THE CRESTON REVIEW

VOL. XXV — CRESTON, B. C., FRIDAY, JULY 6, 1934 — No. 15

Win Honor Rolls; List Promotions

Creston Public School Staff Give Out Year-End Report—Satisfactory Pass List All Divisions—17 Recommended to Grade 9

Division 1—E. Marriott, Principal.
HONOR ROLLS: Proficiency—Lorraine Olivier. Deportment—Iona Hills. Regularity and Punctuality—Lester Weiss, Ruth Davis, Maisie Ferguson, Gladys Davies, Helen McCreath.
Standing for the Year: Grade 7—Lorraine Olivier, Beryl Palmer, August Morabito. Grade 7—Lottie Klein, Ruby Palmer, Goldie Walker.
PROMOTIONS: Grade 8 to Grade 9 (on recommendation)—Lorraine Olivier, Beryl Palmer, Gordon Martin, August Morabito, Jessie Spratt, Maisie Ferguson, Iona Hills, Irene Brady, Bill Craig, Charlie Klingensmith, Doris Beninger, Sam Nastasi, Ruth Davis, Helen Staples, Stuart Hilton, Wilfred LaBelle, Daisy Trevelyan. To Grade 8—Lottie Klein, Ruby Palmer, Goldie Walker, Stanley Hendren, Frances Bourdon, Egon Hollm, Helen McCreath, Phyllis Lowther, Norman Phillips.

Division 2—A. Robertson, teacher.
HONOR ROLLS: Grade 7, Proficiency—Billy McFariand. Deportment—Georgina Paulson. Regularity and Punctuality—Anna Dickinson. Grade 7, Proficiency—Kenneth Hester. Deportment—Jack Hall. Regularity and Punctuality—Thelma Lowther, Kenneth Hester.
Year's ranking: Grade 7—Bill McFariand, James Bourdon, Ronald Cooper Grade 6—Kenneth Hester, Bob Vigne, Jack Hall.
PROMOTIONS: To Grade 8—Anna Dickinson, Ronald Cooper, Eva Phillips, Billy McFarland, Louise Parry, Elsa Foerster, Ethel Morrow, Doris Hendy, James Bourdon, Charles French, Evelyn Nastasi, Russell Gabelhei, Edith Johnston, Sidney Argyle.
To Grade 7—Arthena LaBelle, Thelma Lowther, Ina Chappell, Beryl Chappell, Mary Watson, Margaret Donaldson, Jack Hall, Teddy Hewitt, Bud Lowther, Alex. Campbell, Tom Lewis, Clayton Sinclair, Tommy Johnston, Kenneth Hester, Bob Vigne, Donald Harkness, Bill Vigne.

Division 3—Miss Wade, teacher.
HONOR ROLLS: Proficiency—Esther Ostendorf. Regularity and Punctuality—Muriel Raymond, Olga Hurack George Carr, Ernest Hills, Wilfred Wightman. Deportment—Irene Pridham.
PROMOTIONS: Names in order of merit. Grade 6 to Grade 7—Wilfred Wightman, Thelma Stewart, Steve Bullock, Billy Husband, Irene Pridham, George Carr, George Cartwright, Julian Cartwright, Lillian Hendren, Rose Stewart, Bert McFarland, Dorothy Klingensmith.
Grade 5 to Grade 6—Esther Ostendorf, Jessica Husband, Edward Davis, Charlotte Wilks, Linden Bell, Eric Jacks, Muriel Raymond, Walter Hilis, Barbara Cartwright, Vera Watson, Ethel MacLaren, Ellen Morabito, Emma Hedstrom, Olga Hurrack, David McFarland.

Division 4—Miss Learmonth, teacher.
HONOR ROLLS: Proficiency, Grade 4—Jean Bunt. Grade 3—Louise Hare and Teddy Olivier equal. Punctuality—Jean Bunt, Jean Pridham, Russell Martin. Deportment—Katherine Rentz.
PROMOTIONS Grade 3a to Grade 4—Donald Andrews, Wilbur Argyle, Earl Beninger, Kenneth French, Bertha Gardiner, Louise Hare, Anna Kinkade, Billy Lewis, Grace Lewis, Teddy Olivier, Jim O'Neil, Katherine Rentz, Dick Staples, Helen Stewart, Robert Strong, Sheldon Weiss.
To Grade 5—George Bourdon, Jean Bunt, Audrey Cooper, Helen D'Zvigola, Doris Gabelhei, Mary Gabelhei, Leslie Jones, Tony Joy, Agnes Lovestrom, Russell Martin, Raymond Moore, Jean Pridham, Will Rodgers, Rosie Rota, Dorothea Schmidt, Elva Strong, Arthur Sutcliffe, Donald Truscott, Nolan Weiss, Blanche York.

Division 5—Miss Hobden, teacher.
HONOR ROLLS: Proficiency—Gwendolyn Moore, Regularity and Punctuality—Richard Hood, Eunice Hughes, Anna Peltzer. Deportment—Frank Rota.
PROMOTIONS: Grade 3 to Grade 4—Anna Peltzer, Ethel Hendren, Rosie Morabito, Lewis Truscott, Louis Klingensmith, Norman Husband, Leona Lovestrom, Betty Husband, Allan Comfort, Leslie Harris, Harry Ostendorf, Frank Rota, Victor Peitzer, Patsy Bradley.
Grade 2 to Grade 3—Gwendolyn Moore, Raymond Cooper, Lewis Millin, Elmer Pagens, Lewis Palmer, Richard Hood, Hawkshaw Powell, Willie Hurrack, Roy Eiagard, Eunice Hughes, Patsy Forbes, Julius D'Zvigola, Robert Ibbitson, Joyce Arrowsmith, Gloria Romano, Rose Kinkade, Edwin Dickinson, James Walker, Fiore Rota, Blair Leavitt, Russell Biccum. Beth Leavitt on trial.

Division 6—Miss Holmes, teacher.
HONOR ROLLS: Proficiency—Ena Jones. Deportment—Bobby Rentz. Regularity and Punctuality—Henry Read, Violet Pagens.
PROMOTIONS: Names in order of merit. From Grade 1 to Grade 2—Laurel Keirns, Ena Jones, Mary Jean Husband, Lorna Bell, Mary Boffey, Jack Wilks, Charlie Tompkins, Dorothea Powell, Erma Klein, Jimmy Rodgers, George Donaldson, John Bullock, Aileen Weston, Gordon Rodgers, Henry Read, Rex Eiegard, Jerry Alderson, Alice Merritt, Mildred Strong, Beverly Romano, John Harris, Bertie Wocknitz, Lyle Klingensmith, Sidney Bourdon, Evelyn Kelly, Albert Lovestrom. Promoted to Grade 1, second term—Dorothy Dickinson.

High School Promotions

Promoted from Grade 11 to Grade 12: On recommendation—John Spencer, Doris Crosby, Eleanor Spratt, Ethel Sutcliffe, Charles Taylor, Ethel Van Ackeran, Harold MacLaren. On trial—Daisy Trevelyan, Irene Bourdon, Clifford York, Norma Marshall (unranked).
Promoted from Grade 10 to Grade 11: With honors—June Wigen. On recommendation—Lloyd MacLaren, Elizabeth Sace-Smith, Hilda Hage, Richard Avery, James Downes, George Dodd. Passed—Elizabeth Kemp. On trial—Aileen Klingensmith, Chester Goplin, George Plumb, Phyllis Barnhardt, Ruth Hare.
Promoted from Grade 9 to Grade 10: On recommendation—Roy Jackson, Dorothy Chappel, Marion Cooper, Lance Maddess, Daisy Rogers Hughena McCreath, Bruce, Niblow, Leah Abbott, Treasa Torchia, Douglas Alderson, Hazel Sinclair. On trial—Muriel Penson.
All names in order of merit.

GROWERS

BE SURE YOU VOTE!

For the convenience of those who were unable to mark their their ballots at the meeting on June 29th, ballots may be cast and placed in the ballot box at the

CO-OP. STORE

THIS IS IMPORTANT. DON'T FAIL TO VOTE!

A member of Creston Valley Growers Stabilization Committee in charge.

Wynndel

Miss Lena Benedetti, who has been employed at Trail, returned last week.

Mrs. Clare and family of Michkl are visitors here, guests of Mr. and Mrs. R. Andestad.

Miss Olwen Evans of Cranbrook was a holiday weekend visitor with her mother, Mrs. Rumsey.

Mrs. Sisson of Taber, Alberta, arrived on Sunday to join her husband who is here for the berry season.

Mrs. Fiorentino and family of Cranbrook are visiting the former's parents, Mr. and Mrs. J. Benedetti.

Bill Campbell, sawyer at the Winlaw mill, spent the holiday weekend with Nelson friends. The mill was shut down for Dominion Day.

School closed on Thursday for the summer vacation with Miss Harrop leaving for her home at Harrop, and Mrs. McGregor, by auto for Vancouver.

Percy Lunt of Calgary, Alberta, and Mr. and Mrs. DeWitt of Disdsbury, Alberta, arrived last whek on account of the illness of the former's father, G. Lunt.

Principal Freney of Alice Siding school was here last week superintending the pupils writing on entrauce to high school examinations, Wednesday, Thursday and Friday.

For the convenience of those unable to attend the meeting at Creston on Friday evening, a vote on the plan as submitted by the Okanagan Growers' Stabilization Committee is to be taken at Wynndel. Get in touch with A. F. Rudd.

Water Sports Holiday Feature

Swimming Pool Events Entfiuse Dominion Day Celebration Crowd—Athletics Win Baseball Championship.

Creston's observance of Dominion Day, which was featured by the third annual sports day under the direction of Wild Rose Lodge Knights of Pythias, did not attract the attendances of former years, and with the exception of the water sports some of the old-time pep was missing in the various competitions, particularly the children's parade, with which proceedings opened.

Those in costume paraded to Exhibition Park where the prizes were awarded by a trio of judges, Mrs. R. Stevens and Messrs. R. J. Forbes and C. F. Hayes. The best dressed were Margaret Donaldson and Marguerite Grant, as a colonial couple, and the second prize was divided between Edith Johnston and little Miss Marylin Warren, whose gipsy outfit was much admired. In the comics Bill Burge of Gray Creek was awarded first, Jack Wilks second and little Joe Rodgers third. There were but four pets entered, only half of the owners of which were in costume, and first prize was well earned by Charlotte Wilks.

There was the usual list of races for boys and girls that were fairly well contested. The crowd was keen for the water sports where the prizes went to "Bud" Lowther and George Cartwright in the beginners' class. Ardrey Weir and Lindell Bell won the boys' swim, under 12 years. The long dive winners Ardrey Weir and "Bud" Lowther. The public school swim champions were Ronald Cooper and Oswald Uri of Wynndel. The long dive, open, was taken by Frank Bourdon and Ardrey Weir. Tom Ross was winner of the greasy pole walk, and the pearl diving honors were taken by Bill and Ardrey Weir. In a special event, a free-for-all, for which J. B. Rudd donated a prize, the winner was Ronald Cooper.

In the baseball tournament Alice Siding and Canyon were eliminated in the preliminary games Sunday afternoon. Kitchener beat the Siding 17-12 and Creston Intermediates downed Canyon 6-1. Creston Athletics, who drew the bye, swamped Kitchener 11-5, and followed this up by humbling the Intermediates 12-2.

There was a large turnout for the dance in Park yavilion in the evening with music by the Crestonian orchestra, with the Pythian Sisters serving the supper. The ladies lodge also conducted a refreshment booth on the grounds, and report the patronage almost on a par with the year previous.

The holders of the lucky tickets were R. Uri of Wynndel, who annexed the $5 prize. The $3 award went to Mrs. Arrowsmith, and the $2 winning ticket was held by Mrs. Jas. Carr.

Canyon City

Mr. and Mrs. F. Knott were at Glenlilly for the holiday weekend.

John Nygaard, jr., who is working at the Reno mine, Nelson, was home for the weekend.

Jock McRobb, jr., who who is now employed at Trail was a weekend visitor at nir home at Canyon.

Mr. and Mrs. Bob Clayton of Kimberly spent the weekend with the former's parents, Mr. and Mrs. Matt Clayton.

Posters are up for the annual school meeting at the schoolhouse on July 14th. W. E. Searle is the retiring trustee.

Mr. and Mrs. Jeff. Knott of Snoqualme, Wash., arrived on Sunday for a ten day visit with their parents at Canyon.

Canyon lost out in the first round of the baseball tournament at Caeston on Sunday, when they took a 6-1 triming at the hands of Creston Intermediates,

The cherry harvest is nearing its peak in this section. The loss due to last week's rain has been light. In fact practically all the damaged Bings have moved as second grade.

A splendid opportunity to purchase household furniture presents itself next Wednesday, July 11th, when L. W Stephens is having a sale of his household effects at his residence, at 1.30 p m. Terms cash.

