DUCATION

F THE PROVINCE
F BRITISH COLUMBIA

ne Hundred and Fourth
nnual Report

LY 1, 1974, TO JUNE 30, 1975

INISTER OF EDUCATION
ROVINCE OF BRITISH COLUMBIA

ted by K. M. MacDonald,
ter to the Queen's Most Excellent
esty in right of the Province of
sh Columbia

MINISTER OF EDUCATION

PROVINCE OF BRITISH COLUMBIA

VICTORIA

he Honourable
lter S. Owen, Q.C., LL.D.,
utenant-Governor of British Columbia.

y it please Your Honour:
beg respectfully to present the
Hundred and Fourth Report of the
artment of Education.

Dr. Patrick L. McGeer
Minister of Education

ISTER'S OFFICE

ister of Education:
Honourable Eileen Dailly

UTY MINISTER'S OFFICE

uty Minister of Education:
Fleming, B.A.

ociate Deputy Minister — Educational Operations:
illipson, B.A., B.Ed.

ociate Deputy Minister—Educational Programs:
. Soles, B.A., M.Ed.

ERINTENDENTS OF EDUCATIONAL SERVICES

inistrative Services:
Canty, B.A., M.Ed.

munications (Acting):
Faris, B.A., M.Ed., Ph.D.

cational Programs—Post-Secondary:
. Justesen

cational Programs—Schools:
Meredith, B.A., M.Ed.

l Personnel:
ant)

ncial Services:
len, C.G.A.

grated and Supportive Services:
alsh, B.Sc., M.Ed.

INISTRATIVE SERVICES

stant Superintendent (Acting):
. Hawker, B.A., B.Ed.

ctor, Administration:
Keogh, Dip. Schl. Admin.

stant, School Board Affairs:
Price, B.A., B.Com.

ctor, Facilities Development—Schools:
Simpson, M.R.A.I.C., A.R.I.B.A.

ctor, Facilities Development—Post-Secondary:
McLelland, M.R.A.I.C.

COMMUNICATIONS

Director, Publication Services:
D. W. C. Huggins, C.G.A.

Director, Information Services:
J. L. Arnett

Director, Provincial Educational Media Centre:
B. A. Black, B.Ed.

Co-ordinator, Data Services:
R. C. May, B.A., M.Sc.

Librarian:
Mrs. A. Armstrong, B.A.

EDUCATIONAL PROGRAMS—POST-SECONDARY

Assistant Superintendent:
J. F. Newberry, B.Ed., M.Ed., Ph.D.

Director, Trades Training and Journeyman Upgrading:
P. C. MacGregor

Co-ordinator, Adult Technical and Vocational Training:
D. G. Anstey

Director, Curriculum Development:
D. N. Franklin

EDUCATIONAL PROGRAMS—SCHOOLS

Assistant Superintendent:
J. T. McBurney, B.Com., M.Ed.

Director, Curriculum Development:
W. B. Naylor, B.A.

Assistant Director, Curriculum:
W. D. Oliver, B.A.

Co-ordinator, Home Economics:
Miss J. R. Irvine, B.Sc.

Home Economics Advisers:
Miss J. Campbell, B.Sc., M.A., Dip. Ed.
Mrs. H. Krueger, B.Sc.,

Co-ordinator, Industrial Education:
J. Jupp

Inspectors of Technical Classes:
R. S. Alexander
R. C. Smith

Assistant Director, Learning Evaluation:
J. J. Mussio, M.A., Ph.D.

Assistant Director, Examinations:
H. C. D. Chalmers, B.Sc., Ph.C.

FIELD PERSONNEL

Director, Field Services (Acting):
D. L. Hartwig, B.A.

Director, Teacher Services:
(Vacant)

Assistant Director, Teacher Certification:
E. D. Cherrington, B.A.

FINANCIAL SERVICES

Assistant Superintendent (Acting):
R. A. Munro, B.Com., C.A.

Director, Schools Finance:
G. Gamble, R.I.A.

Assistant Comptroller:
J. F. Currie

INTEGRATED AND SUPPORTIVE SERVICES

Assistant Superintendent:
Mrs. F. L. Fleming, B.Ed., M.Ed.

Director, Correspondence Education:
J. R. Hind, B.A., B.Paed.

DISTRICT SUPERINTENDENTS OF SCHOOLS

K. F. Alexander, B.Sc., B.Ed., Mission City

W. W. Baldry, B.A., M.Ed., Ashcroft

O. Bedard, B.Ed., M.A., Dawson Creek

L. B. Beduz, B.A. B.Ed., M.Ed., Creston

W. J. Zoellner, B.A., B.Ed., Kelowna

STAFF APPOINTMENTS AND PROMOTIONS

HEADQUARTERS

H. E. Justesen
appointed Superintendent, Educational Programs—Post-Secondary.

Dr. R. L. Faris
appointed Acting Superintendent of Communications from Special Advisor for College Affairs and Educational Communications.

Dr. J. F. Newberry
promoted to Assistant Superintendent, Educational Programs—Post-Secondary from Director, Academic Programs.

Mrs. F. L. Fleming
promoted to Assistant Superintendent, Integrated and Supportive Services from District Superintendent of Schools.

J. T. McBurney
promoted to Assistant Superintendent, Educational Programs—Schools from District Superintendent of Schools.

W. L. B. Hawker
appointed Assistant Superintendent, Administrative Services (Acting) from District Superintendent of Schools.

R. A. Munro
appointed Assistant Superintendent, Financial Services (Acting) from Director, Finance and Administration, Post-Secondary.

D. L. Hartwig
appointed Director, Field Services (Acting) from District Superintendent of Schools.

J. F. Currie
appointed Assistant Comptroller.

J. L. Arnett
appointed Director, Information Services.

P. C. MacGregor
appointed Director, Designated Trades from Supervisor, Adult Technical and Vocational Education.

FIELD

O. Bedard
appointed District Superintendent of Schools, Dawson Creek.

J. R. Denley
appointed District Superintendent of Schools, North Thompson.

J. L. Doyle
appointed District Superintendent of Schools, Smithers.

W. F. T. Fisher
appointed District Superintendent of Schools, Revelstoke.

E. A. Killough
appointed District Superintendent of Schools, Maple Ridge, from Registrar and Director of Examinations and Teacher Certification.

G. C. Lind
appointed District Superintendent of Schools, Fort Nelson.

W. F. Marshall
appointed District Superintendent of Schools, Fernie.

W. Maslechko
appointed District Superintendent of Schools, Vanderhoof.

R. J. Patrick
appointed District Superintendent of Schools, Quesnel.

M. G. Pendharkar
appointed District Superintendent of Schools. (Relieving.)

35-YEAR GOLD WATCH PRESENTATION
DR. C. B. CONWAY, W. R. D. HILL

25-YEAR CONTINUOUS SERVICE CERTIFICATES
J. A. HOLMES, E. R. CARDINALL

EXECUTIVE DEVELOPMENT TRAINING PLAN GRADUATES
E. D. CHERRINGTON, J. F. CURRIE

PUBLIC ADMINISTRATION COURSE GRADUATES
MRS. A. F. MADRONA,
MRS. UNA WESTMAN

RETIREMENTS

Dr. C. B. Conway, Director of Research and Standards, after 36 years of service.

S. E. Espley, Executive Secretary to the Commission of Education, after 27 years of service.

W. J. Mouat, District Superintendent of Schools, School District No. 34 (Abbotsford), after 24 years of service.

Mrs. M. M. Johansson, Clerk-Stenographer (Integrated and Supportive Services), after 19 years of service.

G. H. Nelson, District Superintendent of Schools, School District No. 15 (Penticton), after 19 years of service.

W. Martin, Stockman (Malaspina College), after 18 years of service.

N. A. Allen, District Superintendent of Schools, School District No. 45 (West Vancouver), after 18 years of service.

Dr. J. I. MacDougall, District Superintedent of Schools, School District No. 33 (Chilliwack), after 14 years of service.

