THE CRESTON REVIEW

VOL. XXV. CRESTON, B. C., FRIDAY, MARCH 1, 1935 No. 44

Officials Discuss Game and Fish

Inspectors Kearns and Robinson Tell of Kootenay Game ond Fish at Open Meeting Creston Rod and Gun Club.

Much useful information regarding big game, game birds and fish regulations for efficient conservation in the Kootenays was presented in very practical fashion at the open meeting of Creston Valley Rod and Gun Club in the United Church hall on Monday night. The meeting was splendidly attended, and the speakers, Game inspector Kearns of Nelson, and C. H. Robinson, fishery inspector, were very much at home in discussing game and fish respectively, while Col. Mallandaine very capably presided..

Col. Mallandaine spoke briefly in opening proceedings giving a sketch of the club's activities since its organization in 1926. He referred to game as B.C.'s heritage and worthy of every effort to see that it is effectively safeguarded He defended the pheasants as being a friend rather than an enemy of the local agriculturists, advocated the tightening up of the regulations to curtail the slaughter some of the Spokane sportsmen indulge in with game birds in this section and pointed out with the extensive dyking operations now under way there is bound to be a greater scarcity of wild fowl. The chairman was applauded in his references to the efficiency and fairness of the local game guardian, W. H. Cartwright, in enforcing the game laws in this district

Inspector Kearns covered considerable ground in his talk, concurring in the hairman's remarks that game was a heritage, and sketched game conservation efforts that had been effective from the world's earliest days. B.C. game laws were fair. In this province the usual fine for an infraction of the regulations was $25; in Washington the minimum penalty was $250.

He dealt quite extensively with the pheasant, stating that the birds were being bought at $5.35, mostly from U.S. game farms. He expected licenses for 1935 would cost less than last season He referred to recent investigations on the habits of ducks which demonstrated that these birds did not confine their flights to north and south, but were just as liable to travel east and west. He did not favor bounties, and with coyote skins worth from $5 to $8 he was opposed to any bounty on these animals. He displayed full knowledge of the habits of hawks, owls, crows, and rabbits, as well as the diseases to which th y are subject.

Mr. Robinson confined his remarks largely to matters of local interest. He made it quite clear he still considered the bass a doubtfull asset, and there was little hope of a daily catch being enforced on these fish. Bass were back again in Kootenay lake as far as Crawford Bay and their liking for lake trout was anything but encouraging for the latter variety.

Eastern brook trout were not native to Goat River and before stocking w'th these fish he proposed making a careful survey of the stream. He was well pleased with the better fishing in Meadow, Corn and Summit Creeks as a result of restocking Kid Creek would also be investigated before further supplies were deposited.

He defended the protection that had been given the kokanee, or red fish These were the favorite feed for Kootenay Lake trout and to keep up the fishing standard of the lake it was absolutely necessary to have the kokanee in generous supply. Still further investigation would be made before any pronouncement might be expected on the extermination of squaw fish. He also observed that the sucker was not the menace to other varieties that many supposed. No protection would be given the Rocky Mountain whitefish. A liberal winter take of them was in the best interests of the trout in the streams the whitefish frequent.

Both Mr. Kearns and Mr. Robinson spoke highly of the services the club rendered in its recommendations from time to time both as to game and fish, and assured that it was on the strength of such recommendations from clubs all over B.C. that the regulations were framed from year to year. A vote of thanks tendered the speakers at the close of proceedings was carried with enthusiasm.

Hospital Sweepstakes

DANCE

Under the direction of Creston Hospital Women's Auxiliary

Park Pavilion
CRESTON

FRI., MAR. 1st

Dancing at NINE p.m.

TWO ORCHESTRAS

Serenaders and Melody Five

Drawing for $750 Cash (or Land) Prize,

Admission: . 50c.

Supper included.

Wynndel

Mr. and Mrs. Lansoff and family have left to reside in Porto Rico.

R Glasier was a visitor last week with his sister and brother-in-law, Mr. and Mrs. N. Rollic, at Blake.

A number of school friends of Olivie Uri paid her a surprise visit Wednesday last, the occasion being her fourteenth birthday.

Mrs. McDonald of Toronto, daughter of the late Alex. Cameron, was here last week, in connection with deceased's property at Wynndel.

Mrs. G. W. Taylor left last week for Cranbrook where she underwent an operation at St. Eugene Hospital and is recovering nicely. Mr. Taylor accompanied her.

Misses Mary Abbott and Agnes Crane were Kimberl y visitors on Saturday, playing on the Creston basketball team in the return game with the Kimberley quintette.

Mrs) R. Uri was hostess at an enjo - able shower at her home Saturday afternoon. The guests included Mrs. H. A. Bathie, Mrs. Hess, Mrs. Cameron, Mrs. Martell, Mrs. L. A. Davis, Misses Dubar, Ellen Uri, Oline Uri and Margaret Bathie.

Creston Reclamation Company dyking work is going along at top speed at the Wynndel end where the two draglines and the two scrapers are putting up the balance of the north dyke, and should have the whole work completed by the middle of March from present appearances.

A provision shower for a needy family was held at the United Church on Monday, and was well attended. A splendid lot of canned goods and provisions were donated A bird contest was won by Miss D. Butterfield, and a memory contest won by Miss Bellinger. Tea was served and a most enjoyable time socially is reported.

Three basketball teams from Creston helped entertain the K.K Klub meeting on Wednesday last. Pharmacy play'd a pickup team made up of Creston girls, the former lost by three points Creston Dynamiters and a pickup men's team from Wynndel played a tie game, 21 all There was a lunch after basketball and then a short dance to Ness-Goplin music.

Reception for President

There was a good turnout Thursday night for the meeting of the Women's Auxiliary to Creston Past Canadian Legion, at which a reception was tendered Mrs McDonald, provincial president, who paid Creston an official visit that evening. A feature of the evening was a talk by Mrs. McDonald on the work done by the Legion auxiliaries. 56 auxiliaries are organized in British Columbia. Junior auxiliaries have been organized, the girls sewing clothes for needy veterans' children and dressing dolls for Christmas hampers. They also assist with the sale of p ppies. Mrs. McDonald spoke of the convention at Portland, Oregon, mentioning the fine comradic spirit existing between the American and Canadian Legion, and the splendid welcome extended Canadians attending the convention. The question of drill teams and forms of ritual were discussed, the former not being favorably considered by Canadian Legions. A certain form of ritual is endorsed by the Legion to give that feeling of service dedication to the auxiliaries. She also spoke on the Vimy pilgramge, which will take place the latter part of Jun , 1936, the main purpose being to have ex-members of the Canadian Expeditionary Forces and their relatives present at the unveiling of the Canadian memorial at Vimy. Transportation and accommodation will be available at very attractive rates. In closing her talk she stressed the point that a delegate be sent to the next convention to be held at Kamloops. Mrs. K. Knott moved a vote of thanks which carried enthusiastically. At the close refreshments were served.

Wynndel Institute Plans Fall Fair

Make Additions to List Awards —Suggest September 18th or 25th as Date—Recommendations for Flower Show.

The February meeting of Wynndel Women's Institute was held at the United Church on Thursday afternoon last, with 24 members and three visitors present. Minutes of January meeting and treasurer's report were read and adopted

A report from the sick visiting committee was given telling of visits made and letters written. The child welfare committee head reported having replenished the first aid kit in the school. Suggested dates for fall fair are September 18th or 25th, with postoffice booth to be a feature.

Mrs Hackett to make a wool comforter to be raffled at the fair. Two new prizes were added to the work list. These are any other kind of rug and three buttonholes worked in cotton, by lady over 60 years.

Arrangements made for birthday party on March 29th, bridge and musical numbers to be a feature, also oldtime and modern dancing. Mrs. Wall and Mrs. Clarke are convenors for the bridge. Mrs. Hulme and Mrs. Eakin, jr., musical convenors. Mrs. M. Hagen will be in charge of refreshments. Mrs. Hackett is making the birthday cake.

Resolution from Creston Women's Institute regarding the handling of unemployment relief was discussed at length and was given endorsation. Provision shower for a needy family was arranged for February 24th, at the United Church.

Hospital committee reported the quilt completed and sent to the hospital at Creston. Rocki g horse will be drawn for at birthday party. A Paper written by W. Cooper on "How to Grow Gladioli," and some ideas and an outline for the proposed flower show were read by the secretary, and a vote of appreciation was accorded Mr. Cooper.

A vote of thanks was also accorded Mrs. M. Hagen, for the use of her house on two occasions for bridge parties. Lucky number on the cake contest was held by Mrs. W. Cooper. Tea hostesses were Mrs. J. G. Abbott Mrs. Grieg, Mrs. Davidge and Mrs. Eakin, sr.

Sirdar

Stan Hendren of Creston was a visitor here, Thursday.

Gus Rachow of Kootenay Landing spent Sunday visiting friends at Wynndel.

Mrs L. Miller of Kuskanook was a visitor to Creston between stages Thursday.

The water as indicated by guage at Slough bridge reads 1.60, a fall of 0.25 for the week.

A. Palmer and Engineer Moore were here on Thursday fixing the grades on the highway.

Miss Annie Pascuzzo was a visitor at Yahk this week, the guest of Mr. and Mrs. McCarthy.

Constables Hassard and Cartmel of Creston were business visitors to Sirdar on Saturday afternoon.

Dr. Henderson of Creston made a professional call here on Monday, and proceeded up the lake side

Hans Hage of Kuskanook was a visitor on Thursday, and is almost recovered from his recent injury to his ribs.

Steve Malahoff was a business visitor to Nelson for a few days at the first of the week, making the trip by train.

Tom Dunseath of Wynndel was a visitor to Athara at the first of the week, and went to Boswell in the afternoon.

W. S. Harris of Penticton was a business visitor to Tye this week in the interest of the Bayonne Mining Company.

Dick Bevan, in charge of the kitchen at the road camp, spent a few hours at his home in Creston, Wednesday evening.

J. P McDonald of the forestry department, Creston, was here on business in connection with his department, Tuesday.

Frank Hamilton and Dominic Pascuzzo were at Wynndel attending the Kill Kare Klub meeting Wednesday evening.

E. W. McLeod of the Canadian Smelters Mining Company of Sanca, was a business visitor to Nelson for a few days this week.

Another truck has been added to the equipment recently in use on the new highway. This is in charge of Dolf Weir of Creston.

Howard Slingsby and Chas Wilson were at Creston to see the basketball games between the Kimberley and Creston Intermediate teams.

Donald Young, who drives one of the trucks on the highway here, was at Creston on Friday attending the funeral of his grandfather, the late John Arrowsmith.

Harbingers of spring have arrived here in the form of several large flocks of geese. These are to be seen feeding at the north end of Duck Lake in the vicinity of the steel span.

A bee to carry out structural repairs to the Community Hall was held at the weekend. The turnout of helpers was gratifying and considerable of the work to be done was effected.

For the first time traffic was routed over the new highway on Friday evening. The westbound Greyhound stage was the first to make the trip. The road is now graded to width between the east end of the detour to the large rock bluff, and from the Quarry siding on the other end to the west side of the bluff; the intervening space of the rock cut still to be removed being occupied by the bluff for a distance of about 100 feet. No gravelling has been done and much work remains to do, and it should be noted that the highway will be used only as and when blasting operations will permit. A rock wall is being built at the siding where the road juts onto it.

Operations on the Lakeview mine, near Sanca, have now reached the stage where ore is being hoisted from the old shaft workings. A recent crosscut eastward, exposed six leads in eighteen feet, before the banging wall was finally encountered. The leads vary in width from ten inches to two feet. The ore content is silver, gold, lead and zinc. An average sample taken assayed $59 68. Previous to this recent crosscut drifting for 122 feet had been done on a sheer cut by the main tunnel on the hundred feet level. From this a raise of 84 feet was made to the old shaft workings, and at the 60 feet depth two veins of high grade manganese and sphalerite ore had been cut and followed for some distance. Some New York engineers, who have lately inspected the mine, on behalf of an eastern firm, have given the property a splendid report and state that the Lakeview mine will undoubtedly become one of the big producers of the district. The Lakeview has the advantage of being on the government highway and only a few miles from the Quarry siding at Athara on the C.P.R

Engagement Announced

Mr. and Mrs. Robert Heap, announce the engagement of their only daughter, Dorothy Eileen, to Mr Horold W. Haynes, youngest son of Mr. and Mrs. Philip Haynes of Spokane, Wash., the marriage to take place at Easter.