School closed for the summer vacation on Friday, and it is reported two new teachers will be in charge when operations resume in September. Miss Goodwin was married at Creston on Tuesday to Ed. Clark of Erickson.

Harry VanAckeran motored in from Okanagan Centre for the weekend with his parents, Mr. and Mrs. J. E. VanAckeran, returning on Monday, accompanied by his sister, Ethel, who will visit with him for a couple of weeks.

A July Wedding

A church wedding of greae interest was that of Tuesday morniug at Trinity United Church at which Miss Mary Evelyn, only daughter of Mr. and Mrs. Thomas Goodwin, was united in marriage with Edward Charles, eldest son of Mr. and Mrs. Frank Clark of Erickson, Rev. Andrew Walker officiating.

The bride entered the church on the arm of her father to the strains of the wedding march played by Franklin Clark, brother of the groom. She wore starched chiffon in allover embroidery and bridal veil held by coronet of orange blossoms, and carried a boquet of Ophelia roses and fern. The bridesmaid was Miss Neola Clark, sister of the groom, who wore pale blue organdie with white picture hat and her boquet was Regal lillies. The groom was supported by Harry Webster. The flower girl was Rose Strong, niece of the groom, who was in pale blue flowered organdie and carried a basket of roses. The usher was Lewis Littlejohn. During the signing of the register Miss Norman Strong, sister of the groom, appropriately rendered "Because."

Following the ceremony the invited guests adjourned to the home of the bride's parents where all sat down to a wedding breakfast served on the lawn, the table centred by a three-teir wedding cake and the color scheme of the table decorations pink and white. Early in the afternoon the newlyweds left by auto on a short honeymoon which will be spent at points on Kootenay Lake, the bride travelling in an ensemble of pale green crepe with white hat and accessories.

The bride's gift to the groom was a set of military brushes, and the groom's gift to the bride was a gold brooch. The bridesmaid was remembered with a white leather handbag; the best man with a neck scarf, and the flower girl a crystal necklace.

The bride, who is a native daughter of Creston, and a graduate of Creston high and public school, enjoys a deserved popularity locally as well as at Canyon where she has taught school the past two years, while the groom is also well known, particularly in musical circles, and this esteem was shown in the many splendid presents received. Mr. and Mrs. Clark are to reside on the groom's ranch at Erickson and have the good wishes of all for a happy and successful future.

Kitchener

Alex. Ellis is home from Nelson where he has been on a visit with friends.

The Consolidated Mining & Smelting Co., Limited, have a small crew at work up Goat River.

Mrs. S. Abar and son, Frank and Mrs. Carl Anderson and son Selmer, were Cranbrook visitors Tuesday.

Mr and Mrs. N. P. Molander and son Richard, with Mrs. Claude Simpson, were weekend visitors at Cranbrook.

Miss Joan Geroux of Moyie arrived on Wednesday on an extended visit with her uncle and aunt, Mr. and Mrs. C. Foisy.

W L. Hathaway and party of San Francisco, Calif. arrived on Thursday, and will spend some time at his summer home, Camp Hathaway.

Fire in the roof of Mrs. A Howard's residence on Thursday afternoon did small damage due to the prompt arrival of neighbors who quickly extinguished the blaze.

Pine Katz softball team were at Creston Saturday evening and took a 15-12 beating at the hands of the Wildcats. Kitchener battery was Jessie White and Hazel McGonegal.

In the Knights of Pythias baseball tournament at Creston on Sunday Kitchener beat Alice Siding, 12-17, but in the game with the Athletics Monday afternoon the A's won 5-10.

Mr. and Mrs. Geo. Hugh, Lyal and Betty Hanson, and Miss Joan Milce of Spokane, here on a visit with A. Hanson, who is in charge of the Sullivan mine developments, returned at the end of the week.

Mr and Mrs Chas. Anderson and son, Curt were guests at the weekend with Mr. and Mrs. B. Johnson, returning on Monday to their home at Columbia Lake.

The dance in Hunt's Hall Monday night to wind up the Dominion Day celebration sponsored by the airport was well attended. Frank, Alberta, Yahk, Cranbrook, Kimberly and Creston being represented.

Gordon Jewel, who is in charge at Kitchener airport spent the weekend at his home in Moyie. Mrs. Jewel retutned with him, along with Miss Flora Andrews and E. Danielson of Moyie who stayed for the Dominion Day celebration.

The Pine Katz softball team had a lucky day, Monday In the afternoon they trimmed Canyon 29-6, at the airport diamond, with Jessie White and Hazel McGonegal doing battery wrak. In the evening they trimmed Yahk 29-9. They won the bat and ball given as a prize for the winning team by the airport.

Boy Scouts Wind Up Busy Year

Have Jamboree at Parish Hall—Lantern Lecture—Presented with Charter—Demonstrate Prohciency in Scout Work.

Creston troop Boy Scouts entertained their parents and a group of invited friends at their usual midsummer jamboree, which was held at the Parish Hall on Wednesday evening, at which the troop had the pleasure of a visit of a number of scouts from Cranbrook, who accompanied their scoutmaster, Murray McFarlane, to Creston for a reunion on the occasion of their leader putting on the well known scout lantern lecture, the "1908 Scout Jamboree at Arrow Park, England." Mr McFarlane had presented the picture at Cranbrook and some other points previously and was thoroughly familiar with all the scenes which added to th pleasure derived from their presentation.

In addition to the pictures the local troop provided some excellent features, which included the investure of Eric Jacks as a tenderfoot scout, which work was creditably handled by Scoutmaster Ed. Gardiner and his assiatant, R. G. Harris.

The four patrols each had a hand in proceedings. Sam Nastasi's Cougars gave a fine interpretation of scout law as well as an exhibition in knots. Beavers, in charge of Michael Joy, had charge of the flag display, and Gus Morabito's Lynx handelled the signalling. The senior patrol, the Wolves, headed by Clifford York, demonstrated their proficiency in first aid.

The charter of the local troop was presented them by Matt. York, chairman of the scout committee of supervision, and there were appropriate talks by Rev. R. W. Hardy of Cranbrook, who was amongst the visitors, as well as Rev. M. T. C. Percival and Rev. A. Walker. To close proceedings the scouts served an excellent lunch.

Announcement was made that the scouts will take vacation during July and August insofar as the regular weekly sessions are concerned, but plans are now being made for the annual camp, the date and place of which has not yet been decided upon.

Object-Lesson Of Peace

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world value of the lesson presented by the unique fact that not a gun nor a fort stands as provocation between the two countries throughout the whole extent of the international boundary.

This is so phenomenal a situation that it has attracted universal attention, been the subject of thousands of after-dinner and more ceremonious addresses, and stands to-day in a belligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any set of facts or factors could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost inestimable benefit to Canada. Billions of dollars of American money has been invested in this country; hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada; those people have contributed their share to the upbuilding of a great dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. These facts are evidence of the confidence with which the people of the sister country view their neighbors to the north and testify to the keen appreciation they have of the solidarity of British institutions and British forms of government.

The unique and signal character of this unfortified frontier, the amity between the two nations, and the close economic relations which seem to stand superior to trade rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an impelling object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts stand in their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to lend itself to any concrete definition or be written into any formula for use of peoples who, similarly situated geographically, cannot get along together.

Whatever the finding, the lesson stands for the world to view—an irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that, demonstrating their mutual goodwill by dispensing with the so-called weapons of the defence, neighbors may live in harmony without inciting those conditions of the mind or of the body politic, which lead to war.

Probe Working Of The Brain

Use High Radio Currents To Stop Functioning Of Limited Areas

How a University of California psychologist used high radio currents to stop the functioning of limited areas of the brain without interfering with the other parts, to study the purposes of particular centres of the brain, was described to the American Association for the Advancement of Science.

This somewhat startling method of probing the functional workings of the brain was based on the research of Dr. Clarence W. Brown of the university's psychology department.

Dr. Brown suggested his method of brain study should prove serviceable in solving anatomical and psychological problems in which a small controlled elimination of function is desired.

Husband Needed Sympathy

In granting a divorce to a talkative woman at Toledo, Ohio, Judge James Austin explained that it was given "as a favor to her husband". Mrs. Northerta V. Mueller could not be stopped by judge, attorneys or bailiff after she began a recital of her domestic affairs. The husband did not contest the action.

Overcoming Their Fear

Operations Are Becoming Rage Among Natives Of India

Operations have become quite the rage among the natives of Jobat, India, and no patient feels that he has received proper treatment without one, according to Miss Isabel McConnell, missionary, speaking in Montreal at the meeting of the council executive of the Women's Missionary Society, Presbyterian Church in Canada (Western division).

This represents a change of attitude, for the first surgical patient was so frightened at the idea of being "put to sleep" that he jumped from the operating table and ran home.

Among the instances showing the great work being done for the people through the hospital was that of a blind man who had to be led there, and who, after cataracts had been removed, went home unaided. The gratitude of the patients is most touching, stated Miss McConnell.

In English law, a bailiwick is the district within which a sheriff may exercise jurisdiction.

Obligate plants are plants which can grow in but one life condition.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels.

Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly.

Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Modern War Implements

Britain Installing Rapid Fire Gun In Fighting 'Planes

A big gun era begins in aerial warfare. A 37-millimeter, rapid fire, automatic gun is being installed in some of the larger fighting planes of Great Britain and promises to have a "tremendous advantage" over an opponent carrying only the ordinary machine guns.

The heavy gun shoots more slowly, sending out its messengers of death at the rate of only five in four minutes. But each shell weighs a pound and a half and is considered certain to disable any plane however slightly the contact is effected. And the slow-shooting heavy gun trusts to its long range to give it victory over the hornets. The small, light plane with its sputtering machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 2,000 yards." Presumably that gives British air fighters a fine start over all competitors in the armament race. But the presumption limps before the announcement that the new device was developed by experts connected with one of the great armament manufacturers whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the usefulness of the invention has been demonstrated, arms makers of other nations will be out with guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster.—Detroit News.

Praises Missionary Efforts

Doctor Credits Christianity With Great Progress In Asia

The change which Christianity worked in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highclere, South Africa, by Dr. J. R. Mott, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be sufficient evidence, he said, to convince him of the worth of foreign missions. An additional argument lay in the devotion and the achievements of Christian women in the missions.

To thousands of women in heathen lands the relief brought by the medical missions, the establishment of hospitals, and the creation of nursing services had been immense. Woben took the lead and did the greater part of the work in this field of service. It might be said that Christian missions had created the medical profession throughout Asia.

Fortune Has String Attached

Man Must Marry By Christmas 1938 To Inherit

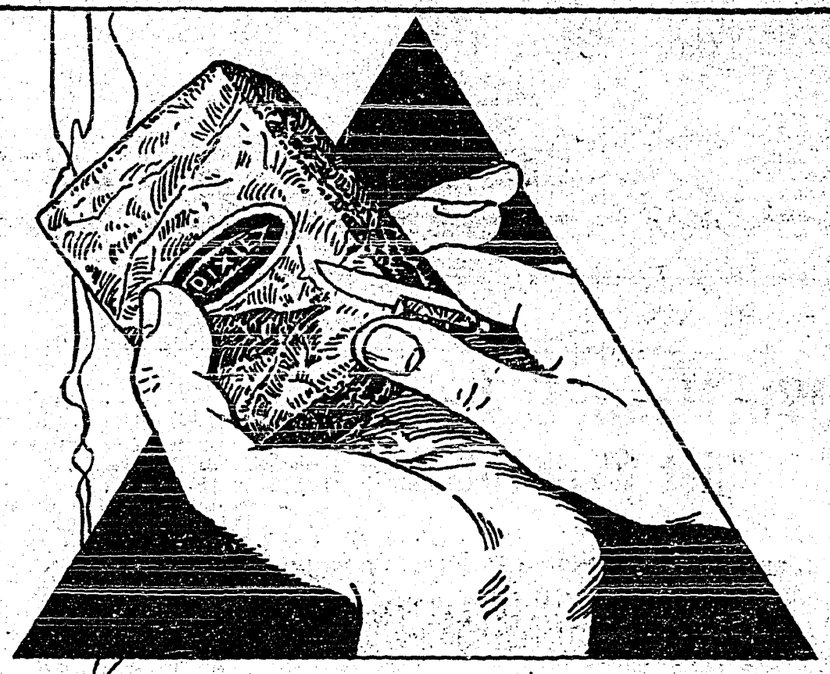
If John Francis Gallagher, of parts unknown, takes unto himself a wife on or before Dec. 25, 1938, and settles down to home life he will receive £100,000 from his aunt, Mrs. R. Zarah, 143 Well Hall Road, Eltham, London, Eng.

The offer of wealth was disclosed in a letter from Mrs. Zarah to Acting Mayor J. A. McKerchar of Winnipeg. She said she was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.

Mrs. Zarah, in her letter, said the last address she had of her nephew was box 130, Carbon, Alta., and general delivery, Prince Albert, Sask. If Gallagher is not located and married by the date set, Mrs. Zarah said she would bequeath all her real and personal property to the church and charity.

