THE CRESTON REVIEW

VOL XX. CRESTON, B. C., FRIDAY, NOVEMBER 30, 1928 No. 43

Lister

Bert Yerbuey and Harold Langston left this week for Boswell where they are employed on road construction on the new Kuskanook-Grey Creek highway.

There will be the usual Saturday night bridge and whist at the Huscroft school on Saturday, December 1st, with cards at 8 o'clock.

Harry Smith, who has been employed in the Edmonton, Alberta, district for the past two years, is a visitor at Lister this month, a guest of Walter Edwards.

Rev. A. Garlick is due here on Sunday morning for Anglican Church service at 11 o'clock. Sunday school will be at 10.

Mr. Willcox of Salmon Arm, the provincial poultry R.O.P. superintendent, was here at the end of the week, and during his stay officially entered another lot of birds at the Powers ranch in the R.O.P. class. Mr. Powers now has some 50 birds in the record of pronuction work.

The first snowfall of the season on Monday necessitated withdrawing trucks from the gravel haul on the road work, and they are replaced by four teams.

Col. Lister was a Boswell visitor on Friday last, where he officiated at the opening of the fruit fair at that point.

Between old hens and dressed fowl Lister is doing considerable poultry shipping at present, most of it going to either Trail or Kimberley.

There were eight tables of players at the Community Society bridge and whist on Saturday night at which the prize scores were made by Mrs. Malthouse and A. W. Sinclair at bridge; and Mrs. Yerbury and George Mitchell at oldstyle whist. There was the usual fine lunch and fine time.

Canyon City

Mr. Lasher of Glenlilly was a weekend visitor here, a guest of Mr. and Mrs. Knott.

Jas. Bateman is able to be around again after being laid up with a rather severe attack of stomach flu.

John Nygaard was one of the few lucky hunters at the weekend to bag a deer.

Grover Kifer of Yahk is here for a month at his ranch at Canyon.

Principal Kolthammer and Miss Lister are employing their spare time training the children for the Christmas concert, which will be held the third week in December.

It is authoritatively reported here that Miss Signe Nelson and Oscar Hougland, —both of Canyon, were married at Calgary, Alberta, about the middle of November.

United States Friends

Send a Gift to Friends or or Relatives across the line from our Catalogue of Gifts from a High Class Shop in the United States. There will be no duty, and the prices are very reasonable. Send your own personal greeting and address label.

Creston Drug & Book Store
GEO. H. KELLY

A. G. Samuelson and L. Moberg have just taken a contract for pole making with the J. B. Winlaw firm, operating on the limit just below Creston.

Mrs. Kolthammer entertained on Saturday evening at a farewell reception for Mrs. Ridd, who is leaving to make her home with Mr. Ridd at Breton, Alberta.

Mrs. W. Ridd and son, Will, left on Tuesday for Alberta. The latter goes to Carmangay, where he will attend school until midsummer, and Mrs. Ridd goes to Breton, where Mr. Ridd is employed at present. Bill, particularly, will be missed because he is probably Canyon's best junior pianist, and took a part in all the entertainments given here. Best wishes of a host of friends are extended, as in five years residence here the Ridds have been useful citizens and good neighbors.

Alice Siding

Miss Louise Webster, who has been on an extended visit at her home here, left last week on a trip to California before returning to Vancouver.

Mrs. Foster, who has been on a visit with her parents, Mr. and Mrs. R. Stewart, left last week for Cranbrook, where she has secured a position.

Bill Kelly returned at the end of the week to Elko, and is accompanied by Everard Constable and Bob Marshall, who are on a hunting trip in that section.

Principal Lukas is busy with the erection of a garage on a site near the Alice Siding school teacherage.

Mr. and Mrs. John Kelly have just returned from a two weeks' visit with Kimberley friends.

Mrs. Moore has returned to Cranbrook after a couple of weeks' visit with Mrs. Marshall.

John R. Miller is another of our residents who is enlarging his poultry house and is going in for egg production on a commercial scale.

Harry Compton of Kingsgate is spending a few days at his home here.

Sirdar

There was a tea in the schoolhouse on Saturday. The hostesses were Mrs. Cameron and Mrs. Bleumenauer Proceeds go to the Community Hall fund.

Rev. W. A. Greer of Creston was here for Presbyterian Church service on Wednesday.

Mrs. B. F. Whiteside was a visitor here from Crowsnest a few days last week, a guest of her sisters, Mrs. Martin and Mrs. Heap.

Mr. and Mrs. Quaife and children of Cranbrook arrived on Wednesday and have rented the house of S. Pascuzzo.

Mrs. Martin, Mrs. Heap and Miss Williams were at Creston on Saturday for the bazaar put on by the Anglican ladies.

Mr. and Mrs. Quaife of Taber, Alta., arrived on Thursday on a visit with the former's brother.

O. Sullivan, C.P.R. investigator is a visitor in Sirdar.

Knights of Pythias Officers

Wild Rose Lodge, Knights of Pythias, met November 22nd, for the election of officers for the ensuing term. The following were elected.

C.C.—E. Mallandaine.
V.C.—R. M. Telford.
Prelate—Wm. Truscott.
M. of W.—V. Mawson.
K.R. & S.—C. F. Armstrong.
M. of F.—G. B. Henderson.
M. of E.—A. E. French.
M. of A.—S. Steenstrup.
I. G.—Joe Romano.
O. G.—R. Penson.

During the evening ranks were conferred on two new candidates, and after the lodgework the members gathered at the luncheon table to wish bon voyage to Bro. C. W. Allan, who is leaving on a visit to the Old Country.

Erickson

F. Terace, Dominion fox inspector, was a business visitor at the Putnam ranch last week.

Lloyd Cartwright and Roy Dickson, who have been at Cranbrook for a few days, returned the latter part of the week.

Alex. Derby of Cranbrook and Mr. Bradley, P. Burns representative, were business visitors at Erickson this week.

Walter and Robert Dodds left a few days ago for Cultus Creek, where they will operate a trap line this winter.

Erickson had its first snow on Monday, 26th. The fall was about an inch, which disappeared next day.

E. Penson and Gerald Craigie are just back from a successful deer hunt. In the kill was a black tail. W. S. Bush and son also passed through Erickson for Creston with a venison.

R. McMaster and son, Mac, were Yahk visitors during the week.

Frank Staples was at Cranbrook a couple of days at the end of the week on a business visit.

Five Features to Four Programs

Press reports from points in southern Alberta where the four night Chautauqua has already appeared indicate that the 1928 programs of this well known organization will furnish Creston with two plays, a big night of music, and a lecture with musical prelude that are sure to please.

Ticket selling will commence today at popular prices of $2 to adults and $1 to children for pasteboards admitting all four nights. For those who want reserved seats these can be had at the drugstore at 75 cents for the four evenings. Only a limited number of these will be sold.

One of the plays to be presented "Let's Go Somewhere." This is a three-act comedy by Robert Mortill Sand. It is a story of a modern home, a beautiful love story with a happy ending and a moral for those who care to look for it. It deals with the problems of the modern life of which we are all familiar. Many young people who see this play will, as it were, be looking into a mirror and beholding a true reflection of themselves.

The Carlyle Novelty Trio will be given on the evening of the second day and will consist of mandolin, guitar, violin, soprano solos and ensemble. Pianologues and clever whistling numbers will be featured. This mixed trio has met with conspicuous success on the largest Chautauqua and Lyceum circuits. While there is great variety in this offering, quality will be the keynote. Chautauqua patrons are thus assured of a real entertainment of great merit.

One of the popular Chautauqua Lyceum lecturers of the day is Charles H. Plattenburg, well-known editor and authority on community building, who will be heard in his remarkably constructive lecture, "The Old Town in a New World." This great lecture should be heard by everyone in the community. He is known practically all over the continent for his stirring addresses, which are real contributions to individual and community progress. Mr. Plattenburg is famous for his spontaneous wit and humor which make him an outstanding platform favorite.

The Martin Erwin Players will again distinguish themselves in the production of "Peg o' My Heart" as they did in "Smilin' Thru." This play, the most appealing of Irish comedies, deals with vital themes—youth and love—and is one of the greatest romantic dramas ever produced. It has innumerable thrills. Laughter and tears follow each other in quick succession, and the play ends with a scene of touching beauty.

The Massey Five, versatile musicians bring to Chautauqua a program of classical and old-time fiddling, together with modern melodies that will please any lover of music.

Dot Massey has been playing the violin since he was eight years old. He is also a good cornet player, and plays the piano and sings. Allen Massey is a banjo player. Mrs. Velma Massey Mabie is a pianist and has a very beautiful contralto voice. Milton Mabie plays the saxophone and mellophone. He also possesses an excellent tenor voice. Mr. Massey, the father of this most interesting group of family musicians is an old-time fiddler and promises that the old-time music part of their program will please any old-time music lover. He declares that "old fashioned fiddling" is his "specialty."

