Trustees Plan Fourth Year High

Must Have Five or More Students at $60 Each—Cook Re-Elected Board Chairman—To Paint 2-Room Public School

If five or more students enroll at a fee of $60 each, senior matriculation work will be establi hed at Creston high school this term. This decision was come to at the inaugural meeting of the Creston school board on Monday night, and this is following out the resolution adopted at the ratepayers meeting the Wednes- previous.

Jas. Cook was re-elected board chairman, with H. W. McLaren again named secretary-treasurer. Committees for the year were struck as follows: Finance—Trustees McLaren and Cook. Management—Trustees J. F. Murrell and McLaren. Property and Teachers—Trustees Cook and McLaren.

Those who may want to take the senior matriculation course will have until August 15th to complete arrangements with the board. The meeting also decided to paint the two-room junior school building, and tenders will be called for this work. The trustees of Trinity United Church will be interviewed to secure a lease on the church basement for a couple of months to serve as a classroom until such time as the new four-room school is ready for teaching purposes.

As previously announced the the three vacancies in the public school staff have been filled with the engagement of Ben Crawford as vice-principal, and Misses Helen M ore and Gladys Webster to fill the other vacancies. On the high school staff two vacancies have been definitely filled in the engagement of Miss Olive Norgrove, B.A., of Cranbrook and David Todd, B.A., of Vancouver. Both of these have just graduated from the University of British Columbia, and come well recommended.

The other position has been offered W. A. Marchbank, B.A., who for the past term has been acting principal of the high school at Courtneay on Vancouver Island, who submits a splendid inspector's report. In addition to this he has had other teaching experience.

R. Skeldon, who will supervise the construction of the new four-room school arrived on Saturday, and work of excavation for the basement will be under way this week.

Wynndel

The C. O. Rodgers truck is busy delivering raspberry crates.

Miss Dorothy Payette, who has been holidaying with her parents, returned to Vancouver on Sunday.

Bryan Mackwood of Lethbridge, Alberta, is a holiday visitor with Mr. and Mrs. A. Martell for the berry season.

The J. B. Winlaw firm started the season's cut of logs on Saturday. The Monrad Wigen box factory is also operating.

Mrs. J. C. MacFarland, who has been on a visit with her parents, Mr. and Mrs. L. A. Davis, has returned to her home at Rossland.

B. Franklin with his parents, Mr. and Mrs. J. Franklin, and Mr. and Mrs. W. Bethune, were Cranbrook visitors the latter part of the week.

Misses R. Wall and E. Wik of La France and Kimberley returned to their homes last week. Most of the Doukhobors and other out-of-town packers have left for home.

Wynndel school district ratepayers were in annual session at the hall annex on July 17th. A. Glasier was named chairman, and the financial statement was approved as presented. W. G. Greig was elected auditor at the usual salary. Mrs. O. Davidge was chosen to succeed herself as trustee for a three year term, and with T. Sixsmith and A. Glasier complete the board. A donation of $5 was made the school fair at Creston, and $25 was voted the Wynndel Women's Institute for the fall fair school section. The junior room teacher,s salary was increased $100. The meeting had an application from a male teacher who would take first year high school work. The application was accepted and salary placed at $1200. The request for $1400 for the ensuing year's expenses was favorably voted upon. The tax on non-taxpayers will stand for this year at $2. No decision was come to on the matter of buying more land for school purposes. Reports of inspector on both rooms was read before adjornment.

Kitchener

Jimmy Holly and Andy Miller of Yahk have gone up Goat River on a prospecting trip.

A Kitchener baseball nine plaped at Canyon Sunday afternoon. Kitchener won 6-4.

Claude Simpson, who is with the B.C. Spruce mill at Lumberton, was home at the weekend.

Wesley Blair left for the Bayonne mine on Monday, where he will be employed with his truck.

E. Driffil, C.P.R. tie inspector, arrived home Saturday and is inspecting posts here at present.

Nine men in charge of L. Nowlin are employed cutting trail up Goat River, leaving on Monday.

Mrs. Almack and son, Reg., who have beed visiting Mr. and Mrs. B. Johnson, returned Wednesday.

Al x. Ellis is home with a fractured leg received while at work with the Winlaw firm at Wynndel.

Miss Jessie White of Erickson was here for a few days last week, a guest of Mr. and Mrs. B. Johnson.

