THE CASCADE RECORD

Published in the Interests of the Boundary and Christina Lake Mining Districts

VOL. I. CASCADE, B. C., SEPTEMBER 16, 1899. No. 45.

C. P. R. TAKES IT OVER

New Railway Line Inspected by Dominion Government Official.

REGULAR TRAIN STARTS ON MONDAY

Boundary Track of Columbia & Western Declared to be in Splendid Condition---Dominion Express Co. Here.

Part of the Boundary branch of the Columbia & Western railway, was inspected this week by the Dominion government official, as well as those of the railway, and turned over to the C. P. R. operating department by Mann, Foley Bros. & Larson, the contractors. Thursday afternoon the first passenger coach ever seen in the Boundary country, rolled into the Cascade yards with the party of inspecting officials aboard. It consisted of Chief Engineer Tye, Chief Assistant Engineer Sullivan, Superintendent and Chief Dispatcher Lawrence, all of Trail, Government Inspector Fellows of Ottawa, and Superintendent F. P. Gutelius, of Trail.

A flat car, with a canopy, had been pushed ahead of the train and the party had every opportunity to give the roadbed and bridges a most rigid inspection, which was taken advantage of. The train reached Cascade about 5 p. m., and left here on the return trip from the Forks to Robson at 8 p. m.

Mr. Fellows expressed himself as more than pleased with the new roadbed and its solid construction. In fact, he asserted that, in his recollection he had never inspected a new road that was in such good shape as this one is today.

New Express Office.

Route Agent Helm, of the Dominion Express Co., was also over the new line this week, checking in the new offices at Cascade and Grand Forks. He brought in a large number of express packages with him, and Thursday morning the agents of the company were ready to do business. This will be a great convenience to Boundary shippers generally, as heretofore it has been next to impossible to get goods in with any degree of satisfaction by express. Peter Huckerby, the Cascade station agent, is also express agent. Cascade is now the repeating office for all Boundary, C. P. R. telegraph and telephone business and it keeps two busy most of the time attending to that work alone.

Regular Train on Monday.

Next Monday the first regular passenger train will leave Robson, arriving at Cascade about noon and Grand Forks an hour later. This train will return Tuesday, leaving Cascade about 8 a. m. From Robson, for the present, trains will run Mondays, Wednesdays and Fridays, the retnrn trips being made on alternate days. This service will be given, it is expected, till the track reaches Midway, a matter of five or six weeks.

Rumbles From the Rails.

The telegraph business at Cascade is increasing.

Wednesday's train brought in nearly 50 passengers.

Grand Forks got its first general freight by rail yesterday.

The C. P. R. is said to use 35 cars of coal per week, most of which comes from Fernie.

Agent Clements is in charge of C. P. R. business at Grand Forks. Mr. Redpath, of Robson, expects to be stationed at Greenwood.

Conductor Fawcett, who has been on the Nelson-Slocan-Robson run, is to have charge of the passenger train on the Boundary branch, it is said.

Foreman Archie Smith states that the bridge work is now completed and all finishing touches put on from Robson to Cascade, with the exception of the spans.

On the Construction.

Pat Welch, of Stewart & Welch, is now in Washington, D. C., placing his daughter in school. His brother is here while Pat is away.

Dispatcher Durkee, working for the contractors, has been transferred to Grand Forks, the rest of the line now being out of the contractors hands.

Since Olaf Olson took hold of work on the Bull Dog tunnel, June 15th, he has bored over 1,000 feet, which with the 900 previously made by McLean, leaves 1100 feet to drive. Jack Stewart expects to see daylight through this tunnel by Christmas time.

KILLED AT BIG TUNNEL

Two Men Were Asphyxiated by Gas Last Night.

James Pease, a Foreman, and J. Gilbert, Were the Victims---Funeral Here Today---Fifty Workmen to Attend.

Last night James Pease, a foreman under Olaf Olson, and J. Gilbert met death at the long tunnel through Bull Dog mountain, near Brooklyn. It is supposed that they went into the tunnel too soon after a round of shots had been fired, and were overcome by gases. Dr. G. C. Gordon the contractors' physician, who is stationed at the tunnel, did everything possible to resuscitate the men, but without avail.

A special train, bearing the remains of the dead men, left the tunnel at 10 a m. today for Cascade. That Pease and Gilbert were esteemed by their fellow workmen is shown by the fact that 50 of them are on the train and will attend the funeral, to be held here today, Rev. Joseph McCoy officiating.

Officer Darraugh, who is at the Forks, has communicated the facts to the coroner, and will be here for the funeral this afternoon.

SEVERAL DEALS PENDING

Cannonball Group Force is to be Doubled at Once.

PREPARING FOR ALL WINTER'S WORK

Notes of General Interest in a Mining Way From the Different Camps Adjacent to the Gateway City.

Some important developments in a mining way may shortly be looked for in the Christina lake mining section. Within the last month representatives of outside capitalists have been quietly looking over some of the best properties, and they are universally pleased. Those best acquainted with the situation feel assured that it will result in bringing in much needed cash for opening up our promising claims.