SALE of WORK and TEA

The Presbyterian Ladies' Aid announce their Annual Bazaar and Tea in

Trinity Church Basement

SAT., DEC. 1st

3 to 5.30 p.m.

Fancy Needlework
Novelty Table
Home Cooking
Candy

Goods of Quality at Popular Prices.

AFTERNOON TEA Served

Local and Personal

A meeting of Chautauqua guarantors will be held at the Bank of Commerce on Monday evening at 8 o'clock.

LOST—Big bay horse with white forehead. Reward to party giving information leading to recovery. E. F. Arrowsmith, Creston.

The Ellen Dow Club of St. Stephen's Church are having a 15c. tea and sale of work at the home of Mrs. McCreath on Saturday afternoon, December 15th.

Remember the shooting match at Dan O'Neil's is to start at 10 a.m., on Wednesday, December 5th. 12 geese will be shot for, followed by a shoot for 4 turkeys.

The Presbyterian Ladies' Aid remind of their annual sale of fancy needlework, candy, home cooking, with novelty table and serving of afternoon tea on Saturday afternoon, December 1st, in the basement of Trinity Church.

Nine tables of players were on hand for the bridge whist given by the management committee of Christ Church at the Parish Hall on Friday night The high scores were made by Mrs. S. A. Speers and Mr. Howell, and the second prizes went to Mrs. Dolf Weir and W. G. Littlejohn.

Christ Church Ladies Guild had exceptionally generous patronage at their 1928 bazaar at the Parish Hall on Saturday afternoon, at which the cash intake was close to $245. Of this amount $40 was taken at the plain sewing and home cooking booth conducted by the Erickson branch of the Guild.

Louis ("Wild") Ernest a local Indian who had just been released from jail about two weeks ago, was gathered in on Friday by provincial police H. McLaren on a charge of breaking into a C.P.R. box car at Kootenay Landing on Thursday last, and stealing five cases of liquor. Due the effective work of Mr. McLaren all the liquor was recovered except a dozen bottles of Scotch and three bottles of wine, which had been consumed by Louis and another Indian friend. The pair are now in custody at Creston and will come up for trial at the end of the week.

Dr. Henderson, coroner, and provincial police H. McLaren were called to Kid Creek in the Kitchener district on Monday night in connection with the death of a lumber worker, Edward Bickford, who died suddenly from heart failure while chatting with a number of the employees of Cranbrook Sash & Door Company in the bunkhouse that evening. Although deceased was quite well known in East Kootenay lumber camps no trace could be had of relatives and the body was buried at Creston cemetery on Wednesday, Rev. A. Garlick conducting the burial service.

Creston is now enjoying the very best of long distance telephone communication both east and west. The improved service to Nelson was inaugurated Thursday last when the new copper line between Creston and Kuskanook and other improvements along the lake to Procter were completed. Conversation with Nelson can now be carried on as distinctly as though the party talked to were but a block away. All the telephone lines in the Kootenays are now controlled by the B.C. Telephone Company and Manager Nicholson is determined to maintain the service up to the present high standard.

Wynndel

Mrs. M. Wigen and young son left on Monday on a visit with friends in Nelson.

Mrs. Nedig of Lethbridge, Alberta, who has been visiting with her granddaughter, Mrs. R. Dalbom, left last week for her home.

Eric Wood of Kimberley is spending a holiday at Wynndel, a guest of his parents, Mr. and Mrs. Jas. Wood.

A. McL. Fletcher, fruit inspector, with R. G. L. Clarke of Vancouver, chief Cominion fruit inspector, and Mr. McIntosh of Ottawa, Canadian fruit commissioner, were here on Thursday last inspecting the pre cooling plant.

Mr, and Mrs. R. Dalbom were visitors to Bellvue, Alberta, for a few days, returning on Monday.

Teachers and school children are busy preparing for their Christmas concert.

"Slumberland," a musical fairy play, will be presented in the old schoolhouse on Saturday night, December 1st, at 8 o'clock sharp. Admission 50 cents. Children 25 cents. Proceeds to W.A. and United Church.

The W.A. sale on Tuesday was a huge success, the amount realized being well in excess of $100. The winner of doll and bassinet was Bert Sang of Cranbrook. Winner of cushion was Mrs. Parkin of Creston, and Mrs. Stevens of Creston had the lucky ticket on a brocaded scarf. Full particulars will be given later.

"Slumberland"

WORLD HAPPENINGS BRIEFLY TOLD

Plans are being made for construction next spring of an airport at Chicoutimi, Que., for land and seaplanes.

The financial collapse of Russia is imminent, according to a ministerial statement in the British House of Commons.

A tri-city air service between Seattle, Victoria and Vancouver and a service between Seattle and Alaska will be started next April by the Union Air Lines.

By the end of this year it is expected that the British Columbia government will have prepared for Lord Lovat a settler scheme, Premier Tolmie says.

The Graf Zeppelin will make no second trip to America this year. The Zeppelin works in announcing this, said that the necessary supply of gas was not available.

Major Yochio Inouye, counsellor at the Japanese embassy at Buenos Aires, who was drowned in the sinking of the Vestris, has been posthumously promoted to lieutenant-colonel.

The Canadian Memorial Chapel, a sanctuary in memory and in honor of the seventy thousand Canadians killed in the war, and erected in Vancouver through the efforts of Lieut.-Colonel the Rev. G. O. Fallis, B.D., C.B.E., has been opened there.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passage of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Early Use Of Wood-Pulp

Paper was first made in Canada about 100 years ago, but prior to 1860 no wood-pulp was used in its manufacture, rags being the chief raw-material.

Minard's Liniment for Chapped Hands.

British scientist says he has discovered that what goes up need not necessarily come down. Old stuff. Did he never hear of the cost of living?

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed.

After trying many treatments, in vain I at last decided to try

MILBURN'S HEART AND NERVE PILLS

and in a surprisingly short time they did me much good.

Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Branch Line Construction

More Than 330 Miles Of New Lines and 71 New Stations Built By C.P.R. In Past Season

The building of more tran 330 miles of new branch lines, with 71 new stations and shipping points sums up in brief the construction programme of the Canadian Pacific Railway in Western Canada during the past summer, according to D. C. Coleman, Vice-President, Western Lines. By this means hundreds of farmers had been brought much closer to transportation facilities, and thousands of acres of rich agricultural land had been made much more attractive from the settlers viewpoint. The construction programme has gone forward rapidly, and as a consequence a considerable amount of this year's crop is being marketed over the new trackage, Mr. Coleman pointed out. A feature of the branch line construction was found in the rapidity with which settlement followed the laying of the steel. Country elevators to the number of approximately 300 were already built or in the course of construction, while in many cases towns were beginning to spring up around the newly erected station buildings.

Windolite

Improved Glass Substitute Is Now Available In Canada

"WINDOLITE"—the English unbreakable improved glass substitute, which is now so popular in the British Isles, is being marketed in Canada by John A. Chantler & Co., Limited, 49 Wellington St. West, Toronto, Ontario.

Severest tests carried out in England, showed that "Windolite" is remarkable, not only for it's unbreakable qualities and ultraviolet ray penetration, but it was found that "Windolite" will stand up under usage that would wreck many other glass substitutes.

The fact that "Windolite" is translucent and allows 100 per cent. sunlight with the life-giving ultra-violet ray to enter, opens a wide scope of practical uses, the importance of which will at once suggest thefselves.

Windolite consists of transparent solution, reinforced with fine specially galvanized wire mesh, which results in a substance that is completely waterproof, airtight, and dustproof. It is flexible and unbreakable, and may be readily cut with the ordinary pair of scissors, to any required size. It therefore, forms a practical substitute for glass, and where transmission of ultra-violet radiation is required to promote health and growth, it is ideal. These beneficial rays are vital to young chicks, laying hens, dairy herds, and live stock, and also is economilcal for sunrooms, nurseries, verandahs, hospitals, schools, and for hot beds and plant coverings. It is light but strong.

Quoting from some British authorities, they have the following to say of "Windolite"—A well-known poultry breeder, member of S.P.B.A., N.U.P.S., and National Farmers' Union, whose farm is a Certified Breeding Station, under the Ministry of Agriculture and Fisheries, says of Windolite: "I have proved to my satisfaction the benefits obtained from the use of Windolite in my brooder house. I replaced the ordinary glass on one side only with your substitute, and although it has been in use only a matter of a week or ten days, the results are very marked. The chicks on this side are doing very much better than those of the other. I have kept both sides indoors for the purpose of noting the results."

"British Medical Journal," April, 1925:—"Windolite has been used by poultry keepers and market gardeners as a substitute for glass, but it is now suggested that as it allows ultra-violet rays to pass much more freely than ordinary glass, it may be of use in medicine. It has been examined for us and it is found that as claimed, it lets the ultra-violet rays through freely."

