THE CRESTON REVIEW

Vol. XXV — CRESTON, B. C., FRIDAY, JUNE 29, 1934 — No. 14

Lands Minister Visits District

Meets Settlers' Committee and Discusses Lister Land Settlement Matters, Water Included —Sees Village Council.

Hon. A. Wells Gray, minister of lands, who has just completed a tour of the Kootenays, was a visitor at Creston on Saturday, and in company with Frank Putham, M.P.P., made an inspection of the Lister area and had a meeting with members of the settlers' committee, at which land settlement problems were discussed. F llowing the conference at Lister, the minister met the village council in committee of the whole at the town hall, where the validity of the proposed curfew law was informally talked over.

After seeing most of the settlement Messrs. Gray and Putnam had long talks with Frank Baker and John Bird, representing the settlers' committee, who submitted a resolution passed by the settlers more than a year ago, in which a new deal for the soldier farmers is outlined.

The resolution asks that there be a sharp reduction on land prices on the holdings of the original first settlers and like consideration for later comers as w ll as prospective buyers. In connection with the domestic water system installed about four years ago at a cost of $65,000 a very substantial cut is asked.

It was also pointed out to the minister that the water supply could be increased at little extra cost and it is likely the comptroller of water rights or one of his staff will investigate this feature. On the other matters referred to Hon. Mr. Gray made no promises other than that the matter would have prompt attention.

In connection with the curfew law. Hon. Mr. Gray, who is also minister of municipal affairs, was doubtful as to the village having power to enforce a curfew law, but he observed that as the town had a bell it might not be a bad plan to ring it every night so that the parents would know it was nine o'clock and, doubtless, if they were interested in their children they would see to it that they were off the streets. If the parents were not interested the visitor could not see the wisdom of the council proceeding to gather in the children and jailing them, even temporarily.

During his stay Hon. Mr. Gray found time to take a look over Creston's new hospital and stated the building and equipment was the equal of anything in B.C.—even in places much larger than Creston.

Alice Siding

Jack Barraclough is at present employed at the Winlaw sawmill at Wynndel, scaling logs.

Mrs. John Miller, jr., underwent a minor operation in Cranbrook hospital one day last week.

Walter Johnson reports seeing a bear in the act of polishing off a fawn it had caught in the neighborhood of his ranch one day last week.

A baseball benefit dance was held at the Constable barn Friday night. Music was by Mrs. E. Constable, Bob Marshall anp Mr. Hovermann.

School closed at the first of the week so that Mr. Freney could preside at the high school entrance examinations now under way at Wynndel.

Inspector Manning of Cranbrook made an official visit at Alice Siding school at the end of the week in connection with Grade 8 examination matters.

Two pupils from Alice Siding school are at Creston this week writing on the Grade 8 promotion examinations. They are Elsie Mather and Gordon Smith

Jack Barraclough had the bad luck to lose one of his horses last week. It fell into the cellar of an abandoned shack near the old Wigen mill and strangled to death.

Fernie Free Press: The engagement of Miss Thalia Perry, daughter of Mr. and Mrs. Fred Perry, to Mr. Robert Moore of Fernie, has been announced. The marriage will take place early in July.

Alice Siding ran into another beating in the league baseball game on Sunday, when the locals stacked up against Creston Intermediates The score was 13-10, and Alice Siding battery was Martin and Collis, Martell.

Wynndel

Geo. Leach of Spokane is renewing acquaintances in the district.

Warren Hook of Spokane is holidaying with his grandmother, Mrs. Grady.

Mrs. Rollick of Blake is here on a visit with her parents. Mr. and Mrs. Glasier.

Raspberry shipping has commenced Strawberries will be moving for another week.

Constables Hassard and Cartmel of Creston were here on official business during the past week.

A representative of the Sinclair hardware store, Creston, was here demonstrating an electric cleaner.

Irwin Davis of Trail was an auto visitor, returning with Mrs. Davis, who has been here for the berry season.

C. Barclay, who has been visiting with Mr. and Mrs. A. Glasier, returned to his home at Ione, Wash., last week.

Inspector Manning was a visitor here last week arranging for the departmental Grade 8 promotion examinations.

C. O. Rodgers of Creston was a business visitor here one day last week and inspected the Winlaw sawmill operations.

The Rodgers box factory truck was delivering additional supplies of strawberry crates in this section at the end of the week.

Father Patterson, principal of the Kootenay Indian reserve school, Cranbrook, was an auto visitor on Saturday—saying Mass for those in the teepees on Wigen point.

D Benedetti, Buster Martell and Bill Martin had places on Alice Siding baseball team in the league game with Creston Intermediates at Creston on Sunday. Intermediates won 13-10.

The high school entrance examinations commenced here Wednesday morning and will conclude today, with Principal Freney of Alice Siding presiding. There are three Wynndel pupils writing, Clara Wittman, Inith Wood and Allan Cooper Sirdar has five, George Bleumenauer, Alfred Bysouth, Charles Lombardo, James Rogers, Joe Talarico.

Lister

The first cut of alfalfa is now under cover and has been put up in first class shape. A number of new hay sheds have been built to accommodate an increased tonnage.

School will close today lor the long summer vacation. From present appearances the teaching staffs here and at Huscroft will be the same when school reopens September 4th.

John Finlay, who has been at Greenwood for the past two months. returned on Saturday. He says the mining boom has flattened out considerably and he doesn't look for a revival until fall.

Lister school has two pupils writing at Canyon this week for high school entrance. They are Jean Donaldson and Douglas Sinclair. From Huscroft there is but one candidate, Rannie Smith.

R. Stevens got back at the end of the week from a three weeks' vacation which included an auto trip with his son, Ernest, from Trail to Vancouver and Nanaimo, and his return by bus via Tacoma, Seattle and Spokane.

At the special meeting of the schoo ratepayers on Thursday night those present adopted the suggestion that but one trustee be now elected and the other vacancy will be filled at the annual meeting next month. The choice fell upon Fred Powers, who will serve out Mrs. Jacks' unfinished term. Alf. Wellspring was elected auditor.

Hon. A. Wells Gray, minister of lands, in company with Frank Putnam, M.P.P., were visitors to Lister on Saturday, when they made an inspection of the area and conferred with Frank Baker and John Bird, the two remaining members of the settlers' committee, who discussed with the minister the resolution passed by the committee more than a year ago. While here Hon. Mr. Gray made a call on his old friend, Col. Lister.

Holiday Sports Plans Complete

Starting with Children's Parade at Noon Busy Afternoon Arranged—Water Sports, Too—Baseball Games—Night Dance

Commencing at 12 15 when the children's parade moves off from the town hall, for Exhibition park, at which point the judges will be stationed, and continuing all through the afternoon, Wild Rose Lodge Knights of Pythias assure that there will be something doing all the time in connection with their big programe of sports events at Exhibition park on Monday, July 2nd.

The race list includes events for children from 3 to 14 years of age—for both boys and girls, with attractive prizes in all cases. There will be a tug of war for school teams, and the ladies' nail driving contest. All five teams in the valley will compete in the baseball tournament, in which two games will be played the day previous so as to leave the final and semi-finals for Monday afternoon.

At the swimming pool there will be events for the beginners as well as the more experienced in both diving and swim races. The greasy pole will be a feature of the water sports, which will also include peral diving. Life guards are being provided so that all can compete in safety.

Special attention is being paid the midway for this year, which will include the doll rack, the blanket, ham and novelty booths. The Pythian Sisters will operate refres ment booths on the grounds all day. To the grounds there is an admission of 25 cents, each admission taking a lucky ticket with which the holder may win one of the three cash prizes of $5, $3 and $2, with the drawing to take place at the dance the same evening.

The big day will wind up with a big dance at night, commencing at nine o'clock. The best local music is being secured, and popular prices of admission will prevail—50 cents to gents and 35 cents to ladies. The supper will be cafeteria style and will be in charge of the Pythian Sisters.

The committee in charge of the children's parade are looking for a big entry, especially for the best decorated bicycle The number of bikes being ridden lorally shows a big increase over 1933 and their owners are taking a keen interest in this feature or the parade. For the parade attractive cash prizes are offered for boys and girls' fancy dress and comic costumes, best decorated bicycle, best pet.

With no fall fair or other big day of the sort in prospect a large crowd is looked for. The rains at the middle of the week should put the park in great thape for the big day.

Kitchener

John Nelson has purchased W. Orch ard's Chevrolet truck.

W. R. Cranna was employed last week tarring the roof of the Kitchener Hotel.

Misses Clara Hunt and Hazel McGonegal were Cranbrook visitors over the weekend.

C. H. Robinson of Nelson, fishery inspector, was here on official business, on Thursday.

Gus Johnson has left for Crow's Nest relief camp, where he is taking charge of the rock work.

Clarence Anderson made a trip to Ainsworth last week with some saddle ponies for A. Ragotte.

W. C. Conn, C Hanson and W. R. Cranna were business visitors at Cranbrook over the weekend.

Carl Anderson, who was employed by the Sash & Door Company at New Lake, arrived home on Sunday

Miss May Parsons of Fernie arrived last week, and is employed in the A. G. G Strudwicke general store.

C. Meigs and and J. E. Seaman and son of Spokane were here on a fishing trip at the weekend, guests at the Kitchener Hotel.

G. A. Hunt shipped two carloads of posts, and H. H. Redmile one carload to prairie points. Wesley and Willard Blair are hauling posts by truck for Mr. Hunt.

Mrs. A. Lepage and children, Ronald and Louise, and Mrs. H. H. Redmile were visitors at Cranbrook and Fort Steele over the weekend, returning on Monday.

Mr. and Mrs. S. A. Sorenson and daughter, and Mr. and Mrs Caren and son, of Magrath, Alberta, are here at present, on a visit at the home of Mr. and Mrs. L. Nowlin.

The league baseball game on Sunday between Canyon and Kitchener at Canyon, with Kitchener losing 18-6. Kitchener battery: Bohan, Anderson, Klein, Braiden and Maulin. Canyon: Niblow and Hale.

Mr. and Mrs. B. Johnson and son, Robert, Mr. and Mrs. Chas. Nelson and children, Harold and Laura, were Cranbrook visitors over the wrekend, taking in the Scandanavian picnic on Sunday at the Bluebird Inn, just out of Cranbrook.