Gift For British Admiralty

Charles Courtney, master locksmith, arrived in London from the United States and said he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he salved the articles from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.



When you smoke plug tobacco, you can cut each pipeful *fresh* when you want it—*and* you can cut it any way you like, coarse or flaky. Plug tobacco is economical, too, for it lasts longer in your pipe.

Automatic Gave Minister From India Lots Of Trouble

Rev. Elbert M. Moffatt, central treasurer of the Methodist Episcopal Church in India, was a sadly troubled man when he arrived from Europe on the liner American Trader, with a .45 calibre automatic revolver.

The automatic became a source of trouble to Mr. Moffatt before he left Bombay. The weapon was taken there by a bishop's sister, whose American friends felt she would need something to protect herself when she was so far from genteel Oklahoma.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The Bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mr. Moffatt threw up his hands.

"I am," he said with determination, "taking it to the nearest police station."

Fixed Price For Tobacco Growers

Imperial Tobacco Company Of Canada Limited Signs Tobacco Growers' Agreement

Gray Miller, president of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario flue cured tobacco growers are now practically assured for 1934 a price based on 27c per lb., for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 27c average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

Proved Idea Wrong

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daily artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

Population Of India

Showed Increase Of Thirty-Four Million In Ten Years

Dr. J. H. Hutton, C.I.E., I.C.S., chief commissioner for the census of 1931, in his census report wrote that for long China was considered to hold the greatest aggregate of human beings in the world more or less under the same administration, but India's population now even exceeds the latest estimate of the population of China. The difference between the kind of government China has had during the present century and the kind of government that India has had could not be better illustrated. The census of 1931 gave India a population of 353 millions or an increase since 1921 of just under 34 milions. The increase in the ten years from 1921 to 1931 is alone almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, a similar or even greater increase between 1931 and 1941, bringing India's population almost up to the 400 million mark which is envisaged by Sir John Megaw, cannot be dismissed as impossible.—Calcutta Statesmen.

A Miracle Of Speed

Nineteen Girls In London Factory Make Shirt In Minute

Those who refuse to believe that a shirt with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London, and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. One sews cuffs, another makes collars, another buttonholes. All the time shirts in various stages of completion are moving with the conveyer from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!

"Minnow" submarines weighing only 12 tons and measuring 29 feet in length have been given successful undersea tests in Japan.

HAMILTON, ONTARIO

BRITAIN WILL NOT PAY WAR DEBT TO U.S. IN GOODS

Washington.—A British reply that Great Britain was not prepared to make partial payment of its debt in goods and services was received by the state department without comment.

The formal note, delivered to the state department by D. G. Osborne, charge d'affaires, rejected overtures made by Secretary Cordell Hull in a note of June 12.

The British note said the experience of German reparations had shown that transfer of goods was as unsettling to world economic affairs as transfers in cash and could not be entertained by Great Britain.

The British note emphasized that the primary question for settlement was the amount that should be paid.

Secretary Hull's note of June 12, after setting forth the American position in opposition to British reasons for failing to pay on June 1, explained that Great Britain had never made any suggestions for payment in kind and hinted that such payments might open an avenue for settlements.

The text of the British debt note follows:

After careful consideration of the note which you addressed to Sir Ronald Lindsay on June 12, His Majesty's government in the United Kingdom feels there are two questions to which it may be useful to make further reference.

In the first place, His Majesty's government would observe that in their note of June 4 they did not state payment of the British war debt was legally contingent upon payment of the debts due to them. What they said was that it would be impossible for them to contemplate a situation in which they would be called on to honor in full their war obligations to others, while continuing to suspend all demands for payment of the war obligations due to them. This was a statement not of law but of fact.

Secondly, as regards the suggested payments in kind, His Majesty's government would recall that the experience of German reparations showed that transfer difficulties are not solved by a system of deliveries in kind.

As the committee, presided over by General Dawes, pointed out in 1924: "In their financial effect, deliveries in kind are not really distinguishable from cash payment."

In fact, economic objections to cash payments would apply with equal force to deliveries in kind, unless those deliveries were to consist of indigenous products of the debtor country (excluding re-exports) and unless they were to be accepted by the creditor country and consumed by it in addition to the goods taken from the debtor country in the normal course of trade.

If the United Kingdom were not to receive payment for goods exported on commercial accounts, her exchange resources available to purchase cotton and other goods from America would be still further diminished. Therefore, while not unwilling to give further consideration to possibilities in this direction, His Majesty's government do not at the present see any method of putting such a plan into practice which would be likely to commend itself to the government of the United States of America.

In the view of His Majesty's government, the primary question for settlement is the amount that should be paid, having regard to all the circumstances of the debts.

They regret that up to the present it has not been possible to make further progress in this matter but they will welcome the opportunity of resuming discussion whenever it may appear that present abnormal conditions have so far passed away as to offer favorable prospects for a settlement. They are always anxious to remove from the sphere of controversy all or any matters which might disturb the harmonious relations between the two countries.

New Franchise Act

B.C. Doukhobors Will Be Debarred From Voting

Ottawa.—Rapid progress was made on the new franchise act as the committee of the house considering the bill approved without division three amendments at a second sitting under the chairmanship of Hon. Hugh Guthrie, minister of justice.

Doukhobors in British Columbia, where they are disqualified from voting in provincial elections under the British Columbia law, will not have the right to vote in Dominion elections under one amendment.

A second amendment struck out the provisions for a signed application by a prospective voter insofar as the original basic list is concerned. The provision for signatures will continue to apply to the annual revisions of the list.

A third amendment dealt with the appointment of enumerators in each riding. It provided one enumerator should be nominated by the sitting member of parliament for the constituency. The second enumerator will be nominated by the nearest opponent to the successful candidate in the last general elections.

A. W. Neill (Ind., Comox, Alberni) appeared to ask that provision be made for the taking of the absentee vote as under the British Columbia Elections Act.

Takes Tea With Queen Mary

Mother Of President Of United States Entertained at Buckingham Palace

London.—Two of the world's most talked about women—Queen Mary and Mrs. Sandro Delano Roosevelt—sipped tea together in Her Majesty's private apartments at Buckingham Palace.

King George was present, but most of the animated conversation was carried on by Her Majesty and the mother of the United States president.

Just two mothers—grandmothers in fact—they found many common interests as they chatted. Their majesties were impressed by the gaiety, friendliness and frankness of Mrs. Roosevelt.

High Price For Telephone

Mukden, Manchuria. — Telephones are so scarce and hard to get in Mukden, because of the growth of the city, that fabulous prices are being paid for telephones being relinquished by established subscribers. A Japanese building contractor has just paid the record price for a telephone connection—1,250 yen. This is equal to nearly $400 in Canadian money.

Casualties At Rodeo

London.—The score of Tex Austin's rodeo to date is five contestants injured and one steer allegedly terrified. Rusty Coram, famous brancho buster of Camargo, Okla., suffered a broken leg when a bucking horse fell on him. He was taken to a hospital, the fifth cowboy injured since the rodeo began two weeks ago.

Trade With Great Britain

Toronto. — "We intend to establish close trade relationship with Great Britain and all other countries," Hon. Henry T. Rainey, speaker of the house of representatives of the United States, declared here.

MAY COME TO CANADA

The health of Premier Ramsay MacDonald is the chief concern of the people of the Mother Country at the present time, as his physicians demand that he take a rest. Mr. MacDonald must take at least three months' rest, and it is thought he may make a trip across Canada.

Farm Debt Adjustment

Senate Frowns On Bill And Carries Amendment

Ottawa.—Provision in the government's farm debt adjustment legislation whereby a mortgage costing a farmer in excess of seven per cent. may be liquidated on payment of the principal and three months' interest unless the mortgagor desires to continue it at a rate of five per cent., was frowned upon by the senate banking and commerce committee.

It was held this would make it impossible for farmers to secure mortgages. An amendment was carried unanimously making it possible for the mortgagor to hold his contract, when so challenged, by reducing the rate to seven per cent.

The committee proposed only one other amendment. A provision that would allow the governor-in-council to appoint an official receiver only in such counties as would be deemed necessary and expedient.

The bill was reported for third reading as amended.

Defeat Divorce Bill

Ottawa.—The Stotland divorce bill will not receive further consideration by the House of Commons this session. A motion by E. R. E. Chevrier, Liberal member for Ottawa, to have the bill which was defeated in the private bills committee, restored to the order paper, was declared lost. By the bill, Hyman Stotland, of Montreal, sought to obtain a divorce from his wife, Ruth Rudnikoff Stotland.

Tax Will Be Collected

Ottawa.—Provisions for the collection of five per cent. income tax from private trusts set up in Canada for the benefit of non-residents were placed in the amendments to the Income War Tax Act which were finally passed through the House of Commons. All clauses in the income tax measure had been passed previously but some question arose over the taxation of these private trusts.

To Visit Dominion

Reported That Ramsay MacDonald Will Holiday In Rocky Mountains

London.—The Daily Herald states that Prime Minister Ramsay MacDonald has "practically decided" to spend his long vacation from official duties in Canada, indulging in a walking trip through the Rockies.

A projected trip up the Amazon river in Brazil was rejected, the Daily Herald said, on account of the intense heat. Friends of the prime minister looked with disfavor upon his suggestion of spending the three-months health-seeking vacation in Newfoundland.

Internal politics in Newfoundland might worry the work-worn premier, it was feared. The newspaper reported that a long sea cruise was rejected on the grounds Mr. MacDonald would spend much of his time reading. He has suffered a great deal from eye strain during the last few years.

The visit to the Canadian west was finally proposed as affording the best possible rest for the premier. It was not stated who would accompany Mr. MacDonald but his daughter Ishbel was believed almost certain to go with him. She has accompanied her father on all his trips away from England.

Investigation To Continue

Probe Into Price Spreads Will Be Carried On

Ottawa. — The price spreads and mass buying probe will be continued during the summer, it has been learned definitely.

The committee of 11 members of parliament conducting an inquiry since the middle of February is expected to be turned into a commission to continue the investigation.

In a brief report being prepared for tabling in the House of Commons, this recommendation for the set-up of a commission is made. No other major recommendation is likely to be made in the present report.

Practically all the sittings of the commission will be held in Ottawa, although there is a possibility the body may visit the maritime provinces late in August to hear evidence on the fishing industry on the Atlantic.

Relief Cheques

Payment Of Dominion's One-Third Proportion Is Authorized

Ottawa. — Cheques in varying amounts from less than $100 to $337,231 as the Dominion's one-third proportion of provincial relief operations, were authorized by orders-in-council tabled in the House of Commons. The amounts authorized included:

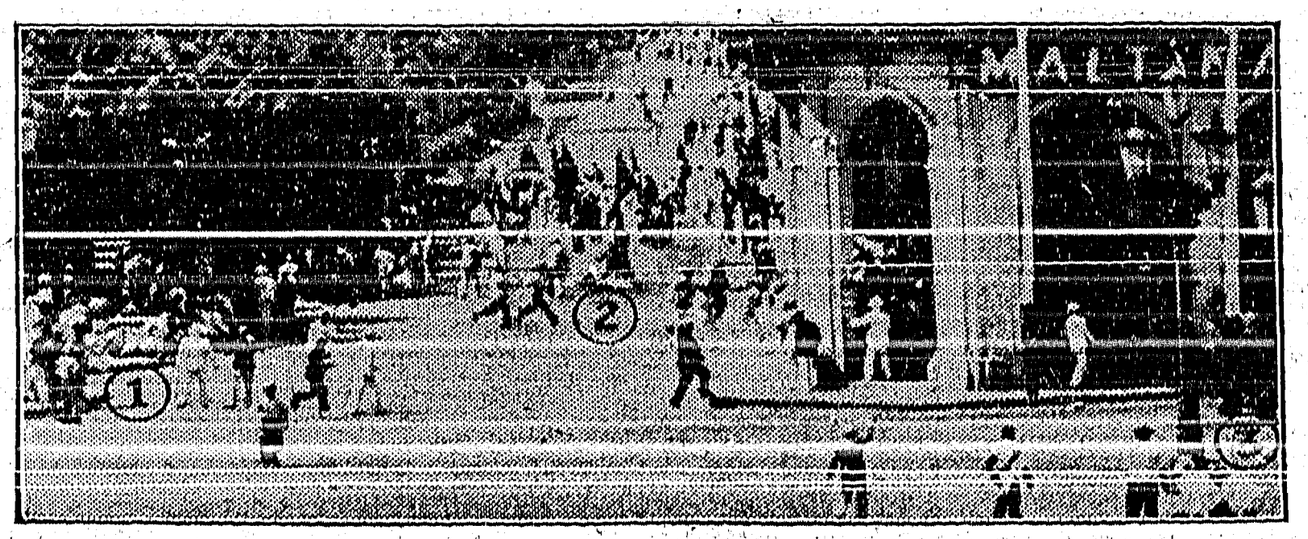
Alberta—$77,681.