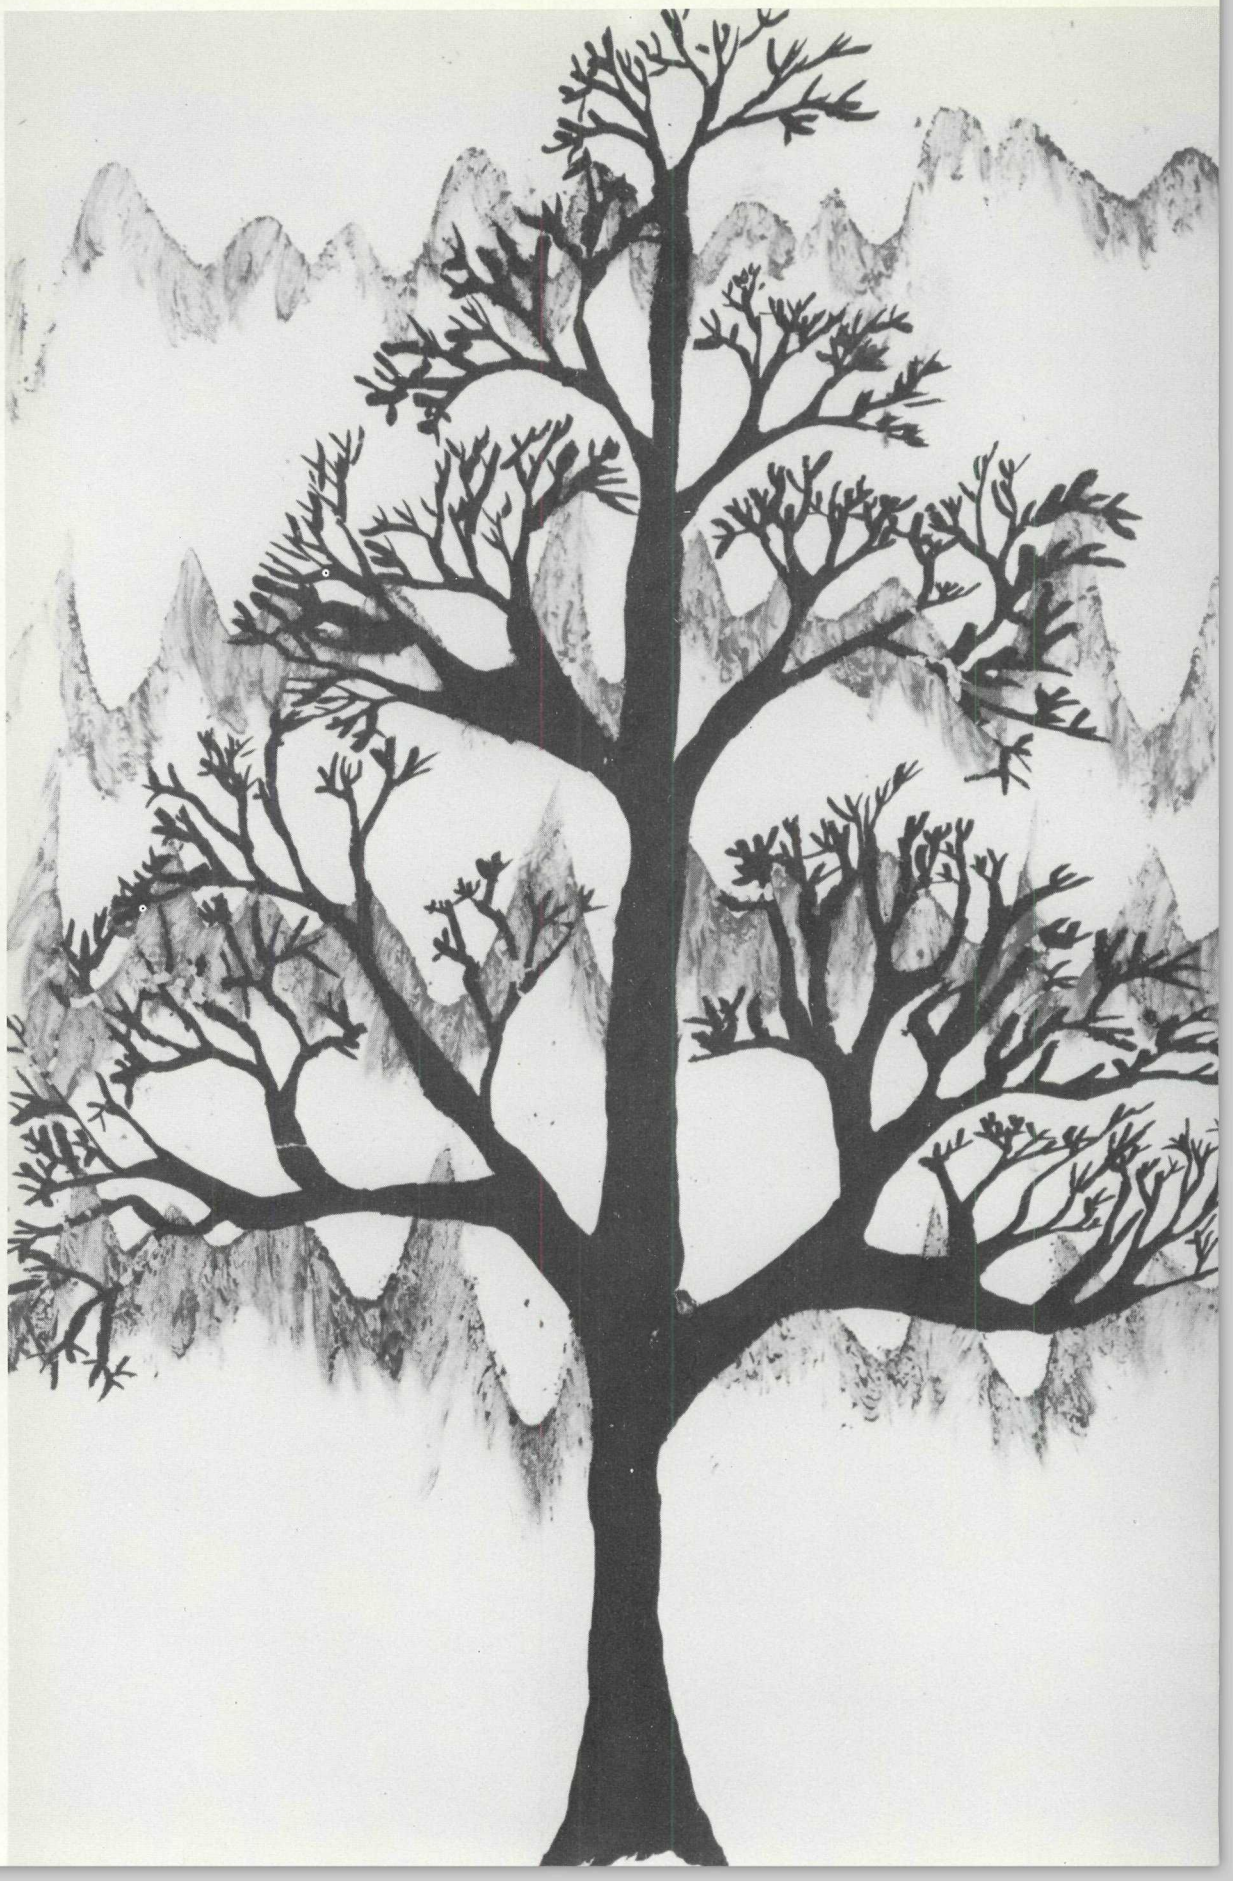
R. R. Hanna, District Superintendent of Schools, School District No. 46 (Sechelt), after 13 years of service.

F. C. A. Menu, Stockman (Okanagan College), after 11 years of service.

B. Callaghan, Stockman (Camosun College), after 9 years of service.

H. S. C. Archbold, Administrative Officer (Educational Programs—Post-Secondary), after 8 years of service.

W. F. Ramsay, District Superintendent of Schools (Relieving), after 7 years of service.



VISION REPORTS

VISION OF MINISTRATIVE SERVICES

he maintenance of close and harnious relations with the school boards he Province has enabled this Division ave an appreciation of, and a contact n, the many problems experienced by school boards and the educational administrative staffs. These contacts e enabled the Division to give greater stance to the districts, especially in ard to the provision of capital facilities essary to meet anticipated future olments and curriculum requirements, to help extract the best possible cational value for every dollar of enditure.

onsultative services were provided ng the school year in respect to ool site acquisition and other aspects and matters; school buildings and er capital facilities for use for school poses; the furnishing and equipping of lities; the problems inherent in the vision of safe, efficient and economical sportation services, plus the many er problems connected with the inistration of a school district.

n Equipment Advisory Committee appointed to provide expertise and ice on the problems of furnishing and ipping schools. The Committee con- s of professional personnel from ous school districts plus staff from Division. The advice from the Equipt Advisory Committee has been tly appreciated and as a result of ecommendations a great many of the dards in respect to the equipment essary to meet the demands of the sent technological age have been sed and up-graded.

he Facilities Development (Schools) nch of the Division examined plans processed a large number of rovals.

apital expenditures for the 1974 ndar year (Section 190 approvals) e finalized:

purchase	
improvement	$11,952,215
dings (construction)	63,308,523
pment	11,132,972
s & Supervision	4,725,128
Total	$91,118,838

his was an increase in excess of 000,000 over the total dollar value of capital expenditure approvals granted for the previous year.

SCHOOL BOARD ORGANIZATION

During the school year which ended June 30, 1975, the number of school districts in the Province was 75. This represents an increase of one due to the formation of a new district, School District No. 92 (Nisgha) which was created on January 1, 1975.

At the end of June there were 69 municipal school districts and 6 rural districts.

In regard to trustee membership on school boards, 19 had 5 members, 38 had 7 members, 16 had 9 members and 2 districts had official trustees. There were no three-member school boards.

TRANSPORTATION—CONVEYANCE OF PUPILS

The following statistics give details of the conveyance of school children during the 1974/75 school year.

(1) Number of school districts providing transportation	71
(2) Total number of vehicles:	980
(a) District-owned	706
(b) Contract buses	269
(c) Other (water taxis, etc.)	5
(3) Total daily approved mileage	73,916
(4) Total number of "shareable" pupils carried daily	98,947
(5) Total number of "non-shareable" pupils carried daily	16,352
(6) Total number of all pupils carried daily	115,299

Transportation Assistance is made available to the parents of pupils who reside in isolated areas of the Province where there are insufficient pupils to establish a bus route or a school with the appropriate grade. Rates for transportation assistance were increased effective January 1, 1975. During the school year the province provided Transportation Assistance to the value of $1,485,035 for 4,042 pupils in 63 school districts.

School districts continue to be eligible for the special cold weather transportation allowance which was introduced in January, 1973. The allowance is used to increase local flexibility in setting walk limits and in providing additional transportation services during the cold winter months.

BOARDING ALLOWANCE AND DORMITORIES

During the 1974/75 school year the Province shared the cost of providing boarding allowances for 361 pupils in 33 school districts at a cost of $276,750. This represents an allowance of $75.00 per pupil, an increase over the previous shareable allowance of $50.00 per pupil.

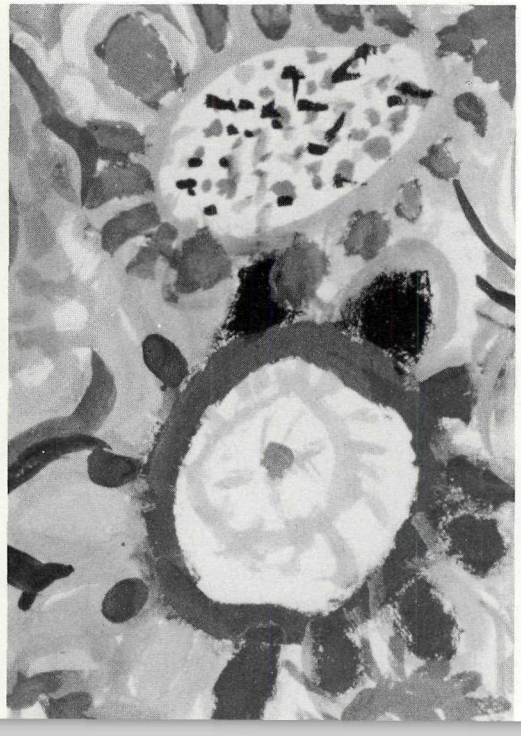
The need for dormitory accommodation is continuing to decline as transportation assistance improves and more schools are built. A summary of dormitory data for the school year will be found among the statistical tables in this report.