Frank Hogan and Col. N. E. Linsley, well known mining men of Spokane, were in the Burnt Basin last week, and made another visit to that locality this week. They were careful to keep still about their intentions, but it is understood that negotiations are pending for the taking over of one of the best known group of claims in the entire Basin. Up to this writing, however, nothing definite is given out about the details of the deal.

Jack Spaulding, superintendent of development on the Cannonball group, on Christina lake, was in town Tuesday. He has sent to Rossland for five additional miners and will soon be running a double shift, with 10 men. Good cabins have been erected, a ventilator gotten for the shaft, and every arrangement made for the steady working of the properties during the coming winter. On the Deadwood a shaft 18 feet deep has been sunk and on the Cannonball one 50 feet.

In Camps Around Cascade.

Wm. O'Donnell, of Gladstone, is working on the Orion group up McRae creek.

Dave Good left this week for Copper camp to work some properties in which he is interested.

Work will be started shortly on the Homestake, on Shamrock mountain, owned by H. L. Jordan.

Tom Kellar is working on some promising claims he has in the North Basin, above the Burnt Basin.

G. T. Curtis, of Gladstone, has been in town several days. He is developing the Locharber, on Canyon creek.

The John Bull group is to be surveyed and crown granted at once. The Victoria group will also be crown granted shortly.

Fred Fredericks has been working on the Nemo, on Shamrock mountain, owned by J. C. Shepard and W. O. Dutton. It adjoins the Broken Hill.

Dick Darrow has completed assessment work on the Tin Cup, in Burnt Basin, owned by George K. Stocker. He brought down some fine samples of free milling rock.

JAMES STUBBS ACCUSED OF THE CRIME.

Cameron and Mullen Committed to Jail for the County Court.

The adjourned hearing of the Columbia hotel arson case, was held at Columbia last Friday and Saturday before Justice Rochussen of Cascade.

Mullen was defended by W. A. Macdonald, Q. C., of Nelson, with whom were associated Messrs. J. S. M. Morrison and E. Miller, of Grand Forks. J. P. McLeod, of Midway, appeared for the crown. The witnesses for the prosecution, Royce and Wattson, and the accused, Cameron, who had also given evidence against Mullen, were subjected to a lengthy cross-examination by counsel for the defense. Eventually Mullen was committed for trial and afterwards bail was refused.

Cameron testified that he and Royce experimented with alcohol and a fuse in the woods, but emphatically denied having any intention of taking part in the burning. He asserted that one James Stubbs performed that act. After the fire he met Mullen, who gave him $200 at the Yale hotel, of which he gave Stubbs, $100—for what purpose he did not state. Afterwards they had drinks together with Jno. A. Manley at the Yale. Stubbs was last seen at Rosalia, Wash., where Cameron was found. Cameron was committed for trial at the county court. Both men were taken to the Kamloops jail.

It is expected that bail will be applied for before Judge Spinks; but up to this morning Justice Rochussen had heard nothing of it. Constable Darraugh, of Cascade was present at the hearing, when Mr. Rochussen strongly condemned the manner in which the Columbia Review published the previous week's session—which was held behind closed doors.

IN AND AROUND CASCADE.

Jack Stewart spent a couple of days in Spokane this week.

The Cascade sawmill shipped two carloads of lumber up the line this week.

James Graham has closed his Divide hotel at the Summit, between Cascade and Brooklyn and expects to start up in the same business at Phoenix.

The track-layers are now at Niagara, 7 miles above Columbia, and will crowd the putting down of steel to Greenwood and Midway direct as fast as possible. When they get to Eholt, another gang will begin putting down the steel by hand on the Phoenix and Winnipeg spurs, a distance of about 20 miles. The grade is pretty steep, being three-four.

IN AND AROUND CASCADE.

A survey is to be made for a tramway from Greenwood to Phoenix.

It is said that all the lots on the main street of Eholt have been sold.

The city council of Greenwood is paying $16.40 per thousand for lumber.

W. J. Francis returned Tuesday from a trip to Eholt, Greenwood, Phoenix and Midway.

Frank Corte, the Brooklyn mail carrier, shot a black bear at his place, near the tunnel, last Monday.

It is expected that the Corbin telegraph line will reach Greenwood, via Republic, in about ten days.

Rockbank, the neat residence of Stanley Mayall, presents a greatly improved appearance with its coat of paint.

The Boundary Creek Times, one of the most readable of the Boundary papers, has completed its third year of existence.

On September 20th the electors of Grand Forks will vote upon the question of extending the municipal limits of Mayor Manley's town.

There is talk of a trail being made between Camp McKinney and main Kettle river, which would greatly shorten the distance between the two points.

The total value of dutiable goods entered for consumption during the month of August, at the custom house at Grand Forks, amounted to $40,686 on which duty of $9,368 was paid.