British Columbia—$207.

Manitoba—$3,672.

Saskatchewan—$64,614, municipal and direct relief expenditures under 1933 act, to be credited to the $500,000 loan made by the Dominion to Saskatchewan, November 24, 1933. For provincial works under 1933 act—$1,066. Municipal direct relief under 1933 act—$93,920. Municipal direct relief under the 1932 act—$790, to be credited to the Dominion's loan of $500,000 to Saskatchewan dated January 6, 1934.

MACHINE GUNS SPRAY DEATH INTO THE RANKS OF HAVANA PARADERS



Ten were killed and more than 20 wounded when machine gunners opened fire on a political parade of students in Havana, Cuba. This unusual picture shows the actual fighting shortly after the battle broke out. No. 1 designates the nest of machine gunners and the haven of some of the wounded. No. 2 is a man slain in the street. No. 3 shows some of the paraders who have taken refuge behind a lamp post and are returning the fire of the attackers with their pistols. The cameraman risked his life to get this picture.

JAPANESE MOB MAKE ATTACK ON BRITISH POLICE

SHANGHAI.—An angry crowd of 300 Japanese attacked British police of the Shanghai international settlement before dawn, hurling bricks, bottles and clubs at them.

The affair threatened to precipitate an international incident. The British authorities had sought to arrest two Japanese sailors ashore in international territory.

The Japanese, styling themselves "patriots", objected to a Briton undertaking to arrest one of their countrymen and quickly assumed an ugly mood. Missiles began to fly.

Japanese naval shore patrols and British police reinforcements quickly ended the affair, which for a time threatened to assume proportions of an armed clash.

High Japanese naval authorities and British international settlement police officers finally intervened to prevent a pitched battle, although numerous British policemen were struck by bricks and other weapons hurled by the Japanese.

The British policemen, who attempted the original arrest, claimed that two Japanese sailors struck a Chinese woman, making it necessary to take them into custody.

Japanese naval representatives insisted the police of Shanghai had no authority to arrest Japanese sailors. Police refused to accept the Japanese attitude, pointing out other nations maintaining naval or military forces here recognized police authority on shore. They pointed out that when called upon to handle any service man, they immediately hand him over to his own command following the arrest.

Boys Start On Tour

Famous Kitsilano Band Will Sail From Montreal For England

Vancouver. — Canada's champion junior band, the Kitsilano Boys' Band, of Vancouver, has left here en route for a two-months tour of England before returning home. At least one of the 45 youthful musicians plans to remain in the Old Country if his hopes are realized.

Norman Pearson, tall, fair-haired, 18-year-old trombonist, who, besides winning many awards for his music has established himself as one of the Dominion's foremost cricketers, will attempt to realize his ambition when he reaches England—to play in first class county cricket there.

Pearson, despite his youth, has compiled a record in two months of play this season that is believed unequalled in Dominion record books. During that time he knocked up five centuries, passed the two-century mark once, and scored a total of 1,023 runs. His high score was 221 runs. And to make his record more remarkable, three scheduled games were rained out.

Concerts are being given en route at all the larger cities on the prairies and in eastern Canada.

The party will sail for England from Montreal on the Duchess of Athol.

Loan For Winnipeg

Winnipeg.—Premier John Bracken announces arrangements have been made by the Manitoba government to loan the city of Winnipeg $1,300,000 to cover the city's cost of unemployment relief during 1933. The loan was made possible by the Manitoba government borrowing from the Dominion government.

May Reduce Radio Licenses

Toronto.—The Globe, in a special despatch from its Ottawa correspondent, said it understood proposals were before the special House of Commons commission on radio that might result in a reduction in the license fee for receiving set owners from $2 to $1.50 or $1.

Awarded Scholarship

Toronto.—Toronto University Alumni Federation has awarded Canadian General Hospital Scholarship in faculty medicine valued at $250 to Bertram James Woods, of Lemberg, Sask.

Keep in touch with home by telephone

"I wonder how the folks are." This is a natural thought when you're many miles away from them. It's easy to find out if there's a telephone handy. A few words to a long-distance operator will enable you to "drop in" on the family.

When away for your holidays, call home by long-distance telephone.

Kootenay Telephone Co.
LIMITED

Erickson

Evelyn Speaker, who has spent the past year at Trail, attending school, arrived home on Sunday.

Helen Dodds, who has been attending high school at Cranbrook the past year, is home for the holidays.

Jack Hall and a friend, from Vancouver, are here on a visit with the former's parents, Mr. rnd Mrs. John H ll,

Mrs. S. Fraser and Misses Margaret and Sadie are spending the week at Destiny Bay, on Kootenay Lake.

Harold Lanston and Joan got away at the first of the week on a week's holiday with friends in Lethbridge, Alberta.

Miss M. Sanford left this week fo Champion and Parkland,, Alber a, where she will spend the summer vacation.

Miss M. Sanford le't this week for Champion and Parklahd, Alberta, where she will spend the su mer vacation

NOTICE!

IN THE MATTER of the Estate of EARL GEE, late of Crescent Bay, in the Province of British Columbia, Deceased, Intestate.

NOTICE is hereby given that Montague Edward Harper of Nelson, in the Province of British Columbia, Official Administrator of the Nelson-Creston Electoral Ridihg, was by order of His Honor W. A Nisbet, Local Judge in Chambers, bearing date the 27th day of June, A.D., 1934 duly appointed Administrator of the estate of EARL GEE, who died on or about the 27th day of April, A.D. 1934.

AND NOTICE is hereby further given that all creditors and others having claims or demands against the estate of the said EARL GEE are required, on or before the 6th day of August, A.D. 1934, to send by post prepaid or deliver to Montague Edward Harper, Official Administrator, Nelson, B.C., the administrator of the estate of the said deceased, their Christian names and surnames, addr sses and descriptions, and full particulars of their claims, a statement of their accounts, and the nature of the securities (if any) held by them.

AND TAKE NOTICE that after such last mentioned date the said Administrator will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and that the said Administrator will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall not have been received by him up to the time of such distribution.

BROWN & DAWSON,
Solicitors for M. E. Harper,
Administrator.

Dated this 27th day of June, A.D. 1934.

Harold Langston and Joan got away at the first of the week on a week's holiday with friends in Lethbridge, Alberta.

Mr. and Mrs. E. E. Cartwright, with Ruth and Roy, and Margaret Walkey, left on Saturday to spend a few days at the hot springs at Sinclair and Fairmont.

Mr. and Mrs. E. E. Cartwright, with Ruth and Roy, and Margaret Walkey, left on Saturday to spend a few days at the hot springs at Sinclair and Fairmont.

Mr. and Mrs. Sweet of Lacombe, Alberta, who are returning from a holiday at Victoria and Vancouver, are spending a couple of days here, guests of Mr. and Mrs. J G. Connell.

Frank Putnam, M.P.P., in company with his brother, Arthur, who is here on visit, got away on Friday last on a trip to Portland, Ore., and other points south of the line. Rodney was at the wheel of the Chrysler.

Sirdar

Mrs. T. Rogers was a visitor to Creston between stages on Saturday.

Mr. and Mrs. Fred Martello have left to spend their vacation at Rossland.

C. Botteril left at the week end for Nelson to move his furniture to Creston.

L. C. McFarland, late of Creston Motors, was here and up the lake on a visit.

Chas. and Gwen Wilson were at Canyon on Sunday taking in the ball game.

The water as indicated by the guage at Slough bridge reads 10.30 a fall of 5.15 for the week.

Misses Jean Henderson, Betty Speers, Agnes Crane and Nellie Payne are at present camping at Kuskanook.

Four horse drawn waggons, containing settlers and their effects, passed through here heading for the Nelson district.

C. Neil, nephew of Chas. Neil of Kuskanook, who has been spending a vacation here, has left for his home in New Jersey

G. Everall, with a small party, left by motor boat on a fishing trip to the creeks across the lake and were away over the holiday.

Sam Bysouth of Kuskanook took the five pupils who were writing their examinations at Wynndel there and back every day.

James Passcuzzo, who has been an inmate of the Cranbrook hospital, undergoing an operation for appendicitis, has returned to his home.

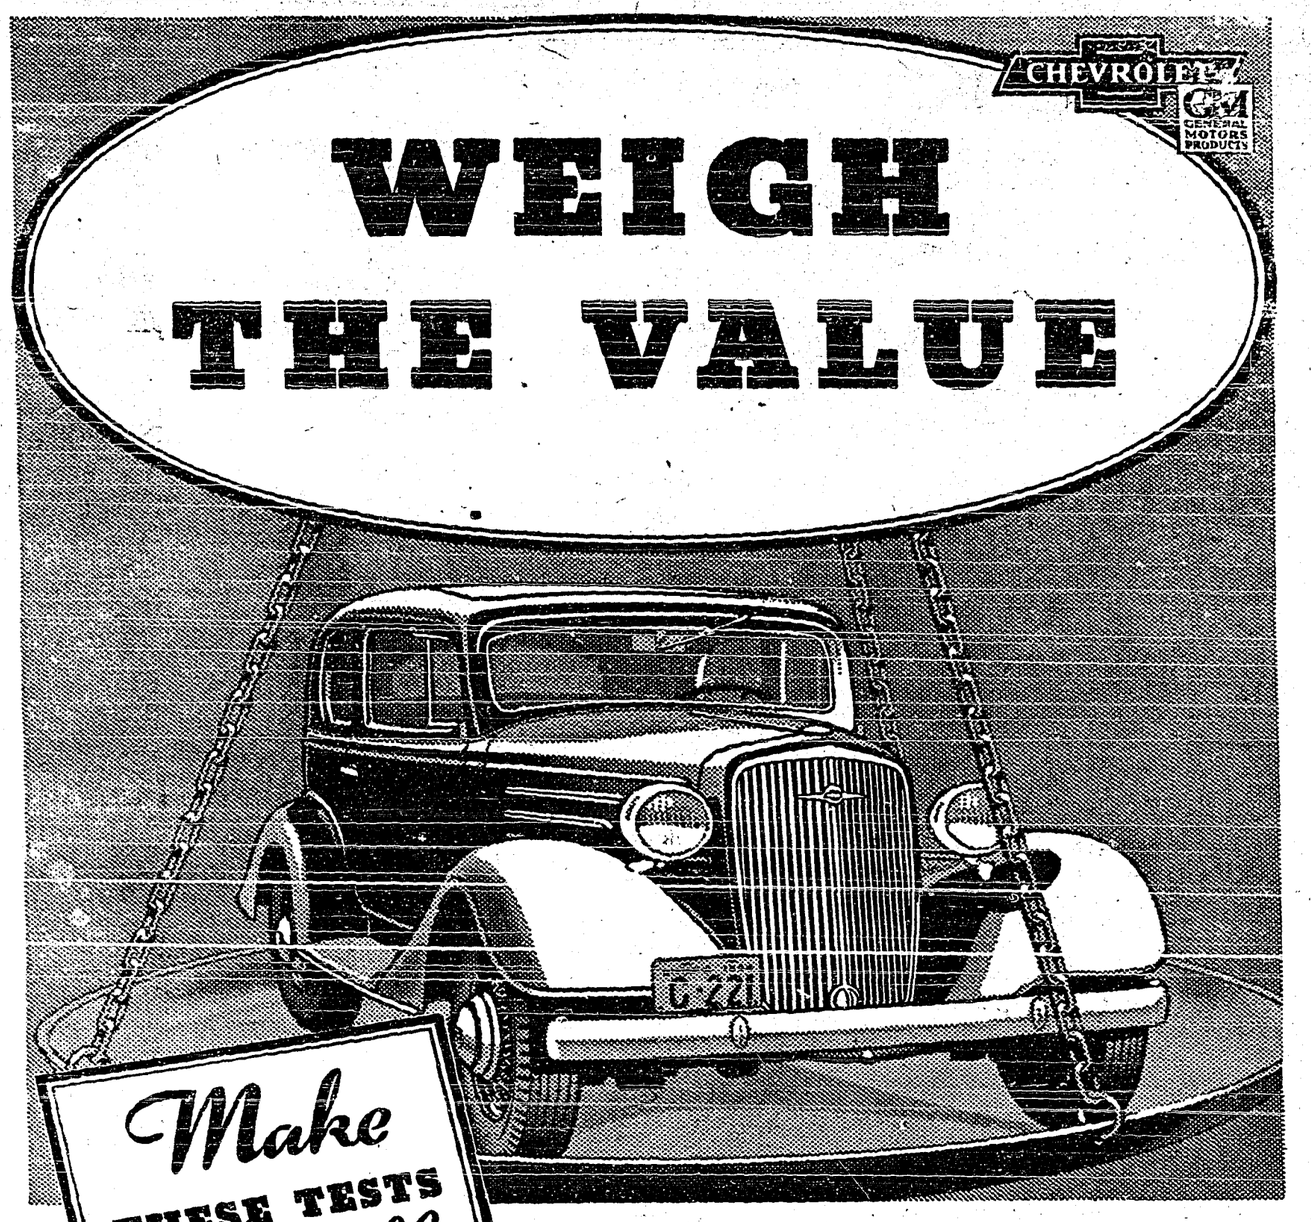
Mrs. Mead, who has been the guest of Mr. and Mrs. T. Rogers for the past several days, left for Creston, from where she is going to the coast.