Lister

Miss Margaret Wise of Kootenai, Idaho, arrived last week on a visit with her sister, Mrs. Frank Hollaus.

Miss Webster was a weekend visitor at Huscroft at the home of Mr. and Mrs. W. Demchuk, a guest of Miss Vic. Robinson.

Anglican Church worship is announced for 11 a.m., Sunday, at the schoolhouse, with the Sunday school due to convene at 10 o'clock.

There is an unusually fine lot of colds and some stomach flu in evidence at Lister-Huscroft, and the school attendance is rather light in consequence.

Elmer Huscroft has been busy with his truck hauling out a supply of lumber for use by Creston Reclamation Company, Limited, at dyking work at the Goat River diversion.

Chas. and John Huscroft, who are working at the mine at Tochty, were home at the weekend, for the funeral on Friday, at Creston, of their brother-in-law, the late John Arrowsmith.

Jim Helme, who has been working at Greenwood for the past several months, arrived last week on a visit with his brother, Harry. The mine in which he was employed has closed down temporarily.

The Deer Lodge Club skating party arranged for last Friday night had to be changed to a dance at the home of Mrs. M. Ross, due the mild weather that set in on Friday. The weiners, however, were not overlooked, and had a place in the lunch menu. The next club attraction will be a military whist.

The Community Society had five tables of players in action at the court whist on Saturday night at the schoolhouse, which was in charge of Mr. and Mrs. Fred Powers. The high score prizes were made by Miss Jane Ross and Frank Dodgson. An appreciated feature was the ten minute talk on "Stars and Telescopes," by the club president, Frank Baker. There was a fine lunch to close proceedings.

Hospital Ladies Arrange Dance

Name Committees for Sweepstakes Ball—Membership Continues to Grow—Suggest New Date for Closing Year.

The February meeting of Creston Hospital Women's Auxiliary was held on Thursday afternoon, with the president, Mrs. R. Stevens in the chair. 29 members were present. The membership of the auxiliary now stands at 91.

An invitation was received from Canyon Women's Auviliary to attend a meeting at Mrs. VanAckeren's home on on March 14. This invitation was accepted, and members able to go are asked to let Mrs. Stevens or Mrs. Murrell know early in March so that transportation can be arranged.

Miss Irene LaBell reported for the visiting committee and Miss Nancy Downes for the dressings committee. Mrs. Jas. Cook reported for the buying committee, and told of a cupboard being provided for the reserve supply of linen. A dressing gown, two cot spreads and white rags have been danated. Feathers and white rags are still needed.

Mrs. F. Smith and Mrs. Maxwell were named to act on the visiting committee for the ensuing month. Miss Downes again consented to convene the dressing committee. Mrs. Stevens, who represents the auxiliary on the hospital board, reported that Mrs. A. L. Palmer had been put on the grounds committee; Mrs. Cook and Mrs. W. M. Archibald on the house committee, and Mrs. Stevens on the executive committee of the board.

Supper for the dance on March 1st were arranged for, and a kitchen committee selected. It was decided to hold a series of bridge parties during the intervening month—until the March meeting. It was proposed to end the auxiliary year in October, and elect officers in November. Members are asked to think this over as it will be disposed of at a later meeting.

The Auxiliary's financial sratement for 1934, as audited, follows:

RECEIPTS

Balance in hand, Jan. 1, 1934	$182.09
Members' fees	59.50
Tea collections, monthly meetings	31.75
Military whist drive	33.30
Easter Monday ball	144.00
Hospital Day silver tea	13.95
"Made in Canada" Sale	161.90
Post Office booth	18 50
Raffles	59.12
Donations	14.10
Miscellaneous	14.93
	$783.14

EXPENDITURES

Creston Hospital Board	$ 92.65
Rent, Parish Hall	3.00
Rent, United Church Hall	27.00
Advertising	8.00
Expenses of ball	49.55
Equipment, for hospital	144.70
Linen, blankets	210.92
Postage	8.22
Cheque stamps	1 53
Stationery, sundries	41.32
Newspapers	11.00
Dec. 31, Bank balance	138.27
Cash balance	3.01
	739.14
Less outstanding cheque	6.00
	$783.14

Tea was served by Mrs. C. W. Allan, Mrs. Archibald, Mrs. W. J. Avery and Mrs. W. McL Cooper. The fre wil offering was $2.65.

What Are Actual Needs?

Listening to a discussion the other day on quotas and schedules adopted by governmental authorities as a guidance to those entrusted with the heavy and extremely difficult task of dealing with the cases of people who at this time are compelled to look to governments for the bare necessities of life, the question was forced upon our attention: What do we actually need?

There are an enormous and varied number of things we want, and our wants differ as greatly as our individualities differ, but when it comes down to a definite listing of the things we actually need not only to sustain life, but to make life really worth living, the number and variety of such needs is comparatively small.

People to-day list as needs scores of things which less than a generation ago were not even in existence, or so little known and in use as to be regarded as very great luxuries. For example, unemployed people living in our cities and, through no fault of their own compelled to accept municipal and government help, look upon the provision of electric light as an absolute necessity, and would consider it a great hardship if they were asked to resort to candles, or even the old kerosene lamp, as a means of illumination. Yet their parents got along very well with kerosene lamps and their grandparents and great-grandparents did not feel they suffered any great hardship because they had nothing but candlelight. And throughout the length and breadth of rural western Canada to-day hundreds of thousands of people get along very well with kerosene lamps. But in our cities people now list electric light as an absolute need.

Casting our memories back to boyhood days, thirty, forty, fifty years ago, we recall that our clothing and food requirements, our actual needs, were small and inexpensive compared with what we list as needs now. As a matter of fact, many of our so-called present day needs are not needs at all, and if our environment was shifted, we would not regard them as needs. Hundreds of people go camping every year, leave what we term "civilization" and go off into the wilds, and put up with conditions of living, and go without scores of things,—and enjoy doing so,—which at home they insist upon having as actual needs.

Life, and real living, does not consist in the abundance and variety of the material things we may possess. The pioneer lacked most of the things now listed as absolute necessities, yet they enjoyed good health, were happy, and found life well worth the living. They built homes, reared families of sturdy children, saw beauty in their surroundings, and developed character. Their needs were few and inexpensive. And they built nations.

These years of depression are developing two types of people. Out of one group men and women are emerging with stronger, finer characters. They are more self-reliant, with hampering superficialities burned away like so much dross, with the result that with the passing of the depression they will be the strong men and women who will take the leadership in this world, and who, out of the experiences of these years, will profit throughout the years to come. The other group consist of those who have been content to drift with the tide, to regard themselves as the sole victims of circumstance, ready to sit with folded hands and let others not merely provide them with actual needs, but who demand that these others shall further burden themselves in order that they may be supplied with things they want over and above their needs. With the passing of the depression, members of this second group will find themselves unequipped and incapable of making that provision for themselves which they will then be called upon to make.

It would be well, therefore, for all people to give serious consideration to what are needs and govern their demands upon their fellow citizens, as represented by the State, accordingly.

ALL FOOD MADE HER ILL

Caused By Acidity—Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and flatulence to such an extent that I was completely ill. I couldn't take food. When I actually forced myself to take something, I would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of the six mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it ensures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

Figures show that fewer errors are made in night baseball than when the pastime is played in the day.

SKIN RASHES

Give Place to Velvet Smooth Skins

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of a highly successful physician, Dr. D. D. Dennis. This liquid prescription, now made and endorsed by Campana's Italian Balm chemists, allays irritation almost at once, and quickly clears up such skin troubles as eczema, hives, acne, ringworm, dandruff, pimples and rashes. Ask your druggist for D.D.D. Prescription. Trial size, 35c. Guaranteed to give instant relief or money refunded. 2

Signs All Can Read

Pictorial signs—a telegraph post for the telegraph office, a trunk for the baggage office, and a big question-mark for inquiries—are in use at Parkeston Quay, Harwich. All the symbols selected are known the world over, and foreign visitors of all nationalities can "read" them.

The Finnish statistical office reports that in the 13 main towns and cities of the republic 19,271 married women are engaged in remunerative activity; this is 18.9 per cent. of all married women there.

Seek Oil Independence

Germany Hoping Domestic Requirements Will Soon Be Met

Amazing was the resistance offered by the Germans during the war largely because of her scientists, and now the German people are seeking through scientific means to make their country as economically independent as possible. They are increasing their efforts to find substitutes for imports. Not the least of these is petroleum, or the mineral oil from which it is produced. It is now asserted by German scientists that within a few years Germany will be independent of mineral oil imports. Petroleum is being produced synthetically from coal, and success is attending efforts to utilize brown coal—lignite—so extensively found in Germany. In the last year Germany has produced a third of the petroleum needed and she hopes that by 1936 her total domestic requirements will be met.

Strange Happening

Radio Music Is Heard From The Spout Of A Kettle

Steam comes out of the spout of Miss Ruth Lightbourn's kettle at Oakville, Ont., but the utensil is also capable of producing other things. During a heavy fog, fine orchestra music came from the water container as it sat on the stove. The program, which was audible eight feet away, lasted 20 minutes, then faded. During a lighter fog the performance was repeated, but the music was fainter.

There is no radio in the house and the stove is in no way connected with a ground or aerial system. Miss Lightbourn is at a loss to explain the strange occurrences.

GARDENING

Gordon L. Smith

Spring is once more approaching and with it the desire in the normal human being to start something growing. Soon all signs of winter will have disappeared and the earth gradually change from its drab coat of brown to something green and warm. But before this change, the would-be gardener commences his annual preparations. Plans are drawn up, seed catalogues perused, and equipment is checked over. Much interest is added to gardening by proper planning and much practical value also. Like a great picture or a humble barn or garage, the finished result will largely depend upon the thought which precedes actual construction.

Width Vegetable Rows

Practically all vegetables should be grown in absolutely straight lines. Little things like lettuce, radish and carrots can go in rows from eight to twelve inches apart, while potatoes, peas and beans will need fifteen to eighteen inches and corn and tomatoes, sprawling cucumbers and melons from 18 to 24. To save space, rows of early and small stuff such as lettuce and spinach can be planted between corn and beets. Where this close planting is followed, it will be necessary to cultivate and fertilize frequently.

Flower Plans

In planning the flower garden, time of planting is important because some things must be started from seed indoors or in a hot bed. Certain flowers will stand a light frost and some will not. To have flowers from early summer until autumn, time of blooming must be taken into consideration, and heights should be noted down to prevent the tiny things from being hidden by such tall growers as Cosmos, African Marigolds and Stocks. Colors are important. Occasionally two shades do not go well together. Fragrance should be taken into consideration. Flowers like the sweet scented Evening Stock, while not particularly beautiful, have such a delightful odor, particularly in the early evening, that some of them should be included. Then again, flowers have individual preferences. Some like partial shade. Among these are tuberous rooted Begonias and annual Larkspurs, while the bright Nasturtiums, Portulaca and California Poppy revel in full sun and a dry location. With flowers, shrubs, roses, lawns and all forms of decorative gardening, informal planting is advised. Straight lines should be avoided and those already in existence, like house foundations and fences should be screened. Clumps of shrubbery and a few trees about a house will not only break these harsh lines, but will tend to tie the structure down to earth and produce a complete picture.

European scientists declare that rain falling in wooded land is 25 per cent. greater than that in open areas.

ENTERS PROTEST AGAINST SWIVEL CHAIR FARMERS

Ottawa.—A protest against "swivel-chair farmers" handing out advice to men who had spent years behind the plow was made in the House of Commons by John Vallance (Liberal, South Battleford), who for 29 years has been a wheat farmer in Saskatchewan.