Summit City, near the Summit mine, is said to have two hotels and two stores in course of erection. Col. W. C. Haywood, formerly of Vancouver, is in charge of the townsite operations.

Owing to the prolonged rains the directors of the Kamloops Agricultural association have decided to postpone the exhibition until October 11, 12 and 13. The original dates were September 20, 21 and 22.

F. A. Wilkins, as agent for the B. C., Rossland and Slocan Prospecting Syndicate, is applying for a certificate of improvements for the Martha May, Lizzie L. and Daisy claims, located three miles east of Cascade and north of the Dewdney trail.

About 40 cases of typhoid fever are reported from Grand Forks, but they are mostly of a mild type.

J. S. M. Morrison, barrister of Grand Forks, who defended H. R. Cameron in the Columbia hotel arson case, was in town Tuesday.

E. C. Willson, representing the Toronto Type Foundry, of Vancouver, was a caller early in the week, on a trip through the Boundary.

J. H. Inkster left for Rossland Tuesday, after visiting the Pontifex group on Huckleberry mountain, where his force of men are sinking on a big vein.

Rev. J. D. Wallace, Presbyterian pastor at Columbia, was in Cascade Monday, en route to the Presbytery meeting at Nelson, after which he will go to the coast.

Edgar P. Rathbone, of the B. C. Mercantile & Mining Syndicate, of Cascade, was one of the speakers at the meeting of the Canadian Mining Institute, held at Rossland this week.

THE CASCADE RECORD, CASCADE, B. C.

145

LOCAL AND GENERAL.

Rev. McCoy held two services at the tunnel camp this week, on his return from Nelson.

J. W. Bengough, Canada's great cartoonist, is scheduled to be in Cascade November 8.

Best since the world began—the Job Work constantly being turned out at the office of CASCADE RECORD.

The Columbia Telephone Co. has its exchange installed at Grand Forks, and will put one in Cascade next.

It is expected that the government will arrange to have mail carried on the new railway at the earliest possible date.

The open season for deer, mountain goat and mountain sheep, began yesterday and extends to December 14th, inclusive.

Yesterday the hill at the junction of Main street and First avenue was cut down and the low place filled, making a decided improvement in the centre of town.

Oscar Redfield, who was in town yesterday, has sold the balance of his lumber at Christina lake, about three cars, which will be shipped to Grand Forks by rail next week.

It is said that the sanitary conditions in Grand Forks just now are exceedingly bad. If so, it will account for the many cases of fever now prevalent there. Where is the health officer?

This morning, at the Commercial hotel, Cascade, Rev. Joseph McCoy, M. A., united in matrimony Miss Allie Victor McHargue, of Princeton, Mo., and Morley Wesley Ludlow, of Brantford, Ont.

A serviceable trail has been made to the Pontifex group on Huckleberry mountain, shortening the distance to Cascade by eight miles, so that the men can get their mail and snake bite antidote here.

The heartless teamster who left a horse that was mired, to die in swamp, near Hall's bridge yesterday, should be prosecuted to the full extent of the American law. The animal was extricated by the next passing freighter.

Look Out for Bad Money.

Counterfeit 25-cent pieces are now found occasionally in the Boundary country, and it is said that about $400 worth has been worked off on an unsuspecting community. These pieces are new and bright in appearance, but are dated 1888. They are an excellent imitation of the Canadian two bit piece, but are a trifle thicker, and are readily detected. It is claimed they contain the right amount of silver. A few have bee seen in Cascade.

Late Metal Quotations

The firm that fixes the selling price for miners and smelters quotes lead $4.40 at the close.

Notice.

NOTICE is hereby given that the partnership heretofore existing between Alexander Lynch and John Earle, doing business under the title of the Cascade Sawmill Co., of Cascade City, B. C., is hereby dissolved by mutual consent.

The business will be continued by John Earle, who is hereby authorized to collect all outstanding accounts due the late firm, and will settle all accounts owing by said firm.

(Signed)
ALEXANDER LYNCH,
JOHN EARLE.

In presence of
George K, Stocker.

Dated at Cascade City, B. C., this 23d day of August, 1899. 47

"COMPANIES ACT, 1897."

Certificate of the Incorporation of the "Victoria Gold and Copper Mining Company, Limited," "Non-Personal Liability."

CAPITAL, $1,000,000.

I hereby certify that the "Victoria Gold and Copper Mining Company, Limited," "Non-Personal Liability," has this day been incorporated under the "Companies' Act, 1897," as a Limited Company, with a capital of one million dollars, divided into one million shares of one dollar each.

The registered office of the company will be situate in the town of English Point, Grand Forks mining division, Yale district, British Columbia.

The company is specially limited under section 56 of the said Act.