That the strawberry crop is on the wane is in evidence by the number of trucks containi g Doukhobors passing through here westward this week.

Harry VanAckeran from Okanagan Centre, and Mr. Zwarich of Associated Growers, Vernon, were visitors at the home of Mr. and Mrs J. S. Wilson.

Miss Gwen Wilson and Ethel VanAckeran have left for Okanagan Centre to spend a vacation with Mr. and Mrs. C. Fallow, going by way of Spokane

Last week saw much activity not only here but at Kuskanook. Every available boat, motor or rowing, seemed to be requisitioned for cruising or fishing. Several cars arrived with boats on trailers.



Chevrolet's Extra Weight means Extra Value . . . More Comfort . . . Greater Safety . . . Longer Car Life

HERE'S something important to remember: Chevrolet gives you more *weight* than any other car in its class. More pounds of rugged, high quality materials in the Fisher Bodies, because Chevrolet doesn't skimp on comfort or safety! More pounds in the husky, solidly-built Chevrolet chassis, to safeguard dependability! And, best of all, you get these advantages of ample weight without any sacrifice of economy. Because, while it's a bigger, heavier car—faster and more powerful—*Chevrolet uses less gasoline than ever!* Drive the new Chevrolet and you'll never be satisfied with *any* other low-priced car!

C-134C

CRESTON MOTORS
CHEVROLET AND OLDSMOBILE

C. Ramsden of the Nelson News was a business visitor here during the week. He reports a much improved condition on his travels so far s his busiuess is concerned.

It is estimated that the number of cars passing this point far exceeds the number in any given year for the last three years. Cars from outside points are greatly in the majority.

C. Botteril has arrived to take charge of the caterpillar and will move his family from Nelson to Creston. C Mc Pherson, who had charge of one of the trucks, is being transferred to his home town, Kaslo.

Blasting on a considerable scale is to take place on the rock cuts on the main highway some time toward the end of the week. The powder has arrived and the compressor has many holes drilled ahead of the powder gang.

A bridge crew under C. McLean has arrived to do considerable fixing to the boom at Kootenay Landing. They have also unloaded the piles at the bridge at Athara ready to proceed with the renewal of the bridge as soon as the water level has reached a low enough stage.

Two motor accidents of a minor nature occurred on Sunday when a car from Alberta turned over on the hill approaching Sirdar from the east. Fortunately no one was hurt. The other took place just west of the quarry, when near a bad bend the car got ditched no one being hurt, but it was necessary to fetch a wrecker to get it back on the road.

July meeting of Creston Valley Post Canadian Legion was held Tuesday evening when, owing to the busy season, there was the smallest attendance recorded this year. In the absence of President John Bird, the vice president, J. B. Holder, occupied the chair. The summer picnic was discussed and committee appointed to select some central point on Kootenay Lake and make all necessary arrangements, Sunday, August 10th, being set tentatively for the event. The Women's Auxiliary in Creston and returned men and their families from the east shore of Kootenay Lake will be invited to participate.

TENDERS FOR SCHOOL JANITOR

Sealed tenders will be received by the undersigned up to Saturday, July 14th, 1934, for the position of janitor for one year of Creston schools: salary, $810.00 per calendar year. For full particulars as to duties, etc., apply H W. McLAREN, Secretary School Board, Creston' B.C.

NOTICE TO CREDITORS

NOTICE is given to all to whom the late Frank M. Rosen may have been indebted that al accounts against the deceased must be sent to John Anderson, Erickson, B.C., who will pay the same, but who will not be responsible for any accounts mailed after July 31, 1934.

J. G. Bell of Cranbrook, iz now open for business as plumber in his shop next the Ross Meat Market. He has long experience in this line and guarantees satisfaction. He is specializing in septic tanks.

A quiet wedding ceremony was performed at Trinity United Church manse on Wednesday evening when Rev. A. Walker united in marriage Olga E. Nelson, daughter of Mr. and Mrs. Chas Nelson of Kitchener, with Edward A. Bush of Kellogg, Idaho, and a former well known resident here The witnesses were Mr. and Mrs. Geo. A. Bush. The newlyweds left for their home at Kellogg on Thursday.

The largest attended orchardists meeting seen in Creston was that of Friday night when Messrs. Hembling, Barratt and Haskins of the Okanagan Growers' Stabilization Committee addressed the growers in the United Church hall, with W. G. Littlejohn presiding. Between them the three speakers well covered the marketing plans for 1934 if the policy they outline is adopted by the authorities at Ottawa under the new Marketing Act. Chief interest centered around their proposal for one big pool, instead of a separate pool for Creston and, possibly the Kootenays. At the close there was a poll with 60 votes cast, all of which were in favor of the proposed plan. For the convenience of those who were unable to vote on Friday night the ballot box will be in charge of one of the local committee at the Co-Op store all day Saturday.

The Dominion Day committee was agreeably surprised Sunday evening at the advent of a party of Knights and members of Maple Leaf Brahch of the Canadian Legion of Kellogg, Idaho. The entertainment committee of he Knights of Pythias and local Legion immediatley took the visitors in hand and registered them all as guests while here and gave them caate blanche to all the sports and dances. Among the visitors was Probate Judge Paul Batzle of Wallace and Capt. J. P. Rose, president of the Canadain Legion of Kellogg. The visitors were motored about he Valley and were greatley interested in the fruit industry and expressed snrprise in the evident prosperity of the community. They departed for home on Tuesday in bus they hab hired for this special trip, well pleased with the courtesies extended to them while here.

Lister

Birth—On June 28th, to Mr. and Mrs. A. E. Dent, a daughter.

Sam Lazachuk of Kellogg, Idaho, arrived in at the weekend on a visit with his daughter, Mrs. Hans Lindhorst.

Rev. M. T. C. Percival was here from Creston for Anglican Chnrch service on Sunday. Due to insufficient notice the turnout was not large.

Miss Frances Malthouse of Calgary, Alberta, arrived on Snnday on a visit with former Lister friends, and is a guest of Mr. and Mrs. Fred Powers.

Miss Webster, teacher in the junior room of Lister school, got away on Saturday to Nanaimo, where she will spend part of the summer vacation.

During the absence of Mr. and Mrs. Bird on vacation, Mrs. Bamford of Erickson is in charge of their home Miss Curtis is in charge at the store and postoffice.

Mr. and Mrs. John Bird and Cyril got away on Sunday by auto on the usual two weeks' vacation, which will be spent at Calgary, Alberta, with stops at Windrmere and Banff.

The closing feature at Huscroft school was a picnic, which the pupils very much enjoyed. Prizes for the best history and geographic projects during the year were awarded Warren Huscroft, Frank McCulloch and Bob Huscroft. Gladys McCulloch received the prize for the best collection pressed wild flowers.

Miss Gladys Webster of the Michel-Natal consolidated school teaching staff is here for the holidays with her parents Mr. and Mrs. J. H. Webster.

Robert Stewart met wite a painful accident on Monday afternoon at the sports at Exhibition Park, when he was knocked down by one of the ball players who was making a catch of a batted ball in the outfield.

The strawberry season is over and raspberries are now moving at top speed. During the strawberry season the pickers and packers at the Reed & Matner and E. Ostrensky ranches had frequent dances in the packing sheds, with harmonica, accordeon and violin music.

Olson--Danell Nuptials

Canyon United Church was the scene of a pretty wedding on Wednesday afternoon, when Miss Mary, eldest daughter of Mr. and Mrs. Leonard Olson, of Canyon, became the bride of Anton Danell of Kimberley, Rev. Andrew Walker officiating. The bride was gowned in white flat silk crepe with veil held in place by a sprig of orange blossoms and a boquet of pink and white rosebuds and fern, entering the church on the arm of her father to the strains of the wedding march played by Mrs. Kolthammer. The bridesmaid was Miss Ida Rylan, who wore pale blue silk crepe with accessories and boquet of pink snapragon. Lars Williams was best man. The usher was Manfred Samuelson. During the signing of the register "Because" was expressively rendered by Mrs. Kolthammer, with Mr. Kolthammer presiding at the organ. After the ceremony about 40 invited guests were entertained at the bride's home where a reception was held and wedding luncheon served, Misses Anne Gartland and Annie Bergeron assisting. Later in the afternoon Mr. and Mrs. Danell left by auto on a trip to Calgary, Alberta, the bride travelling in a green silk ensemble and white accessories. After a short wedding trip they will make their home in Kimberley where the groom is in the employ of the Consolidated Mining & Smelting Company. The bride is a highly popular member of the Canyon younger set and the best wishes of all are extended for long life, happiness and prosperity.

Immense Mineral Wealth Is Revealed By Development Work In The North-West Territories

Owing to the evidences that there will be greatly increased activity in the Great Bear Lake mining field, in 1934, Hon. Thomas G. Murphy, Minister of the Interior, has directed that the Sub-mining Recorder's office at Cameron Bay be raised to the status of a Mining Recorder's office and that all the records relating to the Great Bear Lake field be transferred from Fort Smith to Cameron Bay as soon as possible. The general increase in mining and prospecting activity will be greatly accelerated this year because of the expiration of the moratorium on representation work, and the change at Cameron Bay is to facilitate all lines of activity by having the records immediately available to miners and prospectors in the centre of the field, instead of necessitating a trip to Fort Smith.

That the mining properties in the Northwest Territories are developing is the keynote of the reports received by Hon. Mr. Murphy, from officers in the field during the year 1933, with the trend of operations in the past season chiefly in the development of present holdings toward a production basis. Great Bear Lake is still by far the most important mining field in the Northwest Territories and development during 1933, while not spectacular was of great significance as it practically proved that several promising properties have every indication of becoming important producers in 1934 and 1935.

The principal companies have carried out extensive trenching and diamond drilling with very satisfactory results and in a number of cases shipments of ore and concentrates have been made to reduction plants in British Columbia and Ontario. Following in the wake of this development activity, other improvements have been noted, such as cheaper and better transportation facilities both by air and water, improved radio communication, extension of surveys, location of a doctor and establishment of a Royal Canadian Mounted Police detachment in the centre of activity at Cameron Bay, and the erection of three sawmills and the opening of several stores. The addition of $100,000 worth of equipment to improve transportation facilities on Great Bear Lake is under consideration for the coming season by one of the leading transport companies.

The various government departments have been active in assisting industry in the development of the Great Bear Lake mining area. The department of the interior is charged with the administration of the Northwest Territories and consequently has played a leading role in this work. Maps of the country lying south and east of Great Bear Lake are in course of preparation in the Topographical and Air Survey Bureau of the department, based on aerial surveys carried out in co-operation with the Royal Canadian Air Force. These maps will be of great assistance in the prospecting and development of this very promising district.

Last year the Department of the Interior also had a townsite laid out at Cameron Bay and to date over 100 lots have been applied for and numerous buildings erected. A survey was also made by the department's mining inspector of the timber resources adjoining Great Bear lake with a view to their orderly utilization.

Other departments are active in this area. The Department of Public Works is improving conditions for water transportation at several points; the Department of Justice has established a Royal Canadian Mounted Police detachment at Cameron Bay; and an up-to-date wireless station has been installed at the same point by the Department of National Defence.

The search for gold was actively pressed by prospectors in many parts of the Northwest Territories during the past year and unconfirmed reports indicate that important discoveries of placer gold were made in the South Nahanni country. Last fall two prospectors returning from the South Nahanni area which lies in the southwestern part of the Territories and close to the territorial boundary between the Yukon and the Northwest Territories, reported that they had washed some rich gravel on McLeod creek and obtained a fair quantity of coarse gold. Although officials of the Department of the Interior were unable to confirm this report by personal interview, the news spread rapidly and a small rush resulted. By the end of December there were approximately 100 placer claims staked.

The original discoveries were on McLeod creek and two other small feeder creeks, the Diamond and the Canyon. It is also reported that claims have been staked on creeks running into flat and prairie rivers, which together with the McLeod are tributaries of the South Nahanni river. Several prospecting parties have been flown into the area while a number of others proceeded by dog-team from Simpson on the Mackenzie river.

In August last another coal lease was granted on the southwest shore of McVicar Arm, Great Bear lake, where the main outcrop consists of a seam of black lignite over eight feet in thickness. The Northwest Company, subsidiary of Imperial Oil Limited, operated its wells on the Mackenzie river 53 miles below Norman and produced over 4,500 barrels of petroleum and gasolene, of which about 90 per cent. was shipped to Great Bear lake.

