THE CRESTON REVIEW

VOL. XXV. CRESTON, B. C., FRIDAY, OCTOBER 12, 1934 No. 26

58 Forest Fires Reported, 1934

About $11,000 Spent for Supplies and Paying Fighters—Winlaw Limit Fire Takes Logs—Loss to C.P.R. Standing Timber.

About $11,000 was expended in supplies and pay of fire fighters in the Creston forestry district during the 1934 forest fire season, which closed a October 1st, constituting the busiest season in the last four years. All told 58 fires were reported.

Although the season opened at May 1st, and the year was a dry one, not much trouble was encountered until the end of the first week in August, when two of the worst outbreaks of the year were reported within 48 hours, and at that time almost 200 men were, for a few days, employed looking after fires in the local forestry area, which extends from Crawford Bay to Irishman Creek, east of Yahk.

In addition to forester J. P. MacDonald, the outside staff consisted of assistant foresters Geo. Huscroft of Wynndel and the late J. M. Burge of Gray Creek; patrolman, Art Hurry; and lookout man R. S. Bevan, the latter of whom located 30 of the 58 fires, and whose hourly reports on conditions conside ably expedited the work of the fire fighters. Even when the smoke pall was at its heaviest just about sunrise the lookout man was able to get good vision for about an hour.

Possibly the most disastrous blaze was that which originated at Goatfell and fanned by high winds was driven through almost to Moyie before being got under control. At one time 135 were employed handling the blaze which was in C.P.R. timber and which company suppli d most of the men It is estimated that about 90 million feet of standing pine, spruce, larch and fir was burned over but portable mills are now at work in that section and if that amount of timber can be handled this season the loss can be held to about 40 per cen .

Another big blaze was that in 36,000 acres of slashings on the former Winlaw limit south of town which spread into the old Sayward limit and onto part of Block 812, doing some property damage at Lister and for a brief period threatening Canyon. In this blaze about 5000 yellow pine logs that had been cut and skidded in 1933 and 1934 went up in smoke.

Another outbreak was in the Corn Creek-Summit Creek section where a stand of over-matured spruce suffered. Getting at this fire was difficult due the trails being badly filled up so little attention having been paid them for two or three years previous, and the big windstorm in December piling the brush so high that in places the trail had to be abandoned altogether and the creek bed followed.

The windup of operations is under way in the basement of the forestry office where the equipment is being put in shape for 1935 operations.

Wynndel

Miss Marion Cooper of Creston was a weekend visitor with Miss Leah Abbott.

J. Martell was a visitor at Nelson at the first of the week.

Ed. Grady of Spokane was a visitor here last week with his mother, Mrs. J.J. Grady.

The October meeting of the Women's Institute will be Tuesday next, 16th, at 2.30 p.m.

The October meeting of the Ladies' Aid was held at the home of Mrs. H. F. Packman.

Mr. and Mrs. McDougall of Lumberton were visitors here last week, guests of Mr. and Mrs. J. G. Abbott.

Father L. Choinel of Cranbrook was visiting in the district last week and while here said Mass at the home of Mrs. Grady.

T. E. Slingsby is recently in receipt of of word from Toronto, Ontario, telling of the death of his mother at the advanced age of 87 years.

The Franklins were hosts at a turkey shoot on Thursday, and several of our residents were successful in getting the makings of a ffne Thanksgiving dinner for Monday.

Geo. Taylor has just received word of his appointment as federal voters' list enumerator and will start in this week making up the list of voters to be used at the next federal election.

Harvest festival services were held in both Anglican and Unithd Churches on Sunday. The edifice was tastefully decorated with autumn leaves and flowers. The gifts of fruit and vegetables were many.

The Athletic Club had their first military whist one night last week, which was well attended, with a dozen tables occupied. Winners were Mrs. McGregor, C. Payette, Mr. and Mrs. D. Butterfield. Consolation prizes went to Misses Mary and Leah Abbott, Agnes Crane, and D Hagen. The dance music was by Messrs. A. B. Ness and A. Goplin of Creston

Cranbrook Courier: The final returns of votes for selecting of the rank and file worker as a delegate to the Soviet Union as guest of the Soviet Trade Unions, is complete. The referendum of the membership of the organizations represented at the nomination conference were given as follows: Thomas E. Mountford, Wynndel, B.C. 474 votes; Jess Wiles, Cranbrook, B.C., 230 votes. Thomas Mountford declared officially elected by the majority of 244 votes. The delegate will leave for the Soviet Union on the 10th of October.

Erickson

Mrs. R. M. Telford is home from a two w eks' visit at Spokane.

Birth—on October 9th, to Mr. and Mrs. Frank Botterill, a daughter.

Joan Heric was a patient at Creston hospital for a few days at the end of the week.

A. Colbus, principal of Erickson school, spent the Thanksgiving Day weekend at his home at Fernie.

Mrs. Ed. Clark was hostess to the United Church Ladies' Aid at the October meeting on Thursday last.

W. G. Littlejohn left at the first of the week on a visit at Kelowna in connection with Tree Fruit Board business.

Mr. and Mrs. J. G. Connell arrived back at the first of the week from a visit at Edmonton, Alberta. Mr. Connell reports the grain crop in northern Alberta as badly frosted.

The work of compiling the voters list to be used at the 1935 federal election will be handled by John Hall, who has been appointed enumerator, and will get the work under way at once.

The monthly meeting of Erickson Hospital Ladies' Auxiliary was held at the home of Mrs. McKelvey Wednesday evening last. It was decided to hold an afternoon tea and sale of cooking at Mrs. Putnam's, Wednesday, October 31st, 3 to 5 p.m.

Cranbrook Courier: Ralph Carter and Ralph Eye, both residents of Cranrrook, were up before Police Magistrate John Leask last Monday charged with taking several boxes of apples from a broken down truck on the Kimberley road on September 22nd. The apples were the property of John Gardner, of Creston and the truck was driven by John Alton. When the hind wheel broke, the truck veered and the load upset. Alton's leg was injure and he was brought to the hospital here for treatment. While he was away his load of apples, some hundred boxes, was stolen. It appears Eye and Carter, learning of the unprotected apples, hired a car and drove out to the scene of the wreck, loaded on eight boxes and brought them into town and proceeded to peddle them. They pleaded guilty to the charge and each wrs fined $25 and costs, amounting to $28 75, or 60 days' imprisonment. They were also ordered to return the eight boxes of apples to the owner, who was in court when the cate was on. The party or parties who took the remainder of the apples have not been apprehended.

Kitchener

John and Henry Nelson were Cranbrook visitors Thursday and Friday.

Mrs. G. A. Hunt and Mrs. B. Johnson were visiting friends in Creston, Friday

Mrs. Ted Bush spent the weekend at Creston, a guest of Mr. and Mrs. George Bush.

A. Hanson of Vancouver was a business visitor in connection with the Sullivan mine on Thursday.

Mr. and Mrs. Strudwicke and sons have left to reside at Nelson, where the boys will attend school.

Mr. and Mrs. T. LaBelle and daughter, Lavonne, of Canyon, were guests of Mr and Mrs. Claude Simpson, Sunday.

Mrs. Art Bowness of Cranbrook is here on a holiday with her parents, Mr. and Mrs. C. Nelson, arriving Saturday.

Mr. and Mrs. C. Seneasel and Mrs. D. F. Putnam and son, Frank, of Erickson, were Cranbrook visitors on Saturday.

Art and Claude Simpson and Chas. Bush, jr., were up Goat River on a hunting trip a few days last week, returning on Sunday.

Mr. and Mrs. Kolthammer and children, Mrs. Roy Browell and Mr. and Mrs. C. Taplin, all of Canyon, were here on Saturday on a visit with Mrs. Fritz Molander.

The biggest crowd in many months attended the dance by the United Front party on Wednesday evening to send T. Mountford to Russia The music was by Priest's orchestra. A supper was served at midnight.

Expecting Early Start Basketball

Great Race for Ladies' Championship in Prospect with Four Teams Entered—Two Strong Quints in Men's Section.

With the opening date set tentatively at October 19th, senior basketball seems assured of a good start for the season. The schedule committee has not yet decided as to what teams shall meet in the opener, but it seems certain that some prominent local citizen will officially open the league by tossing up the first ball and that the local band will be in attendance.

Although there are fewer teams in the league this year, competition will be very keen. The Cardinals, last season's champs, have a strong line-up. Former stars include the Corrie brothers, Ben Crawford, Charlie Holmes and Bus Ross, while Tony Cobus is an experienced recruit from Fernie. The Groceteria have strengthened their last year's squad with the addition of Fred Martello, captain of the Centipedes last season, Hundon, a former Varsity player, and Jack Payne from the Creston High School squad. The Wynndel team is still an unknown quantity as far as local fans are concerned, but should give a good account of itself if advance reports are correct.

In the women's division the system of choosing players adopted should make for close games. Creston Review has most of its last year regulars, including Nora Payne, Ada Lewis, Jean Henderson and Marjorie Levirs. Creston Motors have much the same team, with Kate Payne again managing the squad. Pharmacy will be a strong threat with Dot Olivier, the three LaBelle sisters, Minnie Downes, Madge Moore and Marjorie Learmonth. The fourth team is chiefly composed of ex-high players with Nell Payne, Mary Abbott, Betty Speers, Agnes Crane, Fanny Lewis, Ruth Hare, Theo Tomkins and Rita Kirk.

Among the missing faces in this year's basketball will be a number of players who have become familiar to the fans. Earl Christie has left Creston. Mrs. Martello, spectacular Review forward, has decided not to play this year. The Centipides, who numbered among their members most of the veterans who introduced men's basketball to Creston, have definitely dropped out of active play, although they will take part in the refereeing and coaching.

Lister

Mr. and Mrs. W. L. Houle of Kimberley were Sunday visitors with Mr. and Mrs. Fred Powers.

Mr. and Mrs. Pat Holland of Kimberley spent the weekend with her mother, Mrs. H. Yerbury.

R. V. Willcox of Salmon Arm, inspector for R. O.P. poultry department work, was a caller at the Powers ranch during the week.

Lister Trading & Supply Company, Limited, are this week warehousing their share of a carload of Ogilvie flour and millfeeds.

Jim Huscroft is busy with his baler putting up the cut of alfalfa on the Col. Lister ranch, a car of which has already been shipped to Procter.