The objects for which the company has been established are:

To work, operate, buy, sell, lease, locate, acquire, procure, hold, and deal in mines, metals, and mineral claims of every kind and description within the Province of British Columbia; to carry on and conduct a general mining, smelting and reduction business; to purchase, acquire, hold, erect and operate electric light and power plants for the purpose of furnishing lights and creating power; to bond, buy, lease, locate and hold ditches, flumes and water rights; to construct, lease, buy, sell build, or operate tramways or other means of transportation for transportation of ore, mining and other materials; to own, bond, buy, sell, lease and locate timber and timber claims; and finally to do everything consistent, proper and requisite for the carrying out of the objects and purposes aforesaid, in their fullest and broadest sense, within the territory named.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 8th day of August, one thousand eight hundred and ninety-nine.

[L. S.] S. Y. WOOTTON,
46 Registrar of Joint Stock Companies.

Certificate of Improvements.

CANNONBALL, DEADWOOD and ALMA mineral claims, situate in the Grand Forks Mining Division of Yale District.

Where located:—On Baker Creek, about one mile east of Christina Lake.

Take notice that I, J. D. Anderson, P. L. S., of Trail, B. C., acting as agent for R. Dalby Morkill, Jr. F. M. C. No. 33682A, William C. Williams, F M. C. No. 34617A, John Spaulding, F. M. C. No. 12862A. Orr Graden, F. M. C. No. 19609A, Geo. S. Armstrong, F. M. C. No. 12887B, and A. W. Seigle Free Miner's Certificate No. 1307A, intend sixty days from date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this tenth day of July, 1899, A. D.
47 J. D. ANDERSON.

Certificates of Improvements.

BIRTHDAY, EDISON, ELECTRIC, PICTON, MONCTON and EDISON FRACTION mineral claims, situate in the Grand Forks Mining Division of Yale district.

Where located;—Birthday—on McRae creek and one mile from Christina lake.

Edison, Electric, Pieton, Moncton and Edison Fraction—on Josh creek, in the Burnt Basin.

Take Notice that I, J. D. Anderson, P. L. S., of Trail, B. C., acting as agent for Richard Plewman, Free Miners' Certificate No. B13250, and Mrs. (Thos.) Addie Gee, Free Miners' Certificate No. 12586A, intend, sixty days from date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining crown grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 26th day of July, A.D., 1899.
50 J. D. ANDERSON.

Certificates of Improvements.

Tammany No. 1, Gold Nuggett and Gold Nuggett Fraction mineral claims, situate in the Grand Forks mining division of Yale district.

Where located:—In the Burnt Basin, west of the Edison group.

Take notice that I, J. D. Anderson, P. L. S., of Trail, B. C., acting as agent for James Peterson, Free Miner's Certificate No. 35467A, intend, sixty days from the date hereof, to apply to the mining recorder for Certificates of Improvements, for the purpose of obtaining crown grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 18th day of August, A.D., 1899.
52 J. D. ANDERSON.

Certificates of Improvements.

Burnt Basin, Burnt Basin Fraction, Jim Blaine and Jim Blaine Fraction mineral claims situate in the Grand Forks mining division of Yale district.

Where located:—In the Burnt Basin, north west of the Edison group.

Take Notice that I, J. D. Anderson, P. L. S. of Trail, B. C., acting as agent for John Hauser, Free Miners Certificate No. 35631A, intend, sixty days from the date hereof, to apply to the mining recorder for Certificates of Improvements, for the purpose of obtaining crown grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of said Certificates of Improvements.

Dated this 13th day of August, A.D., 1899.
52 J. D. ANDERSON.

Certificates of Improvements.

MECKLENBURG and MECKLENBURG FRACTION mineral claims, situate in the Grand Forks mining division of Osoyoos division of Yale district.

Where located:—At the head of the Burnt Basin.

Take notice that I, J. D. Anderson, P. L. S., of Trail, B. C., acting as agent for C. S. Wallis, F. M. C. No. 34251A, and Annie M. Brown, Free Miner's certificate No. B12949, intend, sixty days from the date hereof, to apply to the Mining Recorder for certificates of improvements, for the purpose of obtaining crown grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such certificates of improvements.

Dated this 12th day of August, A. D., 1899.
51 J. D. ANDERSON.

SECURING SURFACE RIGHTS.

Throughout all mining districts there is a desire, to a greater or less extent, in securing crown grants, to get title also to the surface rights of mineral claims, the owner of a crown granted claim being entitled to the first opportunity to purchase the surface rights. But in Yale district, for some time past, there has been a deal of trouble in securing crown grants to these surface rights. Possibly this has not been an unmixed evil, as it tended to hold down the propensity for townsite exploiting to some extent. Be that as it may, it was not justice to the undisputed owners of claims.

It appears that the land grant to the Columbia & Western railway company, gave the right to select 20,000 acres per mile between Keremeos and Robson, but this last winter the railway elected to take a cash subsidy instead. This would appear to simplify the position of the government, yet the railway still had the right to choose lands for the mileage between Rossland and Robson, previously constructed.