A. Lepage and Walter Belger left on Monday for Crackerjack Creek, where they are fire fighting.

M. J. Boyd and his sister, Mrs. Wells, of Creston, were weekend visitors with Mr. and Mrs. G. A. Hunt.

A Vancouver orchestra put on a dance in Hunt's hall Tuesday evening, with a good local crowd in attendance.

Major James, in charge of Goatfell east camp, is back from a ten day holiday with his family at Calgary, Alberta.

Sid Abar has just shipped a truck load of poles to Goat Creek for telephone construction work by the B.C. Telephone Company.

Mrs W. Barr and son, Charles, who have been on a visit with Mr. and Mrs. B. Johnson, returned to their home in Kimberley, Wednesday.

Mrs. Clifford Folsy and children, Germaine and Marvin, who have been on a visit with Mr. and Mrs. Omer Geroux, Moyie, retnrned Saturday.

A small fire started at Goatfell Thursday last. Lewis and Selmer Anderson were sent out to investigate and were successful in putting it out.

A. Parslow left on Thursday for Ryan, where he is in the employ of C. O. Rodgers at logging operations. Willard Blair is also at work at the same camp.

B. Johnson and son, Robert, with Jackie Cavanaugh, were Cranbrook and Kimberley visitors, Wednesday. Robert is remaining to visit relatives for a short time.

A surprise party was staged on Ole Bjorkas at his new home on Saturday evening. Everyone reported an enjoyable time. The residence is just completed and was built by John Anderson.

W. L. Hathaway and party of San Francisco, Calif., who have been holidaying at their summer camp here, were called away suddenly on Thursday to Tacoma, Wash., due the serious illness of Chester R. Paulson, a nephew of Mr. Hathaway.

The annual school meeting was held on Saturday evening, having been postponed from July 13th due the sparse attendance at the first session. C. Senesael was re-elected to succeed himself for three years as trustee, and C. Folsy was re-elected auditor. Sid Abar and G. A. Hunt are the other members of the trustee board, the latter secretary-treasurer. $400 was voted for running expenses. Selmer Anderson will again be janitor, at $100 per year.

For their opening on Saturday last the Co-Op. reporto having the largest number of customers ever seen in the store in a single day's trading. Other days, however have exceeded Saturday in respect to total sales intake.

Carload Cherry Shipping Starts

First Car Out Yesterday to Winnipeg—Mixed Car Bings and Raspberries Roll Wednesday—Bings Over this Week.

The feature to fruit shipments this week is the movement in cherries and raspberries, with strawberries still moving in small quantities from Wynndel.

Central pack of Bing cherries was inaugurated at the Exchange on Saturday, and the first straight carload of this variety went out on Thursday morning destined for Winnipeg, Man. It contained almost 1200 of the four-basket crates. The Exchange has a sta . of 14 on the cherry pack and expect to finish the Bings by the end of this week, and to make a start on the Lamberts on Sunday. The heavy rain of Friday and Saturday morning did very little damage according to the Exchange packers.

In the Exchange outgo of Bings is a considerable quantity from Boswell from which point the first supplies came in on Monday. Last season the Exchange rolled nine cars of cherries and Manager Cooper figures there will be seven this season. Exchange growers are past the peak with raspberries

Long, Allan & Long, Limited, report heavy receipts of raspberries and so far these have stood up well although reports are not yet to hand on shipments that went out following the heavy rain of early Saturday morning. Mr. Allan figures the raspberry peak will be reached next week.

This firm is co-operating with the Exchange and the Co-Op. at Wynndel and the three combined put out the first car of Bings and raspberries from the Wynndel pre cooler on Wednesday morning. It had about 500 crates of berries and the balance Bings, and the car will be distributed between Brandon and Winnipeg. Mr. Allan looks for a windup of Bings by Sunday, with Lamberts coming strong by the middle of next week.

Wynndel Co-Operative Fruit Growers report daily supplies in small quantity of strawberries and they will probably be coming for another week. Raspberries are being received in volume and the peak is not looked for until the middle of next week. Bing and Royal Anne cherries are much in evidence and are going out in mixed cars with raspberries. The Co-Op. reports the strawberry deal satisfactory, the claims for rebates being below the average of most seasons.

Boswell

Mrs. B. Luck and son, Billy, of Canal Flats are guests of Mrs. Home.

Fishing from the rocks and trolling has been especially good the past week.

Mrr. A. Mackie and William were business visitors at Creston on Saturday.

