Basketball Talent Annual Meeting

League Assured for 1934-35 with F. P. Levirs, President—Meet on October 5th Select Teams—Wynndel to be Represented

There was an overflow turnout of basketball fans for the annual meeting of of the local league at the town hall on Wednesday evening, with the retiring president, Harry Miller in the chair, and secretary E. Marriott taking the minutes.

The treasurer's report submitted by Miss K. Payne showed an intake of $522, but after meeting all expenses there was a deficit of about $18. Heavy expense was encountered last season in travel cost for outside games, two of which were at Bonners Ferry, two at Cranbrook and one at Kimberley In addition to this member hip fees were not as well paid as in previous season . To make good in this latter respect the meeting recommended that for this season the players fee will be $3.

Officers for 1934-35 were named as follows: President, F. P. Levirs; vice-president, Doug. Corrie; secretary, Adam Robertson; treasurer, Jean McCreath, with F. V. Staples accorded a well deserved honorary presidency. It was decided to have the league handled by these officers plus a representative from each team.

The officers were given full power to make all arrangements for game with outside clubs, where such games do not affect any of the local league teams. The first meeting of the executive is called for October 5th. At this meeting the players for each team will be selected and prior to that meeting the names of all players must be turned in.

It is assured there will be three men's teams in the league with the possibility of a fourth. The Imperial Groceteria and Cardinals of last year will be back, with a quint from Wynndel, with possibly a fourth men's team.

In the ladies' section, four teams are signed up already, but as yet the players have not chosen for these teams, which include last year's champions, the Creston Review, along with the Pharmacy and Creston Motors of last year's league. The newcomer is a newly-formed ex-high school squad.

Last year's league teams will be allowed to retain three of their former players; the remainder of the team to be chosen from a slate. This departure was deemed necessary due to some teams being too strong in contrast with the others, which would tend to make gamea too one-sided and thus curtail gate receipts. If possible suitable trophies will be secured for presentation to this year's league champions.

Alice Siding

The heavy frost that followed the gale on Wednesday last has finished off most of the local vegetable crop.

Mrs. R. Robertson and children of Cranbrook are visitors here at present, guests of Mr. and Mrs. R. Stewart.

Sam McNeil is making good headway with the erection of a new log house on his property in the Lakeview section.

All residents of the district interested in the building of a community hall at Alice Siding are asked to attend a meeting at the schoolhouse on Monday night at 8 o'clock.

From all accounts the very heavy wind of Wednesday last was more severe in this section than at other valley points, paying special attention to Delicious and McIntosh Reds.

Ron. Gibbs of Penticton arrived at the end of the week from Penticton and is renewing acquaintances at Creston, stopping with his uncle and aunt, Mr. and Mrs. F. W. Ash.

The winds of Saturday and Sunday took the tops off a number of hay stacks on the flats. The weather encountered at the weekend is about the worst Alice Siding residents can recall.

The McIntosh Red apples are now all harvested and picking has commenced on Jonathan, Wagners and Rome Beauty. The weather of the past two weeks has helped color them up in good shape.

Andy Roy, who has been employed at the R. Stewart & Son ranch for some months past, left this week for Edmonton, where he will pick up a partner and together operate a trap line in northern Alberta.

Erickson

J. Mitchell is a business visitor at Kimberley this week.

Bill and John Chernoff got back on Monday from a business trip as far as Fernie.

Joe Alton, who has been a visitor at Kimberley and Cranbrook, returned on Tuesday.

Mrs. R. M. Telford, Mrs. T. W. Bundy and Kathleen were Cranbrook visitors on Friday.

Miss Cecelia Handley of Kaslo is here on a visit with parents, Mr. and Mrs. J. W. Handley.

Miss Neola Clark, who has been at her home for a couple of weeks, returned to Cranbrook at the weekend.

George and Ben Leadbetter had great luck on a hunting trip on Sunday, bringing in a bag of 20 ducks and one goose.

Miss Muriel Thurston left on Tuesday for Toronto, Ontario, where she will spend the winter with friends while attending a commercial school in that city.

Ted Baldwin holds the record of getting the first deer for hunters in these parts. He got a fine sample of venision on opening day near Goat River crossing

Miss Kathleen Bunday left on Tuesday for Montreal, where she has enrolled at MacDonald College, which is affiliated with McGill University, the coming term. She is taking a course in domestic science.

Mrs. M. H. Speaker announced the marriage of her fourth daughter, Margarette Marion, to Harold Nelson Armstrong of Vancouver. The marriage ceremony was performed in Spokane, Wash., Thursday, September 13 with Rev. Orville F. Nick officiating. Mr. and Mrs. Armstrong will make their home at Athalmer, B.C.

Canyon City

Peter Burns was taken to Creston hospital on Tuesday suffering from pleurisy and pneumonia.

L. Olson is at present employed at Lumberton sawing logs for the B.C Spruce Lumber Company.

Mr. and Mrs. Bob Clayton of Kimberley were motor visitors for a weekend visit with the former's father, Matt Clayton.

Mr. Glen Messinger is a motor visitor to Seattle this week. He is taking his mother to that city where she will spend the winter, after several months' stay at Canyon.

The heavy winds of Saturday and Sunday took quite a heavy toll of Delicious apples, especially in the Canyon area. It was just about the worst windstorm Canyon has experienced at apple harvest time.

Otto and John Johnson, L. Moberg and Gus Oberg have taken a contract for clearing off the heavy timber on the right of way of the dyke along Kootenay River from Creston Diking Company, Limited.

Rev. Dr. Osterhout, superintendent of Missions in B.C., of Vancouver, was speaker at the United Church on Sunday afternoon, and his address was one of the best ever heard here. The service was brightened up by a vocal solo by Miss Frances Knott.

In addition to playing havoc in local orchards the wind at the weekend took the roof off the new house O. M. Samuelson has under construction and wrecked a hay shed belonging to Nels Larson. The New Swedon section appears to have suffered most in the blow.

The United Church Ladies' Aid combined business with pleasure at the September meeting on Thursday afternoon last. It was at the home of Mrs. A. Halstead and fell on the hostess' birthday. The social feature was appropriate to the auspicious occassión.

Goat Diversion About Complete

New Goat Channel Completed this Week—Dyke Construction Proceeds Satisfactorily—South End Work Rushed.

In all departments dyking operations on Kootenay Flats are proceeding in satisfactory fashion according to officials of Creston Dyking Company, Limited, when a Review representative visited the reclamation works yesterday. Due to breaking in new operators on the big wheel scrapers these machines are not yet performing up to capacity, but already have more than a quarter of a mile of nen-foot dyke for the inspection of visitors—and put up at the worst spot for construction along the whole 14 miles of dyke.

The dyke right of way has been cleared as far along as the point where the Goat is to be diverted into the Kootenay River, and this week the bulldozer is being used to clear off the topsoil on the widened borrow pit.

The dragline has the 21-foot-deep new channel for the Goat completed on both sides of the highway and at the middle of the week was operating on the south side on the new channel widening it out to the full 100 feet.

This work should be completed in time to turn the shallow stream the Goat is at present into the Kootenay by the end of the week. Plans are in hand to put a temporary bridge across the new channel so that there will be no need to discontinue traffic even temporarily. Eventually the road in that particular locality will follow along the top of the dyke, which is being levelled off now by the one team that is now employed.

Up to the present no grief has been encountered. The soil formation is closely conforming to that indicated in the test holes that were put down at the south end, and the quality of the earth for dyking purposes is all that could be desired.

When the weather is fine there is no let up to the stream of visitors that are down to view operations, and E. D McDonald, who is operating a hot dog stand near the works, is doing quite a thriving trade.

Creston is getting some valuable publicity out of the big development. In addition to the Nelson News stories describing the work have already appeared in the Vancouver dailies, as well as the Lethbridge and Calgary Heralds, and the Spokesmae-Review, Spokane.

Lister

Miss Jean Flynn, who has been on a visit at Columbia Gardens, has returned to her home here.

Miss Clara Domke was admitted to Creston hospital on Friday, where she successfully underwent an operation.

Mr. and Mrs. Harry Smith of Trail were visitors here during the week, guests at the home of Mr. and Mrs R. Stevens.

John Huscroft has alfalfa baling operations in full swing and up till Tuesday had shipped out two cars of alfalfa to the C.M. & S. dairy farm near Trail.

Sheriff M. E. Harper of Nelson, who is also official admistrator, was here this week on official business in connection with the estate of the late W. P. Edwards.

J. A. Hobden has been busy the past week with his self binder harvesting grain crops in this section, as well as at Canyon. For the most part the cut has been wheat.

The Lister section had its first killing frost on Thursday, 20th, when the mercury got down to 16 above zero. Below freezing temperatures have prevailed almost every morning since then.

Contract for the new school at Huscroft has been awarded Geo. Hurry at a price $920, the building to be complete throughout and ready for use at January 1st, 1935. The building will be frame on cement foundation.

Rev. C. Baase was here on Sunday for Lutheran Church service and on Sunday Rev. M. T. C. Percival will have Anglican service which will be the harvest thanksgiving service, for which the school will be suitably decorated.

Kitchener

Miss Mae Parsons returned to her home at Fernie on Thursday.

Mr and Mrs. Allan Moore of Fort Steele were Friday visitors at Kitchener.

Ernest Driffil, C.P.R. tie inspector, was a weekend visitor at his home here.

W. R. Cranna and T. C. Foisy were business visitors at Lumberton on Tuesday.

The Shell Oil Company painters are redecorating the front of H. H. Redmile's general store.

A few men are at Goatfell East relief camp getting it in readiness for re-opening at the first of the month.

Mrs. D. F. Putnam and son, Frank, of Erickson, spent last week on a visit at the home of her mother, Mrs. C. Senesael. They returned on Sunday.

Mrs. A. Lepage and daughter, Louise, who have been on a three weeks' visit at the home of her sister, Mrs Allan Moore, Fort Steele, returned on Friday.

Wynndel

Birth—On September 21st, to Mr. and Mrs. E. Payne, jr., a daughter.

High winds and freezing temperatures have prevailed over the weekend.

Those interested in basketball are called to a meeting at the hall Wednesday, 26th.

Miss Olga Hagen left last week for Erickson, where she has obtained employment.

Miss Clara Wittman spent a few days at Creston last week, a guest of Mrs Compton.

Miss J. McRea of Saskatchewan is a visitor here at present, a guest of Mr and Mrs. Franklin.

Mrs. Franklin and children, who have been visiting relatives at Stone, Sask., returned home last week.

Anglican Church service on Sunday at the schoolhouse at 11 a.m There will be a celebration of Holy Communion.

Mr. and Mrs. J. McFarland and son, Bob, of Rossland, are visiting Mrs. McFarland's parents, Mr. and Mrs. L. A. Davis.

Mr. and Mrs. W. H. Fortin and son, Leo, of Vancouver are spending a few days with Mrs. Fortin's parents, Mr. and Mrs. C. Pedersen.

Miss Ethel Hook and Warren Hook of Spokane returned for a further stay with their grandmother, Mrs. Grady, opening of schools in that city having been further postponed.