The Wildcats of Creston played the Pine Katz at oftball on the local diamond on Friday evening, the former winning 27-24. Cwing to the Pine Katz hurler, Miss Jessie White, beina unable to play that evening, Mrs. Robbins of Creston pitched for Kitchener. with Hazel McGonegal catching. Dot Wightman and Mrs. Levirs were the Creston battery. After the game there was a dance in Hunt's hall, given by the base ball club. A fair crowd attended and the music by Priest's orchestra.

Erickson

J. Murphy, who has been a patient at Cranbrook hospital, arrived home at the first of the week.

Franklin Clark is at Nelson this week for a music examination. He is a pnpil of Miss Olivier, Creston.

Mrs. R. Dodds, who has been spending some months at Cranbrook and Canal Flats, returned home on Thursday.

It is reported that the former H. G. Sherwood ranch in the Connell subdivision has been sold to a Mr. Hailoway of Tomkins, Sask.

Corry Celli, who has been attending high sceool at Vancouver, is here to spend the summer with his parents, Mr. and Mrs. Frank Celli.

After spending a few days of their honeymoon at Erickson Mr. and Mrs. H. R. Fode, nee Leveque, left on Monday for Medicine Hat, Alberta,

Four Grade 8 pupils from Erickson are writing ot the high school entrance examinations at Creston this week. They are Jack Fraser, Peter Heric, Lawrence Leadbetter and Gwen Punnam

Miss Janet, Gray, who accompanied her father, Hon. Wells Gray, minister of lands, on his trip through the Kootenays was a guest of Mrs. F. Putntm on Saturday, while her father was here on official business

Arthur Putnan of Masstown Nova Scotia is a visitor here this week with brothel, Frank. The visitor is accompanied by his son and daugeter-in-law, Mr. and Mrs. Eugene Putnam of Regina, Sask., and their son, Murray.

The tea and sale of home cooking at the home of W. H. Kemp on Wednesday last was a real success. It was under the auspices of Erickson Christ Church Ladies' Guild. The cash iatake was almost $50, and the embroidered spread was won by Mrs. Levirs.

Canyon City

Rev. Lindgren the Swedi h Lutheran pastor of Nelson, held service here on Monday night.

A. D. Pochin of Nelson is here at present looking after the cherry harvest on his Canyon ranch.

Mrs. Messinger is here from Oregon on a visit with her son and daughter-in-law, Mr. and Mrs Glen Messinger.

Miss Nissie McRobb commenced work for the season with Creston Co Operative Fruit Exchange at Creston on Monday.

A. G. Samuelson is at present a patient at Creston hospital, to which ins.itution he was taken on Monday, when he suffer a severe fainting spell.

Arvid Samuelson and his crew of post makers expect to complete their contract this week. They have been working at Wynndel almost all monta.

Strawberries are just about over for this season, and cherry picking is now under way. The heavy rain on Tuesday did some damage by splitting but the loss is not heavy.

Oscar Johnson was here at the weekend on a visit with John Johnson. He has just taken a contract for driving a new tunuel on the Reno mine, which will occupy about five months.

The "juice" was off at the West Kootenay Power & Light Company plant on Thursday last, woen r cerngc over in the voltage was being made to take care of she sub-station just completed at Creston.

Miss T. Walker, R.N. of Carnduff, Sask., is a Canyon visitor with a former classmate, Mrs L. M. Craig, and will be spending the summer here. Miss Walk r is a former resident of Crescon valley, having attended Alice Siding school about 25 years ago,

In connection with the entrance to high school examinations this year three of the Grade 8 pupils at Canyon have been wassed on recomendation. They are, Florence Spencer, Charlie Kolthammer and Merrill Hill. The diploma for proficiency is won by Florence Spencer.

Miss Mary Goodwin, teacher in Division 2 of Canyon school, whose marriage takes place next month, was guest at a social afternoon at t e hall on Tuesday sponsored by the ladies of the community, the feature of which was the presentation of a floor lamp to the popular bride-elect.

Raspberries and Cherries Moving

Strawberries Coming in Limited Quantity with Price Maintained—Cherries in Good Demand —Raspberry Market Fair.

Tuesday's half-inch of rainfall and cooler weather on Wednesday and Thursday will lengthen out the strawberry crop and this fruit will likely be In the shipping list for another week. The demand for "straws" continues strong, and there has been no drop in price. The l.c.l. demand is so good at psesent that Wynndel has eased off on its car shipments.

Raspberries commenced moving in quantity at the first of the week with prices just a little better than strawberries, but the demaud not so keen. While Tuespay's rain will provide soft berries for a day or two the moisture is welcomed by the raspberry growers, as on unirrigated lands the berries were coming in small.

Royal Anne cherries are moving in considerable volume and the Bings will be prominent before the week is out. Selling agencies report a good market to date but the trade is demanding them this year in the oldtime four-basket crate. In 1933 the six pound basket was very popular but, apparently, the novelty has worn off. Cherry growers are congratulating themselves the rain has come so errly in the season, as little or no damage has been done by splitting.

The apple grower is busy with thinning operations. All apples show wonderful size for the end of June, and where spraying has been attended to the crop is clean. Whi'e everyone is hoping that press reports are correct as to Canadian apples having preference on the British market after October 15th, there does not seem to be anything definite on the matter.

The first crop estimate for the year came to hand at the first of the week. It indicates but a slight increase in apples, with crabapples much the same as 1933. Pears are to be 30 per cent. less. Cherries are estimrted to be double, and plums and prunes almost treble last year's shipping.

At the Exchange the new electric pre cooler went into operation at the first of the week and is performing up to expectations. All berriee and cherries are going into it for the extraction of field heat and surplus moisture. The pre cooler came in very useful on Monday when it took care of a surplus of raspberries, which were badly needed on Tuesday, as the rain that day prevented raspberry picking and there were not enough berries to fill orders.

De-Bunking Mysteries

One of the traits which keeps humanity young and adds a zest to the mere act of living, is man's capacity for wonder, his somewhat naive curiosity in freaks, and his enthusiasm for the unusual or phenomenal in nature.

It can scarcely be called a characteristic distinguishing homo sapiens from the beasts of the field or fireside, for the domestic cat or dog (to mention species coming within the range of everyman's experience) shows a strangely similar capacity when confronted with something strange in its immediate environment. By test of paw or teeth, it ascertains whether the new experience is good or bad; just as man will, by more complicated experiments it is true, attempt to rob the mysterious of its mystery.

There is a reason, of course, for this outburst.

Strange, eery aquatic monsters have been sighted in diverse corners of the globe. Reports concerning them have been considered of sufficient interest to warrant publication all over the world. A British Columbia lake provided the first thrill of the present series—a thrill which became familiar in everyone's mouth under the euphonious title "Ogopogo". The ocean, not to be outdone by a mere inland lake, immediately produced another of these strange denizens of remote waters, which, christened "Cadobrosaurus" to fix the credit of its habitat to Vancouver Island, quickly acquired a popular name. As "Cady" it attracted as much attention from reporters and the general public, during its brief occupancy of the spotlight, as have the Quebec quintuplets of more recent and certain origin.

France next came to bat with a claim on behalf of its particular pet, seen as through a glass darkly, but acclaimed a monster, a freak, a lusus naturae, or a throwback. The world was agog with speculation as to what manner of things these visioned creatures were.

The sea serpent of myth and anecdote never attained such repute as the new genera. The sea serpent was too easily explained. It was either a snake which had strayed from its forest lair to essay adventure on the briny deep, or it was the gnarled and twisted trunk of a fair sized sapling which ocean currents indued with similitude of life.

This was less easily explained. Its discoverers, whether in British Columbia, France, Scotland, Brazil or elsewhere—all stressed the fact "Ogopogo", "Cady" or what-have-you, was different! Scientists were interviewed by representatives of the popular press and, in unguarded moments suggested it was a relic of pre-historic times hurtled across the ages, in some inexplicable way, into A.D. 1933 or 34.

It is to be regretted that Scotland should have been visited by one of these unknowns. The hard-headed Scot, on occasions such as the anniversary of Burns, may indeed be prone to vain imaginings and uncanny visions, but in his normal state, he is, essentially, "from Missouri". Loch Lomond, which has induced many poems, caught the fashion. It produced a freak seen from its "bonny banks". But when Loch Ness sought to uphold the dignity of salt-water—that was too much for the practical race north of the Tweed. It (the Loch Ness monster) was photographed—and strange, indeed, it looked! A scientist subjected the picture to piercing scrutiny—and the mystery was gone. It was, in his opinion, the photograph of the fluke of a killer-whale, too modern an animal, foresooth, to be acclaimed in competition with the million year throwbacks which imagination had created.

Until another wave of freak discoveries hit the pages of our newspapers, then, we must content ourselves with Alley Oop's disnosaur as a constant reminder of things that were before man was endowed with his amazing capacity to wonder.

To Explore Ellesmere Island

Oxford University Expedition Is Leaving England In July

Edward Shackleton, son of the late Sir Ernest Shackleton, famous Antarctic explorer, is organizing what will be known as the Oxford University Ellesmere Island expedition, which is to leave England in July aboard a chartered Norwegian sealer. The expedition is receiving the practical support of the Canadian government and the Royal Geographical Society.

Exploration and geographical survey of some of the hitherto completely unknown interior of Ellesmere island, about 600 miles off Canada's Arctic coast, is the object of the expedition, which will be led by Dr. Noel Humphreys.

At a public dinner in London the chairman hoped that "The visitors will carry away with them some interesting souvenirs of their presence this evening."

Queer Thing About Prices

B.C. People Pay As Much For Apples As Londoners

It costs just as much to buy an apple in London or in the Soudan desert as it does in some parts of British Columbia. This is another of those "Believe It or Not" statements but it may be believed because it is absolutely true and the mischief of the situation is that there is no immediate method of remedying it. It does seem absurd that, while apples are grown by the millions in one section of this province, still so far as another section just a few hundred miles distant, is concerned, these apples might as well be grown on the canal riven face of Mars.—Country Life in B.C.