ADULT SCHOOL-CROSSING GUARDS

A new program was introduced in January, 1975, which enabled school districts to provide adults to supervise crossing points which have been judged dangerous.

The program is supplemental to the student patrols which have done such fine work over the years.

In 1975 a total of 48 school districts received Department sharing in the employment of adult school-crossing guards for 314 crossing points. In addition the Department supplies a standard equipment kit for each guard.



DIVISION OF COMMUNICATIONS

The creation of a Division of Communications was announced December 14, 1974. Following the announcement several new advisory committees were formed to assist in the development of educational communications policy. A Division Advisory Committee composed of 17 people from schools, colleges, universities and the general public was asked to identify major areas of policy discussion and make recommendations for future policy. A District Superintendent Advisory Committee has also played a role in early stages of policy formation.

In addition to the development of educational communications policy the new Division of Communications has absorbed several departmental branches which appeared to fit in naturally with it. The Provincial Educational Media Centre, created in the spring of 1974 as an extension of the former Audio-Visual Services Branch, became part of Communications. P.E.M.C. continues to be responsible for the planning, development, selection, production, purchase and distribution of audio-visual materials for the schools and colleges of the Province, and for the development and scheduling of radio and television school broadcasts in co-operation with the Canadian Broadcasting Corporation.

Other branches becoming part of the Communications Division were the Departmental Library, the Publication Services Branch, formerly known as the Curriculum Resources Branch, and Educational Data Services, an extension of one of the functions of the former Research and Standards Branch.

The activities of these branches are referred to in subsequent paragraphs. One that is not is a newly-formed Information Services Branch, an extension of a very limited former operation, which was designed to keep the public informed about educational matters. It's first director is John Arnett, a former education reporter and public relations specialist. One of his first accomplishments was the creation of a Department of Education newspaper called Education Today, being published 10 times a year as a means of distributing information to educators and interested citizens. The new Branch has also greatly increased its services to the media.

Mr. Ian Kemlo, a University of Victoria librarian, was hired to conduct a six-month study of the Department of Education library and the future relationship between the Department of Education and other educational libraries throughout the Province.

THE PROVINCIAL EDUCATIONAL MEDIA CENTRE

The Provincial Educational Media Centre previewed some 1,500 films and 200 videotapes during the 1974/75 school year for possible inclusion in the library on either film or videotape format. Only 100 new titles were added to the film library but multiple copies of the 250 most frequently requested items were added. More than 200 videotape titles were added to the master videotape library.

Experiments with new delivery systems and new booking systems formed an important part of the year's work with major innovations in film library procedures being planned for September, 1975. Demands upon the library continued to outstrip the supply despite significant increases in the number of available prints. Details of distribution will be found in the statistical tables.

The videotape duplicating system initiated the previous year has proven to be a valuable service with more than 15,000 videotape programs provided to schools and colleges during the year.

In co-operation with the Canadian Broadcasting Corporation 75 original radio programs and 20 original television programs were produced and broadcast.

The Provincial Educational Media Centre production unit completed 50 programs for videotape distribution and 20 French language audiotapes. Of particular interest was the commencement of production on the television series *Interface: Science and Society* which was designed for use with adult audiences as well as in secondary schools. The series deals with scientific developments which have major social implications.

Catalogues for films, filmstrips, and videotapes, as well as Teachers' Guidebooks and supplementary materials such as song books and French scripts for radio and television broadcasts, were distributed to all schools and colleges.

ur editions of the newsletter Re:Views ere sent to more than 1,500 teachers, rarians, and resource centre personnel. e Provincial Educational Media Centre ff conducted several teacher work-ops on the use of media, including one jor workshop involving teachers and ministrators representing the majority school districts and colleges in e province.

Key staff members represented the partment on sub-committees of the uncil of Ministers of Education and at ner meetings involving inter-provincial -operation and exchange of media ograms.

UCATIONAL DATA SERVICES

One of the outcomes of the recent structuring of the Department of ucation has been the establishment of ucational Data Services, a branch thin the newly-formed Division of mmunications. The Branch was estab-hed after the retirement of Dr. C. B. nway, Director of the Research and ndards Branch, who retired at the d of 1974.

This is the first time in the history of e Department of Education that a ecific branch has been established th the primary purpose of meeting the tistical needs of all those interested basic educational information. The mary objectives of Educational Data rvices are:

To design a system for gathering basic statistical information concerning the British Columbia educational system.

To establish and maintain data banks for research, planning, management and administration.

To make forecasts of enrolment and teacher requirements at all levels of the British Columbia educational system.

To ensure the publication of statistics on the British Columbia educational system.

To consult with government and non-government agencies as to their in-formation needs, to assist in the inter-pretation of the data, and to provide the information in the format and manner in which they wish to receive it.

As can be seen from the objectives, Branch is being structured so that it provide data serves at both the ool and post-secondary levels.

The first objective concerns the estab-lishment of a system for gathering basic statistical information. Until June of 1975 the Department did not have ready access to a computer resource, but at that time planning was begun to have most of the Department's basic statistical inform-ation processed by one agency which will allow for the correlation of information as well as the elimination of a number of Departmental and other forms which duplicate one another to a great extent. There have already been developed over the years a number of basic statistical documents that can satisfy many of the requested educational information needs that originate both within and outside the Department. Such documents as Form K, Form J, Form B and others at the school level are well known by school district administrators and principals. Much statistical information also exists at the post-secondary level which, until now, was not able to be developed to its full potential.

The initial work in the area of pre-liminary system design has been to promote accessibility to data that already exists with the resulting elimination or consolidation of forms collecting the same or similar information. This focus on trying to eliminate duplication applies not only to Department of Education forms but also to forms that are being distributed by other organizations con-cerned with the British Columbia edu-cational system—namely, Statistics Canada, the British Columbia School Trustees Association and the British Columbia Teachers' Federation. There is still a long way to go toward eliminating duplication and one committee that was established toward the end of 1974 has this as its primary objective. This com-mittee, called the British Columbia Public School Statistics Committee, has repre-sentatives from the British Columbia Teachers' Federation, British Columbia School Trustees Association, Statistics Canada, the British Columbia School Districts Secretary-Treasurers' Associa-tion, the Association of British Columbia School Superintendents, the British Columbia Principals' and Vice-Principals' Association, and the Department.

The second objective of the Branch concerns the establishment and main-tenance of data banks for research, planning, management and administra-

tion. A great deal of work has been done already in the public school area in this regard. For example, this Branch has, for each school district, current and varying degrees of historical information with related provincial norms (where applicable) on: full-time equivalent teachers, full-time equivalent enrolment, "drop-outs," teacher utilization, class size, semestered *vs.* non-semestered schools, numbers of teachers involved in each secondary subject area, percentage of time per school week devoted by pupils or teachers to each secondary subject area, number of courses taken by pupils, secondary subject area analysis of "specialist" teachers, pupil/teacher ratio, 1971 census data by school district, school size, data, etc.

The third objective is to make forecasts of enrolments and teacher requirements at all levels of the British Columbia educational system. At the school level, the Department has commissioned the British Columbia Research Council to develop two forecasting models. One model forecasts enrolments by grade by school district and the other forecasts teacher demand and supply. The enrolment forecasting model is now well-developed after six years and has produced very good forecasts for at least the last three years. These forecasts are utilized by many areas of the Department, especially the Administrative Services Division in its consideration of requirements for future school construction. The model is updated annually with the most recent September 30 enrolments and a new set of forecasts is available, usually by December of the same year. The most recent set of enrolment forecasts for the British Columbia public school system has total elementary enrolment decreasing steadily to a minimum of about 321,000 in September, 1977, from 329,742 in September, 1974, and then starting to increase slowly to about 350,000 by 1985. Total secondary enrolment is forecast to increase from the September, 1974, figure of 212, 641 to 225,000 in September, 1977. It should fall to about 199,000 in 1982 and then start to rise again. The combined effect of both elementary and secondary forecasts should result in a virtual stabilization of the total enrolment figure.

The Teacher Demand and Supply Model is still in the developmental stages and the Department is not forecasting post-secondary enrolments at the present time. However, the British Columbia Post-Secondary Education Enrolment Forecasting Committee, a committee consisting of representatives from all British Columbia colleges, universities, vocational schools and technical institutes, as well as representatives from the Department of Education and the Universities Council, has been performing this function since the committee was formed in 1971.

The fourth objective is to ensure the publication of statistics on the British Columbia educational system. Most of the statistical tables that appear in the Minister's Annual Report are produced by this Branch. As the school year ended a review of the statistical section of the report was just getting under way with a view to improving the presentation of relevant educational statistics. In addition, other departments of government and non-government agencies require up-to-date statistics on education, many of which the Branch provides.

The last objective is to consult with government and non-government agencies as to their information needs, to assist in the interpretation of the data, and to provide the information in the format and manner in which they wish to receive it.

PUBLICATION SERVICES BRANCH

In the restructuring of the Department of Education, which took place during the 1974/75 school year, the Curriculum Resources Branch became known as the Publication Services Branch and was transferred from the Educational Programs—Schools division to the newly created Division of Communications. With this change the printing capability of the Curriculum Development Branch, previously identified in the Educational Programs—Post-Secondary Division, was transferred to the Division of Communications as a sub-unit of the Publication Services Branch. This Branch continues to be responsible for the acquisition and distribution of prescribed textbooks and other learning aids with the added responsibility of the printing facilities provided to produce a wide variety of curriculum and correspondence course materials for public education institutions.