Canyon Bride-Elect Shower

Almost 100 invited guests were in attendance Friday night for a surprise shower in honor of Miss Helen Johnson and Lloyd Leadbetter, whose marriage takes place early next month. The guests were seated in a semi-circle around the hall, Miss Johnson and Mr. Leadbetter being escorted to the stage and seated under a cluster of white tissue paper bells. After almost an hour spent in opening the great array of miscellaneous gifts the recipients suitably thanked those present for their timely remembrances, a short programme followed. Piano solos were contributed by Miss Alice Wesling and Mrs. Kolthammer. Violin solo by Miss Annie Borggren. Vocal solos by Miss Frances Knott, Miss June Browell and Mrs. Kolthammer There was also a recitation by Manfred Samuelson, which was followed by community singing. Games were played and then a lunch was served which latter included the bride's cake, of which every person present received a piece The hall was nicely decorated with evergreens and white and orange bunting. The committee in charge were Misses Emma Simister, Alice Wesling, Anne Gartland, Annie Bergren and Clara Nygaard. Proceedings were brightened up with music from a G.E. radio, kindly installed by Sid Parker.

Valley's Apple Shipping Heavy

Movement 50 Per Cent. Greater than This Date Year Ago—McIntosh Crop Double 1933—Wealthys Still on Hand.

At both packing houses deliveries are confined exclusively to McIntosh Reds, and it would look as if this order of things will continue until the middle of next week. The crop of this variety will be double and almost treble, possibly, the early season estimates according to both the Exchange and Long, Allan & Long, Limited. With the former manager Cooper illustrates this feature by pointing out that in 1933 their warehouses could handle the "Macs" as fast as they came. This year receipts in a single day are enough to keep the staff busy for about three days, and the crew is being worked until 9 o'clock each evening.

The demand for McIntosh remains steady, with the preference continuing for Cees loose in apple boxes, No. 3 grade 150 and larger. The trade is also asking for Fancy 113 and larger in the jumbo crate and there is some call for the wrapped in 113's and larger. There is little or no call as yet for Fancy in 125 and 138, but orders are excellent for the 150's and 163's, the latter being the favorite for Eastern Canada teade.

As at the middle of the week car lot shipping from Creston and Erickson is almost double the outgo at the same period in 1933. While the season is somewhat earlier this year this does not account entirely for the increase which is attributed largely to the bigger crops of Wealthys and Macs. At the middle of the week the two points mentioned had rolled more than 135 cars as compared with about 85 at this date, 1933.

Wynndel, Creston and Erickson are all holding some quantity of Wealthys for which the demand has almost ceased, and is not likely to revive when Cee "Macs" are still quoted at $22.50 per ton. The outgo of Cox Orange has halted temorarily to see just how seriously some of these are likely to be affected by bitter pit, which has developed. A start has been made at picking Jonathans, the harvest of the McIntosh being just about completed.

The big blow of Wednesday, 19th, seems to have been most severe west of town, Alice Siding McIntosh and Delicious being rather hard hit, Saturday and Sunday also provided another minature gale which was felt in other parts severely. The freeze, following Wednesday's blow, has ended the vegetable crop for this year.

Now, that Creston has decided on going into the big B.C. pool houses announce that payments direct from them will be for about two thirds of the Wealthies and all other earlier varieties. All apples that were on the floor at local packing houses on September 15th will be paid for out of the big pool.

LOST—Between Cranbrook and Creston on Friday, August 24th, 35-6 tire. $3 reward to finder Leave at Connell Motors, Erickson.

Is This Real Sport?

The international yacht race for the America Cup between the British challenger "Endeavour" and the United States defender "Rainbow" is the subject of innumerable newspaper and magazine articles reviewing the history of this famous Cup and setting forth facts and figures indicating the vast expenditure of money and effort on the part of the multi-millionaires who alone can afford to indulge in this sport. This yacht race is not a money-making venture on the part of those who engage in it; quite the reverse. No gate admission can be charged, and the spectacle is free to all those who can get within sight of it.

But the cost of building even one of these yachts and financing it during the trial races and the short race period runs well over a million dollars, and with several boats involved, the actual total cost is staggering. Is it all worth while? Are such huge expenditures of money for such a purpose justified at any time, and particularly so at this time when millions of people in the two countries concerned are in need of the bare necessities of life? Are those who devote their wealth to such a purpose real sports, and are they making any actual contribution to the well-being of their fellow-men?

What is real sport? What is, or should be, its aim and object? Real sport, if we understand it aright, should provide recreation from the every-day toils and worries of life, and it should, therefore, be engaged in, not by a select few, but by the masses. Secondly, its aim should be the development of the physical well-being of all who engage in it, coupled with the inculcation and development of those traits of character which recognize and insist upon fairplay, respect for a competitor, observance of the rules of the game whatever it may be, acceptance of defeat with good grace and a smile, and of victory with a becoming modesty.

If this is a correct definition of real sport, then it should never become a mere money-making enterprise in any of its branches. As a matter of fact, when it develops into a money-making enterprise it ceases to be sport in its true sense and becomes a business with gate receipts and salaries the main objective, while all the principles underlying real sport are sacrificed to skill.

Unfortunately, much of the so-called sport of to-day has degenerated from the ideal of amateurism to professionalism; from love of the game to love of the dollars that may be earned. It is no longer sport or recreation, but a cold, competitive business.

This has long been true of baseball in the United States. Tens of thousands of people pack the stands to watch eighteen highly trained experts "play" ball. These thousands cheer themselves hoarse for the "home" team, although not one of the "players" may be a native son or even a resident of the home city, but imported men from anywhere simply because they have the knack to excell in a certain position on the baseball diamond. Such is the great national game of the United States; but it is not sport. It is nothing but a business highly organized to the nth degree to make money for the owners of the franchise and their high salaried ball-playing employees. Instead of the thousands of spectators being benefited physically or otherwise, the reverse is true; they ought to be actively participating during these leisure hours in some health giving recreation.

In its heyday, lacrosse, the old national game of Canada, was an amateur sport. Thousands of boys engaged in it for the love of the game and the exercise they obtained. Professionalism crept in, and Canada's national game died. Canada's great winter game, ice-hockey, is travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magnates with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint.

What and who are responsible for this deterioration? First, the money grabbing instinct of men. Secondly, universities and colleges to a considerable exent. Large universities pay extravagant salaries to so-called sports managers and trainers, not for the purpose of developing the physical well-being of all members of their student bodies, but to build up a championship crew or team in the varied departments of sport to carry the college colors to victory and thus advertise the university and command the admiraation and ultimate enrolment of youth from all over the country. It is no longer sport in its truest sense, but a business proposition with such institutions.

With but few exceptions, people love sports. Practically every child likes to play games. It is a natural born instinct, and it has its place, and a big place, in the physical, mental and moral development of youth. But it is being perverted to gross material ends, with the result that sport in its real sense is largely lacking in the larger centres of population, and we must go to the small towns, villages and rural communities to find games and sporting events engaged in by the masses for the intrinsic love and joy of the game. Sport in its true sense and meaning should be strongly encouraged everywhere, but it is time a halt was called to professionalism in sport, and to its twin evil of making proficiency in any one branch of it the end-all of one's existence.

Fall rye in Canada, as at August 10, 1934, shows a yield of 5,239,000 bushels from 587,100 acres, compared with 3,454,000 bushels from 434,900 acres in 1933.

The number of sheep in New Zealand as shown by the returns on April 30, 1934 was 28,550,770 an increase of 800,000 compared with the corresponding date in 1933.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels.

Generally it develops into Diarrhœa, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly.

Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Prince Assisted Miners

Waived Royalties Until Mine On Estate Was Self-Supporting

The Prince of Wales went down a Somerset coal mine that came to life close to the spot where a coal mine had died.

There is a human story behind this "new coal field for an old one." The prince heard it from one of the doughty West of England colliers who conducted him round the mine.

Thirteen years ago a coal mine at Farrington Gurney closed down. Three hundred men were thrown out of work. They were idle and forced to go on the "dole".

Three years later, determined to make work for themselves, a small band of them applied to the Prince of Wales for a concession to dig close to the dead coal field. It lay in the prince's duchy estate.

The prince lent a sympathetic ear to the colliers' plea. He told the men the duchy would waive any royalties until the mine was self-supporting.

The men set to work. After deep excavating they struck coal. Every now and again the prince inquired how the mine was working.

Now the mine is paying for itself. Fifty men are in full-time employment; one hundred and thirty-five tons of household coal are raised every week. And the Duchy of Cornwall is receiving its dues.

The prince received a royal welcome from the black-faced colliers.

Then he disappeared half a mile under the ground for a quarter of an hour and watched the men dig for coal. He reappeared, his hands black from the low corridors where he had bent almost double.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong. Read what he says:—

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But see me work now—12 hours a day sometimes. Kruschen Salts have done it."—G. J.

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channel. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestines, and thereby check the further accumulation not only of uric acid, but of other body poisons which undermine the health.

Preparing For Trip

Duke Of Gloucester Studied Books On Australia

A tall, fresh-complexioned, well-tailored young man in brown soft hat and brown shoes was exploring an Oxford-street book shop in a recent week.

He had found his way to a large collection of books, some old but most of them recent, dealing with every phase of life in the British Empire. From the way he went about the collection, with one of the assistants, studying maps and pictures of certain countries, it was clear that he was either a student or a traveller preparing to go on a long voyage—or both. As a matter of fact he was both. It was the Duke of Gloucester. Evidently he was making a careful selection of books to prepare himself for the long journey to Australia.

Difficult To Replace

Substitution of other forms of revenue for the tariff as a source of national income would be difficult in Canada, Hon. George H. Sedgewick, chairman of Canada's tariff board, declared before the maritime conference on Canadian affairs held at Halifax.

Of 35,500 insured workers in Luton, England, only 700 are out of work.

Cook's Home Rebuilt In Australian Park

Even Ivy Taken To Melbourne With Explorer's Cottage

Packed in 253 boxes and transported by 35 lorries, Captain Cook's cottage was taken through the streets of Melbourne, Australia, on its arrival by the steamer to the Fitzroy Gardens, where it is to be re-erected in connection with the centenary celebrations.

Everything about the Yorkshire cottage has been preserved with amazing thoroughness, even to the creak on the staircase, as one wit remarked. Stones for the walls, flagstones for the floor, joists, rafters and beams have all been marked and numbered.

A bag has been forwarded containing the original mortar which held brick and stone together, also a bag of nails which will not be much use for hammering in, but interesting as showing the type used.

The ivy alone will not be replaced in its original state. The quarantine authorities demand that it be fumigated, as a potential bearer of diseases. In exchange for the cottage, Cook's birthplace, Great Ayton, Yorks, is to possess a stone obelisk modelled on the monument commemorating his discovery at Cape Everard.

Lignite Coal

Development Of Coal Field In Saskatchewan Carried On Successfully

Development of high moisture lignite deposits in southern Saskatchewan, which are located a considerable distance to the east of other fuel sources of Western Canada, has been carried on successfully throughout the depression years, R L. Sutherland, consulting engineer for the Saskatchewan Coal Operators' Association, told the western meeting of the Canadian Institute of Mining and Metallurgy at Calgary.

"The increase in production in the Saskatchewan field and use in recent years when the general trend of production has been downward," he said, "has been due in part to economic conditions and in part to improved preparation at the mines."

The more densely populated sections of Saskatchewan and Manitoba, he said, offered a wide market for the southern Saskatchewan fuel.