Mrs. Mitchell is visiting with Mr. and Mrs. Ray McGregor at Crawford Bay.

Peter Hepher left for Seattle on Thursday, and expects to be away about a month.

Mrs. Edwards of Vancouver was a guest of Mr. and Mrs. Cummings during the week.

F. Kunst was a Creston visitor on Saturday, with his brother, who is a hospital patient there.

Murdo McGregor left last week to take a position on the staff at the Bayonne mine, Cultus Creek.

Jack Bishop, who has been working on the road at Cultus Creek, spent a few days here last week, returning Thursday.

Raymond and Lloyd Cummings are staying with Mr. and Mrs. Sherman while taking off the hay on D. G. Brown's ranch.

Jack Bromhame of the forestry branch was a guest of Mr. and Mrs. A. Hepher during his stay in Boswell. He left on Monday for Creston.

Many Creston people were seen at Sanca beach on Sunday. The bathing is very good, the water being considerably warmer after the recent hot spell.

Mrs. Lawrence, Alice Christenson, and Bill Shumau of Olds, Alberta, spent a few days here, guests of Mr. and Mrs. K. Wallace, returning from a trip to the coast.

The Soukoroff tie camp has moved the mill to a site about a mile and a half north of the old location. This enables them to be in close proximity to their timber.

K. Wallace, Muriel and Mrs. M. J. Soyer were Creston visitors on Sunday. Mr. Wallace, Bill Sherman and Mrs. Soyer visited Mrs. Pascuzzo at Sirdar earlier in the week.

Jeffrey Sidonius of Cranbrook motored down with E. Home for the weekend as the latter's guest. They returned Sunday along with Harriet Home, Elizabeth Spruell and Gladys De Wolf.

Mr. and Mrs. Schaub and Kenneth, of Lamont, Alberta, are camping at Destiny Bay. They spent last winter in Boswell, returning for seeding, and again the lake has lured them back.

Mrs. (Dr.) Gervau, Misses E. and R. Gervau and Bill Gervau of Calgary and Miss V. Hyde of Strathmore, Alberta, are the guests of Mr. and Mrs. Chas. Allan and Mr. and Mrs. F. Kunst.

Miss Jean Home, who is on the Trail hospital nursing staff, spent Tuesday with her parents here, returning the same day accompanied by her sister, Harriet, who arrived back at Boswell on Friday.

D. Kuntz was taken with appendicitis on Tuesday last and was rushed to Creston hospital by Dr. Green. Immediately on his arrival a successful operation was performed, and a speedy recovery is anticipated.

The largest shipment of fruit so far this year was handled by W. Mackie on Sunday. 100 crates, mostly cherries, went forward to Creston. Raspberries, Bings, black and white currants are on the shipping list. Strawberries are over.

Ernest Frampton was down from his claims at Sanca on Saturday. He reports making good progress and has completed a tunnel of over 200 feet on one of his properties. He expects to leave shortly for the north to do assessment work on other properties he holds.

Stanley, Lawson and Peter Hepher made a trip to the head of LaFrance Creek to make an estimate of the cost of clearing the trail to Tom Wall's claims. As a result of the fire last year all the timber from the head of the creek to within a mile of the lake has been destroyed.

Mr. and Mrs. Dickinson of Vancouver spent a few days in the district last week. He has lately acquired the Hallet property, opposite Harrop, and is very enthusiastic about the production of Cox Orange apples. He is at present securing information for his book, "Who's Who in the Kootenay."

K. Wallace presided at the annual general meeting of Boswell school district $250 was the amount of the assessment for the current year. The union library scheme was discussed but was left over for future action. Mrs. A. Mackie again elected secretary-treasurer; W. L. Hepher and A. Ascott are the other members of the trustee board.

105 people attended the lecture and moving pictures of the Canadian Forestry Association at the Memorial Hall on Saturday evening. Jack Gromhame of the forestry branch made a capable lecturer and the educational and entertaining pictures of fire, hunting, fishing and winter sport scenes were much enjoyed. Stanley Hepher acted as chairman.

What promises to be one of the most successful regattas yet held a Boswell is well under way. The ladies of the Church Guild will look after the refreshments and a committee is busy on the programme of events. Several new novelty features will be introduced this year and it is hoped a number of speed boats from other points on the lake will be able to compete for the handsome prizes awarded.

Canyon

Ernest Vance is here from Kalispel, Montana, on a visit with his mother, Mrs. T. Vance.