The first pumpkin pies were made by cutting a hole in the pumpkin, extracting the seeds and fibrous matter, stuffing the cavity with apples, spices, sugar and milk, and then baking the whole.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Dr. FOWLER'S EXT-OF WILD STRAWBERRY

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years — you do not experiment when you use it.

Means True Progress

Streamline Train Promises Railroads New Lease Of Life

M. E. Tracy in an article in the New York World-Telegram, says carrying eighty-five passengers together with baggage and express 1,000 miles in thirteen hours and on $17 worth of fuel is something new. It promises the railroads a new lease of life, capital new enterprise and labor new work. Best of all, it promises the traveling public more for its money.

We have needed something of the sort for five years. With all the experimenting little has occurred to thrill people. By and large they have been forced to fall back on the hope that the best which could be done was to rearrange what they had on hand.

Progress, which should be considered as synonymous with prosperity, is not made of that kind of stuff.

We are not going to find better living conditions, much less happiness, by doing what we have always done in a different way. That is where political remedies fail.

Progress is a matter of invention and achievement.

Take this streamline train, for instance, and what does it imply?

It implies the scrapping of billions in rolling stock, the substitution of crude oil for coal, the abandonment of steam locomotives for Diesel engines, a great consumption of aluminum and a reduced consumption of steel, different operating and mechanical methods, the mobilization and training of new crews and a multitude of other drastic readjustments.

LETTER FROM A MAN OF 90

About His Rheumatism

He asks us to excuse his writing. We do more than that—we congratulate him on being able to write at all at his age, especially as he has been suffering from rheumatism. This is what he says in his letter:—

"Three years ago I was in bed for six weeks with inflammatory rheumatism. Since that time I have been taking Kruschen Salts, and have not had another attack. But my hands are still somewhat stiff. I take Kruschen every morning before breakfast, and shall continue to do so, because I am sure it has kept me in good shape for three years. Excuse this writing, as I am ninety years old, and use both hands to write."—J. R. G.

Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also flush these dissolved crystals clean out of the system. Then if you keep up "the little daily dose", excess uric acid will never form again.

An Unusual Hobby

Englishman Has Wonderful Collection Of Match-Box Tops

A nephew of Lord Kitchener of Khartoum, Major Pat A'Beckett, of Ye Old Ploughe Inn, Speen, a Buckinghamshire village, owns the largest collection of match-box tops in the world. He has 22,000 different tops, and they cover every available inch of space on all the walls in three rooms at his home. He has been collecting them for many years, and has travelled almost the world over in search of new designs. He has some of the first match-boxes which came into use, and a history of world progress can be traced in the colorful designs on the match-box covers which form a unique wallpaper at his country inn. A few years ago, ex-King Alphonso, who is also an enthusiastic match-box top collector, paid a visit to Major A'Beckett and spent several hours inspecting his display. But ex-King Alphonso's collection was limited to a mere three thousand!

All the most injurious grasshoppers in Canada shed their skins on an average of five times during the course of their development. The grasshopper's skin does not keep pace with the growth of the insect, so this pest goes through the several processes of moulting by hanging upside down attached by its legs to some support and slowly wriggling out of its old coat.

Ease Pain, Headache in Few Minutes

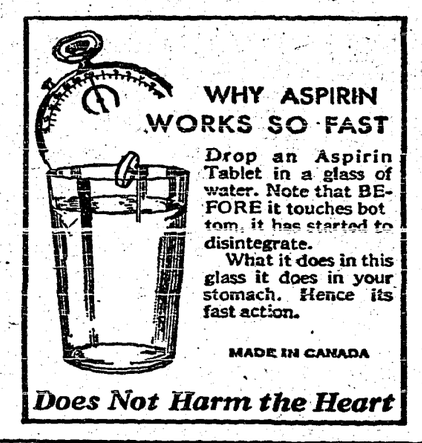
For Quick Relief Say ASPIRIN—*When You Buy*

Now comes *amazingly quick* relief from headaches, rheumatism, neuritis, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And thus is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.



Does Not Harm the Heart

Trying To Solve Puzzle

Scientists At Chicago Seek Reason Why Midgets Do Not Grow

Why is a midget a midget?

Scientists and medical men who have puzzled over this baffling question for years will have an opportunity to pursue their investigation to a fuller extent at the Chicago World's Fair this summer.

Nate T. Eagle, managing director of the new midget city at the fair, has extended an invitation to scientists to use the colony of little people as a "clinic" to study the perplexing problem of why the midget never grew up.

The midget city will occupy the same location as it did last year but will be four times as large. It will be populated by the largest gathering of midgets of both sexes and all ages ever congregated in one place.

Although a midget's size is believed to be due chiefly to glandular disorders, no one has ever answered the question logically and scientifically.

Australian Poet Honored

Bust Placed In Poet's Corner Of Westminster Abbey

Adam Lindsay Gordon, national poet of Australia, who has been honored by his bust being placed in the Poet's Corner of Westminster Abbey, is the first British Dominions poet to be so commemorated, and the first poet so honored since Tennyson, beside whom his bust stands.

A memorial volume by Mayor Douglas Sladden, on whose petition the monument has been erected, has been published, giving the story of Gordon's eventful life, his one love affair, and his tragic death.

Gordon sailed to Australia "in the wild old days" and "became successively a mounted policeman, a horse-backer and trainer, a member of parliament, and the most famous steeple-chase rider Australia has ever known."

He died by his own hand in 1870. Burdened with debts, and depressed by the news that he had lost the case for the recovery of his ancestral lands (as head of the Gordons of Hallhead in Aberdeenshire) he went out into the scrub and shot himself—the day after he had published his last book of poems, "Bush Ballads and Galloping Rhymes."

The average cost of producing hay on the Dominion Experimental Farms in the Prairie Provinces has been $8.99 per acre, or 6.23 per ton for a yield of 1.44 tons per acre. Considerable variation in cost has occurred on different experimental farms, the cost per acre having ranged from $5.03 at Swift Current to $11.19 at Morden, while the cost per ton has varied from $4.47 at Brandon to $8.42 at Indian Head.

X-Ray Motion Pictures

Newly Perfected Camera Shows Bones In Process Of Knitting

Broken bones are now shown in the process of knitting by x-ray motion pictures which are made by a new camera perfected by Doctor Arthur C. Pillsbury, naturalist and photographer of the University of California. Doctor Pillsbury's camera works on the same principle as the one used to photograph the unfolding of flowers, taking a series of single pictures at intervals, of a movement imperceptible to the human eye, and then running them off as motion pictures to show movements which may have taken several days, all encompassed in a few moments. The first motion picture made with the x-ray camera showed the growth in the interior of a rose. It took seventy-two hours to film, as only one picture at a time could be made in intermittent exposures. To avoid damaging the rose during the filming Doctor William D. Coolidge, inventor of the Coolidge tube, designed a special x-ray tube.

British Museum Buys Records

Bible Contains Births Of First Children At Tristan da Cunha

Bible records of the births of the first children at Tristan da Cunha, the lonely little British island of volcanic origin in the south Atlantic, 2,000 miles west of the Cape of Good Hope, have just been purchased by the trustees of the British museum.

This Bible, which is an American one, dated 1831, was in the family of William Glass, the English founder of the Tristan settlement. In now faded ink it records Glass' marriage and the birth of 16 children, from whom many of the 700 islanders today are descended. The latest owner was Mrs. Annie Glass, a granddaughter of William Glass.

"I don't know what to make of the lettuces in my garden," says a correspondent. He had better consult a salad recipe book.

SORDID DETAILS OF CONDITIONS IN SWEATSHOPS

Ottawa.—Sordid details of sweatshop conditions in eight shoe factories in different parts of Quebec were disclosed to the parliamentary mass buying committee. Investigating auditors said they found many breaches of Quebec minimum wage laws and the evidence probably will be passed on for prosecutions.

The committee ventured up another alley—wages paid in factories supplying goods to department stores. The Quebec shoe manufactures were selected from advertisements run by different stores but throughout evidence, went unnamed.

Here were the highlights of one plant:

It has made substantial profits for four years.

The average weekly wage paid women employees in October, 1933, was $8.75.

The average for 172 men was $9.39.

Of the 172 men, 126 were married with 401 dependents.

Eighty-two men received less than $8 a week.

There were two accidents in one week—one operator lost a finger—from the owner of the factory leaning over the shoulders of his workers, shouting at them to speed up their work.

Fifty per cent. of the men and boys in the plant last October received less than the minimum wage set for inexperienced women. (The Quebec law, like Ontario's, does not touch men).

One investigator asked a man how he existed on his wages. The reply was that four families lived in one house. The man himself ate one piece of bread for his lunch.

"But how can these people live," asked Sam Factor, Lib., Toronto. "If I were the executive of a department store I certainly would inquire about such terrible wages."

The auditor told of conditions in another plant where 96 per cent. of the employees were paid below the legal minimum. In one department of 55 girls, only two made the minimum wage and boys received $2.50 and $3 for a week of 52 hours. In this factory, 63 per cent. of the men were paid 10 cents an hour or less.

There was an audible gasp in the committee room when the auditor told of work being done in home by adults and children. About $1.50 would be paid for jobs requiring 10 hours of adult work although it was impossible to say what per centage was done by children.

Another plant, dating back to 1898, discharged women workers who could not earn legal minimums but, on the other hand, paid extremely low wages to men. In the two weeks ending April 28, 1934, the company had 29 men and boys earning less than 10 cents an hour and whose weekly average was $2.85. One-half the men in the plant earned less than $6, the minimum for inexperienced women. The average for all men, excluding foremen, was $6.71 a week and for women, $7.37.

Gold Coinage Disappearing

Premier Bennett Predicts That Gold Redemption Of Currency Will Be Resumed

Ottawa. — Expressing the belief that gold redemption of currency would ultimately be resumed, Premier R. B. Bennett, in the House of Commons, prophesied that gold coinage would disappear.

Gold redemption would be resumed by the nations of the world "since apparently it is the only basis on which we can have any stability," but the redemption would be in bullion, not in coin.