Skating Rink On Glacier

James Simpson, guide, naturalist and artist, has scraped smooth the surface of a glacier lying between two mountains near Banff, Alberta, to make a summer skating rink for his husky daughters, Mary and Margaret. He said skating on glaciers will be common in a few years.

Roman coins were minted in the temple of Juno.

SUNDAY-SCHOOL LESSON

REVIEW: GOD IN HEBREW HISTORY

Golden text: "Thy kingdom is an everlasting kingdom." Psalm 145:13.

Devotional reading: Hebrews 11: 32-40.

A Review By Means Of Allusions

To what does each allusion below refer?

"And the might of the Gentile,
unsmote by the sword,
Hath melted like snow in the
glance of the Lord.—Byron.

Up, Christians, leave your caves and do!—F. B. Meyer.

Let each one ask himself whether he is seeking to please God by doing justly, loving mercy, and walking humbly before him; whether he is on the side of God and of the things which are pleasing in God's sight.—Broden P. Bowne.

"With the cords of a man Jesus is drawing men; in the bands of love he is binding the world together."

When the brook dries up, the word of the Lord often comes to men. When he withdraws his gifts it is that we may see himself.—J. Stuart Holden.

"There is much splendid work of this kind done by the Friends. But it is likely to be missed by those who despair of the Kingdom of God. There are a host who have not bowed the knees to Baal."

What asks our Father of his children, save
A reasonable service of good deeds,
Pure living, tenderness to human needs,
Reverence and trust, and prayer for light to see
The Master's footprints in our daily ways?—Whittier.

I see the oil of thy Word will never leave increasing whilst any bring an empty barrel.—Thomas Fuller.

"Let justice, unimpeded by avarice of selfishness or cruelty, roll down as waters."

In the three Prairie Provinces on August 10, 1934, the estimated acreage showed a decrease of 1,881,000 acres, or 7.5 per cent. in wheat; a decrease of 70,000 acres or 2.3 per cent. in barley; and a decrease in flaxseed of 17,500 acres, or 7.4 per cent. Oats increased by 170,000 acres or 1.9 per cent., and rye also increased by 149,300 acres, or 28.7 per cent.

"It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, tides them over Change of Life . . . makes life seem worth living again.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

DISCLOSE PLOT TO OVERTHROW SPANISH GOV'T

Madrid.—The government was confident it had disclosed a plot of enormous proportions to overthrow the Spanish republic and establish a "proletarian state" by means of a revolution more bloody than the recent abortive uprising in Austria.

Wholesale murder of public officials, terrorism throughout the country, capture of the government arms manufacturing plants at Oviedo and Trubia and co-operation of Leftists elements of the air force and army had been planned, according to information the government claimed to have obtained.

Premier Ricardo Samper conferred with President Aloala Zamora at his home and an announcement afterward said he was sure the leading plotters, socialists and extremists, would be apprehended promptly.

Plans said to have been disclosed included a revolutionary general strike throughout Spain with a carefully-schemed campaign of sabotage, and other terrorism.

Squads of machine gunners were to have been designated for transporting in trucks to villages and towns, arousing the proletarian masses and massacring the opposition, cutting communications, taking over banks, and assuming complete power.

While civil guards continued searching homes of known extremist leaders for weapons, the premier gave the president the details of the reported conspiracy to set up "a proletarian state" and assured Zamora that the government was prepared for any emergency. All government buildings were guarded.

A truckload of arms captured and documents found in the possession of Francisco Ordonez, athletic-coach at Madrid University, arrested on the university athletic field, gave away the plot, authorities said, and created widespread alarm in government circles.

In the truck seized were 54 cases of machine gun bullets, 60 cases of rifle shells, 300 rifle clips, 34 machine gun belts, five liquid flame machines, and three 14-millimetre guns capable of piercing armor plate.

Huge Wedding Cake

Cake For Royal Couple Will Weigh 800 Pounds

London. — The wedding cake for Prince George and Princess Marina of Greece will be seven feet, eight inches high and will weigh 800 pounds, it was learned as preparations for the wedding went forward.

The cake was ordered from an Edinburgh baking establishment, famous for its dainty pastries, and will be one of the largest ever baked in the United Kingdom. It will be necessary to send it to London in several pieces.

Prince George and his fiancee at present are staying at Balmoral castle with the king and queen and Princess Marina's parents.

Creamery Survey In Alberta

For Purpose Of Determining Cost Of Manufacturing Butter

Edmonton.—Beginning in Calgary and in Edmonton, a creamery survey has been launched under the joint auspices of the provincial dairy branch, the University of Alberta, and the Dominion department of agriculture.

The purpose of the survey is to make a study of the cost of manufacturing butter in Alberta and also of the cost of trucking or otherwise delivering cream supplies.

Ship Reaches Craig Harbor

Ottawa.—Canada's 1934 expedition to the posts in the eastern Arctic has reached its most northerly objective, Craig Harbor, on the south coast of Ellesmere Island. Wireless despatches received in the department of the interior report the S.S. Nascopie, carrying the Dominion government party, had reached the far northern post.

War Is Denounced

Church Of Engand Opposes Strife As Means Of Settling Disputes

Montreal.—With almost unanimous accord, members of the general synod of the Church of England in Canada, by resolution, denounced war as a means of settling disputes between nations.

The resolution, moved by Rev. Canon W. H. Davison, Montreal, and seconded by Magistrate J. E. Jones, Toronto, was to accept the principle laid down by the Lambeth conference of the Church of England.

On the principle that Canada should be prepared, one dissenting voice was raised, however, by E. E. Richards, Victoria.

"We must have the best instruments of war available," he said. "There is something worse than war—that is national dishonor." He was met by loud cries of "No," when he declared: "I say that the movers of this resolution are responsible for these men's deaths."

Ven. Archdeacon F. G. Scott, of Quebec, famous war padre, rose to reply to Mr. Richards.

"The last thing General Sir Arthur Currie did," Archdeacon Scott reminded the synod, "was to send a message to the university veterans in Toronto imploring them to start a movement to say that war is a futile test and not a test of the manhood of the world. That came as the general's last order from his death bed."

Communists Shout Insults At Queen Wilhelmina

Three Members Of Parliament Arrested At The Hague

The Hague, Netherlands.—Three Communist members of parliament who shouted insults after Queen Wilhelmina had finished her speech from the throne were arrested and jailed as an infuriated mob tried to get at them.

Police, fearing an outbreak of violence as the temper of the throng about the parliament building grew in hostility, led the men to prison by a secret route.

It was the first time in the history of the Netherlands that members of parliament were arrested in the course of a session. They were released later.

War Danger Lessened

Say Relations Between Japan And Russia Have Improved

Geneva.—Busy with efforts to end war in South America, delegates to the League of Nations heard that the danger of war in the Far East has lessened.

A day of debate as to the best way of halting the conflict in the Chaco Boreal was lightened by the assertion of Russian spokesmen, made privately, that relations between Japan and Russia have improved.

The Russian sources also stated their belief that both Japan and Germany, recent withdrawals from the league, may be induced to return. Other quarters held similar hopes but declined to forecast their quick realization.

Want Financial Aid

Canadian Fisheries Ask Government Grant For Advertising Purposes

Montreal. — J. C. Eckman, Vancouver, and John Dybhaven, Prince Rupert, B.C., were named vice-presidents of the Canadian Fisheries Association at the 19th annual convention here. Captain Frederick W. Wallace, Montreal, was elected president.

A resolution was adopted urging the Dominion government to vote $100,000 at the next session of parliament to pay the cost for newspaper advertising for the development of Canada's home market for fish. Date of Canada's annual fish week was fixed for October 29 to November 3.

Criticism Of Lottery

New York.—A broadside of criticism was directed at the city's proposals to raise relief funds through new taxes and a municipal lottery. Threat of a legal fight against the lottery was voiced. Mayor F. H. Laguardia admitted a lottery stood about one chance in 10 of being declared legal.

MAY BE CHAIRMAN

It is understood that Sir Thomas White will be the chairman of the Royal Commission on Maritime rights which has been appointed by the Dominion Government to determine the amount of subsidy which the Maritime Provinces should receive from the Dominion Treasury.

Takes Heavy Toll

Chinese Refugees Tell Of Lives Lost In Flood

Taokow, China. — An unending stream of bedraggled refugees from the region flooded by the Yellow river, their homes and livelihood destroyed, has poured into Taokow.

Government officials were considering a drastic proposal to transfer many of the refugees from the river valley to unsettled territories in Suiyuan province for rehabilitation.

Their crops destroyed and not knowing what to do, the refugees, wandering aimlessly, tell stories of acute suffering and vast loss of life in the flooded regions of southern Hopei and northern Honan provinces.

It was reported thousands, clustered together like frightened sheep, still occupy high spots in the Yellow river valley. Some still live in tree tops. Rescue work is proceeding slowly. The walled city of Changyuan has become an island, swirling flood water surrounding it.

Rush To Nome

Sending Supplies To Reach Fire Stricken City Before Freeze-Up

Nome, Alaska.—Another rush to Nome was in the making, but it will have little resemblance to the gold rush of 1898 and subsequent years.

This time it will be a rush of supplies and a battle of man against time and temperature.

Hoping to rebuild the fire-stricken city in part at least before the Arctic ice shuts out all shipping a few weeks hence, the citizenry laid plans for quick transportation of lumber and other construction materials as well as food and medical supplies.

The Alaska Steamship Company cut its freight rates in half for building material and relief supplies leaving Seattle aboard the steamer Dellwood.

Morro Castle Quiz

Startling Information Is Gleaned From Investigation

New York.—If obeyed, the last order from the bridge to the engine room of the Morro Castle would have left the flaming Ward liner circling about the ocean, a whirl of death and fire, evidence at the United States department of commerce inquiry showed.

The engine crew, however, disobeyed the order and put the engines into neutral.

This testimony was given by an 18-year-old Massachusetts Institute of Technology student, William Wesley Tripp, who was on the tragic voyage from Havana as a cadet engineer.

Details of the death of Captain Robert R. Willmott—who suffered an acute attack of indigestion and died only several hours before fire broke out on his liner—were given by Howard Hansen, the fourth officer, who testified he saw no marks of violence on the body.

Rumors have been persistent that the master met foul play. The few charred bones found in the cabin where his body was cremated in the holocaust are now being examined for any evidence of poison.

Against Works Program

Calgary Wants To Spend Federal Grant In Own Way

Calgary.—By a polling of more than five to one, Calgary's property owners turned down a public works program involving expenditure of $180,000 granted by the Dominion government for that purpose alone.

The plebiscite, in which only one-fifth of the registered voters cast their ballots, coincided with the city's determination to seek leave from the Dominion government to spend the apportionment on civic finance other than public works. Mayor Andrew Davison visited Edmonton to enlist the backing of the Alberta government in such an arrangement.

The citizens voted 2,839 against and 555 for repairs to the horse show building at the exhibition grounds totalling $15,000; 2,867 against and 392 for an assembly hall and gymnasium at Western Canada high school to cost $95,000, and 2,516 against, 782 for a public swimming pool estimated at $70,000.

Returns Home Via Canada

Vancouver.—Miss Sheila MacDonald, daugther of Premier Ramsay MacDonald, who left London, Sept. 1 for Melbourne via the Suez Canal to attend the Melbourne and Victoria state centenary, will return home to England by way of Canada, according to advices received by the Canadian Pacific Steamship Company here.