Joseph Bradette (Liberal, North Temiskaming), a lawyer and merchant at Cochrane, Ont., started the protests by sponsoring a motion to promote a land settlement scheme, spending $20,000,000 over a period of five years to purchase farms for young men who have been drifting to the cities. He would give preference to boys born on the farms and leave out industrial workers and immigrants.

Although he was willing to support the Bradette motion, the Saskatchewan Liberal protested against lawyers, doctors and school teachers attempting to dictate to farmers on agricultural subjects. There was only one way to make the farm more attractive—through education and "you might as well throw your money in the lake" as to select several hundred boys indiscriminately, buy them farms, stock and machinery and expect them to make good.

Sir George Perley, acting prime minister, offered no objections to the Bradette motion going to the agricultural committee of the house for further study.

Under a land settlement scheme, said Mr. Vallance, candidates must be hand-picked. It would be useless to pay every applicant $1,000 over five years—as suggested by the Bradette motion—and expect him to make good. In the same way as immigration there must be discrimination and educational means to make the farm more attractive.

"I hope I never see and Canada never sees a contented peasantry in this country," exclaimed Mr. Vallance. Only in countries where there was no education for the masses was there contented peasantry. In a country like Canada there was bound to be rural migration as long as people did not realize the advantages of farm life.

Gasoline Inquiry

Tariff Board May Hold Session In Regina

Ottawa.—The tariff board may open its inquiry into gasoline tariffs in Regina. This would be an innovation for the board as at present constituted has never held hearings outside Ottawa.

The chief complaint that gasoline prices are too high, because of the tariff, came from the west, and the point under consideration is whether it would be cheaper to bring witnesses here or for the board to go to the prairies. The board is busily preparing its report for the budget, which will likely be down in three weeks. When it has completed this it will start almost immediately on gasoline probe, it is understood.

Relief Frauds

Hamilton, Ont.—The city treasury has received $1,451 as a result of exposure last week of two cases of relief fraud, Mayor H. E. Wilton announced. One family returned $1,000 and another $451. Both had substantial amounts left in their bank accounts after the city had been reimbursed it was reported.

Salvage Plan

New York.—Simon Lake, the submarine designer and salvage engineer, hopes to begin wresting next week the cargo from the British ship Hussar, sunk in the East river in 1780, and see whether $4,000,000 in gold is in it.

Trade Level Maintained

Geneva.—Volume of world trade maintained its level in 1934 compared with 1933, according to information supplied by the League of Nations secretariat. In 1932 it had fallen to 74 per cent. of the 1929 figure, but it increased slightly in 1933.

W. N. U. 2087

Cockroach Soup

Reprisals Follow Quickly When Misdemeanor Committed In Russia

Archangel, U.S.S.R.—Five persons, including M. Sosnin, former secretary of the Communist party committee at Isakogorzky harbor, were sentenced to prison for the part they played in the "cockroach banquet" of which they were alleged to have compelled several restaurant employees to partake.

The five men were accused of forcing the personnel of the eating place to eat soup containing the insects as a disciplinary measure after a customer complained of finding a cockroach in his food.

Immediately after the incident, Sosnin was removed from his political post. The court sentenced him to three years' imprisonment.

The others were sentenced to shorter terms.

Uniformity Of Wages

Premier Bracken Of Manitoba Would Do Away With Unfair Competition

Winnipeg.—Legislation directed at uniformity of wage and working hours throughout Quebec, Ontario and Manitoba is likely to be introduced in the Manitoba legislature by Premier John Bracken at the present session.

Unfair industrial competition aided by inconsistency of provincial labor laws is believed to be the object of the Bracken proposals. The new legislation would, it is learned, make it impossible for industries of one province to produce their goods more cheaply than possible in a neighboring province because of longer working hours and lower wage scales.

Provinces Have Not Submitted Relief Plans

Until Statements Are Received Ottawa Cannot Take Action

Ottawa.—Until provinces had submitted "concrete plans" for their relief operations after the current fiscal year, and stated their requirements from the Dominion government, he could make no definite statement to the house with respect to governmen policy, Hon. W. A. Gordon, minister of labor, told the House of Commons. The house was in committee of supply considering an item in labor department estimates.

No such information or plans had as yet been submitted by any of the provinces, Mr. Gordon said.

Wolves Becoming Menace

Great Damage In Prince Albert National Park Reported

Ottawa.—Damage caused by wild animals in Prince Albert National Park, Sask., was called to the attention of the government in the House of Commons by A. F. Totzke (Liberal, Humboldt). Hon. T. G. Murphy, minister of the interior, said he was waiting for a report from park officials and would make a statement to the house later.

Mr. Totzke said timber wolves were becoming so numerous they were forming into packs and doing great damage to trap lines and slaughtering wild animals in district adjacent to the park.

Mounties As Coast Guard

Ottawa.—Major-General J. H. MacBrien, commissioner of the Royal Canadian Mounted Police, told the Canadian Geographical Society it would "undoubtedly" be to the nation's advantage if the marine section of the force were developed into a regular coast guard service. He revealed the marine service of the force had given assistance to 76 vessels between April, 1932, and the present.

Study B.N.A. Act

Ottawa.—Three new members were added to the special committee of the House of Commons studying methods of amending the British North America Act. They are Hon. Peter Veniot (Lib., Gloucester), J. S. Stewart (Cons., Lethbridge), and Henri Bourassa (Ind., Labelle). Prime Minister R. B. Bennett moved for the appointments at the opening of the house.

TO CHANGE LAW

Hon. T. B. McQuesten, Minister of Highways for Ontario, who will introduce important amendments to the Highways Traffic Act in the Legislature. The amendments will be made with a view to reducing the accident toll on city streets and highways.

Likely To Retain Post

Judge Taylor May Remain Head Of Pension Commission

Ottawa.—Retention of Mr. Justice Fawcett Taylor at the head of the Canadian pension commission when his period of service as temporary chairman expires some months hence is said to be contemplated by the government.

He was appointed last July for a period of one year, and for the specific purpose of clearing up the so-called "marriage cases." Among his duties was that of making a complete report to the government on operation of pensions machinery.

The bill enabling the government to increase the number of commissioners by appointment of temporary members to the board has now passed the senate. The expectation is the government will name four to hold office until the present congestion is cleared away.

Fishing Schooner Race

Trans-Atlantic Contest Between Canada And American Boats Suggested

Lunenburg, N.S.—A trans-Atlantic fishing schooner race between the Canadian champion Bluenose of Lunenburg, N.S., and the Gertrude L. Thebaud, pride of the Gloucester, Mass., fleet, now appears to be a certainty.

E. Fenwick Zwicker, local business man, made public a series of cablegrams exchanged during the past few days with the Royal Ocean Racing Club of England, in which the latter said it was "ready to go."

General European Peace

Soviet Russia Wants Peace Pact Carried Out In Full

Moscow.—Soviet Russia notified Great Britain and France it is in agreement with the London proposals for a general European peace pact on condition they are carried out in full.

Foreign Commissar Maxim Litvinoff instructed the Soviet ambassadors at London and Paris to inform the governments there that regional pacts such as the proposed eastern Locarno agreement are considered by the U.S.S.R. as absolutely necessary for the preservation of peace in Europe.

This stipulation in the Russian attitude struck directly at Germany, which the Soviets have been accusing of having ambitions of military aggression against Russia.

Paid With Their Lives

Chinese Rebels Executed For Murder Of Missionaries

Shanghai.—Four more Communist rebels have paid with their lives for the murder of the United States missionaries, Mr. and Mrs. J. C. Stam, in southern Anhwei province last December, the foreign office here revealed.

Anhwei province authorities, it was announced, captured the quartette and executed them. On Dec. 20, two weeks after the tragedy, four others were reported put to death, and the alleged leader of the Communist hordes that destroyed the Stam's mission and beheaded the couple was later reported killed in battle.

Depletion Of Waterfowl

Fear Expressed Of Danger Of Extermination Of Ducks

Winnipeg.—Federal authorities are concerned over depletion of waterfowl and fear extermination of some species of ducks, according to a report submitted to the Manitoba legislature by Hon. J. S. McDiarmid, minister of natural resources.

Solution of the duck depletion problem rests primarily on measures taken in the United States, where the birds are fired upon over a much greater area in their migratory flight between the international border and the marshes of the Gulf of Mexico and Atlantic coasts, the report said.

Obliged To Cancel Visit

Hamilton, Bermuda.—Sir Astley Cubitt, governor of Bermuda, received confirmation from the Duke of Gloucester he would have to cancel his visit to Bermuda owing to delay caused in the schedule of H.M. A.S. Australia when she rushed to the aid of the schooner Seth Parker off Taiti.

FRANCE BIDS FOR ATLANTIC AIR SUPREMACY

An intensive race is on between various nations to determine which will be the first to establish commercial air service across the Atlantic. France has taken the lead with her huge new air liner, christened the Lieut. de Vaisseau Paris. The ship recently completed its maiden flight in a manner which has given the French high hopes of being the first nation to span the Atlantic with regular commercial air service. At the same time Great Britain and the United States are experimenting with super-planes of different types and both countries expect to have planes ready in the near future. The new French air liner is capable of carrying 70 passengers in addition to its crew of seven. It is propelled by six motors of 850 horsepower each and is 104 feet long. It has a cruising speed of 145 miles an hour and is designed to make the transatlantic flight in less than 20 hours. Above is a picture of the giant French plane, while inset is Baron Henri de la Grange, French aviation commissioner, who is now in the United States studying commercial aviation on this side of the water.

A NATION WIDE BUILDING PLAN IS SUGGESTED

Toronto.—Erection of a Dominion government mortgage loan corporation to provide credit for a huge, nation-wide construction program was advocated by Hon. H. H. Stevens, former federal minister of trade and commerce, in an address before the Ontario Retail Lumber Dealers' Association.

The body would have power to sell its bonds in Canada and if necessary have power to guarantee them.

"This government-controlled body would do for the people of the country what those at present in private control are failing to do, that is, provide decent housing for the people," Mr. Stevens said.

When he spoke in Toronto almost a year ago and pointed out the chaos into which business had drifted he had a definite plan, Mr. Stevens told his audience, and subsequent studies have confirmed the possibility of such a plan.

It is three-fold. He suggested appointment of a federal commission of industry and commerce, placing farmers and other primary producers in a position which would give them a larger measure of control in marketing of their products and a national construction program.

Reason a start is not made on the construction project is because the credit of the country is in the control of a very small number of men and is not actually available except at costs that are too high or on conditions that are too onerous, Mr. Stevens said.

He recalled his speech in the same place a little more than a year ago when he declared there were "cankers" eating at the economic life of the Dominion. That gave rise to the price spreads investigation and, he said, the whole country has been shocked at the things brought to its attention.

"I started this movement. I am determined to see it through," he declared amid applause.

Not Taking Part

Corporation In Scotland Cannot Afford To Mark Jubilee

Greenock, Scotland.—Not without a struggle, the corporation of Greenock on the Clyde resolved by a vote of 12-10 not to take part in the celebrations of the silver jubilee of the king's accession.

The resolution explained expenditures would not be fitting "because of the unemployment in the town."

Bailie Mrs. McLeod described the king as "a wee, nice man" who reminded her of her fother.

Bailie Scott vigorously objected to "trailing the unemployed into the question." The action would make Greenock the last town where anyone would think of establishing a new industry, he asserted.

Plenty Of War Supplies

Italy Well Prepared For Trouble In Ethiopia

Rome. — Italy's supreme defence council promised the nation the wells of war supplies will not run dry as 4,000 Italian troops steamed across the Mediterranean to Africa in consequence of Italo-Ethiopian tension.

The council, over which Benito Mussolini himself presides, concluded its fifth session in recent days with the statement:

"Italy can rest assured the council has done its duty in preparing in time those indispensable measures so that an eventual warlike effort can be carried out in conditions which will assure victory."