Development work, which was carried on by the twenty most active companies in the district, continues to show the immense mineral wealth of this field. Several of the earliest claims staked have reached the production stage and notwithstanding the great attention which development work received during the past year over fifty tons of pitchblende and native silver were shipped out to reduction plants at Trail, British Columbia, and Port Hope, Ontario. One company has already been shipping for treatment, since 1931, high grade radium and silver ore and in December, 1933, transported by plane the first high grade radium concentrate obtained from its fifty-ton mill. Shipments of concentrates from radium and silver ores will be increased as soon as water transport becomes available this year. Although it is hardly four years since the first discoveries of radium-bearing ore at Great Bear Lake, Canada has already become an important producer of this valuable element and as production increases the Great Bear Lake area will be the source of ore from which the whole of Canada and the British Empire can be supplied with radium.

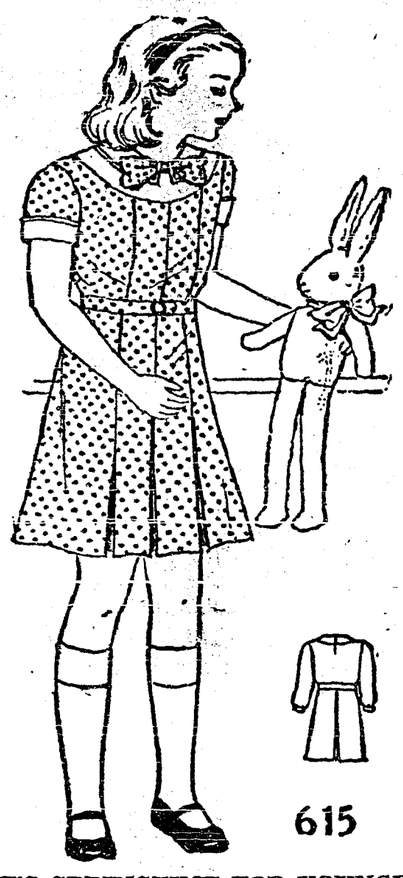
While the discovery and development of the deposits of radium-bearing ore at Great Bear lake has occupied public attention, silver is the predominating precious metal found in this field. Numerous veins containing high grade silver have been located on several large properties and development of these holdings has proved that several of them will be producers and shippers during 1934.

Hundreds of men were employed on the various claims undergoing exploration and development and the mining equipment is being raised to a very high standard. One mill has been handling over 50 tons of ore daily since early in December while a ten-ton pilot mill which was erected last year is being replaced this year by a twenty-five-ton mill. Plans have been prepared for a fifty-ton mill to be erected on another property this summer.

Work already accomplished on the different properties and plans underway indicate that 1934 will be one of the most important years in the development of the Great Bear Lake mining area. In other parts of the Northwest Territories exploration and prospecting work will continue to be carried on in the hope of further adding to the known mineral wealth of the Dominion.

Winnipeg Newspaper Union Fashion

By Ruth Rogers



IT'S SPRINGTIME FOR YOUNGER FASHIONABLES AS WELL AS FOR MUMMY

Pattern includes dress—Rabbit.

Today's little dress is carried out in an old-fashioned calico printed dimity.

The plaits of the skirt are arranged to form a box-plait effect and sway so prettily in motion.

Style No. 615 also includes pattern for the pet rabbit. Designed for sizes 4, 6, 8 and 10 years.

Size 8 requires 1½ yards of 39-inch material with 1½ yards of binding; rabbit requires ⅜ yard of 35-inch material.

Striped or plaided cotton is another very smart choice. Linen and challis prints are much favored and quite suitable for this easily made dress.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Plans For Ambitious Air Project To Be Launched In 1935 For A Rapid Trans-Canada Service

From Halifax to Vancouver in 19 hours, from Toronto to Halifax in six hours, and from Toronto to Vancouver in a trifle more than 14 hours --not a stunt, but as a day-to-day performance—is the ambitious project scheduled to be launched in 1935 by Canadian Airways in collaboration with other Canadian companies and the Dominion government.

The companies will be ready with a fleet of airplanes capable of sustained cruising speed of 200 miles per hour as soon as the government believes economic conditions adequately recovered to warrant extension of air mail contracts.

By next year, under unemployment relief work carried on by single men in government camps, four new flying fields will dot Canada from coast to coast, all as part of carefully planned preparations designed to give Canada as modern a commercial airways service as is enjoyed by any country.

When the service is launched Halifax will be little more than four hours from Montreal, and 11½ hours from Winnipeg.

Airplanes will shoot from Toronto via North Bay, to Winnipeg in a trifle more than six hours; on to Medicine Hat in another three and half hours, cut south through the Crows Nest Pass and on to Vancouver in less than five hours more.

Subsidiary services will bring Edmonton, Saskatoon, Prince Albert, Battleford and other points north of the projected main route within a few hours of it, most of them within less than an hour of connections.

Area Of British Columbia

New Figures Published By Lands Minister Believed Accurate

Exact area of British Columbia is 366,256 square miles. This figure is published by Hon. A. Wells Gray, minister of lands, on the strength of a detailed computation made by the surveys branch.

The 1897 Year Book, last official statement having the authority of the government, gave an area of 394,000. The figure most commonly used by department officials in recent statements has been 372,630. The Encyclopaedia Britannica gives only 355,855 square miles.

But the new figure is about as accurate as it is ever likely to be, despite the fact that there is an area of 75,000 square miles in the northeast of the province, bounded by meridian, and parallels of latitude that has not one mile of survey line and has not a single survey monument in it.

Of the 366,256 square miles now known to constitute the area of the province, the report shows 6,976 square miles to be covered by water in rivers and lakes.

Attention is drawn to the fact that, despite the presence of several large cities, British Columbia's total population amounts to less than two to the square mile. For every man, woman and child in British Columbia there is half a square mile of land.

No Job For Women

Only Men Should Pilot Commercial 'Planes Says Woman Aviator

Antonie Strassman, one of the first German woman flyers, who arrived in New York recently, admits ruefully that women must confine their exploits to the field of amateur aviation.

"The day of experimental flying is past," she said. "It is time for women to admit that commercial aviation is a man's job. Passengers have more confidence in male pilots. Women are not found at the controls of locomotives and they should not seek to pilot the great commercial 'planes."

Miss Strassman has taken out her first naturalization papers and hopes to live in New York. She will continue to fly, but only for her own amusement.

The longest aqueduct in the world is the Pugliese. It is 1,175 miles long and serves 536 Italian towns.

South Africa may reduce its tax on excess profits of gold mines.

England Wants Store Cattle

Market For Two-Teeth Animals At Spring And Autumn Sales

To avoid any misapprehension on the part of Canadian shippers of "store" cattle, says the Canadian trade commissioner, it should be clear that "stores", according to the British farmers' needs, are two-teeth or two-year-old animals, preferably the former. Unfinished three-year-olds are not considered as being stores and never will be. Feeders will not buy them. They are always sold for immediate slaughter. Even two-year-olds may be too badly built to find buyers other than the butchers, but there is an outlet for the good ones and always for the two-teeth animals at the spring and autumn store cattle sales. The seasons for the best trade in store cattle are late April, May, June, September, October and early November.

Farm Trucks And Autos

Statistics Show A Motor Vehicle For Every Two Farms

The introduction of the tractor some twenty odd years ago marked the beginning of the period of most rapid expansion in size of farm, particularly on the plains of the West where such power could be used to advantage. In 1921 there were 47,455 tractors on farms and 105,269 in 1931. Along with this increase in use of tractors came increased dependence upon trucks and automobiles. In 1921 there were 157,022 such vehicles on the 711,090 farms, or about one to every four farms. In 1931, with trucks recorded separately at 48,402, and automobiles numbering 321,276, there was a motor vehicle for every two farms. Actually 303,364 farms reported cars and 46,366 reported trucks.

Official Stamp For Beef

The two first grades of beef have been designated by the Dominion government as "Red" which is "Choice" and "Blue", which is "Good". These official stamps appear on every cut in red or blue edible ink, according to grade. The ink is the product of the Division of Chemistry, Dominion Department of Agriculture, and is perfectly harmless.

DEFIED A KING FOR LOVE

All the king's horses and all the king's men couldn't make young Prince Sigvard of Sweden change his mind about wanting to marry Fraulein Erika Patzek, German film actress, with whom he is shown in London. The Prince flatly refused the plea of King Gustav of Sweden, his uncle, that he reconsider the matter.

WORLD HAPPENINGS BRIEFLY TOLD

New motor cars on the roads of the United Kingdom in March numbered 43,735 as compared with 33,746 in March, 1933.

Charles S. Thomas, 84, who capped a stormy career as United States senator and governor of Colorado by defying President Roosevelt's 1933 order against gold hoarding, is dead.

Canada's greetings were extended to the Prince of Wales on the occasion of his birthday, June 23, by the Governor-General, the Earl of Bessborough.

Henry Lawson Royle, 16, attempting his first flight, at Herbery airport, Yorkshire, crashed and was burned to death 10 minutes after the take-off.

Dr. Wm. Boyd, professor of pathology in Manitoba Medical College, has accepted a similar position in Stanford University, California, it was announced. He will leave Winnipeg late in August.

The International Institute of Agriculture estimated that the drouth will cause European wheat harvest this year to fall short of 1933 by 260,000,000 bushels. The 1934 harvest is expected to total 1,470,000,000 bushels.

Rt. Rev. Ernest William Barnes, Bishop of Birmingham, declared at a peace service in London, that Great Britain should disarm even though she is alone among powers in doing so. Any alternative policy, he argued, might lead to war.

The Rotarians, 10,000 of them, were welcomed to Detroit. Representing 80 nations and nearly as many languages and political philosophies, they assembled for the 29th convention of Rotary international.

Nowak Kazimierz, Polish newspaperman, who left Warsaw many years ago to get material for a book, has arrived at Cape Town after pedaling across Europe and down the length of Africa on a bicycle.

SUNDAY SCHOOL LESSON

JULY 8

ASA RELIES ON GOD

Golden Text: "The Lord is my helper; I will not fear: What shall man do unto me?" Hebrews 13:6.

Lesson: II. Chronicles, Chapters 14-16.

Devotional Reading: Psalm 2:1-5.

Explanations And Comments

The Prophet Azariah's Counsel, 2 Ch. 15:1-7. The Spirit of God came upon the prophet Azariah, the son of Oded. In Old Testament times the word spirit refers to God's power. As Asa, the king of Judah, was returning victorious from his engagement with Zerah, the Ethiopian (14:9-15), Azariah went out to meet him. Instead of greeting him with words of congratulation and praise, he solemnly warned him that he must remain loyal to God. "Hear ye me, Asa," he said, "and all Judah and Benjamin [the tribes over which Asa was king]: Jehovah is with you, while ye are with him; and if we seek him he will be found of you; but if ye forsake him, he will forsake you." "He told them plainly upon what terms they stood with God. Let them not thing that, having obtained the victory, all was their own forever; no; he must let them know they were upon their good behavior. Let them do well, and it will be well with them, otherwise not" (Matthew Henry). Compare David's counsel to Solomon, 1 Ch. 28:9.

Asa's Reforms, 15:8. Encouraged by Azariah's words (probably the words (Azariah the son of" have dropped out of the text in copying, or Oded is a mistake for Azariah), Asa put away the abominations, destroyed the idols, and did away with the degrading heathen rites, out of all the land of Judah and Benjamin and out of the cities which is father Abijah had taken (2 Ch. 13:19) from the tribe of Ephraim. How much such a reformation was needed we realize when we read that Maacah, the queen mother, had erected an image of Astarte in Jerusalem. Asa had the image ground to dust and buried in the Valley of the Widron, and he deposed the queen. Asa rebuilt the altar of burnt offerings which had been erected before the temple sixty years earlier.

The hemlock tree is not poisonous, the "hemlock" poison made famous by Socrates being derived from a plant similar to the wild carrot and containing poison in root, stem, leaf and seed.