No Lives Lost In Fire

Nome, Alaska.—It has been found that the two Eskimos that were reported to have lost their lives in the $3,000,000 fire of Monday are safe. This means that no lives were lost in the fire.

HAVANA RIOT LINK IN SHIP FIRES?

Havana police have launched an investigation to determine whether a riot of dock workers at the Cuban capital as the liner, Morro Castle, was about to leave on her tragic voyage, may have some connection with the disastrous fire aboard the ship. This photo shows an aftermath of the riot, a young girl, injured as she stood watching the rioting, being lifted into an ambulance.

INSURANCE PLAN IN CANADA FOR THE UNEMPLOYED

Montreal.—Premier R. B. Bennett is preparing to launch an unemployment insurance plan in Canada upon his return from Europe, Ward C. Pitfield announced at the annual general meeting of the Montreal Conservative Association, Inc., at which he was elected president.

Mr. Pitfield, a prominent business man and a leader in the Montreal Conservative field, stated: "The prime minister has under way an unemployment insurance scheme, worked out on an actuarial basis, which I think is the finest plan I have ever seen to combat unemployment.

"If the provinces agree, this plan will go into effect," Mr. Pitfield went on. "If they don't I don't see how it possibly can. The provinces have power over civil rights. They have, for instance, power over mortgages.

"I don't see why we can't reduce interest on mortgages from seven to six and eventually to five per cent. The only reason why we cannot do it is that each province has the right to govern its own mortgage legislation."

Circus Lion Caused Panic

Shot By Guards After Escape From Cage During Parade

Richmond, Va.—Breaking open his cage during a circus parade a lion dragged down a horse pulling one of the wagons and then ran at liberty down North boulevard while crowds of spectators fled in panic.

Circus guards shortly after shot the animal to death.

The beast ran several hundred yards down the street after Patrolman John Robert Paul had fired five times at him as he sank his fangs into the horse's neck, taking refuge in the Hankins-Johann sheet metal works. A circus guard fired four times at the beast. A policeman finished the wounded animal with a pistol bullet.

British Films

Large Sums Being Spent To Produce Better Pictures

London.—Opening of the newly enlarged Twickenham studios will mark the beginning of a serious effort to produce greater British pictures, it was said here.

Julius Hagen spent $2,000,000 to equip the Twickenham studios—already one of the largest in England—with modern devices, including underwater film apparatus. Six major films are on the program of the company Hagen stated, and $5,000,000 will probably be spent in the first year of work.

New Bank Governor

Quebec.—"I was very pleased to note the choice of G. F. Towers as governor of the central bank of Canada," commented Sir Edward R. Peacock, Canadian-born director of the Bank of England, who arrived here. Sir Edward is in Canada to visit his mother in Toronto.

Runless Silk Stocking

Halifax.—A. G. Sandoz, technician at Dalhousie University here, claims he has found what every girl is looking for—a runless silk stocking. He has evolved a solution which, when applied to any textile in the form of a wash or rinse, is supposed to make the fibres stronger and more elastic.

New Bank Notes Smaller

Ottawa.—Canada's new bank notes, under the Bank of Canada, will be issued in about four months. It is reported they will be six inches long and 2⅞ inches wide. The present notes are 7⅜ by 3⅝ inches and United States notes are 6 5-16 by 2 11-16 inches.

Eight Doukhobors Fined

Nelson, B.C. — Eight of eleven Doukhobors arrested for failing to fight forest fires were sentenced to a fine of $25 or to serve one month's imprisonment. Three who produced doctor's certificates were dismissed They appeared before Stipendary Magistrate John Cartmel.

The telephone saved his home

Pointing out what a great protection the telephone would be in case of fire or accident, a telephone employee advised a man on Vancouver Island not to have his telephone taken out.

The subscriber agreed to keep his telephone for another month. During that month his house caught fire. By means of the telephone e summoned help and the house was saved.

"If it wasn't for the teledhone I wouldn't have a home now," he admitted afterwards . . . . and he kept his telephone.

A FURTHER STEP on the Road to Recovery

A Statement by the Prime Minister of Canada

THE Dominion of Canada will offer for public subscription within the next few days the 1934 Refunding Loan. It is an undertaking of such significance to every citizen that I think it fitting to present this brief explanation of its close relation to the welfare and continued progress of our country.

The 1934 Loan is not an incidental effort. It is a part—and an essential part—of the great debt conversion programme in which Canada has been engaged since 1931, and by which we are refunding at maturity the large sums borrowed for wartime purposes. The national importance of this programme—and of the 1934 Loan as part of it—cannot be over emphasized. It is important from three aspects: 1—National Credit; 2—National Economy; 3—National Recovery. I shall deal with each of these in turn.

1. National Credit

National credit means to a nation what an honest reputation means to a man. Its maintenance is a primary essential and necessitates that each obligation be met, fully and promptly, as it comes due. Our debt conversion programme is then, in the first instance, our method of meeting our obligations and thus maintaining our credit.

By this programme Canada has already refunded $858,000,000 of maturing wartime debt, and completion of the 1934 Loan will bring the refunded total to over one billion dollars. As a result, Canada's credit stands notably high, both at home and in the great money markets of the world.

Striking evidence of our high credit standing was given within the last few months when Canada secured immediate over-subscription of a long-term loan in London at a price to yield the investor less than 3½% and, in New York, obtained a one-year Loan of $50,000,000 bearing interest at 2 per cent. And there is equally striking evidence at the present moment in the fact that every internal issue of Dominion of Canada Bonds now outstanding is selling today at substantially above its issue price. The twelve-year 4% Bonds of the 1933 Refunding Loan, issued at 96½, are now selling at 104 to yield approximately 3½%.

2. National Economy

The debt conversion programme, in the second place, is providing substantial savings in public interest charges. The debt which we are refunding was incurred with interest rates at artificially high wartime peaks. Refunding is now being accomplished with interest rates throughout the world moving steadily downward toward more normal levels—an encouraging world movement which is essential to business recovery. By refunding under these conditions Canada has already obtained a reduction of the previous interest charges amounting to more than $9,000,000 per annum, and completion of the 1934 Loan will provide a further saving of over $5,000,000 per annum.

The annual saving of over $14,000,000 thus secured has a direct cash benefit to every tax-payer. This saving has much more than offset the interest charges on the debt which has been incurred to meet the extraordinary burden of unemployment relief. It has, to a considerable extent, offset the heavy burdens which the depression period has imposed with respect to railway and other current requirements. It will also pave the way to tax reductions with the return to better times.

3. National Recovery

The debt conversion which Canada has achieved since 1931, by thus maintaining national credit and securing national economy, has been a major factor in our progress toward business recovery.

A year ago, preliminary to the 1933 Refunding Loan, I took occasion to express the belief that Canada had passed the low point of depression and was definitely upon the road to recovery. Today, our progress toward recovery is a matter of established fact. Since the low point of February 1933, the trend of business has been moving steadily upward in an improvement so marked and so consistently sustained that we need no longer doubt its reality.

The facts of business recovery are written beyond dispute in our statistical records. The most significant indices relate to physical volume of business, industrial production, carloadings, electric power production, employment and prices. Here is the record in each case:

	PERCENTAGE INCREASE	
	During Past Year*	Since Low Point of Depression February 1933
Physical volume of business...	13.8%	42.8%
Industrial Production.....	15.7%	56.9%
Carloadings.....	10.3%	29.4%
Electric Power Production....	12.4%	32.7%
Employment.....	14.7%	17.1%
Wholesale Prices.....	4.0%	13.7%
Farm Products Prices.....	7.7%	43.3%

*In the case of carloadings, employment and prices, the latest figures available are those for August; in other cases, those for July.

Our external trade figures are equally encouraging. During the first eight months of the present year, exports of Canadian products increased approximately $99,000,000, or 32.7% over the same period last year. The corresponding increase for imports has been slightly under $93,000,000, or 38.2%.

A Further Step

Anyone who reflects upon these three aspects of credit, economy and recovery will at once appreciate that the debt conversion programme is vitally important to every Canadian and that, consequently, the success of the 1934 Loan is the personal concern of every man and woman in the Dominion.

The 1934 Loan is a further step in a great national undertaking; its success means a further step on the road to recovery. I know that I need not stress the attractiveness of the Loan as the soundest possible investment, for that will be universally recognized. I do, however, earnestly call upon my fellow Canadians to support this Loan to the limit of their abilities as an opportunity to promote our national welfare. I know of no way in which the individual citizen can render greater service to himself and to his country.

R. B. Bennett
PRIME MINISTER OF CANADA

DOMINION OF CANADA 1934 REFUNDING LOAN

HOME BREW

It takes al kinds of people to make a world, but when it comes to the uudesirable sort it would look as if Kaslo can lay claim to being unique, to say the least. Look at this from the Kootenain in its latest issue: "Probably the ultimate in dirty sneak-thievery was reached on Sunday night when some low, depraved creature or creatures stole some thirty large Hubbard squash from the hospital garden, vegetables that Geo. Lingard the gardener at the hospital had tendered with care so that the sick and suffering might have these delectable vegetables during the long winter months. A short time ago the garden was raided and a number fine pumpkins were stolen."

If a great many more cows would only freshen in the fall a great benefit would be conferred upon the Canadian dairy industry, according to the experts, who have it figured out that at present only 3 per cent. of Canada's total butter output comes in February, as compared with 16 per cent. in June, and 61 per cent. in the five months May to September. The authorities also assert that while consumers eat less butter in June than in February, they are offered five times as much. Another favorable feature to fall freshening is that animals that come in in the fall produce from 50 to 75 pounds more butterfat than those that calve in the spring. In the way of home production and home market demand the Canadian dairy industry is most fortunate. For 1933 the total make of creamery and dairy butter in the dominion was 323,890,000 pounds and consumption was 320,821,718 pounds. Butter eating in Canada varies little from month to month, consumption being practically uniform at 26,000,000 pounds monthly.

For some time past Creston district has been under the impression that this section was entitled to a cannery, but that is about as far as the matter has got, notwithstanding the existence of an industrail committee in connection with board of trade activities. The matter came prominently to the fore at the end of the week when a wire was received from a well known coast firm, "Have man interested opening cannery your district. What possibilities contracting 100 acres tomatoes, strawberries and prunes delivery next fall." A checkup on acreage in these commodities shows while the valley has in the neighborhood of 200 acres in strawberries, there is this year less than 30 acres in tomatoes, while the estimated 1934 crop of plums and prunes combined is about 8000 crates—representing possibly ten acres of prunes. With an abundant irrigation water supply the 100 acres of tomatoes should be readily obtained and it is to be hoped the industrial committee will lose no time in placing before this interested party the possibilities of the valley in the other lines of orchard and field crop production.

In connection with relief much is heard about the little there is to show considering the number of men employed and the amount expended in wages. All are agreed that something should be done about it, but no one has a remedy. To fire those who refuse to do a day's work for a day's pay will not help, because the man discharged has demonstrated that he is entitled to relief and if it is not proposed to let him 'work' for his designated monthly allowance there is nothing for it but the dole, to which everybody objects. The Review believes greater value would be gained if it were possible to let contracts on as much as possible of the work that is being undertaken. With a contractor under the necessity of employing the unemployed and still maks money on the job we have an idea better results would be obtained. We do not imagine this is a cureall but if the plan were made effective and those in charge had sufficient backbone to let the slackers go without relief for a month or two certainly no harm could come of trying the experiment.