Canadian Cheese Good

Ottawa.—The quality of Canadian cheese in the United Kingdom was so satisfactory that no suggestions were offered by the largest importers on how further improvements could be made, said J. S. Singleton, Dominion dairy commissioner, on his return from London and Liverpool.

W. N. U. 2053

Bumped By Sea Monster

Crew Of Schooner Has Exciting Experience Off Nova Scotia Coast

Yarmouth, N.S.—A night of terror aboard the auxiliary schooner Marjorie E. was described here by fishermen who declared a monster of the sea had almost lifted their vessel out of the water off the Nova Scotia coast.

"It happened Sunday night," related one of the crew. "The night was clear and all of us except the watch were in our bunks.

"Suddenly there was a thundering crash that threw three men from their bunks to the floor. One of them shouted 'We've been rammed—let's get out on deck.'

"Out we scrambled to the moonlit deck and we were amazed to see in the swirling water the huge form of what appeared to be a whale.

"In frisking about the thing probably had risen directly beneath the ship and the force of the impact lifted her almost clear of the water, allowing it to plunge back with terrific force.

"We didn't know what to do, but we started our engines full speed ahead and left the scene in a hurry, you can bet!"

Japan Keeps Plans Secret

No Information Given Out Regarding 1935 Naval Conference

London.—The Japanese have erected a diplomatic fence of secrecy around their plans for the 1935 naval conference despite assurances of the fairest treatment by representatives of Great Britain and the United States.

Tsuneo Matsudaira, Japanese ambassador, declined to tell Norman H. Davis, American representative in preliminary bilateral discussions, what are the present proposals and hopes of the Tokyo government.

After Davis had given Matsudaira an unreserved promise that there will be no sort of Anglo-American understanding against Japan, he questioned the Japanese ambassador regarding his nation's plans.

Deal With Sweepstakes

Informer May Be Unable To Collect Cash If Legislation Changed

Ottawa. — The provision of the criminal code which makes it possible for an informer to sue and obtain the proceeds of a lottery will disappear if the amendment introduced by Hon. Hugh Guthrie, minister of justice, passes the House of Commons.

The bill received first reading without discussion. Instead of the informer being able to obtain the proceeds, the measure provides that they shall be forfeited to the crown.

The amendment does not apply to small raffles and church bazaars in which the amount involved is less than $50.

Second Action Against Rodeo

Tex Austin Is Having His Troubles In England

London. — Troubles continued to pile up for Tex Austin, promoter of "the world's gentlest rodeo."

Already accused of terrifying a steer in violation of laws against cruelty to animals, Austin was notified of a new action against him because he staged a charity performance of his genteel rodeo Sunday.

The new action was instituted by the Lord's Day Observance Society, which seeks to collect $500 from Austin and $1,000 from the National Sporting Club.

United States Buying Silver

Washington. — United States government has extended its new monetary policy into another field with the signature of President Roosevelt of the Pittman silver purchase bill. The measure directs buying of the metal by the treasury until it comprises 25 per cent. of the nation's metallic monetary stock.

Canadian Printing

Ottawa. — The Canadian printing trade employs 32,584 men and women, says the Dominion Bureau of Statistics, and produced $101,492,333 in 1932, $36,312,089 representing daily newspaper output.

WINS IN SASKATCHEWAN

JAMES G. GARDINER
Liberal leader of Saskatchewan, who was returned to power by a sweeping majority.

Saskatchewan Elections

Liberals Returned To Power By A Most Decisive Endorsation

Regina.—The Liberal party under the leadership of James G. Gardiner, were swept back into power in the Saskatchewan elections in a most emphatic manner. With the election of five or six Farmer-Labor candidates, the C.C.F. party will form the only opposition. Not a single Government supporter was elected.

In an interview, Premier-elect Gardiner said the legislature would be assembled as soon as possible. There may be a special session to repeal the School Legislation Act passed by the now-extinct Anderson government.

This legislation, which would automatically come into effect August 1, would place educational matters in the hands of a commission, and "take education out of politics"—as Premier Anderson contended. But it was diametrically opposed to the Liberal policy, said Mr. Gardiner, and he was looking into the legal aspects of the legislation to see if a special session would be necessary to preclude its going into effect.

The campaign had been cleanly fought. The issues were clear and the policy of the Liberal party to enforce economy in administration, effect reconstruction and to improve the trade relations of the Dominion with other countries had been clearly approved.

Better Feeling Towards Canada

Vancouver—Better feeling towards Canada and Canadian products is reported by Col. T. A. Hiam, former assistant to the president, Canadian National Railways, who arrived in Vancouver on the liner Empress of Japan, after what he termed a "scouting" trip to the orient.

Across Atlantic In Yacht

Lone Adventurer Makes Perilous Trip From Ireland

St. John's, Nfld.—A lone adventurer from Great Britain sailed his tiny yacht into harbor after crossing the Atlantic and then tumbled gratefully into bed for his first real sleep in 24 days.

Commander R. B. Graham, R.N., was skipper and crew of the 24-foot yawl on the perilous crossing from Bantry, Ireland. He left there 24 days ago, and though heavy weather beset his little boat at times, made a remarkably fast crossing.

To hear Commander Graham speak sailing across the Atlantic single-handed might be an every-day happening. "Yes," he said, "we had some varied weather, but the boat behaved splendidly."

Nothing worried him on the long trip, he said—except lack of sleep. At night he would turn in after setting a course and lashing the yawl's helm, but his sleep would be interrupted from time to time.

Crop Situation Improves

Dominion Bureau Of Statistics Issues Report For West

Ottawa. — Cereal crops in the prairie provinces were adjusting themselves to the complete change in weather conditions which occurred during the first week in June, and which had continued since that time, stated a crop report issued by the Dominion bureau of statistics.

In some areas, notably the southern portions of the three provinces, drouth, wind and grasshoppers have taken a toll of the crop and even the favorable weather so far experienced in June will not offset damage. In these areas, however, a noticeable improvement has taken place. Grasshoppers have been generally inactive. Crops in northern areas of the three provinces have made steady progress during the past week.

Manitoba prospects range from fair to good except in southern districts, where adverse weather conditions caused serious damage.

British Tariffs Attacked

Rome.—German and Italian delegates to an international wool conference here attacked British Empire tariff preferences and threatened to curtail imports from such wool producing countries as refused to accept German industrial exports while giving preference to those of other countries.

No Answer From Thomas

London.—J. H. Thomas, secretary for Dominions, declined to answer in the House of Commons when a questioner asked if the British government was prepared to "bring pressure" on the Canadian government to implement the Ottawa agreement in respect of the Canadian tariff board.

SPECIAL STAMP COMMEMORATES DISCOVERY OF CANADA

Here is a reproduction of the special stamp to be issued by the Post Office to commemorate the 400th anniversary of the discovery of Canada by Jacques Cartier. The stamp is to be released on July 2nd

HEPBURN TO TAKE OVER REINS OF OFFICE ON JULY 10

Toronto. — Mitchell F. Hepburn, the youngest man to ever gain the premiership of old Ontario, arrived here to build up a Liberal cabinet to take over the reins of government, back in the grasp of the party after a lapse of 29 years.

As the 37-year-old Liberal leader, "tired but happy", rested at his home near St. Thomas after a strenuous campaign climaxed with a smashing victory, discussion of the overwhelming downfall of Conservative representatives turned to eager speculation as to the next steps.

It appeared the new regime, the first Liberal administration since 1905, would not be in office for three weeks, or until about July 10. Premier George S. Henry and his ministers, most of them defeated, will clean up their desks before tendering their resignations to the lieutenant-governor. Mr. Hepburn will complete his cabinet slate and formulate the initial program before taking over.

Date of the advent of beer by the glass; possibility of an early session of the legislature to deal with unemployment and relief, as promised by Mr. Hepburn; the fate of heads of 23 boards and commissions which are to be revised, and like questions occupied the minds of the electorate after their record-breaking turnout.

Atfermath of the Liberal avalanche which swept Conservatives out of every seat west and north of Toronto and took six of Tory Toronto's 13 ridings, were suggestions of recounts in a few seats where the vote was close, and a few unofficial pleas to Conservative headquarters for consideration of a convention to choose a new leader and revise the platform.

Much Depends On Weather

Moist, Warm Days Will Greatly Lessen Grasshopper Menace

Saskatoon. — Extraordinarily early maturity of grasshoppers in Saskatchewan this year may save the crop from late damage by the flying 'hoppers, in the opinion of K. M. King, in charge of the Dominion entomological laboratory here. If warm moist weather prevails, the mature 'hoppers quickly become infested with a disease which carries them off rapidly and the early development this year has pushed forward the mature age of the grasshopper into Saskatchewan's rainy season. Much depends on the weather. Given warmth and moisture the damage to crops by grasshoppers after the flying stage is reached may be much less than last year.

Public Works Program

Federal Government Plans Expenditure Of Forty Million Dollars

Ottawa.—The House of Commons has before it the government's public works construction program involving an expenditure of some $40,000,000 on building operations scattered over the whole Dominion. It is intended to provide employment and stimulate business and industrial recovery. With little discussion the house passed the resolution preliminary to the introduction of the bill to provide for the construction program and gave first reading to the bill.

Bank Bill Approved

Ottawa.—The senate banking and commerce committee passed with two exceptions, the first 87 sections of the banking bill passed by the House of Commons, June 11. Section 53 dealing with annual and special statements of the chartered banks, and section 75, dealing with the business and powers of the banks, were held over for further consideration.

Silver Export Higher

Ottawa.—Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

When away —telephone home

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, JUNE 29

LETTERS TO THE EDITOR

Deserving of Mention

Editor Review:

Sir,—I was among the audience at Mrs. Johnston's recital on June 15th. I notice that mention of one or two items which really seemed to be among the bright spots of the recital, was omited in the write up last werk.

For instance, Marguerite Grant's ability in the way she led the singing. Marguerite is developing an exceptionally rich voice for one so young. At the piano, too, she displayed a nice style, with a delicate touch.

Louise Hare, in her elocution number, was very quaint, and gave a clear picture of her poem. Mention might be made of the flower song, "Saucy Sue"—Louise Hare and Luella Hints acting the parts of the two flowers, "Bachelor Button" and "Daisy," admirably. Edith Johnston, in her reciting of Hans Anderson's "Punchinello," was really clever. Edith told her story with a fine dramatic touch and a good clear voice.