However, the matter was brought before the lands and works department, when it was finally agreed that crown grants to surface rights should be issued for all mineral claims located prior to the setting aside of the reserve. It was also agreed, in the cases of claims located subsequent to the reserve, that the railway company had no vested rights until their selection of lands had actually been made, and consequently owners of claims were entitled to purchase surface rights at $5 per acre.

This was a most important question, and the government did well in adopting this sensible and business like view of it, when properly brought to its attention. Otherwise much confusion must have followed.

CHRISTINA ORE EXHIBIT.

A few weeks ago the Record called attention to the fact that mining men hereabouts should get together and send an exhibit of our ores to the Spokane Industrial Exposition. It should not be necessary to enumerate the advantages accruing from such an exhibit, if a representative showing is gathered. This year the mineral department of the exposition will be one of its chief and most conspicuous features, the exhibit being placed at the very doors of the building. Many thousands of visitors, including capitalists from all parts, will carefully inspect the mineral specimens. Good cannot fail to result from such an exhibit, and the cost of getting it together is not large. In addition, the railways have agreed to transport it free.

While the time is now short, it is yet possible to get a good lot of samples together. Mr. George K. Stocker, who has been appointed to take charge of it, has labels ready for ticketing samples. He will gladly co-operate with mining men in the matter and assist in every possible way. Let us gather samples from the best properties in the Christina lake camps and show the world what we have in a mineral way. It will be well worth while.

NOTE AND COMMENT.

Jno. D. Rockefeller's wealth is increasing at the rate of $34.50 a minute. Which is proof positive that he was never in the newspaper business.

The granting of the powers of a gold commissioner on the mining recorder, Mr. McMynn, of Midway, will save mining men, having such business, many a long and weary trip to Fairview.

Hon. Rufus Pope, who recently visited Cascade and the Boundary, says that Christina claims are favorably known in Ottawa, and other eastern cities. As time goes on, they will become even more favorably known.

Scavengers in the English language are not plenty in journalism, but the individual who recently resurrected that tattered fag end of an apology for a semi-moribund weekly at Columbia, appears to fill the description and rejoice in it.

Referring to some verses that have lately been going the rounds of the press, the New Denver Ledge observes that "The Man with the Hoe" is no doubt all right, but we think The Man with the Dough would be more popular with the majority of the dwellers on this American continent.

In many a camp it is realized that nothing is certain but uncertainty. It is universally admitted by competent judges that this element is an infinitesimally small one in the various Boundary camps. Some may be richer than others, yet it is believed that all will turn out to be veritable treasure boxes. Is there another section of which this can be said?

It would be difficult indeed to find a better place to invest 35 cents than in a copy of the Spokesman-Review's mining book, just out, entitled, "A Million Dollar Check." Magnificiently printed, profusely illustrated and ably edited, it is a genuine pleasure for any mining man to peruse it. Rossland and Boundary mines form a large part of its contents.

The Nelson Tribune is just a trifle too much up to date. Last week it announced the sale of the Cascade water power, when such was not the fact. In last Wednesday's issue it stated that "Regular trains are now running on the Boundary road," another misstatement of fact. In both instances it could have learned the exact status right in Nelson. It is to be hoped the balance of the Tribune's news is of a more reliable character.

The whole civilized world, outside of France, believes that the sentencing of Captain Dreyfus to ten years, on a charge of delivering military secrets to a foreign power, is a travesty on justice. It would appear that the French generals are saving themselves at the expense of Dreyfus. The unusual interest taken is world wide, and the indignation is so widespread that it is likely to react on the Paris exposition of next year, for which such extensive preparations have been made.

DIFFERENCE IN COST OF TRAVELING.

Passengers From the South Now Have Two Routes.

Considerable interest has been expressed as to whether, for passengers coming from the south, it would be cheaper to come into the Boundary via Rossland and the new railway line, or continue over the old stage route from Bossburg. Here are the figures to get to Cascade by each route from Bossburg:

BY RAIL.

Bossburg to Rossland	$2.25
Over night in Rossland, about	2.00
Rossland to Cascade, 92 miles, at 5 cents per mile	4.60
	$8.85

By stage the fare is $4.00 from Bossburg to Cascade, making a difference of at least $4.85 in favor of the stage route.

In travelling from the Boundary to Rossland it would cost by stage $4 00 to Bossburg, and thence $2.25 by rail to Rossland making a total of $6.25. By C. P. R., all rail, the fare, according to the estimates, is $4.60.

The passenger schedule on the new railway line has not been made public yet, and consequently these figures are not exact, but it is not thought there will be much difference, unless it is in a reduction of stage fares.

Constable Dinsmore, of Columbia, has been appointed a notary public.

W. Y. Williams, general superintendent of the Old Ironsides, Knob Hill, and other Graves' properties and also an owner of the Cannonball, on Christina lake, was in town Tuesday morning.

THE CASCADE RECORD,

Cascade, B. C.