The K.P. Labor Day celebration at Penticton realised $628 for the hospital in rhat town.

Fernie swimming pool closed Saturday. 40 cents was the total intake for the last week it operated.

At Moyie it has been necessary to do away with the school board and inspector Manning has been placed in charge as official trustee.

Bonners Ferry hears that the International Waterways Commission is likely to hand out a decision on October 3rd, in connection with the West Kootenay Power & Light Company dam below Nelson at Corra Linn.

LAND ACT
SECTION 39

Notice of Intention to Apply to Purchase Land

In Nelson Land Recording District of West Kootenay, and situate in the vicinity of Shoreacres, B.C.

Take Notice that Peter Marken, of Shoreacres, B.C.; occupation, farmer; inteuds to apply for permission to purchase the following described land:

Commencing at a post planted on the western boundary of Block 7 of District Lot 302A, Plan 781, approximately 6.98 chains south from the N W. corner of said block due south 20.78 chains to the S.W. corner of Block 8; thence west 20 chains; thence north 20.78 chains; thence east 20 chains; and containing 40 acres more or less.

PETER MARKEN, Applicant.
Dated July 20, 1934.

Will Rodgers was a business visitor at Kimberley on Tuesday.

Charlie Cotterill of Nelson is a visitor this week with his mother, Mrs. C. Cotterill.

Just arrived 1934 models Stewart-Warner and Marconi Radios. Creston Motors.

Workmen are busy this week putting a new foundation under the postoffice building.

FOR SALE—The Bayie place at Creston for sale. Price $1000. Enquire Review Office.

FOR SALE—Six wire wheels, suitable for Chevrolet 1930 or 1931 models. Creston Motors.

Mr. and Mrs. C. F. Hayes retnrned on Sunday from a few days visit with friends in Spokane.

Miss I. Leslie of Nelson is a Creston visitor this week, a guest at the home of Mrs. C. Cotterill.

After a well earned two weeks' vacation W. B. Martin is again in charge at the C P.R. Depot.

MEN!

I would like you to look at my double page advertisement in MacLeans Magazine October 1st issue and Liberty, Sept. 29.

V. MAWSON
CRESTON

Miss Elaine Halliday, R.N. of Kimberley, is a Creston visitor this week with her aunt, Mrs. E. K. Chappell.

The evening of Friday, October 12th, is taken by the Pythian Sisters for a military whist, with 35c. admission.

Have in mind the Presbyterian Ladies' Aid chicken dinner in the United Church hall, Friday, October 5th, six to eight p.m.

H. A. Powell, secretrry of Creston hospital board, is spending a few days in Nelson on business, leaving on Tuesday.

FOR SALE—1931 Chevrolet engine, recently reconditioned, complete with transmission. Snap price Creston Motors.

FURNITURE FOR SALE—Including cook stove, beds, bureaus, etc. J. Mirchell, opposite Connell Motors, Erickson.

Mrs. S. A. and Miss Betty Speers left at the end of the week on a holiday visit with friends in Toronto and other points in Ontario.

M. D. Hamilton of Vancouver, B.C superin endent for the Bank of Commerce, was here on an official visit Thursday last.

Trinity United Church Sunday school have the annual rally day exercises on Sunday morning, to which the parents are specially invited.

Notwithstanding the new regulations the number of trucks coming in for supplies of fruit is said to be considerably larger tran last season.

J W. Robertson of Victoria horticulturist, was a visitor here at the m ddle of the week, and was shown over the valley by C. B. Twigg

Due to the severity of the weather on Sunday the Athletics baseball match with the Colored Monarchs of Troy, Montana, had to be cancelled.

Up to this week seven licences have been issued to U.S. hunters who are back again for th duck and goose season. Six of these are from Spokane.

M. C. Holben of Genessee, Idaho, was a visitor here during the past week. Mr Holben was one of t e biggest operators on the old Reclamation Farm during the couple of years it was in crop.

Rev. R. E. Cribb of Kimberley was shaking hands with Creston friends on Tuesday. He was en route to Kaslo for the fall meeting of the United Church presbytery of Kooenay-Boundary.

Both packing sheds are working till nine o'clock these nights in an effort to clean up the McIntosh Reds and make room for the Jonathans and later varieties that are now being picked.

Mr. and Mrs. Dudley Rodgers from Arthena, Oregon, were renewing Creston acquaintances the past week, and were guests of the former's uncle. J. L. Rodgers, at the Reclamation Farm.

Mr. and Mrs. R. Hay got away on Tuesday on their return to Vancouver, after a three months stay in Creston. Mr. Hay was in charge of Creston bakery while Mr. and Mrs. W. Fraser were away on a visit in the Old Country.

This week's social feature is the Made-in-Canada exhibition and sale in Trinity United Church hali, Saturday, 29th, under the direction of Creston Hospital Women's Auxiliary, from 10.30 a.m. to 5.30 p.m. The admission is free. Tea served.

The basketball league was re-organized for the season at a largely attended meeting of the hoop fans Wednesday night. F P. Levirs is the new president, and a meeting is called for next Wednesday night to make final plans for the start of play.

Rev A. Walker got back on Wednesday from a three weeks' trip to eastern Canada during which he represented Kootenay-Boundary presbytery at the biennial sessions of the general council of the United Church of Canada, at Kingston, Ontario.

R. F. Borrett of Kelowna, who has been here since September 9th, in connection with enforcing the regulations of the new marketing act, left for home at the end of the week. W.G. Littlejohn is now in full charge of this work and reports things working out quite satisfactorily.

Rev. Dr. Osterhout of Vancouver, superintendent of missions, was the speaker at the Trinity United Church Sunday evening and made an appeal to the congregation to increase their givings to the pastor's salary so that the local church might become self supporting. He spoke at Wynndel in the morning and at Canyon in the afternoon.

LAND ACT
SECTION 39

Notice of Intention to Apply to Purchase Land

In Nelson Land Recording District of West Kootenay, and situate in the vicinity of Shoreacres, B.C.

Take Notice that Peter Marken, of Shoreacres, B.C.; occupation, farmer; intends to apply for permission to purchase the following described land:

Commencing at a post planted on the western boundary of Block 7 of District Lot 302A, Plan 781 approximately 6.98 chains south from the N W. corner of said block due south 20.78 chains to the S.W. corner of Block 8; thence west 20 chains; thence north 20.79 chains; thence east 20 chains; and containing 40 acres more or less.

PETER MARKEN, Applicant.
Dated July 23, 1934.

Work Is Pressing Forward On Trans-Canada Highway To Link Up Halifax With Vancouver

The rocky tangled terrain along the northern shore of Lake Superior now presents the only obstacle to the completion of the Trans-Canada highway from coast to coast.

Motorists may now drive from Halifax, on the Atlantic coast, to a point 45 miles north of Sault Ste. Marie, in northern Ontario, over reasonably good pavement and gravel roads. From there to Nipigon, however, roughly a distance of 300 miles, lies a rugged stretch over which no car can pass. Here are masses of solid rock of all shapes and formations. There are trees and tangled undergrowth, ravines, gullies and numerous rivers.

Two legs on this uncompleted northern Ontario section have been surveyed and the work planned, but when they will be completed is problematical. One leg runs from the Soo to White River, noted as Canada's champion cold spot in wintertime. The other swings from White River to Hearst. Very little work has been done on either of these stretches yet.

There is a road from Nipigon to Port Arthur, while from Port Arthur to the Manitoba boundary, only about 30 miles of the highway still remains uncompleted. Work on this section is being pushed ahead and it is expected that it will be opened by this coming fall.

From the Ontario-Manitoba boundary the chain of motor roads stretches all the way to Vancouver, on the Pacific coast.

Twenty-five thousand bronzed young Canadians are at present engaged in pushing forward the Trans-Canada highway building program. The majority are battling with northern Ontario's wilderness. Throughout the rest of the country, however, much improvement and repair work is being done.

When these workers reach their goal the quarter-century dream of Canadian motorists will have come true. They will then be able to start in their cars at Halifax and drive to Vancouver, without having to detour through the United States.

Still Below Average

Canadian Wheat Crop Higher This Year Than Last

The International Institute of Agriculture indicated the Canadian wheat crop would be somewhat higher this year than last, but 18 per cent. below the average for the past five years.

This year's figure for Canada's wheat crop was given as 330,000,000 bushels.

Last year's total was 268,000,000 bushels.

The average for the years from 1928 to 1932 was 441,000,000 bushels.

France Sets Wheat Price

Officially Dropped From $2.00 To $1.95 Per Bushel

The price of wheat has been officially dropped below $2 a bushel for the first time in more than a year in France.

A new fixed price of 108 francs per quintal ($1.95 a bushel) was published in the official journal as the result of a recent law increasing farm aid.

There was a widespread complaint the old price of 115 francs a quintal was not being observed.

No Time Like Present

All men are glad to have pleasant memories, but not all are providing the material for such memories. If you would look back by and by to something that you will be glad you said or did, now is the time to do or say something which will give you food for gladness. — Henry Clay Trumbull.

Wet shavings on the floor of a refrigerator car was the simple and inexpensive method adopted by U.S. specialists to keep pears and apples from freezing in transit from the northwest to eastern markets in moderately cold weather.

W. N. U. 2056

Summer Care Of Eggs

Must Be Kept Cool And Marketed Often As Possible

Eggs must have special attention in summer time, and extra precautions must be taken to keep them cool. A wire or wooden basket that permits a free circulation of air is ideal for gathering eggs, and they should remain in the basket until they are cool before placing in the egg case. A clean cellar is the best place to keep them before they are marketed, which should be done as often as possible. Marketing twice a week during the summer is not too often.

Tests show that high temperatures are very harmful to the fresh egg, in addition to hastening evaporation, if the egg is fertile. Incubation starts at around 70 degrees and if allowed to progress long enough, the egg becomes unfit for food. The eggs should be gathered two to three times a day, or as often as possible. Removing all broody hens to the broody coop as soon as they are noticed keeps the hens from setting on the fresh eggs, and is the best way to get them back to laying.

Seek New Arctic Seaway

Expedition Hopes To Shed Light On Franklin Tragedy

"I have a strong belief that I may be able to come across relics of the Franklin expedition and throw additional light on this tragic chapter in the history of Arctic exploration."

Michell Pierce makes that statement in announcing his plans for an expedition to the archipelago lying between Baffin Land and the Beaufort sea.

Much of this territory, north of Canada, has never been thoroughly explored, and the main coast and adjacent islands are only roughly charted.

Mr. Pierce spent ten years in the Canadian north when serving with the Hudson's Bay Co.

The expedition will endeavor to find a seaway through Fox basin, Fury and Hecla straits and westward, following the mainland to the Pacific.

A Quaker once hearing a person tell how much he felt for another who was in distress and needed assistance, dryly asked him, "Friend, has thee felt in thy pocket for him?"

Outstanding Triumph Of Veterinary Surgery

Operation Saves Valuable Dog After Having Neck Broken

A greyhound, named Somebody's Choice, who, less than a month ago, broke his neck in three places, is again cantering round the training paddocks at Wembley stadium in England.

He looks, and is, the picture of health. His recovery is one of the outstanding triumphs of veterinary surgery.

Somebody's Choice suffered a spectacular fall in a recent hurdle trial. At first he was thought to be dead.