'he changing role of the Curriculum
velopment Branch has influenced the
curement process of the Publication
vices Branch. The development of
eral outlines, as compared with the
elopment of specific courses, con-
ies to emphasize the need for a greater
ree of choice in learning materials.
port of this trend by the Publication
vices Branch brings with it the neces-
for continuing review of ordering
cedures both in the bulk purchasing
cess and in the dissemination process.
Director has conducted studies of
ribution methods in other provinces
recommendations have been formu-
d to provide procedural changes in
distribution of learning aid support
ne schools of British Columbia. Re-
ion of the economic benefit of central-
l purchasing, with greater flexibility in
choice of materials, are the salient
ures of proposed changes.
ecipes for Home Economics Classes

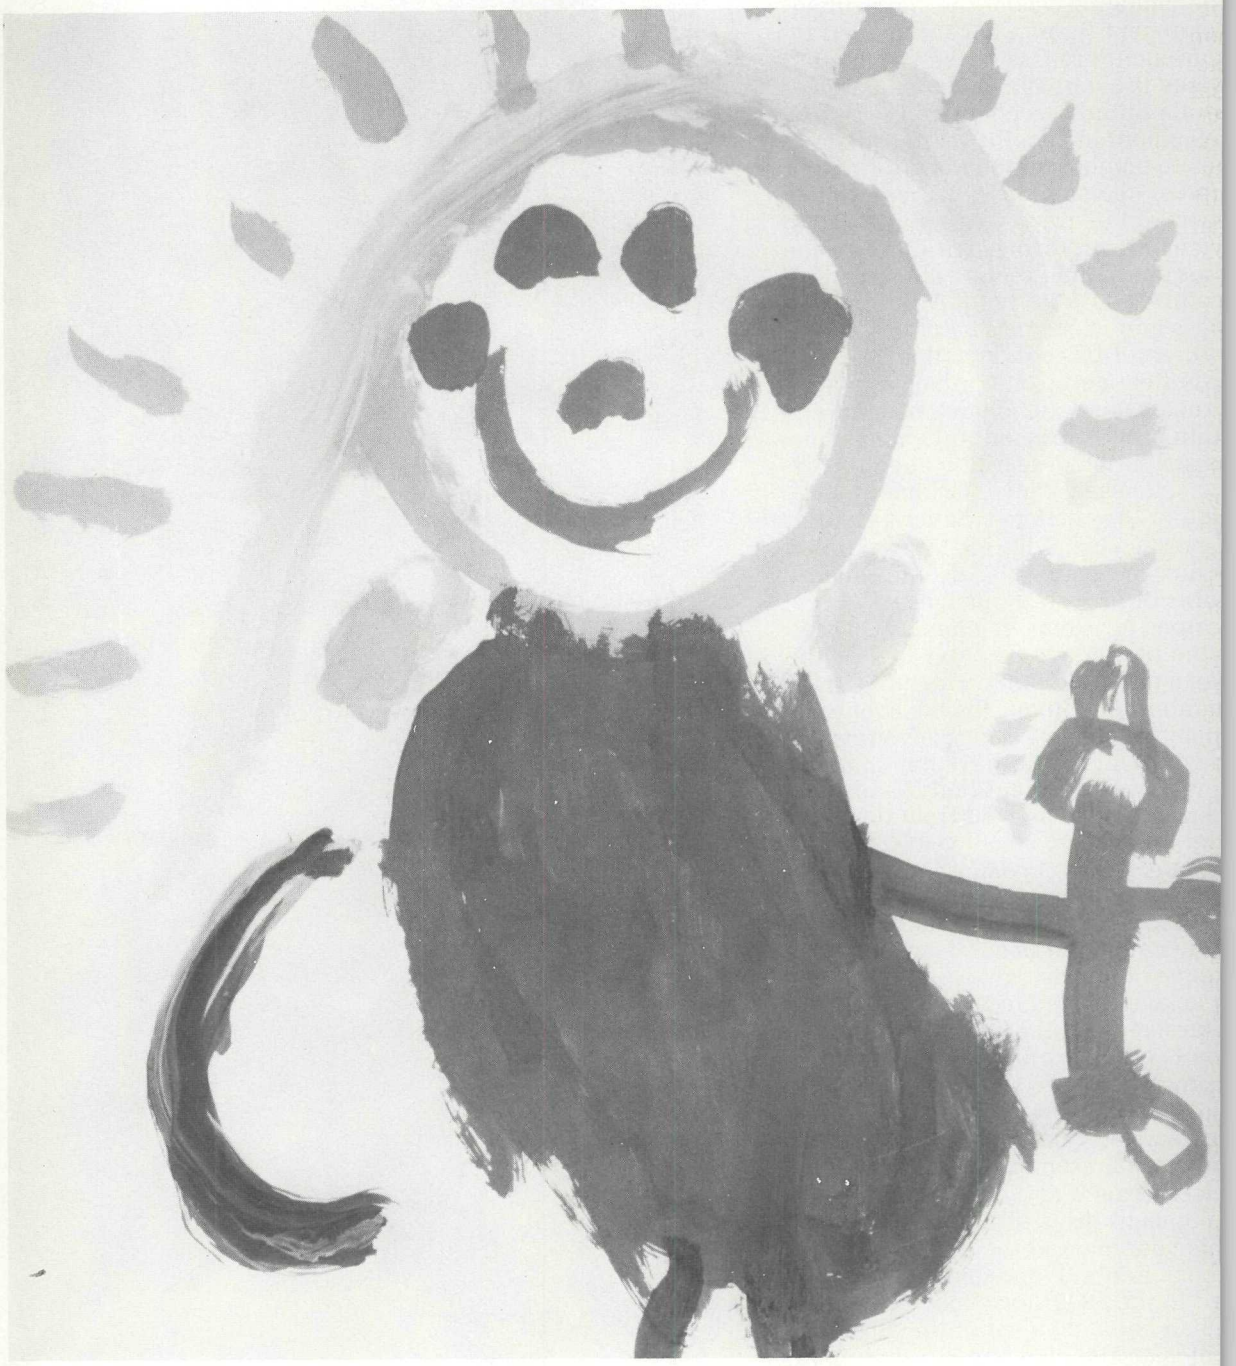
vices Branch and the Curriculum
elopment Branch.
his year marked the end of the
book Rental Plan which was intro-
ed in the 1949/50 school year. The
had been changed in the 1972/73
ol year allowing Grade VII students
ave access to prescribed texts without
payment of a fee. With the commence-
t of this school year all students from
ergarten to Grade XII have access to
scribed texts in the schools without
payment of a rental fee.
rchasing of learning aids during the
resulted in the payment of invoices
unting to $8,027,359.



VISION OF FIELD PERSONNEL

he Field Personnel Division has major onsibility for a number of areas ial to the effective operation of the cational system in the Province: the ervision of district-wide administra- personnel; supervision of the regu- y and professional phases of teacher ifications; leadership in strengthening cational goals at the district level and valuating instructional programs in Province's schools, and liaison with l personnel authorities outside the vince.

serious loss was suffered by the sion of Field Personnel early in the ol year with the death of the Super- ndent of the Division, Mr. W. D. Reid. Reid had been associated with edu- n in British Columbia for 28 years. 964 he joined the headquarters staff e Department, serving in a variety of tions prior to assuming the position of erintendent of Field Personnel in . While serving in this capacity, ral changes took place within the sion, the most significant being an inistrative reorganization that had been initiated at the time of his h.

is reorganization is part of the re- cturing of the entire Department of cation headquarters operation. In an t to improve and increase the ser- s offered to education, several new ions were created in the administra- component of the Field Personnel sion and it is expected they will be l early in the new school year. They de an Assistant Superintendent, a ctor of Field Services, and a Director acher Services, the latter position ying many of the responsibilities of ormer position of Registrar but also onsibility for coordination of pre- ce teacher education and the pro- onal development of educational onnel. In addition to these new posi- at the Department level, three new ict superintendents were appointed in the Field Services Branch and ned to smaller districts that were erly part of dual superintendencies. e appointments are a continuation of rtmental policy of providing im- ed educational leadership to school icts throughout the Province.

e involvement of superintendents to ater degree in decision-making with- e Department was increased with the ion of District Superintendent Advisory Committees. Each division in the Department now has an advisory committee with superintendent representation from each of the six provincial zones. As a result, liaison between the district superintendents and the Department continues to improve.

District superintendents serve on many Provincial committees and also serve on Provincial External Evaluation Teams. This latter work is done in conjunction with the Provincial Accreditation Committee. The Field Personnel Division, as a whole, is also actively involved in plans to implement recommendations made in the Interim Report on the Small Senior Secondary School Study, which recommended that these should be retained and strengthened.

In addition to their regular activities, superintendents attended several conferences during the year. These included zone conferences held twice a year in six locations across the province. These regional conferences provide superintendents with the opportunity to discuss common concerns and also provide various divisions within the Department an opportunity to discuss proposed policy and procedure changes. The regular spring conference for Superintendents, sponsored by the Department, was held in Victoria during the first week in April, and the University of Victoria successfully sponsored its sixth conference for superintendents at Harrison Hot Springs in January.

With additional personnel in both the school districts and Victoria, the scope of work undertaken by the Division will continue to expand. In the coming year, a significant thrust will be made in the area of professional development in an effort to assist the professional growth of educators at all levels in the British Columbia school system.

IVISION OF EDUCATIONAL ROGRAMS-SCHOOLS

The most significant features of the 74/75 school year were essentially a nbination of extensions and refine-nts of many of the activities which re initiated during the previous year. Continuation of the Department's re-anization produced internal changes hin the Division of Educational grams—Schools, most of which have en mentioned in earlier pages. The dio-Visual Services Branch and the rriculum Resources Branch became t of the new Division of Communica-ns. An exchange of personnel took ce between this Division and the ision of Field Personnel with the con-tative staff for the home economics l vocational-industrial education areas ning into Educational Programs and the cher Certification Section moving into ld Personnel. The Learning Assess-nt Program assumed many of the re-nsibilities which were part of the ner Research and Standards Branch l also initiated several new directions future programming.

