THE CRESTON REVIEW

VOL XX. CRESTON, B.C., FRIDAY, SEPTEMBER 7, 1928 No. 31

Trinity United Church Picnic

It was a case of come early and stay late at the annual picnic of Trinity United Church which was held at the second bend of Goat River on Wednesday afternoon last. Ideal weather prevailed and there was a large turnout of both children and adults. Transport of the youngsters started from the church at 10 a.m., with dinner at 12.30, after which there was a varied line of sports, including a peanut scramble. Ice cream cones were distributed in lavish fashion to all children in attendance. Bathing was also a popular pastime both before and after supper, which was spread about 6.30. The sports were in charge of Miss Edith Cook and Messrs. T. Goodwin and Vic. Mawson, who announce the winners as follows:

Three-leg race, 12 and over—Frances Lewis and Reetha Phillips, Edward Martin and Stewart Penson.

Sack race, 12 and under—Gerald Phillips, Molly Moore.

Sack race, over 12—Edward Hills, Roy Penson.

Wheelbarrow race—Jim Downes and Tony Morabito, Arthur and George Dodd.

Skipping—Reetha Phillips, Molly Moore

Nail driving—Mrs. W. Truscott, Mrs. R. C. Phillips.

Horseshoe throwing—Edith Cook, Mrs. W. Truscott.

Standing jump—Victor Mawson, Dick Penson.

Boys race, 6 and under—Ernest Hills, Kenneth French.

Girls race, 6 and under—Ethel Morrow, Betty Kernaghan.

Boys race, 7 to 10—Arthur Dodd, George Dodd.

Girls race, 7 to 10—Rachel Morrow, Eva Phillips.

Boys race, 11 to 13—Herbert Dodd, Roy Penson.

Girls race, 11 to 13—Frances Lewis, Reetha Phillips.

Boys race, over 16—Stewart Penson, Harry Smith.

Girls race, over 14—Ruby Martin, Dorothy Hills.

Married Women' race—Mrs. R. Comfort, Mrs. W. Truscott.

Married men's race—E. Martin, R. C. Phillips.

Stout ladies' race—Mrs. R. C. Phillips, Mrs. T. Goodwin.

Three leg race, boys 12 and under—Tony Morabito and Jim Downes, Robert Dickson and Gerald Phillips.

Wynndel

Mrs. E. Wall and Ronald left last week for Calgary, Alberta, making the trip by auto. She is attending the wedding of her sister, Miss Ada Cuell.

Mrs. Mower and family left last week for her parents' home in the southern States.

Mrs. Mosely and family of Arrow Park are visitors here at present, guests of Mr. and Mrs. R. Uri.

Paul and Oscar Ofner returned last week from Barkerville where they have been for the last two months.

Ralph Clarke has just left for Medicine Hat, Alberta, where he has obtained work with the C.P.R.

Mrs. T. Dunseath, who has been a patient in Cranbrook hospital for some weeks, returned home on Saturday.

Mr. and Mrs. Crooks have left for Commerce, Alberta, where they will remain for the harvest and threshing season.

Misses Ethel Towson and Augustina Benedetti left on Monday for Willow Point, to help with the apple harvest.

Mrs. Mason and Wilfrid left on Monday for Kimberley.

Peter Andestad and Reg. Cornwall are the latest to leave to help with the prairie harvest. They got away on Monday.

Mrs. Fred Davis and daughter, Eileen, have just returned from an extended visit with relatives at Portland, Oregon. Accompanying her home is her mother, Mrs. Allan, and two brothers of Portland, who are seriously thinking of remaining in British Columbia.

Misses Annie and Ethel Hook, who have been holidaying here, left on Monday for their home in Spokane.

Misses Randall and Ewing of Trail arrived on Monday to take charge of the Wynndel school, which opened on Tuesday with a splendid attendance.

Mrs. R. Uri and Mrs. T. Watson left on Monday for Spokane, making the trip by bus from Creston.

Dance on Saturday night, 8th, at the old schoolhouse. T. Svenson and R. Walde, violin and accordeon. Gents $1; ladies 50 cents. Supper included.

Joe. Benedetti was a visitor to Spokane this week, on a visit to his son, Gwedo, who is receiving specialist treatment for an injury to his eye.

Most all the local farmers are in the hay field, taking full advantage of the excellent harvest weather.

School Sports to Feature Fall Fair

The Sports Committee are again offering a cup for the best school team competing in the sports on fair day. This year, however, the cup cannot be won outright and will be competed for annually, becoming the property of the school that succeeds in winning it three times in succession.

All the Valley schools should be represented and enter a team. A list of events will be sent to all principals, and the committee hope to be able to call on most of the schools and work up lots of enthusiasm.

Last year we had a very successful sports day and there is no reason why the same should not be repeated this year. Special effort should be made to train a tug of war team. This event always causes much excitement, and there will be a good prize for the winning team.

Alice Siding

Frank Travers, who has been on a visit at the J. W. Parkin ranch for a couple of weeks, left for his home at Michel on Monday.

Ideal weather has prevailed so far for haymaking and no time is being lost getting the feed into stack.

Miss Ruth Compton was a holiday visitor at Nelson for the weekend, a guest of her sister, Ivin.

Jas. Wilson of Sirdar and Mr. Weir of Calgary, Alberta, were business visitors in this district last week.

Alice Siding school reopened on Tuesday morning with Principal Lukas in charge. Due the busy season in the orchards the attendance is rather light.

Mr. and Mrs. H. E. Moore and children of Cranbrook were weekend visitors with Mrs. Marshall.

Harry Compton and Barry McDonald motored in from Kingsgate to take in the Labor Day dance.

Mrs. J. H. MacDonald and children of Calgary, Alberta, are visiting this week with her parents, Mr. and Mrs. J. H. Webster.

Jack Patterson, a Cranbrook cattle buyer, was calling on Alice Siding farmers last week, and secured a few animals for the two carloads he shipped out on Saturday.

Haymakers report a considerable scarcity of horse hay on the cuts this year. The very wet season of 1927 prevented cutting being done and also brought along a great growth of rushes which promptly went to seed and are growing so thick this year that it is doubtful that of the 1500 tons to be cut if one third is horse feed.

Can You Help With Clothing?

Reference to the disastrous fire at the home of Wm. Hook of Canyon is made in another column, and the people of Canyon are planning to give a benefit dance in aid of the destitute family. Already beds, bedding, a few household goods have been donated to help the mother begin a new home for the little ones. There are six children, aged from one to eight years. The present chief need is clothing, and this appeal is for children's clothes, as well as for the mother. Rev. R. E. Cribb, as one of those caring for the family at present, would be glad to receive or send for same.

Erickson

Marcella and Bud Sanford, who have been holidaying at Champion, Alberta, have returned for the school term, and will be stopping with their sister, Mrs. R. M. Telford.

Miss Joan and Lyle Kemp got back on Saturday from a week's holidaying at Cranbrook.

Miss Jeanne Hall spent a short holiday here last week with her parents, Mr. and Mrs. John Hall, returning to Kelowna, Sunday.

Miss Jessie White of Fernie and Miss Doris Ried of New Westminster, the teachers in charge of Erickson school, arrived on Monday, and are stopping with Mrs. Geo. Cartwright.

Jack Hall has returned to Vancouver after a two weeks' vacation with his parents, Mr. and Mrs. John Hall.

Louis Littlejohn got back on Saturday from his two weeks' vacation at prairie and coast points, and is again in charge at the co op. store.

C.P.R. President E. W. Beatty passed through on Sunday in his special train about 3 p.m., making a stop at Erickson for an exceptionally fine boquet from T. W. Bundy from the station garden.

D. A. MacDonald and two children of Cranbrook were Monday visitors with Mr. and Mrs. G. Cartwright.

Mrs. R. Dodds got back on Monday from a three weeks' holiday visit with friends at Yahk and Cranbrook.

Mr. and Mrs. Anderson of Calgary, Alberta, were visitors last week with Mr. and T. W. Bundy.

Miss Charlotte Speaker arrived home on Tuesday from Nelson, where she has been working for some time, and will spend a holiday with her parents, Mr. and Mrs. F. W. Speaker.

Mrs. Botterill and Mrs. Cripps are Spokane visitors this week, going down on the bus from Creston on Tuesday.

Mr. Dean, who was here during the berry season, has returned and will be in charge of apple inspection at Erickson and Creston for the next two months.

Canyon City

BIRTH—At Spokane, Wash., on August 15th, to Mr. and Mrs. Norman Strong, a son.

Canyon has the usual quota of residents on the hay cut on the flats commencing last week, and are putting up the feed in very fine shape as the best of weather has prevailed.

Mrs. McPherson and family, who have been with her father, R. Turner for the past few years, have returned to Oregon to reside.

Mr. and Mrs. A. D. Pochin and family of Nelson are spending the week at the ranch here. Mr. Pochin is supervising the harvest of the early varieties of apples.

Miss Rogers of California has just arrived for a couple of months' stay with her uncle, Dave Rogers.

Miss Frances Knott left on Monday for Sandon, where she will be in charge of one of the rooms of the public school at that point this term.

Peter Burns arrived back from the prairie at the end of the week. In southern Alberta there is already too much help for the crop to be taken off.

Congratulations are in order with Misses Lily Cook and Frances Knott both of whom have just been notified of their successfully passing musical examinations set by the Toronto Conservatory of Music. The former passed in piano and the latter in both vocal and piano tests.

Canyon had a rather disastrous fire on Monday morning, when the residence of Bill Hook went up in smoke, together with all its contents. Just how the conflagration started is not quite clear, as Mr. Hook is away on the prairie and Mrs. Hook had gone to Creston that morning, but it is presumed the children had overstocked the stove with wood overheating the pipes and setting the woodwork aflame. Neighbors were on the scene quite promptly but were too late to save even any of the contents. The house was owned by Principal Kolthammer, opposite the Hale ranch, and carried a fair amount of insurance.