Bishop's Castle, Shropshire: — "I shall be pleased if you will send me as quickly as possible—I have had a frame in use for nearly three years, and it has proved very satisfactory."
(Signed) C.W.D.

This effective glass substitute will no doubt become very popular with stock breeders, dairy men and poultry breeders. It should also be a boon to mining camps and prospectors who cannot pack glass successfully over rough trails without breakage. It will stand up under rough treatment, and has the added advantage of being flexible.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,118,940,782 pounds.

Minard's Liniment for Asthma.

THE EASY WAY

Thousands need cod-liver oil to increase vitality and build up resistance.

Scott's Emulsion

is the easy and pleasant way to exact the most out of cod-liver oil to reinforce your body with strength to build resistance.

Scott & Bowne, Toronto, Ont. 25-58

Consolidated Wheat Pools

Have Marketed Huge Amount Of Grain During First Five Year Record

During the first five-year period the consolidated pools of the three western provinces have marketed approximately 750,000,000 bushels of grain, coarse grains included, with a total turnover in money exceeding $1,100,000,000. During that time the three pools have accumulated through elevator deductions and commercial reserves, which belong to the grower, over $20,000,000.

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take colds—especially during the changeable days of our Fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe. In fact they are like having a doctor in the house. They are a gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to contain no drug at all harmful to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Volcanic Dust

Volcanic dust found in Saskatchewan and British Columbia is used for purposes similar to ground pumice, particularly in the manufacture of cleansers and scouring powders, and in some instances as a substitute for fuller's earth in the refining of hard oils and fats.

SUNDAY SCHOOL LESSON

DECEMBER 2

PAUL BEFORE HIS JUDGES

Golden Text: "I was not disobedient unto the heavenly vision."—Acts 26. 19.

Lesson: Acts 24.1-26.32.

Devotional Reading: Psalm 25.1-6.

Explanations and Comments

Paul Before Felix and Drusilla, 24. 24-26.—Some days later, Felix sent for Paul that he and Drusilla might hear him in regard to his faith in Jesus Christ. Drusilla was a Jewess, the daughter of Herod Agrippa I. (whose death is narrated in Acts 12. 20-23).

Paul talked about matters pertinent to the conduct of Felix; righteousness—"Felix supposed he might perpetrate with impunity any kind of villainy," said Tactitus—self-control—Felix had induced Drusilla to leave her husband and live with him; and the judgment to come—Felix had murdered Jonathan, the high priest, and had committed many other sins. Paul talked so effectively that Felix trembled. Compare John the Baptist's talk with Herod, Mark 6.14-20.

"Fear is not faith, but it may lead to faith, or it may lead to hardening."—Alexander Maclaren.

Although Felix trembled, his only answer to Paul was, "Go thy way for this time; and when I have a convenient season I will call thee unto me." "Felix doesn't think that he is deciding the question that Paul has raised. He thinks that he has postponed the decision, but he hasn't. For indecisive procrastination is one of the most conclusive methods of decision that mankind knows. Life's processes do not call a halt simply because we have not made up our minds. If you have a garden-plot you may suppose that you have three choices; either to have flowers, or to have weeds, or to be hesitant, uncertain, undecisive. But in fact you have only two choices. If you choose flowers, you may have them; but if you decide to be indecisive, nature will decide for you—you will have weeds. The processes of God's eternal universe do not stop to wait for us to make up our minds. To make flowers grow means positive decision. And to become a Christian requires positive decision. You must make up your mind to it. And if any Felix endeavors to be indecisive, he is not really indecisive. His life processes still go on wthout Christ because he has not positively decided for Christ."—H. E. Fosdick.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Eclectric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Canada ranks third in importance, as a source of metals of the platinum group, after Russia and Colombia.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueller pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Dairy Industry Flourishing

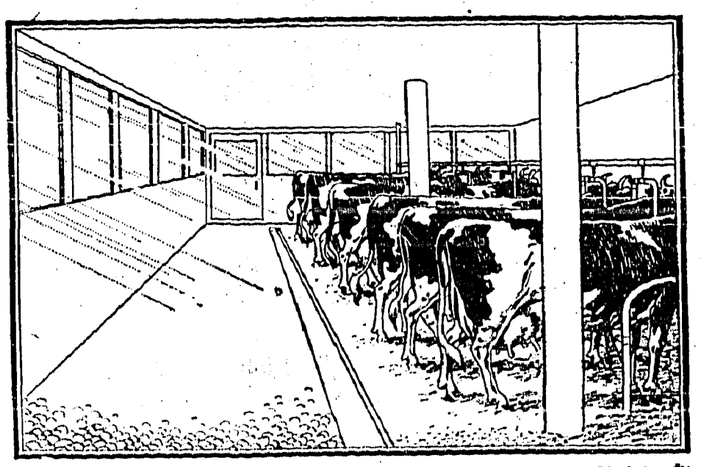
Outlook Never Appeared Brighter Than At the Present Time

"The outlook of the dairy industry in Canada never appeared brighter," says Dr. J. A. Ruddick, commissioner of the dairy and cold storage branch of the Department of Agriculture. "The value of our dairy production this year will be around $265,000,000. We have approximately 3,800,000 milch cows in Canada. They are in every province although Ontario and Quebec have the most. While the cheese production is not a record one this year, it is very high. About 100,000 boxes more will be exported in 1928 than in 1927. Canada produced the most milk in its history this year.

To avoid the run-down feeling approach crossings carefully.

WINDOLITE *The Improved Glass Substitute*

MADE IN ENGLAND



WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip,—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 190 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Use WINDOLITE and let
YOUR PLANTS

THE CRIMSON WEST

— BY —

ALEX. PHILIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER VII.—Continued.

He was known under several sobriquets: "Trapper" John, "Coffee" John, and "Mahogany" John. "Coffee" John for the excellence of his brew of that beverage, and of which he drank enormous quantities. His call to meals: "Come and throw your feet under the mahogany," supplied the reason for the cognomen of "Mahogany" John.

With the assistance of their host they unsaddled the tired horses and turned them in the pasture, where they rolled luxuriously on their backs for a moment, and then started feeding hungrily on the rich clover.

A wind shook the tree-tops and turned the surface of the lake dark with ripples. High in air, streaming dark clouds scudded swiftly by.

"Got here jest in time," said the old trapper, as he looked up at the sky. "It's a goin' to rain. Come inside."

John had served as cook in a cowboy camp in Texas. He never overlooked an opportunity to make ostentatious display of his skill in the culinary art.

"Jest set my bread this mornin'," he explained, "so I'll hev ter make a bannock."

Taking a tin pan from the shelf, he threw it the full length of the room to the table. He tossed the cooking utensils about like a practised juggler. Soon the bannock swelled to the rim of the frying-pan, the edges showing brown and crisp. He lifted the heavy dish from the stove, and with a dexterous twist of his wrist threw the bannock to the ceiling and caught it nearly in the centre of the pan as it came down. He dipped a half dozen trout in the yolk of eggs, rolled them in flour, then tossed them with apparent carelessness, but with deadly aim, one at a time, to the sizzling pan. From a shelf he took two glass jars and turned their contents into an earthernware dish on the stove. Immediately the room was filled with an aroma that caused the newcomers to sniff hungrily.

"Mr. Hillier," began Andy, "what . . ."

"Mr. Hillier! Hell! My name's John," exploded the trapper.

"I was goin' to ask you what kind of meat that is that smells so good," grinned Andy.

"Muskrat."

"What?"

"Muskrat," repeated their host, turning to the astonished Australian. "Did ye ever eat any?"

"No," returned Andy weakly, "I don't care much for meat anyway."

"They're darn good eatin'," affirmed the trapper. "Reason folks won't try 'em is because they think that they are a rat. Their right name is musquash, and they live on vegetable food only. Did any of you fellers ever see 'Diamond Back Terrapin' on a bill-of-fare in restaurants?"

"I have, many times," answered Donald.

"Well, 'bout half the time when the waiter hands ye what ye think is turtle he's givin' you musquash," stated the trapper as he speared a cube of butter with a long fork and shot it accurately to the debated dish.

Andy laughed outright. "Strike me fair, John, you've got anythin' I ever see beat a block for slingin' grub."

John was pleased. "Oh, I'm fair to middlin' good," he admitted.

John served the dinner in the pots and pans in which the food had been cooked, and piled the table with enough grub to serve a dozen men. "Like to see lots of grub in sight," smiled the old trapper. He placed a big steaming coffee-pot in the centre of the table, and then sent out his original dinner-call. "Throw your feet under the mahogany-" he roared.

The party needed no second call. The mountain air had given them wolfish appetites and they made huge inroads on the trapper's well-cooked dinner. With the exception of Andy, they ate and enjoyed musquash; the meat being fine-grained and tender. John was visibly disappointed by Andy's refusal to try this delicacy.

"Try it, ol' timer," he insisted, as he pushed the steaming pan across the table.