Plea For Lower Tariff

Ottawa. — Colin Campbell (Lib., Frontenac-Addington) made a plea in the House of Commons for lower tariffs on mining machinery. He said in his resolution that the mining industry in recent years has been subjected to increasing taxation and had only been able to keep going because of the ingenuity of engineers whose researches had produced less costly methods of operation.

CRESTON, B.C., FRIDAY, MAR. 1

Letters to the Editor

Corrects Mr. Edmondson

Editor Review:

Sir,—It is evident from the errors in Mr. Edmondson's letter of rebuttal published in this paper, February 22nd, that he was too hasty in his reply. It would be advisable for Mr. Edmondson to consult more reliable references in future, and to learn the rudiments of fu damental arithmetic before attempting the comprehension of chemi try and physics. 60 times 20 is conceded to be 1200 not 1000.

Strange as it may seem to Mr. Edmondson, 10,000 watts is the necessary power required to destroy the matter in 1½ minutes. This is the result of careful calculation, not wild surmise. If Mr. Edmondson questions this he may see the actual figures.

Destructive distillation is the process of heating a substance away from air. No doubt Mr. Edmondson will construct the necessary apparatus to make this possible.

We can readily imagine the residents of the lower part of Creston watering their rose gardens in the merry month of December—of course without the aid of sprinklers due to low pressure—with the upper town's waste sink water.

Hydrogen sulphide is neither hydrogen, iron sulphide, carbon monoxide, nor lime sulphur spray, but a colorless gas, heavier than air, poisonous, sickening even when diluted with much air, and characterized by the odor of rotten eggs. The difference between hydrogen and hydrogen sulphide is that one contains sulphur and the other does not. Similarly strychnine and sugar differ only in that strychnine contains nitrogen. Therefore the properties of neither can be determined by the constituent elements.

With reference to the cost and interest mentioned by our noteworthy physicist as attached to the construction of a formal sewer system we wish to point out that our letter was primarily to show the relative impossibility of the "Electric Sewer."

Added to all this is the inconvenience and the danger of this contraption, which might result in the electrocution or the incineration of the operator.

GEORGE DODD.
LLOYD McLAREN.

The ice harvest at Moyie l ke this year was only 100 tons.

Kaslo's 1935 tax rate is 40 mills. 10 of this is for school purposes.

First full bloom buttercups were seen at Grand Forks on February 17th.

According to the Vernon News fishing in Okanagan lake is about the poorest ever known.

Grand Forks shipped 37,500 railway ties in 1934. For 1935 the output will be 70,000.

Courier: Cranbrook ranchers report the arrival of spring lambs; the earliest in many years.

Vernon will require $64,756 for educational purposes in 1935—an increase of $2000 over 1934.

Kaslo, with a three-teacher school, will require $7,672. for educational purposes this year.

Early in February Kaleden was shipping 1934 Jonathans which were in the best of condition.

The Co-Op. at Summerland contemplates a cold storage plant to handle 100,000 boxes of apples.

The 1935 assessment roll at Penticton shows land and improvements valued close to $5,000,000.

Quite a controversy is raging at Penticton as to the site of the proposed new $61,000 postoffice building.

For every dollar collected in taxes at Penticton almost 39 cents is required to finance the schools of the town.

The Royal Anne hotel at Kelowna, a locally owned stockholders' project, operated at a profit of $8,418 last year.

Kelowna claims to have operated its hospital in 1934 at a profit of almost $6,000. At Vernon the profit was $2,686.

The Observer states that since the cold snap at the end of January very few sparrows have been seen around Salmon Arm.

In 1925 the north Okanagan produced about 300,000 pounds of creamery butter. In 1934 the output was 750,000 pounds.

Accodring the NewsVernon curlers have had the best and the longest playing season in years. The club had 100 members.

C.P.R. business has improved at Cranbrook to the point where the ticket clerk and baggage room assistant are again employed.

Vernon creamery sold $184,000 worth of butter in pound prints in 1934. On this business it has less than $95 of doubtful accounts.

The Penticton Herald fears the south Okanagan peach and apricot crops will be light, but looks for a normal crop of other tree fruits.

Hon. H. H. Steveus announces that he will seek re-nomination as Conservative party candidate in Kootenay East at this year's election.

At February 15th the Okanagan had 577,927 boxes of apples unsold. 116,495 were McIntosh Reds, and there were 138,581 boxes of Delicious.

Coyotes are so numerous in the Fernie district that the game warden is asking that the unemployed be used in an effort to kill the animals off.

Rev. E. W. Mackay, United Church minister at Summerland, and a former Presbyterian pastor at Cranbrook, is the C.C.F. candidate in Yale.

The Courier states that Cranbrook Sash & Door Company has a contract for a quarter of a million ties with the C.P.R., all of which will be sawn at their new plant near Cranbrook.

The Herald is not at all hopeful that Penticton ratepayers will provide the money for a new 12-room school, and proposes that it be built over a period of thtee years—four rooms each year.

The Golden creamery made 44,552 pounds of butter last year. The price paid for cream was a little higher than the previous year. Production was less than in 1933, and the plant operated at a loss.

The Associated Growers at February 1st still had 68,000 boxes of Delicious to dispose of, and the demand was somewhat disappointing on Romes and Yellow Newtons. Shrinkage is now rather heavy.

BATTERIES RE-CHARGED—Orchard Service Station, Creston.

FOR SALE—Five-acre block, partly improved. J. G. Connell, Phone 42X.

HAY FOR SALE—Three tons alfalfa. J. G. Connell, Phone 42X.

HAY FOR SALE—Good alfalfa hay, $15 ton delivered to town; $13.50 ton at ranch. Frank Hollaus, Lister.

WANTED—Girl wants house or other work, capable and reliable; experienced waitress. Enquire Review Office.

FOR SALE—Jersey-Holstien cow, six years old, will freshen March 1st. Also 150-egg size Belle City incubator. A. Hoglund, Canyon.

GOAT RIVER CANYON DEVELOPMENT

By BILLY CRAIG

Awarded FIRST PRIZE for best essay on "West Kootenay Power & Light Company, Limited, Development" by pupils in Grade 8, Creston Public School, at the recent School Fair.

During the years 1929, 1930, 1931, and 1932 Creston village had been supplied with Electricity by Creston Electric Company, Limited, whose plant consisted of two Diesel engines. In 1932 officials of West Kootenay Power and Light Company, Limited, with headquarters at Trail, conceived the idea of erecting a dam and power plant on Goat River to supply Creston and Creston valley with cheap hydro electric power.

November, 1, 1932, saw work being started on the dam at Goat River canyon, about 4 miles east of Creston. In November, 1933, the dam and power plant were finished. While work was going on 100 men were employed practically all the time. All work was done by local men, only the chief engineer coming in from Trail.

Goat River dam is a cement reinforced with steel structure. It is 130 feet along the top from the headworks to the opposite side of the gorge. The height of the dam is 70 feet, with 10 feet below the river bed. It rests on a 12-foot base, sloping up to four feet at the top. The upper side is perpendicular, while the lower side slopes at a gentle angle. Near the bottom of the dam there is a five-foot sluice gate to carry away the sediment. The dam holds back a 65-foot head of water to the railway bridge.

The water for the power plant comes in under the headworks where there are screens 70 feet outside and 14 feet inside to protect the turbines from floating weeds and debris coming down the river. Outside of the headworks there is a sheer boom to turn logs over the dam. From the headworks there is a steel penstock six feet in diameter with a 65-foot drop leading down to the power house. When the water leaves the penstock it goes into a coil which is like a g orified snail shell. In this coil it gets a whirlpool twist which forces the water wheels around.

At present there are two turbines in the power house, which can accommodate four turbines if n cessary. One turbine has 250 horse power, while the other has 800 horse power. The small water wheel weighs 300 pounds. The water enters the turbines at the back and goes out the sides nto the river below. In the power plant an air compressor prevens the water from freezing during cold weather. All apparatus is the most modern and operates automatically.

At the present time about 100 horse power is being used. During the ro mal flow and when in full operation the plant could produce 2400 horsepower. From the power plant underground cables lead to the step-up voltage transformer. This transformer steps up tne voltage from 2200 volts to 6600 volts. In Creston there is a step-down transformer which transforms 6600 volts back to 2200 volts. The power from Goad River dam is distributed to to the districts of Creston, Canyon, Erickson and Wynndel.

Creston valley will derive great benefit from the cheap electrical power generated at the Goat River dam. This electricity will supply the farmes and homes with power to run radios, milking machines, etc. If there is a shortage of water for irrigation purposes there are pipes and pumps in the headworks to pump the water from the river. If, in future, any large industries are to be located in Creston valley the dam will supply the industries with hydro electric power.

Canyon

Mrs. Arvid Samuelson of Hazel Creek was here for a weekend visit with Mrs. Craig.

Birth—On February 14th, at Creston hospital, to Mr. and Mrs. G. Messinger, a daughter.

C. Blair got back at the end of the week from a couple of weeks' visit with friends in Winnipeg, Man.

Principal Hunden of Canyon school was a visitor at Kimberley for tne league basketball game on Saturday.

There was a good turnout Friday for the benefit concert at the hall put on by Canyon troop Boy Scouts, for the purpose of raising funds to carry on scout work. There were some musical numbers and a couple of plays, with proceedings closing with a dance.

The annual meeting of Canyon United Church Ladies' Aid was held at the home of Mr . Roy Browell on Thursday afternoon. at which the following officers were elected. President. Mrs. W. E. Searle; vice-president, Mrs. J McRobb; secretary-treasurer, Mrs. G. Kifer. The financial statement was most attractive and th re has been an increase in the membership.

Canyon troop of Boy Scouts is now being handled by a group committee composed of A. Bond, president; L. Clark, vice-president; T. R. Mawson, secretary-treasurer; and R. Browell, H. Young, L. Craig and L. Moberg. At the inaugural meeting the committee authorized the purchase of the regulation hat for each of the 12 members, but the purchase of a uniform is up to the individual boy scout. Adam Johnston has been reappointed scoutmaster for the troop.

Kitchener

Mrs. John Renzie was a patient at St. Eugene hospital, Cranbrook, a few days last week.

Miss Hazel McGonegal was a weekend visitor at Erickson, with her sister, Mrs. D. F. Putnam.

Dan McDonald, who is in charge of the airport, and Clifford Foisy, were business visitors at Cranbrook, Tuesday.

Mr. Lazenby of Yahk, who is in charge of the National Defence Camps in this district, was a b siness visitor at the airport, Tuesday.

Mesdames G. A. Hunt, C. Senesael, B. Johnson and Miss Jessie White were at Creston on Friday for the funeral of the late John Arrowsmith.

District engineer Jones and Mr. Nicholson of Cranbrook, were last week inspecting the trucks at the airport and Goatfell east and west national defence camps.

Carl Pelky, truck driver at the Aldridge relief camp, has been transferred to Goatfell West N.D. camp. Pat Kennedy, who has been at Goatfell west, has been shifted to Wasa.

Alice Siding

Along with his fox farm operations Dick Smith has added a pen of nine mink.

Jack Smith returned last week from a couple of weeks' visit with friends at Calgary, Alberta.

Local ranchers are losing no time getting home the balance of their hay cut on the flats, while travelling is not too bad.

Rev. G. G. Webber of Vancouver sp nt a couple of days here at the end of the week, a guest of Mr. and Mrs . H. Webster.

W. A. Pease is at present a patient at Cranbrook hospital, where he is undergoing treatment. Miss Esther Smith is staying with Mrs. Pease at present.

While W. A. Pease is in hospital at Cranbrook, Steve Findler is aking care of the Alberta ranch. It is stated Mr. Pease has leased the place for 1935 to a Mr. McCreary of Turner Valley.

John R. Miller was a Nelson visitor on Friday, attending the spring session of the Kootenay presbytery of the Presbyterian Church He was named a delegate to attend the general assembly at Montreal in June.