September Meet Canadian Legion

Creston Valley Post of the Canadian Legion had the September session at the club rooms on Tuesday night with a fair turnout of members, and at which two members were enrolled bringing the membership up to sixty.

A bag for Piper Ross' bagpipes is being purchased by the Legion, and Mr. Ross has been officially posted as Legion piper. Another of the things of importance decided on was that the Legion will put on a dance fall fair night and donate the proceeds to the Agricultural Association.

The house committee reported two deaths—Mrs. H. L. Robinson and Mrs. W. S. Watson,—and that wreaths had been sent to both funerals. The Legion have purchased a silver cup to be donated the fall fair committee to be given to the ex-soldier who wins the most points at the fair, with the proviso that when won three years in succession the cup becomes the permanent property of winner.

The October meeting will be held in the quarters and will take the form of a smoker, and several new members are expected to enroll, as this is the annual meeting and members start at the beginning of a new quarter and a new year. Election of officers will be the order of the evening, and a good social evening will follow.

CARDS OF THANKS

Mr. and Mrs. Stanley Watson and Reg. Watson take this means of expressing their sincere appreciation of the many kindnesses and sympathy shown them in their recent bereavment.

Mrs. Wm. Ferguson wishes to thank those who were so considerate with her the four weeks she was confined to bed with a severe sprained ankle. She is now able to walk again.

TENDERS WANTED

Tenders will be received by undersigned up to Saturday, September 15, 1928, for the work of nightwatch (three nights), and also for decorating the interior of the fall fair main building. Lowest or any tender not necessarily accepted. All particulars from F. H. JACKSON, Secretary, Creston Valley Agricultural Association.

Death Summons Mrs. W. S. Watson

Death removed another of Creston's quite oldtime citizens on Monday evening in the passing of Annie Charlotte Watson, widow of the late W. S. Watson, whose death occured about nine months previous. Deceased was in her seventy-sixth year. She was born in Wells City, Somersetshire, England, and was married in 1896, and ten years later the Watsons left for Canada, making short stays in Winnipeg and Cranbrook before settling in Creston in 1907, where deceased has resided continuously ever since.

The funeral was on Wednesday with Rev. A. Garlick in charge of the services at Christ Church as well as at the cemetery, and W. H. Crawford, J. D. Spiers, Jas. Cook, R. A. Palfreyman, W. Fraser and M. R. Joyce officiating as pallbearers. Many friends were out to pay a last tribute of respect and many floral remembrances bespoke the high esteem in which deceased was held.

Those sending floral remembrances were: Stanley, Nellie and girls; Percy, Amy and children; Reg., Creston Post Canadian Legion, Masonic Lodge, Christ Church Ladies' Guild, P. G. Ebbutt, Evelyn Bevan, Mr. and Mrs. Jas. Cook, Mr. and Mrs. A. L. Palmer, Mr. and Mrs. Chas. Moore, Mr. and Mrs. A. Manuel, Mr. and Mrs. George Moore, Mr. and Mrs. Bush and family, Mr. and Mrs. Hayes, Mr. and Mrs. J. D. Spiers, Mr. and Mrs. F. H. Jackson and Miss Wade, Mr. and Mrs. John Ryckman and family, Mrs. J. P. Johnston, Miss Harvey.

Lister

F. N. Thompson and two sons of Nelson were renewing acquaintances here at the weekend, guests of Mr. and Mrs. Sinclair.

Harold Langston is making daily trips to Creston where he is on the warehouse staff of Creston Co-Operative Fruit Exchange.

Lister is on the shipping list for Wealthy apples this season. The movement is not extensive, of course, but is of very fine quality.

R. L. Langdon of Nelson, the Kootenay poultry inspector, with Mr. Willcox of Vancouver, the R.O.P. supervisor, were in the area at the first of the week, looking over some of the Lister flocks.

Rev. A. Garlick had a fine turnout on Sunday morning for Church of England service and Holy Communion. Sunday school was also resumed and will meet hereafter every Sunday at 11 a.m.

Former Principal Parker of Lister school was here from Slocan City for the weekend, a guest of Col. and Mrs. Lister, and was accompanied by his sister, Miss Mabel Parker, who is to teach at Kingsgate this term. Mr. Parker is to teach at Yahk.

D. J. McKee left a few days ago for Kimberley where he is hoping to secure steady work on the erection of a large extension to the concentrator at that point.

Miss Agnes Hobden has returned to duty at the General Hospital at Vancouver after a three weeks' vacation at her home here.

Tom Cannady left a few days ago for Southern Alberta, where he has secured a job for the season at harvesting and threshing.

John Finlay and Dick Stevens have just completed a good job of making needed improvements at the school grounds, which included cleaning the well and repairing the pump.

School opened on Tuesday morning with an enrollment of 30 pupils, and Miss Curtis of Slocan City in charge. There were three new beginners in Joyce Gordon, Alice Wellspring and Roy McCullough. Miss Curtis has consented to take the first year high school work as well and has two pupils enrolled, Agnes and Wallace Sinclair.

RED ROSE TEA "is good tea"

The Orange Pekoe, at a little extra cost, is extra good

In clean, bright Aluminum

A Real Menace

Summer is on the wane. The nights will soon be nippy and chill, and if we have not been careful to stock up on our bank of health with a little surplus of energy during the long sunshiny days, we may be disgusted to find ourselves with a developing common cold.

So declares the Canadian Red Cross magazine in discussing what it characterizes as a real menace in this country. Coryza is the official name of the common cold, but the name is not very indicative of the nastiness of the disease at first blush. Coryza is a real menace. There is no other affliction that quite so universally causes discomfort or so great a loss of time for workman, business man, and school child.

A lowering of vitality means a slow-down in usefulness or production, and time lost in our busy age is a money loss somewhere, or somehow, to someone. Remembering, however, that a nation's health is a nation's wealth, we'll cease to think in dollars.

The real menace of a cold is its possible bad after-effect on the individual. As it is caused by varieties of bacteria very closely allied to those responsible for the pneumonias, for bronchitis, laryngitis, and possibly catarrh, it often leaves in its wake damages that are permanent.

When we speak of "catching" cold, we speak correctly, if by "catching" we mean getting it from the other fellow. About ninety per cent. of our colds come from him.

Very rarely one may develop his own cold, for these germs probably are ever-present in the nose and throat and will multiply and thrive should the vitality of the host be sufficiently lowered to furnish a good culture ground for their growth.

This may be effectively accomplished by avoiding fresh air and sunshine, by loss of sleep, by over-fatigue, or by living in over-heated rooms. Insufficient, improper, or excessive food or clothing assists greatly.

But for the vast majority of our colds, we may blame close contact with our neighbor who coughs, sneezes, and spits, and who uses his handkerchief to saturation and then greets us with a friendly handshake.

Ignorance of man-made laws excuses no one; ignorance or disregard of the laws of health eventually spares no one. The person with a bad cold should be regarded as having a dangerous communicable disease, and we should know enough, and our children should be taught, to avoid him. Even among people who realize this, knowledge generally outstrips practice, and on and on goes the cold.

The trouble is that the vast majority of people do not regard the common cold seriously enough. If they, or their dear ones, contract tuberculosis, or are stricken down with pneumonia, they are seriously alarmed, but they overlook the fact that the common cold may be but the forerunner of these and other dread diseases. "Oh, it is only a cold," they indifferently say with a shrug of the shoulders, ignorant or careless of the fact that the cold will quickly seize upon the weakest spot in the human body, whether it be the throat, the nose, the lungs, the heart, the kidneys, or elsewhere, and when at last realization comes that there is something seriously wrong it frequently is everlastingly too late.

"It is the little things in life that are causing all the strife," is an old, old saying. It is also what we ignorantly regard as the little things that are responsible for most of the ills from which mankind suffers. Make no mistake about it, the common cold is no little thing although we may look upon it as such. Get after it the moment its first symptoms make their appearance. Better still, exercise all those precautions necessary to prevent taking a cold in the first instance.

Finally, if you can't or won't dodge the common cold, then at least don't make it necessary for your neighbor to dodge yours.

Rust Resistant Wheat

Within Three Years New Variety Should Be Available Which Will Grade As High As the Best

Within three years Western Canada should have a rust-resistant wheat which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion cerealist, who is spending a few weeks in the West, inspecting the work of the Dominion Rust Research Laboratory at the Manitoba Agricultural College and the various Dominion experimental farms in the West. He will also visit farms where rust-resistant grains are being produced for experimental purposes.

Canadian Farmers Have Advantage

"Wheat farmers of Montana alone paid nearly $8,000,000 more in freight rates on their wheat crops in 1927 than they would have paid had they lived in Canada," stated Senator Wheeler of Montana, speaking in the United States Senate recently.

Demand For Farm Implements

Saskatoon Dealers Report Increased Volume Of Sales

Saskatoon implement firms record an increased volume of sales for this year, ranging from 25 to 100 per cent. over those at this time last year. An encouraging feature, too, is that cash deposits are larger this year. An active demand for combine-harvesters is also noted and a large portion of implements purchased such as plows, discs, etc., have been for tractor equipment.

An Important Industry

The pulp and paper industry is the most important manufacturing industry in Canada; heading the lists in 1926 for gross and net value of manufactured products as well as for distribution of wages and salaries. In total capital invested the industry is second only to electric light and power plants and in total number of employees it is second only to saw-mills.