The annual meeting of Lister Community Society is called for Thursday night, 11th, at the schoolhouse. Mrs. D. J. McKee is the retiring president.

R. T. Millner has been advised of his appointment as enumerator in connection with the compiling of the new federal voters list, which work gets under way this week.

Creston Hospital Women's Auxiliary were in error in stating that Mrs. C. Ross, who donated the quilt raffled on October 29th, was of Huscroft. Mrs. Ross is a resident of Lister.

Fred Huscro t and Wallace Sinclair arrived home this week from High River, Alberta, where they have been for the past ten weeks helping with harvest and threshing operations.

Jess Filmer, one of the original settlers at Lister, who is now located at Nanaimo, is renewing acquaintances here at present, a guest of Mr. and Mrs. R. Stevens. He is employed as caretaker at the courthouse in that city, but his health is still none to good.

Much sympathy is felt for Mr. nd Mrs. R. T. Millner in the death of their youngest daughter, Agnes Nora, aged three months, who passed away on Saturday The funeral took place on Monday to Creston cemetry, Rev. M. T. C. Percival officiating.

School was closed on Monday for Thanksgiving Day. Miss Robinson, teacher at Huscroft, was at her home at Blewett, going along with Miss Curtis, who spent the weekend at Slocan City. Miss Webster was a guest of Mr. and Mrs. A. G. Mensinger at Erickson.

Grand Theatre **Sat., Oct. 13**

Why was the notorious gambler chosen as best man at the wedding of the District Attorney?

"Manhattan Melodrama"

with

Clark GABLE

handsome, notorious "Blackie" Gallagher—man about town. He gambled for millions or romance with the same assurance—wasn't he always right? He's facinating!

William POWELL

as the ambitious District Attorney. First—and last—a tracker of men! He forgot boyhood vows of loyalty . . . when his own friend broke the law!

Myrna LOY

beautiful darling of after dark. Why did she have to fall in love with Blackie's life-long friend? The answer is thrilling romance and vivid drama.

Alice Siding

Mrs. Jones is at present a patient at Creston hospital.

Apple picking in this section will be completed by the middle of the month.

Ron. Gibbs has returned to Penticton after a two weeks' visit with Mr. and Mrs. F. W. Ash.

Miss Florence Schmidt, who has been employed at Canal Flats for some months is home on a visit.

Mr. and Mrs. Jonas Brubacher of Ashcroft were here a few days this week, combining business with pleasure.

Up at Lakeview Sam McNeil has the walls and roof complete on his new home, and Ira Willis has completed the roof of his barn

Miss Helen Moore, principal of the public school at Lumberton, spent Thanksgiving with her mother, Mrs H. H Taylor.

T. Travis and Bob Parkin are busy on a clearing in the Lakeview district, where the former is to erect a house, the foundation for which is in.

Mrs. Frank Ebbutt and daughter, Shirley, of Britannia Mines, are here on a visit with the former's parents, Mr. and Mrs. J. H. Webster.

Billy Mather, who has been herding cattle at Yahk since the middle of April, returned home last week. The cattle were brought back early in the month and are grazing on the flats.

The Harvey blacksmith shop—on the former Rose ranch—has been discontinued. Mr. Harvey has returned to Saskatchewan, and Mrs. Harvey is in Spokane, on a visit with her daughter.

AT THE HOSPITAL

Andy Lovestrom, acciden case, left the hospital for home on Sunday.

Mrs. McKinnon was admitted during the week, and is undergoing treatment.

Fred Yerbury, accident case, of Camp Lister, and Mrs. H. Jones of Alice Siding returned home, Tuesday.

James Mannerino was able to return to his home at Sirdar on Saturday, very much improved in health.

Guido Benedetti, and Kurt Patalla of Wynndel; G. Rohacs of Sirdar, Miss Joan Heric of Erickson, and Master William Forbes of Creston, received treatment and returned home

Jas. Lochead, West Creston; H. Cwosny, national defense camp; Thomas Wall, La France Creek; Jack Lake, accident case, of Gloulily; and Mrs. Barnes, Canyon, are improving.

J. T. Lawrence, a Grand Forks orchardist, has just invented a grader of his own, which polishes the apples before they pass along to the packers.

Fruit Movement Light This Week

Low Price on Large Size Jonathans Create Healthy Demand with Eastern Canada Asking for Supplies of Snows.

Up to the middle of the week things were quiet in local fruit shipping circles, and what stir there was had to do with varieties that the valley is short on.

There is a healthy eastern demand for Sn ws of which Creston has but very few The other wanted variety is the Jonathan on which bargain prices prevail in the larger sizes. In issuing the new prices effective October 8th, the Tree Fruit Board advises, "Jonathans are runing much more to very large sizes than was anticipated. Because of this it is necessary to revise the pool bases in order to get quick clearance" Prices set are as follows: Extra Fancy, 138 and larger, $1 Fancy, 138 and larger, 90 cents. Cee, 138 and larger, 80 cents. No 3, 138 and larger, 70 cents. In loose, Cees are available at $17.50 per ton.

Both local houses have sold at firm prices all the Jonathans in the export sizes, and both report that the quantity available locally 138 and larger is almost negligible. Late i st week the board threw the Wealthy deal wide open in order to get a clearance and in the Okanagan the clean up price on this variety has ruled as low as $12.50 a ton. The open deal has been beneficial in cleaning up the balance of this variety held locally.

At the Exchange the grader is being utilized on any particular grade the trade calls for Early in the week the Delicious were being handled although orders for the variety were not at all heavy.

In order to get some idea of the quantity of boxes still required the Exchange is this week asking its growers for an estimate of the apples still to come in, along with particulars as to what storage facilities t e individual grower has available—frostproof and shed.

Boswell is this week shipping out its final car of Cox Orange—the third this season, all of which have gone overseas. As at Tuesday, the Exchange states that it has already shipped within ten cars of the total moved in all 1933.

W E. Haskins, chairman of the Tree Fruit Board, was here on Friday and conferred with shipping houses and grower shippers on operations generally, and more particularly with the question of storage Creston's attitude in this latter matter was very definitely stated and Mr. Haskins is hopeful it will be approved when presented to the board for consideration.

On Wednesday shippers were notified by the Tree Fruit Board that the price on Jonathan, loose, Cee grads, 138 and larger, $20 ton, an advance of $2.50 over the opening price.

Canyon City

Gordon Vance was a holiday visitor at Kimberley at the weekend.

Bond & Son have finished the job of stuccoing the new residence of Ed. Clark at Erickson.

Gunnar Larson is at present a resident at Creston—in charge of the K. E. Paulson ranch, while the family are away on a visit in Saskatchewan.

The Uuited Church was nicely decorated on Sunday for harvest thanksgiving service at which Pastor Walker delivered an appropriate address.

Jess Filmer of Nanaimo who, a few years ago, occupied the ranch now owned by George Niblow, was renewing acquaintances here the fore part of the week.

Basketball is being organized in connection with Canyon's winter sports and as soon as the talent gets into shape games will be arranged with outside teams.

H. Young has been named as enumerator in connection with the preparation of the voters list for next year's federal election, and will be on the rounds in a few days.

Apple picking will be completed in this section by early next week. Quite a few hundred boxes are still here ready to move to the packing sheds at Creston and Erickson.

West Kootenay Power & Light Compan plant at Canyon is now developing more "juice" than has been the case since commencing operations. Now that irrigating is pretty well over and more water coming down Arrow Creek there is about six inches of water going over the dam crest. At one stage the surplus flow was not more than two inches.

The United Church at Penticton is claiming a Sunday school attendance of 400.

WORLD HAPPENINGS BRIEFLY TOLD

Domitien T. Robichaud, Ottawa, has been appointed superintendent of the Dominion government's bureau of translation. His salary will range from $4,800 to $5,400.

British producers are rapidly ousting American goods from the Canadian market, said Howard G. Ferguson, Canadian high commissioner to Great Britain.

"Tourists will be worth $30,000,000 to $50,000,000 more to Canada this year than last, as a result of efforts to increase this traffic," according to D. Leo Dolan, director of the newly-formed federal tourist bureau.

One of the wealthiest men in Poland, Count Jacob Potocki, died recently, leaving his entire fortune, amounting ot about $20,000,000, to a medical institution for the treatment of cancer and tuberculosis to be founded in his name.

Aside from becoming a prominent grain port, Churchill boasted another distinction—it has become the jumping-off place for supplies to the northern missions. This season more than 100 tons of mission supplies were shipped out of Churchill.

Giving impetus to fattening of market cattle in central and northern Alberta, a portion fund of $75,000 for the three prairie provinces to assist farmers in buying stock has been made available by the Dominion Agricultural Credit Company, Ltd.

All lands owned by the University of Manitoba are exempt from taxation in Winnipeg, Chief Justice D. A. Macdonald ruled, granting an application of the university for an injunction restraining the city from assessing or levying taxes, or selling university lands.

Is Reaching Danger Point

Many persons seem to think that the spending possibilities of the Government are limitless, but they lose sight of the fact that every dollar appropriated for public purposes has to come from the taxpayer. What they also forget is that there is a danger line in taxation which is reached when the levies become so oppressive that they cannot be collected.—Philadelphia Inquirer.

Recently the following testimonial was received by a patent medicine concern: "For nine years I was totally deaf and after using your ear salve for only ten days I heard from my brother in Nebraska."

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons — instead of their doctors' — on remedies for their children.

If they knew what the scientists know, they would *never* take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia — the safe remedy for your child."

Remember this — And *Always* Say "*Phillips'*" When You *Buy*. Your child deserves it; for your own peace of mind, see that you get it — Genuine *Phillips'* Milk of Magnesia.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

Radio Instruction

The Saskatchewan Government Correspondence School — Radio Broadcasting 1934-1935

The programme of Radio Instruction given by the Saskatchewan Government Correspondence School during the past three years will be continued for the present school year. From Monday, October 15th, to Friday, December 14th, 1934 and from January 14th, to April 26th, 1935, a broadcast will be given daily, except Saturdays and Sundays, from four-thirty to five P.M. Mountain Standard Time. The radio broadcasts will originate at CJRM, Regina, and the network will include the following stations: CFQC Saskatoon, CHAB Moose Jaw, CJGX Yorkton, CHWC Regina, CKBI Prince Albert.

