helium is taken out and the gases are then returned to the city mains.

Engineers have recently found an important use for this gas. Men obliged to work in compressed air, as in caissons under water in tunnel construction, often collapse when brought too quickly into air at ordinary pressure. This is because the nitrogen of the air dissolves under pressure in the blood, tissues, and even in the spinal cord. When the pressure is released, this nitrogen escapes in bubbles which may destroy the spinal cord, affect the brain, interfere with the action of the lungs, and even cause death. This limits the depths to which divers may go down with safety. Helium is much less soluble than nitrogen and diffuses more rapidly, so that if the locks where the air pressure is reduced are filled with helium and oxygen instead of air, which is a mixture of nitrogen and oxygen, the danger is removed.

Railway Workers Musical

More than 2,250 railway workers took part recently in a musical festival in Reading, England. They came from all parts of England and Wales, and the contests were held in four walls. Poems were submitted by a dock foreman, a fitter, a shunter and a tube cleaner. In the champion solo class there were heard the voices of a wheel tapper, a lampman and a clerk.

DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holder absorbs the nicotine, pyradine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refills — $1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go a a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earrings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of $1,000. Peter finishes his exhibit ,and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration". Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLVII.

The three exclamations over the discovery were almost as one breath. But the reactions of the trio were as different as the three individuals. Peter sprang toward the scattered pieces of plaster and sank down on his knees with a groan like a great building collapsing in an earthquake. Avis' expression of horror changed suddenly to angry accusation as she turned to Camilla, who glanced perplexedly from Peter to Avis, and was on her knees beside Peter in an instant.

Their hands fumbled futilly with fragments of plaster as if they would fit them together again; then they faced each other desolately. For a moment they seemed to be paralyzed with the horror of this unbelievable catastrophe.

Finally Camilla faltered, "Oh, Peter darling!"

Anger flamed in his eyes, just as Avis demanded in a shrill voice, "How could you?"

Camilla looked wildly from one to the other. "How could who?" her dry lips whispered.

"You!" accused Avis. "You did it!"

Camilla put up a protesting hand to push back the flame which leaped from Peter's eyes upon her, the room swayed and she sank down, down into a deep black abyss. Above her, she heard voices, faintly clamoring, footsteps that resolved into stampeding thuds, confusion, that seemed to pass over her head and trample her into oblivion.

* * * *

Voices, sounds, rushed back to her from a void . . . her head . . . where was she . . . what had happened? She tried to raise her hand, but it would not move, it was too great an effort to open her eyes.

The medley of sounds resolved into distinct words. Ah! Yes, she remembered. They had found Peter's statue destroyed and somehow, it had been too much for her. Her thoughts slipped away again. Then a girl's voice—it was Avis'—declared angrily, "Of course she did it. Jealous!"

That was it. Avis had accused her of destroying Peter's precious work, and Peter—Peter had looked at her as if he believed it. Peter's angry, reproachful, accusing eyes had added their pain to her first shock over the discovery, until she couldn't bear it. It was all so horrible. Why couldn't she have kept her senses and defended herself against them? Why had they accused her, she wondered for a bewildered second. Oh, yes, she had been alone in Peter's room, alone in the dark, when he and Avis came in and discovered the broken figure.

She moved her hands protestingly, opened her eyes. Cathie was bending over her. Terry was beside her. He said, "She'll be all right, now. Just let her rest. Don't try to talk to her."

Camilla was grateful for that advice. She wished they all would leave, and decided to be very quiet until they did. But just then she began to sob unrestrainedly. Tried desperately to stop, and could not.

"She's all right, now," Cathie pronounced. "Leave her alone. She can't help crying. That's the way you come out of a faint like that—either laughing hysterically or crying. Let's all get out of here. There, honey," she stroked Camilla's hand. "Take it easy now, and don't you try to leave here tonight." Cathie's voice was gentle with sympathy, but edged with resentment when she spoke to the others, and managed to persuade them all to leave.

Finally the door close after them and left a heavy silence which expanded and filled the room. Camilla was quiet now, her eyes closed. She lay rigidly for some time, wondering if she were entirely alone. Someone stirred across the room, came toward her where she lay on the couch. She opened her eyes. It was Peter. Her heart ached when she saw how haggard and pale his face was.

He asked quietly, in a hollow voice, "All right?"

She nodded, and slow tears rolled weakly down over her temples. She could not stop them. She held her hand toward him, appealingly, and whispered, "You—don't think—I did it, Peter?"

He did not touch her, drew his hand across his eyes, wearily. "I can't think. What's the use, anyway? It's done."

"But, darling Peter," she insisted desperately, "Surely you can't believe I would do that to you."

"Of course not," he replied dully, as if what he might believe was of little consequence. He was stunned, grieved, angered, puzzled. Accusing anyone, or thinking anything, made no difference.

The thing on which he had labored and agonized for weeks, his possible opportunity for the Paris scholarship, his whole ambition, it seem now—all this someone had destroyed in one maddened moment. Who, how or why was of no importance.

It had been Avis who insisted that Camilla did it for revenge for his neglect of her and attentions to Avis. No one else had agreed, but everything had been so confused. It didn't seem plausible that Camilla could have done the thing, even if she were justified. Still—someone had to do it—they had found her alone in the darkened room—but what did it matter, now?

He dropped listlessly into a chair beside her, covered his face with his big shapely hands. There was a long silence, while their thoughts moved in relentless circles, always back to the same unalterable tragedy.

Camilla sat up slowly, straightened her hair and rumpled clothes. Peter looked up inquiringly.

"I must go home," she said wanly.

"You are in no condition to go anywhere," he protested. "Here, let me help you get your dress off, so you can rest. You are going to stay here with me, tonight."

"But you don't want me to."

"Sure I do. Why not? Naturally, I don't feel very jolly over—everything. Besides, I shouldn't let you go home alone, and it would be much better if you stayed here."

There seemed to be nothing else she could do. Under any other circumstances, she would have stayed gladly, to try to comfort him in his grief and disappointment. He had said he did not believe she was guilty but there was that horrible weight of injustice that dragged at her heart and made it so difficult for her to say or do anything. As Peter had said, it was done, and no condemnation could change it. He could believe she was guilty, and still deny it. It made no difference to him.