Andy made a wry face. "Don't feel jest hungry tonight," he mumbled.

Dinner finished. Donald pushed back his chair and lighted a cigarette. "John, that was a dandy meal, and your coffee sure is a nectar fit for the gods."

The trapper was justly proud of his cooking. Donald's praise brought a deeper tinge of colour to his bronzed face. He refilled the tin cups and they sat quietly smoking and sipping the fragrant coffee.

After the day in the open and the excellent meal it was pleasant to sit in the genial warmth of the cabin while the storm which had been gathering broke overhead and the incessant patter of rain sounded on the roof.

Between Andy and John there sprang up a comradeship based on the peculiar brotherhood which often exists between small men. Each found in the other traits that amused him.

"Comical little duck," was John's opinion of Andy.

"Strike me pink! He's the funniest old geezer that I ever saw in me life," Andy confided to Donald.

Together they washed the dishes and tidied up the room. When they had finished Andy dragged in his duffle-bag, rummaged through the contents, and produced a flask of rum. The trapper's face brightened.

"I brought this for medicinal purposes," stated Andy. "How are you feelin', John?"

The mirth wrinkles around the trapper's eyes deepened. "My misery is purty bad to-night, ol' timer."

Andy poured liberally into a tin cup. The pungent odour of rum filled the room. Old John sniffed the contents. "Whuff!" he yowled, "good licker!"

The old trapper, standing in the centre of the room, presented a figure wild and strange. His coat of buckskin was open at the throat to expose a hairy chest. His mane-like mass of wiry hair stood straight out and shook with every movement of his body. A veritable wild man of the woods he looked as he grasped the cup and held it up to his admiring gaze.

The storm had reached the height of its fury. The wind roared and moaned like a famished wild thing denied its kill. Occasionally a venturesome gust would find its way down the chimney to send thin puffs of smoke to linger in the air and fill the cabin with the sweet perfume of the burning alder.

"Give us a toast, John," begged Andy.

The trapper raised his cup on high:

"I'm the trapper of the mount'n top,
A ring-tail-snorter an' a dead-sure shot.
I'm wild, I'm woolly an' full o' fleas,
I've never bin' curried below the knees,
I live on the fruit o' the prickly pear,
An' I play in the brush with the grizzly bear."

"Here's hopin' ye'll never see the back o' yer neck," he added. Then placing the cup to his lips he drained the contents with one great gulp. John's jaws were well-nigh toothless, and as the fiery liquor scorched his throat his leathery cheeks folded and unfolded like the pleats of an accordion.

"Wow!" he yelped, "she's sure got a kick."

The humorous toast and the trapper's facial contortions sent Andy into paroxysms of laughter.

"Strike me blind!" he gasped, as he held his sides. "I never——" His eyes rested again on the trapper's convulsed features. Speech failed him and he sank writhing to a chair.

When finally they climbed the ladder to their bunks the rain had ceased and a brilliant moon flooded the valley with a white light.

Donald awakened as the first grey streaks of dawn brightened the dusty windows of the loft. The air suddenly filled with the sweet song of birds. Wild-fowl quacked and splashed in the waters of the lake. The aroma of coffee and frying bacon and the pungent odour of wood smoke was wafted strongly from below.

Suddenly the trapper's shaggy head protruded through the opening at the top of the ladder. "Get out o' the hay an' let the sun shine on ye!" he boomed.

"Now, let's get busy," said Gillis, when breakfast was over. "The first thing to do is to find a good spot to pitch our tent."

"You'll find a deserted cabin at t'other end o' the lake that'll be a whole lot more comfortable nor a tent," informed the trapper.

The cabin of cedar logs proved to be in good repair and the location excellent.

"A couple of days' work," observed Gillis, "an' I can fix her up so's we'll be as snug as a bug in a rug."

John had spent the forenoon in baking. Cakes, pies, doughnuts and cookies were placed at regular intervals on the shelves in platters and tins tipped at an angle to make the display more effective. It was an exhibit of pastry that any housewife might envy. The unstinted praise of his guests was like music to the trapper's ears.

For dessert they had a savoury mince-pie, steaming hot from the oven. Andy waxed most eloquent in his praise of this culinary delight.

"Have another piece, ol' timer," insisted John, as he transferred a big slice to his plate.

"Like it, do ye?" asked John.

"U-m-m," mumbled Andy as he devoured the last crumb and settled back with a sigh of content.

John's wrinkled old face spread into a wide grin. From his lips came a cackling laugh.

"What's the joke" queried Andy.

"I thought I'd get that muskrat into ye somehow," chortled the trapper.

"Well, I's not so durned bad, after all," philosophized Andy.

On the third day after their arrival they moved to the cabin at the head of the lake. There followed days of ardeous toil, days spent in "blazing" lines through almost impassable swales, up steep hillsides and through canyons. Days of strenuous exercise in the stimulating air, when the bright sunshine tanned their faces to a deep brown, brought the glow of perfect health to their eyes, and gave to their muscles the resiliency and strength of steel springs.

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—MRS. MILTON McMULLEN, Vanessa, Ontario.

W. N. U. 1761

Little Helps For This Week

"According to the eternal purpose."—Ephesians iii. 11.

One small life in God's great plan,
How futile it seems as the ages roll!
Do what it may, or strive how it can,
To alter the sweep of the infinite whole;
A single stitch in an endless web,
A drop in the ocean's flow and ebb.
But the pattern is rent where the stitch is lost,
Or marred where the tangled threads have crossed.
And each life that fails of its true intent
Mars the perfect plan that its Master meant.

—Susan Coolidge.

Remember that you are an actor of just such a part as is assigned you by the poet of the play; of a short part, if the part be short; of a long part, if the part be long. Should he wish you to act the part of a beggar, take care to act it naturally and nobly; and the same if it be the part of a lame man or a ruler. For this is in your power, to act well the part assigned to you; but to choose that part is the function of another.

—Epictetus.

Characteristic Of Japan

Everything About Country and People Is Small But Not Weak

Perhaps the first impression on landing in Japan is the littleness of everything. The little flimsy houses, the little flimsy shops, the small men, the toy-like women, the tiny children, as numerous and like unto each other as the sands on the shore—these are everywhere. But although very small of stature the Japanese men are often very powerfully built, and many of them suggest great strength.

Littleness—with which is associated the most delicate detail and elaborate finish—is the mark also of the modern Japanese art. In the curiosity shops whatever was massive or largely simple was Chinese. Even the Royal Palaces at Kyott are small, the rooms, exquisite as they are, with perfect joinery and ancient paintings, being seldom more than a few feet square, with very low ceilings.

A childd's amusement now costs more than did his daddy's education.

Letters Raced Around World

Winner Made Entire Trip In Seventy-Eight Days

People are growing so accustomed now to flyers going east and west, men and women crossing continents and oceans, that nothing which touches on flying can surprise one very greatly. But it is interesting to know that lately two letters have been racing round the world by established air, water and rail mail routes.

The letter which won, the first letter to go all the way round the world in the open mails, finished at Seattle, United Sates, in 78 days, 1 hour, and 30 minutes.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Northern Alberta Fish

During the quarter year ending September 30th, American firms purchased 1,685,222 pounds of northern Alberta fish, valued at $193,918, as compared with 1,508,328 pounds during the same period of 1927.

CRESTON, B.C., FRIDAY, NOV. 30

Victoria Bye-Election

Next Thursday Victoria will elect a federal representative to replace Premier Tolmie, who at midsummer gave up his seat at Ottawa in order to run for the local legislature in Saanich.

The contest is one that is attracting Dominion wide attention, largely due the fact that it is the first constituency the Conservatives have contested since R. B. Bennett was chosen leader just about a year ago.

Since that time, of course, the new leader has had opportunity to test public opinion in Maple Creek, Saskatchewan, and Joliette, Quebec, but in neither case was opposition offered the Liberal standard bearers and they were returned by acclamation.

Victoria has long been Tory. Premier Tolmie carried it in four successive fights by majorities running close to 3000, and in the present fight have a likely candidate who is not lacking for platform support with all the provincial cabinet ministers available and at least half a dozen federal Conservative members from Vancouver and Island constituencies. Carrying the Liberal banner is ex-premier J. D. MacLean.

In their effort to hold the seat the Conservatives are going particularly strong on the ills of the B.C. fruit grower due to the withdrawal of the old time anti-dumping regulations, and demanding an upward revision of the tariff all along the line with a vigor that they must figure will save the day for them.

A Liberal win in Victoria while meaning little to either party so far as following at Ottawa goes, will undoubtedly adversely effect the prestige of Mr. Bennett, something the party cannot afford to suffer on his first appeal for endorsation, and in a constituency traditionally Conservative.