Youthful Charms Enhanced By Cuticura

Soap and Ointment. Regular use of the Soap, assisted by the Ointment as needed, will keep the complexion fresh, clear and youthful and the hair live and healthy. Cuticura Talcum is fragrant, cooling and refreshing, an ideal toilet powder.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

New Phone Service

Inauguration Of All-Canadian Service Between Winnipeg and Montreal

Inaugurating the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Port Arthur and Fort William, officials of the Bell Telephone Co., the Canadian Pacific Railway and the Manitoba Government spoke to one another across 1,605 miles of copper wire recently. The new line between Winnipeg and Montreal has nine repeated amplifying stations. Its total weight is 350 tons.

A TIRED-OUT FEELING

Is a Sure Sign That the Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits I derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, N.B. She further says:—"Some years ago I was working as a stenographer, and became badly run-down. I always had a tired-out feeling, had no appetite and suffered terribly from backache. Almost every month I had to remain from the office for a day or two. I was advised to try Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I had been taking the pills very long I began to feel much better. Continuing their use my strength came back, I regained my appetite and the terrible backache from which I had suffered disappeared. I have been married some years now and have two fine healthy children, a girl and a boy, and am in the best of health. All this I owe to Dr. Williams' famous Pink Pills, and I trust that these few lines may help some other weak, run-down person."

All weak, run-down people who will give this blood-building tonic a fair trial will find through its use new health and strength. You can get the pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Demand For Canadian Wheat

Believe That Demand From Orient Will Continue To Increase

Speaking at Shaunavon, Saskatchewan, the other day, A. F. Sproule, director of the Saskatchewan Wheat Pool expressed the belief that the Orient's demands for Canadian wheat, which last year were greater than those of any three previous years, would continue to increase. He mentioned incidentally that the Saskatchewan Wheat Pool now has 925 country elevators and terminal elevators of 26,000,000 bushels capacity, while it is also building another elevator of 6,000,000 capacity.

Nights Of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

To Reconstruct Rolling Mills

Manitoba Rolling Mills To Operate Plant In Medicine Hat

The Medicine Hat City Council has received word from the Manitoba Rolling Mills Company, Winnipeg, that plans are in preparation for the reconstruction of the rolling mills in Medicine Hat, entailing the installation of an open hearth furnace and that the company is considering the use of electricity for the operation of the plant in preference to steam.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Parks Attract Foreign Tourists

Under the policy of development and publicity being carried out by the Dominion Government the national parks are not only rendering a wider service each year to Canadians themselves, but they are adding to the knowledge of Canada abroad and attracting to the Dominion thousands of visitors from other countries in every part of the globe.

Athletes—Keep Minard's Liniment handy.

The Family Rolling Stock

Resident Of Vancouver Makes a Most Interesting Discovery

Even the small family in moderate circumstances of today carries an amazing amount of rolling stock, compared with the family of a generation ago. J. Butterfield, a writer of The Vancouver Province, makes the astonishing discovery that in one modern family there exists under one management one automobile, two bicycles, one express wagon, four roller skates, two scooters, a kiddie car and a baby carriage. Then there is the lawn mower, retained exclusively for one member of the family. Forty years ago a similar household contained two items of rolling stock, a baby carriage and a collection of hoops. "Is there a hoop in all Vancouver now?" asks Mr. Butterfield — Regina Leader.

Minard's Liniment cleanses cuts, etc.

Condensed Milk Production

Within recent years there has been a large increase in the production of condensed milk. The first milk condensing plant was established at Truro, Nova Scotia, in 1883, and there are now in Canada 26 plants for the manufacture of condensed and evaporated milk and milk powder.

Moose Jaw As Convention City

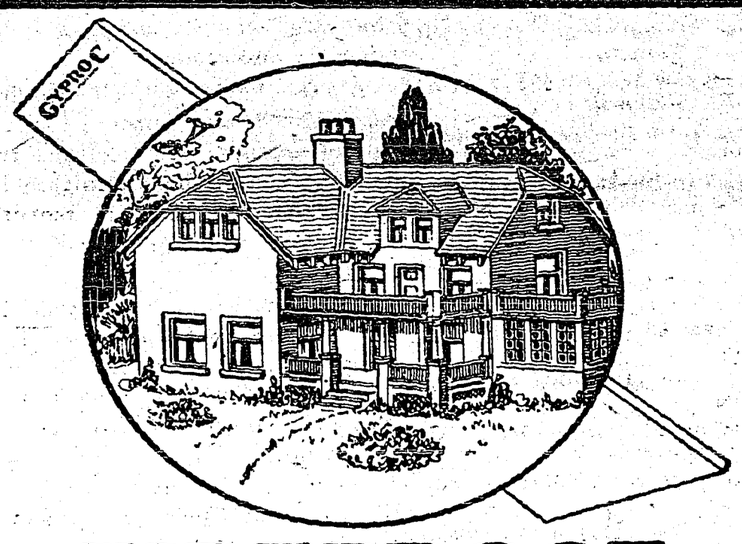
Many Organizations Plan To Hold Annual Convention In Moose Jaw In 1929

The Saskatchewan Postmasters' Association, the Saskatchewan Pharmaceutical Association, the Saskatchewan Retail Merchants Association, the Saskatchewan Teachers' Alliance and the Saskatchewan Educational Association are among recent additions to the growing list of organizations that will hold their 1929 conventions in Moose Jaw.

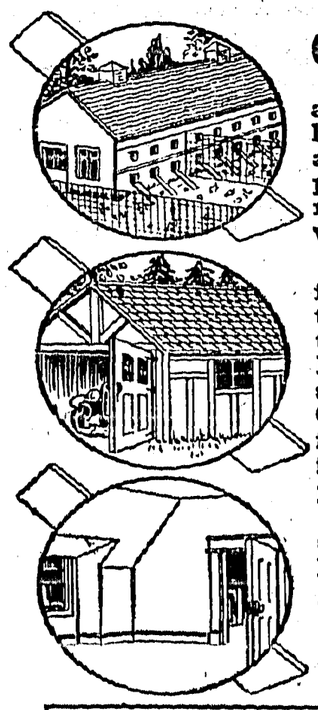
Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Eclectric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Banff An All-Year Round Resort

Banff, Alberta, is a mecca of holiday seekers in both summer and winter. During the summer months visitors may enjoy practically every outdoor recreation. Each winter a carnival is held which is attracting an increasing number of visitors annually, and it is predicted that Banff will soon be a world-famous winter resort.



FIREPROOF Farm Construction



GYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations — for remodelling — for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gyproc protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick and easy to apply. It can neither crack, warp, bulge or shrink. By filling the joints with Gyproc Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gyproc comes in broad, light, ceiling-high sheets of gypsum rock. Takes any decoration—and is especially suitable for Alabastine. Fuel saved by the insulating qualities of Gyproc will alone pay for the cost within a few seasons.

Clip and fill in coupon for interesting free booklet.

WRITE FOR FREE BOOK

Canada Gypsum and Alabastine Limited, Winnipeg, Canada.

Please send me handsome free booklet, "Walls that Reflect Good Judgment," which contains valuable information on Gyproc and home decoration.

MORAL VALUE OF THE PEACE PACT IS NOW STRESSED

Paris.—Lord Cushendun, who signed the peace pact in behalf of Great Britain, Northern Ireland, and India, said that it was a great and historic event, but he cautioned against the inference that the activities of Secretary Kellogg, of the United States, in elaborating the treaty meant that the United States would depart from its policy of aloofness toward European complications.

"So far as this pact is concerned," he said, "it carries with it no implication that the American people must concern themselves with European matters."

The British minister emphasized the moral value of the pact, recalling that Napoleon once said that the great factor in war was the moral factor.

"So it is in peace," Lord Cushendun said. He added:

"No one imagines that signing this treaty will immediately and finally banish war from the face of the earth. That would be a mistake. Possibly there will still be small wars somewhere on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Lord Cushendun said that personally he divided the credit for the negotiation of the treaty between Foreign Minister Briand and Secretary of State Kellogg, but he recalled Sir Austen Chamberlain's activities of the last few years in favor of peace, and claimed for him as much credit as for any one else in the crusade against war.

Chinese Facing Starvation

Crops In Many Districts Have Been Ruined

Shanghai, China.—The population of 1,500,000 in a district 30 miles wide and 100 miles long on the border of South Chihli, and Northwest Shantung, is facing death from starvation, said Earl Baker, secretary of the New York-China famine fund committee on his return from a visit to the stricken area.

There has been sharp differences of opinion, both in China and the United States, regarding the necessity of relief measures.

Mr. Baker said he is convinced that relief must be sent at once. He stated that 150,000 persons were in an exhausted state of malnutrition and apparently doomed to death and that 30,000 were slowly starving.

Drought and grasshoppers have ruined the crops in the famine district, said Mr. Barker. He added that the grasshoppers now form part of the diet of thousands of the stricken people. One village, he said, was eating fried grasshoppers on a wholesale scale, the insects being the only food of many houses which he visited.

Well Known Finn Injured

Saskatoon. — Ivar Autunen, bewhiskered Finn, who boasts the longest moustache in Christendom, and who is known all over the Dominion, particularly in newspaper offices, was seriously injured when hit by a car here. He is in hospital suffering from a fractured skull and broken collarbone.

Cheque For Doctor Doolittle

Toronto.—Doctor P. E. Doolittle, veteran motorist, was given a $5,000 check by the Canadian Automotive Industries in appreciation of what he has done to make motoring in Canada more available.

Building New Town

The Pas, Man.—Surveying at the Gold Lake townsite has been completed. The new town has not been officially named but it will probably be known as Gold Lake. It is surrounded by rich mineral deposits.