Curriculum decentralization and core riculum were two major topics that tinued to develop throughout the year. orking committee of teachers, trustees Departmental officials developed a of draft regulations for curriculum entralization and this material was culated for reactions among teachers, stees, home and school organizations, versity faculties and other interested ups. The issue of "core curriculum" addressed initially through a two-ek summer workshop designed to elop possible strategies for defining basic core program. Again, trustees teachers were the main participants he working group which was directed Dr. Ian Housego of the University of ish Columbia.

ormation of the Joint Committee on luation represented another signifi-t effort to involve principal interest s in the educational community in a perative approach to a major under-ng. Points-of-view of trustees, chers, universities, superintendents Departmental personnel were ught together in the prime task of ntifying policy needs in the area of vincial learning assessment and evalu-n, as well as in working closely with Management Committee of the guage B.C. Project.

upport for French language programming continued its growth as a result of Provincial and Federal-Provincial endeavours. The Department's French Program Coordinator and his representative provided direct consultative assistance to 30 school districts. As well, several workshops and conferences were arranged for teachers of French. A remarkable 100 per cent increase occurred in the area of Special Projects Grants with the amount of $900,000 being awarded in this program. A notable increase took place in established French programs at the elementary school level. Thirty Quebec university students were placed as teaching assistants under the Second Language Monitor Program. The Summer Bursary Program provided assistance for over 400 British Columbia teachers. One hundred and fifty grade XII students benefitted from support through the Summer Language Bursary Program. Although no formal summer exchange program operated between Quebec and this Province, 28 British Columbia teachers were given financial assistance to visit the eastern province.

Considerable progress was made in dealing with the issues of sexism, sex-role stereotyping and sex discrimination in the Province. Reva Dexter, the Minister's Special Advisor on Sex Discrimination in Public Education, travelled throughout the Province to communicate with educators and the general public about this vital concern. The Provincial Advisory Committee on Sex Discrimination in Public Education supported Ms. Dexter's work and contributed positively toward the examination of curriculum concerns, the sponsorship of workshops in Trail and North Vancouver and the development of long-range planning for future activities.

Reactions to the draft report of the Special Advisory Committee on Student Records were received from all areas of the Province. The complexity and sensitivity of this topic were under-scored in the responses, and a carefully developed program of modification of present records and procedures will be necessary before effective implementation can take place.

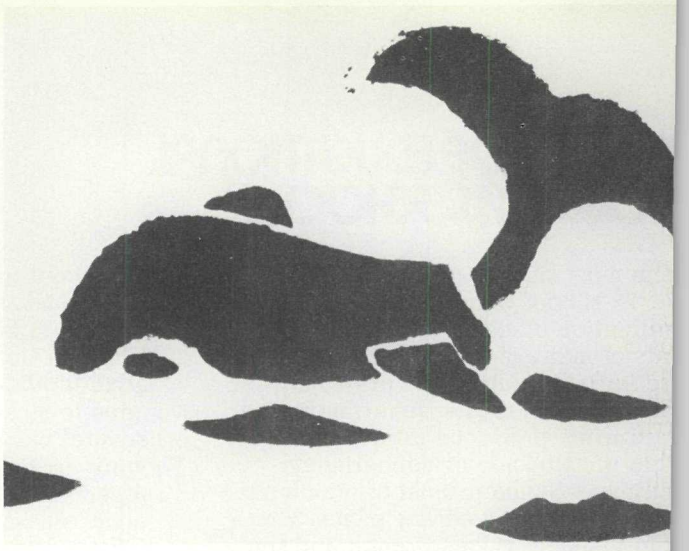
Another endeavour involving Province-wide response was an inquiry into the specific topics of classroom management, school-community relations, learning evaluation and discrimination in public education. A large amount of useful information resulted from school and school district efforts in this project. Conversion of these ideas into some form of resource material for local use at the school and district levels will be a productive culmination to these study activities.

Further efforts towards closer integration and articulation between the program divisions at both the school and post-secondary levels arose from the formation of the Department's Senior Programs Committee. Under the chairmanship of A. E. Soles, Associate Deputy Minister—Educational Programs, this committee met regularly to consider topics which had implications for programming in the total public education system. Senior staff of the Division of Educational Programs—Schools, Educational Programs—Post-Secondary, Integrated and Supportive Services and Communications were involved in the first year of the Senior Programs Committee operations.

EXAMINATIONS BRANCH

The Examinations Branch has responsibilities in two primary areas. It prepares, administers and marks all Province of British Columbia Grade XII Scholarship examinations. It also administers through the community colleges the General Education Development Testing Program and marks all tests pertaining to this program.

During the 1974/75 school year, examinations covering 13 courses were prepared for each of January and June. Once again the French scholarship examination consisted of two papers, a written examination and an oral examination. Candidates were allowed to write the English Composition Qualifying Examination in January and if unsuccessful rewrite it in June.



Scholarship candidates were required to write in at least three senior course specialties in addition to a special qualifying English Composition examination.

A total of 4,723 examination papers were written by candidates in January and these were marked by 104 teachers during weekends at a centre in Burnaby. An additional 5,368 papers written in June were marked by 113 teachers at Victoria in July. Of the 3,918 who applied for the examinations, 1,682 students completed the requirements according to the Scholarship Regulations for 1974/75 and of these 1,051 qualified for awards.

Nona-Lynne Avren, of Brentwood College Secondary School, ranked first in the 1974/75 Province of British Columbia Grade XII Scholarship competition and won the Governor-General's Silver Medal with an average of 94.40 per cent. The Governor-General's Bronze Medal was awarded to Katherine Claire Brown, a student at University Hill Secondary School in Vancouver, who ranked second in the scholarship competition with an average of 93.25 per cent.

During the school year, 4,597 candidates wrote the battery of five standardized tests in the areas of English Composition, English Literature, Social Studies, Sciences and Mathematics in an attempt to qualify for the British Columbia Department of Education Secondary School Equivalency Certificate. Of these candidates, 2,983 qualified.

This program is known as the General Educational Development (GED) Testing Program and is open to British Columbia residents 19 years of age and over. The tests are also administered to members of the Armed Forces based in British Columbia and to the inmates of correctional institutions, Provincial or Federal, located in British Columbia.

British Columbia is a member of the nadian Interprovincial Committee on e General Educational Development ogram. Other members are Nova otia, Prince Edward Island, New unswick, Newfoundland, Manitoba, skatchewan and the Northwest rritories. The Chief Examiner of the sting program for British Columbia sted the other members of the Interovincial Committee at the Second nual Conference in June 1975.

The Examinations Branch has two ditional responsibilities which are ect services to the general public. production of senior secondary school nscripts from the year 1890 to June 73 continues to be a service to memrs of the public who are seeking adssion to post-secondary institutions, for employment purposes, or in many ses to establish proof of birth. During year, 4,504 transcripts were issued. aluation of world-wide secondary hool education is another service dered free of charge to the general blic. During the school year, 249 official aluations were completed.

RRICULUM DEVELOPMENT BRANCH

Traditionally, the Department of ucation, through the Curriculum velopment Branch has exercised preiptive authority in the development of urses in the school curriculum and in selection of textbooks. With the move vards decentralization of authority in rriculum decision-making, the work of Branch has changed. In place of the velopment of specific courses, general ogram guidelines have been prepared use at the local level in the developnt of specific teaching courses. In mony with changing responsibilities in rriculum development, the textbook tem has been modified to provide for a ater degree of choice at the local el of materials to support teaching grams.

The move towards decentralization, a tinuing process over a number of rs, has accelerated during the past r. As a result, there has been a sharply reased demand for Branch assistance he establishment of local program velopment procedures. To meet this nand, the staff of the Branch prepared rogram Development Model applicable ll levels of curriculum development. s model, made available upon request, has been used by the staff of the Branch as a basis of numerous workshop sessions conducted in various parts of the Province.

The professional staff of the Branch is assisted in its work by a number of advisory committees of teachers and other advisors. The extent of this assistance, provided on a voluntary basis, can be illustrated by noting that a total of 22 committees, comprising 206 members, held 210 meetings during the year.

The policy of providing released time for teacher members of these committees was continued.

Grateful acknowledgment is extended to the British Columbia Teachers' Federation and to the three public universities for their co-operation, specifically to those teachers and members of university faculties who served on committees. Particular acknowledgment is extended to the two advisory committees on school curriculum, whose membership includes teachers, principals, university personnel, district superintendents, and representatives of the British Columbia School Trustees Association.

The practice was continued whereby outstanding teachers in the Province are released on loan by boards of school trustees to work with the Curriculum Development Branch. This year's appointees were Mrs. D. Cruchley (Abbotsford), Mr. W. G. Dunlop (North Vancouver) and Mr. J. A. Holm (Kitimat). Mr. Dunlop and Mr. Holm have completed a second year in this capacity. The consultants' enthusiasm and knowledge, combined with their practical experience and professional training, made an invaluable contribution to the work of the Branch.

Services related to curriculum were also provided by the staff of the Curriculum Development Branch. Members participated in national and regional conferences involving curriculum officials from other provinces. In addition, staff of the Branch represented the Department at various teachers' conferences and symposia convened by universities and other organizations for the purpose of discussing educational development and problems.

INDUSTRIAL EDUCATION BRANCH

Industrial education courses taken by students in secondary schools in 1974/75 continued to expand, and the total enrolment for the year was 151,135. This represents an increase of 12.8 per cent over the previous year. For the first time locally-developed courses were included and these have had a significant effect on the total.

The prime function of the Industrial Education Branch is to support the district superintendents of schools in industrial and vocational education programming. The Branch is now processing all industrial and vocational facilities at the design and sketch plan stages. This procedure assists districts in planning effective facilities prior to commencement of working drawings. The Branch is working closely with the Insurance Corporation of British Columbia and the Workers' Compensation Board in developing specifications for Plastics and Industrial Finishes facilities and also for noise abatement and dust removal equipment. These specifications when completed will be available to school districts.