HOME BREW

The main aim of the weekly newspaper, as the name implies, is to give news of its own district. It may have other aims, such as to give merchants a chance to tell of their goods in its columns or influence public opinion through its editorials; but first of all it must give the news. Some of this news is not easily obtained and no editor can cover it without assistance. Especially is this true when you have visitors. Many ladies think personals are the most interesting reading in the whole paper. Your visitors are usually glad to have their names appear, so send them in. Sometimes people come in and give the impressions that they are asking a favor when they want to insert the names of their friends who have been spending a few days with them. No person need feel that way about giving us news items, for we are glad to get them all.

Marshall — Martin Nuptials

St. Stephen's Presbyterian Church, Creston, was the scene of an interesting wedding on Tuesday morning, November 20th, when Miss Martha Jane, fourth daughter of Mrs. John Marshall, was united in marriage with Frank Herbert Martin, son of Mr. and Mrs. J. C. Martin. Rev. W. A. Greer performed the ceremony, which was witnessed by a company of invited guests.

The bride's costume was of white crepe de chene with bead trimming, with veil and orange blossoms, and carried a boquet of chrysanthemums. She was assisted by her sister, Miss Lucy Marshall, whose costume was of peach satin and carrying a boquet of chrysanthemums, and Miss Gladys Stewart, who was gowned in yellow crepe satin and carried a boquet. Little Misses Violet Hendren and Jenny Kelly, gowned in pink, were the flower girls. The groom was supported by John Ringheim and Robert Marshall.

After the ceremony the wedding party drove to the bride's home where a company of almost 100 were guests at a sumptuous wedding dinner and later in the afternoon Mr. and Mrs. Martin left on a wedding trip to Vancouver, before going on to Staveley, Alberta, where they will reside. The popularity of the bride and groom was evidenced in the many attractive wedding presents.

In the evening the young friends of the newlyweds continued the celebration with a dance at the Marshall home for which excellent music was furnished by Mrs. Constable, piano; John Ringheim, violin, and Bob Marshall, drums, with an excellent supper at midnight.

FOR RENT—Five-room house, centrally located, available December 1st. F. H. Jackson.

SINGLE ADMISSIONS, $1.00.

To the Legislature:

NOTICE IS HEREBY GIVEN that an application will be made at the next session of the Legislature of the Province of British Columbia for an Act to incorporate a company under the name of Provincial Telephone Company with an authorized capital of five million dollars with its head office in the City of Vancouver and with the following powers:

To operate telephone, wireless telephone, radio-telephone and similar services, including services for the transmission of sound, pictures, writing or signals; to hold and dispose of lands, tenements and hereditaments of any description; to provide and maintain all such buildings, works, plant, apparatus, materials, offices and exchanges as may be necessary for its business; for the purpose of its business to provide and operate steamships and other vessels; to acquire and use any privilege granted by any Federal, Provincial or municipal authority; to acquire and use patent rights; to advance money to any corporation, company or person for providing, building or operating any telephone system; to do anything as contractor for others which it might do for its own purposes; to invest and deal with its surplus funds; to enter upon and break up highways, streets, and public bridges and to construct telephone lines along, across or under the same, or in, under or over watercourses, rivers and lakes, subject to the approval of the city or municipal council where the proposed works are to be situated within a city or municipality, and in other cases subject to the approval of the Minister of Lands; to construct works on its own property; subject to obtaining consent under the Navigable Waters' Protection Act of the Dominion of Canada, to construct, lay and operate submarine telephone cable or cables in any lake, river or water to which that Act applies, also between any islands in British Columbia and between such islands and the mainland; to cut a passage for its lines where such lines pass through woods subject to compensating the owners thereof for damage, and to trim trees on or extending over highways in order to prevent interference with good telephone service; to purchase the whole or any part of the undertaking of any other company having objects in whole or in part similar to those of the company, or to amalgamate with such other company, and to transfer to the company or to the amalgamated company, as the case may be, all or any of such franchises or statutory powers as may be possessed by such other company; to enter into and carry out any agreement with any company whose undertaking is purchased as aforesaid in the nature of assuming the payment of or guaranteeing the payment of principal and interest, or either, on bonds, debenture stock or debentures, or assuming or guaranteeing the carrying out of its obligations or any part thereof; to enter into agreements for connecting its system or lines with those of other telephone operators; to appropriate lands under the powers of the Lands Clause Act; to make regulations for its internal management; to fix from time to time a tariff of charges for its services, and to collect, sue for and recover the same; to borrow money; to issue preference shares, debentures or debenture stock, either redeemable or irredeemable; to issue shares with or without nominal or par value; to change its name pursuant to the Companies' Act, and other incidental powers.

Dated this 1st day of November, 1929.

NEWS OF KOOTENAYS

Moyie had its first snow of the season on the 14th.

At Midway the older residents have organized a cribbage club.

Another watchmaker and jeweler has opened for business at Fernie.

200 couples attended the Legion dance at Cranbrook on Thanksgiving evening.

$7,000,000 is the value placed on the Okanagan fruit and vegetable crop this year.

C.P.R. divisional superintendent Flett is the 1929 president of Cranbrook fall fair.

Penticton has already collected about $100,000 of 1928 taxes, which total $114,000.

Penticton ratepayers are to vote on a by-law to borrow $11,000 for extensions to the hospital.

To date Okanagan apple shipments are 21 per cent. greater than at the same time in 1927.

Ten Trail Italians were naturalized at sitting of the county court at Rossland one day last week.

The McPherson garage at Grand Forks is putting on an addition that will double its present capacity.

Pupils of Division 5 of Cranbrook school have organized themselves into a junior Red Cross organization.

Rossland oldtimers are unanimius that the town has never experienced so delightful an autumn as this.

For the winter months Kimberley will move the clocks back an hour and operate on Pacific standard time.

The Manx cafe at Bonners Ferry is now entertaining diners with music from a self playing violin and piano.

Kimberley movie fans are to have variety to the music dispensed with the films. An organ has just been installed.

There were only two enrolled for the night school classes at Rossland and the trustees decided not to start night classes

Bluebirds were seen in the Cranbrook district on November 12th, and the Courier is hopeful of a long, open autumn.

Penticton has a small army of unemployed. They are for the most part harvesters who have drifted in from the prairie.

Rev. C. Reed, Anglican rector at Kaslo, has accepted a call o Fort Saskatchewan, Alberta, and leaves for his new work in January.

Rossland's biggest hall was not large enough to take care of the crowd that turned out for a local minstrel show one night last week.

The Roman Catholic ladies at Grand Forks realized $671 at their annual bazaar. $407 nett of this was from the raffle of a hope chest

$171 worth of poppies were sold at Kimberley on Armistice week. From this there is a profit of $43 which goes to the local relief fund.

G. F. Pearcey of Kelowna has just shipped half a ton of honey to Liverpool in an effort to establish a demand for his product in the Old Country.

Cranbrook oldtimers are to have a dinner and celebration on January 16th. Anyone who has resided in East Kootenay prior to 1906 can attend.

The Commercial Club at Bonners Ferry is undertaking to raise $300 a year for five years in order to secure a 15 acre tract of land for an air port.

The Herald estimates that fully 700 people were present at each of the services of opening the new United Church in Penticton on November 18th.

At Grand Forks the Gazette gives a dozen specially printed Christmas cards to subscribers who pay for their paper during November or December.

Cranbrook Roman Catholic ladies realized $1800 at their annual bazaar on November 17th.

Penticton will spend $3500 in putting in ornamental street lights in one block of the business section.

Bonners Ferry hears that the National Paper Company of New York is considering putting in an 80-ton pulp and paper mill either near that town or at Porthill.

The cannery at Kelowna put up 200 tons of pumpkins this season.

Vernon has collected 90 per cent. of the 1928 taxes. This is an 8 per cent. better showing than last year.

Cranbrook Rod and Gun Club are asking the government to appoint an official hunter whose job it will be to rid the district of cougar and cyotes, which are taking a heavy toll of deer this season.

SLAB WOOD

Is good wood for the Kitchen Range or your Heater. A good, big load for $2.50, delivered in town; slightly more outside of town. Phone your orders early.

Modern Aladdin's Lamps

The average man and woman realizes that the world is making progress at an ever accelerated pace; that in the space of a few brief years greater improvements and more wonderful inventions are made to add to the comfort and pleasure of life than were recorded in many centuries of the past. There was a time when people received news of any great innovation with extreme scepticism, and ridiculed the idea of such things being possible. Today, the world is prepared to accept almost anything as possible.

However, it is the occurrence of some anniversary which actually forces upon us a realization of just how great and how rapid is the progress being made by the human race. Such an anniversary came last October when recognition was paid to Thomas A. Edison, in commemoration of the golden jubilee of what is generally accepted as being the greatest of his many great inventions, the incandescent electric lamp.

The tale of Aladdin and his wonderful lamp has delighted readers, youthful and adult, for many generations, but the accomplishments of man in the world of electricity following Edison's invention of his marvellous lamp, and the series of amazing inventions since then, and all more or less directly connected with Edison's discovery, in many respects surpass the most vivid imaginings of the Arabian Nights tale.