The instructors will deal with the difficulties of pupils and will answer not only questions in the assignments but also questions that are daily reaching the School from teachers and pupils. In order to have a fuller appreciation of the addresses pupils are requested to have their Correspondence Lessons before them.

The following is the programme to be followed:

Gde.	French	English	Latin	Science Grade IX	History Grade X	German Grade IX	Science or Geog. Grade X

Suggestions and comments regarding the broadcasts are invited.

Little Journeys In Science

DIAMONDS

(By Gordon H. Guest, M.A.)

Diamonds are the purest form of carbon, an element which occurs in almost every living substance. Found in the sand and gravel of river, lake, or sea beds, the stones are separated out by a washing process which carries away the outer coatings, leaving the diamond free. These gems have a crystalline form, but sometimes the stones are cut by jewellers to further enhance their brilliance. Clear diamonds have the greatest value, although there are rare occurrences of delicately colored stones which are much prized. Black diamonds are more plentiful than the clear stones and are used for cutting and drilling. Diamonds are also used by engravers in making etchings.

It has been the dream of many scientists to make synthetic diamonds, and this has been accomplished occasionally, although it is found that the process does not produce sufficient stones to make it worth while.

Moisson, a French chemist, in 1893 was successful in producing a small quantity of the gems by heating charcoal with iron to a very high temperature in an electric furnace. The mixture was then cooled very quickly. A coating of iron was rapidly formed on the outside, but at the centre the cooling was slower, and a few very small clear and black diamonds were found. Rubies and other gems have also been made synthetically, but not with great success.

Diamonds are measured by carats, a unit of weight which is equivalent to three grains troy weight. The largest diamond ever found was the "Cullinan" which was mined in South Africa. This stone originally weighed 3,025¾ carats, but it was later cut into smaller stones.

Even Sell Meat

Drug stores sell almost everything but, down in Florida, they have gone far beyond the variety of the stores up this way. A United States cruiser stopped at St. Petersburg and needed 15,000 pounds of fresh meat. The purchase was made at a St. Petersburg drug store.

Java holds the world's record for having the most thunderstorms.

West Indian hurricanes usually travel in a curved path.

Birds can see 100 times better than man.

SUNDAY SCHOOL LESSON

OCTOBER 14

THE CHRISTIAN AND HIS BIBLE

Golden text:
Oh, how I love thy law!
It is my meditation all the day.
Psalm 119:97.

Lesson: Acts 8:26-39.
Devotional Reading: Psalm 119:41-48.

Explanations And Comments

How to Study the Bible. When a man insists that every statement in the Bible is to be taken as literally true, he outrages our sense of fact. That is not so. On the other hand when some man refers to the Bible as "a lot of myths, legends, old wives' tales," a cast-off collection of literary old clothes, he outrages both our sense of reverence and our sense of fact. That is not so either. The more thoughtful people of the world have been using this book for centuries as a book of final values for all who would live nobly.

The only basis for an enduring faith in the Bible is sound, accurate, thorough knowledge. Let men study to show themselves approved unto God, workmen that need not be ashamed, rightly divining the word of truth. Let them learn to discriminate between that which is merely local, temporary, incidental in this literature and that which is universal, enduring, vital. Let them learn that we have there a record of the progressive revelation which God made of himself through the religious experiences of a people chosen for their spiritual insight. It is a record of long, patient processes of mental and spiritual unfolding, stretching through a period of more than a thousand years. We have this heavenly treasure in the earthen vessel of a Hebrew civilization, and it takes shape, color, and odor from the vessel which contains it. The more thorough and intimate our knowledge of the Bible, the better it will be for those writings which are able to make men wise unto salvation and furnish them thoroughly for all good work.

But coupled with that fearless, painstaking scholarship, which walks through the pages of Holy Writ with eyes wide open to the truth, let there be also a genuine reverence for this book as a message from the heart of God to the soul of man. "Let knowledge grow from more to more, but more of reverence in us dwell." Men have found this book a lamp unto their feet and a light unto their path. "Thy word have I hid in my heart that I might not sin against thee." Discriminating study carried on in the right spirit leads to the renewal of the inner life. There is no necessary antagonism between knowledge and reverence, between scholarship and devotion—they are the right and left hands of a common, competent approach to the Scriptures. We say "Our Father," and we say also "Hallowed be thy name". In like manner, let there be the blending of intimate knowledge with wholesome reverence for the Bible and we shall find that "all Scripture given by inspiration of God is profitable for instruction in righteousness."—Charles Reynolds Brown, in The Gospel for Main Street.

Voice Warns Drivers

If you are driving in St. Louis, Missouri, and you suddenly hear, coming as if from nowhere, a stentorian admonition about the way you are handling your car—don't be alarmed. It's merely something new in polite police work. For the "traffic school car," equipped with loudspeaker and manned by vigilant officers, has made its appearance on St. Louis streets.

Acquires Televison Device

United States Buys American Rights From Austrian Inventor

Gustav Boehm, Austrian inventor, who claims to have perfected a cheap television set, has sold the American rights to his patent.

The patent, it is claimed, can be adjusted to the ordinary radio receiving set.

The new apparatus is a short wave receiving set capable of clear television within a radius of 50 miles and receiving pictures 4½ by six feet in size.

Herr Boehm, who has been working in Vienna for ten years on his invention, left for New York to supervise the manufacture of his television set. Details of its construction are kept secret until the apparatus has been placed on the market.

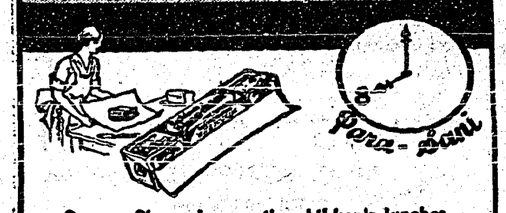
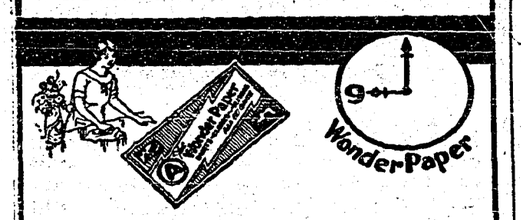
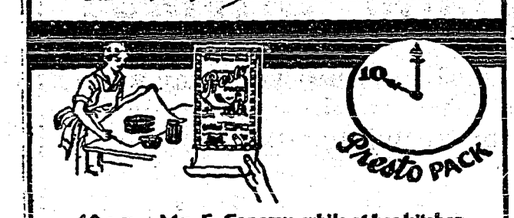
A MORNING WITH Mrs. E. CONOMY



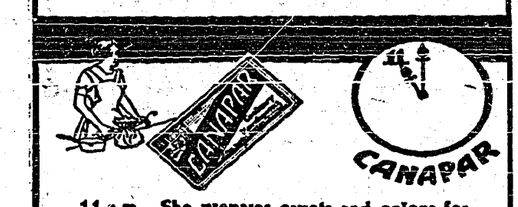
8 a.m. She makes up the children's lunches. "I wrap the sandwiches in Para-Sani Heavy Waxed Paper," she says, "because I know that Para-Sani will keep them fresh. In fact, I use Para-Sani from the green box a dozen times each day—for lining cake pans, keeping celery crisp and protecting food freshness and flavour."



9 a.m. She starts her dusting—but she no longer uses linty, dusty cloths. She uses Wonder Paper, which does dusting, cleaning and polishing all in one simple operation. Wonder Paper is among her most recent discoveries. "It saves so much time," she says, "and keeps my furniture brilliant all the time."



10 a.m. Mrs. E. Conomy, while at her kitchen table, needs a sheet of waxed tissue to cover an opened jam jar. Presto-Pack, a clever pack of waxed tissue that hangs on the wall and yields one sheet at a time, delivers the sheet handily to her and she holds it on with an elastic band. Presto-Pack tissue has a hundred uses.



11 a.m. She prepares carrots and onions for dinner. But she doesn't use two pots. She wraps each vegetable in Canapar Cookery Parchment, puts both in the one pot, and puts them on a low heat. Canapar keeps each vegetable richly delicious in its own juices and eliminates all odors. "I line roast pans with Canapar, too," she says. "Fats won't burn—and I don't have to scour the pan. Cooking in Canapar also makes fish much more delicious and no odor escapes."

12 a.m. Her shelves need re-covering. She does that job with Handi-Roll, a 25-foot roll of paper. "Handi-Roll," she says, "is ever so helpful. I use it to line drawers, cover shelves, wrap parcels and dozens of other jobs that call for long sheets of paper."

Autogyro Wrecked

Machine Of Byrd Antarctic Expedition Is Damaged

The autogyro of the Byrd Antarctic expedition crashed recently shortly after taking off on an aerological flight, but without serious injury to the pilot, William McCormick.

The machine was wrecked. McCormick escaped with a broken left arm, minor bruises and a severe shaking up. After treatment he was resting comfortably.

The fleet of Columbus was worth only $3,000.

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

SNYPOSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerad Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wildwest outfit.

Dad Kane, desert rat and luckless prospector till now, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

(Now Go On With The Story)

CHAPTER II.—Continued

For a moment silence held both men. They knew the old foolish legend of the Mother Lode and they knew, too, that old desert rats like old Kane, believed in it while vigorously protesting their disbelief; that foolish old tale that says that all gold is fermented and thrown out from a central body as the human heart sends blood to the distant parts of the body and that the tiny veins of gold, if found and traced back to their origin, will lead to the great Mother Lode where gold is made.

"Mother Lode hell," quoth Dustin hotly. "Where'd you find this? Is it far from here?"

"Four days' travel even with them trained asses o' mine. Ever read yore Bible, Dustin? It's sure worth readin'. There's a lot o' good readin' in the Bible. It tells about a feller named Saul. He was a peach, too. He was a kind of a prospector same as me. His burros got loose same as mine done. He went to trail 'em and he found a kingdom. I done the same. Mine got loose an' I follered 'em up Red Water canon. . . . Look here. . . ."

He fished futilely in his pocket, withdrew his hand and swore wildly. Then he slapped every pocket.

"I've done lost it," he said hoarsely. "I put down all the directions in my notebook of course. It don't make no real difference. I can trail back there at night if I have to but I don't like losin' a notebook that tells about it all. I know I had it just before I seen Gray an' Corse with the wagon."

"Maybe they found it," suggested Dustin.