* * * *

The guests had gone, excited, in the traffic event of the evening. protesting her verdict. Avis was alone, as horrified as anyone involved in the traffic event of the evening. It wasn't just Peter's sculpture and his ambitions that were shattered, which had pre-eminence in her thoughts. What most appalled her was the sudden shattering of her own hopes and ambitions, which her clever management had promised success. She had proceeded cautiously, tactfully, with her influences over Peter. Everything had gone beautifully, until this evening. His sympathies gradually swerving in her favor, his criticisms of Camilla increasing gradually, his obligations and gratitude to her becoming more involved, his success imminent, his temporary separation from Camilla all but accomplished.

Had she been too bold in her confidence? Had she flaunted her power over Peter too soon, and Camilla had taken this revenge? There could be no other explanation. Her grief was a mixture of defeat and anger. She was cornered, no way out now. Still—if Peter were made to believe that Camilla had done this despicable thing to him, it was the end for them. He never would accept for his wife the woman who had deliberately ruined his first chance toward success. Perhaps, after all, she still held the winning hand.

She wondered what might be going on now behind that other closed door. Poor Peter was so stunned and grieved that he couldn't even think, yet. And with Camilla just recovering—could that faint have been posed to favor her innocence?—very little probably would be said by either of them to-night. But she was glad that she had planted that little seed of suspicion at the first moment—the only time that would have been opportune for it. She could not have waited until tomorrow and calmly told Peter that she suspected Camilla. Impulsively, naturally in such circumstances, she had spoken the first thought that came to her mind. What explanation was more plausible?

She opened her door into the hall, stealthily, and listened. No sounds from Peter's room. She closed the door again and resignedly prepared for the night. There was nothing else for her to do.

(To Be Continued)

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Wernet's Powder is the world's largest seller and prescribed by leading dentists: it holds teeth so firmly—they fit so comfortably—that all day long you forget you ever had false plates. Leaves no colored, gummy paste—keeps mouth sanitary, breath pleasant—the best powder you can buy yet cost is small—any druggist.

The Ingenious Asiatic

Japanese Are Great Imitators And Stop At Nothing

Everybody knows that the Japanese are a wonderful people, but few of us understand just how wonderful they really are. Every day brings new proof. Virginia tobacco growers, according to a Times dispatch from Danville, are greatly disturbed by the threat of an imitation Virginia cigarette made from native Japanese tobacco and flavored with a German extract from cheap Virginia leaf. The ingenious little Asiatic people who can imitate foreign electric bulbs and bicycles and gramophones are now imitating Nature's work in our Piedmont tobacco fields.

Where will they stop? The prevalent impression is that they will stop at nothing. Universal unemployment threatens the nations because the Japanese will soon be making all the Grand Rapids furniture in the world, and all the Detroit automobiles, and all the Swiss cheese, and British Southdown mutton, and French champagne, and Mexican tamales, and Brazilian coffee, and Australian wool.

In every industrial trouble anywhere in the world to-day the motto is "Cherchez le Japonais". From the size of the Japanese "menace" there must be about 800 million Japanese and each one of them must be as clever as a thousand devils.—New York Times.

THE RHYMING OPTIMIST

By Aline Michaelis

A SINGLE PACE

"What shall I do with my life?" you say,
"With the years that are coming, grave years or gay?"
And while you wonder, life slips away!

Life is a road that stretches far,
Glad years finished, brave years that are
And years yet to be, each aglow like a star!

The road goes winding, goes flowing by,
From east to west and from sky to sky,
The road where your love and your toiling lie.

It wanders and reaches from rim to rim
Of far horizons, uncertain, dim,
And no man knows what it brings to him.

Though your road for year after year you can trace,
Through many a strange and lovely place,
You can shape it for only a single pace.

All of life that is given to any man
To fashion after his hopes' bright plan
Is a breath's brief space, is a footstep's span.

Forgotten By Time

Lost Race Of Primitive Savages Found On Pacific Island

Mrs. Zita Baker, a young British woman, has returned to England stricken with malaria after spending four enduring months among a "lost race" of savages.

Mrs. Baker is the wife of Dr. John R. Baker, of Oxford, leader of a scientific expedition sent out to the New Hebrides, in the Pacific, by the Oxford Unversity Exploration Club.

"Some of the islands," said Mrs. Baker, "had never before been explored by white men. The natives were among the most primitive aborigines—a race forgotten by time.

"I used to go out with the women to cultivate the fields in the daytime. At night I slept with them in their huts. Often there would be as many as eight women to one hut.

"Firearms were unknown on the island, and the men had to hunt with bows and arrows."

ARM IN SLING WITH NEURITIS

A "token of gratification" this woman says she is giving when she writes of her relief from neuritis:—

"For twelve months I have had neuritis in my arm, and up till the last two weeks have had to carry it in a sling. Since then I have abandoned my sling, am able to sleep undisturbed, and can perform household duties that previously I would not have done. These benefits I have received from Kruschen Salts. This has all happened in two weeks, and I am optimistic enough to think that in another fortnight I shall have said good-bye to neuritis once and for all. Call this a testimonial if you choose—to me it is a token of gratification."—(Mrs.) N. E. L.

Neuritis is a result of impurities in the blood. And it is impure blood, circulating all over the system and setting up inflammation in the tissues, that causes those excruciating pains. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Little Helps For This Week

"For thus saith the high and lofty One that inhabiteth eternity, whose name is Holy; I dwell in the high and holy place with him also that is of a humble and contrite spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones." Isaiah 57:15.

Without an end or bound
Thy life lies all outspread in light
Our lives feel Thy life all around,
Making our weakness strong, our darkness bright;
Yet it is neither wilderness or sea,
But the calm gladness of a full eternity. —F. W. Faber.

O Truth who art Eternity; And Love who art Truth; And Eternity who art Love; Thou art my God, to Thee do I sigh day and night. When I first knew Thee Thou liftedst me up that I might see there was something for me to see, and that I was not yet such as to see. And Thou streaming forth Thy beams of light upon me most strongly didst beat back the weakness of my sight and I trembled with love and awe, and I perceived myself to be far off from Thee in the region of unlikeness.—St. Augustine.