Epidemic At Athens

Athens.—Eighty per cent. of the population of Athens and Piraeus have been affected by the epidemic of dengue, it is now estimated. The fever was spreading in the provinces.

Declares Navy Pact Letter a Forgery

Foreign Office Says Document Is Palpably False

London.—"We have now seen a copy of the letter which purports to have been written by Sir Austen Chamberlain, secretary of state for foreign affairs, to Aristide Briand, French foreign minister, concerning the alleged terms of an Anglo-French naval agreement, and we have no hesitation in dclaring that the letter must obviously be a forgery. No communication, even remotely in such a sense as suggested has ever passed from Sir Austen to M. Briand."

This statement was issued by the foreign office to the Canadian Press.

The document, a summary of which was published widely in the United States and Canada and occasioned a great sensation, has now been rereceived in London and is stated to be a most patent and palpable forgery.

It is understood that the British government has cabled instructing the Brlish embassy at Washington to deny categorically the authenticity of the document.

Air Mail Service

First Air Mail In Western Canada To Operate From The Pas

Saskatoon.—The first air mail service west of Winnipeg will be established from The Pas to Cold Lake Friday.

W. Rippingale, of the Saskatoon post office, will represent District Superintendent J. H. Hunter at the inauguration of the weekly mail service, which W. A. Rae, barrister at Cold Lake, terms one of the greatest boons ever presented to the pioneering prospectors at Cold Lake.

Formerly mail was taken to and from Cold Lake at infrequent intervals, greatly handicapping the work of the mine recording office established there last April.

The new post office will be named Kississing, the Cree word for "cold." Under the new system mail will reach Cold Lake every Friday, returning the same day.

Peter C. Deurie, a pioneer merchant at Cold Lake, has been appointed postmaster.

Little Damage From Rust

Rust Menace In Saskatchewan Did Not Materialize

Moose Jaw.—Although conditions in Saskatchewan were propitious for a heavy rust infection during the month of July, the rust menace in Saskatchewan has not materialized.

This was the statement made here by M. P. Tullis, Field Crops Commissioner for Saskatchewan, following his return to this city from a 1,000 mile tour of inspection throughout the province.

"While the heavy crop stands and the succulence of the leaves and stems of the grain, together with the unusual amount of moisture in the atmosphere in the month of July, indicated the possibility of heavy rust infection, the rust menace has been practically negligible," said Mr. Tullis.

Canada May Be Honored

Likely To Have Representative In Court Of International Justice

Regina.—Canada may have representation on the bench of the permanent Court of International Justice, in the person of either the Right Hon. Mr. Justice Duff, or of Eugene Lafleur, K.C., of Montreal, according to an announcement made to the Saskatchewan Bar Association by the Hon. N. W. Rowell, K.C., of Toronto. A vacancy has occurred on the bench owing to the resignation of John Bassett Moore, a renowned United States jurist, and the names of the two Canadians were submitted for election. This will occur in about a month's time.

Will Continue Vaccination

Geneva.—The smallpox vaccination commission of the League of Nations has voted that despite the development of occasional cases of sleeping sickness from vaccination there was no reason for discontinuing the practice which it regards as the most powerful weapon against smallpox known to medical science.

DISTINGUISHED VISITOR

Sir Campbell Stuart, of London, Eng., who is in Canada to report on the merger of the Eastern Cable Co. and the Marconi Wireless Co., to the Canadian Government. It is claimed that the merger will save a million dollars to taxpayers of Canada and at the same time free the government of any further liabilities, as well as bringing the world to the doors of the people of Western Canada.

To Aid Prisoners

Toronto Chief Of Police Interested In Movement To Assist Ex-Convicts

Toronto.—If given the co-operation of churches and welfare organizations, General D. C. Draper, chief of police, said he would prevail upon the federal government to assist in a movement to help ex-convicts to establish themselves in society.

Declaring that he had personally met twenty ex-convicts who had told him they were being hindered instead of helped in their endeavor to live down their past and start life again, General Draper said he advocated dominion-wide organization of committees representative of churches and welfare associations to assist men leaving penitentiaries to obtain work and aid them to go straight.

New Seed Cleaning Station

Announcement Made That Plant Will Be Established At Saskatoon

Saskatoon. — Announcement that the government will establish a seed cleaning station here, similar to the one operating at Moose Jaw, was made by Dr. J. H. Grisdale, deputy minister of agriculture, who is on an inspection trip through the West. Several other smaller stations would be established in the province, he said. Dr. Grisdale remarked on the evident prosperity throughout the Dominion, and spoke particularly of progress in the Peace River country. He said he was amazed at the results obtained by the use of phosphates in the treatment of grain at the Scott experimental farm.

Predicts Rapid Mail Service

Airplanes Will Aid Communication Between England and Canada

Montreal.—A rapid mail service by airship between Great Britain and Canada was forecast by W. G. Williams, parliamentary secretary to the British Board of Trade. There were two great airships now under construction in Great Britain, one by the government, the other by Commander Burney, and the latter was likely to have its trials toward the end of the year.

"I should be surprised," Mr. Williams said, "if we do not see the development of rapid mail communications between England and Canada through airships."

Mr. Williams was speaking at the first conference of the delegates of the Empire Parliamentary Association now visiting Canada. The conference was with members of the Montreal Board of Trade, the subject being empire transportation.

Completes Arctic Patrol

Canadian Government Ship Is On Homeward Journey

Ottawa.—The Boethic, the expeditionary ship of the Canadian government, has completed its annual patrol of Canada's Arctic archipelago and is now on its southern journey home to Sydney, N.S., which it is expected will be reached early in September.

This information was conveyed in wireless messages from the ship to the Northwest Territories and Yukon branch of the department of the interior.

George P. Mackenzie, officer in charge of the expedition, reported that there had been an epidemic last winter among the natives living around Frobisher Bay and that there had been 25 deaths, mostly children. With this exception, the health of the natives in Baffin Island has been excellent.

Aftermath Of B.C. Tragedy

Debris Found Near Seattle Thought To Be Part Of Wreck Of Missing 'Plane

Seattle.—Pieces of aeroplane upholstering and several tourist postcards, supposedly from the British Columbia Airways 'plane which disappeared Saturday morning with seven persons, were picked up on the beach several miles southwest of here.

Lt.-Commander L. L. Bennett, directing the coastguard search for the missing 'plane, declared he was satisfied that the fragments of upholstery were from the giant aeroplane. He ordered the search renewed in Port Discovery, where the articles were picked up by George A. Smith, fire warden, and Dr. E. E. Gleason.

With the pieces of upholstery were several fragments of felt used to insulate the body of the 'plane from the engine.

Prince George Crosses Canada

H.R.H. Prince George, K.G., fourth son of the King, photographed aboard the Canadian Pacific liner "Empress of Australia" on his arrival at Quebec. It is anticipated that this unconventional portrait will earn for its subject a repetition of his brother's unofficial title—"The Smiling Prince."

INDUSTRIAL GAINS ARE MADE BY GREAT BRITAIN

Montreal.—Herbert G. Williams, M.P., parliamentary secretary to the British Board of Trade, addressing the Canadian Club here removed some misconceptions about the old land.

"Some people think," he said, "that Great Britain has passed the peak and begun to decline. I am satisfied that this does not represent the truth."

As an instance he pointed out that in export of electrical machinery Great Britain before the war occupied third position with the United States and Germany first. Now Great Britain leads both the United States and Germany.

The number of people at work in Great Britain now was three quarters of a million greater than before the war, or a total expansion greater than that of Canada.

"We have made a total greater progress in the last fourteen years than you have," Mr. Williams said. It was true that Great Britain also had a greater volume of unemployment. That, too, was three quarters of a million greater than in 1914.

"We relieve the burden," Mr. Williams proceeded, "with a system of unemployment insurance which to my profound regret some newspapers describe as a dole. It is no more a form of charity than when you businessmen pay a fire insurance premium and the company pays you insurance if you have a fire."

Mr. Williams urged further development of trade between Great Britain and Canada. Trade between Canada and the United States was dollar for dollar, while Great Britain bought from Canada to the amount of two and one half dollars for every dollar's worth she sold to Canada.

"We would like to get a little of that American trade," he added.

Mr. Williams compared the results of the census of production taken in Great Britain and Canada in 1924, and said that 45 per cent. of the total population of Great Britain worked for a living while 36 per cent. worked for a living in Canada. In other words nine per cent. more people worked for a living in Great Britain than in Canada, with 50 per cent. more women working for a living.

Mr. Williams pointed out how Great Britain had been able to retain her predominance at sea despite efforts made by other countries to capture it. One attempt to capture it had been made by the people of the United States. "So far as I can see," he said, "they regret it."

Will Continue Search

Bergen, Norway.—The Russian ice breaker Krassin, searching for explorers and resucers lost in the fatal Italia expedition, has proceeded to King's Bay where the Russian aviator Chukhnowsky joined the vessel. The ice breaker will continue to Franz Josef Land, where a base will be established.

Riots In Berlin

Berlin.—A group of communist demonstrators, protesting against the proposed construction of a new German battleship, attacked police guards here and were fired upon. Three persons were wounded seriously and a score were hurt in the rioting. Police arrested 20 after the disturbance.

Criticism Is Resented

Ottawa.—Lord Lovat's Winnipeg comment on Canada's immigration policy has caused much indignation among the officials of the Department of Immigration and Colonization. These officials are very sensitive on this question as there has been much criticism of their attitude toward British immigration.

Commissioner Eadie Dead

Winnipeg.—Commissioner William Eadie, of the Salvation Army, is dead at Balmoral, Scotland, according to word received here. For the past two years he had been in charge of the work in Western Canada.

Farmers Take To Flying

A farmer living a few miles north of Moose Jaw has purchased a Moth aeroplane, and it is understood that several others are about to follow his example.