"It won't help 'em none if they did, I reckon. But I'd sure like to have it back. It's got all my accounts with you gentlemen in it. It was up Red Water canon like I said. . . ."

"That's on Hour-glass land," said Dustin fiercely.

"Who knows it if I don't? That was when I seen the wagon. I was comin' back from huntin' my stray burros when I stumbled on a piece o' good lookin' float. I put it in my pocket and went back to trace the vein. I found the vein on the hillside and located it and come back. I was aimin' to build me a fire and roast the ore to see what it was like. I had made all the entries in my notebook like I always do. Then as I come over the ridge I seen the smoke and the wagon and then I seen the Broken Spur men at work on the Hour-glass cattle. They left and I made my camp in the bottom. Then I went back and looked into the matter o' the vein. I got out two little sacks of ore. It'll assay two thousand to the ton or I'm a Mormon. . ."

"Huh! You've been spendin' a lot of time locatin' a gold mine for old man Carr on the Hour-glass land," said Dustin sneeringly. "A minute ago you were accusin' us of stealin' the Hour-glass cattle. Now you're locatin' a gold mine on the same land and . . ."

"Minerals is different," said Kane hotly. "You know that. Even a cow-puncher knows that. This is a mine! Any man in the West knows minin' law. The man who finds a vein of ore kin foller it even under patented land. The only thing is the other man mustn't find it first. I've only got to prove that I was the first to find it."

Dustin nodded and Spike too. They knew that anomaly of law that is not justice at all at times.

"All the same," said Dustin, "it makes a difference. If Gray and Corse steal a few cattle, that's one thing. If you aim to steal a whole hillside full o' gold that's different. That's finance."

Kane swore gustily.

"Hour-glass or no Hour-glass," he said hotly, "I found the vein. I mean to foller that lead if it takes me plumb in to hell and I have to pan with sulphur water hot from hell-fire."

"Old man Carr may be willin' to sell the mineral rights," said Goddard sarcastically.

"Don't be a fool. . ." Dustin's face was grave. "The minute you ask Carr about selling mineral rights, you as good as tell him what he's got. He wouldn't sell us a cup o' water to keep us from dyin' of thirst. Of course there's a way to get 'em. In fact, I can think of two ways right now. We've got to get those mineral rights and get 'em quick . . . before the Hour-glass finds out about 'em."

"Joe Carr don't even suspect any ore on his land," said Kane.

"So much the better," quoth Dustin curtly. "You go on into the kitchen and get your supper, Dad," he said heartily. "We'll talk it over later. . . ." He held his partner by the sleeve till old Kane disappeared into the kitchen. "Come on into the office, Spike," he said curtly. "I want to talk this over with you before old Dad gets back."

Spike nodded, shouted to the cook to bring some coffee to them in the office and followed Dustin into the room and closed the door.

CHAPTER III.

The moment the office-door closed, Dustin turned sharply on his partner. It was at once clear that Dustin was the dominant personality. He might defer at times to Spike because of that worthy's virulent tongue when aroused to speech but Spike's attitude showed that he was dominated and controlled by his partner.

"We've got to do something and do it quick," said Dustin. "Old Dad Kane is bound to talk. He just can't help it. And if once word gets out that he's found rich ore even on Hour-glass land, there'll sure be hell to pay. Red Water canon is clearly on the Hour-glass. I wish the old fool hadn't lost that note-book. I'm afraid to ask Gray and Corse about it. They'd double cross us in a second if they got wind of a find like this the old fool's made."

"Think old man Carr would sell if he's properly approached?" suggested Spike.

"Huh. Would you sell if you were in his place? That's the answer. Even to mention the possibility of buyin' the rights from him would make him post the ranch against trespassers. Where'd we be then? I'm not worryin' much about old Carr. I got him as good as sewed up in a sack with head and feet stickin' out. It's bigger than Carr, I'm aimin' at."

"Huh. You talk like a fool," said Spike sharply. "How kin you say you got old Carr sewed up in a sack when you dassent even tie your pony to his tie-rack when you want to see that red-headed girl of his? You got the owner of the Hour-glass dead to rights? Huh. You make out to ride down to Seco to git the mail when there ain't no mail just 'cause you want to git another look at that red-headed Edith Carr. You make me tired."

For just one brief moment Spike Goddard stood on the bare edge of red tragedy. He saw in his partner's eyes such a glare of utter hate that he fairly shrank back at what he saw. For a full half minute Dustin stared at him fiercely; then he laughed. Spike drew a breath of relief.

"No use lookin' at me like you want to kill me," he said awkwardly. "I'm only tellin' you what all the Valley knows."

"About what, you damned fool?" snapped Dustin. "Of course old Joe Carr and I did have a row some three years ago. That was when your damned clumsiness got you caught messin' up with his cows. If I want to tie my horse to the Hour-glass tie-rack, I'll ask no man's permission. Get that? Put that in your pipe and smoke it."

"You will like hell," snarled Spike. "You'd be as welcome there as a rattler in a prairie dog's hole. . . ."

That was just the one remark needed. Dustin exploded.

"And any time I happen to want Edith Carr, she'll come to heel and mind what I say and don't you forget it. . . ."

"I hear you. I heard a lot o' things I don't believe. That suit that you started over Soda Springs ain't any invitation to dinner at the Hour-glass."

"All right. Don't believe me then. There's more ways to reach a girl than by pettin' an' neckin' as they call it now."

"I hear you. . . ."

(To Be Continued)

You will save money by smoking Dixie Plug, because it lasts longer in your pipe. You can cut each pipeful in your own way, coarse or flaky—long or short, as you prefer.

Announcing New Discovery

Daughter Of Late Madame Curie Has Formula For Synthetic Radium

A formula for synthetic radium will be officially announced by Mme. Irene Curie-Joliot, daughter of Mme. Pierre Curie, at the scientific conference at Cambridge, England, it was reported in Paris.

Mme. Curie-Joliot and her husband, Dr. Frederic Joliot, have been carrying out experiments in close secrecy for a number of months, it was added. Recently they were said to have been engaged in perfecting their discovery following early successes last July.

The "Petit Journal" said that Mme. Curie-Joliot is being considered for the Nobel prize, which her late mother won twice.

Support Your Newspaper

In order to be of the greatest value to its community a newspaper must be prosperous; it must earn by legitimate support from subscribers, advertisers and the users of printed matter a sufficient amount to be able to put out a paper worth while. The better support your home paper has, the more able it is to serve the community.

Faster Way Found to Relieve Headaches

NOW PAIN OFTEN RELIEVED IN MINUTES!

Remember the pictures below when you want *fast* relief from pain. Demand and get the method doctors prescribe—*Aspirin*.

Millions have found that *Aspirin* eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an *Aspirin* tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain practically as soon as you swallow it.

Equally important, *Aspirin* is safe. For scientific tests show this: *Aspirin does not harm the heart.*

Remember these two points: *Aspirin Speed* and *Aspirin Safety*. And, see that you *get ASPIRIN*. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every *Aspirin* tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

Drop an Aspirin tablet in a glass of water. Note that BEFORE it touches the bottom, it is disintegrating.

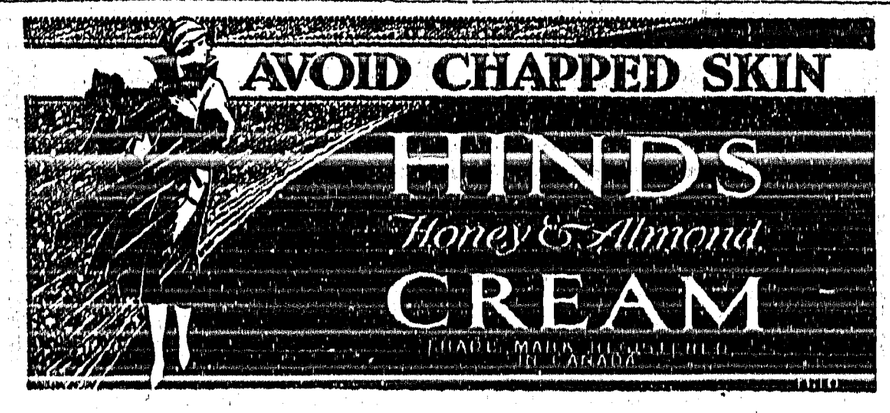
IN 2 SECONDS BY STOP WATCH

An Aspirin tablet starts to disintegrate and go to work.

What happens in these glasses happens in your stomach—ASPIRIN tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures

— ASPIRIN DOES NOT HARM THE HEART —



For protection ==a telephone in the home

"I believe in having a telephone in my home for protection," said Mr. Middling. "I know that in emergencies such as fire, burglary or sudden illness, it is quicker and easier to telephone for help than to run for help.

"When I think of cases in which we might need help in a hurry, I am comforted by the knowledge that we have a telephone."

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, OCT. 12

HOME BREW

In view of some considerable disappointment experienced locally in connection with 1934 cherry prices, to say nothing of the unkind reception accorded such explanations of lowered prices as splitting in-transit, and mould in evidence on arrival—even on pre cooled stock—the following, from last week's Penticton Herald, should be read with interest: "Pears to the amount of 134 tons in the Co-Op. cold storage had been held by the cannery. A quantity of these showed breakdown, when examined prior to preparations for canning. Possible causes include the hot weather in the lengthy summer season beyond the capacity of the machinery to control, or failure of some of the pears to ripen under cold storage conditions. Neither the Co-Op. nor the cannery officials will discuss the subject at any length."

Now that the village council has loosened up to the extent of sharing with the badminton and basketball clubs 33 per cent. of the cost of making certain changes at Park pavilion to improve playing facilities for both lines of sport, it would be a mighty fine thing if still a few more dollars could be found wherewith to extend the present sidewalk from the park gate through to the doors of the pavilion. In wet weather the quantity of mud packed into the building does not make for better basketball, and certainly must be even more objectionable in connection with dances, from which the town receives a considerable income. In his time as chairman of the streets committee ex-reeve McFarland certainly did the thing right in putting in a fine six-foot walk from the bridge to the park gate. Here's hoping for an early start to finish the job rig t by continuing an equally broad walk up to the main entrance of this revenue-producing civic utility.