Bob Metasky is here from Wynndel taking off the hay crop on the Leslie McInnis ranch.

Mrs. Pochin arrived from Nelson at the end of the week, for a visit at the ranch with Mr. Pochin who arrived earlier in the month.

Mrs. John Johnson is at present a patient in Cranbrook hospital, recovering satisfactorily from an operation she underwent on Friday.

Mrs. Seminoff is another Canyon resident undergoing treatment at Cranbrook hospital, and was accompanied to that city by Mrs. C. A Robinson.

Mrs. Irwin Davis and young son, Jock, are leaving this week for their home at Rossland, after a few weeks' visit with her mother, Mrs McRobb.

The Bing cherries will all be shipped by the end of the week. The latter are a better crop than the former. Friday night's rain has caused little damage by splitting.

Canyon does not appear to have gotten as much rain in the Friday-Saturday downpour as other valley points. The rainfall was about a quarter inch here. The warmest wenther of the year was on Tuesday when the mercury got up to 92 in the shade.

A special meeting of the school district ratepayers was held on Tuesday for the puapose of electing a trustee to replace Mrs. Messinger, elected at the annual meeting, but who was unable to qualify. The meeting elected A. Spencer to the vacancy. Mr. Messinger, who was made auditor, was unable to qualify and L. Moberg was chosen in his stead.

Shipping Houses Negotiate Deal

Guaranteed Sale of Entire Apple Crop by End of Year—Must Pay Five Cents Box Storage on All Varieties but Wealthies

What looks like an eminently satisfactory deal for Creston in the orderley marketing of the B.C. 1935 apple crop was placed before representatives of the four valley selling agencies on Saturday by G. A. Barrat and O. W. Hembling of the newly-elected B.C. Tree Fruit Board which was attended by Ron. Stewart and W. Keirn of Creston Products, Limited; R. J. Long and C. W. Allan of Long, Allan & Long, Limited; E. Uri of the Co-Operative Fruit Growers Association, Wynndel; and W. McL. Cooper of Creston Co-Operative Fruit Exchange.

As in the past few years the 1935 crop will be disposed of under the cartel arrangement. By this plan every selling agency is permitted to sell a stated per centage of its tonnage, and after all have done this the board grants further releases on the per centage basis until the variety is cleaned up.

Should this system of cartel releases as applied in the Okanagan last year be enforced in Creston Valley this district would be compelled to hold either in cold storage at destination or in local warehouses a portion of the crop, until possibly April or May of next year.

The Tree Fruit Board realizing that Creston is not equipped with storage facilities to take care of this situation have, as an alternative offered complete clearance of the 1935 crop before the end of December. In order to justify this concession of clearances and bearing in mind that it costs Okanagan growers a considerable amount per box over their entire crop to take care of storage charges it was necessary some charge be made on Creston to take care of this attractive clearance concession.

The matter was very carefully considered by the four shipping houses representatives at the conference with Messrs. Barrat and Hembling, every conceivable angle of the arrangement being brought forward, and all were of the opinion that the plan was eminently fair.

Under the proposed agreement Creston selling agencies will pay five cents per box on all shipments after Wealthys.

An advantageous feature of the deal as it affects Creston Valley is pointed out by a local selling agency. It has long been the custom of Creston Valley to sacrifice something in grade in order to get early movement. Under this agreement such a practice will be totally unnecessary in that the Tree Fruit Board undertakes to secure orders for Creston Valley for all its apples at board prices, prior to the end of December.

Lister

For the first time in the history of Lister there are a few cases of measles in the area.

Miss Jean Fisher left at the end of the week on a visit with her parents at Nelson.

Col. Fred Lister is a business visitor at Vancouver and Victoria this week, leaving on Monday.

Mrs. St. Denis of Canal Flats is a visitor here at present, a guest of her parents, Mr. and Mrs. J. W. Pendry.

Mrs. Thos. Nutter and daughter, Betty Jean, of Nelson, spent a few days here last week, guests of Col. and Mrs. Lister.

Lister-Huscroft baseball nine handed Camp Three a 10-8 beating at a game at Moyie Springs, Idaho, on Sunday afternoon.

Jos. W. Bell of Kimberley, accompanied by Capt. and Mrs. Bride of the same town, spent the weekend at the former's ranch at Lister.

Harry Helme and the Rodgers ranches are putting the finishing touches on the alfalfa harvest. The weekend rains will help the second crop wonderfully.