Then it was discovered that he was alive, although his neck was broken.

His owner, S. Curson, begged the veterinary surgeon in attendance to do his utmost.

A brilliant operation was performed. What amounts to an artificial neck has been created by means of delicate silver plates. Flexibility has been achieved by clever manipulative surgery.

Somebody's Choice will never race again. But he can bark and lord it over all the Mick the Millers in the world: he is the only dog alive to-day with a synthetic neck.

Testing Lumber For Pulpwood

Shipment From Tasmania Being Sent To Vancouver

A mill test of Tasmanian wood which may have far-reaching effect upon the pulp and paper industry of Canada is to be made shortly at the Ocean Falls plant of Pacific Mills Limited, Vancouver.

Suitability of the Antipodean lumber for producing pulpwood for newsprint is the question and considerable interest is being shown in the four-day test by lumber and newsprint men.

For many years Australia has endeavored to develop a pulpwood industry of its own. There are pulpwoods there that make suitable kraft paper but thus far the manufacturing of newsprint has not been attained.

Extensive laboratory tests have been made, and recently a Tasmanian wood gave promises of results. A large shipment has been sent to Vancouver, on board S.S. Waikawa, destined for Ocean Falls mills where a practical test will be run.

Master: Mary, has anybody telephoned while I've been out?"

Maid: "Yes, sir, but I could not make out the name. To be on the safe side, I said you would let him have something on account tomorrow."

New Observatory At Toronto Will House Giant Telescope, Largest In The British Empire

In the near future, Canada will have the largest telescope in the British Empire, and one of the most modern observatories in the world. The observatory proper will be located at Richmond Hill, north of Toronto, in a 177-acre park.

This plant with its up-to-date machinery and giant telescope, is expected to reveal to Canadian astronomers many new secrets of the stars. Constructed and equipped under the supervision of Prof. C. A. Chant, head of the astronomy department of the University of Toronto, the observatory will shortly be ready for use. It will then be turned over to the university by Mrs. D. A. Dunlap, the donor, as a memorial to her late husband, a prominent mining man.

The dome and building are now practically completed, and part of the telescope is being set in position. A large English telescope works has been finishing the main reflector for some months. This, too, will be in place shortly.

Inside a huge steel dome will be located the telescope with a 74-inch reflector, the entire assembly weighing around 50 tons. The steel dome is 61 feet in diameter, with a parallel opening 15 feet wide. The moving shutters, running on rails at the top and bottom of the dome, close the opening, and are operated simultaneously by means of wire ropes connected to a motor gear. An emergency hand gear is also provided. Two motor-operated wind screens of sail cloth are mounted in the opening, one rising from the bottom, the other descending from the top.

The dome, which weighs about 80 tons, is carried on 24 canted rollers of 27-inch diameter, mounted in ball bearings and running on a rail. Sixteen pairs of lateral roller bearings on the inner and outer edge of the rail keep the dome in position. Two segmental platforms, the lower one at the base of the opening and the upper one at the back 15 feet higher, are fixed inside the dome. Rails are mounted on the parallel straight edges on which runs a bridge five feet six inches wide and divided into two portions, the right hand side forming a stairway, the left being a track on which a truck carrying the Newtonian observing platform runs.

The centre section of the telescope tube itself is a steel casting seven feet in diameter and weighing 5½ tons. Just above the lower flange the casting swells out to eight feet seven inches to accommodate an iris diaphragm for use in stellar photography.

Construction of the diaphragm is similar on a big scale to that of the familiar small camera. But the shutter of many cameras is less than one-half-inch aperture. The shutter of the Dunlap observatory camera opens to six feet, two inches. It is operated by a hand wheel.

Prof. Chant is enthusiastic on the possibilities of discovery and development in the science of the heavenly bodies to be afforded by the new observatory.

Natural Weed Choker

Weeds Cannot Thrive Where Crested Wheat Grass Is Sown

As fully explained in the House of Commons recently by the Hon. Robert Weir, Dominion minister of agriculture, crested wheat grass is well adapted for pasturing by virtue of its remarkable ability to withstand close grazing and severe tramping. It is a particularly suitable crop for feed production on the dry land areas of Western Canada on account of its adaptation to dry conditions, its winter hardiness, and its ability to compete successfully with plants of other species. Seeing is believing, and an abandoned field in the vicinity of the Dominion Range Experiment Station at Manyberries, Alberta, was seeded to this grass and was closely grazed from early spring until late fall for five continuous years without apparent injury to the grass cover. The soil was heavily infested with weed seeds, chiefly Russian thistle and mustard, yet the grass took possession to the almost complete exclusion of the weeds. Owing to its extensive root system which takes up all the moisture, weeds cannot grow in competition with it. All the latest information about crested wheat grass is contained in a pamphlet just issued by the Dominion Department of Agriculture.

About Punctuation

An Art, Like Spelling, That Few Ever Master Completely

Lord Dunsany has been discoursing on punctuation. Very few people can punctuate properly. Many have an idea that period is best indicated by a dash, and several poets who send contributions in this direction have dashes scattered all over their manuscript instead of commas, semi-colons, periods or other points. Punctuation, like spelling, is a gift, and few ever master the art completely, while novices hardly ever gain control of colons, notes of exclamation, and quotation marks.—Hamilton Herald.

Notwithstanding two disastrous hurricanes, bananas remained in 1933 Jamaica's principal item of export. Her two principal markets are Canada and Britain. At one time the chief importer used to be the United States.

PROMINENT CANADIAN WOMEN HONORED BY THE KING

His Majesty the King has named several Canadians to the Venerable Order of the Hospital of St. John of Jerusalem, and among those whom he has been pleased to confer these signal honors are the five Canadians shown above. Top, left to right: Mrs. Amy Angela Bruce, wife of the Lieutenant-Governor of Ontario; Mrs. Olivia Mary MacLaren, wife of Hon. Murray MacLaren; and Mrs. Yvonne Dessaulniers Manion, wife of Hon. R. J. Manion. Below, left and right: Senator Cairine Reay Wilson, Canada's only woman Senator; and Mrs. Mildred Mariann Herridge, wife of the Canadian Minister to Washington. All these recipients have been made Dames of Grace of the Order of St. John of Jerusalem.

Herb Garden Is Useful

Idea Seems To Be Gaining Popularity In Canada

The herb garden is rapidly becoming a Canadian institution. All sorts of English favorites are found to grow well in Canadian soil. The best place to plant the herb garden is right outside the kitchen door where it will be handy for the picking. Herbs that add spice to the cooking and that are easily grown in the average back yard are: Tarragon, mint, chives, majoram, sage, parsley, leeks and various other members of the onion family.

Streamlining Saves Coal

Streamlining has come to naval architecture. Appearance of the Arctree, second of two British tramp steamers to be built on the streamline principle, in Boston harbor, caused widespread interest along the waterfront and elicited the information from her captain, Keith Williams, that his ship burned five tons less of coal per day than other steamers of a similar class.

Sirdar

Frank Hamilton of Kootenay Landing was a business visitor to Tye.

Dr. Henderson of Creston made several professional calls this week.

A. D. Bridges of Cranbrook was a business visitor to Sirdar for a couple of days.

Mr. and Mrs. James Passcuzzo were visitors to Medicine Hat and Cranbrook.

Rev. Mr. Lingrem of Nelson paid a visit to Atbara on Tuesday on his way to Canyon.

The water as indicated by guage at Sluugh bridge reads 3.03 a fall of 0.23 for the week.

D. Passcuzzo, Chas. Wilson and Sydney Rogers were motor visitors to Canyon, Wednesday.

M. Ferge, who has been employed here for sometime, left for Nelson to take up another job with the C.P.R.

The B.C. government inspector of equipment was here inspecting these at the road camp on Wednesday.

Mr. Kickuc, who has been living in the Lavezella place, has started to construct a new house just east of the community hall

A farewell social was put on for the bridge crew before their departure for Kimberley. A happy evening was spent by all.

Mrs. R. Stewart was at Cranbsook during the week, where she was an out patient at the St. Eugene Hospital for tonsilitis.

Mrs. Mannarino and son, Joseph, were at Creston several times during the week visiting Mr. Mannarino, who is at present an inmate of Creston hospital.

A tea was given in honor of the Archbishop Duke after the confirmation services. Mrs. T. Rogers was hostess with a goodly number in attendance.

James Mannarino, who has been on the sick list off and on for the past ten days, was taken to Creston Hospital for treatment. His condition is said to be serious.

Monday last the lift bridge, which spans the Kootenay River at Kootenay Landing, was given a test and is reported to have worked very smoothly the cables were at the same time given a good coat of preserving grease.

E. S. Jones, district engineer, of Cranbrook, accompanied by Messrs. Cummings and Moore, civil engineers, were here at the beginning of the week inspecting the proposed new grade through the heavy rock cut near Atbara Siding.

Archbishop Duke assisted by Rev. Father Murphy of Cranbrook and Rev. Father Choinell held a confirmation ceremony here Wednesday when the fol owing were confirmed—Frank, Bill and James Thames, Joseph Talarico, Joseph Mannarino and Tony and Mary Pelle.

An astonishing sight was witnessed here during the height of the wind and rain storm on W dnesday. While the waters of Kootenay and Duck Lakes were lashed into a fury little more than a gentle breeze was blowing in shore so that this vicinity escaped the damage to fruit experienced elsewhere.

An authorative report reached here that the Leib brothers have sold out their mining interests to a large syndicate. These mines are situated above Tye (Cultus Creek). Strength is given to the report from the fact that much activity is displayed at Tye. Benny brothers of Creston have quite a string of pack horses employed and accomadation is being got ready and shipping platforms constructed. A firm from Penticton is stated to have the general contract for the various works.

A Live Newspaper is an Asset To Any Community

In fact it is not going too far to say that the weekly newspaper accurately reflects the sort of town in which it is published.

We leave it to you to confirm or deny that this is the case in Creston.

The Review, in common with all other weeklies, depends in some measure on revenues earned in its Commercial Printing department to help keep the paper up to its best possible standard.

If you concede that the paper is a community need, are you playing square with it in the matter of patronizing it—in all its departments? Meaning

WHERE DO YOU BUY YOUR PRINTED STATIONERY?

—Letter Heads, Envelopes, Account Forms, etc., etc,, etc.?

The Review is fully equipped to turn out practically everything in the printed stationery line used in Creston. We can supply you on shorter notice and give you exactly what you want as proofs of all work are submitted the customer, if required, before the job is completed.

We can not only serve you as efficiently but our prices are at least equal if not a little better than you get out of town.

If we can't meet the price we certainly do not deserve your trade.

Try us—just once. Thank you.

WORLD HAPPENINGS BRIEFLY TOLD

Col. H. E. Boak, Royal Canadian Artillery, will be transferred to Regina as district officer commanding military district No. 12, with the rank of brigadier, it was announced at the department of national defence.

Traffic earnings of the Canadian Pacific Railway Company for the week ended Sept. 14 totalled $2,942,000, as compared with $2,454,000 in the correspondnig period last year, an increase of $488,000.

Jeffrey Arnott, assistant purchasing agent of the Canadian Pacific Railway, has been promoted to the post of assistant purchasing agent, with headquarters at Vancouver, B. W. Roberts, general purchasing agent, Montreal, announced.