During the 1974/75 school year, 1,177 teachers were employed in industrial education shops, an increase of 6.2 per cent over 1973. A recent survey showed over 10,000 girls enrolled. Surveys also show a requirement for an additional 80 to 100 shop teachers per year for the next five years. These requirements are somewhat dependent upon the facilities being available.

During the year small schools obtained industrial education facilities: Such places as Grassy Plains, Slocan and New Denver are examples. The very small school experiment in Bridge Lake, Horsefly, Anahim Lake, Alexis Creek and Likely was highly successful and plans are being prepared to improve this type of program.

The joint B.C.T.F./Department of Education course writing committee held its second five-day writing session in June 1975. The new revised course outlines should be available to school districts during the 1975/76 school year.

It is now proposed to develop a resource booklet to support the new format of the curriculum outline. This resource booklet, to be developed jointly by the B.C.T.F. and the Department, will contain a sample outline and support materials to assist teachers in planning their own courses.

With respect to in-service training, zone workshops were held concurrently with district or zone professional days. This approach worked extremely well as the agenda for each workshop was determined by the local associations.

Nineteen seventy-five was the most successful year on record for recruiting teachers and although the minimum of 50 persons were enrolled for the sponsored program commencing in September, 1975, 20 have been deferred for entry in September, 1976. Twenty-two persons have been recruited for the regular university program.

A renewed interest has been shown in Programs for Particular Occupations and the Branch is working towards an improved understanding with the Apprenticeship Branch. It would appear that many students would benefit from in-depth study in a program leading to employment. It is expected that throughout the school year 1975/76 there will be developments in this regard.

A Japanese house has been constructed on the campus of the B.C. Vocational School in Burnaby, using Canadian platform frame methods. This house was built by the pre-apprentice carpenters and construction was filmed professionally. The film is currently being shown in Japan as a technical education film for this method of building. The site has been landscaped and Japanese visitors are viewing the house on a regular basis. A training program sponsored by the Japanese for Japanese engineers is expected to commence by Christmas.

›ME ECONOMICS BRANCH

During the 1974/75 school year the tal course enrolment in Home Economics d Community Services (excluding ›mmunity Recreation 12) was 105,793, increase of 5,159. The total number of achers of home economics courses in-eased by 66, to a total of 870. The eatest numerical increases in home onomics courses were in Foods and ıtrition 9, Clothing and Textiles 9, ›oking and Food Services 9 and Foods A. There were 1,078 students on the cupational Program who took Home onomics.

Home economics departments were erated in 303 schools, an increase of ven over the previous year.

In addition to regular consultative field rk, the home economics consultants of Home Economics Branch cooperated th the Faculty of Education of the iversity of British Columbia by visiting d advising the home economics gradu-s of the Internship Program in their signed schools.

Under the direction of the Curriculum velopment Branch a committee of me economics teachers and Miss Jean mpbell, Home Economics Consultant, d meetings to review the presently-ed home economics curriculum guides d to begin the development of new, xible guides which list goals and/or rning outcomes of home economics truction.

Most home economics course outlines ner than Cooking and Foods Services 9, ›ds 11, Foods 12A and Foods 12B) have en written with learning outcomes, lls and activities related to girls. In 1974/75 school-year, home economics s not mandatory for girls, and boys ıld elect to take any home economics ırse.

The Home Economics Branch co-erated with School District No. 27 riboo-Chilcotin) in the development of pilot project in junior secondary ıcation in five rural schools.

RNING ASSESSMENT PROGRAMS

ollowing the establishment of the rning Assessment Branch, work com-nced on the development of a vincial learning assessment program the Province. A Joint Committee on luation was formed to consider the elopment of a long-range assessment program and a series of proposals was developed and presented to the Minister for consideration. The proposed program as discussed by the Joint Committee was designed to provide credible information describing the extent to which the performance of groups of students meets the desired goals and objectives of the public school system. The basic purpose of the program was to facilitate educational decision-making in areas such as curriculum development, fiscal management, teacher education and research.

Concurrent with these discussions, the Branch assumed direction of a pilot study in the Language Arts. This work was undertaken in collaboration with the Faculty of Education, University of Victoria, the B.C.T.F. and the two revision committees responsible for the elementary and secondary Language Arts/English curriculum. Experience gained in conducting this pilot study will be applied to future assessments in other areas of the curriculum.

The Language Arts study was conducted in two stages. In the first stage a series of questionnaires was mailed to over 9,000 teachers of Language Arts/English in Grades K, I, III, VII, VIII, XI and XII. These questionnaires were designed to gather information on the desirable goals and objectives of a Language Arts/English program as well as to obtain detailed data on methods and materials currently in use. The first phase of the study also included the design of a questionnaire which was sent to every school trustee in the Province in an effort to secure input from the public sector on the goals and objectives of Language Arts. In the second phase of the study, samples of Grade IV students across the Province were assessed on a series of reading objectives. Samples of Grade VIII and XII students were assessed in written composition.

The Branch continued to provide consultative services to schools and districts by way of periodic in-service sessions. It also continued to supply published tests to districts, although starting this year, the Branch supplied only those tests developed in British Columbia. Districts have been asked to contact publishers directly for nationally-published tests. Other activities included work on a revised system of pupil records as well as a joint study with the Department of Health.

IVISION OF EDUCATIONAL ROGRAMS-POST-SECONDARY

During the 1974/75 school year a mber of very significant events in the a of post-secondary education oc- red. These included the publishing of major studies on colleges, the form- on of four new colleges, and appoint- nts of senior personnel concerned with st-secondary education.

The College Task Force, chaired by . Hazel L'Estrange, published its final ort entitled "Towards the Learning mmunity" in August, 1974. The report tained many recommendations, some plemented during the course of the r and others still under study. A study he provision of post-secondary edu- ion in the Lower Mainland was com- ted by a committee chaired by nard Marsh. This report, "A Learning mmunity for the Lower Mainland", tained a series of recommendations the coordination of services in the ater Vancouver area.

As the school year ended, four new leges were formed, as recommended the College Task Force, and they were expected to open their doors in tember, 1975. They are located in the t Kootenays, the Northeast, the thwest, and Northern Vancouver nd areas.

Another significant development was formation of the Universities Council er a provision of the Universities Act. W. M. Armstrong was appointed irman of the Council.

pproval was given for the establish- t of a marine college following the mmendation of an advisory committee marine training. The primary function e college will be to provide training ships' officers and crews for the grow- maritime industry on the West Coast. uring the year, the Government ed to purchase Notre Dame versity in Nelson. Dr. Walter dwick, of the University of B.C. under auspices of the Universities Council, been conducting a study on the future of the University.

Mr. H. E. Justesen assumed the position of Superintendent of Educational Programs—Post-Secondary in January, 1975. Two new university presidents were appointed: Dr. Douglas Kenny at the University of British Columbia and Dr. Howard Petch at the University of Victoria. Three new college principals were appointed: Dr. Larry J. Blake, Fraser Valley College; Mr. Peter Spratt, Capilano College; Mr. R. R. Jeffels, Okanagan College. Mr. Gordon Thom was appointed Principal of the British Columbia Institute of Technology.

The Division has continued to work with other departments of Government in planning and coordinating training and services. During the past year, the Ministers of Education and Labour Joint Coordinating Committee was appointed and began its work on program planning and coordination. Close liaison was maintained with Canada Manpower and the British Columbia Medical Centre.

Construction of core facilities for the colleges and the British Columbia Institute of Technology continued. The multi-discipline building at the British Columbia Vocational School—Burnaby was near completion by the end of the school year. The former Willingdon School was assigned to B.C.I.T. as instructional space. The Government purchased Brentwood House in Burnaby to provide accommodation for students at B.C.I.T. and at B.C.V.S.—Burnaby. Major campus construction projects are under way at Malaspina College and at the College of New Caledonia.

Enrolments in all areas of post-secondary education showed sharp increases, both full-time and part-time. Overall university enrolment increased 11 per cent with part-time enrolment increasing by 34 per cent. College overall enrolment increased 25 per cent over the previous year. Full-time and part-time enrolments increased 18 per cent and 34 per cent respectively. Vocational program enrolments increased by 14,331, or 36 per cent. Enrolment details are shown in the statistical tables.

Continuing education offerings expanded during the past year. Academic upgrading, vocational upgrading, and personal development courses were among the most popular offerings. Enrolment details for continuing education are also shown in the statistical tables.

/ISION OF INTEGRATED D SUPPORTIVE SERVICES

ɔr two years the former Division of cial Services has been called the sion of Integrated and Supportive ices. The change of name reflects the ıge in philosophy. Where once dren were segregated because of cial needs", school districts are now e process of integrating all but the severely impaired into regular ols and classes under a joint support em provided by several Departments vernment and by private agencies. ıder the authority of Section 180 of Public Schools Act, this Division oves and supports large numbers of programs deemed necessary by the ɔus boards of school trustees in their ere endeavour to meet the educa- l needs of every child in the ince appropriately.

rther responsibilities of the Division he programs set out under Section 20 e Public Schools Act; the health ces provided through boards of ol trustees; programs jointly de- ed to the handicapped by the ırtment of Education and other rtments of government; Jericho Hill ols for the Deaf and Blind; Corres- ence Education for school age ren and adults; Indian Education; ent Financial Aid for Post-Secondary ents and the Young Voyageur ams.

ring the 1974/75 school year, 1,841 ɔvals were granted. One thousand ıundred and two of these were for ning Assistance Programs, granted rding to a formula which allows ɔl districts to deploy additional re- ces in ways specifically designed to the needs of children with learning ilities within that district. Approvals ɔecific Programs are based upon fic need. Six hundred and thirty- approvals were made for very fic groups of students, the trainable ally retarded, the communicatively red (hearing, sight, speech), non- sh speaking children, hospital nts, those taking home instruction, hose in detention homes. A growth per cent in Specific Programs ates the growing success of school cts in identifying and meeting the s of special groups.