One is impressed by the confident attitude displayed by the youngsters who performed, which shows that Mrs. Johnston has the knack of teaching them to express themselves naturally and with enjoyment, a most essential element in art of any kind. Besides this it is evident that there is a sound knowledge of technique behind the teaching. This technical knowledge is also necessary in art, because the most beautiful idea becomes clumsy, if not expressed with skill.

A SPECTATOR.

Hospital Auxiliary Meets

The June meeting of Creston Hospital Women's Auxiliary was held Thursday afternoon last. Mrs. R. Stevens, president, was in the chair, and 24 members and one visitor were present.

Mrs. C H. Hare, auxiliary representative on the hospital directorate, gave a very satisfactory report. Mrs. W. McL. Cooper and Mrs. F. H. Jackson were appointed visiting commit ee this month The linen committee reporte i a very active month, and were voted power to purchase a further supply of material for making sheets and other things required. It was decided to provide a layette for use in the hospita .

Tickets on a raffle of a quilt and a runner were distributed to the members to sell. A committee consisting of Mrs. G. John, convenor; Mrs. McKenzie, Mrs. A. Davies, Mrs. Archibald, Mrs. Cooper, Mrs. Cherrington, Mrs. Forbes. Mrs. W. L. Bell and Mrs. F. H. Jackson was appointed to undertake the work of making dressings, etc., required for the the hospital.

It was decided to continue the regular monthly meetings during July and August and members reminded that the meeting is on the third Thursday each month.

There are a number of empty sealers now ready at the hospital to be filled, and those who are willing to do so are asked to secure them in preparation for the fruit shower in the fall.

Tea hostesses were Mrs. Watcher, Mrs. Goodwin, Mrs. G Young and Mrs. Allan, with a freewill offering of $2.35.

110-Acre Tract Developing Fast

Connell Subdivision a Coming Erickson Garden Spot—Gets Twelve Properties Under Development Less than 3 Years.

With an abundant irrigation water supply, personal attention to showing and selling, and by giving terms within the ability of individual purchasers to pay, the long idle former Lamont acreage at the east end of the lower Creston-Erickson road, is fast being developed into another of those garden spots for which the Erickson district is well known

The 110 acres embraced in this plot was originally owned by R. Lamont, who later sold to the late Capt. C. O. Peters, who came here from Miami, Fla , who in turn disposed of it in 1932, to the present owner, J. G. Connell, formerly of Lacombe and Chinook, Alberta, who took possession on moving here early in 1931, and promptly styling the property the Connell subdivision.

Selecting as a homesite Blocks 3 4 a d 5 of the property, on which Mr. Connell has erected a fully modern home, with a commanding view of the whole valley, he immediately inaugurated an intensive selling policy and within less than 18 months has disposed of the entire tract with the exception of one Block 18.

And in addition to selling the land, the vendor has been successful in getting it into the hands of purchasers that for the most part, have lost no time in getting on with clearing and planting operations that have already convinced them of the splendid worth of their holdings.

In order to take care of any type of buyer the subdivision was cut up into five and ten acre blocks, and the first buyer was W. A. Spotswood of Los Angeles, Cal., who has sub divided his block and half of it has been taken by T. Baldwin, als of Los Angeles. Mr. Spotswood has since erected a commodious residence on his property.

Reg. Watson, who purchased Block 8, Frank Botterill, Block 9, and Leslie Timmons, Block 10, were the next purchasers. Then came O. Whittacre on the north half of 16; Mrs. A. E. Element of Winnipeg, Man., south half of block 16; R. C. Phillips, Block 13.

A. G. Mensinger, who operated Mensinger Motors at Erickaon the previous three years, could not resist such an opportunity to get back to the land, and he exchanged the motors buildings and equipment with Mr. Connell for Blocks 14 and 15.

J. H. Fish r of Cranbrook took Block 17; H. H. Tooze of Canyon, Block 20; F. Kelly, Block 19. Mr. Tooze later sold to H. G. Sherwood of Seven Persons, Alberta, who this month, resold to Mr. Holloway of Tompkins, Sask.

On the Connell place a young orchard is making a good showing, and on the 22 acre Mensinger place, five of which had been in alfalfa, another promising orchard is on the way. There is also a small but likely looking lot of fruit trees on the Kelly place. Mr. Fisher is getting ready for tree planting as well as having excavating completed and material on the ground for a new house. On the other places the development is equally noticeable. The quantity of trees set out is not so impresseve, but on all of them the stumps and brush are disappearing and attention is being given to primary cultivation.

With a continued development activity on a par with the past two years, it will not be long before this section will be included in any trip taken to show off the valley to visitors.

Sirdar

The Sanca mines truck was at Creston for supplies during the week.

George Everall, timekeeper at the relief camp, is a business visitor at Nelson.

R Stewart was visiting at the home of Ms. and Mrs. Paskoski at Wynndel on Saturday.

Sirdar softball team travelled to Kitchener on Sunday, 17th, and were defeated by a team from Moyie.

Several heavy showers fell at opportune times during the week with great benefit to growing crops.

Sirdar softball team was defe ted by the Knights of Pythias team 23-22 at Creston, Tuesday night last.

F. Hamilton, of the Cauadian Bridge Company, Limited, was a business visitor at Creston during the week.

Miss Gwen and Charles Wilson were visitors at Canyon last Wednesday evening, at the tennis club dance.

George Cam, who is employed by the C.P.R. as switchman at Tadanac, is home, here, to spend a couple of weeks' vacation.

Arthur Speers, Lloyd Couling, Percy Robinson were here from Creston on a fishing trip, Wednesday last. Their luck was indifferent.

R. H. Hassard, provincial police, and W. H. Cartwright, game warden, both of Creston, were here on official business during the week.

A start has been made to put some of the ferries on the slough in readiness for the haying season, which will be somewhat early this fall.

The water, as indicated by the guage at Slough bridge, reads 15.45, a fall for the week of 1.95. Indications are that no further rise need be expected.

Another motor boat is under construction here and is expected to be launched within the week. This is the second craft of the sort to be built here this year.

Jim Pascuzzo, who underwent an operation for appendicits at Cranbrook hospital, is reported as coming along nicely, and is expected home by the end of the week.

Osborne Bell, and party of Creston, were fishing at the mouth of the creeks across the lake. The high winds of the past week have not been favorable to good fishing.

A. E. Whitehouse, the interior department district engineer, was at Kootenay Landing and Atbara during the week, checking the guages, leaving the same day for headquarters at Vancouver.

Canadian Smelters, Limited, have commenced driving a new tunnel at their mine at Sanca. The tunnel is several hundred feet lower than the original one. It is, evidently, the company's intention to pursue a policy of development rather than production for the next two months.

Doug. Corrie and Jim Cherrington were auto visitors to Cranbrook on Tuesday.

FOR SALE — New walnut buffet. Mrs. A. Anderson, Victoria Ave., Creston.

Miss Bessie Matthews of Nelson is a Creston visitor this week, a guest of Mr. and Mrs. Cecil Moore.

Murdoch McLeod, Registered Optometrist of Trail, will be at Fred Klingen smith's, Creston, on Monday, July 2nd.

Mrs. Nelson Ball of Nelson, who is here for the Corrie-Truscott nuptials, Wednesday, is spending a few days with Mrs. H. Truscott.

The Rodgers box factory started the make of raspderry crates and cups on Tuesday. The demand so far indicates a crop on par with 1933.

A last reminder to village property owners that Saturday, 30th, is the last day 1934 taxes can be paid at par. On July 2nd a 15 per cent. penalty is added.

With the raspberry shipping season getting into action Miss Nisie McRobb has resumed her position as stenographer at Creston Co Operative Fruit Exchange.

With the raspberry shipping eason getting under way the eastbound train is running later than ever. It is arriving around 7 a.m. since the middle of the week.

S. G. Clark of Wycli e has joined the office staff at the C. O. Rodgers box factory. He was for years bookkeeper with the Otis Staples Lumber Company at Wycliffe.

The Rodgers box factory completed the make of strawberry crates and hallocks on Monday. The output this year indicates a crop in excess of the early June estimate.

Monday is Dominion Day—a statutory holiday and places of business in town will be closed. At the postoffice the general delivery wicket will be open from 10 to 11 a m.

The Wildcats softball team journeyed to Kitchener Friday night and succeeded in trimming the Pine Katz 29-24. In four games between these teams each have won two contests.

During his visit to town on Saturday Hon. Wells Gray, minister of lands, made an inspection of Creston hospital and pronounced it just about the best small town hospital in all B C.

Miss Sibyl White of Vancouver, who has been attending the meeting of the General Assembly in Toronto, was a visitor here on Monday and spoke at a meeting in the Presbyterian Church that evening. While in Creston she was a guest of Mr. and Mrs. M. J. Boyd.

After a six months' stay at their ranch home on Grandview Heights, Mr. and Mrs. Osborn Brown left at the end of the week for Calgary, Alberta, where they will spend the next few months.

For the K.P. dance in Park pavilion on Monday night the supper will be cafeteria style, in charge of the Pythian Sisters. The admission to the dance is gents 50 cents, ladies 35 cents. Dancing at nine.

Well over half an inch of rain fell in the all day rain of Tuesday. Some damage has been done to the Bing cherries that were ready for picking. The rain saved the day for the raspberries on unirrigated lands.

Creston Intermediates continue to head the valley baseball league handing the Alice Siding nine a 13-10 beating in the game at Exhibition Park Sunday afternoon. In the other league fixture Canyon beat Kitchener 14-6.

The survey of Creston village to prepare detailed plans and secure an estimate of the cost of a sewer system for Creston is under way. W. M. Myers, of the engineering firm of A. H. Green & Co., Nelson, is in charge of the work.

C. B Twigg, district agriculturist, has just issued his first estimate of Creston valley fruit crop, and predicts a yield of apples at 182,000 baxes. A year ago his estimate was 145,000 boxes but the yield in 1933 went to over 180,000 boxes.