BY THE WAYSIDE

Road Superintendent Forrest has been spending the small amount of money allowed him, to the best possible advantage on our highways. He has now five men at work, and this week has been making a short cut on the road to the lake. He will shortly begin the construction of the Baker creek trail, which will be a much needed improvement. The constant and heavy rains this summer have made it doubly difficult to keep roads in repair, and consequently rendered it doubly necessary. The amount, $950, however, is too small by far, to begin to cover the necessities.

The following communication has been received from a correspondent:

Greenwood, B.C., Sept. 13, 1899.
Editot Cascade Record:

Dear Sir:—I notice in a stray copy of the so-called Columbia Review, that the editor, whom I have the pleasure of knowing, refers to your paper as a rag which would require an imbecile to understand. I think, Mr. Editor, it would require an extemely brilliant man to fathom the Review, and I also think that if Columbia is to be judged by its "rag," it must be on its last legs. The best thing that Columbia can do is to import one of the Record's office boys and send the present would-be scribe to school. Apparently he does not know any more about the Transvaal than he does about English grammer.

Yours, COON.

In connection with the above letter, the Record would state that it does not believe Columbia is generally judged by its journalistic exponent. The average man of ordinary intelligence would not for a moment think of such a thing. It is too good a town and has too many bright people in it to be brought down to such a level.

It has been thought by some persons that when the new railway started regular trains, it would be all off with the stage business between Bossburg and Cascade, but a reference to an article on another page on this subject, will show that, for travellers from the south the expense is so much greater by the new all-rail route, that the stages have much more than a fighting show yet If they would reduce the fare from $4 to $3 or $2.50 between Cascade and Bossburg, they will have a fine chance to corrall a big share of the passenger business. If not, it will encourage passengers to use the all-rail route.

Hon. F. Carter-Cotton, Minister of Finance, has been in Rossland and Nelson this week, looking after provincial matters. He says the legislature will meet on January 4th, and that he has no doubt of having the confidence of the people when that occurs. He does not seem to be worried by the figuring of the opposition that the government is now in the minority.

Constable Darraugh visited Eholt and Phoenix this week to see about holding the next meeting of the board of license commissioners for this district.

ALEX. MATHESON,
BEN LAVALLEY, Owners.

Notice of Assignment.

Notice is hereby given that Thomas F. Gaine and M. H. Roy both of Cascade City, in the province of British Columbia, doing business as wholesale liquor merchants and gents' furnishers, at Cascade City aforesaid, in the premises known as the "Yukon Store" under the name, style and firm of Gaine & Roy, having by deed bearing date the 31st day of August, 1899, assigned all their personal estate, credits and effects which may be sold under execution and all their real estate, to the undersigned George A. Eastman, at Cascade City, aforesaid, in trust for the general benefit of their creditors, both partnership and individual.

The said deed was executed by the assignors, Thomas F. Gaine, on the 31st day of August, 1899, and by the assignor M. H. Roy, and the assignee on the 2nd day of September, 1899.

Dated this 4th day of September, 1899.

GEORGE A. EASTMAN.

Born.

Born to the wife of W. J. Brown, Cascade, on September 13th, a son.

PEOPLE AND EVENTS

The stages from Bossburg of late have been crowded to their utmost capacity.

The War Eagle is sending an 800-pound sample of ore to the World's exposition at Paris.

The sheriff's sale of the Gaine & Roy stock has been postponed again—this time till next Wednesday.

I. Langley, Cascade's merchant tailor, is turning out some of the prettiest fall suits to be found in the province.

John Simpson will act as substitute teacher for D. J. Matheson, who will be away for a couple of weeks.

Rev. Joseph McCoy has returned from the meeting of the Kootenay Presbytery, held at Nelson, which he says was very successful.

Last Wednesday a 10-pound son graced the home of Mr. and Mrs. W. J. Brown, pioneers of Cascade. This is the first boy born in this city.

Work has been resumed on the Humming Bird, on the north fork of Kettle river, with J. J. McCauley as superintendent. Eleven men are employed.

There was a large attendance at the afternoon tea on Thursday, which was given by Mrs. G. K. Stocker to the Ladies' Aid Society, and an enjoyable time was had.

Contractor Ferguson has the foundations laid for the new school building, and is also getting Wm. Anderson's residence under way. Plastering on the church structure will begin shortly.

The new wagon road around Pierre's lake is now completed and in use. By building five or six miles of new road to Bowen's ranch, the distance from Bossburg to Cascade would be reduced to about 20 miles. This matter ought to be taken up and pushed through.

Early in the week it was thought the weather had cleared for good, but since then severe storms have visited this section. The stage road between Cascade and Hall's bridge is in a terrible condition, the swamp being literally a lake. Now that the winter of our summer is past, we will probably have some more winter.

Hugh McCutcheon, formerly at Nakusp, the collector for the new sub-port at Greenwood, and also inland revenue officer, vice A. K. Stewart, resigned, passed through Cascade Sunday, on his way to his new post of duty. Mr. McCutcheon is one of the large stockholdess in the John Bull group, now being actively developed at Gladstone.

First Visit to Cascade.