Supplied The Material

Toronto Woman Used Gold In Wedding Ring For Filling

A well-known Toronto dentist the other day had a lady come in to have a gold filling put in her tooth. "I'd like to supply the gold," says the lady. "Well, we don't as a rule—," he began. "Oh, but I really want to supply this gold," she says winningly He gives in and goes ahead with the mold. Next day she trots in with a wedding ring.

"It's only 14 carat and we usually use about 22," he explains. But she gets her point. "I'm going to be married tomorrow again," expands the lady. "This is my first wedding ring, and if I have it in my tooth I can still wear it without my second husband knowing anything about it." The dentist socked the yellow metal home.

Wynndel

Mrs. E. Williams, who has been visiting relatives in Vancouver, returned home last week.

Mrs. Reid and son of Cranbrook were auto visitors here, guests of Mr. and Mrs. R Dalbom.

Paul Ofner, C. Leamy and C. Carlson are taking advantage of the fine weather to make hay.

Miss Fern Maddison of Blairmore, Alberta, is a visitor here with Mr. and Mrs. A. Martell.

Miss Annie Hook has returned to Spokane after a short visit with her grandmother, Mrs. Grady.

Cows were seen stranded on the flats last week along Kootenay River, across from Lizard Creek.

Mr. and Mrs. Barclay of Ione, Wash., are visiting with the latter's parents, Mr. and Mrs. A. Glasier.

Miss Frances McRae returned to her home in Saskatchewan, after a visit with her sister, Mrs. B. Franklin.

D. Doddings, a representative of the Soldier Settlement Board, was a business visitor in the district last week.

F. Dean of Nelson was a caller at Wynndel for a few hours last week. Joe Boland of Cranbrook was an auto visitor last week.

G. Taylor, local superintendent of C.P.R. Express Company, is a resident at Wynndel, looking after the strawberry shipping.

Hawks are more daring and seemingly harder to shoot, this season and are making off with a considerable quantity of young chicks.

The grader was in operation last week in the vicinity of the precooler, and has greatly improved the approach to the cold storage plant.

Mrs. Young and Mrs. McMahon of Lethbridge, Alberta, are auto visitors at Wynndel, guests of Mr. and Mrs. Hackett for the strawberry season.

Sunrise bakery, Creston, is delivering bread at Wynndel every second day during the berry season. Ross meat market makes the rounds once a week.

F. Hagen and L. Williams are handling the berry hauling for the Co-Operative Fruit Growers. K. Wittman is in charge of shipping for Long, Allan & Long.

The dance of the season is carded for to-night at the community hall, with Paramount orchestra music and sponsored by the K. K. Klub. Gents 75 cents, ladies 25 cents, supper included.

Commencing at the weekend the pre cooler got into operation handling the strawberries for the carload shipping With the warm weather that set in on Monday berries are coming on fast.

Crop Report

Creston, June 4.

The weather of late has moderated and is now much cooler, cloudy, with occasional light showers.

Strawberry shipments started ou May 25th, one of the earliest seasons on record for this distri_t, and have been slowly increasing in volume since the change in weather. Carload shipments will soon follow, depending on the arrival of brighter, warmer weather.

Raspberries are already formed and, if it should turn hot, may be ready around the middle of the month. Young canes are growing rapidly and are appearing along the tops of the rows.

Cherries are sizing and the drop will soon be over. Early varieties are changing color now. Bings should be nearly ready to pick the last week of this month.

Orchards are looking very well. Seeding of clovers for cover crops has been completed in some instances. In a few instances scab infestation has become discernable on the leaves of McIntosh. Many growers have just completed their first cover spray last week. When the weather clears many will start thinning their Wealthies.

Some alfalfa has been cut in the orchards, but has been left to lie and act as a mulch. Some red clover has been cut and got under cover, but the bulk of the meadows have yet to be cut. The recent rains will benefit all ground crops and revive pastures. High water on the Kootenay Flats will be about at its peak, but conditions on the prairie have caused growers to realize that prices will be low again this season, and they are hoping that the Agricultural Act will help to maintain prices at the cost of production at least when it comes into effect.

LAND ACT
SEC. 39

Notice of Intention to Apply to Purchase Land

In the Nelson Land Recording District of Kootenay, and situate in the vicinity of Sandy Creek, near Lot 8255, Kootenay District.

TAKE NOTICE that Pete Yurisich and Mike Vojvodich, of Nelson; occupation, ranchers; intend to apply for permission to purchase the following described lands:

Commencing at a post planted at the N.E. corner of Lot 8255, thence east 40 chains, south 40 chains, west 40 chains, north 40 chains, and containing 40 acres more or less.

PETE YURISICH, Rancher.

Mrs. A. P. Yeo arrived from Calgary, Alberta, on Monday, to join her husband who recently purchased the Orchard service station.

Strawberry shipping is in full swing from all points in the valley, Arrow Creek sending out the first few crates at the middle of the week.

FOR SALE CHEAP—Gurney-Oxford range with water front; crib mattress, new; Winnipeg couch. Mrs. L. C. McFarland. Creston.

HOUSE FOR RENT—Five-room house with bathroom and garage, centrally located. For particulars apply Mrs. Fransen, Creston.

Cecil Moore's garage reports the sale of a Ford V-8 light delivery to the B.C. forest branch, ranger J. P. MacDonald taking delivery on Monday.

FOR SALE—Refrigerator, in A1 con-dition, size 20 x 31 x 40; for quick sale, $10 cash. H. A. Powell, secretary Cres-ton Valley Hospital, Creston.

The first straight carload of berries rolled on Tuesday—from the pre cooler at Wynndel. This is an all-time record for early movement in caa lots.

Col. Mallandaine left on Sunday for Portland, Oregon, where he is represent-ing the East Kootenay zone at a Legion convention in the rose city of the Pacific coast.

Wi h the new water supply now avail-able the sw mming pool can be filled in 14 hours It is the intention to change the water at least once a week—Friday or Saturday evenings.

With warm weather prevailing and the water receding ofl the flats the mosquitoes are again in evidence, and promise to be at least average trouble-some again this season.