In this age of electricity, with our streets, homes and places of business lighted by the invisible current, our machinery operated by it, our homes heated by it, with every conceivable household device dependent upon it, with it as the agent to flash our news and messages around the world, and because of which we are enabled to talk under the oceans and through the air, it becomes well-nigh impossible to imagine a world lighted by the old kerosene lamp and tallow candle. Yet it is only fifty years since the world so labored in comparative darkness.

Had Edison, the wizard of Menlo Park, not succeeded in his effort to produce the incandescent lamp, would the world today enjoy all the pleasure and profit of the radio, which depends upon the use of the vacuum tube? Would the health giving rays of the quartz lamp be conferring benefits upon stricken humanity. No. To Thomas A. Edison the world is forever debtor for his great contribution to humanity's welfare and the world's wealth.

Fifty years! Not equal to the average span of a man's life. Yet Edison within that space of time has given us not only the incandescent lamp and all that has followed that initial invention, but to him belongs the credit of capturing the human voice upon a cylinder of wax, thus giving us the gramaphone. It is thanks to Edison that we are able to produce pictures in which people move as they do in actual life, an invention that is profoundly affecting the life and thought of the world. And now we have the talking movies, the result of a combination of two of Edison's original inventions.

Within an even shorter space of time the automobile has not only been brought to its present state of efficiency and power, but it has been adopted all over the world, completely revolutionizing our manner of living and our mode of travel, and enormously broadening our knowledge of the world in which we live. Within the short space of a decade we have witnessed the airplane take its place as an accepted instrument in our modern life, and even on these Western prairies it is now a daily commonplace to witness these new messengers winging their speedy way from city to city carrying passengers, mail and express.

Science and invention is thus conferring upon this generation new wonders and new facilities of power, greater opportunities for pleasure and profit, or, ill-used, greater possibilities for catastrophe. With all the powers now being placed so rapidly under his control, man must continue to mount higher in intelligence and in all those moral attributes which alone will make him fully capable of rightly using the great possessions entrusted to hir, and the number and variety of which increases almost hourly. For it must be remembered that in the final analysis the use or abuse, the deriving of good or the suffering of evil, arising out of these wonderful scientific achievements, depends upon man himself and the attitude he takes towards life and all its realities and possibilities.

Trees Used In Making Paper

Spruce, balsam, hemlock, and poplar together made up over 97 per cent. of the total wood used by the pulp and paper industry in Canada in 1926.

More than 1,000,000 bags of coffee will be raised in Venezuela this year.

Several coal mines in Ireland are being abandoned.

Woollen Mill For B.C.

British interests have recently established a plant for the manufacture of worsteds at Victoria, British Columbia. This plant has 6,400 spindles and promises to prove an important industry for the capital of British Columbia.

In England 2,500 automobiles are being delivered to new owners every week.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine *Phillips'* Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

In Memory Of Colonel McCrae

Oak Tree From Georgia Planted On McGill College Campus

During Armistice Day a two-year-old oak tree was planted on the McGill campus, at Montreal, in memory of Col. John McCrae, author of "In Flanders' Fields." The tree was sent by the State Teachers College, of the University of Georgia, on whose campus a similar planting took place at the same hour. It is noteworthy that the best known and most beautiful poem, inspired by the Great War, should have been written by a Canadian, and the action of the Georgia College is also a friendly gesture which will be much appreciated on this side of the border.

RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism that every victim recognizes, and he generally attributes the trouble to cold, damp or changeable weather. But doctors know that thin blood is a marked characteristic of the trouble. Trying to cure rheumatism while the blood remains thin and poor, is an impossible task because there is nothing to build on. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities soon banishes rheumatism from the system. So long as the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases; here is one:—Mr. J. W. Rose, R.R. 2, Albany, P.E.I., says:—"For some years I was a great sufferer from rheumatism and although I tried a great many remedies, I did not get any permanent relief until after I took Dr. Williams' Pink Pills. The trouble was located mostly in my shoulders, and at times was so bad that my right arm was almost useless. Of course I suffered much pain and great inconvenience. My attention was directed to Dr. Williams' Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to directions with the result that the rheumatism has left me, and I have never had a twinge of it since. If this meets the eye of any rheumatic sufferer my advice is try Dr. Williams' Pink Pills at once."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Our Great Agricultural Wealth

Canada the Best Country In the World For Farming

"I can say without any hesitation, that Canada is the best country in the world for farming at the present time. It has greater possibilities, and there are indications that there is greater stability and prosperity than can be found in any other country," said Dr. E. S. Archibald, director in charge of the Dominion Experimental Farm at Ottawa, addressing the Young Men's Canadian Club at Montreal. Dr. Archibald said the crops in Canada are worth $1,167,000,000, which alone was equal to the fisheries mines and forests all put together; dairy produce reached $300,000,000 which was equal to the total of the fisheries and mines; wheat exports $422,000,000, or a third of the country's total exports and that there were over 225,000,000 acres capable of producing, but not occupied. He estimated the Dominion's agricultural wealth at $7,820,000,000, and that at least $3,800,000,000 of capital was invested in agriculture.

The Only Alternative

After walking out with Jean for some months Sandy ventured to propose to her, and was accepted. Questioned by his prospective mother-in-law whether he was in a position to keep a wife, Sandy confidently replied in the affirmative, placing the matter beyond all doubt by volunteering this information: "There's hardly a mornin' but what I leave some o' ma parritch; in fact, if I dinna get a wife sune I maun get anither pig."

Need Standard Grain Crop

Hon. W. R. Motherwell, Minister of Agriculture, addressing the Canadian Club of Fort William, stressed the need of western farmers raising the standard of grain which they produce, and reducing the varieties of wheat from 30 or 40 now grown to three or four kinds, which should be regarded as standard and be the only kinds admitted to No. 1 grade.

Minard's Liniment for Grippe.

The Right Soap For Baby's Skin

In the care of baby's tender skin Cuticura Soap is the mother's favorite. Not only is it unrivaled in purity and refreshing fragrance but its gentle emollient properties are usually sufficient to allay minor irritations and promote skin health.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

South Africa Buying Certified Seed Potatoes

Varieties Sent From Canada Last Year Gave Good Results

Trade with South Africa in certified seed potatoes from Canada is being promoted—another tribute to the excellence of our spuds.

Last spring small quantities of Irish Cobbler, Green Mountain and Dooley varieties were shipped to South Africa from Eastern Canada. They arrived in Capetown in excellent condition and gave good results there.

The South African growers preferred Dooley as more suitable to their special requirements. This season they are testing, at their own request, other varieties—small sized seed, of two to three ounces, from certified crops.

The British Columbia inspector is obtaining for this purpose quantities of two to three ounce seed of the following varieites: — Up-to-date, Sir Walter Raleigh, Burbank and Epicure. As there was no crop of certified Epicure in British Columbia this season Wisconsin Pride and Bliss Triumph were substituted for that variety. Results in South Africa from this British Columbia certified seed will be closely watched and may lead to the development of a worthwhile trade.

Long Standing Asthma. Many have suffered so long from asthma and have tried so many so-called remedies they think that there is no real help for them. They should read the letters received by the manufacturers of Dr. J. D. Kellogg's Asthma Remedy from hundreds of cases once as desperate as their own. Even in long-neglected cases this famous preparation brings prompt help.

Aviation In Canada

Aviation is in a healthier condition in Canada than at any previous time in its history. Development has not been rapid nor has it been forced into uneconomical channels. Every effort has been made to keep it on sound lines, as far as possible self-sustaining, and of direct value to the country as a whole.

All-Red Air Route

Important Developments In Inter-Empire Communications Expected Soon

An all-red air route around the world is seen as a strong possibility in the near future by J. A. Wilson, controller of civil aviation, who recently returned from a sojourn of two months in the British Isles and Europe. "Enormous developments in inter-Empire communication may be expected within the next few years," Mr. Wilson said. "While efforts so far have been to some extent concentrated on flights to India and Africa, the eyes of British flyers are turning towards Canada." The R-100 and R-101 will shortly be ready for their trial trips, and in the early spring would be ready for trans-Atlantic trips to Montreal. Mr. Wilson viewed both of the enormous dirigibles and discussed the contefplated flights with air officials in England.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Hemp Growing In Manitoba

Hemp growing is gradually assuming promising proportions in Western Canada. Double the acreage of 1927 has been devoted to hemp growing at Portage la Prairie, and the yield is very good. The Manitoba Cordage Company Limited reports an increasing demand for its products.

Check Colds with Minard's Liniment.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,118,940,782 pounds.

ASPIRIN

To break a cold harmlessly *and in a hurry* try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

TEST MILLING AND BAKING VALUES OF 1928 WHEAT

Regina.—Milling values of the various grades of 1928 wheat and the possibility of introducing the protein test into the grading system were discussed at the annual delegates' meeting of the Saskatchewan Wheat Pool, when Dr. F. J. Birchard, chemist in charge of the Board of Grain Commissioners' grain research laboratory, attended with an exribit of bread baked from standards and averages of the various grades of wheat from the 1928 crop.