F. H. JACKSON
REAL ESTATE
Listings solicited.
CRESTON, B.C.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Control Dam, Okanagan River, B.C.," will be received until *12 o'clock noon (daylight saving), Tuesday, September 18, 1928*, for the construction of an earthen mound and timber superstructure control dam accross the Okanagan River at Penticton, Yale District, B.C.

Plans and form of contract can be seen and specifications and forms of tender obtained at this Department, at the offices of the District Engineer, 119 Baker Street, Nelson, B.C.; Victoria Builders Exchange, 2509 Prior Street, Victoria, B.C., and the Building and Construction Industries Exchange, 615 West Hastings Street, Vancouver, B.C., also at the Post Office, Penticton, B.C.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to 10 per cent. of the amount of the tender. Bonds of the Dominion of Canada or bonds of the Canadian National Railway Company will also be accepted as security, or bonds and a cheque if required to make up an odd amount.

Note.—Blue prints can be obtained at this Department by depositing an accepted cheque for the sum of $20.00, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order,
S. E. O'BRIEN,
Secretary.

Department of Public Works.
Ottawa, August 18, 1928.

MINERAL ACT

Form F

Certificate of Improvements

NOTICE

Rhomberg Fractional Mineral Claim, situate in the Nelson Mining Division of Kootenay District. Where located: On Fawn Creek, near the Reno Mine.

TAKE NOTICE that I, A. H. Green, acting as agent for W. H. Rhomberg, Free Miner's Certificate No. 14889D, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under Section 85, must be commenced before the issuance of such Certificate of Improvements.

Dated this 19th day of July, 1928.

A. H. GREEN.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions, is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant, unreserved Crown Lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas not exceeding 20 acres may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers [illegible] established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers or travellers, up to ten head.

Plan Ambitious Drainage Project

BONNERS FERRY, Sept. 1—A gigantic plan to totally reclaim 35,000 acres of Kootenai Valley land in Boundary county, together with approximately 40,000 acres of similar land in British Columbia, which has been under consideration for the past year or two, has come to a head and is now affecting the people of Bonners Ferry in more ways than one. Included in the plan is the purchase of the Bonners Ferry municipal power plant on the Moyie river, the enlarging of the plant later to its fullest capacity, and the utilization of power from other streams emptying into the Kootenai Valley for electric energy to pump water and serve the entire adjacent territory with electric current for farm and domestic use.

Howard S. Amon of Seattle, one of the promoters of the plan, appeared before the city council Tuesday night with an engineer's drawing of the proposed system of dikes, river changes and pumping units. Members of the council explained that the sale of the plant involved calling a special election, and also suggested that Mr. Amon take his plan before the Kootenai Valley Reclamation association, composed of drainage commissioners from the various districts, for their approval before the call for the election would be considered.

Mr. Amon met with a number of drainage commissioners here last night, but as all districts of the Valley were not represented, no action was taken on his plan.

According to the plans submitted by Mr. Amon, the entire flow of the Kootenai river would be diverted into an artificial channel along the foothills on the north side of the Valley. The diversion would take place just below Bonners Ferry, and Snow creek, Caribou creek, Deep creek and Myrtle creek would all be run into the new channel, which would be 1500 feet wide, and held in place by means of a broad, high dike with an improved highway along its top. This plan, Mr. Amon said, would positively reclaim every foot of bottom land along the river, both in the United States and Canada, as the new channel would run the full length of the Valley and empty into Kootenai lake at a point below the present outlet of the river.

Mr. Amon did not give any definite figures on the cost of construction of such a change in the river, but intimated that funds would be available from both the United States and Canadian governments. He also said he had capital lined up to take over bonds for reclaiming the districts under the Idaho drainage law. Assessments, he said, would probably be about $60 an acre for the unreclaimed land and $10 an acre for land already reclaimed by the present unit system.

One of the important features of the plan calls for pumping out the old channel of the Kootenai river. The riverbed would first be drained down four feet below the present low water level, and smaller creeks, such as Mission creek and Brush creek, flowing into the valley from the south foothills, would be allowed to flow into the old channel. If the water level in the old channel became too high, pumping would begin. By this means, Mr. Amon explained, the old channel could be kept at any desired level, and in an unusually dry season could be used for surface irrigation or for sub-irrigation.

All who viewed the engineer's plans were struck with the possibilities in such a project. If completed it would, as Mr. Amon explained, make every foot of the Kootenai Valley absolutely safe for all time. The dike plan, he said, would not be similar in any way to the present dikes along the river. The dikes would be built on the plan of the Mississippi levees, which did not break in last year's floods, but were topped. The project here contemplates cooperation of the provincial government in opening the outlet of Kootenai lake to eliminate danger from back water, and a dike or levy sufficient ly high to take care of any possible run off from the head waters of the Kootenai.

PIGS FOR SALE—Young pigs, good stock, ready end of August, $5. A. G. Cox (Alice Siding), Creston.

Printed Butter Wraps at Review Office

BRITISH COLUMBIA

The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $78,174,795; Lode Gold, $130,651,919; Silver, $86,689,046; Lead; $121,850,734; Copper, $221,501,079; Zinc, $59,508,692; Coal, $271,294,668; Structural Material and Miscellaneous Minerals, $53,502,301; making its mineral production to the end of 1927 show an

Aggregate Value of $1,048,837,828

The substantial progress of the Mining Industry of this province is strikingly exhibited in the following figures, which show the value of the production for successive five-year periods: For all years to 1895, inclusive, $94,547,241; for five years, 1896-1900, $57,607,967; for five years, 1901-1905, $96,507,968; for five years, 1906-1910, $125,534,474; for five years, 1911-1915, $142,072,603; for five years, 1916-1920, $189,922,725; for six years, 1921-1926, $281,915,492; for 1927, $60,729,358.

Production Last Ten Years, $453,266,721

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been even prospected; 200,000 square miles of unexplored mineral bearing land are open for prospecting.

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Practically all British Columbia Mineral Properties, upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B.C., Reports covering each of the six Mineral Survey Districts are published separately, and are available on application. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.

Full information together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES,
Victoria, British Columbia.

Our chief business in life is producing and selling good Milk.

Creston Dairy

R. A. COMFORT

Local and Personal

Mrs. M. Johnson of Wisconsin is a visitor at Creston this week, a guest of her sister-in-law, Mrs. C. Fransen.

Adam Robertson left on Sunday for Nelson where he will take fourth year high school work the ensuing term. He was accompanied by his uncle, S. A. Speers.

The 1928 hunting season opened on Saturday, but as only deer can be taken there was no rush to the hills at the weekend, although venison is reported plentiful.

The full staff of teachers was on hand for school opening on Tuesday which was taken up with enrolling an attendance somewhat in excess of last year, the real work of the term commencing on Wednesday.

Trinity United Church Sunday school had the annual picnic on Wednesday afternoon last at the popular second bend of Goat River. The weatner was ideal for such an outing and the attendance was large.

Misses Florence and Mildred McDonald who have spent the summer with their parents, Mr. and Mrs. H. W. McDonald, left at the first of the week to take charge of schools at Purple Springs and Blairmore, Alta.

Mr. Dean of Penticton, who was here for the berry season as assistant inspector to A. McL. Fletcher, returned at the end of the week to take on the same work, replacing W. V. Jackson, who is transferred to the Arrow Lakes.

Mr. and Mrs. Angus (nee Jean Westwood) of Trail, were visitors for a few days at the end of the week with Major and Mrs. Mallandaine, they accompanied Mr. and Mrs. Mallandaine on a trip to Vancouver which was made by auto.

Creston and District Women's Institute September session will be held in Trinity Church basement on Friday afternoon next, 14th, and the meeting will be largely taken up with completing plans for the Kootenay-Boundary conference to be held here early in October.

Mrs. Kernaghan of Blairmore, Alta., and Mrs. Bolton of Kalispel, Montana, were visitors at the fore part of the week with the former's mother, Mrs. P. Bolton. Miss Lizzie Kernaghan, who has spent the past month with her grandmother, returned to Blairmore with them.

Creston is not to miss its 1928 Chautauqua after all. Miss McLean of Innisfail was here at the end of the week and was successful in getting thirty signatures to a guarantee which will assure a four-night Chautauqua some time in November.

Tenders will be received by undersigned up to Saturday, September 15, 1928, for the work of nightwatch (three nights), and also for decorating the interior of the fall fair main building. Lowest or any tender not necessarily accepted. All particulars from F. H. JACKSON, Secretary, Creston Valley Agricultural Association.

Kapel's All-Canadian Shows played to satisfactory business on their two-day stay Friday and Saturday. The old reliable merry-go-round was a great favorite with the youngsters and more than a few adults, and everyone was anxious to have at least one try at the wheels to win a variety of merchandise. The sideshows, however, did not draw the expected crowds.

There was quite a large turnout at the school meeting on Friday night, and after a very thorough discussion the trustees were given authority to spend up to $500 in the purchase of extra school grounds, but on the matter of a new heating plant it was decided to let this stand until the department has sent in their heating expert to investigate the matter. The anticipated cost of the plant is not less than $2000.

There is considerable demand for property on the lower side of the track at present. Recently the old City Bakery building, next the Review office, which had reverted back to the government for non-payment of taxes, has been purchased by Mrs. C. C. French. Mr. Hills has purchased the old (Coppen) blacksmith shop from J. J. Grady, and is using the lumber in the construction of a house on Fourth Street, about opposite McLeod Avenue. Another Grady store building on Fourth Street, lately occupied by the Mormons as a church, has been purchased by Algot Anderson who intends to reconstruct it into a dwelling house.