FOR SALE—5 horsepower electric motor. Also Myers pump, capacity 53 gallons per minute; and 500 feet Post's wire and necessary electrical equipment. J. W. Robinson, Creston.

Wild Rose Lodge Knights of Pythias have the semi-annual election of officers at the regular June meeting this (Thurs-day) evening. Fred Hagen is the retir-ing chancellor commander.

At the council meeting on Monday night the curfew by-law was stood over for another month while further invest-igation is being made as to the legal auth-ority of the village in the matter.

It is announced league baseball will be provided for the balance of the season. A four-team circuit has been organized, made up of teams from Kitchener, Can-yon, Alice Siding and Creston Intermed-iates.

Creston Intermediate baseball team won two games at the picnic at Huscroft on Suubay afternoon. In the first round they trimmed Canyon 7-6, and then went on to beat Creston Athletics by a 5-2 margin.

Creston is expecting a visit some time this month from Hon. A. Wells Gray, minister of lands, and Hon. F. M. Mac-Pherson, minister of public works, both of whom have left the capital for a visit to the Kootenays.

The Wildcats softball team invaded Kitchener on Friday night and lost out 26-25 to the Pine Katz. This makes the third game in succession these teams have decided on a one-point mar-gin—the Pine Kcatz winning two.

Erickson Christ Church Ladies' Guild are having their annual lawn social at the grounds at the W. H. Kemp ranch Wednesday afternoon next, 2.30 to 5.30. Free jitney service from Creston post-office corner throughout the afternoon.

Rossland Miner: The editor and his family are indebted to Mrs. W. M. Archibald for some of the loveliest roses ever seen here, grown by Mrs. Archibald at her Creston home, where Mrs. Archibald says vegetation and flowers and plants are looking beautiful for this season of the year.

In our official weather report for May in last week's issue a typographical error appears. In it tempera:ures for the 24 and 25th were given as 62 and 64 They should have read 82 and 84. For the week of May 28-29, the maximum temperature was never below 80 and went to 87 on the 29th.

There was a fair turnout Wednesday evening at the Grand theatre to hear Rev. E. J. Springett of Toronto, president of the British-Israel Association of Canada, deliver an address on this subject, with W. Liphardt, president of the local branch, in the chair, and H. Langston contribut-ing a couple of vocal numbers during the evening. During his stay in town the visitor was a guest of Rev Andrew Walker.

AT THE HOSPITAL

Mrs. Milloy of Boswell, Mrs. L. T. Leveque of Erickson, and Mrs. M. R. Joyce are improving. Baby Potyok, who has been a patient the past month, was able to leave on Wednesday. F. Rosen of Canyon, T. Lacey of Creston, Pedro Cherbo of Sirdar, and Mrs. Ben Long are undergoing treatment. Mrs. L. W. Stephens of Canyon and Mrs M. Hislop of Creston continue to improve Mr. Gregson of Yahk relief camp, and Mr. Brown of Kingsgate relief camp are undergoing treatment. Mrs A Clark and Mrs. V. Grundy of Canyon and Beryl Tompkins of Erickson were able to leave hospital the latter part of the week. Mrs. Wasilansky of Wynndel was a patient for a day. Mrs. H. W. Fennell of Canyon is a patient.

Alice Siding

The June drop is presumed to be over in local orchards and thinning operations are now in full swing.

The attendance at Alice Siding school is somewhat reduced now strawberry harvest is under way.

Miss Ruth Compton, of Nelson, was a weekend visitor with her parents, Mr. and Mrs. Jas. Compton.

Frank Martin was in the Lakeview district a couple of days last week skid-ding out logs for Sam McNeil.

Harry Murphy of Vancouver was a visitor here at the middle of the week, a guest of Mr. and Mrs. F. W. Ash.

Harry Compton is again at the wheel of the truck picking up strawberry ship-ments in this section for Creston Co-Op-erative Fruit Exchange.

Misses Bessie and Jessie McDougall arrived last week and will remain for the berry season with their grandparents, Mr. and Mrs. John Kelly.

Mr. and Mrs. Andy Miller havereturn-ed to Wasa after a short visit with their daughters, Mrs. Hec. Stewart and Mrs John Miller, jr., the latter going back to Wasa with them.

Alice Siding baseball team batted out the most impressive victory of the season on Wednesday evening, when they trimm-ed a team of Indians from the mission by a score of 17-1, with Webster and Collis doing the battery work.

Alice Siding has joined up with the Valley baseball league, playing the first game here on Sunday against Kitchener and suffering a 5-0 defeat. This Sunday Canyon will be here for a league game, which will commence at 2 p.m.

Dr. Frank Lott of Toronto spent a few days here at the first of the week on a visit with his sister, Mrs. Jas. Compton. Dr. Lott is in charge of the Western Dental Clinic and in connection with that work is visiting western centres. He was at Winnipeg, Regina and Moose-jaw en route west, and left on Wednes-day to visit Vancouver, Victoria and Ed-monton, Alberta.

Quick Relief Now From Neuralgia

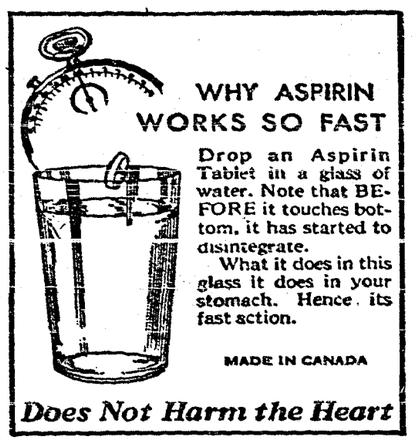
Real* ASPIRIN *Starts Taking Hold in Few Minutes

Now comes *amazingly quick* relief from headaches, rheumatism, neuritis, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And thus is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.



Gold Still Is King

The lure of gold continues to exercise its sway upon the minds of men. Countries may go off the gold standard. New economists may argue, as they will, against gold as a monetary basis. Depite all the argument "about it and about", the yellow metal still casts its potent spell, alluring men to brave hardship and danger in its quest, impelling men to undertake hazardous expeditions to win it, inducing countries to exert desperate efforts to acquire it. Mirage or otherwise, it gilds the horizon of new prophet and old priest, of poet and peasant, of rich and poor, of commoner and peer. Phantasm or reality—gold still is King.