The cost of living in England increased by one per cent. during August, the Labor Ministry Gazette stated. Taking July, 1914, as the average, the cost of living index was 143 per cent. on September 1 compared with 142 on August 1. The index stood at 141 in September, 1933.

Full freedom for civil servants to participate in politics, even to the extent of being a candidate in the federal, provincial or municipal arenas, through leave of absence without pay, will be sought during the coming session of parliament by the Amalgamated Civil Servants of Canada.

Grave fears as to the survival of the French-Canadian race as a distinct entity on Canadian soil are felt by Mayor Camillien Houde, of Montreal. Speaking at a ceremony to commemorate the arrival in Canada of Jacques Cartier, Mayor Houde questioned the likelihood of the race's survival.

The weekly illustrated paper, "Canada", published in London for the past 27 years, is being merged with another weekly, the "Canadian Gazette". The editor and founder of the former publication, Walter Lefroy, closes 37 years of prominent association with Canadian news work in London.

Little Journeys In Science

GOLD FROM THE SEA

(By Gordon H. Guest, M.A.)

Science has shown that there is gold in the sea, but the authorities on this subject are in dispute as to the quantity. Figures given indicate that there are about 700 ounces of the precious metal for each of the two billion inhabitants of the earth, which would amount to $24,500 per person if gold is valued at $35 per ounce.

Is it any wonder then, that ever since chemistry became an exact science, plans have been proposed to mine this wealth from the sea? One famous scientist lured by the idea was the late Dr. Fritz Haber, who was awarded the Noble prize for his method of producing ammonia gas from the air. He found such small amounts in sea water that he concluded the idea was impractical. In his opinion there is more gold in the living organisms of the sea than there is in the sea water.

Recent developments seem to indicate that the chemist of the next decade may be able to extract gold from sea water commercially. This is based upon the fact that a plant has been built in the United States for the extraction of bromine from the ocean.

Bromine is used in the production of ethyl gasoline and hence is in great demand. A few years ago chemists turned to sea water for bromine, even though it contained only seventy parts of bromine in a million of water. Very large quantities of water must be treated—2,000 gallons to obtain a pound of bromine.

It is easy to see why scientists talk so confidently of securing gold from sea water. Bromine is only worth twenty cents a pound whereas gold is valued at about $35 an ounce. Thus, in spite of the fact that there is much less gold than bromine in sea water, science is hopeful of mining gold on a commercial scale from the ocean. It has been estimated that the gold content of sea water is about $25,000,000 a cubic mile.

WHAT DOES YOUR HANDWITING SHOW?

By LAWRENCE HIBBERT
(Grapho-Analyst)

(All Rights Reserved)

The increased interest in Grapho-Analysis, the science of character delineation from handwriting, has brought in its train not only a host of converts, but the inevitable sceptic.

One of the most frequent objections is posed by those who ask "How can handwriting show one's character, when we are taught how to write from the same copybook in school?"

The answer to this objection only proves how strongly handwriting does show character. Because if you will study the writing of a single class of students who have learned writing from the same copybook, a few years afterwards, you will not find two who write alike.

Each one writes differently—a different slant, a different pressure, and differing conformations of letters. This shows that, as one grows, one's character changes or strengthens, and one's handwriting changes too.

And, whilst I am discussing objections, I would like to stress that it is not possible to tell a person's age or sex from handwriting. Here and there, a trained grapho-analyst will be able to hazard a guess. There is no scientific foundation for it, however, and consequently, no reputable grapho-analyist will attempt it.

I have seen women's writing that looked masculine, and, conversely I have examined the writing of men that looked for all the world like that of a woman. Then again some young people write a mature hand, and on the other hand, I have seen the writing of a man of 50 which seemed to be that of a youth in his teens. We can only get from handwriting what is in it.

There is increasing evidence that certain ailments can be discerned from handwriting. People suffering from heart trouble reflect this condition in their writing.

But grapho-analysis has not yet attained the point where it is possible to analyse ailments from handwriting with entirely scientific accuracy.

These are factors that time and continued research will attain, but character analysis from handwriting is an accomplished fact. And it is also true that vocational guidance can be given by trained grapho-analysts.

If you want to discover your own characteristics and traits, as revealed by your handwriting, take advantage of the offer made at the foot of this article.

* * *

D.N.—You are ruled by your heart—impulsive; emotional appeals will always draw your sympathy. You are inclined to get hysterical. There is evidence of good powers of concentration. If you get really interested in anything, you find no difficulty in concentrating all your powers on it. You like to move around; to change environment. You are not content to remain passive in a routine way.

* * *

F.B.—You have considerable depth of feeling and a desire to get on in the world. There is a sense of balance displayed. You do not talk too much. You are inclined to be clannish; you do not make friends indiscriminately. Mechanical or engineering work is indicated.

These are, of course, merely brief extracts from analyses.

Would you like to know what your writing tells? And that of your friends? You will be amazed at the revelation disclosed. Send a letter in your normal writing, and state birthdate in each case. Enclose with 10c coin (for each separate specimen) and 3c stamped addressed envelope. Replies will be mailed as soon as possible, but please allow at least two weeks. Address: Lawrence Hibbert, Grapho-Analyst, c-o Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg, Man.

To Safeguard Pedestrians

Beacons To Be Erected In London Streets For This Proposal

"Belisha beacons" will be erected for protection of London pedestrians, another feature of the war on motor accidents. They get their name from Leslie Hore-Belisha, minister of transport, who presided at a conference when it was decided to introduce them.

These are posts seven feet high with a yellow-painted glass globe, unlighted, at the top. They will be put at the crossing-places for pedestrians. In the dark they will reflect headlights a quarter of a mile away.

Women want men to be sturdy oaks—and spruce.

Now..

AIR-CELL BRINGS AN ENTIRELY NEW THRILL IN RADIO

...TO HOMES NOT HAVING ELECTRICITY!

"Heard the big ball game this afternoon, Jim—came in clear as a bell too. No, we haven't electric wiring in our house, but our new Air-Cell radio sounds every bit as good as my cousin's electric set down in the city."

"I used to get into town every time our storage battery ran down. This new radio uses an Air-Cell battery that *never* needs recharging. I don't mind staying home, though, because our Air-Cell set brings in programs we never heard clearly before."

"That new Air-Cell radio is a wonderful convenience. Our old storage battery was always giving trouble, and half the time we couldn't get the music loud enough. This new set has such an even current that you can hear perfectly all the time."

EVEREADY
RADIO BATTERIES

The invention of the EVEREADY Air-Cell "A" Battery has made possible this entirely different battery-powered radio that gives the glorious full tone hitherto only heard in electric sets.

The EVEREADY Air-Cell "A" Battery lasts for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household, and so does away entirely with the annoyance, expense and loss of time due to frequent recharging.

Used in conjunction with EVEREADY layerbilt "B" Batteries, Air-Cell radios, made by the leading radio set manufacturers, will perform with all the simplicity and reliability of any electric set.

Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFTEN RELIEVED IN MINUTES THIS WAY

Remember the pictures below when you want *fast* relief from pain. Demand and get the method doctors prescribe—*Aspirin*.

Millions have found that *Aspirin* cases even a bad headache, neuritis or rheumatic pain often in a few minutes!

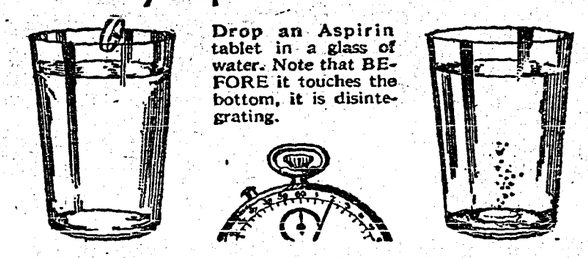
In the stomach as in the glass here, an *Aspirin* tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain practically as soon as you swallow it.

Equally important, *Aspirin* is safe. For scientific tests show this: *Aspirin does not harm the heart.*

Remember these two points: *Aspirin Speed* and *Aspirin Safety*. And, see that you *get ASPIRIN*. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every *Aspirin* tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast



Drop an Aspirin tablet in a glass of water. Note that BEFORE it touches the bottom, it is disintegrating.

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach—ASPIRIN tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures

— ASPIRIN DOES NOT HARM THE HEART —

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

SNYPOSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerad Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

(Now Go On With The Story)

CHAPTER I.—Continued

"What seems to be the trouble?" Keene's tone was anxious.

"Exactly what I asked old Ben. He said that as far as he can see there are two reasons; Carr is mighty old fashioned . . . and the Broken Spur is next to 'em."

"Well, what of it? These days some one's got to be next door."

"Huh. You're damned innocent for the man I know you to be. I suppose you never heard of rustlin'?"

"That's archaic," said Keene sharply. "Men don't rustle these days."

"Think so? Wait a bit! Old man Carr is always short of cash. He has to hire his men just for the time he needs 'em. He's got only about four or five men permanently on his payroll. That means that poverty keeps him from buildin' up a bunch o' waddies he could count on to charge hell with a cup o' water if the Hour-glass needed it. He's honest, too, and that's a handicap when he lives next to the Broken Spur. For years Dustin and Goddard have been tryin', by a lawsuit, to get the water supply that makes the Hour-glass valuable. Can't you see what happens? Old man Carr, crippled, is bein' robbed deaf, dumb and blind to make him sell his place. . ."

"But he can only sell his share. Half of the place is mine. . ."

"Well then . . ." Stone hauled himself erect in his chair. . . . "It looks to me as if one Gerald Keene, before long, will find himself partner to two crooks. If old man Carr is right. Don't you see? Old man Carr will have to sell his half of the Hour-glass to these men Dustin and Goddard to stand square with the world. . . ."

"Does your friend Lyon say these men Dustin and Goddard are two crooks?"

"He didn't have to say so. He said he couldn't understand 'em. Old Ben is so straight that the only man he doesn't understand is a crook. Why?"

"Well . . . I told old man Burwell I was goin' to run down to the Hour-glass and have a look at the place. If I go as the half-owner I'll learn exactly nothin' if there's any crooked work goin' on. I'm thinkin' it'll be best for me to go down there with a letter of introduction from Gerald Keene, the half-owner of the Hour-glass, to old man Carr. To get me a job down there and see for myself what's goin' on."

"Huh. Gerald Keene'll learn nothin' but good on Gerald Keene's ranch," said Stone grimly.

"That's so. I can't go to the Broken Spur because if Dustin and Goddard are really crooked, they'll not be hirin' any strangers on the ranch. If things are as crooked as men say the Hour-glass'll be the place to learn about it. My plan's the best. I'll go down there with a letter from Gerald Keene and you stay here till you hear from me. I'll get me a job. . . ."

"Huh! What kind of a job! A qualified cowpuncher'll be under suspicion the minute he hits the place. Why would a qualified workman take on with a busted ranch when there are others better able to pay him what he's worth? You can't get a job."

Keene slapped him on the shoulder.

"You're on. I can't. But I'll go as a tenderfoot. I'll take a letter of introduction to old man Carr. I'll be Duro Stone lookin' for a job to learn the cow business. You know every drugstore in the East is turnin' out amateur cow-punchers. I'll be one."

Stone laughed in spite of himself.

"I know the type. Drugstore cow-punchers! Nickel plated gun an' bearskin chaps! Bought straight from Montgomery-Ward. Shucks, man! You can't do it. You can't fool anybody who's ever forked a cayuse. Your walk; your color; the way you ride. . . . Nothin' doin'."