Intermediates Lose

Creston.s entry in the intermediate division of the East Kootenay basketball league got off to a bad start, dropping the opening game to Kimberley, 18-6, at park pavilion on Friday night, before a fair sized crowd. The evening opened with curtain raiser between an all star girls' squad and Pharmacy, the latter winning 11-4. This game was rather uninteresting throughout as the all star quint. had no practice together and Pharmacy walked over them handily. Opal LaBelle and Marjorie Learmonth did the scoring for the winners, with Margaret Armitage and Theo Tompkins putting up a nice game for the losers.

Pharmacy—O. LaBelle, Y. LaBelle, E. LaBelle, M. Learmonth, M. Moore, Olivier, Fay Tompkins.

All Stars—A. Lewis, K. Payne, Dot Wightman, M. Armitage, Theo. Tompkins, Ruth Hare, Edith Avery.

A feature of the intermediate contest was its slowness and cleaness. Vesy few penalties were called and Creston fans, not being accustomed to this style of play, were not altogether thrilled. The Creston members of the squad, Jack Payne and Lance Maddess, were not accustomed to playing with Wynndel and did not, therefore, make a very good showing. Wynndel members of the team played a nice game but it was plain from the start that they were not in the class with Kimberley. The winners were playing at top form, with faultless combination. Joe Martell, Elvin Hagen and Payette brothers starred for the losers.

CARAVAN

Movie-goers who love the gay, the lavish and the utterly different in screen entertainment ought to hold a public celebration—complete with dancing in the streets—for the first Erik Charell film productiyn made in Hollywood.

In "Caravan," the memorable Fox Film musical spectacle at the Grand Theatre, Saturday, this noted continental director has created one of the most brilliant and original screen plays ever shown in a local playhouse. For sparkle, color and gayety, it is unsurpassed.

Lavishly produced at the Fox studios, with Hungarian villages, castles, inns and vast Gypsy caravans swiftly alternating as backgrounds. "Caravan" tells a romantic love story in a delightful new view. The setting is idyllic—the grape country of Tokay during the wine harvest—and a quartet of leading players as vivid as the setting carries forward the story to a spectacular finish.

Charles Boyer, favorit stage and screen star of the continent, heads the cast as a dashing Gypsy musician. The glamorous Loretta Young appears as a gay young countess. Jean Parker and Phillips Holmes complete the stellar quartet. All four of them are superbly cast.

Though "Caravan" does not classify as the conventional screen "musical" in any sense, music plays an i portant part in the smooth and effortless flow of its story. So stirring and radically different is the use of music that probably the picture will introduce a new era of musical production.

Charell has evolved a new technique to insure the smooth flow of action in "Caravan."

In 1925 the north Okanagan produced about 300,000 pounds of creamery butter. In 1934 the output was 750,000 pounds.

GOVERNMENT LIQUOR ACT

Notice of Application for Consent to Transfer of Beer Licence

NOTICE is hereby given that on the 18th day of March next, the undersigned intend to apply to the Liquor Control Board for consent to transfer of Beer Licence Number 3095, and issued in respect of premises being part of a building known as Cosmopolitan Hotel, situate on Front Street, Ymir, British Columbia, upon the lands described as Lot No. 2, Block No. 26, Map No. 640, town of Ymir, Nelson Land Registration District, in the Province of British Columbia, from John Breau to Harry Olson and Carrie Olson, of Nelson, British Columbia, the Transferees.

DATED at Nelson, B.C., this 28th day of February, 1935.

Some Improvement Is Shown In Recent Months In The General Level of Prices of Farm Products

The general level of wholesale prices of farm products averaged approximately 15 per cent. higher in 1934 than in 1933, says the 1935 "Agricultural Situation & Outlook" which is about to be published by the Dominion Department of Agriculture in co-operation with the Department of Trade and Commerce. In the latter part of 1934 the index of farm products tended to fluctuate narrowly about 40 per cent. below average levels obtaining in 1926, and 40 per cent. over the extreme low point of the depression reached in February, 1933. The variations in prices of farm products are illustrated by a comparison of averages covering the first ten months of 1933 and 1934 which reveal the following percentage increases:

No. 1 Manitoba Northern wheat	22	per cent.
No. 2 C.W. Oats	27	" "
Timothy hay, No. 2	70	" "
Good and Choice Steers	21	" "
Bacon hogs	61	" "
Wool, eastern bright	49	" "
Milk	9	" "
Butter	2	" "
Cheese	2	" "
Fresh eggs	13	" "

On the other hand, prices of potatoes declined 17 per cent.

Farm income, particularly towards the close of 1934 and the first part of 1935 may be expected to reflect in large part the improvement registered by farm prices. The gradual adjustment of the debt situation should also affect incomes favourably.

The rise in prices of farm products has been accompanied by a less rapid advance in value of things farmers buy. A specially constructed price index of farm purchases, including living requirements as well as operating equipment, has moved upward roughly 5 per cent. above the 1933 average. Foods mounted 8 per cent., clothing 1 per cent., household supplies and equipment 4 per cent., and operating supplies and equipment 5 per cent. Since prices of manufactured goods have not advanced as rapidly as those for farm products, farm incomes will purchase larger supplies of needed goods than could be obtained at the beginning of 1933. The 5 per cent. increase in prices of farm purchases, however, will prevent the improvement in purchasing power from being fully commensurate with the rise of the farmers' gross receipts.

Consumption of food products has been well maintained during the recent years of low prices. Future demand will depend on the ratio of prices to purchasing power. Food prices have advanced during the past year more rapidly than the prices of other goods. Increased food prices have been associated with increased farm prices. Greater volume of employment and some wage increases, especially in the logging, lumbering, and newsprint industries, have at least increased total wages as much as living costs have increased. Hence the higher prices received by farmers for an aggregate volume of goods similar to that of 1933 is a net national gain in domestic purchasing power.

The Unknown Soldiers

Only 6,000 Identified In Strange Cemetery In Italy

The strangest war cemetery in the world is at Redipuglia, Italy, where the bodies of 30,000 men are buried. Only 6,000 of the men are identified; the other 24,000 graves are those of unknown soldiers. The men were buried in such haste that there was no time to find out who they were or to what companies they belonged. This cemetery has no rows of wooden or stone crosses or sculptured monuments. Its tombstones are such familiar relics of war as aeroplane propellors, trench mortars, field kitchens, pieces of artillery, rifles with bayonets "fixed", and tin hats battered by the blows of rifle butts and pierced by bullets. One memorial stone is even an anti-aircraft searchlight.

Some Old Windmills

Many In England Are Still In Good Condition

During the past year a number of old windmills in Britain have engaged the attention of the Society for the Protection of Ancient Buildings. Chailey Mill, in Sussex, has now been thoroughly restored by funds raised by Mrs. Kimmins, founder of the Heritage Craft Schools, and it is being used as a dwelling house in connection with the cripple home. Outwood Mill, in Surrey, has been supplied with a sound pair of sails from a Norfolk windmill that was demolished. Old Moreton Mill, in Essex, has been made watertight and repainted. It is estimated that there are still nearly 1,000 of these picturesque landmarks to be seen on the English country side—some in good condition, many in urgent need of repair, but a large number in a derelict and dilapidated state. Hitherto it has been supposed that Bourn Mill, in Cambridgeshire, is the oldest in the British Isles, dating from 1636. An old tower mill has, however, been discovered in Sark (Channel Islands) which bears the date 1571 carved in stone over the balcony. It is owned by the Dame of Sark, who has in her possession receipts dating back 200 years for the cost of repairs carried out on the mill by her predecessors, the Seigneurs of Sark.

Cannot Predict Weather

Metecrologist Says It Is Useless To Make Long-Range Forecast

Weather during 1935 may be hot, cold or indifferent, but the chief weatherman — the meteorological bureau at Toronto—will make no predictions.

What the future holds in the way of weather is as much a mystery to the bureau as to the average citizen, John Patterson, director of the bureau, stated. Accurate forecasts can be made 24 hours in advance, he said, but 48-hour prognostications can not always be relied upon.

The forecasts of old-timers, who delight in calling the weather of the various seasons, basing their predictions on the thickness of bark on trees, thickness of hair on animals, and other of nature's protections for the periods, are viewed with interest by the scientific branch. But the bureau, who tab the change in weather throughout Canada, make no attempt to deny or confirm the predictions.

Even the appearance of the groundhog Feb. 2, Mr. Patterson said, is as good as anybody's guess as to when winter will end.

Makes Geography Popular

Pupils In Dutch School Take Lesson In Air Liner

The headmaster of a Dutch school has conceived the brilliant idea of using an air liner to teach geography. Instead of trooping dolefully into their classroom, the children now eagerly take their seats in the aeroplane, each with a map beside him and a pair of earphones. While the flight is in progress, the geography master, sitting before a microphone in the forepart of the cabin, points out and explains the features of the country side below, and the pupils check his remarks on their maps. A pre-arranged section of the Netherlands is taken with each flight. The children, it is found, absorb their lessons with twenty times the enthusiasm shown on the ground.

Making Huge Map

A huge map of the United States is under process of manufacture at Wellesley, Mass. Expert topographers have finished a third of the map, which, when completed, will be 63 feet long and 46 feet wide, and will show every valley and mountain in the country reproduced to exact scale as well as the curvature of the earth.

Chinese Turkestan contains a 300,000 square mile desert so dry that no human being, bird, animal, or plant can live within its borders.

Praises Royal Winter Fair

Best Agricultural Show He Has Seen States Lord Dorchester

Lord Dorchester, who journeyed from England specially to be one of the judges at the Royal Winter Fair at Toronto, told the Ottawa Women's Canadian Club that the fair was a tremendous project of which Canadians as a whole failed to realize its significance. To him, in its size, its splendid housing facilities and the diversity of its exhibits, it was unlike any agricultural show he had ever seen. Education was to be had there under the most pleasant auspices, and breeders and agriculturists came from many lands, to gain knowledge through exchange of views. The classes of the many animals shown and their splendid housing facilities, was only one of the many attractions.

The flower show was the equal of any he had seen at Chelsea, London, and the arrangements for display, finer than any in England. For himself Lord Dorchester admitted he had learned more than he ever thought possible, not only at the fair, but in an exchange of views on Canadian life gained in the various strata of society from Ministers of the Crown to bootblacks. "I took them as they came," he commented.

Work Speeded Up

Famous Highway In Austrian Alps Will Soon Be Finished

After being conducted leisurely for several years, construction of the famous Groosglockner Highway in the Austrian Alps is being pushed to completion so that it will be opened in the fall of next year. The road will traverse the Groosglockner range of the Alps and at the highest point will surmount the famous Edelweiss mountain. Construction work last summer was chiefly concentrated on the more precipitous section leading up to the summit, the "Firschertoerl," where an observation parking place, nearly 8,000 feet above sea level, has been laid out.

Farm Creditor Boards Of Prairie Provinces Will Endeavor When Possible To Effect Conciliations

Before formulating mandatory proposals, boards of review appointed by the federal government under the Farmers' Creditors Arrangement Act for the prairie provinces will exhaust all efforts at conciliation—but debtors and creditors generally should understand that if the parties do not get together, then the boards, if in fairness to all concerned can formulate a proposal, they will do so.

This point was brought out in a statement issued following a conference of the boards at Regina.

Those present at the meeting were: Mr. Justice Ewing, Stanley McCuaig, K.C., and H. B. McLeod, of Alberta; Mr. Justice Montague, A. E. Johnston, K.C., and W. G. Wroth, of Manitoba; Mr. Justice MacLean, G. W. Forbes, K.C., and Charles Harlton, of Saskatchewan.

When the conference of the prairie province boards had concluded, the following statement was authorized for publication:

"The boards appreciate fully that the intention of the legislation is that the farmers be retained on the land as efficient producers, and with that thought, boards have been created as a means whereby compromises or re-arrangements may be effected of the debts of the farmers who are unable to meet their liabilities as they become due. The boards recognize as a farmer entitled to consideration under the act, that farmer who reasonably is endeavoring to far mhis land in a proper manner and dealing fairly with his creditors. They regard their powers under the act as being very broad and in dealing with cases that come before them, while considering priorities will recognize as paramount the necessity in the proper cases of making that re-arrangement or that re-adjustment fair to the debtor and his creditors which will result in retaining the farmer on the land under circumstances which it is hoped will mean that he can continue as an efficient producer.