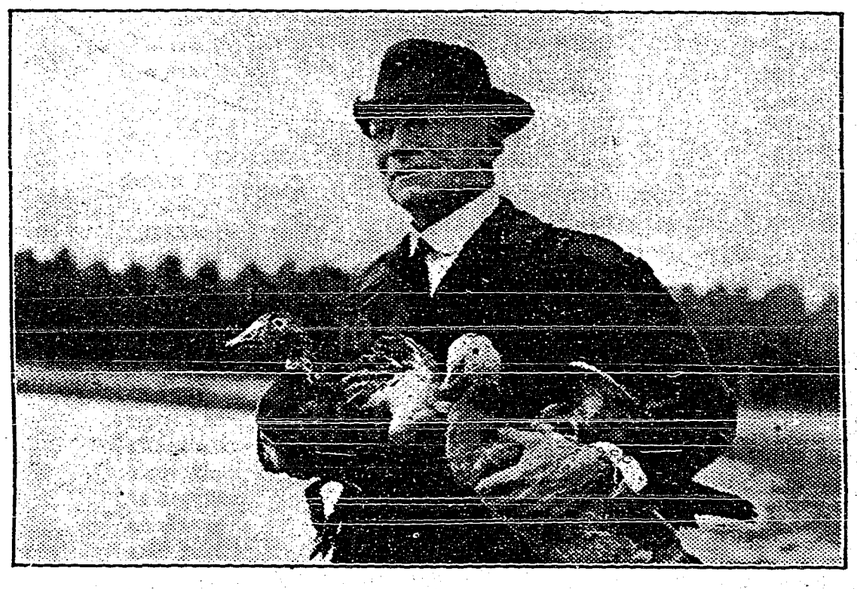
ASSISTING NATURE

By JACK MINER



During the past year I have read a number of articles, both in magazines in newspapers, as well as many letters that have come to me, on the subject of "Nature Balance", decrying actions or systems on the part of man which the writers described as "interfering with Nature", "upsetting Nature's balance", and so on. To all who adopt that attitude I should like to put myself on record to the effect that, personally, I believe the so-called "balancing" of Nature was left entirely with man, and that I believe in assisting Nature for the benefit of humanity. God created everything—everything and then He created man "in His own likeness and gave him dominion over all:" that is, as I understand it, the power and authority to manage everything here on earth.

Look, for instance, at the animal world, with the livestock in the farmer's barnyard as example. Did God create the Jersey cow, and the Holstein, and the Hereford? No. He gave them the original stock and then God, through man's instrumentality, developed many breeds, some for the high cream content of their milk, some to produce the greatest quantity of milk, and some as the best beef cattle. All have been on the earth a long time, of course: but their differences are the result of man's management. And, remember, man had to interfere with Nature to develop them.

Much the same thing is true of the horse, different strains being cultivated for particular purposes, such as the Clydesdales and Percherons for heavy draught work, and the blue-blooded descendants of original Arab stock for racing.

Recently I was in some of the southern United States, where the character of the farm work to be done is too heavy for the common ass, yet where the climate is too warm to permit of the horse doing its best. In that part of the continent, therefore, man has crossed the ass with our common horse and produced a beast that withstands the heat and is also strong enough to do the work of tilling the soil. Yes, he has developed the mule. But the mule kicked and, so far as I know, has gone no farther.

In poultry, if you trace back the various species it is very easy to see that it has been the work of man that has developed the different breeds—Leghorns, Brahmas, Minorcas, Plymouth Rocks, and so on—some of which are especially valuable as layers, and others as food. Our much-prized turkey is nothing more nor less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canadian North-west was grazed by millions of wild buffalo (Bos bison). Then came the white man who, realizing the value of the fertile soil, established a park where a herd was placed to preserve the species from extinction, slaughtered the great roaming herds and, turning the land upside-down, made it into one of the largest and most valuable of earth's great wheat-fields, with towns and cities and stately governmental buildings dotted here and there across its vast expanse. Remember, though, that in order to bring about this state of things, man had to "interfere with Nature" as some would call it.

And speaking of wheat-fields, wheat has been man's favorite food for centuries. Yet wheat, even as it was being grown in Canada in comparatively recent years, had certain weaknesses—it had to be planted in the fall and did not always survive the severity of the Western winter: it was not producing as abundantly as seemed most desirable: it did not mature rapidly enough always to escape the early Autumn frosts. Then came to our aid such men as Professor Charles Saunders, cerealist, of Ottawa, and by study, experimentation and the rigid selection of choice grains, developed a wheat that could be planted in the spring, that would yield several bushels more per acre than had been the rule previously, that would mature within a certain period of time, and that yet retained all its former qualities. We have to-day the Marquis and the Garnet and other species of wheat, developed by man. God created the original, the germ: but man was given—and has used—the power to develop, manage and control it.

Or if you will consider your flower garden, look at the Iris. God gave to us in America a little, insignificant flower growing along the banks of streams which we called, commonly, the "flag". From it man has developed Irises that grow three or four feet in height, varied in color, and some giving out an exquisite fragrance. But man had to interfere with Nature to accomplish this. Or take the rose. Did God create the American Beauty rose? He gave man brains, and a little old wild rose which served as the germ, so to speak. To-day, through the efforts of outstanding botanists, man has been given flowers of beauty and fragrance, as the Creator intended should be done.

But let us look at another side to the question. At the same time that God created the little wild rose, He created also the weed typical of which is the Canadian thistle. Still he gave to man the brains and the means of controlling these also, so that they may be restrained from predominating the plant world.

In your orchard are many varieties of fruit. Did God create the Stark-Delicious apple, the Northern Spy, and other varieties? No. He gave man the little wild crab, and the hawthorne, which is a minature apple or germ, and from these man developed what we have to-day. Yet, according to some people's statements, if you kill the mice that girdle these fruit trees when they are small, you are "interfering with, or upsetting, Nature's balance."

If you are raising poultry, or other bird life, and hawks begin to destroy and live on the birds, and you fail to take a gun and shoot the hawks, then you are not using the brains God gave you.

If your clothing were to become infested with vermin or your dwelling with rodents you would destroy the insects or animals that were troubling you. Yet (if they were consistent in their argument) these people would have to maintain that in doing so you were "upsetting Nature's balance," since God created all these creatures at the same time. Or how about the fly, carrier of typhoid? Do you control it or, preferring not to disturb "Nature's own", let it live? Personally, I am glad He gave man "dominion over all" these things.

Indeed, one is moved to ask the question: What would our animal world, our farms and orchards and gardens—our whole world—be like if man had not assisted Nature? Yet the very minute the white man discovered this continent, came ashore, cut down a tree and began to develop North America into a garden for hundreds of millions of people, that man, according to some, disturbed the balance of Nature.

As for me, I thank God for all He made—for the raw materials He gave us with which to work: that He made us in His own likeness, after His own image, and endowed us with sufficient brains to develop those raw materials and keep on discovering and bringing within reach of us all the blessings He created. To illustrate my meaning, allow me to quote the poem, "Making a Garden", written by Ida M. Thomas:

Man ploughs and plants and digs
and weeds,
He works with hoe and spade;
God sends the sun and rain and air,
And thus a garden's made.
He must be proud who tills the soil
And turns the heavy sod:
How wonderful a thing to be
In partnership with God!

I say, He wants all of us to be partners.

Never Shows Correct Time

Silesian City Clock Has Been Fast For 650 Years

Gorlitz claims a distinction which is probably unique. A clock in this ancient Silesian city has not shown correct time for over 650 years. In 1953 a conspiracy was formed to murder the councillors as they left the town hall at noon. Conscience, however, overtook one of the conspirators, and he put the clock forward seven minutes. As a result, the would-be assassins arrived on the scene too early and were arrested by the watch. To-day the clock is still kept seven minutes fast in memory of the councillors' escape.

Little Journeys In Science

THE ICE AGES

(By Gordon H. Guest, M.A.)

Niagara Falls and the Great Lakes, vacation paradise to many from the western plains, are legacies left to us from the last great ice age, which enveloped this continent many thousands of years ago. Once looked upon as great catastrophies because they destroyed life and defaced the earth's surface, the ice ages are now considered by geologists to have been not entirely destructive.

It is thought that there have been four "ages of ice" in the geological history of the world, each lasting for many thousands of years, and bringing about great changes in the earth's surface. The last ice age is believed to have covered about 12,000,000 square miles, and of this, 6,000,000 square miles is still under ice. It is notable, however, that the world was never entirely covered with ice at one time, and thus life was always preserved, to spread again when the ice disappeared.

Geologists refer to an ice age, as a time when ice encrusts large areas of the earth's surface and all forms of life in these regions become extinct. The condition is brought about by "ice caps", huge blocks of ice formed by piles of snow which partially melt, congealing to form ice; and slowly spreading farther and farther.

It is believed that it was in the melting of these great ice caps that the Great Lakes and Niagara Falls were formed, the peculiar rocky and uneven nature of the earth's surface retaining the water as it melted.

A woman's intuition is more powerful than a man's knowledge.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernet's Powder. Largest seller in world—holds plate so tight they can't annoy yet so comfortable they actually feel and act like your own. Keeps mouth sanitary, breath pleasant—special comfort-cushion prevents sensitive gums from getting sore. Small cost—any drugstore.

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go a a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earrings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of $1,000. Peter finishes his exhibit ,and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration". Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope".

(Now Go On With The Story)

CHAPTER L.

Avis was one of the first visitors at the museum when the exhibit opened the following week. Her eager, anxious inspection of the vast gallery filled with sculptured pieces, might have indicated that she was one of the most ambitious of the entrants. Her eyes scanned one side of the room hurriedly, darted to the other end. Even in that brief interval of suspense, her heart sank heavily with the dread of disappointment, before her eyes found that object for which they were searching impatiently.

Yes, there it was. Peter's "Land of Hope" had made the exhibit. It had been accepted for display with the best by the selecting committee. She crossed the room quickly to examine the card which hung from the modeled group. The data was accurate. There would be another week of suspense before the final award of the scholarship prize. She must help Peter to endure it, somehow. Of course, she hadn't much hope now for Peter's chance of the reward. She was only happy for him that his piece had been accepted. That should encourage him.

Besides, she now had an alternative to her first plans involving his removal to Paris. How fortunate that she had thought of suggesting that Peter could do some work for her to meet his loan from her. Had she made the suggestion now, he might have suspected that her pity prompted the plan. As it was, she already had arranged for his services if he did not go to Paris.

The idea presented two advantages: instead of relieving him of his indebtedness to her, it would practically double his obligation to her, in the light of gratitude. Not only would Peter feel obligated to her for the timely loan of money, but for the opportunity to repay it with his own work. She also would see that enough admiring friends placed orders to add considerably to that obligation. So, she still held the advantage—even without Paris. That would be but a simple step when she had won Peter completely.

Paris, Rome, Athens — everything would be theirs to command, then. Her thoughts merged into the present tense, so confident was she of the future.

So engrossed was she in her plans that she almost collided with Peter in the corridor as she was leaving the exhibit room.

"Peter!" she exclaimed, "it's in!" not even granting him the thrill of discovering it for himself.

"Is it?" the gleam which lighted his eyes betrayed his calm. "I'm surprised."

"Oh, I'm not. It is a marvelous thing, but—"

"I know. You might as well say it has no chance with the others."

"Why, no," she denied. 'Would you believe it, I have been in there for 10 minutes looking at that piece that I have seen dozens of times before, and I didn't even notice the other entries?"

He grinned boyishly. "You are prejudiced, madam. You would make a fine judge, now, wouldn't you? Come back with me, and we'll see what else there is to see."

As if she would refuse! She cared nothing about comparing the talents of his contemporaries, but just to walk beside Peter anywhere, to share anything with him, was sheer delight and an adventure.

She led him to his own work and he read with a strange rush of exultation the prosaic words of information on the classification card. Ostensibly, it was not important; but to Peter it represented a goal toward which he had been striving for four long, arduous years. He had not intended that it would be just like this, but at least, his work had met with the approval of the judges well enough to be in the display. It was a small personal triumph which portended much more than appeared on the surface. He had not worked in vain.

For a moment he forgot that he was not alone, so far did he withdraw into his own secret thoughts. Avis, the room, and its other occupants, the scores of plaster figures all about him, receded into space; and he was alone with his little moment of personal triumph.

Camilla was the first to intrude into that sanctuary of his thoughts, and it was almost as if he would speak with her that he turned toward Avis. Thus abruptly returned to the time, place and reality, his face clouded for an instant, like the sun is dimmed by the sudden passing of a small white cloud.

His comment was changed to, "Well, it's there!" with a long sigh of near-satisfaction. "Now let's see what argues with it." His critical eyes roved over the room. "Shall we try to pick the winner?"

They roamed about the room, commenting, admiring, criticizing. Avis favored only the symbolic figures such as Peter had prepared to enter. But Peter admired an excellent bust of the city's leading citizen, Andrew Havelock.

"It's absolutely marvelous," he declared. "I've not only seen pictures of him, but I've seen Havelock himself, talked with him. It is the truest likeness of a human being that I've ever seen in plaster." He turned around. "That sea gull with spread wings is a beauty, too; every line is rhythm and motion, but I doubt if it has a chance against this bust. I don't think there is a nude figure here that can compare with either of them."

"Then what about 'Land of Hope'?" she reminded him.

"Oh—that! It's completely out of the running. I am going back to work, in earnest. At least, this much has inspired me. By the way are you in any hurry for your stuff?"

"Not if you have something more important to do. I can wait."

"Not at all. I just want to know where to begin. I'm at your service, if you say so."

"I do say so!" she declared. "How about coming to tea at the house tomorrow and consulting with mother about the garden piece first. You can get them modeled and while doing the stone work you can fill in on my things at the studio."

"Fine!" he agreed. "You're a great planner, aren't you?"

"Plans are only great if they work out to the proper advantage."