Dr. Bichard based his introductory comment on the report which was issued from his laboratory some time ago in which it was stated that the lower grades of wheat from the 1928 crop, most of which are heavily damaged by frost so far as physical appearance goes, are appreciably better in quality than similar grades of the 1927 crop. He read to the delegates the comment accompanying the milling and baking data in his report and was then subjected to frequent questioning.

Dr. Birchard, in his statements believed that, generally speaking, frost had the effect of deteriorating the quality of the protein in wheat but that this was not the case this year to the same extent as usual, owing to the fact that the frost came at a time when the grain was fairly mature.

In answer to a question as to whether results from an experimental mill should be considered as fairly comparable with those to be expected from a commercial mill, Dr. Birchard answered "Absolutely, otherwise why do all commercial mills maintain chemical laboratories."

Asked as to whether the mills use No. 6 wheat for the manufacture of flour, Dr. Birchard answered that they had, and said that from his experience he would say that they were using as high as 100 per cent. of No. 6. He showed however that there was a gradual decrease in the percentage of patent flour between One Northern and Six wheat. the actual percentages in his tests having been 63.4 per cent. for the One Northern, and 60.2 per cent from the Six wheat. The weight per bushel likewise decreased gradually from 64 pounds per bushel in the case of One Northern to 61 pounds in the case of No. 6 wheat.

Believes U.S. Election Verdict For Prohibition

May Mean Showdown With Canada Over Liquor Exports, Says Official

Detroit, Mich.—One of the highest prohibition enforcement officers in the United States, sat behind a desk in a large office building here, and summarily expressed his opinion about the future of legalized rum exporting into this country.

"A country that condones and abets the exportation of liquor into a neighboring state where liquor is prohibited cannot honestly command the respect of God or man. Obviously, the presidential verdict can be interpreted also as an overwhelming verdict for prohibition, and a showdown with Canada naturally can be expected," he said.

Asked To Expedite Treaty

Ottawa. — Recent communication has been received from the British government asking that Canada expedite the reply regarding the replacement of the arbitration treaty between the British Empire and the United States, that expired last June. It is possible such a request may have been forwarded and not yet received here.

Draws Attention To Claim

Ottawa.—Admitting that he threw a stone through a window of Rideau Hall, the residence of the governor-general, in order to draw attention to his claims for pensions, William H. Coulter was fined $2 and costs and ordered to pay $2 for the repair of the window by the magistrate. Coulter said he picked out a small window so the damage would be less.

Announce Delegates To Air Conference

Winnipeg Postmaster Will Be Member Of Canadian Party

Ottawa, Ont.—Announcement has been made here that D. J. Desbarats, deputy minister of national defence will head the Canadian delegation which will attend the international conference of civil aeronautics to be held in Washington, D.C., December 12 to 14, inclusive.

Accompanying Mr. Desbarats will be P. T. Coolican, assistant postmaster general, J. A. Wilson, controller of civil aviation; T. T. Bower postmaster at Winnipeg, Man.; and Wing Commanders J. L. Gordon and E. W. Stedman, of the Royal Canadian Air Force. A number of others directly interested in aviation are expected to join the delegation.

Orville Wright, of Dayton, Ohio, has been designated as the guest of honor at the International gathering in recognition of his successful pioneering in aviation, while a number of outstanding figures in the field of aviation are expected from the British Isles.

Wellington, N.Z.—H. R. Dix, representing the New Zealand Aero Clubs, and Captain N. H. Barlow, of the New Zealand Air Force, sailed for Vancouver. They will represent New Zealand at the international aeronautical conference which opens in Washington, December 12.

Make Preparations For Closing Of Navigation

Ship Owners Asked For Final Sailings On Great Lakes

Ottawa.—In preparation for the close of navigation all ship owners have been requested by the department of marine to advise when their last vessels will leave the head of the Great Lakes. Failing an agreement between United States authorities and owners across the border, the department has been unable to arrange for navigation to close on December 7 as was hoped.

All Canadian lights and fog alarms on Lake Superior will be kept in operation until the close of navigation, with the exception of Caribou Island which may close on December 8, and be replaced by an unwatched flashing gas light; Otter Head, Davieaux Island, Quebec Harbor and Michipicoten Island, East End, which may close on December 12, and Ile Parisienne which may close on December 15.

To Raise Farming Profession

Herman Trelle Thinks Farming Should Be On Level Of Other Professions

Toronto.—"If there is anything I can do in the way of taking the hayseed out of farming, I'm going to do it," Herman Trelle, the world's wheat and oats king, said upon his arrival here to attend the royal winter fair, where he has numerous grain exhibits. "Why shouldn't the farmer be an educated, cultured man, the same as those who follow any other profession?"

In 1926 Mr. Trelle produced 15,500 bushels of entirely registered seed grain, with the whole output placed at the disposal of the Alberta government, which pays him a premium for his product.

He has won championships in virtually every province in Canada and is the holder of 21 cups. Mr. Trelle has won every trophy but one in the Dominion. At the winter fair he is exhibiting wheat, oats and peas, all grown under the same conditions which produced him honors in other years.

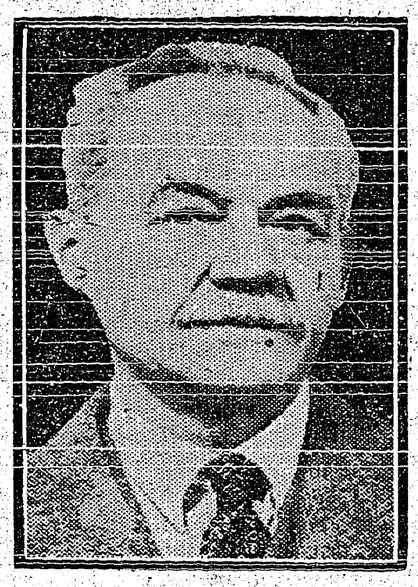
Ready For Grain Probe

Commission Will Hold Sittings In Saskatchewan During December

Regina.—The Royal Grain Commission, appointed by the Saskatchewan Government, will hold sittings in various parts of the province during December, to investigate the system of grading, handling, mixing and marketing wheat.

The commission will consist of Chief Justice Brown, chairman; John A. Stoneman, president of the United Farmers of Canada, Saskatchewan section; Dean Rutherford, of the Saskatchewan College of Agriculture; F. Hedley Auld, deputy minister of agriculture; and H. F. Thomson, K.C., and W. E. Proctor, counsel for the commission.

NOTED MISSIONARY HONORED



Sir Wilfred Grenfell, noted missionary and doctor of Labrador, who was elected rector of St. Andrew's University, in England, defeating Lord Melchett, the former Sir Alfred Mond, by a majority of 157 votes.

Empire Goods Are Given Preference

Hoped New Regulations Will Help To Stimulate Production

Ottawa.—Hon. W. D. Euler, Minister of National Revenue, announces that after February 1, goods entering Canada under British preferential rates must be of Empire material and labor. The present percentage of Empire materials and labor now required is 25. The new regulations will, it is hoped, stimulate production within the Empire.

A corresponding provision has been made with regard to imports under the intermediate tariff under special treaties and conventions. Hon. J. A. Robb, in the House last session, intimated that it was proposed to increase from 25 to 50 the percentage of Empire labor and materials required in goods qualifying under British preferential rates.

Saskatchewan Legislature

Announcement Officially Made That Sessions Will Open Dec. 4

Regina. — Lieut.-Governor Newlands will officially open the fourth session of the Sixth Saskatchewan Legislative Assembly at 3 o'clock Tuesday afternoon, December 4, Premier J. G. Gardiner has officially announced.

The debate on the address in reply to the speech from the throne will open on Thursday, December 6. The honor of launching the debate this year will fall upon Chas. McIntosh, M.L.A. for Kinistino, who will move the adddress, while Dr. J. T. Waugh, the newly-elected member for the Arm River constituency, will be the seconder in a maiden speech.

Manitoba Liquor Profits

Winnipeg.—The Manitoba government liquor control commission realized gross profits of $1,493,706.60 for the fiscal year ending April 30, 1928. The net profits amounted to $1,345,117.25, according to the public accounts prepared for the provincial government.

Giant Fokker For West

First Tri-Motored Airplane For Use In Western Service

Winnipeg, Man.—The first tri-motored airplane for use in Winnipeg and the West will be brought here this week by W. L. Brintell, operating manager of the Western Canada Airways, Ltd.

It is a big Fokker machine similar in construction and power to the famous "Southern Cross" which caused world-wide attention when it bridged the Pacific Ocean last year.

The big Fokker has a 72-foot wing spread, two feet longer than the big Ford plane brought to Manitoba for testing purposes by Bernt Balchen and the late Floyd Bennett, early last spring. It has a capacity for 10 passengers, and if the baggage and express are light, for 15.