"The boards will give consideration to a classification of various kinds of debts and will be disposed to give special consideration to those debts in the same classification incurred for the necessaries of life or for the efficient production of the land. Where debts represent unpaid balances in respect of the purchase price of chattels or land considered by a board unnecessary to the efficient operation of the farm unit, the creditor will be expected to give favorable consideration to taking the security back and cancelling the obligation."

"Creditors in some instances are stressing the policy of settlements on the basis of bonus for performance In many instances this will be acceptable and fair to the debtor and creditors, but it is considered advisable that the farmer should be removed not only from his position of being in default but also that he shall not by any proposal formulated by the board be left where there is likely to be an early return to that default position. The boards propose to exhaust all efforts at conciliation before formulating mandatory proposals, but debtors and creditors generally should understand that if the parties do not get together then the boards if in fairness to all concerned they can formulate a proposal they will do so.

"In many of the cases that have already come to the attention of the boards it has been noticeable that creditors have voluntarily consented to a reduction in the interest rate. Recognizing the undoubted burden of fixed interest charges, the boards hope that the trend thus indicated will be maintained.

"The boards feel that every reasonable effort that can be made to continue the individual farmer in the position of being a 'home owner' should be made.

"The boards would also draw the attention of all debtors and creditors generally to the fact that the courts have already recognized a distinct difference between the terms 'bankruptcy' and 'insolvency'. An unfortunate result of the serious economic depression and adverse climatic conditions has undoubtedly been to include a great number of farmers within the second term who do not come within the first.

"The boards will expect debtors and creditors generally to co-operate in the working out of this legislation designed as it is for their mutual benefit. The boards are desirous of having settlements arranged which are mutually satisfactory to debtors and creditors and believe that if all parties enter into the discussion of these difficulties with the traditional desire to get together and be of help so characteristic of the people of this country then settlements will be arrived at and a real contribution made.

"The members of the board are particularly desirous of dealing with all cases that come before them in the fullest and fairest manner and are especially concerned that in dealing with the facts and circumstances of all cases they shall do so not as advocates for a particular interest but as citizens concerned with making a real effort to assist their fellow citizens, both debtors and creditors, in their difficulties."

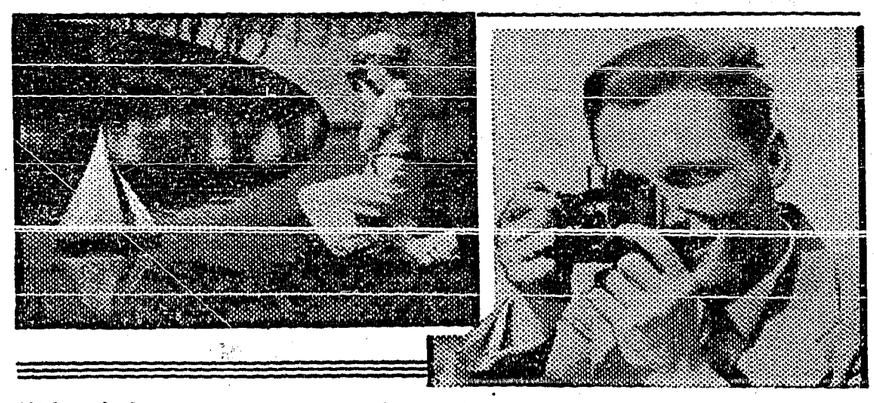
Umbrella Trade Poor

Frame Makers In England Lose $55,000 In Year

"The umbrella trade is absolutely done. Umbrellas and parasols are not used." Thus lamented a stockholder at the annual meeting at Birmingham, England, of a company of umbrella frame makers, who reported a trading loss of nearly $55,000 in the last year. The chairman calmed the stormy session by declaring that during worst periods of last summer's drought umbrellas were manufactured and sold. The company will continue to make the rain deflectors.

The SNAPSHOT GUILD

NEW MEMBERS AHEAD!



When he's very young, a simple, minimum cost camera is really preferable in most instances, but once he comes under the spell of real snapshooting, he merits—and should have—a modern camera of the better type.

Year after year, the idea of cameras as appropriate gifts for birthdays, graduation and other memorable occasions, has grown steadily. Last year, if you'll pardon the personal intrusion, I gave my own mother a simple little camera on her birthday. At first, she was frankly skeptical. She had never used a camera, always relying on my sometimes unreliable self. She was sure she would never master that camera. . . . Now it goes with her everywhere, much to our mutual joy.

To some folks, I wouldn't dream of giving a camera. They're not enough interested in other folks and places and life in general to get any fun out of it.

But there are others—the majority—to whom a camera would mean much.

What kind of camera? It depends entirely on the kind of person who is to receive it. Every youngster should have a chance at a camera, but only of the simplest, most inexpensive sort. By "inexpensive" I mean cameras costing from say, one to five dollars. They should be of any of the standard makes, using film available everywhere.

Of course, if you have a young friend who has shown more than average interest in picture making and has outgrown his simple little box camera, you can provide vast happiness by presenting him or her with a better camera.

Once you get above the five to ten dollar class, the variety of cameras to be had is bewildering. Of recent years there has been a tremendous increase in the use of so-called "precision" cameras — small cameras, beautifully made and equipped with all manner of useful gadgets. Their lenses are masterpieces, their adjustments more accurate than many a professional studio camera. Naturally, they cost money, plenty of money. Beginning at about $25, the prices of these miniature cameras range on up and up and up. If you're really anxious to spend a hundred dollars on a camera, you'll have no trouble at all. However, you can stay in the general neighborhood of fifty dollars and get some amazingly beautiful cameras. By "beautiful" I mean something so expertly designed and constructed that there's sheer delight in handling it.

Many of the miniature, precision cameras use very small-size film. The idea is that the small pictures are kept as records, while enlargements of the best shots are used by the proud owners to show what they've been doing.

Modern, fine-grain film, by the way, makes this procedure possible.

You need not, of course, consider the miniature camera in your gift hunting. For the average person you can select a camera with a reasonably good lens—one that's rated at f.6.3. or even f.4.5—and less a film big enough so that enlargements are not always necessary. The famed "post-card size" camera is a favorite and will probably remain so. There's a reason.

If it has been several years since you last looked at cameras, shop around just for the fun of it. You'll discover that things have been happening.

JOHN VAN GUILDER.

Cardinals Hoop League Leaders

Trim Imperial Groceteria Tuesday Night and Assume One Game Lead—Wynndel Hard Pressed to Beat Loallo.

Tuesday night's league basketball games attracted a large and enthusiastic crowd, who got a real thrill out of all three fixtures. Moore's Garrge walked over Pharmacy, 24-9. Wynndel took a hard fought game from Loallo, 25-24 The Cardinal Groceteria game, of course, was the biggest attraction, the redshirts winning 21-14.

In the first game the play was too one-sided to be interesting, with Moore's garage altogether too much for the druggists. Both teams were in really good form, with Pharmacy showing some of the winning spirit in evidence at the opening of the season. All Moore's team worked hard and for the losers Opal LaBelle starred. The teams:

Moore's Garage—Swain, Payne Crane, Abbott, Speers, Hare, Theo Tompkins.
Pharmacy—Os. LaBelle, E. LaBelle, Y. LaBelle, Olivier, M. Moore, Fay Tompkins, M. Learmouth.

Loallo certainly showed real form in their game against Wynndel and forced the play into overtime, the count standing 20-20 at the end of the regular playing period. Loallo were over anxious and were not as careful as necessary on the defence, which probably cost them the game. Play was marked by poor passing in the opening stages, but in the last quarter both squads were showing fine combination. The pick of the Wynndel quint was Os. Payette, with Buff Nastasi and Maddess playing superior ball for Loallo. Teams:

Loallo—LaBelle, Buff. Nastasi, Sam Nastasi, Goplin, F. Bourdon, Maddess, Truscott.
Wynndel—Joe Martell, Andy Hagen, Buster Martell, Elvin Hagen, Packman, Os. Payette, Cam. Payette.

In the third game a wild chorus of yells went up as Cards and Groceteria opened play. It was a great game to watch as at no time was either team definitely assured of winning until the last three minutes, when the Cards broke away and garnered seven points in quick succession.

The half-time score was 10-8 in Groceteria's favor, but at this point the Cardinals went to work, and in speedy fashion soon had the score at 12 10 in their favor. Groceteria met this rally and at three-quarter time the count was 14 all. In the final ten minutes there was no stopping the redshirts Howard Corrie leading a fast attack to give the Cardinals a 7-point lead, and a win by 21-14.

Both teams were at a disadvantage. Ben Crawford was missing from the winners' guard line, and Hunden was in no condition to be on the floor for the Groceteria. All hands played well, w th special mention due Homes and Doug. Corrie of the winners, and Sid Rogers, Jack Payne and Herb Couling of Groceteria. This win puts the Cardinals in undisputed possession of first place, with a lead of one-game over Groceteria. Teams:

Cardinals—H. Corrie, D. Corrie, Mark, Holmes, Ross, Gobbett, Cobus.
Groceteria—Payne, Martello, H. Couling, Downes, Hundon, Rogers, Bill Bourdon.

CARD OF THANKS

The last games of the regular basket ball league season will be played this (Thursday) evening at Park Pavilion. The playoffs are due to commence Tuesday night.

Take out your car license today and avoid trouble There are no days of grace this year, and the police will arrest all who operate with 1934 licences after March 1st.

Cecil Moore's Garage reports the past week an active one in Ford sales F. V. Staples has taken a 1935 V-8 standard sedan; S. A. Speers a V-8 light delivery, and T. H. Wilson a used light delivery.

John Carlson, whose health has been poorly of late, is discontinuing his milk business. His herd of cows has been purchased by R. A. Comfort of Creston Dairy, who is taking over the business as from today

PIPE FOR SALE—About 8000 feet of 1½ inch pipe, new threads and couplings and dipped, 11 cents. Also 2½ 3 and 4 inch. Fordson tractor, ploughs and buzz saw attachment going at $225. Phone 42X. Ted Baldwin.

The Rod and Gun Club had a fine turnout at their open meeting in the United Church hall Monday evening, at which timely talks on the Kootenay game and fish were given by Messrs Kearns and Robinson.

Creston's intermediate basketball squad were trimmed 18-6 in the first of the home and home games against Kimberley at Park pavilion on Friday night. The locals play the return game at Kimberley on Saturday night.

Monday, March 11th, has been fixed as the date for the meeting of ratepayers of Creston school district to consider en larged school accomodation at Creston. All the outlying districts have voted against the proposed consolidated high school here.

For the purpo e of giving growers, who have not yet registered, an opportunity to do so, the undersigned will be in Creston on Friday and Saturday, March 8th and 9th, be ween the hours of 10 a m. and 4 p m, at the Co-Operative tore. W. G. Littl john.

The ladies are in ited to World's Day o Prayer which will this year be held in the Presbyterian Church, under the direction of Mrs J. W. Dow, Friday, March 8th, at 3 p.m. Ladies of Trinity United W.M.S. and Christ Church W.A. are taking part.

By trimming the Imperial Groceteria 21 14 on Tuesday night the Cardinals have won the first game in the men's division of the local basketb ll league. Other games Tuesday night gave Wynndel a 25-24 win over Loallo, and Moore's Gar ge had no trouble of disposing of Pharmacy 24-9.

The annual meeting of Creston Valley Liberal Association is called for eight p.m., Monday in the United Church basement. Along with the election of officers, delegates will be chosen for the East Kootenay federal Liberal nominating convention, which is expected this month.

The first of a series of home bridge parties in aid of the hospital was a most successful and enjoyable affair, at the home of Mrs. M J. Beninger, who was assisted by Mrs. Jas. Carr Eleven tables were in play and the high scores were made by Mrs. A E. Davies and Mrs F. C. Rodgers, with consolation honors going to Mrs. F. V. Staples. Lunch was served after play.