J. J. Stubbs, representing the Kelowna Shippers' Union, arrived in Cascade Wednesday for the first time. His enterprising concern, which is located on Lake Okanagan, in addition to its large produce business, is growing tobacco and manufacturing a superior grade of cigars therefrom. In Cascade the sales of Kelowna cigars have been steadily increasing.

Church Service

Divine service will be conducted by Rev. Joseph McCoy, M. A. tomorrow (Sunday) at 11 a.m. and 8:00 p.m., Standard Time, in the school-house, Sabbath school at 2:30 p.m. in the same place.

All are cordially invited to attend.

IN NEW FRANKLIN CAMP

Cascade Man Returns From the Promising District.

WENT BY WAY OF CHRISTINA LAKE

Is About 45 Miles From Cascade---Ore is Chiefly Quartz---Many Promising Locations.

J. P. Graber returned last Sunday from a trip to the new and promising Franklin camp, located 25 miles up the east fork, which branches off from the north fork of Kettle river 35 miles up. Mr Graber and J. K. Kelty, also of Cascade, went by way of Christina lake, taking a boat to the head. Thence they followed a trapper's trail up Hardy creek and over to Franklin camp for a distance of about 25 miles This would make the approximate distance of the new camp about 45 miles from Cascade, via the lake route. Mr. Graber occupied three days in returning, leaving Kelly to do some further prospecting.

The camp gets its name from the original location, the Franklin, which has been restaked, and which is now being worked by the father of the camp, Frank McFarland. A number of promising locations have been made this year, Mr. Graber making one called the Swamp Angel. He says the ledges in the district are large and in some cases the walls have not yet been found, in one case a 20-foot crosscut having been made without finding both walls.

The ore is of a quartz character, and is without the hard iron cap that is so prevalent in many camps. Assays run from $5 to $12 in gold and copper, with some galena. Mr. Graber expects to return at some future date, as he believes there is a bright future for the camp. Already a number of prominent men in the mining world have been in there sizing things up, and speak well of the outlook.

SANDNER WON THE BOAT RACE.

Beat Frank Asprey Five Minutes in Six Miles.

The boat race on the lake last Sunday created considerable interest. It was between Frank Asprey and Charles Sandner, the former bieng given 100 feet start. The course was from the foot of the lake to English Point, a straight course of about six miles. Ordinary row boats were used, such as are found on the lake.

The signal was given by W. H. Bell, and both started off together. Sandner's stroke was quick, while Asprey's was slow and even. Before a mile had been traversed it was evident that Sandner had much the best of it. He easily caught up with and passed his opponent, and came in far ahead, taking it easy. His time was 52 minutes, Asprey's being 57 minutes. Probably $150 changed hands on the result.

Mr. Asprey's friends assert that for a few days past his left arm has been subjected to cramps, and he was therefore not in condition. Mr. Sandner had the lighter boat, but is ready for another race at any time.

The Steamer Mytle B. accompanied the racers and at English Point quite a large number were found, taking advantage of the beautiful weather and the lake at the same time. A number of horsemen and special rigs went up during the day.

Mr. Sandner is a good deal of an aquatic sport. At the World's Fair at Chicago he took first prize for being the best swimmer and staying under water the longest.

WILL SINK TO 2,500-FOOT LEVEL.

LeRoi Mine Will Have Deepest Shaft in Canada.

The LeRoi mine is about to enter an era of the most extensive development work in its history. The plant is to be largely increased and a 2,500-foot shaft started. The management of the LeRoi has notified the representatives of the various machinery manufacturers that tenders will be received forthwith for a complete new power plant, with capacity for 60 drills, to be installed as soon as possible. This move on the part of the LeRoi people means that the development of the mine along the lines proposed by Superintendent Carlyle and accepted by the directors will begin without much delay. The new plan provides for a vertical shaft 2,500 feet deep. This shaft, which will cut the main vein at a depth of about 1,000 feet, will be the largest and deepest shaft in Canada. The present air compressor on the mine provides air for 40 drills. It will be seen that, with the installation of the new plant, a large increase in the working force of the mine will be rendered necessary, and a considerable increase in the output of ore is to be looked for.

BOUNDARY MINES

Brief Bits From Many Camps.

Princeton, in the Similkameen, is growing rapidly, owing to the mining development.

The crosscut on the 327-foot level of the Old Ironsides, in Greenwood camp, has encountered the ledge.

The recent coal find of Seattle Clark, on Fisherman creek, will be exploited at once, to determine its depth and value.

On the R. Bell, in Summit camp, there is a force of 16 men at work. The shaft is down 76 feet, and there is a 94-foot crosscut.

The Dominion Copper Co. is installing a 5-drill compressor on the Brooklyn, in Greenwood camp, for temporary use, till the great plant, coming later by rail, is in place.

G. W. Walters has sold the Tiger, the original location on Pathfinder mountain, to W. K. White, who will sink the present 18 foot shaft to the 100-foot level.