These somewhat wornout platitudes are evoked by the recent appearance in a financial journal, of two items on gold which, strangely enough, were placed in close proximity. The one was headed: "Nations still scrambling for gold", and the other "$30,000,000 Buried by Pirates Sought". The one article demonstrates the hold which the gold tradition has upon world statesmen; the other epitomizes the ingenunity and risk employed and undertaken in efforts to win the precious metal—a gamble with life and money.

Relative to the international scramble, it is stated that, Britain and other non-gold-standard countries, including the United States, of course, are buying gold wherever it can be bought, and that their accumulations of gold now break all previous records.

Replying to the question why the United States continues to purchase gold, the New York Times recently replied that, in principle at least, gold still remained the world's monetary standard. Continuing it said:

"No government is shaping its monetary policies in line with the dreams of the imaginative 'New School Economists'. Every government is recognizing the paramount necessity of return to a stabilized basis of international valuation. Nothing has shown this underlying sentiment more clearly than the fact that every nation—even those which have suspended gold payments—is guarding the gold reserve against the central bank note issues as scrupulously as it did half a dozen years ago. Whereas the Bank of England, at the beginning of 1933, held the smallest gold reserve in more than a dozen years, it has subsequently added nearly $350,000,000, bringing the reserve to the highest figure in its history. . . . . The general process is indirect recognition of the gold standard. The possession of adequate and concentrated gold reserves would unquestionably be of high value whenever return of sound international conditions should make return to sound and stable currencies a possibility."

The other story is somewhat similar to the famous Cocos Island treasure hunt. It refers to a projected expedition from Britain to Tahiti in the south Pacific, to reclaim approximately "$30,000,000 in gold ingots and a fortune in jewels", said to have been buried by pirates in or about 1849. Usually such treasure hunts originate with discovery, in some peculiar manner, of a map of the cache. Such a map Stevenson introduced in his "Treasure Island"; such a map as allegedly may have been found tattooed on the chest of some old sailor in some Barbary Coast "dive". In this particular instance, the map came into possession of an Australian in 1900, who, it is said, visited the island and succeeded in removing some of the jewels. These, he subsequently buried—a peculiar enough action for which no reason is given. However, in March 6, 1934, the same gentleman claims to have located the treasure at the exact point indicated by the map. Speaking of the discovery, he says:

"There are only two things to contend with in drilling for the loot—sand and coral. The drill went down through the sand, ground its way through the rough coral and rested on the gold. There is no rock off Tahiti and by the drills, we felt out the shape of the ingots and also are able to determine the extent of the treasure. The drills spin on gold just as a top would on a marble floor."

It is upon such evidence and such representations, apparently, that hard-headed British engineers and business men are prepared to risk their money, and expend their enterprise.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhœa, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 88 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

The Great Zambesi Bridge

Remarkable Feat Of Engineering In Heart Of Rhodesia

Spanning the Zambesi Gorge stands one of the highest bridges in the world.

This bridge is in the heart of Rhodesia, far from civilization and so near to the great Victoria Falls that trains crossing the bridge are sometimes held up by spray from the turbulent water. The building of the Zambesi Bridge was a marvellous feat of engineering. First of all a rocket had to be fired across the rocky chasm. The rocket was attached to a line, which in turn was fastened to a length of wire and a steel rope.

During the construction of the bridge the builders worked at a dizzy height over the swirling waters below.

When workmen began their task a large net was spread beneath them to prevent catastrophe, should any of them lose their balance.

But instead of steadying their nerves they complained that the net served only as a constant reminder of their perilous position, and so it had to be removed. After a period of little more than six months the bridge was completed and a train travelling at fifteen miles an hour was driven across to test its strength. The structure was painted grey so that whenever the materials rusted in any part the defect would immediately be noticed. This impressive feat of engineering in the wilds in no way detracts from the beauty of the scenery.

Harbor Expert Dead

Sir Frederick Palmer Who Recommended Churchill Was Noted Engineer

News reached Canada recently of the death at Lingfield, near London, England, of Sir Frederick Palmer, the man whose recommendation caused Churchill to be developed as Western Canada's northern sea outlet.

When Hon. C. A. Dunning assumed the portfolio of minister of railways in the Dominion cabinet in 1926, he sent to England for Sir Frederick, one of Britain's most noted engineers.

Sir Frederick went into the northland and after an extensive investigation, recommended to Mr. Dunning that Churchill be the northern port instead of Nelson.

The recommendation was acted upon, and Churchill became the outlet to the world for Western Canada via the sea.

For many years Sir Frederick was chief engineer of the Port of London Authority. He served as consulting engineer for many railways both in the old country and India, in addition to being engineer of the Calcutta port. In 1929 he was named engineer for the new $62,000,000 Charing Cross bridge, London.

Recipe For Iced Tea

Use six heaping teaspoons of "Salada" Black Tea. Brew tea in one pint of freshly boiled water for six minutes. Strain, and pour liquid into a two quart container. While hot, add 1½ cups of granulated sugar and juice of 2 lemons. Then shake or stir contents well, until sugar is fully dissolved. Fill container with cold water. **Do not allow tea to cool before adding the cold water,** otherwise liquid will become cloudy. This is now ready to serve in tall glasses with chipped ice or cubes. A slice of lemon may be added if desired. The above will make two quarts of iced tea, or seven tall glasses.

Soldiers Stayed In France

Over Thousand Americans Married And Made Home There

More than fifteen years after the bugles blew "cease firing," about 1,100 American veterans of the World War linger in France. Most of them are "voluntary exiles" for the sake of French wives. Their numbers are dwindling, however, for in 1931 they were 1,700 strong, figures gathered by the American Legion Post show. More than half live in Paris; the rest are spread over forty-nine departments.

It is now possible to determine the speed of lightning by use of special photographic apparatus. Experiments of this kind recently revealed that the average speed of lightning is around 28,500 miles per second.