Last week's reproduction of a pharagraph from the Kelowna Courier as to apple production and the recording of high water mark by H. J. Hewetson of Kelowna with an average of 1066 boxes per acre on 7½ acres has brought to light a valley showing in McIntosh Reds that certainly deserves honorable mention—and incidentally eclipses the excellent showing of the Okanagan orchardist. Of the 1934 crop, J. B. Holder of Erickson reports picking 1350 field boxes from less than an acre of McIntosh—52 trees, planted 20 x 30 feet. Returns are not to hand as to the exact packout but on the usual allowance as between orchard and packed boxes, the Holder orchard showing should be at least 1100 boxes. In the Courier's comparison of a 1928 Putnam showing of 646½ boxes as compared with the Hewetson 1066 boxes, the Kelowda paper failed to exactly state the case. The Putnam record of that year was for unirrigated orchard, and as such, still stands.

Public works department officials are being accorded considerable well directed criticism in connection with the bridge that has been put in to serve traffic to and from West Creston at a point where the Goat River has been diverted into the Kootenay River. If the structure is only to serve for, say, the next month, the poor sort of structure that has been put in can be put up with on the score of economy. But if the bridge is to serve as a crossing until such time as the dyke can be conditioned for heavy traffic then no time should be lost in putting in something a little more substantial and at a slightly higher elevation. A rise in the river of less than two feet will take out the present bridge, and with the dyking company providing a channel 21 feet deep certain y something more than a 24-inch raise is looked for. And, unless there has been some action since Sunday, no time should be lost in cutting down the grade on the south side of the present low slung crossing. A team hauling less than a couple of ricks of wood could never get up the slope that was in evidence at the weekend.

And while we are paying our respects to t e public works department is may not be out of order to observe tnat when plans for winter unemployment relief work are being considered that provision be made for steady operation during the colder weather of the one or more rock crushing machines that are at present lying idle somewhere in the country tributary to Creston. If work has to be provided the Review is of the opinion greater value will be received from turning out much needed roadmaking material than the hit and miss sort of highway repair work that is usually in evidence during the winter months. Thousands of yards of crushed rock can be used to great advantage in highway betterments in this district and heaven only knows there is plenty of the raw material available at all points in the valley for crushing purposes. For road improvements the crushed rock will cost very little more than screened gravel, and certainly makes a muck better job in bettering road ravel.

The big C.P.R. ice house at Cranbrook, built in 1921 at a cost of $30,000 was destroyed by fire Tuesday morning last.

I TAKE PLEASURE IN ANNOUNCING THE VISIT OF

Wm. Lowden

Special representative of TIP TOP TAILORS who will be at this store

Monday, Oct. 15

It will be his pleasure to show you the finest array of British Woollens Tip Top Tailors have ever displayed. Beautiful materals for Suits and Overcoats made to your individual measures in any model you desire.

He will welcome the opportunity of showing you his models and samples, whether you purchase or not.

Sirdar

J. S. Wilson was a business visitor to Nelson over the weekend.

A party of engineers are at paescnt running levels between here and Proctor.

Frank Parento, who was employed at Blake, spent the holiday with his family here.

Mr. and Mrs. Magglio of Wycliffe were auto visitors with Mrs. Mannarino on Sunday.

Frank Hamilton and C. Wilson were at the military whist at Wynndel Friday evening last.

The water as indicated by the guage at Slough bridge reads 2.61, a fall of 0.29 for the week.

Mrs. Ramsden of Trail spent the weekend here, the guest of Mr. and Mrs. John Talarico.

A new and more powerful compressor has arrived here for use on the rock cut on the new highway.

A. Mackie of Boswell was in charge of the loading and hauling of apples despatched from here Friday.

P. Lombardo, who has been on the sick list, is now much better and expects to resume work in a few days.

A crew of between twenty and thirty men are at present, engageu on road construction work at this point.

Clarence Holden of Boswell has finished his hay bailing work on the flats and removed the equipment for the season.

R. Maxwell, A. Speers, P. Robinson and Raymond Bevan, Creston, were hunting here over the week with fair good luck.

A shipment of beef from the Borosoto ranch was made to the Peoples meat market, Trail, the shipment going by train.

The Williams truck from Wynndel is hauling apples from Kuskanook to the Co-Op Fruit Growers Association at Wynndel.

Mr. Walton and Mr. Andrews of Nelson are here on a hunting trip. Two auto loads of hunters from Trail are also enjoying good sport.

Miss Daisy Rogers and Frank Hamilton were Creston visitors, Saturday Vincent and Pete Cherbo were business visitors the same day.

D. Passcuzzo and sister, Annie, were auto visitors to Creston at the end of the week. J. Osborne of Twin Bays was a business visitor to Creston, Tuesday.

Clarence Wilson of Wynndel, who had the contract for hauling hay from the flats near the Lewis ranch to Boswell, finished the hauling the middle of the week.

Mrs. James Manarind and son, Joe, were at Creston visiting Mr. Mannarino who is in hospital there. The latter is reported as making good progress towa·d recovery.

The first car of Boswell apples loaded this year from the quarry siding left on Friday. These were Cox Orange and were for export. The future despatch from this point is expected to be much heavier than last year.

Another mining company commenced operations near Sanca and have started the driving of a tunnel, gold ore from which is stated to be showing encouraging results. The tunnel is being driven along the Sanca vein. Capital for the work is said to be fully subscribed and from outside sources.

The tempo of mining activity centring round the Bayone claims has been greatly increased by the arrival of additional equipment and increase of crew to around 50 men, consequent upon a visit to the district of W S. Harris, representing the financial interest behind the project. The primary object to be attained is the construction of roads, giving access to the mines at all times of the year. To minimise the effects of a possible early fall of snow in the higher reaches construction work is being done from the top towards the lake at Tye (Cultus Creek). Interests, other than mining, are reported to bs acting on the flats at the lake shore.

OUR K.B.O. BROADCAST

Wm. Wadds has just completed 40 years service as postmaster at Rossland.

The payroll at Penticton cannery this year is almost double that of 1933.

To the first of October fires at Fernie had been responsible for a loss of about $2000.

At Cranbrook the city police are rounding up all small boys in quest of sling shots.

25,000 cedar posts were destroyed by a fire at Lizard Creek, near Fernie, Monday last.

The Gazette claims Greenwood's prosperity is shown in its churches. Over 40 people attended the U..ited Church on Sunday evening.

It is estimated $6,087 will be required to finance the village of Bonners Ferry for 1934-35. $1100 is required for the fire department and $1600 for the police.

Rev. A. McMorine, Anglican rector at Natal, has been transferred to New Denver.

Due to breakdown the cannery at Penticton will not can 134 tons of pears it has in cold storage.

Greenwood is coming back. The United Church ladies' aid society has just been reorganized.

According to the Courier the 1934 potato crop at Cranbrook is about the best ever.

The Herald is of the opinion Penticton's population is now almost 5000. The 1931 census placed it at 4638.

Redfish are going up the Duncan River to spawn for the first time in ten years, according to the Kaslo Kootenaian.

Kaslo ci'y council will not go into the tourist cabin business if private enterprises will provide for this class of trade.

Prosperity must be just around the corner at Penticton. W. H. McInnes, a former Tr il Lawyer, is locating in the south Okanagan metropolis.

47 cases were tried in Kelowna police court last month.

Canon Thompson, Anglican missionary along Arrow Lakes, celebrated his 80th birthday by officiating at the marriage of his son, according to Nakusp News.

At Fernie's annual sale of city property in arrears for taxes resulted in property owing $14,194 of back taxes going unpurchased and becoming city owned property.

1934 Basketball Talent Assigned

Wynndel Entry Men's Section Unknown Quantity — Ladies' Talent Well Distributed—Line Up of Teams Complete.

The local basketball season will open about the middle of the month with league games scheduled for each Friday night and practises on Tuesday and Thursday evenings. Seven teams will compete for championship honors, as compared with ten last season

In the ladies' section there will be no entry from the High School, as most of their experienced players have graduated, and will likely be a couple of years before more girls can be trained to hold their own in senior company. The Colleens, too, have disbanded, cutting the teams to four in this division.

The men's secti n has fared better than the ladies' losing only two teams, High School and Centipedes, the latter having quit the game completely after three years in fast company. This latter team was composed largely of public school teachers.

In the ladies' division we find last year's champions, the Creston Review, with a lineup as strong as eve . Of the old team only four of the orig nal nine are in the game this season, Nora Payne, centre; Jean Henderson, forwaad; Ada Lewis and Mrs. Levirs, guards. Irene Bourdon of last year's High reps., Dorothy Palmer of the Highflers, and Letty Couling of the Colleens' give additional strength on the forward line. A new face in the hoop game will be Mrs. Jorde of Arrow Creek, an experienced guard, late of Cardston, Alta. The team looks forward with confidence of again taking the championship, but with all the other teams considerably strengthened are not likely to find the going easy. Fred Martello, of Sirdar, last year's coach, will again be in charge.

Geo Kelly commences play with a fine crowd of girls to hold up the banner of the Pharmacy. Six of his last year's team are still in uniform, with the addition of the LaBelle twins—Eva and Yvonne—who were with the High Reps. last season. The other members of the squad are Dot Olivier, Opal LaBelle, Marjorie Learmonth, Madge Moore, Fay Tompkins and Minnie Downes—an aggregation that will have to be reckoned with throughout the season, playing, as they will, under the efficient management of Mr. Kelly.

This year no High School teams will be entered but eight of the ex-High girls have organized and so far as we can learn will be backed by West Kootenay Power & Light Company, Limited, with a hatty uniform of white and blue. Nell Payne, Mary Abbott and Agnes Crane, who did much to land the High girls in second place last year, head the power firm's team, and with them are Ruth Hare, Fanny Lewis, Theo Tompkins, Betty Speers and Rita Kirk, the latter a guard on last year's Colleens. This team will be coached by Mr. Cobus, teacher, at Erickson, and will have a well balanced team with three guards, two centres and three forwards.

Creston Motors, sponsored this year by A. Dickinson, retain six of last year's aggregation, Kate Payne, Margaret and Elizabeth Armitage, Edith Avery, Jean McCreath and Dot Wightmann. Marjorie and Phyllis Bell are newcomers to the team who have had experience and should give this team added strength to provide likely opposition for all comers. E. Marriott has been signed up as coach.