Early in the spring Department of Education funding proposals were consolidated into one booklet called Guidelines for 1975. Each school district in the Province was given the opportunity of meeting, at first regionally and then, in as many cases as possible, individually, with representatives of the Department to discuss these Guidelines. More importantly, the ground work was laid for the provision of a planning and coordinating capacity for supportive and integrated programs in each school district. Using the staff involved in this capacity, school districts have been invited to form local Children's Committees (local advisory committees) to various departments of government. Plans have been made for the examination at the local level by representatives of parents, special groups, teachers, trustees, representatives of the Health, Human Resources and Attorney-General's Departments, of the Guidelines of the various departments. Through this involvement it is expected that there will be a wide spread knowledge of what is available now, and that the government will be informed as to what appears to be necessary at the local levels to achieve the ideals of the Minister's White Paper. Above all, the interdisciplinary cooperation so necessary may be furthered.

This school year saw a definite gain in the integration of many services to children with problems and the ground work was laid for an even more pronounced gain in this area. At the preschool level the legislation governing the Community Care Facilities Licensing Board was changed. The Board was separated into two components, one of which oversees the facilities and programs for pre-school children and one which oversees those for adults. The Department of Health, Department of Human Resources and the Department of Education are represented on the Boards by officials of the respective departments and by lay people appointed by the respective Ministers. It is anticipated that one of the major functions of the Child Care Board will be to increase the intensity of services available at the earliest possible moment to "at-risk" children and the families.

The Department of Health made available to schools the results of a Developmental Survey of 45 per cent of the children entering schools. Every encouragement was given to school systems to carry out structured screening of Kindergarten and Grade I pupils to discover and remove impediments to learning.

Throughout the year there was also intensive consultation with the Department of Human Resources. That Department's Special Services to Children Guidelines led to a massive involvement in the school districts of workers who provided very individualized programs, mainly social, for children with problems.

The educational aspects of these programs are now the concern of Integrated and Supportive Services. School districts also began to assume the responsibility for the educational component in each of the provincial institutions or in special facilities set up by the Department of Human Resources.

A particularly important aspect of the extension of education to all who can benefit is the plan to provide better services to children in Woodlands and Tranquille. Education's specific programs for the trainable mentally retarded at the local level are relieving the pressure on the institutions and plans are set for further increases in September, 1975. The regulations relating to numbers required in order to conduct classes for children with very specific disabilities have been removed from the Public Schools Act. This makes it possible to set up and fund programs in isolated and rural areas. The services provided by the Department of Human Resources to individual children and their parents have also increased. This enlightened and joint approach makes it possible for children who are mentally retarded to be cared for in their own community rather than in a provincial institution.

The Division also worked closely with the Department of Labour. Initial efforts began this year to integrate the Summer Employment Programs with the Student Financial Aid Programs. As a result of studies carried out this spring there will be a very close liaison between the Summer Employment Programs of next year and the Student Financial Aid Programs.

Variations of the Work Study—Work Experience Programs introduced in September, 1974, by the Department of Labour and the Department of Education were operating in practically all school districts by June, 1975.

The Work Study—Work Experience Program is an excellent and most needed educational strategy for meeting the needs of all students including those with learning disabilities. Plans were made in the spring of 1975 to introduce into many districts by September, 1975, pilot programs specifically designed for such special groups as the mentally retarded. It is anticipated that this is a strategic use which will grow considerably year by year since part of the normalization process is to equip the handicapped to make a living.

Growing out of the Work Study—Work Experience Program is a study of the feasibility of introducing apprenticeship programs into the senior secondary schools. Two pilot programs are planned for September, 1975.

Finally, the year was marked by improved integration of a growing number of Indian children into the public schools system. Addition of home-school coordinators to many elementary schools improved the relationship between the children and the adults who are interested in the betterment of the children.

In January an Advisory Committee to the Minister was set up by the Union of Indian Chiefs and the British Columbia Association of Non-Status Indians under the chairmanship of Robert Sterling. Several information meetings were held. The Committee completed the task of writing the job description for the Director of Indian Education. Thirty-four applications were received for this position and the new Director will be appointed in time for the fall term. Representatives of the Indian Homemakers' Association and the Native Indian Teachers' Association sat as observers during the interviews. An important milestone in January, 1975, was the coming into being of the Nisgha School District. Mr. A. V. MacMillen will be the District Superintendent of Schools. It is likely that this District will have an entirely Indian School Board.

RRESPONDENCE BRANCH

he most complete source of inform-
n concerning correspondence instruc-
as offered by the Department of
cation is contained in the booklet,
rrespondence Education". This booklet
ears in a revised form in July or
ust of each year. The 1974/75 booklet
orth the regulations as they applied
l students aged five to senior citizens,
lar school programs of study, a
g of courses by name and number,
the topical outline for each secondary
ol and special vocational course.
e total number of courses offered in
/75 was 183 divided as follows:
ergarten to Grade VII, 57 courses;
ndary School (Grades VIII to XII),
courses; Special Vocational, 22
ses; and four short free courses. The
se in greatest demand during the
was the Metric System, a subject
national appeal. The metric course
slanted towards adults but was also
ired by several hundred teachers
eference purposes in the classroom.
would be difficult within the scope
annual report to treat all facets of so
an operation in detail. It is proposed
efore to mention adults more par-
arly and to conclude with the usual
stical analysis.

lults first began to be a significant
p in correspondence education at
lose of the Second World War, when
eed or desire for further schooling
me very obvious. Most people were
to study at night only, or in other off-
hours, and correspondence educa-
was an answer. Students included
Canadians who needed a knowledge
glish, industrial workers interested
advancement, partially qualified
ns who wished admission to diploma
degree-granting institutions, and
makers with a desire for more
nal satisfaction or readiness to help
lement the family budget by work-
t that time the Branch pioneered
vocational courses and English for
Canadians.

1963 approximately 50 per cent of
plications for correspondence
es came from adults. The growth of
education in the schools and later
egional colleges has not diminished
ercentage of enrolment.

In the early 1950's the Department of Education began to develop special graduation programs for adults. They differed from the regular school programs by requiring adults to show satisfactory standing in certain key and final year courses. The evaluation of former school records, special 'outside' courses, and other significant experience became a vital part of the placement of these students. The old Registrar's Office assumed this responsibility, particularly when it involved 'outside' documents which came from prospective students and night school directors. Later this responsibility, within the Department of Education, passed principally to the Correspondence Branch. In 1974/75 the office prepared in excess of 1,000 letters of evaluation. While most of these were from students who would enrol for correspondence instruction, a significant number were from persons who wished an 'official' opinion.

Whether the adult has a partial program to complete for graduation or an isolated course for upgrading in a vocation, he is generally in a hurry. The development of adult courses has therefore received close attention in the Branch. By way of illustration, with a Grade VII or VIII background in English, the adult may complete short courses entitled English for Adults 1 and 2, and be ready for Grade XII English. The person with little background in mathematics may move from simple arithmetic to a knowledge of logarithms in one course, namely Industrial Mathematics. The electrical apprentice may take the course, Electricity for the Building Trades, and gain sufficient knowledge to write his theory examination for the Class C Electrical Certificate. The 1974/75 booklet included some 40 courses which could bridge gaps quickly and efficiently for these students.

It is recognized that continuing education is for everyone today. This includes senior citizens. It is not uncommon to have octogenarians take an interest in courses. Some even wish to complete the graduation that was denied earlier. Most however prefer short courses in subjects which interest them. Identified among these subject offerings in 1974/75 were Basic Astronomy, Bookkeeping, Art 10 (Painting for Pleasure), Commercial Art, Creative Writing, British Columbia—Canada's Pacific Province, The Metric System, The Realm of Canada, English for Adults, Dressmaking, Beginner's Language Courses in Latin, Russian, German, Italian and Spanish.

How do adults perform on the basis of correspondence instruction when they work at courses in isolation? There is evidence that adults over age 25 do better than the adults between 19 and 24. Adults over 25 possess more interest, maturity and incentive. The completion rate discrepancy largely disappears when the adult between 19 and 24 is counselled and encouraged by a parent, teacher, or other concerned person. The English courses for New Canadians are good examples of this. The Branch requests the student to name some person, who speaks English, to work with him. This person does not need to be trained. His interest and participation sustain the student and the results are excellent. Many adults prefer correspondence instruction because they can work at their own speed, can refer back to the written theory if they have missed it the first time, and may receive a standing at any time rather than at set times in the year.

The Branch enrolment figures for the year 1974/75 were as follows:

General Enrolment:

	1973/74	1974/75
Grades VIII-XII and Special Vocational Courses	13,313	13,879
Kindergarten	76	93
Grades I-VII (Victoria)	998	1,137
Grades I-VII (Dawson Creek)	169	105
*Total Students	14,556	15,214

Certain groups for whom free instruction was provided:

Inmates of Institutions	587	269
Social Assistance Cases	524	109
Special Illness Cases	342	288
Recent Immigrants	124	113
Needed at Home	8	9
Distance Cases	424	484
	2,009	1,272

The free instruction above represented a waiving of enrolment fees in the amount of $34,389 not including the special free short courses.

*Of the total enrolment 58 per cent were adults (19 years or older).

STUDENT SERVICES BRANCH

Revisions in the student assistance program for the 1974/75 school year enabled students to receive up to $2,900 in grants and loans for each educational year. The first $200 of assessed need ($100 in the case of single-semester applicants) was provided in grant funds. The remaining need was met on a 50 per cent grant, 50 per cent loan basis to a total maximum grant of $1,500 and total loan of $1,400 for a full educational year.

During 1974/75, 70 per cent more grants were authorized than in the previous year. This amounted to just over $10 million. The changes not only assisted more students, but also diminished the loan debt of applicants.

All told there were 16,692 Canada Student Loans valued at $9,824,375, and 14,621 Provincial Grants-in-Aid valued at $10,489,777.

At the same time the Special Assistance Program aided individuals pursuing a post-secondary program of study on a part-time basis. Grants up to and including $250 were provided to assist single parents and applicants from low-income families.

The Student Services Branch administered the distribution of about 850 bursaries in cooperation with the Council of Ministers of Education of Canada. This program provided an opportunity for British Columbians as well as residents of other provinces to participate in linguistic and cultural courses.