Martyr To Radium

Last Of Scientists Who Aided Mme. Curie Is Dead

Henry T. Koenig, 42, a chemist of Denver, Colorado, who had worked for years under a self-imposed death sentence, died a martyr to his research work in radium.

Koenig was the 20th to die of the 20 scientists who aided Mme. Curie, discoverer of radium, in her research work.

One by one, Koenig's companions died from malignant infection induced by contact with the mineral.

But he continued his work, although he knew that each contact further weakened his system. Through his work and that of his companions thousands have been given relief.

Koenig's work in perfecting a system whereby radium extraction could be accomplished at a lower price than ever before was recognized by authorities as one of the greatest contributions to medical science.

He studied the rich radium ores of the Belgian Congo in 1922 and 1923. His development of the ores in this region remedied all danger of a monopoly in radium.

During the World War he adapted radium to practical use in warfare. The use of radium for the illumination of watch dials at night was the result of his research.

Three months ago he was ordered to Porter's Sanitarium, suffering from cancer of the hip. Treatment failed to check the disease and he died.

Irrigation Plans

Proposal To Irrigate Large Block Of Land In Southwest Saskatchewan

Irrigation for between 5,000 and 10,000 acres in southwest Saskatchewan is proposed in a plan to be urged before the Saskatchewan government.

Facing a feed shortage for the third successive year, farmers around Valmarie and Cadillac ask $100,000 expenditure to build a dam on the Frenchman river with a 15-mile main ditch south and east through Foothills.

Alfalfa would be sown with two crops a year, providing a likely crop of 25,000 tons or enough to feed 20,000 cattle.

An experimental dam is being built by George Newton to serve his farm a few miles west of Valmarie.

J. R. Reid, Regina, is doing the engineering work. A small dam is being built at the Frenchman river, pump installed, and the scheme developed to supplying about 250 acres.

Mr. Reid said that with two crops a year about 1,250 tons of alfalfa can be grown, sufficient to feed 1,000 cattle.

Fraudulent Stock Promotions

Government To Put Spoke In Work Of High-Pressure Salesmen

The House of Commons took the first step recently to spoke the work of high-pressure stock salesmen when it reviewed the Consolidated Companies Act which practically remodels the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it impossible to sell promotion stock except through a prospectus, approved by the secretary of state. Among other provisions, fines and imprisonment would be established for any house-to-house stock canvasser or any organization that used a telephone and sucker list to promote sales. Penalties would range from $500 for a first offence to $1,000 and a year in jail for subsequent convictions.

Willing To Co-operate

"Woman is very unreasonable," said a venerable New Hampshire justice of the peace. "I remember that my wife and I were talking over our affairs one day, and we agreed that it had come to the point where we must both economize. 'Yes, my dear,' I said to my wife, 'we must both economize, both!' 'Very well, Henry,' she said, with a tired air of submission, 'you shave yourself, and I'll cut your hair'."

Fifty years in which to pay costs of the court, totalling $750, has been given to an unsuccessful litigant, Bernard Kelly, a dock laborer in Liverpool.

Hero Of Russo-Japanese War

Admiral Togo, Who Died Recently, Was Idol Of Japanese People

Admiral Marquis Keihachiro Togo, the silent little man whose destruction of the Tsar's Russian fleet 29 years ago placed Japan among the great powers, died at Tokyo recently.

At the age of 86 and with the rank of Japan's greatest hero, he surrendered to cancer of the throat.

Admiral Togo was the last and most illustrious of all the heroes of the Russo-Japanese war. For several weeks he had been seriously ill. The day before he died the emperor elevated the aged sea hero from the rank of count to that of marquis. Posthumously he was promoted to admiral of the highest court rank.

PAYMENTS ON WAR DEBTS SAID TO BE RUINOUS

London.—The House of Commons shouted overwhelming approval as Neville Chamberlain, chancellor of the exchequer, announced that war debt payments to the United States have been suspended until the United States is ready for a conference on a reasonable final settlement.

Amid shouts of "hear, hear," from opposition and government benches alike the chancellor declared "we are not defaulters." If Britain could have been assured she would not be in default June 15 by making another token payment, then she would have been willing to make a payment as concrete evidence of good faith, he added.

But since the Washington congress passed the Johnson bill, President Roosevelt could not assure nations paying a "token" that they would not be in default. Therefore Britain decided to suspend payments entirely. But the chancellor stressed that Britain has never contemplated repudiating the debt.

When the British ambassador in Washington was told after passage of the Johnson bill that token payments would be classified as default, said Mr. Chamberlain, the government had to choose between paying the full $262,000,000 or else suspending all payments pending a final revision of the existing war debt settlement. That settlement was labelled unjust in the British note to Washington. For one thing, Britain has paid roughly half the amount she owed, yet finds herself owing more than ever because of interest.

"The resumption of full payment would have revived the whole system of inter-governmental war debt payments and would have postponed indefinitely the chances for world recovery," said the chancellor.

There was a little resentment that Washington made the note public, whereas the British government understood it would be released simultaneously with announcement in London. The chancellor, however, merely said that owing to some confusion it was released shortly after being presented, but he did not blame the United States government.

The position was generally approved by the press. The Liberal Star declared the action should have been taken long ago, and took it for granted the note opened the way for clearing up the whole situation.

"The note makes it clear to the most middle-western mind," the Star added, "that any attempt to resume these payments will be ruinous to both countries."

The Evening Standard, Lord Beaverbrook's organ, said that President Roosevelt was inconsistent in condemning "unproductive nationalistic expenditures," meaning arms, when he himself was sanctioning huge expenditures in his own country.

France To Export Wheat

Has 1,500,000 Bushels To Sell At Fifty Cents Is Report

Paris.—Reports were current here France is prepared to export more than 1,500,000 bushels of wheat at a price of slightly less than 50 cents a bushel. The wheat, it was said, would go to the United Kingdom and Denmark.

Usually well informed sources said they expected the French government would be asked to maintain a minimum domestic wheat price at a level to be determined after the yield of the current crop becomes known.

It was reported 50,000 metric tons (1,833,333 bushels) of wheat would be exported to Britain and Denmark at 28 francs (currently $1.82) a quintal. That would place the price at 49½ cents a bushel, f.o.b. French ports.