Fourteen pupils are writing on the entrance to high school departmental examinations which opened In Creston on Wednesday, with Miss Hazel Hobden supervising. Alice Siding and West Creston have two each, and there are four from Erickson.

R. Hay arrived from Vancouver at the end of the week, and will be in full charge at the Fraser bakery while Mr. and Mrs. Frazer are away on a well deserved two months' vacation. Mrs, Hay accompanies him and they will occupy the Fraser home while here.

East Kootenay C.C.F. workers will convene at Cranbrook on Saturday to choose a candidate to contest this constituency in the next federal election. Two names most prominently mentioned are John F. Murrell of Creston, and Jas. Sims of Cranbrook.

Apropos of the many complaints of stealing cherries from the orchards it should be noted that last week a man was committed and sent to Nelson jail for two weeks hard labor by Magistrate Col. Mallandaine for s ealing cherries from the orchard of Arthur North, Sirdar.

FOR SALE—Kroehler bed davanette upholstered in rose jaquard, good as new; oak centre table, bed complete with mattress and best coil springs; ivory dresser and bedroom table; rocking chair, dining room table, kitchen table and chairs. cotton mattress; Sonora gramaphone and 40 records. Mrs. R. M. Telford, Erickson.

The many friends of Charlie Hanson, the well known wrestler and athlete, will regret to hear that he met his death by drowning at Seattle Tuesday afternoon. Charlie visited his father, W. N Hanson and sister, Miss A. Hanson, at Creston about three weeks ago. He was an exceptionally popu ar athlete, always playing the game, and in addi ion to his ability as a wrestler he was in dem nd as a physical instructor in Seattle, and he will certainly be missed by all admirers of clean sport. He was about 43 years of age. Miss A. Hanson left on Wednesday for Seattle to at end the funeral. The sympathy of the community is extended his father and sister.

Writing High School Entrance

27 Grade 8 Pupils Seek Promotion to High School—Almost as Many Pass on Recommendation—17 at Creston.

The usual midsummer departmental examinations for entrance to high school are under way at the three points in the valley this week, commencing Wednesday and due to close this afternoon.

Due an extention of the system of promoting on recommendation the number writing is less than other years, but 27 being compelled this year to take the written tests.

At Canyon Miss Mary Goodwin is presiding examiner, in charge of seven students, as follows: Huscroft—Randolph Smith. Lister—Jean Donaldson, Douglas Sinclair Ca yon—Cassie Hook, Helen Humble, Tom Tedford, Earl Browell. At Canyon school Principal L. W. Stephens had three passed on recommendation. They are: Florence Syencer, Merrill Hill and Charlie Kolthammer.

At Wynndel Principal Freney of Alice Siding school is in charge of another class of seven They are: Sirdar—George Bleumenaeur, Alfred Bysouth, Charles Lombardo, James Rogers, Joe. Talarico. Wynndel—Allan Cooper. Clara Wittman At Alice Siding Mr Freney had one graduation on recommendation in Hazel Miller.

Miss Hazel Hobden is presiding at Creston with 14 writing. They are: West Creston—Evelyn Jack, Jean Ryckman. Erickson—John Fraser, P ter Heri , Lawrence Leadbetter, Gwen Putnam. Alice Siding—Elsie Mather Gordon Smith. Creston—Gladys Davies, Desmond Truscott, Will Weir, Campbell York. Lorraine Olivier and Beryl Palmer are also writing at Creston but they are doing so with a view to qualifying for t o medals which are given for best showing in he inspectorate and in the province.

Principal Earl Marriott, Creston, as in former years has maintained his excellent reputation for handling Grade 8 students. This year 17 of the 21 pupils taking entrance to high school work have passed on recommendation and with marks that are on a par with other years when the pass list was equally as good.

Truscott--Corrie Nuptials

Another popular Creston young couple were united in marriage on Wednesday evening at the United Church manse, when Rev. Andrew Walker joined in holy wedlock, Miss Margaret Truscott, grand daughter of Mrs. H. Truscott, with Douglass S. Corrie, youngest son of Mr. and Mrs. Archie Corrie of Creston. The ceremomy was witnessed by just relatives and close friends of the contracting parties, and the wedding march was played by Mrs. Nelson Ball of Nelson

The bride wore white Venetian lace with hat and accessories to match and carrled a boquet of white and pink rose buds. and was supported by Miss Fannie Lewis, whose costume was of gr en organdie and white hat, carrying a boquet of red roses. Raymond Truscott was best man.

After the ceremouy the young couple returned to the home of her uncle, P. R. Truscott, where a reception was held and the guests enjoyed a buffet lunch. The groom's gift to the bridesmaid was a white leather purse, and the best man was remembered with a leather initialled belt.

The groom is a member of the firm of Corrie & Sons. and is prominent in athletic circles, particularly basketball, while the bride enjoys an equal popularity, and a host of friends will extend heartiest congratulations for a long and very happy wedded life. Mr. and Mrs. Corrie are to reside at Creston.

Arrow Creek

The strawberry season is at its peak this week.

Mrs. Werre and daughter, Laura, have gone to Alice Siding to pick cherries for her son, Walter.

A party was held at the Bohmer home on Thursday evening. A good time was had by all present.

Mr. and Mrs. Stanton moved to Creston on Saturday, where Mr. Stanton has secured employment.

Ella McKee had the thrill of meeting up with an old bear and two cubs on the east side road one day last week.

Ed. Werre, who has been employed at the Connell Motors at Erickson, moved back to his farm, here, last week.

Mr. and Mrs. B. A. Lloyd of Edmonton, Alberta, were visitors at the Ward home last week, returning on Friday.

WORLD HAPPENINGS BRIEFLY TOLD

Fifty additional constables have been engaged on the Northern Ireland border to cope with cattle smuggling from the Irish Free State.

The Prince of Wales has accepted the presidency of the English-Speaking Union of the British Empire, it was announced in London.

Twelve new warships are to be built for the Polish navy, it was reported at Warsaw. They will be four mine sweepers, two destroyers and six submarines.

What is probably the world's largest modern lathe has just been made at Sheffield for the English Steel Company to admit forgings up to 60 feet in length and 80 inches in diameter.

Once again, the fact that Britain has no intention of handing over Bermuda or any other territory in payment of the war debt to the United States was stated in parliament.

A court-martial found Augustine Waldemaras, former premier of Lithuania, guilty of an attempt to overthrow the existing government, June 7. It condemned him to 12 years at hard labor.

Without fuss or ceremony, the bridge across the second narrows of Burrard inlet, connecting Vancouver with the north shore, was re-opened for traffic after being closed nearly four years.

The birth rate in England and Wales was higher during the first four months of this year than in the same period last year, according to vital statistics made public recently. An increase of 906 births was recorded.

Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

Establish Farm Schools

Prince Of Wales Donates Sum For Child Emigration's Society Plan

The Prince of Wales has donated $5,000 to the Child Emigration Society's scheme for establishment of farm schools in the Dominion for children from Great Britain, including a farm school in British Columbia.

With the support of the prince the society launched a campaign for $500,000 to develop the scheme, which has proved very successful in Western Australia. Children remain at the farm schools five or six years.

Employment in Belgium is now above last year's figures.

Four Trips Each Year

Air Mail Service For Fond du Lac Post Office

Between 8,000 and 10,000 letters from air mail collectors were carried on the inaugural flight June 15 between Fort Chipewyan and the new post office being opened at Fond du Lac, at the eastern end of Lake Athabasca, according to postal officials at Edmonton.

Information from Ottawa shows that the Canadian Airways, Ltd., which has the mail contract, will make four trips a year between the two offices.

Winnipeg Newspaper Union Fashions

By Ruth Rogers

ACTIVE SPORTS AND SPECTATOR SPORTS FROCK

It has a cape that buttons "on".

Plan your summer wardrobe now, while you have the choice of all the lovely cotton frabrics. They reign supreme this season.

A gay stripe in pique made the model for today's pattern. Note in the small view the cape you can button "on" for spectator sports or you can even wear it to town.

Other smart cottons are plaids or stripes in peasant weaves, shirtings, gabardines, woven seersuckers (that need no ironing), eyelet batistes, etc.

Linen, plain tub pastel silks, shirting silks, etc., are other nice mediums.

Style No. 349 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 2⅝ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Journeys In Science

ANAESTHETICS

(By Gordon H. Guest, M.A.)

Acclaimed as "God's greatest mercy brought by man to man", ether was first used in surgical operations nearly 88 years ago. The first demonstration took place in the Massachusetts General hospital at Boston on October 16, 1846, when William T. G. Morton, a young Boston dentist demonstrated that this anaesthetic could be used successfully in the performing of operations. Although Dr. Morton is credited with giving the first demonstration of the use of this anaesthetic before a group of medical men it is understood that a Dr. C. W. Long, of Jefferson, Georgia, had previously used it to some extent in his practice. Following Dr. Morton's demonstration, the use of ether was quickly adopted by medical men on this continent and abroad. This new development brought about a great revolution in surgery and did away with the gruesome scenes which had formerly been associated with operations during which the patient did not lose consciousness.

In 1844 Humphry Davy, the English scientist known throughout the world for his invention of the Davy Safety Lamp, used by miners, did some work with nitrous oxide, better known as laughing gas. This gas proved to be a satisfactory general anaesthetic and is widely used for this purpose.

With the discovery of ether and laughing gas, scientists became interested in this new field and it was not long before chloroform was produced, Dr. James G. Simpson and Thomas Nunnely being outstanding in this work.

Ethelyne is another anaesthetic which was introduced in later years, and which was found to have many advantages for surgical work. Acetylene is also used as an anaesthetic, but is not as common as the others.

In addition to the value of anaesthetics in relieving suffering during operations, they have benefited humanity greatly by making it possible for scientists to study various diseases and to find cures for them. Animals, studied under the influences of anaesthetics have been the objects of many researches which have brought about great benefits to the race.