Returning to their home at Potlach, Idaho, after a holiday trip to Banff and Lake Louise, Mr. and Mrs. L. Anderson spent the weekend with the latter's parents, Col. and Mrs. Lister.

Rev. M. C. T. Percival had quite a good turnout on Sunday afternoon for Anglican Church service. It was his final service as he leaves at the end of July to take charge of the parish of Fernie.

F. A. Marsack of Cranbrook, who is in charge of potato bug control work in the Kootenay-Boundary, was here at the first of the week. Up to the present the bugs have not been quite as numerous as in some past seasons.

A few of the boys from here were at Creston on Monday evening for the show of pictures at the Grand under the direction of the Canadian Forestry Association. Manning Powers and Douglas McKee, junior fire wardens, were in the party.

WORLD HAPPENINGS BRIEFLY TOLD

Great Britain has apportioned more than $25,000,000 to maintain her security by strengthening her air defence.

More than 1,000 settlers have been established in various parts of Quebec under the $10,000,000 colonization plan, Hon. Erenee Vautrin, Quebec minister of colonization, stated.

Single men able to work and refuse to help farmers with their harvest, will lose their city relief allowances, Mayor G. Wilton of Hamilton has announced.

In Toronto Judge James Parker criticized the Canadian Performing Right Society for keeping the public "in the dark" to its tariff for the playing of "protected" music.

Postules of stem rust were found in wheat in the University of Saskatchewan's grain fields. Garnet wheat, which has little resistance to the fungus, showed most of the infestation.

A higher tonnage of merchant vessels is under construction in the world than at any time since 1932, Lloyd's quarterly report revealed. Germany leads the world outside of Great Britain, with 237,000 tons under construction.

Manitoba was 65 years old on July 15. The province was created and admitted to the Dominion July 15, 1870, though it was not until Sept. 2 of the same year that Manitoba was officially considered a unit of the Dominion of Canada.

Vancouver Island lumber mill managers have received from export sales organizations copies of the last batch of lumber orders from Japan to this continent. Each order has the notation: "Not to be supplied from mills in Canada."

China Goes Modern

Campaign Against Footbinding In Peiping

A campaign against footbinding in the city of Peiping has been launched by Yuan Liang, famous in China as the "blue law" mayor of Peiping. Six regulations have been devised governing the execution of the movement.

The first regulation is that girls under 15 will not be allowed to bind their feet. Those that have already done so are ordered to unbind them immediately. Women between the ages of 15 and 30 who have their feet bound are given three months in which to unbind them. Women over 30 are permitted to unbind their feet at their leisure.

Failure to observe the new regulations results in a fine not to exceed $10 in Chinese money ($4 in Canadian) for the first warning, but if warned a second time the fine automatically becomes $100 in Chinese money, or about $40 in Canadian currency.

Bird Refuses Freedom

Prefers To Stay With Convict Who Befriended Him

Squegee, the bird in an ungilded cage, had his chance at a pardon from Stateville Prison in Joliet, Ill., but scorned it for his steel and concrete home in cell block C.

The manner in which Squegee eschewed liberty brought a sniffle to John Post, 65-year-old convict, who has been Squegee's master, confidant and cellmate since a day in 1933 when he found the horned lark fluttering in the prison yard with a broken wing.

Post, sent up for burglary, mended the fracture and spent his last $1.50 for bird seed. Squegee moved into Post's cell.

But Post has still a year "in stir" and suggested to Warden Whipp that Squegee should get his pardon. Accompanied by the warden, the old man went into the yard and tossed the lark into the air.

Squegee soared over the wall—but flew right back to Post's shoulder.

"I'll keep him," said Post.

The British Museum has a piece of iron taken from the Pyramid of Gizeh, which is believed to date from 400 B.C., and an axe head of Egyptian manufacture dating from 1370 B.C.

SUNDAY SCHOOL LESSON

JULY 28

AMOS (Prophet Of Social Justice)

Golden text: Let justice roll down as waters, and righteousness as a mighty stream. Amos 5:24.

Lesson: Amos, Chapters 4 and 7.

Devotional Reading: Psalm 85: 7-13.

Explanations And Comments

Three Visions of Judgment, Amos 7:1-9. Amos, the prophet from Judea, has gone to Bethel, the capital of the Northern Kingdom of Israel, to warn them that the nation is ripe for judgment. He tells them of a series of visions in which God has revealed to him what will come to pass. He describes a plague of locusts devouring the vegetation, but God stayed his hand against the people when Amos cried, "O Lord Jehovah, forgive, I beseech thee."