An 18-inch vein has been struck on the Pheasant, in Greenwood camp, owned by W. B. Rickards and A. K. Stewart. Samples at a depth of 30 feet ran $60 in gold and copper.

The Kitty W. Gold Mining company, with a capital of $100,000, and the Josie Copper company, with a capital of $100,000, have been incorporated. Both have their head office in Grand Forks.

J. C. Haas and Hon. Geo. E. Foster, ex-Minister of Finance, have disposed of the Golconda group, in Smith's camp. Rufus M. Pope, M. P., is organizing a strong company to develop the properties.

The Josie Copper Company, Limited, a recently organized corporation, let a contract for continuing the shaft on the Josie, in Summit camp, 50 feet deeper and the running of a 50-foot crosscut. The shaft is already down 90 feet.

Assays of $84, $601 and $673 have recently been obtained from the bottom of the 12-foot winze in the 30-foot tunnel on the Diamond Hitch, on the north fork of Kettle river. Development has been going on all summer on the group and machinery has been ordered.

The Yankee Girl, the Yankee Boy and the Bell, on Hardy mountain, have been bonded from E. Spraggett and J. M. McGregor, by Major R. G. Edwards-Leckie, superintendent of the Republic mine, on behalf of Montreal parties. It is understood that the consideration is $25,000.

R. E. L. Brown, better known as Barbarian Brown, from a paper called the Coeur D'Alene Barbarian, which he published, with F. W. Bradley, superintendent of the great Bunker Hill and Sullivan, whose mill was recently blown up at Wardner, Idaho, are now operating in the Boundary.

A contract for driving a tunnel 250 feet to tap the ledge at a depth of 150 feet on the Bonanza, in Knight's camp on the north fork of the Kettle river, has been awarded to F. H Knight and A. H Dawson. There are already two shafts, 60 and 80 feet in depth respectively, and assays are excellent.

Ores Free of Duty to Exposition.

J. E. Daniels, deputy collector of customs at Northport, has been authorized by the United States treasury department to receive free of duty all ores from British Columbia which are consigned to the Spokane Industrial Exposition mineral department, provided they are shipped in quantities of no commercial value. All shipments should be addressed to H. Bolster, Manager of Spokane Industrial Exposition, Mining Department.

9-9-99.

Washington, Sept. 9.—Officials and clerks in the departments asked themselves today as they dated their letters 9-9-99, how long it will be before a similar collection of numbers occurs. Diligent figuring on the part of experts led to the general conclusion that there will be but one opportunity to use such a combination during the coming century, and that will be Candlemas Day, 1922, when the date may be written 2-2-22.

Send it Back East.

The Cascade Record will be sent to any place in Canada or the United States for one year on receipt of $2. It pays special attention to mining in the Boundary and Christina lake sections, and aims to give the most reliable information in regard to this fast developing country.

Have you got one yet? What? Why, one of those new maps of the Christina lake mining camps. If you have an interest there, you should have a map. Sent post paid by the Cascade Record on receipt of $1.25.

It's the best in the world—bar none. The fine job work turned out at the Cascade Record office.

You can get breakfast before the early stage starts at the Queen Restaurant.

General Mining News

The work of deepening the shaft of the Josie, at Rossland, continues, and it is now down about 400 feet.

Continued rains throughout the mining districts have had the effect of driving prospectors to the towns a large share of the time.

There are rumors, thus far unauthenticated, that the trouble between miners and owners in the Slocan, will soon be adjusted and work resumed.

There is no trouble between the mine owners and miners in East Kootenay. The owners are paying $3.50 for eight hours work, and find it difficult to get men in sufficient numbers.

A ten-stamp mill is to be installed without delay on the Bunker Hill property near Waneta. A trial shipment of 800 pounds of Bunker Hill ore was recently sent to San Francisco and resulted satisfactorily.

The Crystal Butte mine, near Chesaw, Wash., has put in a 10-stamp mill and concentrator which has commenced stamping ore. They have enough ore blocked out to keep the mill running at full capacity six months.

Over $100,000 worth of ore is said to be in sight on the Galena Farm, near Silverton, including the zinc ore, which was formerly considered a detriment and is now valuable. A concentrator will be built by the new management.

William Hall and J. Richardson have done a large amount of development work on the Lone King, in Pass creek camp. A 100-foot tunnel has been run along a ledge. Recently another ledge was uncovered. There is from 8 to 10 feet of copper ore giving good values.

Some very rich pockets of ore have been struck recently in the gold properties in Kootenay. At the Athabasca a short time ago a pocket of ore was broken into which gave returns of from $1,400 $1,500 in gold. Mayor Neelands of Nelson received a 30-pound sample of this ore which gave a sample value of $1,465. At the Porto Rico property also some very rich pockets are being met with and every effort is being made to keep the value of the ore from being known. The management, however, have arranged to send a 10-pound sample to the Spokane exposition, the sample value of which is $100. This would mean that a ton of such ore would be worth $20,000.