In addition the government would grant an export bounty of 80 francs a quintal (about $1.41 a bushel) bringing the total price paid exporters to 108 francs a quintal ($1.91 a bushel) as compared with the present minimum domestic price of 130 francs a quintal (about $2.30 a bushel).

W. N. U. 2050

Advocates Works Program

Premier Pattullo Of B.C. Urges Huge Expenditure

Vancouver.—Premier T. D. Pattullo returned to his long-time advocacy of a $200,000,000 public works program in Canada, and in the same address declared British Columbia would pay the principal of her debts 100 cents on the dollar.

He was addressing a joint gathering of the Vancouver Board of Trade and Canadian Club.

"I don't want to inflate," he said, outlining his public works proposal. "I don't want to take a dollar from a man who has it, but he is going to lose it if unemployment continues."

The difference of opinion between his government and the Dominion on public works, was not one of principle, but of amount.

He suggested sufficient currency could be issued ot create a credit of $200,000,000, which could be loaned to the provinces on a per capita basis without interest. It would be paid back through a sinking fund within the lifetime of the works undertaken. The increase in debt would not be sufficient to hurt the country's external credit.

Held Many Important Posts

Former Resident Of Winnipeg Died Recently In England

Winnipeg.—W. L. Griffiths, former secretary to the Canadian high commissioner in England, died at London June 5, according to cabled advice received here. Death was ascribed to heart disease. He was 69 years of age.

Mr. Griffiths came to Winnipeg from Bangor, North Wales, 50 years ago and was one of the first exporters of Manitoba wheat to Great Britain. In 1897, during the government of Sir Wilfrid Laurier, he was appointed Canadian commercial agent.

He succeeded J. G. Colmer as secretary to Lord Strathcona, then high commissioner, in 1903. Later he became the right-hand man of Sir George Perley and served during the World War period. He retired shortly after Rt. Hon. P. C. Larkin took office in 1924. Two sons survive.

Indians Face Murder Charge

Alleged Slayers Of B.C. Constables Given Preliminary Hearing

Merritt, B.C.—Four Indian brothers, Richardson, Eneas, Alex and Joseph George, have been named by a coroner's jury as the slayers of Dominion Indian Department Constable F. H. Gisbourne, and B.C. Provincial Police Constable Percy Carr on May 23.

Gisbourne and Carr were slain near the Canford Indian Reserve and their bodies thrown into the Nicola river. Gisbourne's body was recovered.

Three of the brothers, Richardson, Eneas and Alex have been charged with murder and were given preliminary hearing. Joseph is in hospital here with a fractured skull.

Death Sentence For Theft

Seven Persons In Ukraine Receive Heavy Penalty

Kiev, U.S.S.R.—Seven persons accused of taking part in organized thefts of money and supplies from the agricultural supply trust were sentenced to death by the supreme court of the Ukraine, and 24 others were given prison terms ranging from one to 10 years.

The convicted persons, all of whom were employees of the trust, included a number of members of the Communist party.

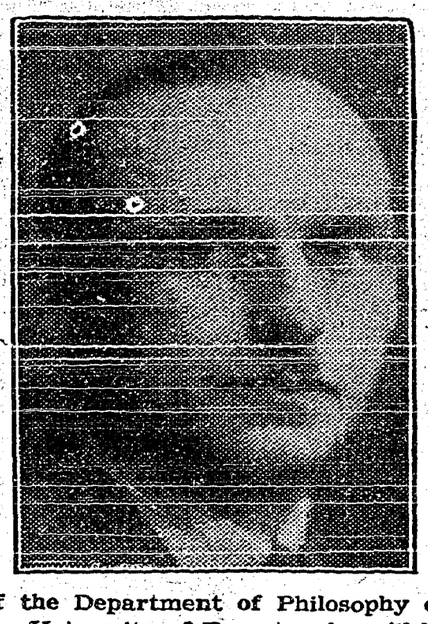
For Canadian Navy

Ottawa. — A powerful Canadian naval force capable of co-operating with the Empire and to taking over completely the defence of the Dominion and Dominion shipping, was urged in the senate by Major-General W. H. Griesbach of Edmonton.

Snowstorm In Idaho

Boise, Idaho.—A snowstorm whipped the high country of the Boise National forest June 5, while flowers were in bloom. As much as four inches of snow piled up in some places. Most of it melted quickly.

PROF. F. H. ANDERSON



of the Department of Philosophy of the University of Toronto who will be one of the Canadian representatives at the English International Congress which meets in Prague this summer.

Want More Pay

Employees Of Canadian Packers Reported To Have Asked Company To Restore Wage Cut

Toronto. — The Toronto Globe states that 1,400 employees of Canada Packers, Limited, were reported to have asked the company to restore in bulk a 10 per cent. wage cut made effective in 1931 and rescinded last October.

The newspaper quoted General Manager N. J. McLean, of the company, as saying the plant relations committee had approached the management with "certain questions," the nature of which he did not disclose.

It said the representations of the employees resulted from newspaper reports of the parliamentary committee's scrutiny of the affairs of the company.

Mr. McLean, it said, explained "certain questions were put to the management as a result of what happened at Ottawa."

Rain Checks Forest Fires

Raging Less Furiously In Maritimes But Serious In Ontario

Toronto. — Forest fires continued to burn in scattered areas of Maritime Canada and Newfoundland, but less furiously for rain in some districts held them in check. The situation in Ontario continues serious and 500 men are fighting the blazes.

Forest protection aviators reported an outbreak on the international border between Maine and New Brunswick that had been raging unnoticed for a week, leaving in its wake a worthless stumpage of 40,000 acres.

To Make A Profit

Government Stands To Make $33,000,000 On Sale Of Gold

Toronto.—The federal government stands to make a profit of approximately $33,000,000 in the gold which will be taken over from the Canadian banks at the statutory price of $20.67 an ounce, according to an estimate based on the latest official bank statement.