Unfortunately the boys are having trouble to find enough teams to make league play worth while, but with the entry of Wynndel a likely looking trio of contestants is in sight. Last year's champions, Cardinals, are even stronger than ever, with Howard and Doug. Corrie, Ben Crawford, Chariie Holmes and Bus Ross of the old guard, and the addition of A. Cobus of Erickson. These boys are sure to put up a real fight for the lead, and are expecting to enter their team intact in the East Kootenay league playoffs next spring.

Imperial Groceteria will again be handled by Percy Robinson. He reports the signup of an eight-man squad that will provide tough opposition for any rival quint. Of last year's team but two of the regulars remain. These are Herb Couling and Jack Young. The newcomers are all experienced hands and include playing coach Fred Martello and Syd. Rogers, both of last year's Centipedes, along with Jim Downes and Jack Payne of the 1934 High boys, and Bill Bourdon, of the Cardinals. A new hand in local league play is Mr. Hunden, principal of Canyon school, who has had previous experience in the game.

To give the league a little sectional interest and to make a men's section possible, Wynndel Athletic Club have organized and are making arrangements for a team this year. To date the following have been signed up for the season; Oswald and Campbell Payette, A. Hagen, D. Taylor and B. Franklin. These boys will also be playing in a four-team league in their home town. Great satisfaction is felt at the entry of this team in the local league and it is to be hoped their decision to play in fast company will induce other outside points to enter next year.

Local and Personal

Vital statistics as recorded at Creston for September show the month to have witnessed eight new arrivals of which four were boys. There was one marriage and two deaths.

Chas. Davis, customs inspector at Rykerts, with Mrs. Davis, are taking their usual thre we ks' vacation this month. In their absence a Mr. Laird is in charge of the office.

Mrs. W. H. Crawford and son, Frank, and Miss Irene LaBelle, were motor visitors to Golden for the Thanksgiving Day weekend, guests of the former's dgughter, Mrs. Chas Perry.

W. E. Haskins of Kelowna, chairman of the B.C. Tree Fruit Board, was here on Friday interviewing shipping houses and grower shippers in connectian with the new marketing regulations.

The surrender of the 1934 auto licence plates for a refund of a third or quarter of the original fees, is under way in all sections east of the Cascade mountains. On the surrender of licence plates and dash board licences before October 31, autoists are entitled to a refund of a third of the fee and before November 30, to a quarter.

The Presbyterian youug people opened the fall session with a tennis tournament at the manse grounds, Monday afternoon, followed by the regular meeting of the organization in the church that evening.

Mr. and Mrs. E. Frederickson of Trail were Sunday visitors at the home of Mr. and Mrs. W. Ferguson, returning from a honeymoon trip to Calgary, Alberta. The bride is a sister of W. Defoe of Nelson.

The three-daoy pheasant season in the valley, south of Kootenay Landing opens on Monday, 15th, and will close at sundown, W dnesday, 17th. Following the mild winter the birds are more numerous than usual.

The October meeting of Creston Hospital Women's Auxiliary will be held at the United Church hall, at 3 p. m., Thursday, 18th. Members are reminded that old woollen materials are needed, also white rags.

Revenues at Creston office of the provincial police for September were buoyant, accounting for a total intake of over $1700. $1250 was for hunting licenses, and receipts under tne Motor Vehicle Act were almost $400.

Mr. and Mrs. R. B. McKay left at the first of the week for their home at Corbin. They have been guests of the latter's parents, Mr. and Mrs. Herb Christie, while Mr. McKay was recovering from an appendicitis operation.

C. H. Robinson of Nelson, the Kootenay-Boundary inspector of fisheries, was here at the first of the week, looking after the interests of his department in connection with the diversion of the Goat River into the Kootenay Monday afternoon.

Cecil Moore's garage reports considerable activity in car sales the past few days, during which he has sold a reconditioned Chrysler coach to Mose Le Grandeau; a 1929 Ford truck to Bud Franklin of Wynndel, and a 1933 1½ ton Ford truck to Clarence Tedford of Canyon.

C. O. Rodgers is at pr sent a patient in St. Eugene hospital, Cranbrook, recoverihg from a bad shaking up along with cuts and bruises, which he sustained in an auto collision near Moyie on Wednesday evening last, while returning with his son, Floyd, from a business trip to Cronbrook. Floyd, who was driving, was cut about the face and shaken up consid rably, but was able to return at the end of the week. The colission was with a De Soto car driven by J. I. Mortimer of Carbon, Alberta, who swung to the wrong side of the rood, the two cars hitting head on with considerable force, both autos being badly wrecked. A passing car took Mr. Rodgers back to the hospital, and on Thursday morning Mrs. Rodgers left for the divisional city to be with him. Mortimer was fined $25 and costs for driving to the common danger. Mr. Rodgers is making a very satisfactory recovery and will be home at the end of the week.

The payroll at Penticton cannery this year is almost double that of 1933.

Sales of farm lands in Bonners Ferry section are unusually heavy this year. Bench lands are in good demand.

The News claims orders for railway ties placed in Vernon district is the latgest in many years, and the price has also been raised over 1933.

J. T. Lawrence, a Grand Forks orchardist, has just invented a grader of his own, which polishes the apples before they pass along to the packers.

HEIFER ESTRAY

Came to my premises on or about August 25th, 19 4, yearling heifer, tag on left ear, no brand visible. Owner can have same on paying expenses and proving property. E. SIEBERT, Camp Lister.

Notice to All Fruit Growers

All growers of tree fruits in the area under the jurisdiction of this Board who have not yet filled in and returned to the Board the registration cards sent to them by post, are now required to do so immediately in order that the election of a permanent Board may be proceeded with.

Any grower who has not received a registration card should send a postcard to the Board giving the following details:

Name of grower and address; district in which orchard is situated; number of acres in bearing orchard owned or rented and the name of the shipper who is to market the products.

All cards must be in the hands of the board by October 20th. by which date registration shall be deemed to have been completed.

"Fresh from the Gardens"

The Forty-Ninth Parallel

An interesting and thought-provoking editorial article appeared recently in a popular magazine which circulates extensively throughout Canada and the United States. Its subject was the forty-ninth parallel across the world. The people of the North American continent regard it as an imaginary line which marks the boundary between the United States and Canada, but, says this magazine editor, the wise ones of the earth regard it as something more than a hair line on the earth's globe. It is, he says, the world's line of destiny.

Elaborating his theme he first directs attention to the fact that in America this invisible international boundary line is a line of peace. No frowning fortifications dot its length; no jealousies are pent up along its borders; no racial hatreds batter its boundaries. For more than one hundred years it has been a line of peace, a magnificent contradiction of the Old World's barbaric philosophy that two neighboring countries cannot long exist without strife.

But tracing the course of the forty-ninth parallel around the globe, he finds that the symbol of peace in North America becomes the blood-drenched line of strife throughout Europe and Asia, cleaving through the very heart of the world's worst trouble zones. He continues:

"The 'line of peace', upon spanning the Pacific, marks the frontier of Asias' powder magazine—the northern boundary of Manchukuo. On one side the armies of the Soviet maintain their well armed vigil. On the other Japan bides her time in the puppet state that typifies her first triumphant toe-hold on the mainland of Asia.

"Travel with the 'line of peace' across the flux and change of the new Red Russia and note its sinister significance as it pierces the inner core of European turmoil It traverses the Polish Corridor, constant source of statesmen's uneasy slumber; flanks Austria's troubled boundaries; bisects a re-armed Germany; skirts the fringe of France at the most jealous point of national pride, historic Alsace-Lorraine; tops the rims of armored steel that mark Belgium's sullen frontiers; then wings the Atlantic for its more pacific mission on this continent."

And he asks why should this 'line of peace' assume such a devilish perversity in its travel round the globe, and finds the answer in the character of the nations it touches rather than in the nature of the line itself.

All of which is true In North America the two adjoining nations are peopled by those who speak a common language and who, although there has come a great intermingling of many races, still trace their main descent to one racial source and have proved their ability to, in large measure, assimilate those newcomers of many races and all have largely forgotten, or dropped, the old animosities, suspicions, jealousies and hatreds of by-gone centuries which are nourished and kept alive in the countries of the Old World.

America is fortunate in this, and stands as an object lesson to all other lands. This being so, have we been as good neighbors as we ought to have been; have we taken full advantage of and reaped all the benefits that should have been ours as a result of our preferred position? True, we have kept the peace in a physical sense in that we have refrained from war, and the insensate folly of building up huge armaments one against the other on the false assumption that only through such so-called "preparedness" can peace be maintained.

But the forty-ninth parallel across North America is not quite the imaginary line it might well have been to the advancement and benefit of people living on both sides of it. There are no forts, but there are all too many legislative barriers imposed along its entire length by both countries, barriers on the one side being duplicated by similar barriers on the other side.

We build our roads on both sides to meet and merge at the boundary line; we construct our railways to the same gauge in order that trains may move without pause from one country to the other, without trans-shipment of passengers or goods; the ether waves flow uninterruptedly across the line carrying radio messages to and fro, and the same is true of the telegraph and telephone; our books and newspapers and magazins, our automobiles, cross and re-cross; our mails move without restraint or loss of time; our trades unions are international in their character; so, too, are our fraternal societies and service clubs; our sporting organizations vie with each other on common fields.

Being so favored, and having done so much to promote our common interests in so many ways, and having developed an international friendliness unknown elsewhere, and having utilized all that science and invention has bestowed in order to promote this fine and mutually advantageous intercourse, why have we proceeded to erect artificial barriers to check and stop the flow of trade which all these other agencies have been perfected to encourage and develop? The people of both countries are deemed to be highly intelligent; they are not inmates of lunatic asylums. Then why have they acted so absurdly as to hamper and cripple that which they have spent untold millions of money and energy to encourage?

There is only one answer, and that answer is to be found in the cupidity of men individually and collectively, on both sides of the "line of peace". Nature designed that the northern half of this great continent should be the complement of and to the southern half. The Maritime Provinces with their resources are the natural complement of the Atlantic seaboard States; Quebec and Ontario are the complement of the Central States; the Prairie Provinces are the complement of the middle western States right down to the gulf; British Columbia is the complement of the Pacific coast States. Yet puny man tries to defy Nature and, as a result, has made a sorry mess of things throughout the whole realm of trade and commerce, finance and economics.