Care Of Rubber Belting

Vegetable Castor Oil Will Keep It In Good Condition

A cheap and effective method of keeping a rubber belt in condition and to prevent slippage is to apply 20 to 30 drops of vegetable castor oil once a week on a small rubber belt, or about one-fourth to one-half ounce on a main drive belt. Mineral oil of any kind should never be used on rubber belts. Most commercial belt dressings are not suitable for rubber belting and should not be used except on the advice of the belting manufacturer. Rubber belts should be left on the pulleys, day and night, rain or shine.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative systems out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists. 46

New Super-Cunarder

Surprising Details Of Vessel Now Being Built In Clydebank Shipyard

The enormous size of the funnels to be placed on the new super-Cunarder, now designated as the 534 in the Clydebank shipyard, Glasgow, may be visualized when compared with the various tubes and tunnels in operation in New York City. The giant liner's stacks will be in the neighborhood of 100 feet in circumference. The diameter will be approximately 30 feet. Thus it will be greater than any of the following:—Holland Tube, 29 feet 6 inches, Pennsylvania R.R. Tubes, 23 feet; East River Tubes, 23 feet; New York Central Tunnel, 25 feet; Harlem River Tunnel, 15 feet, 9 inches; 60th Street Tunnel, 18 feet.

The forward funnel will be more than 70 feet in height from the boat deck, the two other funnels decreasing in height. From the keel to the top of the forward funnel will be approximately 180 feet, equivalent in height to a building of 15 stories. The final design of the funnels was reached after many demonstrations in a specially constructed wind tunnel. More than 30 model funnels were tested.

A highly important job is taking place in the shipyard in connection with the fitting of the immense rudder. Constructed at Darlington, this rudder weighs nearly 140 tons and is by far the largest ever made. It is at present in the shipyard at Clydebank where expert workmen are engaged in assembling the various component parts. When this job is completed and tests carried out to ensure that every detail in the fitting is perfect, the rudder will be dismantled and transported in sections to the liner's berth where it will be re-assembled and fitted on to the ship.

Other tests which have been carried out include those to determine the design and form of the liner, in which over sixteen models were used and over four thousand experimental runs carried out in the experimental tank; the wind tunnel experiment in which models of 30 funnels were used, to decide the design and shape of the great funnels and to make sure that the decks and ventilators of the ship will be kept clear of funnel gases and the experiment made to ascertain the exact position on the bows of the hawsepipes. For the latter purpose shipwrights erected in the shipyard a wooden replica of the immense bow of Number 534 and with a model of the hawsepipes and another model of the anchors a series of tests were made, perfection in action being finally achieved.

In the series of cabins being constructed ashore for testing purposes, everything that goes into a stateroom in all three classes of accommodation will be given a critical tryout. The rooms will be exact replicas of similar rooms which it is intended to build into the ship.

The designers and furnishing experts will fit out the model rooms down to the last detail. Numerous designs in wall decorations, curtains, carpets, and other hangings will be tried out; furniture, beds, wardrobes, easy chairs, etc., will be installed until the experts are satisfied that the decorative and furnishing schemes provide the maximum of comfort and restfulness.

An important feature will be the demonstrations carried out in regard to the heating, lighting and ventilation of the rooms. Scores of these experiments will be made to make certain that the perfect ease and comfort of the passengers will be assured.

These model cabin experiments are another remarkable instance of the meticulous care and attention which is being paid to the construction of this great ship.

Is Really Resting

The woman who dances on spindly heeled shoes is really resting, the West Virginia Osteopathic Society was told. "When a woman puts on high-heeled slippers and goes out to dance she is giving her feet a beneficial treat," said Dr. H. E. Clybourne, of Columbus, O. "The change to high-heeled slippers changes the muscular pull of all the muscles and gives the feet a rest."

SUNDAY SCHOOL LESSON

JULY 1

AHIJAH AND THE DIVIDED KINGDOM

Golden Text: "Pride goeth before destruction, And a haughty spirit before a fall." Proverbs 16:18.

Lesson: I. Kings 11:26—43:31.

Devotional Reading: Proverbs 1:20-26.

Explanations And Comments

Jeroboam's Rise To Power, 11:26-28. Jeroboam, a young man of the northern tribe of Ephraim, was among the subjects of Solomon engaged in forced labor upon the adornment of Jerusalem, his capital. Solomon observed his efficiency and made him overseer of all the relays of labor furnished by the house of Joseph—the tribes of Ephraim and Manasseh—a position which enabled Jeroboam to stir up his fellow laborers' jealousy of the Southern tribes and hatred of Solomon the oppressor.

Ahijah's Symbolic Act And Its Meaning, 11:29-33. One day, as Jeroboam was leaving Jerusalem, intently thinking, no doubt, of how he would "lift up his hand against the king" (see verses 26, and 37), the prophet Ahijah met him. The latter had come from the sanctuary at Shiloh for this express purpose, evidently. Taking Jeroboam aside into a field where they were alone (compare Samuel's delivery of a similar message to Saul, 13:4-27), Ahijah took hold of the new garment he was wearing and tore it into twelve pieces, ten of which he handed to Jeroboam, saying that the kingdom was to be taken away from King Solomon and Jeroboam should be ruler over ten of the tribes. It was quite customary to enforce important communications by symbolic acts. Compare I. Kings 22:11; Isaiah 20; Jeremiah 19:1-12; Ezekiel 12; Zechariah 11:7, 10, 14.

The Condition To Be Fulfilled, I. King 11:37-39. Ahijah repeated God's promise that Jeroboam should be king over Israel. "The seed fell on prepared soil, and Jeroboam's formed plans would be consolidated and fixed. The scene is like that in which the witches foretell to Macbeth his dignity. Slumbering ambitions are stirred, and a half-inclined will is finally disclosed by this glimpse into the future."

There was, however, a condition to be fulfilled. He would have a "sure house," or long line of descendants upon the throne of Israel, provided he hearkened unto God's commands and kept them as David had done. The condition was not fulfilled, and his house came to an end in the second generation.

When you hear a grasshopper chirp, you can be sure it is warmer than sixty-two degrees Fahrenheit. The insect is silent at colder temperatures.

NEW! No longer a soap! Dissolves instantly.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go a a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earrings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of $1,000. Peter finishes his exhibit ,and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration". Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope".

(Now Go On With The Story)

CHAPTER XLIX.

Peter refused to comply with Camilla's plans that he should come to her apartment for a week of rest, and to get away from his work.

"What's the big idea of that?" he wanted to know. "Nothing for me to do there, and you are away all day."

"But it's a pleasant place to rest and I thought it would be a good change for you."

"Say, I'm no invalid. I have to be busy—doing something. You don't suppose I'm going to wait around for that exhibit prize, expecting to win, do you?" He laughed ironically. "From now on, I am going to accomplish something worthwhile. I already have a standing order from Avis, and I'm going to get to work on it."

At every mention of Avis' name Camilla experienced a shock of pained remembrance and hate. There could be but one explanation of her ready accusation of Camilla after the tragedy. She was trying desperately to separate her from Peter's love. Camilla held fast to the belief that she never could do that, however. Peter was changed, but not because his love for her had changed. It was his work and anxiety and then the final crushing disappointment, that had made him seem distant and gloomy. She only pitied him and yearned to do something for him which would restore him to the normal bonny Peter of the springtime of their love.

His remark about starting work on some sculpture for Avis brought to her mind reluctant visions of their hours of consultation and planning together. Avis would make the most of that opportunity, which was undoubtedly her reason for having Peter do the work. Of course, she was glad for Peter to have a good client like Avis, just now when he needed definite encouragement, she tried to assure herself. But there was no denying the significance of the situation. She tried to appear interested, as she would have been in any other such prospect.

"What kind of things are you doing for her?" she inquired casually.

"I don't know. Some studio stuff for her, and garden pieces for her mother. That is what I've got to get busy and find out. It means that I'll have to go to the Werth's for tea and inspect their gardens with an alert eye to what is lacking in my line, suggest and plan with them. It's a good start, anyway."

He agreed, however, that Camilla's plan for an afternoon and a picnic supper in the woods on Saturday was a jolly idea, and Camilla hoped prayerfully for a glorious autumn day for their first opportunity of the kind in a long time. Providence was kind and provided a perfect atmosphere.

It was the kind of autumn day that had inspired poets to sing of golden sunshine, flaming foliage, nodding gentians—the grand finale of nature's triumphal symphony of the harvest, of another season's work nobly and abundantly completed. It was a day which gave to the soul content, the mind peace and the heart a glowing gratitude for the mere privilege of life. The very air breathed indolently of relaxation after work accomplished, of imminent promise of reward—the very antithesis of the hope and ambition of the springtime.

Peter and Camilla paused in their struggle of doubts and fears and ambitions, and left that world of strife behind them when they boarded a bus for a wooded park ravine outside the city, equipped with only a small compact hamper into which Camilla's skill had stowed all the requirements for a broiled steak dinner.

A considerable walk from the highway tired them just enough to promote that delicious sense of lazy relaxation when they had reached the selected spot and dropped down in a shaded retreat beside a rushing brook. Its busy, gleeful song as the water tumbled over rock barriers and retarding obstacles, undaunted, resolute, toward its destination, seemed to mock their vain and futile questionings of destiny; to chide their restless impatience and petty bickerings. It challenged them to meet life as it followed its course, determined, but merrily, with a song.

Peter stretched his long body on the grass and rested his head in Camilla's lap, while she twined her fingers in the golden waves of his hair and stroked his cheek lovingly.

Dry, colorful leaves rustled in the trees above them or scurried with the wind down the course of the brooks' streambed. At intervals, leaves dropped softly and gracefully from branches overhead, fluttering in lazy spiral curves to join their gleeful companions that danced and rustled on the ground. Birds called cheerful greetings through the foliage, chirped contentedly together; far sounds echoed clearly in the bright, metallic air that was a flood of golden sunlight.

Avis and the perplexing difficulties of life seemed very far away. Even the recent tragedy which had cast so dark a shadow upon their happiness, seemed more remote and inconsequent. Strange that man, heir and lord of so much grandeur and peace that nature provides, should struggle so desperately to add to that heritage the less lovely, grosser possessions of his discontented imagination. But someone started it, so all posterity had to follow; and in the march of centuries, the pace has grown so rapidly that many have forgotten even the object toward which they are pressing on, on.

In that hour of complete surrender to the elemental forces about them, these two minute atoms in the mighty mass of mankind seemed to recapture some of the hope and confidence with which they had begun their life together, a few months earlier. Confidence in each other and in themselves, courage to press on, ultimate promise, beckoned them with new gladness.