The government bank statement for April 30, the latest available, gives the amount of coin in possession of the banks as $39,928,171. A Toronto banker estimated for the Canadian Press that 95 per cent. or about $38,000,000 of the total, was in gold coin. In addition the banks hold at agencies outside Canada $9,159,554, bringing the total up to roughly $47,000,000. The prevailing premium on gold, now selling in New York at $35 an ounce, is about 70 per cent. over the old price of $20.67, giving a profit of $33,000,000.

Rain Revives Crops

Crop Prospects Throughout West Greatly Improved

Winnipeg. — Jubilation over crop prospects throughout Western Canada's wheat belt grew with further rainfall over the western southern sections. For the farmer the era of dust and drouth was fast becoming a memory.

Light to moderate showers fell over southern Saskatchewan and some parts of southern Alberta. Scattered showers were reported over widespread sections of Manitoba. tions of Manitoba.

Cool temperatures continued to hold in check a grasshopper menace that a week ago threatened to become acute. Many farmers in Alberta and Manitoba, their hopes renewed by rains that ended a 13-day drouth, discussed plans to remain on farms they announced would be abandoned.

Berry Shipments

B.C. Strawberry Consignments Have Already Totalled That Of Last Year

Victoria.—British Columbia strawberry shipments to prairie and eastern Canada markets have already equalled last season's totals and, by the end of the season, will be close to record figures, it was indicated by the markets branch of the provincial government.

To date 90 cars have been shipped and another 20 cars are ready to go. The record of 132 cars was established several years ago. Only 92 cars rolled last year.

Six cars were sent as far east as Toronto and Montreal this year to mark the first time B.C. berries have reached that market in volume.

BRITISH COLUMBIA HONORS FAMOUS EXPLORER

Here we see Mr. W. McAdam, Acting Agent General in London for British Columbia, placing a wreath on the grave of Captain George Vancouver, the explorer, to commemorate the 136th anniversary of his death. The man who gave Vancouver its name is buried near Petersham Church, Richmond, Surrey.

FRANCE HAS A NEW PLAN FOR ARMS PARLEY

Geneva. — Tempers were cooled down when the steering committee of the world disarmament conference met again and a new French plan of action was presented along with declarations that nobody more than France would welcome Germany back into the parley.

But although the atmosphere was calmer, there was no narrowing between the two great groups led by Britain, on the one side, and France on the other. With the gulf as wide as ever, the steering committee adjourned. In the meantime, the British, French, United States and other delegates will hold conversations in an effort to find agreement as to what may be proceeded with.

Roughly speaking, one section wants the parley adjourned so the governments can progress through diplomatic channels, chiefly attempting to get Germany back into the conference she left abruptly in October. The other wants the conference to get right down to work, chiefly discussing security, which is first and foremost so far as France is concerned.

"Germany's return overshadows all our discussions," declared Barthou, but he stuck to his statement that the conference could not go hat in hand and beg the Hitler government to return to the fold.

"No country would be more happy than France to see Germany return," he went on. "No door is closed. In the Saar question France has just shown her goodwill by joining in an international engagement to which Germany is a party.

"The conference should neither impose conditions in Germany nor accept conditions from Germany," he added. "Germany must be able to cross the threshold with complete equality of rights—but she must also accept responsibilities which thenceforth will be common to all."

Planning Abandonment Of Duplicated Lines

Railways Co-operating In Effort To Reduce Expenses

Ottawa.—It would be improper for the trustees of the Canadian National Railways to enter into any controversy over the suggestions for amalgamation publicly advanced by E. W. Beatty, president of the Canadian Pacific, in opinion of C. P. Fullerton, chairman of the trustees, expressed before the house committee on railways and shipping.

Mr. Fullerton made his second appearance before the committee and presented a brief covering three phases of the railway problem, co-operation with the Canadian Pacific, capitalization and amalgamation proposals.

The co-operation efforts up to date had yielded a saving estimated at $1,260,000 in yearly joint economies. Projects of co-operation to reduce duplication now under study involved abandonment of approximately 2,100 miles of line on 36 different projects, while Canadian National economies contemplate further abandonment of 1,150 miles of light-traffic lines in various parts of the country.

R.C.M.P. Colors Arrive

Arrangements Being Made For Formal Presentation In July

Regina.—Of dark red silk, four feet by two and one-half feet in size, the Royal Canadian Mounted Police colors have reached Regina headquarters from London, England.

Colors will be formally presented next month. Arrangements for the presentation are being made by Ottawa.

The colors are elaborate and emblazoned with battles in which the force took part in its 61 years' service.

Battles commemorated on the colors include the Northwest Rebellion of 1885; the South African uprising of 1900-02; the Great War and the Siberian expedition of 1918-19.

Until the present, the force has never had its own colors.

A dozen members of the Rod and Gun Club took part in the crow shoot on June 10th, and accounted for a kill of 84 of these birds, the high guns being Ed. Lewis and J. P MacDonald, who accounted for 22 each, and will divide the $5 and $2.50 merchandise prizes offered for the two high kills. With a guess of 82 on the day's slaughter Geo. Lacey won the shell vest. After the shoot 15 members of the club sat in at a dinner at Creston cafe.

A wedding of great interest here was solemnized at the home of the bride, Edmonton, Alberta, Thursday evening, June 7th, when Miss Ruth Arena, daughter of Herbert Tinkham, was united in marriage with John Alfred Avery, son of Mr. and Mrs. W. J. Avery of Creston, Rev. Dr. Grant of Metrolitan Church officiating, in the presence of a company of some 50 invited guests. The bride wore white satin with veil and carried a boquet of pink roses and lily of the valley. The bridesmaid, Miss Bernice McConnell of Bremner, Alberta, wore ruffled blue organdie and carried a boquet of pink carnations and blue sweet peas. The groom was supported by Herbert Tinkham, jr. After the ceremony there was a reception at the home of Mr. and Mrs. Herbert Thompson. Mr. and Mrs. Avery spent a couple of days in Calgary, en route home Mr. and Mrs. Avery are to preside in Creston and very best wishes of a wide circle of friends are extended for a successful and happy future.

During his visit here last week public school inspector Capt. Manning arranged for the midsummer departmental examinations which come this month. Miss Wade will preside over those writing on the high school papers, commencing June 20th. Miss Hazel Hobden will be in charge of those writing on the entrance to high school tests, opening on June 27th.