The Christian Community of Universal Brotherhood was recently found guilty of an infraction of the Marketing Control Act by Magistrate Noble Binns at Trail. Sentence was deferred until Sept. 7th, that the court might have some idea as to the decision of Justice Murphy of the B.C. Supreme Court, who had reserved his decision on the validity of the Act. Since this case was tried Justice Murphy has handed down his decision as to the validity of the Produce Marketing Act, which decision upholds this legislation.

Experiment In Immigration

Farmers Of Western Canada Can Assist By Providing Winter Work For British Miners

An experiment in colonization on a scale never before attempted is now in progress in Canada. Ten thousand men from the mining districts of England, driven almost to desperation by an attempt to maintain themselves and their families upon the dole, have come to Canada to help with the harvest and to start life anew if the opportunity to work after the harvest is in, is afforded them. It is an experiment in which the British and Canadian Governments have co-operated and in which the railway companies and steamship lines are also assisting. And while the need for harvest help has provided the primary reason for making the attempt, the real purpose in view is to settle, once and for all, that much-discussed problem of whether or not the British-born man is any longer a desirable settler for the west.

No one can estimate how far-reaching may be the effect of the success or failure of this experiment. Failure may retard the course of British immigration to Canada for years. Failure may further the belief preached in many quarters in the Old Land, that Canada does not want the British-born. Failure may produce a general reaction which will injure Canadian prestige and Canadian credit. Success, on the other hand, will effectively silence the criticism of Canada's colonization policy. Success will give new hope and fresh endeavor to thousands of Britishers who unquestionably are desirable citizens for Canada but who have been holding back because they believe they are not wanted here, or because they do not believe there exists in Canada the opportunities which are advertised. Success will enhance Canadian prestige in Great Britain and improve Canadian credit.

Speaking in Winnipeg early in August, Mr. Ramsay MacDonald, former Premier of Great Britain, pleaded for a warm welcome for these men. Such a welcome would, he said, prove whether or not Canadians are genuine in their protestations that they are not discriminating against the British-born immigrant. These 10,000 harvesters have now arrived. Their welcome has been a warm one. The provincial governments, the railways and civic authorities have co-operated in making them feel at home. Work was found for all of them as quickly as they reached Winnipeg, and all of them are now drawing wages for the first time in years.

But to welcome them is not sufficient. The harvest cannot continue when winter sets in. Either work has to be found for these 10,000 men during the winter months or they must be sent back to England to spread stories of Canadian ingratitude and the lack of opportunity in this country. All of these men are willing and able to work. They will take any job that will net them sufficient to keep alive during the winter months. In the spring it will be easy to place them on the farms or in other forms of employment. But the winter months will tell the story of success or failure.

In providing work for these men during the winter months the farmers of Western Canada can assist more than any other agency. For the expenditure of a very few dollars during the winter months the farmer will be enabled to employ one or more of these men. It is true many of them will be unskilled. But the wage will be that of unskilled labor and by the time spring rolls around the man will probably have learned enough to prove of considerable value to his employer in the plowing and seeding of the fields.

Such a system does not in the least smack of charity. It is sound business practise. For the investment of a few dollars per month the farmer will have help during the winter and, with the coming of spring he will not have to face the great problem of seeking in a highly competitive market for labor. That which he will pay out during the winter months will be saved by reason of the fact that it will not be necessary for him, in the spring, to engage new help at high wages.

The governments and the railroad companies are spending tens of thousands of dollars to bring this experiment to a successful issue. It is to be hoped that the farmers and other employers of labor will also lend their aid in an issue which is distinctly national in all of its characteristics.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

Time still permitted a visit to Holyrood prior to a reception by the Lord Provost, Sir Alexander Stevenson, at the City Chambers. Holyrood, built in the French style, is still used by the Royal Family. It has been the scene of many stirring events. Cromwell stationed some of his troops there before the Battle of Dunbar, in 1650, but its chief interest to us, as to most people, was its association with Mary Queen of Scots. In Mary's Audience Chamber we saw the little oratory where she used to pray. The bed, chairs and furniture are those believed to have been used by Charles I. The walls of Queen Mary's bedroom are hung with tapestry. The hangings of the bed are of crimson damask with green silk fringes and tassels, but that this was the bed used by Mary is doubted. The most interesting of Queen Mary's apartments is, of course, the little Supper Room, where Rizzio, her private secretary, was set upon by conspirators who dragged him through the bedroom and the Audience Chamber to the head of the principal staircase. There they left his body bearing fifty-six wounds.

The Picture Gallery in the Palace of Holyrood contains the portraits of kings "who," says Scott, "if they ever flourished at all, lived before the invention of painting in oil colours.

During a visit to the Quadrangle our party was photographed as a whole, the first and only time that this had proved possible.

The reception at the City Chambers was necessarily short for we were due to reach Glasgow by six o'clock the same evening, but we shall never forget the cordiality of the welcome we received, or the happy fashion in which the dignity of a cultured city was blended with warmhearted brotherliness. The Lord Provost and the City Councillors in their red robes of office, the lofty rooms and the wonderful pictures depicting the history of the City added to the impressiveness of a happy occasion. Owing to the absence of the Lord Provost in London where he was receiving his knighthood on the following morning we were received by Bailie and Mrs. Hay.

Our earliest scheduled appointment was kept on our first morning in Glasgow when we breakfasted with the officers of the United Co-Operative Baking Society at their plant, where the President, Mr. Alexander Buchanan welcomed us. Our trip through the bakeries was full of interest. In one department we saw the baking of one day's supply of the 400,000 loaves that are baked weekly. In another, wonderful machines, tended by neatly uniformed girls, obviously happy in their work, were turning out biscuits at an extraordinary rate. Over 40,000 tins of biscuits are baked in one week, 32,000 packets of oatcakes, and 6,500 trays and boards of pastries and shortbreads. Over 100 vans are in daily use. The Society is truly co-operative, the very bakeries having been built by the Society's own maintenance staff. The United Co-operative Baking Society serves 228 co-operative societies and its annual output is worth over $6,000,000. The baking plant is the largest in Europe if not in the world.

We next visited the Shieldhall works of the Scottish Co-operative Wholesale Society, which represents the co-operative idea carried into the realm of industry and its application to the purchase, distribution and even manufacture of goods for the benefit of a number of individuals working together in their mutual interest. The Scottish Co-operative Wholesale Society came into existence in 1868 through the federation of retail co-operative societies. Its initial capital was $5,000. Its capital today is $45,000,000, and its annual sales total $80,000,000. The Shieldhall Works through which we passed were devoted to the manufacture of clothing, furniture, boots and shoes. We also visited the printing establishment, where we saw the latest type of two-colour printing machine which prints in two colours in one operation.

Forty-eight factories are operated by this great Society, and it was especially interesting to us to learn that it possesses 2,140 acres of farm lands. As is well known the Society maintains an office in Winnipeg and elevators in Western Canada and it was our pleasure to meet the Canadian Manager of the Company, Mr. John Fisher, in the Shieldhall Dining Room, where we were entertained to a delightful luncheon under the cordial presidency of Mr. R. Stewart, chairman of the Society.

A full day was completed by a meeting with the representatives of the wholesale fruit, provision, grain and flour trades in Glasgow. Once more we were treated to the outspoken, business-like talk which we had come to expect when dealing with leading business figures during our tour. This particular session was perhaps the most productive of any that we had attended.

Our next day's programme had been anticipated with more than ordinary interest, for we were to visit the world's leading Clydesdale stud, probably the two most famous Ayrshire herds in existence and the wonderful Doonholm herd of Aberdeen-Angus catttle; and in addition, Burns' cottage and the Brig o' Doon.

First we went to Craigie Mains, Kilmarnock, where Mr. James Kilpatrick, famed not only as great breeder of Cydesdales but as host, showed us the finest horses in his stud. surely never were nobler specimens of the Clydesdale breed ever brought together. As one beautiful animal was succeeded by another, we became lost in admiration for the truly aristocratic breeding and the high individual merit shown by the stud. Such horses as "Craigie Excellence," Cawdor Cup, and Brydon shield winner, and six times first at the Scottish Stallion Show; "Craigie Ambition," first and reserve at the Royal, Highland, and Scottish Stallion Sshow; "Craigie Exquisite," first and Cawdor Cup, Scottish Stallion Show; "Craigie Winalot," probably the best colt in the stud, and many others were seen, including several from Mr. Kilpatrick's great breeding sire, "Craigie McQuaid," whose progeny stands so high in Scottish show rings today.

But a few hundred yards from the Kilpatrick home, where we were most hospitably entertained, are the ruins of an ancient castle, the stronghold of an uncle of the great William Wallace. Close by a monument marks a spot called Burnweel, from which tradition says Wallace looked back to watch the burning of the barns in which he had barred English soldiers after a number of his followers had been treacherously slaughtered. Standing at this spot Wallace said "The barns of Ayr burn weel." Hence the persistence of the name, Burnweel.

PAUL IN ATHENS AND CORINTH

Golden Text: "For I determined not to know anything among you, save Jesus Christ, and Him crucified."—1 Corinthians 2.2.

Lesson: Acts 17.6-18.17; 1 Corinthians 2.1-16; 1 Timothy 2.3-7.

Devotional Reading: Psalm 110.0-16.

Explanations and Comments

Paul At Athens, verse 1.—After leaving Berœa, Paul went on to Athens, as we learned last week. There he reasoned in the synagogue with the Jews and preached in the market-place to all who would listen. Athens had a famous university and was the headquarters of the various philosophical schools; among them Luke mentions the Stoics and Epicureans; certain of whom encountered him and said, "What would this babbler say?" and others of whom said, "He seemeth to be a setter forth of strange gods," because he preached Jesus and the resurrection. Parenthetically Luke observes, "Now all the Athenians and the strangers sojourning there spent their time in nothing else, but either to tell or to hear some new thing." Thus Luke explains the fact that Paul was taken to the Areopagus and asked to tell there what his new teaching was.