In commenting on the mail contract let to the Western Canada Airways by the Dominion government, Mr. Brintnell drew attention to the fact that the service will be in operation for the three shortest flying weeks of the year, December 10 to 29. Trat would shorten the flying hours, but the company, he felt sure could "make the grade" without trouble. A spare Fokker super-universal monoplane would be kept in readiness at Revina in case of mishap to another machine.

Public sentiment and public support would make it possible to carry on the mail service as a regular service, Mr. Brintnell said.

Grain Elevator For Churchill Terminus

Will Have 1,125,000 Bushels Capacity According To Plans

Port Arthur, Ont.—The C. D. Howe Company, of Port Arthur, has been commissioned to prepare plans for a terminal grain elevator of 1,125,000 bushels capacity to be erected at the Churchill terminus of the Hudson Bay Railway.

It was stated at the Howe Company offices that while a start has not yet been made, the proposed elevator is to be after the same general plan as the terminal elevator at Port Arthur and Fort William, with certain possible modifications regarding the facilities for loading ocean vessels.

This will depend upon local conditions relative to exact location of the plant and whether tide water will have to be considered. Information concerning this has yet to be obtained.

It was also stated at the Howe Company offices here that no information had been received concerning plans for a Hudson's Bay elevator for the wheat pool. C. D. Howe is now at the Pacific Coast and may have some correspondence in this connection, but that is considered hardly probable here.

For Church Union

Edinburgh, Scotland.—The assemblies of the Church of Scotland and the United Free Church of Scotland, both voted by overwhelming majorities in favor of the union of the two churches. Final decision on the question will be made at the next assemblies in May. Both churches are Presbyterian in doctrine.

DRIVES LAST SPIKE

R. B. Stewart, founder of the Stewart Valley Settlement, in Saskatchewan, achieved a long standing ambition when he drove the last spike on the Atkins Northly branch of the Canadian Pacific Railway recently. Reeve Smith, of Stewart Valley, held the spike, and every member of the community turned out in appreciation of the historic occasion. "Put your hands to the plow and work this railway to its utmost capacity" Mr. Stewart urged, when pointing out the value of the new line to the settlers.

HERMAN TRELLE IS WINNER AT TORONTO FAIR

Toronto.—Herman Trelle, of Wembly, Peace River District, was awarded grand championship for hard spring wheat, at the Royal Winter Fair.

Manitoba won first and fifth on Durum wheat. R. Brockinghon, of Melita, was first, and Alf Wood, Glenboro, fifth, while second place went to William Darnbrough, of Laura, Sask. Samuel Larcombe, of Birtle, won third on early oats with a fine sample of Alaska.

The champion ribbon and silver trophy for the best half bushel of wheat at the show went to Herman Trelle, Wembly, Alta., on a sample of Reward, which adds another victory to his already remarkable winnings, partially won at the International show, Chicago.

Champion half bushel of barley went to W. E. Darnbrough, Laura, Sask., on O.A.C., 21. Championship for oats was won by Wm. Darnbrough, Laura, Sask. The winnings in the classes judged were as follows:

Spring wheat except Durum: First, Herman Trelle, Wembley, Alta.; second, W. E. Darnbrough, Laura, Sask.; third, Wm. Pierce, Birtleman; fourth, S. Crossman, Laura; fifth, W. E. Darnbrough, Laura; sixth, F. E. Smith, Swan River, Man.; seventh, Paul Braulieu, St. Flavie, Que.; eighth, J. E. Nixon, Wauchope, Sask.; ninth, J. W. McGhie, Marquis, Sask.; tenth, P. J. Rock, Morrin, Alta.; eleventh, Alf Ripley, Indian Head, Sask.; twelfth, P. F. Robbins, Shaunavon, Sask.; thirteenth, Nels Skillstad, Chaulkleton. Twelve of the thirteen prizes go to western Canada and there were fifty-seven entries. First for Durum wheat fell to P. Brockington, Melita, Man., with W. E. Darnbrough and Wm. Darnbrough, Laura, Sask., second and third. Fourth went to Brown, of Millbrook, Ont., fifth to Alf Woods, Glenboro, Man., and sixth and seventh to Guelph and Udora, Ont., men. There were ten entries.

There were sixteen entries in early oats with Wesbrown, Millbrook, Ont., first on Alaska; Wm. Darnbrough, Laura, second on Alaska; S. Larcombe, Birtle, third on Alaska; with fourth to McCutcheon, Guelph, and fifth to H. Cabana, St. Cuthbert, Que.

Oats other than early were 58 in number of which William Darnbrough was first, and champion, and Trelle second, on Victory in each case. Third fell to Nels Linden, Wetaskiwin, Alta.; and fuorth to J. H. B. Smith, Wolf Creek, Alta.; also on Victory. Fifth went to McCutcheon, Guelph, and sixth to Paul Beaulieu, of Quebec. Hansmeyer, Vegreville, had seventh, Wm. Whitelock, Kelwood, Man., eighth; S. Larcombe, Birtle, ninth; J. F. Field, Regina, tenth; P. J. Rock, Morrin, Alta., eleventh.

Aviator Has Narrow Escape

French Plane Falls Five Miles But Lands Safely

Villa Coubly, France.—The French pilot; Le Moigne, attempting to break the world's altitude record, lost consciocsness when his oxygen inhaler failed at 30,000 feet, and fell nearly five miles before regaining his senses approximately 4,000 feet above the ground. He righted his plane and landed safely.

Le Moigne had been in the air one hour and ten minutes when his oxygen failed.

May Serve On Commission

London.—It is definitely settled that the United States shall be invited to serve on the new reparations commission and also that the commission should draw up a scheme for capitalizing and commercializing Germany's reparation liabilities so that bonds can be sold to private investors.

Is Still Walking

New Orleans, La.—Eight years ago George Nemeth, 25, left the university he was attending to take a walk because the physicians said that was the only way he could recover his failing health. Last week Nemeth walked in and out of New Orleans on his eighth trip around the world.

in

"The Enemy"

The play that thrilled Broadway for more than a year has now been made into a screen production that is the dramatic sensation of all time! Never has Lillian Gish had an emotional role to equal this one! Never has Niblo, director of "Ben-Hur," turned out a surer masterpiece!

Comedy, "No Picnic"

M - G - M - News

The annual meeting of the Creston Reclamation Company, Limited, is called for Monday night, December 3rd. C. F. Hayes is the retiring president.

In farm papers the Family Herald and weekly Star, Montreal, leads them all. One dollar a year or three years for $2, and with it a superb magazine free.

The Ladies' Aid of Trinity Church have their annual bazaar with sale of cooking and afternoon tea in the church basement on Saturday afternoon, December 8th.

It is announced that the 1929 auto license plates will be done in green and cream. The background will be in cream with the figures and lettering in Paul Revere green.

Plan of reserved seats for the four night Chautauqua is now open at the drugstore. A reserved seat for all four programmes can be had for 75 cents, and are selling fast.

Charlie Holmes, who has been working at Calgary, Alberta, for the past two years, arrived on Monday to spend a few weeks with his parents, Mr. and Mrs. E. N. Holmes.

The Family Herald and Weekly Star of Montreal with its wonderful improvements has no peer as an agricultural paper on this Continent. The best Canadian farmers know that.

C. W. Allan left on Sunday for the old home in Scotland, where he will spend the next two months on a combined business and pleasure trip. He is due to sail from New York today.

Mr. and Mrs. Crayford of Blairmore, Alberta, who have been visiting the latter's parents, Mr. and Mrs. A. Comfort, have rented the Elston (Gibbs) property, and intend spending the winter here.

The annual meeting of Creston Curling Club is called for Tuesday evening next, December 4th, at 8 o'clock, at the town hall. Dr. Henderson is the retiring president. It is likely the skips for this season will also be elected at this meeting.

R. G. L. Clarke of Vancouver, chief Dominion fruit inspector, with W. S. McIntosh of Ottawa, Dominion fruit commissioner, made an official visit to Creston district on Thursday last, when the latter was conferring with selling agencies and individual orchardists on fruit marketing matters generally.

It is Not Too Soon to Make Your Christmas Cakes and Puddings

Swiftly the days march onward and before we know it, the great festival of the year —CHRISTMAS—will be upon us. "Preparedness" is the watchword. You will find every ingredient needed for your Christmas baking at our stores. You will also find the quality and prices to be to your liking. We also carry a full line of goods suitable for Christmas Gifts.

Christmas Pudding

1 pound raisins, stoned
½ pound currants.
2 pieces lemon peel.
½ piece citron peel.
4 eggs.
1 cup brown sugar.
1½ cups milk.
½ teaspoon cinnamon.
½ teaspoon allspice.
½ of a nutmeg.
1 cup suet.
1½ cups flour.
BOIL THREE HOURS.