The forty-ninth parallel across North America is a splendid object lesson to all nations except in this one respect. Let these two great peoples do the sensible thing and set another object lesson for and provide leadership to a world now suffering because of the wholesale destruction of international trade.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end.

Allow the profuse diarrhœa, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels go at once to your druggist and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 88 years.

Richest Street In World

Shops Of Curio Dealers In Delhi, India, Contain Many Treasures

What is the richest street in the world? Without taking into account the environs of the Stock Exchange and Wall Street, where unseen fortunes change hands, the little-known Chandni Chowk in Delhi has substantial claims. It has often been referred to as the richest street in Asia, and, unlike our own commercial thoroughfares, the greater part of its wealth is there for all to see. But many are the treasures which are hidden away in secret recesses of the shops of curio dealers and jewellers in that picturesque street. One of the dealers, the walls of whose establishment are covered with letters of appointment from Highnesses and Excellencies of all descriptions, has manufactured countless wonderful golden and jewelled embroideries for crowned heads and ruling princes. He was responsible for the historic peacock gown, costing no less than one thousand pounds, which the late Lady Curzon wore at the Durbar Ball, attended by four thousand guests in the Delhi Fort in 1908. Here also are all the richest of the embroidery merchants, whose cloths and cloaks, scintillating with costly ornaments, are not only intended for reigning princes, but for State elephants. Here, too, are the carvers of ivory, and the traveller can see them exhibiting their skill in evolving delicate figures and animals from solid blocks of ivory, sawn from elephants' tusks.

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search For a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it:—

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try. I admit I was a chronic case, and every new remedy I tried helped for a day or two—after that I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning since, and every morning so long as I live, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."—(Mrs.) A. M.

Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.

Mistook Ducks For 'Plane

Phantom plane was sought at Hove, Essex, by hundreds of people who spent an all-night vigil looking for a mysterious 'plane that was supposed to have fallen into the sea at dusk. The "plane" was proved to have been a flight of ducks diving for fish.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

The Cross-Word Puzzle

The cross-word puzzle, which began before the jig-saw puzzle, seems destined to have a longer life. It is remarkable that it finds a place in such grave publications as the London Times, the Manchester Guardian, the New Statesman and Nation, the Spectator and the Observer.

A perfect bone needle, 25,000 years old, was discovered by Jean Cazedessus in excavating at Cantics, in the south of France.

A BATTERY RADIO with Electric-Set PERFORMANCE

Here is the great invention every unwired home has waited for! Real electric set performance—tone quality, distance, ease of operation—and no more recharging of batteries!

The Air-Cell Radio will do everything that the finest electric set will do. It has been brought about by the invention of a marvelous new source of power—the EVEREADY Air-Cell "A" Battery. This battery breathes air and re-energizes itself for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household.

AC 102

Do not confuse the new Air-Cell Radio with the old type battery sets—Air-Cell Radio is new from the ground up—now being built by every leading radio manufacturer specially for Air-Cell performance.

Ask your dealer to demonstrate. Your interest will be well repaid.

Might Outshine Sun

Scientists Tell Of Heat Contained In Arc Light Carbon

The hottest known thing on earth, we are told, is the burning carbon of an arc light. It is so hot that volcanic mist forms in the incandescent crater, a fog of pure carbon vapor.

Formerly this fog was thought to be liquid carbon, but a recent report to the American Chemical Society concludes that carbon does not pass through a liquid stage in turning from solid to gas, at least that it does not at atmospheric pressure.

This may be a reason why diamonds have been so impossible for man to make, says the report, for diamonds apparently are the products of a liquid form of carbon.

But, if diamonds cannot be produced from carbon, more heat and light can, it is hoped. Three Cleveland scientists who have been measuring the heat of the carbon arc declare that "under the right conditions, and with a little further chemical aid" arcs can be made to burn with an intrinsic brilliancy slightly greater than that of the sun.

This would be a novel achievement, indeed, the creation of an artificial light brighter than the sun! It sounds almost presumptuous.—Detroit Free Press.

Took Chance In Dark

Four Aviators Left 'Plane When Trouble Developed

"I just came down by parachute—where am I?" was the query a startled motorist got on the highway near Guildford, England, when he was stopped by an aviator waving a flashlight.

The airman was one of three officers who had bailed out of a bombing plane at a height of 2,000 feet in the darkness. He got into the car and they went to look for the others.

A hundred yards farther on the car was stopped by another flashlight. Then a third light was seen across a field. It was that of the pilot, who had bailed out when the machine, which apparently experienced engine trouble, was only 500 feet up.

None of the four was hurt.

Rubber mile posts that are pushed out of the way when struck by an automobile, and then rebound into position, have been installed along some German highways.

FALSE TEETH
DR. WERNET'S POWDER

Sold the world over—Dr. Wernet's Powder—justly called "the perfect powder"—holds false plates firmer for hours longer. Leaves no sickening gummy paste—teeth fit so snugly yet comfortably they feel like natural ones. Prescribed by world's leading dentists—just sprinkle on. Inexpensive—any drugstore.

Although Africa contains the widest variety of wild animals in the world, no tigers have been found on the continent.

• STOMACH COMPLAINT •

Mrs. W. Benton of 445 Simcoe St., London, Ont., says: "Some years ago I used Dr. Pierce's Golden Medical Discovery when I was run-down and awfully nervous, belched gas frequently and the gas would press up around my heart. The 'Discovery' toned up and strengthened my system so that I felt 100% better."

Write to Dr. Pierce's Clinic, Buffalo, N.Y., for free medical advice.

Germany contains more than 2,300 youth hostels. These hostels are provided as an overnight stopping place for young hikers.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile —No Calomel needed

When you feel blue, depressed, sour on the world, that's your liver which isn't pouring its daily two pounds of liquid bile into your bowels.

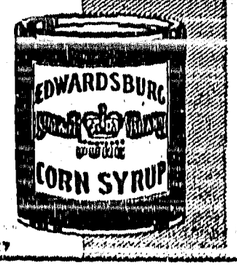
Digestion and elimination are being slowed up, food is accumulating and decaying inside you and making you feel wretched.

More bowel-movers like salts, oil, mineral water, laxative candy or chewing gum, or roughage, don't go far enough.

You need a liver stimulant. Carter's Little Liver Pills is the best one. Safe. Purely vegetable. Sure. Ask for them by name. Refuse substitutes. 25c. at all druggists. 52

A census of dead animals on roads of England has showed that dogs are the great "jay walkers".

EDWARDSBURG CROWN BRAND CORN SYRUP



A pure, wholesome, and economical table Syrup. Children love its delicious flavor.

THE CANADA STARCH CO. LIMITED, MONTREAL.

EVIDENCE SHOWS TRADE IN BRITAIN HAS IMPROVED

London. — Chancellor of the Exchequer Neville Chamberlain laid before a gathering of London bankers evidence that Great Britain's trade has improved and assured them the independence of sterling would be maintained.

"I will say for the unteenth time," he said at the annual dinner of the bankers of the city of London, "that the exchange equalization account was founded for the purpose of ironing out excessive fluctuations in the value of our currencies."

The chancellor said he had frequently declared the policy of His Majesty's government in this connection "without, I am afraid, succeeding always in convincing the people across the seas."

Montagu Norman, governor of the Bank of England, who also addressed the bankers, spoke in favor of central banks, especially the Bank for International Settlements of which he said he was "from the beginning and am to-day a faithful supporter and in which I continue to be a great believer."

In his address Mr. Norman said he considered the establishment of central banks in the dominions was one of the great steps forward in these difficult times.

The Bank for International Settlements, he said, "was indeed a vision and you will see if you bear patiently with the difficulties which it suffered from the moment it started, that the vision will come true.

"Its concern is to bring about the co-operation of central banks and no cause could be altruistic and more in the interests of all of you who are in other businesses than that international object."

The chancellor also referred appreciatively to steps taken during recent years to establish central banks within the British Empire. This tended to promote common imperial objects and a unified monetary policy, he said.

Despite the general optimistic outlook mirrored by the fact that British exports have jumped approximately $100,000,000 during the first eight months of this year, Mr. Chamberlain said difficulties in the way of international trade seem to be increasing.

"Unfortunately it is impossible for any one government to reopen the channels of international trade of its own volition or to influence the policies of other countries which are subjected to their own internal exigencies," he said.

Ontario Schools Plan To Teach Agriculture

Minister Announces Subject Will Be Put On Study Course

Toronto.—Hon. Duncan Marshall, Ontario minister of agriculture, announced plans were being made by the departments of agriculture and education to place agriculture on the public school curriculum. He told the Young Men's Canadian Club in an address that he had reached an understanding with Hon. Dr. L. J. Simpson, minister of education, regarding teaching of scientific agriculture in all public schools.

"If I live for the next two or three years it will be a reality," the minister said. "Agriculture will be dealt with in a scientific way in every public school in Ontario. Some knowledge of the soil will be given to pupils, and they will be made to understand the basic importance of agriculture and what it has to offer those who go to live on the land."

He maintained agriculture had been treated too haphazardly in Ontario schools. When present plans were put into effect agriculture would rank in importance with any subject taught, he said.

Cattle Marketed

Winnipeg.—About 2,000 head of under-fed cattle from the drouth areas of Manitoba and Saskatchewan have been marketed through Winnipeg abattoirs since the first loads arrived September 21, according to a checkup at local packing plants.

W. N. U. 2067

War And Peace

Labor Party In Britain Enunciates Their Policy

Southport, England.—In the event of war involving Britain, or immediate threat of war, the Labor party will call a special convention to determine Labor's attitude.

The annual conference of the party reached this conclusion after rejecting a proposal advanced by pacifists that Labor should be bound to call a general strike if war threatened.

Earlier the moderates convincingly showed their supremacy over the extremists within the party, when a series of amendments to the draft platform, which would have called for immediate radical socialist steps by any future Labor government, were rejected on a card vote of 2,146,000 to 206,000.

On the war and peace resolutions, Arthur Henderson, general secretary of the party and president of the world disarmament conference, explained that "never will Labor agree that Britain herself should resort to war or to help any other nation commit that crime.

"If any government should ever seek to involve Britain in war," he added, "it would be opposed by the whole Labor government."

The party approved a resolution expressing deep satisfaction at the entry of Russia to the League of Nations, Mr. Henderson declaring the entry was motivated by a desire to maintain peace.