"And what is that advantage?"

"Your success. It all depends on you," she replied, with more significance than he knew.

"That suits me."

They were standing outside now, beside her smart coupe, parked at the curb. "I'll drop you at the studio," she suggested.

"Thanks a lot. But I'd rather walk, to help work off some of this newly acquired enthusiasm. Too much at one time is bad for the mental balance. Did you ever feel giddy with inspiration? Well, that is my present condition," he grinned. "Besides, I want to drop in somewhere right away and 'phone Camilla the good news. She will be anxious to hear. I promised to let her know as soon as possible."

Avis set her teeth hard over his loyalty to Camilla. It had not wavered since that first moment on the night of the tragedy. Nor had she dared mention to him the incident, even to learn what his reactions had been, or what they had said to each other. There are some forbidden places into which even the most audacious and unscrupulous may not enter. She would just have to be patient and await the outcome. Her campaign was now prolonged and confronted with added difficulties. But she was a good warrior who never admitted defeat.

"Well, so long," she waved gayly, and darted away with a roar of the powerful motor.

Camilla was jubilant over Peter's announcement. "I knew it would get in," she told him. "Congratulations, darling. I have a little special dinner all prepared to celebrate tonight. Be there at six, will you?"

"Okay, sweetheart. But you took a pretty long chance getting that celebration ready before the victory, didn't you?"

"I disagree. It was a sure thing. But even so, a celebration was in order. It is quite an event to have you for a dinner guest, even."

He laughed. "You won't think it's an event when you have to face me across the dinner table every day for the rest of your life," he warned.

"It won't be. It will be—paradise," she declared.

Another Useless Invention

Cellophane Lining For Bathtub To Eliminate Rings

"No more rings around the family bathtub."

This is the promise held out by Robert I. Innis, Long Wharf ship model maker, who, in spite of the handicap of having a crippled arm, has patented an invention which should do much in the way of preventing domestic discord arising from those rings which add nothing to a bathtub's beauty.

The invention consists of a specially treated waterproof cellophane lining which can be instantly loosened from the inside of the bathtub by means of a rig-cord when the bather is through.

China's Adverse Trade

Great Outcry Is Made Against Use Of Imported Goods

In view of the fact China's adverse balance of trade this year promises to run to at least $700,000,000, there is a great outcry in the country against use of imported articles of all kinds.

It is admitted foreign goods and foreign cotton must be imported as necessities, but other foreign-made things, from automobiles to chewing gum, are now being denounced as "useless luxuries" by the Chinese language press. Incidentally, China imported $2,000,000 worth of chewing gum last year, and the patriotic newspapers say most of it was consumed "by young Chinese women who are dance-mad."

Joining the present campaign against use of foreign-made goods, many organizations are passing resolution pledging all members to use only Chinese made products. The entire staff of the ministry of railways at Nanking, for instance, has sworn a solemn oath to wear nothing not made of native materials.

Chinese women are objects of particular attack in this campaign against foreign goods. The women of the treaty ports, and those who adopt a semi-foreign mode of life and dress, are being particularly denounced as unpatriotic.

Sink Great Shaft

Would Bore Deep Hole In Earth To Tap Unlimited Power

The boring of a great hole into the earth, with all mankind lending a hand to the job, was suggested before the American Association for the Advancement of Science in a paper prepared by the late Dr. C. E. Grunsky, president of the California Academy of Sciences.

The paper was read by Dr. F. N. McFarland, vice-president of the California academy, who succeeded Grunsky upon the latter's death June 9.

Dr. Grunsky's thesis said if mankind would sink the great shaft as far as human ingenuity would permit, the results would fully repay the effort.

The centre of the earth is a great reservoir of power, if it could be tapped, gaseous pressures of 900,000 pounds a square inch would be the reward.

Dr. Grunsky did not conceive that man could burrow down very closely to the central core of the globe but suggested a great co-operative effort would result in penetrating the outer crusts to a vastly greater depth than ever before—depths he thinks could be reached which would tell science many valuable things.

THE RHYMING OPTIMIST

By Aline Michaelis

TWO YEARS OLD

With eyes like heaven
And hair of gold,
This joy is given,
Now two years old!

When have we caught this
Flower, this song?
Who would have thought bliss
Could last so long?

Here is beguiling,
Embodied mirth,
Like April smiling,
No taint of earth!

This trust is given
For us to hold:
Eyes dear as heaven,
Heart pure as gold!

From 678 replies from representative farmers in the three Prairie Provinces, it would appear that the averages of the longest lived articles of farm machinery were the wagon (average 20.1 years) and the packer or roller (20 years). The ploughwalking (19.4 years) came next, followed by the sleigh (18.5); the tedder (18.1); spike-tooth harrow (18.0); hayfork (17.4); potato digger (17.3); hayrake (17.2); and corn cultivator (17.1). The shortest lived were the tractor (11.4); automobile (9.5); motor truck (8.9), and the hayrack (7.3 years).

Portable searchlights for fire fighting are being used in the Berlin fire department.

MINARD'S "KING OF PAIN" LINIMENT

Little Helps For This Week

"I would have you without carefulness." I. Corinthians 7:32.

O Lord, how happy should we be
If we could cast our care on Thee,
If we from self could rest;
And feel at heart that One above,
In perfect wisdom, perfect love,
Is working for the best.

Cast all they care on God. See that all thy cares be such as thou canst cast on God, and then hold none back. Never brood over thyself, never stop short in thyself, but cast everything, even this very care which distresseth thee upon God. Be not anxious about little things if thou wouldst learn to trust Him with thine all. Act upon faith in little things. Commit thy daily cares and anxieties to Him, and He will strengthen thy faith for greater trials. Rather give thyself into God's hands, and so trust Him to take care of thee in all lesser things as being His, for His own sake, whose thou art.—E. B. Pusey.

Seems To Be Unwise

Manchester Guardian Comments On World Destruction Of Food

In any case, to an economist from some other world, the whole wave of restriction—that is the deliberate destruction of food and raw materials—whether under the direction of Mr. Bruce or of Mr. Elliot or of Mr. Roosevelt, would appear fantastic. In nearly every country during the past few years, in the name of gold standards or balanced budgets, the standard of living of the mass of the people has been steadily forced down. Even in the pre-quota era in Great Britain signs of malnutrition among children were not lacking. Do we then encourage the farms of the New World to send us cheap bread, butter, and meat? No; we invite them to destroy it. The word has gone forth that cheap food is a curse.—Manchester Guardian.

Strange Dictionary

Smithsonian Institution Compiling Record Of Indian Sign Language

The strangest dictionary ever compiled, listing not words but signs, is being completed at Washington to rescue from oblivion the Indian sign language which was once North America's "universal tongue" from coast to coast. Hundreds of signs and their word meanings are being listed on cards by Smithsonian institution scientists with the aid of Richard Sanderville, 70-year-old Blackfoot Indian, one of the last of his race who knows the sign language.

The Canadian Shield

The central part of Canada is underlain by a great expanse of very ancient, hard crystalline rock known to geologists as the Canadian shield. This has an area of about 2,000,000 square miles, or more than half that of the whole Dominion.

Even small towns and rural districts in South Africa are feeling the prosperity wave.

Making a noise is one of the leading infant industries.

Local and Personal

Mr. and Mrs G. R. John spent the weekend with friends in Nelson.

Christ Church Sunday school is closed for the months of July and August.

Mies E.Merton of Milk River,Alberta. is a Creston visitor, a guest of Miss Edith Cook.

TENT FOR SALE—Secondhand tent, 8x12, three-foot wall, going at $9.50. V. Mawson.

Miss Alice Wilson of Fernie is a Creston visitor this week, a guest of Mrs. G. G. McKenzie.

"Shorty" Bourdon, who is now employed at Greenwood, spent the weekend with his family here.

Roy Smith of Seattle. Wash., is a Creston visitor this week, a guest of Mr. and Mrs. A. Biccum.

Mrs. G. G. McKenzie, in company with Mr. and Mrs. Tom Wilson, were weekedk visitors at Fernie.

Art Couling and Percy Robinson were visitors at Spokane at the weekend, making the trip by motorcycle.

F. P Levirs, principal of the high school, with Mrs. Levirs, left at the end of the week for Victoria, where they are to spend the vacation.

Miss M. Smith of the high school teaching staff left on Saturday for Toronto, Ontario; and will spend the summer in Eastern Canana.

FOR SALE—Two work horses, 1100 to 1300 lbs. Also power washing machine and 1½ h.p. gas engine. $20 for out. fit. Geo. Nickel, Creston.

Allan Speers, who has been attending school at Victoria, arrived on Saturday to spend the summer with his parents, Mr. and Mrs. S. A. Speers.

Auction sale of furniture and household effects at the residence of L. W. Stephens, Canyon, at 1.30 p.m , Wednesday, July 11th. Terms, cash.

Mrs. Angus Cameron and two boys. George and Laverne, of Beaverdell, are here for the summer, a guest of her parents, Mr. and Mrs. T. Mawson.

Wild Rose Lodge Knights of Pythias install the new officers at the July meeting next Thursday evening. R. M, Telford is the new chancellor commander.

Ken. and Miss Ada Lynne of Botha, Alberta, and Gordon Duckworth of Stettler, Alberta, are spending a holiday here, guests of Mr. and Mrs. A. R. Lynne.

H. L. Crosthwait, a former well known resident, who left here a few years ago for the coa t, and who later went back to Ontario, returned to Creston at the end of the week

By a score of 12-3 the Creston Athletcis trimmed Creston Intermediates for the valley baseball championship at the K. P. Dominion Day sports tournament Monday afternoon.

Mr. and Mrs. Doug. Corrie were weekend visitors with friends in Nelson. Mrs. Nelson Ball, who has been visiting frieods here, returned to her home in Nelson with them.

In connection with the Dominion Day celebration the hoider of ticket No. 50, series 2102, is entitled to a blanket, and holder of ticket No. 18, series 2105, is entitled to a tray. See Vic. Mawson.

Miss Marion Carr, R N., matron of Creston hospital, is taking a two weeks' vacation at present, part of which she is spending at her home in Cranbrook In her absence Miss N. Downes, R.N., is acting matron.

FOR SALE—Five lots with five-room house on Fourth Street. About one-half acre in all, planted to Bing and Royal Anne cherries, with a few apple trees. Price, $1000. Also some furniture. Enquire Review Office.

Mr. and Mrs. L. C. McFarland got away on Friday for their new home at Penticton, where they have purchased the Home service station. They were good citizens and will be missed by a wide circle of friends.

Mr. and Mrs. J. F. Warren of Calgary spent a couple of days here at the end of the week, with the latter's parents, Mr and Mrs. W. M. Archibald. Their daughter. Marylin, accomponied them and will spend the summer here

Resarve Wednesday evening, July 18, for the ice cream social tea, etc., at the home of Mrs. Sid Parker, Canyon power dam, under the auspices of Canyon Ladies' Auxiliary to Creston Hospital. The event of the season. Don't miss it.

Mr. and Mrs. C. Smith of Detroit, Mich., are holiday visitors here, guests of the latter's brother and sister-in law, Mr. and Mrs. H. S. McCreatn. It is just 20 years since they last visited Creston and hardly recognized the business section.

Orchardists who were unable to mark their ballots at the growers' meeting on Friday night are reminded t at they can perform this important duty on Saturday, July 7th, at the Co Op. store, where the ballot box will be in competent hands from 9 a.m. to 8 p.m.

Mr. and Mrs. W. Fraser got away on Friday on a well earned ten weeks' vacation most of which they will spend in the Old Country—meaning Scotland. They travelled via Chicago, and are due to sail today from New York. Returning they will visit at Montreal and Toronto, coming home via the C.P.R.

T. J. Crawford left at the end of the week for his usual two months' vacation at points in Eastern Canada, his first stop being with his mother at Fort William, Ontario. Jose Crawford, a brother of W. H. and T. J. Crawford was elected as Liberal member for that city in the recent general election in Ontario.

FOR SALE—Kroehler bed davanette upholstered in rose jaquard, good as new; oak centre table, bed complete with mattress and best coil springs; ivory dresser and bedroom table; rocking chair, dining room table, kitchen table and chairs, cot and mattress; Sonora gramaphone and 40 records. Mrs. R. M. Telford, Erickson.

R. S. Bevan went up to the forestry lookout on Goat Mountain on Tuesday, and will be in charge of observation work there for the next two months. Dick has promised to keep a diary and some rare stsries on wild life may be looked for when he returns.

The various organizations of Trinity United Church combined for a congregational shower at the church hall, Thursday night last, honoring Miss Mary Goodwin, whose marriage took place on Tuesday. Many were out for the affair and the bride-elect was remembered with a host of miscellaneous gifts which were brought in on a wagon in charge of Kathleen Joyce and Allan Comfort, while the "official presentation" was made by Dorothy Boffey. The evening was spent in music, games, community singing, and a lunch to close the evening