"I'll show you. Let me at that telephone till I order some stuff."

In five minutes he had send an order crackling across the wire.

"To be delivered in twenty minutes sharp," he said.

In a half-hour it was there and a grinning boy pouched the receipt.

Keene thrust the boy into the hall, untied the package and turned to Stone.

"You damned old Doubting Thomas," he said. "I'll show you! Wait."

He was gone like a whirlwind. A half-hour later the inner door opened and a new figure stood in the doorway. Newness overlay all his garments. His stitched boots wrinkled about the ankles and his red-and-green shirt fairly creaked in its creases. His white goatskin chaps had evidently been combed and newly brushed and a nickel-plated six gun showed three freshly filed cuts across its butt whereat both men laughed mightily. Stone roared with laughter and Keene raised himself on his toes and studied his reflection in the long glass.

"I'm Duro Stone," he said. "I'm goin' down to the Hour-glass to get me a joo tuckin' cows and calves into their little beds. I'm goin' to learn all there is to be learned about cows an' their ways. I'm not Gerald Keene. I'm Duro Stone who used to sell papers on the Rock Island route. I always did want to be a cow-puncher. Will I do?"

"God knows what you'll do," quoth Stone between grins. "But if you find out what the trouble is at the Hour-glass or the Broken Spur, you wire for one Gerald Keene. That's me! I'll help you chase the hen off the nest."

"Wait. . . ." Keene came back from the closet with a bottle and glasses. "Here's the health of Keene an' Stone. . . . I'll wire if I need you."

"And when I hear," said Duro Stone, left behind, "I'll sure come a-runnin'."

"You may need to," said Keene soberly. "I hope not but I'm afraid."

"All right, Old Timer. To the health of the new Duro Stone."

CHAPTER II.

"There he comes now! That's old Dad Kane as sure as shootin' . . ."

Sam Dustin, half-owner of the Broken Spur ranch, jerked a finger to the west and Spike Goddard, his partner, rose slowly and squinted into the dust-haze of the range.

"You're a damned fool ever to have grubstaked that old fool Dad Kane," he said explosively. "It's all your doin', too. Three hundred dollars plumb throwed away."

His words carried a sting. They were meant to do just that. Everything that Spike Goddard said or did carried a sting. His red face, his cold blue eyes, his wire-stiff reddish beard all bespoke combativeness and Dustin felt that sting. He knew that silence under the whip-lash of his tongue would annoy Spike more than any speech.

Dustin and Goddard had owned the Broken Spur for several years and all Crevasse County wondered how they made it pay. That they did make money was clear but none knew how they did it. Old Sim Peters, the decrepit old cashier at the only bank in Seco, could have told them but there were good reasons why Peters should tell nothing that affected Sam Dustin.

"If you'd told me three years ago that you were aimin' to grubstake old Shammy Skin Kane," said Goddard, I'd have told you it was the ac' of a damn fool."

"I know. An' then you stopped me from takin' up the Bar Circle range lease for grass," snapped Dustin. "That cost us over ten thousand. All because you were scared to take a chance."

This time Spike flushed. A man does not care to be reminded of his timorous moments that cost him money. He stood by his partner, scowling off into the sunset. Joint owners of the Broken Spur, they were as different as black is from red. Sam Dustin's tall lithe figure, his dark, handsome face, his flawless teeth made a perfect foil for his partner who was, as Jameson, Editor of the Seco Courier said: "As red as a fox and twice as shifty. I wouldn't trust the pair any further'n I'd trust a coyote in a henyard."

The negro cook came out and pounded the supper summons on a big iron triangle that hung on a China-berry tree and the men trooped from the bunk-house to supper but the two partners gave no sign. They continued to stare across the corrals at a great red dust-cloud that moved slowly along the distant wire-fence. Under that dust-cloud dim shadows resolved themselves into three packed burros followed by a slouching figure that prodded the rear-most burro with a short goad. At each prod the reluctant burro trotted a few steps but dropped back into a walk. Dustin laughed.

Snail hunting is a sport in France.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels

You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists. 48

Nurse Was Heroine

Risked Life To Save Hospital From Terrible Disaster

Few stories are more thrilling than that of Sister Thomas, who risked her life to save the main theatre of the Middlesex Hospital from a terrible disaster. One morning the oxygen in a large cylinder caught fire, and a stream of sparks and flames gushed from its mouth. It was a fearful moment, for the condensed oxygen within the cylinder might explode like a bomb any instant and deal death and destruction all round. Everyone left the theatre, and the last of all to go was Sister Thomas, who had stayed behind long enough to remove the ether out of harm's way and to shut doors in order to minimize the effect of the explosion. Then she did a marvellous thing. She quickly made up her mind to risk burns and possible death in an attempt to save the building itself. She opened the door, ran across to the cylinder, and turned off the tap which supplied the oxygen to the flame. So fierce was the heat that the steel neck of the valve above the tap had been melted. This cool act of courage saved medical apparatus worth thousands of pounds, and Sister Thomas has been awarded the medal of the Order of the British Empire for gallantry.

THE RHYMING OPTIMIST

By Aline Michaelis

DAWN

Dawn, coming up with its splendor
Blazoned in gold and in blue;
Dawn, with its message of courage,
Old as creation, yet new!

Tasks that are waiting the toiler,
Rest that is waiting the old,
These are the gifts dawn is bringing
Now, as its banners unfold.

Labor and laughter and loving,
Planning and pleasure and pain,
Ever with dawn life beginning,
Lifting its ringing refrain.

Dawn with its promise of power
Setting the restless heart free,
Brimming men's thoughts with fresh ardor.
Hinting of triumphs to be.

Answer to prayers made in anguish,
Symbol of sorrow withdrawn,
After the night and its doubting,
After the dark, comes the dawn!

Canadian-grown root seed compares favourably with the best imported seed in its ability to produce profitable crops.

The Mennonites are members of a religious sect founded by Menno Simmons, a Dutch religious reformer born in 1492.

Dr. Wernet's Powder For

FALSE TEETH

A Joy To All Users

Can't Slip or Slide

Sprinkle on Dr. Wernet's Powder and you won't have to think about your false teeth all day long. Joyous comfort is yours. Eat anything you want—it holds plates firmly in place—they positively can't slip or slide. Forms protective cushion for sensitive gums. Leaves no colored, gummy substance—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentists. The cost is small—the comfort great. Any druggist.

Little Helps For This Week

"Let I pray Thee Thy loving kindness be for my comfort, according to Thy word unto Thy servant." Psalm 119:76.

Love divine has seen and counted
Every tear it caused to fall;
And the storm which Love appointed
Was its choicest gift of all.

O that thou couldst dwell in the knowledge and sense of this, even that the Lord beholds thy sufferings with an eye of pity, and is able not only to uphold thee under them, but also to do thee good by them. Therefore grieve not at thy lot, be not discontented, look not at the hardness of thy condition, but when the storms of vexation are sharp look up to Him who can give meekness and patience, can lift up thy head over all, and can cause thy life to grow and be a gainer by all. If the Lord God help thee according to thy condition of affliction and distress thou wilt have no cause to complain, but will bless His name.—I. Pennington.

Laws Of Physics

Intricate Point Is Settled At The University Of Saskatchewan

Laws of physics as operating in the court of Magistrate J. S. McKessock at Sudbury, Ontario, have no validity in Saskatchewan. In the physics laboratory at the University of Saskatchewan are two suspended leaden balls of equal weight. When one ball swinging slowly is struck by one swinging rapidy in the other direction, it is the slowly-moving ball that bounces back while the one previously in rapid motion becomes almost motionless. An authority on physics points out that if two bodies of differing momentum (weight multiplied by velocity) meet, the resultant momentum will be the same in direction as that of the major force. The majority carries.

An electric current always is passing from the atmosphere into the earth.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

The equinoxial gales of Wednesday last and again on Saturday and Sunday has blown off a considerable quantity of apples. McIntosh and Delicious were the hardest hit. Wednesday's blow was particularly disastrous at Alice Siding.

Presentation has just been made to Lorraine Olivier of a year's subscription to the Canadian Geographic Magazine. This is the prize given annually by Dr. Henderson to the pupil from Creston valley making the highest standing in the entrance to high school examinations.

Creston Hospital Women's Auxiliaay appeal to members and others for old woollen goods such as sweaters, underwear, stockings, etc., for making into blankets. Please give these to Mrs Jas. Cook or Mrs. Chas. Murrell within the next two weeks. Goods should be clean and all buttins, etc., removed.

A feature to Sunday morning service at the Presbyterian Church at 11 o'clock, will be an illustrated talk by Rev. C. O. Young, a missionary from India, who will speak on his work. This is rally day and the Sunday school and adults worship together, with the scholars providing bible readings, recitations, choruses, etc.

After Jan. 1, 1935, any person found to be in possession of a pistol or revolver when its ownership has not been recorded with the police authorities, will be liable to a fine of $50 or 30 days in jail, or both. This amendment to the criminal code was passed at the last session of parliament and is being proclaimed in the Canada Gazzette.

A number of members of Blossom Temple Pythian Sisters paid a fraternal visit to the Pythian Sisters lodge at Kimberley on Tuesday night. In the party were Mrs. Vic. Mawson, Mrs. W. G. Hendy, Mrs. Hassard, Mr. and Mrs. Ed. Lewis, Mrs. Joe Foster, Mrs. A. Lovestrom, Mrs. Maxwell, Mrs McWilliams, Mrs. E. Uri, Miss Olga Hagen and Will Rodgers

The made in-Canada Exhibition and Sale in the United Church basement Saturday, 29th from 10.30 a.m. to 5.30 p.m., under Hospital Women's Auxiliary auspices, is exactly what the name implies—a sale of various articles made in Canada and donated by the manufacturers for the benefit of Creston hospital. There will be offered such everyday necessities as flour, tooth paste, baking powder, etc., to really beautiful things as copper kettle, colored bed throws and electrical appliances. Come and see, and buy generously.

Members of Wild Rose Lodge Knights of Pythias were out in large numbers Saturday night for a special meeting to receive George W. Allison of Victoria, grand chancellor of the B.C. grand lodge, who was accompanied by Fred Powers, a past grand chancellor of Fernie lodge. For the edification of the visitor the rank of knight was conferred and chancellor commander R. M. Telford and his officers were complimented on the efficiency displayed in degree work. The feature of the evening was the grand chancellor's address on the aims and accomplishments of the Knights of Pythias, members agreeing that it was quite the finest talk the lodge has so far been favored with. At the close of lodge proceedings dinner was served.

The regular meeting of the Women'e Auxiliary to Creston Valley Post Canadian Legion was held in the Legion hall on Tuesday evening. The president, Mrs. W. V. Jackson, presided. 15 members answered roll call, Lister, Erickson, Canyon, as well as Creston being represented at the meeting. The correspondence had much to do with the ordering of wreathe. There was some discussion as to new poppy, with the decision to order n w. poppies along with the old style of former years. President John Bird and G. Vigne of the Legion attended the meeting to discuss supper arrangements for Armistice dance. The Auxiliary will assist the Legion, as usnal, and at the October meeting a committee will be struck to take charge of this work. Mrs. K. Knott, Mrs W. V. Jackson and Mrs. J. E. Johnston were in charge of the tea that followed the close of proceedings.