"It won't be long now," Peter told her gently, "until I can take care of my girl right. We'll forget all about Paris and perhaps, some day— But that isn't now. I'm going to work like a slave—not on a chance, but with the kind of solid objective that all work should have, and as soon as I have paid my debts and get something ahead we are going to take a house somewhere, in the country or on the lake, where I can work and you can do nothing but plan for us and inspire me. That shouldn't be so very far away, lovable."

"I hope it isn't," Camilla agreed. "By that time, I shall have proved to myself either that I can or can't be a success in my own work, and then I'll be ready to resign and just be Peter Anson's wife."

"And will that be a big enough ambition for you?" he asked anxiously.

"That is my greatest ambition, and it isn't such an idle one as you may think," she laughed.

"My precious!" The declaration reminded her of those early days of their marriage. It didn't seem possible that so many unpleasant and tragic things had happened since then. He continued, quietly. "I guess you're right. It takes a woman with brains and some cleverness to keep a man in line, in step and inspired with the cause; to march forward, show courage, keep faith and win out. But I picked a woman who can do it if anyone can."

"Dear Peter," Camilla laughed fondly, "you could do all that alone, without me; but with love, the adventure will be so much more worth the effort."

"Don't I know it? That is all that makes it mean anything."

They never referred again to the catastrophe of the broken figure, never ventured to guess who might have been responsible. It was so futile, anyway; the thing was done, an irreparable loss. And each of them was reluctant to enter into that hideous void of doubt and accusation and wonder where they had faced each other once for just a few horrible moments. They evaded that experience with dread.

This delightful solitude of shared understanding and faith was so much more in keeping with the beauty of their love, that they kept within its boundaries even as one who drives along a smooth highway without venturing into uncertain by-roads and dangerous places.

Together, they collected dry wood for a crackling, sizzling fire, watched the gray smoke curl upward and the red coals emerge which drew them near the glowing warmth with the early retreat of the sun and the hushed approach of twilight.

Peter broiled the two club steaks on a diminutive grill over the fire, their succulent flavor mingled with the aroma of bubbling coffee, pungent smoke and sharp tang of autumn air. They dined leisurely in the firelight, and turned again reluctantly toward the strife of toil and heartache, building fortunes and dodging traffic that is known as civilization.

(To Be Continued)

HOW TO KEEP COOL

Take an effervescing glass of pleasant-tasting Andrews Liver Salt when you begin to feel the heat. At once you will feel cooler—and you'll stay cooler. Andrews not only quenches thirst, but cools your blood. Taken occasionally—say twice each week—Andrews will keep you fit by purifying your system and insuring regular and *complete* elimination. At all druggists. In tins, 35c and 60c. New, large bottle, 75c. Sole Agents: John A. Huston Co., Ltd., Toronto. 26

Dr. Wernet's Powder For

FALSE TEETH

A Joy To All Users

Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your false teeth all day long. Joyous comfort is yours. Eat anything you want—it holds plates firmly in place—they positively can't slip or slide. Forms protective cushion for sensitive gums. Leaves no colored, gummy substance—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentists. The cost is small—the comfort great. Any druggist.

Will Not Be Exhibited

Inventor Consents To Suppression Of Death Ray Machine

An outstanding invention of the century, a death ray machine, will not be exhibited at the National Inventors' Congress at Omaha, Nebraska, President A. G. Burns, Oakland, Cal., told delegates.

The invention has been suppressed by the United States government, with the consent of the inventor, Burns said. He said the machine, capable of killing birds in flight two blocks away, was perfected by Dr. Antonio Longoria, a Cleveland, Ohio, physician and electrical engineer.

"I witnessed a demonstration of the machine, by invitation in Cleveland last October," Burns said. "It resembles a motion-picture projection machine in appearance. Several government scientists were there.

"Dr. Longoria turned the ray on rabbits, dogs and cats. They fell over, instantly killed, their blood turned to water. The same thing happened to pigeons, unloosed and allowed to fly quite a distance. They fluttered to the ground and were dead when picked up."

Because of its terrible death-dealing possibilities, Dr. Longoria, according to Burns, readily agreed with government representatives that the machine be suppressed.

THE RHYMING OPTIMIST

By Aline Michaelis

LOVE'S CROWN

Nothing of this did you speak, O, my love,
When you came my way;
Only your voice was the voice of a dove
And your words were gay.
Laughter was light upon your lips, and the east
Showed the sky all blue;
Garlands you wove me for life's waiting feast
When I went with you!

Nothing of this, O, my love, did you tell,
And I tremble now;
Strangely the winds to a tempest swell
And the creaking bough
Splinters and falls in the gusts of life
That are swooping down;
Yet, how is it your garlands frail
Have become a crown?

Speedy Rail Service

C.P.R. Provides Faster, More Frequent Service Between Regina And Moose Jaw

The Canadian Pacific has inaugurated a special gas-electric service between Regina and Moose Jaw, making seven trips each way daily except Sunday and four trips on Sundays. In addition, fares have been reduced as follows:—One way $1.25, return $1.85 with special week-end fare of $1.45.

This particularly fast, comfortable service between the two cities should prove very convenient for and popular with the travelling public.

Administering The Law

In Central Park, New York, on a forbidden stretch of turf green in the May morning, some children were playing. Suddenly the law swooped down on them, hawk-like; two cops in a police car, big with duty, turned their car off the driveway swiftly shot it up onto the lawn and right across it to where the children stood. "Get off the grass!" The children ran. The cops backed their car around and scuttled away. Peace settled down again the little prostrate blades of grass struggled slowly back to their feet.

Every year, 9,000 earthquakes shake the earth; the internal pressure is adjusted about once every hour.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

COLIC PAINS Ended!

"If my baby boys were restless with colic," writes a Toronto mother, "I gave them Baby's Own Tablets with wonderful results." Very often the cause of colic is some digestive trouble or constipation. Baby's Own Tablets gently rid the system of the disturbance and pains stop at once. Mothers say nothing equals these sweet little tablets for keeping infants and young children well and soothing them when teething or overtired. Absolutely *safe*. Price 25c at your druggist's.

Dr. Williams' BABY'S OWN TABLETS

Little Helps For This Week

"Blessed be the Lord who daily loadeth us with benefits." Psalm 48:19.

Source of life's refreshing springs,
Whose presence in my heart sustains me,
Thy love ordains me pleasant things,
Thy mercy orders all that pains me. —A. L. Waring.

When I survey the occurrences of my life, and call into account the finger of God, I can perceive nothing but an abyss and mass of mercies, either in general to mankind or in particular to myself. Those things which others term crosses, afflictions, judgments, or misfortunes, to me who inquire further into them than their visible effects they both appear and have ever proved the secret and dissembled favors of His affection.—Sir T. Browne.

A New-Found Continent

Discovered On Pacific Floor By Echoes From Depth Finder

Mountains higher than Mount Everest, huge plateaux twice the width of America and great deeps that drop more than six miles downwards—these are characteristics of a new-found "continent." This hitherto unknown territory stretches beneath the surface of the North Pacific. It was discovered by echoes from the depth finder in the U.S.S. Ramapo. The Ramapo has been on a survey of the Pacific ocean bottom. It found that the submerged territory is not marked by steep depths in its separation from North America. In fact, appears to be a raised eastern shoulder of the submerged continent, but the west coast of Asia shows a series of tremendous deeps. From north to south in the west portion of the "continent" is a mammoth mountain ridge with towering peaks which are known to Pacific mariners as islands, banks and reefs.

British Speed Ace Beaten

Youth Defeats Malcolm Campbell In Home-Made Car

A youngster in what was virtually a home-made car had the thrill of beating Sir Malcolm Campbell—holder of the world's fastest land speed record. It happened at Brooklands in the fourth race.

He was W. E. Harker and he proudly called his car a Harker Special. It was driven by two small M.G. engines coupled up with great skill by this young engineer. Campbell's car was the giant Sunbeam, of 3.976 c.c. The Harker Special was only 1,492 c.c.

Campbell started scratch. Mr. Harker in his homemade car had a start of 31 seconds. Campbell drove with all his accustomed skill. He overhauled the whole field, but found his master in Mr. Harker and his Harker car.

The candle fish of the Pacific is so oily that Indians use it for a candle; it burns readily if a wick is passed through the body.

A large attendance is looked for tonight's meeting of valley growers, which will be addressed by W. E. Haskins, Geo. Barrat and O. W. Hembling of the Growers' Stabilization Committee. They have just completed a series of meetings throughout the Okanagan at all of which their proposed marketihg plan has been well received.

The annual meeting of the W men's Auxiliary of Creston Valley Post Canadian Legion was held at the June meeting on Tuesday last with the president in the chair. It was edcided to continue the regular meetings during the summer months to keep up interest in the work. The visiting committee report showed the month an active one with them. Discussion of November poppy sale took place. The officers for the coming year are:

President—Mrs. W. V Jackscn.
1st Vice-President—Mrs. C. Lowther.
2nd Vice-President—Mrs. John Bird.
Secretary— Mrs. J. E. Johnston.
Treasurer—Mrs. R. Watson.
Executive—M s. D. Ross, Mrs. G. Vigne, Mrs. E. Gardiner.

The election of officers was conducted by Mrs. Knott. Votes of thanks were extended the retiring officers for much good work accomplished. The supper hostesses were Mrs. K. Knott, Mrs. Lowther and Mrs. Johnston.

Under the supervision of Miss Wade ten high school students are writing their junior matriculation departmental examinatibns here. They are: Mary Abbott, Kathleen Bundy, Agnes Crane, Marjorie Crosby, Ellen Hagen, Frances M. Lewis, Reetha Phillips, Edythe Rentz, Alexander Teleford, Alice Wesling. The exams. conclude today.

In his crop estimate just issued C. B. Twigg looks for a drop in the pear crop from 13,606 boxes in 1933 to 10,000 boxes this year, but looks for an increase in cherries from 6212 crates to 13,000 in 1934. Plums and prunes are due for an expected jump from 3823 crates to about 8000 this year. Crabapples are to be much the same—around 2500 boxes.