Paul addressed the waiting crowd. He referred to an inscription which he had seen on one of their altars — "To an Unknown God"—and said that the one whom they worshipped in ignorance he declared unto them. God who made the world does not need to dwell in temples, nor does He need anything, for He Himself is the source of all life and of all things. He made all nations brothers, he would have them all seek and find Him, but He is not far from everyone, for in Him each one lives. Being God's children, we ought not to think that our Father is like any image made by man. Their ignorance God had overlooked in the past, but now He calls them to change their views, for there will come a day when God will judge the world by One whom he has appointed, whom he has raised from the dead.

At the reference to the resurrection some of Paul's hearers mocked; others said that they would hear him again some time; and thus he was dismissed. Among those who believed his message were Dionysius, the Areopagite, and a woman named Damaris, but the shallow intellectualism and religious superstition of the people of Athens did not offer a promising soil for the Word, and Paul left Athens for Corinth.

Preaching To the Jews At Corinth, verses 4-6.—As usual, Paul addressed himself first to the Jews, and in the synagogue every Sabbath he persuaded, or, as the marginal rendering is, sought to persuade, Jews and Greeks to accept his message concerning the Saviour.

Silas and Timothy, you remember, had remained at Beroea, and when Paul reached Athens he sent for them to "come to him with all speed" (Acts 17.14-16). They joined him at Corinth, and on their arrival Paul was able to give more time to preaching, since they brought money with them (2 Cor. 11.5; Phil. 4.15) and there was less need for his toiling at tent-making. Accordingly, he "was constrained by the word," the word had him in its grip, he yielded to the urge within him, and proclaimed more zealously than ever that Jesus is the Christ.

NURSES know, and doctors have declared there's *nothing* quite like Aspirin to relieve all sorts of aches and pains, but be sure it *is* Aspirin the name Bayer should be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trade mark.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Our cynic says: All that stands between most men and the top of the ladder is the ladder.

SUMMER COMPLAINT
Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes:—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years, put up only by The T. Milburn Co., Limited, Toronto, Ont.

CONCLUSION

At Arthur Warner's bungalow the flowers were blooming. Hollyhocks stood straight and tall against the house, with their quaint, old-fashioned rosettes in prim rows on the stalks, crimson and cream and white. Arthur had planted them, but had not seen the bloom. The walk from the house, was bordered with round clumps of dwarf nasturtiums, orange and red, alternating with mounds of sweet alyssum and candytuft, white as snow, and at their feet in a straight line, marking the edge of the gravel path, ran a line of ground lobelia as blue as the skies above.

On one side of the walk stood a rockery of stones from the river, which Helmi had whitewashed, and from which now grew trailing nasturtiums, in all the shades from creamy pink to scarlet and crimson, peeping out from their glossy green leaves. On the other side was a rustic bench made gay with cushions, where one could sit and think and dream, watching the changing lights upon the mountains.

Here sat Helmi, thinking and dreaming, this Saturday afternoon in late August. Her family had all gone to Eagle Mines—Rosie and Danny Corbett who were spending the holidays with her; old Sim and young Lili, the latter now an enquiring young lady of two and a half years. The teacher, too, who boarded at the bungalow had gone with them.

Twice a week Helmi sent to town a load of vegetables and fresh fish from the English River, and steadily her savings in the bank were increasing. It seemed a long time since she had climbed into the old buckboard, with Lili on her knee, Cleo close beside her, and the pups in a box behind, and canvassed the neighborhood to see where she could get a cow "on terms to suit purchaser." She had been successful in her quest, and brought the cow home with her; the terms being that she do the weekly washing for the numerous and increasing Peterson family, three miles away.

Helmi thought of her neighbors now with real affection. They had all befriended her, and she was glad that Arthur Warner had learned to know them better. Helmi ha dtold them quite frankly all she knew of him, and when his letters came she made no secret of them. When she made the suggestion that weekly meetings should be held at his house, where knitting and sewing could be done for the soldiers, the women gladly came, and a new spirit of friendliness came to the settlement. Every week a letter was written to him, and parcels sent, and so it came about that, though thousands of miles intervened, Arthur Warner had come to know his neighbors and they him.

No letters had come from Arthur now for several months and Helmi feared that the shadow she had seen upon his face the day she said goodbye to him, had fallen. In her dreams she had seen a luminous figure, all in white, that had walked over to Arthur and tapped him on shoulder; and he nodded his willingness and went away, and the same night Cleo had fretted and cried all night and would not be comforted.

But the boxes went every week, for Helmi and the women knew that some poor soldier would be happier for them.

Of Jack she had not had a word, and in the midst of all her happiness and achievement there was the one sore thought which sometimes required all Helmi's faith to drive away. Jack's face, so sad and drawn, drifting away from her on the slowly moving train, fell across her happiest hours. But Helmi had not forgotten the experience she had the night of the storm, when her soul was lifted high above the mists of earth.

The hearts of the women were knitted to Helmi's because she had a way of comforting them in their troubles. There was strength in the touch of her hand, and healing in her presence.

"Look what she's done for me," old Sim would often say, "when I got crippled for good and couldn't do my work in the mine any more. 'Come to me, Sim,' she said; I am all alone except for little Lili and the dogs, and I need you Sim,' she says, 'for company'—makin' out I would be doin' her a favor. Look what a home she has given me."

It was Helmi, too, who discovered the seam of coal a little farther up the river, shining and hard, that burned with a blue flame and gave off more heat and burned longer than any other coal she had ever seen; and it was like her to tell all the neighbors about it and urge them to come and get all they wanted for their winter fires.

The peace which comes to those who work hard and have a clear conscience was Helmi's that afternoon as she listened to the waterfall behind the house, and through her dreaming came the happy consciousness that her family would soon be home hungry from town and she would need to go into the house and get supper ready.

The valley before her was beginning to show the purpling tints of evening as the sun wheeled its way over the mountains. A car came quickly around the turn of the hill, its wheels making no sound in the dusty road. . . . He was half way to the house before Helmi saw who it was. . . .

That night, after the others had gone to bed, Jack and Helmi sat long before the fire. Little Lili in her pretty, white nightdress was fast asleep in her father's arms.

"Let me lay her down, Jack," said Helmi. But Jack could not part with her. "Remember I am two years and a half behind," he said. Helmi bent over him as she tucked the shawl around the little girl. "You won't leave us again, Jack, will you—not even for gold to the Nehanni?"

"Gold from Nehanni!" Jack repeated after her. "I should say not! What do I need of Nehanni gold?" Then drawing Helmi's face to his he said tenderly, "I got my gold from Finland."

Eight years have gone by. The Warner mine is one of the best in the Province, for the coal is a high-grade anthracite. Unlike most mine owners, the Dorans have not moved to the city, but have a large gray stucco house, with a red roof and many windows, on the bank of English River. Behind the house is a large grassy playground, enclosed by a high board fence, where a happy group of children and collie dogs may be seen at play. There is one old dog that walks stiffly, but is plainly the best loved of all.

Below the falls stands a green and white bath-house, into which the water is piped from the stream. It is called the "Finnish Bath-House," because there is in it a room for steam baths where the steam is formed by water falling on heated stones.

There is a recreation ground across the road, and a white church on the hillside. In the basement of the church there is a well appointed dining-room, where the boys and girls' clubs often meet for supper parties.

The bungalow is a club-house for the miners and their wives, and on the lawn there is a simple white stone with an inscription which reads:—

"Sacred to the Memory
of
ARTHUR WARNER,
who made the first settlement in this valley, and who loved its solitude and beauty.
In 1914
he answered the call of his country;
On January 25th, 1917
while escaping from a German prison camp, he deliberately gave his own life to purchase freedom for his companion, who now erects this stone in the hope that as long as grass grows in the valley, and water runs in the English River, the memory of ARTHUR WARNER may not fade.

THE END

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—MRS. MILTON McMULLEN, Vanessa, Ontario.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

"But now abideth faith, hope, love, these three; and the greatest of these is love."—1 Cor. xiii. 13 (R.V.)

More faith, dear Lord, more faith!
Take all these doubts away;
Oh let the simple words "He saith"
Confirm my faith each day.

More hope, dear Lord, more hope!
To conquer timid fear,
To cheer life's path as on I grope
Till Heaven's own light appear.

More love, dear Lord, more love!
Such as on earth was Thine,—
All graces and all gifts above,
Unselfish love be mine.
—Elizabeth C. Kinney.

Hope is the mainspring of human action; Faith seals our lease of immortality; and Charity and Love give the passport to the soul's true and lasting happiness.—Street.

The Porcupine Gold Area

The Porcupine gold area in the District of Cochrane, northern Ontario, occupies first rank among the gold producing areas in Canada.

Minard's Liniment for Every Pain.

British Industries Fair

To Be Held At Birmingham, England, February 18 to March 31, 1929

The attention of Canadian Manufacturers is directed to the British Industries Fair, Birmingham, Eng., 1929, where the Canadian Government has contracted for 2,800 square feet of space. It is hoped that Canadian manufactures will be well represented at this forthcoming fair, and with a view to furnishing detailed information, advance circulars are being forwarded both to the Canadian Manufacturers' Association, Toronto and the Department of Trade and Commerce, Ottawa.

The tenth fair will be held from February 18 to March 31, 1929, in the permanent and considerably enlarged exhibition building at Castle Bromwich, which with a total floor space of 400,000 square feet forms the largest exhibition hall in the United Kingdom. The venue of the fair is the centre of a great industrial area and is most conveniently situated for displaying general manufactured goods.