Remembrance Day

Will Be Observed This Year On Sunday, Nov. 11th

Ottawa.—Remembrance Day falling this year on Sunday (Nov. 11) will be celebrated on that day so far as the department of secretary of state is concerned. In the case of statutory holidays falling on Sunday the provision is made that the following Monday will be observed for business purposes. Remembrance Day does not fall into that category.

Any departure from the provisions in order to provide a business holiday on the following Monday will be a matter for local ruling.

Window Washer Fights Hawk

Wins Battle With Huge Bird High In Air

Chicago.—A man and a hawk fought a brief, bitter battle 624 dizzying feet above the world's fair, and the man was the victor.

As William Weber plied his trade as window washer on the west tower of the fair's skyride, a large chicken hawk attacked him with beak, talons and powerful wings. Only his safety belt prevented Weber from plunging to sudden death. Weber fought back with all his tools and swinging fists until a well-directed blow sent the marauder soaring away.

Accepts New Appointment

McGill Professor Joins Staff Of University Of London

Montreal.—Prof. F. Clarke, for the past five years professor of education at McGill University, has accepted an appointment to the staff of the institute of education in the University of London, it was confirmed here. He will act as adviser to overseas students, and will leave for his new post toward the end of January. Dr. H. D. Southam, formerly of the British Columbia normal school in Vancouver, has been appointed assistant professor of education at McGill.

Hearing Claim Case

Ottawa. — The hearing into Alberta's claim for compensation in respect of the province's natural resources during their administration by the Dominion government, has opened. The royal commission appointed to adjudicate on the claim comprises Justice A. K. Dysart, Judge T. M. Tweedie, of Calgary, and G. C. MacDonald, of Montreal.

Forbids Balloon Tires

Berlin.—An official restriction forbidding the manufacture of balloon type tires in order to economize the rapidly diminishing rubber supplies of the country has been put into operation. Balloon tires require twice as much rubber as the ordinary tires.

HEADS NEW BOARD

Dr. G. H. Barton, Chairman of the newly appointed Dominion Marketing Board, who is also Deputy Minister of the Dominion Department of Agriculture. The first duty of the board will be to investigate methods by which Canada's export of apples may be increased.

'Plane Crash Kills Seven

Machine Bound For Paris Falls Into English Channel

Folkestone, Eng. — An aeroplane with seven occupants crashed into the misty English channel three miles from shore on a projected flight to Le Bourget airfield, France, killing all of them. Two of the passengers were women.

The cause of the crash probably will remain a mystery since no one witnessed it, although the captain of the German cargo steamer Leander heard the roar of the aeroplane's engines, followed shortly by the crash as the plane plunged into the sea.

The cross-channel steamer Biarritz was near the scene at the time. It picked up five bodies and brought them to Folkestone. There was a heavy rain at the time of the crash.

It was learned a plane, without giving its identity or other particulars, flashed an S.O.S. to Croydon airdrome some time before the wreckage was found. The machine belonged to a British flying company known as Hillman's Airways, and had left an airdrome near Romford, in Essex, northeast of London, for Paris.

May Get Nobel Prize

Sir Norman Angell Likely To Receive Peace Award

New York.—An Oslo cable to the New York Times quotes President M. Olden, of the Norwegian Peace Society, as declaring the 1934 Nobel peace prize probably will go to Sir Norman Angell.

Sir Norman Angell, economist, author and former member of the British parliament, has written several books on international topics, many of them dealing directly with questions of peace and war.

Asks Definite Announcement

Australia Wants To Know Britain's Objectives Regarding Agriculture

Bradford, England.—The suggestion the British government should definitely announce its objectives in regard to British agriculture—and the part that imports from the Dominions is to finally take—was made by Stanley Bruce, Australia's high commissioner in London.

Mr. Bruce was making his annual address to members of the Bradford Textile Society.

He suggested that in the interests of the mother country herself some guiding principles should be laid down, making it possible to formulate a concrete policy of inter-imperial co-operation for the promotion of reciprocal trade.

The British government's campaign to stimulate domestic agriculture has already had important repercussions on exports from the Dominions, "standstill" agreements having been made regarding meat and cattle exports, while a similar agreement for eggs is under discussion.

May Lower Interest

Farmers May Profit By Reduction To Farm Loan Board

Ottawa. — First mortgage money may be available to Canadian farm loan board borrowers at as low as 5½ per cent. as a result of an order-in-council secured by Hon. E. N. Rhodes, minister of finance, and made public. Under this order the federal treasury is empowered to lend money to the board at four per cent. interest where a rate of five per cent. formerly was charged.

The order-in-council will permit the minister of finance to purchase four per cent. bonds of the Canadian farm loan board up to a maximum of $10,000,000, in instalments of $100,000.

Relief Lists Lower

Bright Report On Unemployment Reduction From B.C.

Victoria.—Dropping steadily since March, British Columbia relief registrations included 29,000 persons recently, the lowest of any total in the last two years. E. W. Griffiths, provincial relief administrator, said consolidation of old and new relief lists was about complete with 10,000 listed in provincial areas and 19,000 in municipalities, exclusive of dependents.

This is a reduction of 51,000 unemployed registered for relief in March last, a total that declined steadily to 31,600 in July, and now to 29,000.

Suggests National Government

Chatham, Ont.—A national government for Canada was urged here by Rev. Charles W. Gordon, Winnipeg author, who writes under the name of Ralph Connor. One group could not solve the country's problems, he told a service club in an address.

BICYCLE CHAMPIONS SAIL FOR CANADA

This picture was taken when Syd Cozens and Jack Torry left London for Canada to compete in Six-Day Bicycle Races. These two cyclists were among the best amateurs in the British Isles before they turned professional to compete with such men as Torchy Peden in the marathon cycle races which are very popular on this side of the ocean.

LOWER TAXATION AND INTEREST RATES EXPECTED

Ottawa. — Forecasts of taxation reductions and lower interest rates to borrowers were contained in addresses to the people of Canada by Prime Minister R. B. Bennett, speaking in London, and Minister of Finance E. N. Rhodes speaking in Ottawa, in connection with the $250,000,000 refunding loan.

"The steady progress that Canada has made in business recovery during the last 18 months—reflected as it already is in expanding revenues—should eventually result in those reductions in taxes which everyone so desires and which your government is striving to achieve by every means within its power," said Mr. Bennett.

The success of the great conversion loan of 1932 when the British government exchanged nearly $10,000,000,000 with an interest saving of millions of pounds annually, coincided with the beginning of the economic recovery which the mother country enjoyed during the last two years, Mr. Bennett recalled.

The lower interest rates to be paid upon the present issue of bonds was not arbitrarily fixed, Mr. Rhodes stated, but fairly reflected the current rate for money in Dominion security markets.

"Money is accumulating," Mr. Rhodes said, "and good investments are eagerly sought. Interest rates have therefore declined materially and the tendency is downwards. This downward trend is already apparent in the rates paid on bank deposits as well as high grade securties, and will soon permeate our whole financial system with resultant stimulus to expanding economic activity.

"The difference between the 5½ per cent. paid on the maturing bonds and the 3.81 per cent. on the new 15-year bonds measures the progress made in restoring interest rates to more normal levels from the abnormal heights caused by the exigencies of the Great War."

National revenues for the first six months of the current fiscal year exceeded those for the same period last year by over $26,000,000, Mr. Rhodes said, and the prospects were excellent for a surplus in ordinary account in the next Dominion budget. The Canadian National Railways had also shown an improvement in the first eight months of the calendar year by about $8,000,000.

New Farm Station

Will Locate Experimental Farm In Melfort Area

Ottawa.—The government has decided to develop an experimental farm in the constituency of Melfort, Sask., it was stated at the department of agriculture. The farm will comprise 640 acres.

The farm will be located in clay-bush country, and will be planned to assist farmers in such districts of the prairies. The other experimental farms in Saskatchewan look after the needs of the people farming on the open prairies, but it is said there are no experimental farms in the province dealing with conditions met with in the clay-bush area.

Land has already been acquired for the farm and buildings are now being erected. It will be in operation next year. Livestock and forage-crop production will be to the fore in the experimental work conducted there just as farms in other parts of Saskatchewan deal more largely with the problems of the grain grower.

Located in an old settled district which has not hitherto had the benefit of an experimental farm, the project is expected to be of assistance to farmers working under conditions such as prevail in the Carrot River valley.

Crop Payment Higher

Calgary.—The initial payment of the Alberta wheat pool on the 1934 wheat crop has been boosted 15 cents a bushel to 50 cents. Better prices and a generally improved demand resulted in the decision to increase the payment from 35 cents a bushel, which was paid on the 1933 crop, to the half dollar mark, officials said here.

In connection with the three-day pheasant shoot opening on Monday, shooting is from 7 a.m. to 4.30 p.m., local time. The bag limit is two birds daily.

In connection with the Dominion election which is due in 1935 a start has been made in compiling the voters list. Enumerators are employed in each of the polling districts, with R. Sinclair Smith and H. H. Taylor in charge for Creston.

Albert Illerbrun, who arrived from Gull Lake, Sask., late in September, died in Creston hospital Tuesday evening, after having been admitted the same morning. He was 44 years of age, and the body was taken to Gull Lake for burial.

An important sale of inside village property was completed last week when R. Sinclair Smith disposed of 25 feet of his 50-foot lot, next the Cecil Moore garage, to Henry Johnston and A. Walde of Fernie, who are reported to be going to erect a building and go into the confectionery business in town.

R. G. L. Clarke of Vancouver, chief fruit inspector for British Columbia, was here on official business, Wednesday. He is now on his twenty-third year in this work and recalls that in 1912 the total B.C. output of apples was just over half a million boxes, while this year the crop will run to almost five million boxes.

Creston has a case of infantile paralysis. The victim is Digsby Moens, six-year old son of Mr. and Mrs. Frank Moens of Copeland, Idaho, who was brought here for medical treat ent on Saturday, following a visit to the doctors at Bonners Ferry the day previous.

CRESTON—8.30 a.m., Holy Communion. 10.30 a.m., Sunday School. 11 a.m., Matins and Holy Communion.

After having the case under observation for a day Dr. Olivier decided it was infantile paralysis and has the boy in quarantine in a vacant residence. The necessary serum was at once procured and the patient is coming along nicely. As the unfortunate boy did not come in contact with any local residents there is little fear of the disease spreading.