Both Creston teams are out of the running for the championship in the East Kootenay basketball league as a result of two games at Kimberley on Saturday night. Creston girls were beaten by the rather impressive score of 64-29, after they had bested their rivals at Park Pavilion a week previous to the tune of 25-15. The men went under 29-22, after taking Kimberley at Creston by a three-point margin the week previous.

Creston badminton club was represented at the East Kootenay badminton tournament last weekend and made a fairly good showing, although they did not bring back any silverware In the mixed doubles all were knocked out in the first round with the exception of Miss M. Hamilton and O. Sostad and Miss H. Hobden and C. H. Hare. In the ladies' doubles, however, they fared well, Misses M. Hamilton and Jean Henderson reaching the semi-finals in the consolation play, and Mrs. Levirs and Miss M. Smith playing through to the finals in this class, but lost it by default as Mrs. Levirs had to play basketball at Kimberley that night. Creston got nowhere in the singles or men's doubles.

T. H. Wilson was a business visitor at Fernie last week.

Mr. and Mrs. E. E. Cartwright were visiting with Kimberley friends a few days last week.

Miss Margaret Walkley of Cranbrook is a visitor here this week, a guest of Miss Ruth Cartwright.

Mrs. Frank Celli, who has been visiting with her parents in New York for some weeks, returned on Friday.

Mrs. R. M. Telford was a visitor at Cranbrook at the end of the week, taking part in the badminton tournament.

Mr. Clark, sr., Mr. and Mrs. Ed. Clark, and Mrs. J. Mermet, returned on Saturday from a motor trip to California.

Richard Thurston, jr., left for Vancouver at the middle of the month, in which city he expects to remain for some time.

Mrs. Swain and Principal Cobus were at Kimberley on Saturday playing on the Creston basketball teams in the league game in that town that night.

At the ratepayers meeting on Tuesday night the consolidated high school proposition was very thoroughly discussed but due to present conditions it was not thought wise to enter into the project.

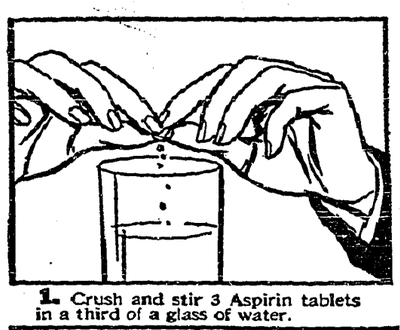
CRESTON SCHOOL DISTRICT

MEETING OF RATEPAYERS

The qualified voters of Creston School District are hereby notified that a Special Meeting, as authorized by the Public Schools' Act, will be held on MONDAY, MARCH 11th, 1935, at 7.30 p m., at the Schoolhouse, Creston, for the purpose of discussing more school accommodation.

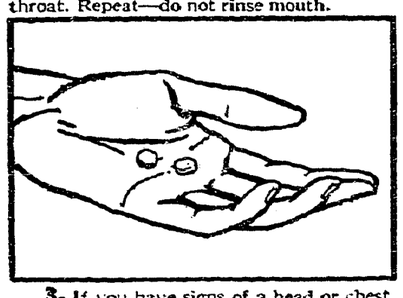
By order of the Board of Trustees,
H. McLAREN, Secretary.

NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!



1. Crush and stir 3 Aspirin tablets in a third of a glass of water.

2. Gargle thoroughly—throw head way back, allowing a little to trickle down throat. Repeat—do not rinse mouth.



3. If you have signs of a head or chest cold take 2 Aspirin tablets—drink a full glass of water. Repeat in 2 hours.

Rawness, Irritation Go at Once
Note Directions for New Instant Treatment

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir 3 *Aspirin* tablets in ⅓ glass of water and gargle with it twice.

Aspirin tablets disintegrate so *completely* no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this *fundamental treatment* instead of less effective old-time "washes" and "antiseptics." Remember this. And when you buy, see that you *get* ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer on every *Aspirin* tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

WORLD HAPPENINGS BRIEFLY TOLD

T. W. Grieve of Montreal was elected president of the Canadian Produce Association at its annual meeting in Toronto in conjunction with the 23rd annual convention.

Rear-Admiral Richard E. Byrd, who arrived at Dunedin, N.Z., with his second Antarctic expedition, disclosed the expedition is $50,000 in debt.

Toronto Centre presbytery of the United Church of Canada voted 51-20 in favor of ordination of women as ministers. The decision will be passed on to the general council of the United Church.

Canada's revenues for present fiscal year are running $31,000,000 and $32,000,000 ahead of last year. The Dominion's revenues are figured every day. They include customs, excise and income tax receipts, post office revenues, tax on gold and several minor sources.

Dr. H. A. Bruce, lieutenant-governor of Ontario, urged Toronto city council to start immediately on a slum clearance program. Dr. Bruce stated Canada was lagging behind the rest of the world in state-assisted housing and it was up to Toronto to give leadership to the rest of the Dominion.

Proves That Earth Wobbles

Stars Once Seen Now Do Not Rise Above Horizon

When the astronomers of ancient Greece grouped the stars and found names for them they listed constellations that can now longer be seen from Greece. In this way they supplied Sir James Jeans, the British astronomer, with a proof of a scientific fact dscovered long years after they departed this terrestrial planet. Among the constellations named by the men of Greece 2,500 years ago are some which, although visible then, cannot be seen in Greece to-day because they never rise above the horizon. The wobble, as it is called, is a movement of the spinning earth in which its axis makes a small circle once in every 26,000 years; in other words, each pole describes a circular path in the heavens at the speed of about a foot a year. This slow movement is caused by the pull of the sun and moon on the bulging equatorial part our globe.

Little Journeys In Science

MATCHES

(By Gordon H. Guest, M.A.)

Perhaps the greatest discovery ever made by man was that of fire; and one of the most useful, if not the greatest, of inventions was that of producing fire by the use of matches. Friction matches containing the element phosphorus were first introduced by an Englishman, John Walker, about 1826. At the present time there are two general types of match in common use, namely the "strike-anywhere" and the "safety" match. The "strike-anywhere" variety is undoubtedly used the most and contains in the tip the following substances; potassium chlorate which is rich in oxygen; paraffin or sulphur; a binding material such as glue; a filling material such as ground glass, and a compound of phosphorus and sulphur known by chemists as phosphorus sesquisulphide. When the ordinary match is rubbed against a rough surface, enough heat is produced by friction to ignite the phosphorus. The heat produced by the burning of the phosphorus is increased by the burning of the potassium chlorate and carried to the wood by the slowly burning paraffin or sulphur. Other substances such as starch, clay, or plaster of Paris are often added to the match head to keep it dry or to regulate the speed of combustion.

In the "safety" match, red phosphorus, some substance which gives off oxygen readily, such as potassium chlorate, and some gritty material, such as powdered glass, are mixed with glue and placed on the side of the match box. The tip of this type of match contains potassium chlorate and an easily combustible substance, usually a compound of antimony and sulphur known to the scientist as antimony sulphide. The match cannot easily be ignited by friction except on the prepared surface on the box.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT
(Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Have you taken advantage of the author's offer to read your handwriting? It is an opportunity to know yourself better, and it may put you on the path to greater things. Read the offer following this article.)

It is not surprising that many of the letters I receive from readers of my articles ask whether there is any indication of talent. It is natural that people should be vitally interested in finding the best line of endeavour to follow, and any information that helps them to get the best out of their capitalization and make the utmost use of their latent possibilities is always welcome.

Handwriting does indicate talent, and this is not to be wondered at when we realize that handwriting is from the brain, and the brain is the source of individual power and capacity.

But the mere possession of a talent is by no means everything. We all know people who art talented in particular way, but who do not reach any heights of progress, who, in fact, are drifting along without ever doing anything really worth-while.

One case in particular comes to my mind of a man who has a rare talent for drawing. He can do things with a pen and pencil that I have rarely seen equalled by a person without any training along that line. Unfortunately, he happens to be blessed with more than enough of this world's goods, and is in a position where he does not have to work very hard for his money.

The result is that he has never gone to any trouble to bring out the best that is in him, and the world has lost a first-class artist.

This case will illustrate my meaning very aptly. I repeat that the mere possession of a talent does not imply that the talent will be used. There are certain essential characteristics that must be used in order that the talent can be brought into fruition.

The most important of these are Determination, Persistence and Willpower.

Many of my correspondents reveal talent potentialities, but they lack one or more of these other traits that are so vital to progress in anything that you take up.

There are a lot of people who have made real successes of themselves, without any hereditary or inborn talent, because they have had the will and determination to get somewhere. They have worked hard and made sacrifices in order that they might gain success.

And inversely, as I have shown, there are others with the really vital spark of inspiration lying within them who have failed because of an inability to drive themselves on.

Versatility is a good thing to have, but specialization more often leads to success. Make up your mind to follow a single line, and drive yourself forward with everything that you have along that single path.

Too many irons in the fire often means that none of them are properly attended to, and the result is failure.

Miss J. C., Regina.—You are so versatile that it ceases to be an advantage, and becomes a positive menace to you. You can do so many things fairly well that the trouble is to find one thing to specialize on. But you must do this, if you really want to get anywhere. Take up your singing, and put your whole heart and soul into it. Obtain proper training, and make up your mind that you are going to succeed as a singer. That is the only way.

* * *

A handwriting analysis may open the door of opportunity to you. Find out what your writing shows, as well as that of your friends. Send specimens of the writing you wish to be analysed, stating birthdate in each case. Enclose 10c coin for each specimen, and send with 3c stamped addressed envelope to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. All letters are confidential, and replies will be forwarded as quickly as possible. Some delay is unavoidable owing to the large number of letters coming in.

Another Record Claimed

Man Keeps Motorcycle Engine Running For Eight Days

For 5,836 miles a motorcycle, with sidecar attached, travelled along ordinary roads in Australia without a moment's stoppage of the engine, and a world record is thus claimed by the man who rode the combination most of the time, Victor Barclay. He was relieved at intervals by two others but the engine was never allowed to stop at the change-overs. The ride took a little over eight days, the speed averaged being 30 m.p.h. The engine finally stopped owing to a defective plug.

PETER UNMASKS FALSEHOOD AND HYPOCRISY

Golden text: Wherefore, putting away falsehood, speak ye truth each one with his neighbor: for we are members one of another. Ephesians 4:25.

Lesson: Acts 5:1-42; 8:4-25.

Devotional Reading: Psalm 139:17-24.

Explanations And Comments

Peter Unmasks Falsehood and Hypocrisy, Acts 5:1-4. But (in contrast to Barnabas' true generosity; see the preceding verses), another member of the Christian community, Ananias, sold some property, kept back part of the money received, and, with the connivance of his wife (Moffatt's translation), brought the rest of it and laid it at the apostle's feet, placed it at their disposal, as if it were the whole. "So it happens that he rather honors the feet of the apostles than the eyes of Jesus," comments Calvin.

Peter saw through his hypocritical act and sternly asked, "Ananias, why hath Satan filled thy heart to lie to the Holy Spirit, and to keep back part of the price of the land?" He had not sinned against men but against God.

"While it remained, did it not remain thine own? And after it was sold, was it not in thy power? How is it that thou hast conceived this thing in thy heart?" Peter's words show that the selling was wholly voluntary, and that the sin of the couple was not in retaining part of the money received, for they had a perfect right to do this, but in pretending that the part which they offered was the whole, in seeking to gain unmerited reputation for liberality. "Thou has not lied unto men, but unto God." A lie may be acted as well as spoken.

The Fate of Ananias, Acts 5:5, 6. At these words Ananias fell dead, and his body was taken up and immediately buried. Here we may well recall the sensible words of Dr. Faunce that our mission is not to justify the ways of God to men, but to rectify the ways of men to God.

Nearly 3,000 miles of canal are in use in England.