In connection with above, the Canadian Pacific Railway offers prospective exhibitors and buyers ten convenient sailings from Canada's national winter port, Saint John, N.B. Dates of sailing as follows:

Feb. 1, S.S. Minnedosa, Liverpool via Glasgow; Feb. 8, S.S. Metagama, Liverpool via Glasgow and Belfast; Feb. 15, S.S. Montroyal, Liverpool via Glasgow; Feb. 21, S.S. Melita, Southampton via Cherbourg; Feb. 22, S.S. Montrose, Liverpool via Belfast and Glasgow; Mar. 1, S.S. Minnedosa, Liverpool via Glasgow; Mar. 8, S.S. Montclare, Liverpool via Belfast and Glasgow; Mar. 14, S.S. Duchess of Bedford, Liverpool; Mar. 14, S.S. Metagama, Southampton via Cherbourg; Mar. 15, S.S. Montroyal, Liverpool via Glasgow.

Excellent accommodation is available on all these cabin class ships at winter rates, which are considerably lower than during the heavy season.

Attractive rail fares are available from all points in connection with ocean passage.

The Canadian Pacific Railway Co. will be glad to arrange accommodation for those planning to attend the Birmingham Fair. Requests through any C.P.R. agent will receive courteous and prompt attention.

New Serial Story

Commencing with next issue we will offer our readers a new serial story: "The Crimson West," by Alex. Philip. As might be imagined, the story deals with life in Western Canada, the plot being laid in British Columbia. It is full of life and action, and should have a particular appeal to the lovers of out-doors and to Western Canada readers generally. The story is dedicated by the author "To those fortunates who first saw the light of day in this glorious country and with whom rests the future prosperity of the land of their birth—the native sons of Canada." Do not miss the opening chapters appearing next week.

Growth Of Tree-Planting

In connection with the distribution of trees to prairie farmers in Canada which is made annually by the Tree Planting Division of the Forest Service, Department of the Interior, it is interesting to note that each spring nearly 8,000,000 young trees are sent out; shipment of these trees require 2½ carloads of moss and nearly 10 miles of 45-inch burlap. Before many years are gone, the "Treeless Prairie" will be a thing of the past.

So far nobody has climbed the Matterhorn on roller skates or ridden up Niagara Falls on a bicycle, but it would look as if about everything else had been tried.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE BICUSPIDS

"Count them"—two in line back of each cuspid, making eight all told.

"Bi-two-cuspid"—tooth with one point, or "cusp"—so this, then, is a two cuspid tooth.

(You have doubtless observed, however, that the inner cusps of the lower tooth is but durimenary—a modified form of the original full cusp)—Then, they are also called pre-molars—again our Latin—"pre," meaning "before"—you see why?

This tooth erupts generally from the tenth to the twelfth years, and though chiefly utilitarian, yet it serves a cosmetic function as well,—to prove this save up your best joke and tell it to your neighbor—then slyly observe the open space marking a missing bi-cuspid which you had probably not noticed before.

To paraphrase: "Loud laugh betrays the vacant space."

Now, there is a danger peculiar to the upper bicuspid which is this. This tooth lies in a position just below the "antrum," or air sinus that is situated in the large facial bone, the upper maxillary, and frequently just a thin shell of bone forming the floor of the antrum, separates the latter from the end of the root or roots.

Should, then, decay proceed so far in this tooth as to infect the pulp, causing it to die, with a resultant abscess—it occasionally happens that pus will burrow into the antrum, infecting it and with dire consequences—generally necessitating an operation at the hands of the surgeon.

Tell your dentist that you want your teeth kept well, not just made well. The responsibility is then his.

Canadian Butter Consumption

The per capita consumption of butter in Canada in 1926 has been estimated at nearly 28½ pounds and the consumption of cheese slightly over 4 pounds.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

Local and Personal

Percy Robinson was a holiday visitor at Spokane last week.

FOR SALE—1920 Ford runabout, in good shape. Harry Smith, Creston.

Miss Kathleen Boulton of New York is a guest of Miss Louise Bevan this week.

Mrs. Newby of Glenwoodville, Alta., is a visitor with her daughter, Mrs. O. D. Bliss.

Miss Alice Embree has returned to Wardner after a few days visit at her home here.

Miss Croy of Nelson is enjoying a holiday visit at Creston, a guest of Mrs. Spratt.

The Board of Trade meets in September session on Tuesday night at the town hall.

Mrs. W. Hare, sr., of Kimberley, is a visitor this week at the home of her son, C. H. Hare.

Charlie Moore, jr., left at the end of the week on a holiday visit with relatives at Kaslo.

Charlie Leamy was here from Wycliffe for the weekend, a guest of his father, L. N. Leamy.

PIGS FOR SALE—Young pigs, ready August 30, $5 each. R. Stewart, (Alice Siding), Creston.

Alex. Henderson arrived home from Spokane on Tuesday, where he had been on a short vacation.

Saturday, November 24th, is the date named by Christ Church Ladies' Guild for their 1928 bazaar.

FOR RENT—Five room house on ranch next Robt. Starks. Apply A. Anderson, Victoria Avenue.

Miss Harvey of Nakusp spent a few days in Creston last week a guest of her cousin, Mrs. Stanley Hendren.

The Ladies' Guild of Christ Church will serve afternoon tea, hot dogs, etc., at the fall fair, September 26th.

ESTRAY—Roan bull calf. $5 reward for information leading to recovery of the animal. E. Nouguier, Canyon.

HORSE FOR LOAN—For his keep I will loan good work horse to reliable party for two months. W. V. Jackson.

FOR SALE—Honey, 16 cents a pound, bring your own containers. Mrs. F. Bunt, (former Gobbett Ranch) Creston.

Mr. and Mrs. J. W. Hamilton and Miss Margeory Hamilton spent the Labor Day weekend with friends in Nelson.

Mrs. Forbes and daughter, Pat, who have been summering at Vancouver the past two months, arrived home on Thursday last.

FOR SALE—Secondhand Singer sewing machine, treadle. Also one washing machine. Mrs. J. W. Hamilton, Box 87, Creston.

Mrs. J. H. Doyle and granddaughter Corrine Donneau were guests of Miss A. Doyle a few days at the end of the week, en route to Nelson.

At the meeting of the East Kootenay Medical Association at Cranbrook last week Dr. Henderson was re-elected vice-president for 1928-29.

FOR EXCHANGE—Ford touring car in good shape in exchange for young Jersey cow fresh or coming fresh soon. Apply P.O. Box 512, Kaslo, B.C.

Mrs. Moul, Miss Parkinson and John Moul of Vancouver were weekend auto visitors with the former's daughter, Mrs. Stanley Hendren.

Mrs. Rice of Pasadena, Calif., and Mrs. Roger of Bakersfield, Calif., are here this month on a visit with their parents, Mr. and Mrs. Andrew Johnson.

Miss Marguerite Crawford left on Friday for DeWinton, Alberta, where she will again be in charge of the public school at that point for another year.

Starting in October the Ladies' Guild of Christ Church plan to hold a series of fortdightly bridge drives. Full particulars will be announced later.

Miss Eva Holmes returned to Taber, Alberta, at the first of the week, where she will again be in charge of the primary room of the Taber public school.

FOR SALE—Work horse, weighs about 1700; milch cow, giving 12 quarts daily; also 18 Leghorn hens, one year old. Carl Staff, (Arrow Creek), Erickson P.O.

Mrs. Elmer Thompson and sons of Wardner, who have been guests of the former's mother, Mrs. Repsomer, for some weeks, have returned to Wardner.

C. Elstone of Haliburton, Ontario, has just arrived to look after the ranch of his late uncle, John Elstone, who died in Cranbrook hospital a few weeks ago.

Miss Marion Swanson, a former resident of Creston, who last year obtained her B.A. at the B.C. University, is on the teaching staff of Kimberley school this year.

LOST—Around Creston or between Creston and Sirdar, gold watch with chain and knife, initials C H, made by Gowland Bros., London. Leave at Review Office. Reward.

The village council meets in September session on Monday night. By that time there should be something definite as to the prospective 24-hour electric light and power service.

C. H. Robinson of Nelson, Kootenay fishery inspector, was here at the end of the week, making arrangements for the catch of a supply of bass to be shown at the Nelson fair later in the month.

Mr. and Mrs Lindquist arrived at the first of the week from Kimberley, and are occupying the McCreath residence on the lower side of the track, which they purchased last month.

The Rod and Gun Club had a turn out of about 85 couples at their Labor Day evening dance at the Grand Theatre ballroom, for which the music was by Mrs. Lister's orchestra, assisted by V. Hild, banjo.

John Patterson of Cranbrook, a buyer for Burns & Company, was here last week and made the purchase of two carloads of livestock, accounting for about 55 head, which was shipped to the divisional city.

UNITED CHURCH

REV. R. E. CRIBB, B.A., Minister.

WYNNDEL—11 a.m.
CANYON—2.30 p.m.
CRESTON—7.30 p.m.

Grand Theatre — Sat., Sept. 8

COME—let Dr. Bebe show you what to do for that thumping of the heart. Her prescription is a sure cure for that down in the mouth, grouchy feeling. Laugh and live longer.

ELECTRIC LIGHT!

Why wait till September 1st for your Lights or Power?
Why gamble when you can get a sure thing?
We can give you Light and Power now. A good, steady, bright light—and as cheaply as anybody, and all the year round.
Winter will soon be here. Why not prepare for the long winter nights now. Let us take care of your wants.

House Wiring. Power Installations. Fixtures of all kinds at the right price.