The Branch also participated in the Federal-Provincial Bilingual Training Program. Sixty-two British Columbia students received fellowships up to $2,000 each to study in Francophone

ɜtitutions. Funds were also provided British Columbia Francophones to ıdy at French-speaking universities. Teacher Education Incentive Grants ɜre made available to British Columbia ɜidents who were in a position to dertake additional professional studies ıich would permit them to enter the ssroom in September, 1974. These inıtive grants were part of a comprehen-e program mounted to meet the mediate and projected needs for ditional fully-qualified teachers and to prove the overall quality of education the Province.

Three types of Teacher Education ɜentive Grants were Professional fresher Studies Grants, Professional grading Studies Grants, and Internship ɔgram Grants.

ɔUNG VOYAGEUR PROGRAM

Under the sponsorship of the 1974 ung Voyageur Program, 26 groups of ıng people from British Columbia rticipated in exchanges with comnities in other Canadian provinces. ıce it began in 1964, this program has ered a unique blend of educational exriences to secondary school students oughout the Province. In British lumbia, the Young Voyageur Program is ɔrdinated jointly by the Department of ıcation and the Federal Department he Secretary of State. Participants ıerally travelled in groups consisting of 10 boys, 10 girls and two adult group leaders, although some special units had up to 30 participants.

With the highly successful 1974 program behind them, school districts around the Province spent the spring of 1975 planning for exchanges slated to take place after June 30, 1975. It was projected that a total of 54 group leaders and 548 students, most of them in Grade X, would travel from British Columbia. In turn, this Province was preparing to host an equal number of visitors, with the aid of school boards and municipal officials in participating centres. Communities which agreed to host were: Burnaby, Dawson Creek, Fernie, Kamloops, Kelowna, Langley, Maple Ridge, Mission, Nanaimo, North Vancouver, Penticton, Powell River, Quesnel, Richmond, Salmon Arm, Sooke, Surrey, Terrace, Trail, Vancouver (two groups), Vernon, Victoria (two groups), and West Vancouver.

It was planned to include in these 25 exchanges two special integrated projects for able-bodied and disabled young people; two summer study projects involving highly contrasting communities: and four in-school exchanges involving in-depth studies of aspects of the Grade X curriculum.

Our exchanges were to be distributed by province as follows: Quebec, eight groups; Ontario, seven; New Brunswick, three; Newfoundland, two; Nova Scotia, two; Manitoba, two; Alberta, one.

1.6 Changes in Net Enrolment During the School-year, From September to September, and From June to June 118

TABLE 1.1 NET ENROLMENT[1] AND AVERAGE DAILY ATTENDANCE

Enrolment in the public schools rose from 548,999 in June 1974 to 553,991 in June 1975. A 3,705 increase in Kindergarten pupils combined with a 5,576 secondary increase outweighed a Grade I to VII decrease of 4,289.

Type of School	Number of Schools	Net Enrolment of Pupils				Attendance of Pupils	
		Boys	Girls	Total	Per Cent of Total	Mean Daily Attendance	Per Cent of FTE Net Enrolment
Senior secondary	23	11,224	11,377	22,601	4.1	18,237.5	80.69
Secondary	124	54,387	53,657	108,044	19.5	90,940.4	84.17
Junior secondary	125	39,822	37,664	77,486	14.0	68,519.3	88.43

Elementary-junior secondary	55	6,553	6,112	12,665	2.3	11,205.3	90.46
Elementary	1,230	167,947	157,926	325,873	58.8	299,662.8	97.33
Totals	1,573	283,777	270,214	553,991	100.0	494,876.7	92.40

[1] Net enrolment is the total number of students on the register on the first day of school plus new arrivals during the school-year, minus those who transfer to another British Columbia public school or class.

In addition to the number given above, there were enrolled:

Secondary School Correspondence classes, regular students (exclusive of the 1,972 officially registered in other schools)	3,347
In the Elementary School Correspondence classes, regular students	1,186
Under section 20 of the *Public Schools Act,* pupils receiving instruction	149
	4,682

Adult Education

Canadian Vocational Training Program—

TABLE 2.1 DISTRIBUTION OF FULL-TIME EQUIVALENT PROFESSIONAL STAFF AND PUPIL/TEACHER RATIOS* BY TYPE OF SCHOOL

The number of teachers employed in the different types of schools and the average number of pupils per teacher are shown in the following table. The over-all pupil/teacher ratio decreased by 1.61 from June 1974 to June 1975. This decrease is somewhat less than the 1.74 decrease experienced between October 1973 and October 1974. The June net enrolment data in the table below are inflated because some students are counted who are not in school in June (i.e., students who graduated in January and students who left the system before June). The pupil/teacher ratios in this table therefore reflect the maximum possible situation where all the *different* students who were ever in the system during the September to June school-year are related to the number of teachers in the system as of June. The pupil/teacher ratios in Table 2.19 reflect more accurately the *actual* enrolment and teacher situations as of October 31.

Type of School	Number of Schools	Supervising Principals	Instructional Staff			Total Professional Staff	Average Number of Pupils per FTE Staff Member		
			Enrolling Divisions	Special Staff	Total Instructors		Enrolling a Division	Instructing	On Total Staff

N=Number of full-time teachers from that jurisdiction who hold the type of certificate shown expressed as a percentage of:

A—Percentage of teachers from that jurisdiction holding *all types* of certificates.

B—Percentage of teachers from *all jurisdictions* holding that type of certificate.

C—Percentage of teachers from *all jurisdictions* holding all types of certificates.

[1] Including Professional Advanced, Professional Basic, and Professional C Certificates.

[2] Including Elementary A Certificates.

[3] Including Elementary B Certificates.

[4] Including 25 Vocational Instructor's Certificates.

[5] Including 23 Vocational Instructor's Certificates and 18 Instructor's Diplomas.

NOTES—

Calculation of FTE pupils: Each Grade I through XII pupil is counted as 1.0; each Kindergarten pupil is counted as 0.5.

Calculation of FTE teachers: Part-time as well as full-time teachers are counted. Each part-time teacher is counted according to the appropriate decimal fraction of full time (i.e., a half-time teacher is counted as 0.5). All district-wide (i.e., directors of instruction, supervisors, teacher consultants, co-ordinators, district librarians, district counsellors, relieving teachers, etc.) as well as school-attached teachers (i.e., principals, vice-principals, department heads, librarians, counsellors, regular classroom teachers, etc.) are counted.

[1] Average daily attendance as a percentage of FTE net enrolment.

[2] The total expenditure for public schools was borne by the Government.

[3] Excluding unknown expenditure made for incidental expenses in city school districts.

[4] Since 1922/23 this amount includes the annual grant from the Government to the Provincial universities and since 1963/64 to school district and regional colleges.

[5] Since 1955/56 this amount is exclusive of capital expenditures from by-law funds.

[6] The numbers of teachers reported from 1966/67 on include district-wide teachers with supervisory and administrative duties. These district-wide teachers were *excluded* from this table prior to 1966/67.

TABLE 3.2 EXPENDITURE FOR EDUCATION, CALENDAR YEAR 1974

(Exclusive of Capital Expenditure for By-law Funds)

		$	$
Total expenditure by school districts (including colleges)			636,974,993
Add Department of Education expenditure for administration, correspondence schools, Teachers' Pension Fund, free textbooks and maps, insurance, adult education, vocational and technical schools, grants to colleges, universities, and school districts, etc.		557,687,764	
Less Government grants to school districts included in school district expenditure:	$		
Direct grants	275,497,984		
Grants to reduce local taxation	86,288,731		
Total Government grants to school districts		361,786,715	
			195,901,049
Gross total other Department of Education expenditures			832,876,042

TABLE 3.3 COST PER PUPIL, CALENDAR YEAR 1974

	$	$
Grand total cost of education		832,876,042
Deduct school district expenditure not affecting pupil cost:		
Colleges and other nonoperating expenditures	49,400,214	
Debt charges	60,854,941	
Current nonshareable capital	5,803,674	
Total school district reduction	116,058,829	
Department of Education expenditures for post-secondary and adult education, correspondence schools, technical and vocational schools, grants to colleges not included in school district deduction, universities, etc.	165,169,333	
		281,228,162
Total operating costs		551,647,880
Operating cost per pupil for year based on daily average attendance of 494,877		1,114.72

5.7	Summary Showing Trends in Adult Enrolment, Number of Classes, Number of Instructors, and Number of School Districts Participating, 1974/75	170
5.8	Classification of Adult Education Courses and Enrolment, for School Districts, 1974/75	171

TABLE 5.1 DEGREE ENROLMENT[1] IN BRITISH COLUMBIA UNIVERSITIES, 1974/75

Degree Enrolment	University				Total
	British Columbia	Victoria	Simon Fraser[2]	Notre Dame	
Full time—					
Undergraduate	17,474	4,975	4,843	353	27,645
Graduate	2,038	241	601	------	2,880
Totals	19,512	5,216	5,444	353	30,525
Part time—					
Graduate	628	241	206	------	1,075
On campus	3,086	1,174	1,608	78	5,946
Off campus	587	337	------	73	997
Correspondence	551	------	------	------	551
Summer Session, 1974	3,723	1,699	([3])	126	5,548
Interim Session	1,269	------	------	54	1,323
Totals	9,844	3,451	1,814	331	15,440
Grand totals	29,356	8,667	7,258	684	45,965

NOTES—

[1] Excludes those enrolled in noncredit and other courses not leading toward a university degree.

[2] Simon Fraser undergraduate enrolments are based on the sum of the enrolments for all three terms divided by 2; graduate enrolments are based on the sum of the enrolments for all three terms divided by 3. In previous years, Annual Report data included nondegree students at Simon Fraser; this year, all nondegree students are excluded.

[3] Simon Fraser Summer Session included in "full time" and "part time".

Source: Departmental Annual Report forms. Data reported as at December 31, except for SFU; SFU data reported as at October 15, February 15, and June 15.