New Sun Reflector

Very Simple Device Has Been Invented In Germany

A simple device, consisting of a thin sheet of highly polished metal cut somewhat in the shape of a kidney, is a German invention designed to bring sunshine into every home. The reflector is especially useful for directing the health-giving rays of the sun to the face. It also can be used in treating other parts of the body where solar heat brings beneficial results. The polished sheet of metal is corrugated in such a way that its many flute-like ridges act as multiple reflectors which intensify the heat of the sun's rays.

A plant in Norway produces rust-free and acid-resisting steel, having an annual capacity of between 40,000 and 50,000 metric tons.

FALSE
DR. WERNET'S POWDER
Grips plates so firmly and snugly they can't slip—you never know you have false teeth. Dr. Wernet's Powder is pleasant and never causes soreness—it is the world's largest seller—prescribed by leading dentists—costs but little but blissful comfort is yours all day long.

MECCA OINTMENT

Doctors advise this *natural* corrective for Constipation!

Not a drug . . . safe, effective, economical!

Stop sour stomach, bad breath, headaches and all constipation ills. You can do it easily, cheaply with Quaker Bran.

Quaker Bran, the coating of the wheat, is milled so soft it cannot irritate. Yet it is effective. It works with nature to produce normal, healthy bowel movement . . . persuading the intestinal muscles to *normal* activity.

Remember, Quaker Bran is different from all *prepared* bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

Serve it with your regular cereal each morning or in muffins, cookies, etc. There is a recipe lbook in every package.

CHAPTER XII.—Continued

"It's peyotl," he said sharply. "I know the damned stuff. Peyotl is the old Aztec name. All I know of it is that it is one hell of a kind of dope. After a little while it crazes the user . . . distorts his ideas of right and wrong, you know. If you found those half-smoked stubs by the camp fire, it's pretty clear that whoever was there was usin' peyotl cigarettes. It's against the law, of course."

"Do you happen to know whether old man Kane uses the stuff?"

"I'm damned sure he does not," said Jameson. "He gets bung-full on red-eye when he comes to town and he gets the Indians to make tizwin for him sometimes, but I'm sure he doesn't dope."

"Think Dustin uses it?"

"Not for a minute. Hardly any one uses it now. The Indians used to use it because they like to get all hopped up and it was too risky sellin' whisky to Indians. A federal offense, you know. It crazes 'em. I only know one fool about here who ever uses the stuff and that's Gregg out at the Broken Spur. They call him 'Peyotl' Gregg because of the way he gets full on it. He's a half-wit who's been workin' on the Broken Spur ever since Dustin and Goddard got it."

"Humph! If you're right. . . . then this man Gregg must have been at that camp in the hills. If Kane was there then this man Gregg may-be can tell us were we can find him. 'Tell me this, Jameson . . . What's the minin' law? Can a man, who locates an ore-vein, follow that vein when it leads into and under another man's land?"

"I'm pretty sure he can," said Jameson after a moment's thought. "That is . . . he can follow a vein that he finds off a man's land. He can't go on a man's land, pick up a vein and follow that. It's got to be done fairly. . . . Find a vein on his own land; trace it under some one else and follow it there unless the land owner beats him to it. See? Why?"

"Well, it sizes up this way to me. . . . Dustin and Kane have found ore on the Hour-glass. Carr doesn't know about it. Dustin has bought up a note that Carr gave Pegram and Dustin will use that note to try to make Edith marry him to save her father. That note gives Dustin half ownership in the Hour-glass and will make Gerald Keene, who owns the other half of the Hour-glass, a partner of Sam Dustin and, if Dustin's plans work out, he will marry Edith Carr.

"Just what do you want?" demanded Jameson curtly.

'First of all I want to find old man Kane. He's the key to the puzzle. He's got to tell us just what kind of a deal he's made with Dustin. He can tell us where and how he found that ore. And if it's on the Hour-glass, whether Dustin knew it was on the Hour-glass when it was located. He may be able to tell us if this man Dustin uses peyotl. If he does, he's probably not responsible for his actions."

"You're barkin' at a knot," said Jameson forcibly. "Sam Dustin is always responsible for his actions. Look here, Stone! What stake have you got in this. You're playin' too close to your lap for me. Come clean, old man."

"You know how the Hour-glass is owned, don't you?" asked Stone suddenly.

Jameson did not know and said so.

"Joe Carr owns one half of it. Gerald Keene, the nephew of old Peter Vinton, owns the other half. If one of them dies the survivor gets all."

Jameson stood staring at him for a moment. Then he went to a closet and came back with bottle and glasses.

"You're tryin' to talk like a sane man," he said, "but your words just don't target. You don't know this man Dustin. By Carr's note, Sam Dustin practically owns Carr's half of the Hour-glass ranch. Keene owns the other half. A gold-mine has been found on the Hour-glass. Will Sam Dustin give half of the Hour-glass with its gold mine to a man he never saw? What deal will he make with this Gerald Keene? I'll tell you. In some way or other, in some damned dark, deep way that we couldn't think of, Gerald Keene will lose his share of the Hour-glass and Sam Dustin will own it."

"Talk your age," said Stone laughingly. "This man Dustin, that you all credit with superhuman powers, can't work miracles, I reckon. The main thing for me to do is . . . find this man Kane. He's the key to the whole darned mess."

"You're probably right"—Jameson nodded curtly—"but consider this. . . . In the camp near where that gold-ore was found you found those pieces of peyotl cigarettes. I don't believe anybody about here but that man Gregg ever smokes them. If our guess is right, then Peyotl Gregg was with the man who found or located that ore vein. . . . Probably old man Kane. The fact that Sam Dustin had that package in his coat pocket implicates him, of course. You can always get him under the narcotic law. He can explain it, of course. . . . But we don't need that now. Your best bet to find out exactly what has taken place is . . . question Peyotl Gregg or . . . find Dad Kane . . . And for God's sake tell his man Gerald Keene to watch his step when he gets here."

"What do you mean?" demanded the mystified Stone.

"You half-baked idiot! . . ." Jameson flung himself across the desk. "This man Gerald Keene represents one-half of the Hour-glass. Sam Dustin virtually owns the other half in the note that he holds from Joe Carr. Gold has been found on the Hour-glass and Dustin knows about it. Do you want to see Sam Dustin marry Edith Carr?"

There was no doubt in Duro Stone's answer to that question.

"All right! Then carry out your first plan. . . . Find Dad Kane! I'll start a still-hunt for him. In the meantime we might try a hand at Peyotl Gregg if we can find him."

With those words in his ears, Duro Stone took his departure.

CHAPTER XIII.

Spike Goddard watched Dustin ride up to the ranch-house of the Broken Spur and turn his horse over to one of the hands. With one glance at his partner Spike emitted a long, low whistle, went to the office, got out decanter and glasses and sat down to wait. Presently Dustin stormed up the steps, banged into the house and into the office, where he stood staring at his partner. Spike's very silence condemned him; also it acted on Dustin like salt on an open cut.

"What the hell ails you?" demanded Dustin curtly. "Anything happen to you?"

Spike shook his head. "Nothin' ever happens to me," he said. "I stay home and 'tend to my knittin' and nothin' ever happens to me. If I ever went traipesin' over the valley trailin' some red-headed girl who likes me just as much as a prairie-dog likes a ground-rattler, I might expect somethin' to happen to me but it never does. . . ."

The bottle whizzed past his head and broke in a score of fragments on the wall. He retrieved his glass that had escaped ruin and laughed.

"You go on an' answer your own question. What all happened to you?"

Dustin told him sketchily and Spike listened in evident disbelief. When that disbelief grew too great for words, Dustin turned on him in growing wrath.

"Listen here," he said. "I'm goin' to come clean with you, Spike. Then you'll understand what I'm after."

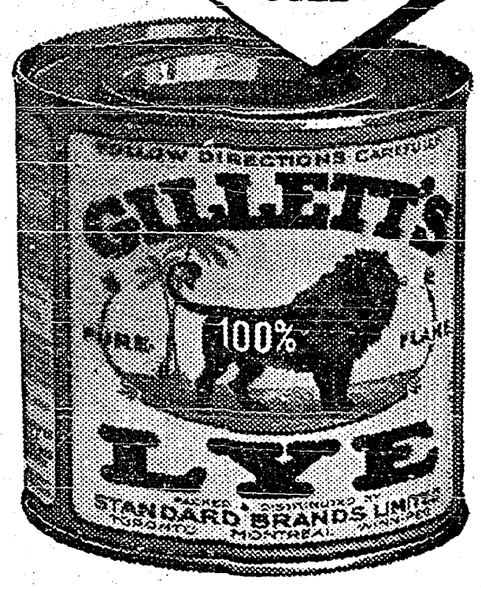
"I know," said Spike guardedly. "You're after that red-headed girl of Joe Carr's."

"Yes and by God, I'll get her, too. I went over to the Hour-glass to put it up to her, but she was out ridin' with that damned drug-store cow-boy, wanderin' over the country. Six months from now she'll be my wife and she'll have her own kitchen to tend to. She'll be stayin' home then. . . ."

"Looks like that ambition ought to keep any red-headed woman content," said Mr. Goddard, grinning. "It looks to me like you've got the means to persuade her. Why didn't you tell old man Carr that you've bought up his note to Pegram for eleven thousand dollars and that if Edith don't marry you, they're both headin' for the Poor Farm? You'd have him short if you spring that on him."

(To Be Continued)

GREASY POTS AND PANS NEARLY DROVE ME WILD UNTIL I USED



It lifts grease right off without scrubbing

Just use a solution of 1 teaspoonful of Gillett's Pure Flake Lye in a quart of *cold** water. Instantly the grease dissolves—without scouring! Use Gillett's Lye whenever you want an effective household cleanser. Frees clogged drains, cleans toilet bowls. Kills germs, and destroys odors. Order a tin from your grocer!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Send for the *free* Gillett's Lye Booklet. It tells how this powerful cleanser and disinfectant shortens dozens of cleaning tasks. Also gives full directions for soapmaking, thorough cleansing and other uses on the farm. Address: Standard Brands Limited, Fraser Ave., & Liberty St., Toronto, Ontario.

GILLETT'S LYE EATS DIRT

HEADACHE, BACKACHE?

Mrs. J. W. Flanagan, 6 Labatt Ave., Toronto, Ont., says: "I had headaches, pains in my back, had no appetite and would feel dizzy and faint. I was so weak I could hardly keep up. I took Dr. Pierce's Favorite Prescription and it seemed to give me new life."

New size, tablets 50 cts., liquid $1.00. Write Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

A New Occupation

Proprietor Of Belgrade Store Does Sums For Students

"Sums done for three halfpence a time," is the notice that has been put up in the window of a shop situated opposite a school in Zagreb, near Belgrade, Serbia. The proprietor does a roaring trade. Every evening students deliver their mathematical homework, and every morning on their way to school they call for it—correct in every detail.

Little Helps For This Week

"The beloved of the Lord shall dwell in safety by Him, and the Lord shall cover him all the day long." Deut. 33:12.

Whate'er events betide,
Thy will they all perform;
Safe in Thy breast my head I hide,
Nor fear the coming storm.

I have seemed to see a need of everything God gives me, and want nothing that He denies me. There is no affliction but either in it, or after it, I find that I could not be without it. Whether it be taken from me, or not given me, sooner or later God quiets me in Himself without it. I cast all my concerns on the Lord, and live securely on the care and wisdom of my heavenly Father. If my ways are in a sense hedged up with thorns and grow darker and darker daily, yet I distrust not my God in the least, and live more quietly by faith than I would do if I possessed everything.

Meat packers report that more meat was consumed in the United States in 1934 than ever before in history.

Glasgow, Scotland, and the Isle of Man are to be connected by an air service.

The Full Vitamin Value of Cod Liver Oil PLUS Further Body-Building Virtues

Generations have proved the body-building, energy-giving power of pure cod liver oil. Generations, too, have proved that Scott's Emulsion of Cod Liver Oil gives you all these, PLUS easier assimilation, pleasanter taste, and the added value of hypophosphites of lime and soda. PLUS values found only in Scott's Emulsion.