Next he had a vision of a terrible drought. "The great deep," the underground ocean on which the Hebrews imagined the earth to rest, had dried up, and the land, without its springs and fountains, was being burnt up by the sun's scorching rays. Again the prophet prayed, "O Lord Jehovah, cease, I beseech thee," and his prayer was heard.

His third vision depicts Jehovah with a plumb line in his hand standing before a crooked wall and measuring it. As far off from rectitude as that crooked wall was the Northern Kingdom in all its wickedness, and the judgment of God could no longer be withstood, further intercession would be futile. "The Eternal said, 'With a plumb line I test my people; never again will I pardon them'" (Moffatt's translation). "The high place of Isaac shall be desolate, and the sanctuaries of Israel shall be laid waste and I will rise against the house of Jerobeam wtih the sword."

Amaziah Reports to the King, verses 10, 11. Amaziah, the high priest of the sanctuary at Bethel with its golden calf, sent a message to Jeroboam II., the King of Israel, accusing Amos of treason, of predicting the death of Jeroboam by the sword and the captivity of the people. The land, he said, was not able to bear all Amos' words—so monstrous were they.

Amos Answers Amaziah, verses 14-17. Then Amos pronounced woe upon the priest and the members of his family and upon the land, ending with a declaration that Israel should be led away captive out of the land.

Will Not Cut Corners

Machine Which Is Wizard At Mathematics Nearing Completion

A machine which can beat the combined efforts of 50 finest mathematicians of the world is rapidly approaching completion at the Victoria University, Manchester. In the space of ten minutes it will be able to dispose of problems which would keep even the most quick-working of human mathematicians busy for two days. It will never get tired, never suffer from headaches, and never misread its own figures. Sheer lack of time may compel the most conscientious mathematician to make "second-best" approximations. This robot mathematician has no need to "cut corners." Professor Hartree, its inventor, wants to probe may hitherto unsolved mysteries of the atom, of the travel of radio waves, and of aeroplane flight with the aid of this robot.

Would Be Gladly Welcomed

British Working On Signal To Eliminate Telephone Waits

In response to a long-felt want the British Post Office is said to be experimenting with a signal which will enable the caller to lay aside the instrument while waiting for the callee. It is to be a different click from that breaking connection and, from its double sound, will be called the "cuckoo." That such a click is needed is shown by many letters in the London Times, one of which reads in part: "It seems extraordinarily clumsy that people have to hold on, often for several minutes, unable to pursue any other occupation, because no one can invent some method by which the telephone shall give tongue when the receiver at the other end is taken up again. I suppose that many hours a day are wasted in this tedious and empty employment of standing or sitting with a receiver to the ear waiting for the required voice."

Symbol of all things firm and strong, the Rock of Gibraltar is now chained up to keep its summit from toppling into the sea. 2108

THE MOST WELCOME ARRIVAL IN YEARS

There was great rejoicing at the Zoological Gardens, London, England, when this little fellow stepped into the world. He is a beautifully marked Harnessed Antelope, the first to be born in the Zoo since 1899. Along his back and following the line of the ribs are a number of white stripes which suggest the strapping of harness.

Ruled By Foreigners

Only One Of Europe's Dictators Is Native Born

Most of Europe is now ruled by dictatorships. Strangely enough, most of these dictators are not natives of the countries of which they are absolute rulers. Adolf Hitler of Germany, for example is an Austrian by birth; Mustapha Kemal of Turkey, is a Greek from Salonika; Joseph Stalin of Russia was born in Asiatic Georgia; Eamon De Valera of Ireland was born in New York City,; the late Josef Pilsudski of Poland was a Lithuanian. Only Mussolini, among all the more important dictators of Europe, is a native of the country he rules. He was born in Dovia, Italy.

A Friendly Tip

During the day, Mrs. Brown discharged her old maid and hired a new one, who answered the door bell when Mr. Brown arrived home in the evening. He carried a bunch of roses, which he handed to the maid, saying: "Give these to Mrs. Brown, and tell her I want to see her at once."

"All right," said the maid, "but you better make it snappy, because she expects the old man any minute now."

Retains His Popularity

Prince Of Wales Will Always Be Charming Person

At 41 the Prince of Wales is still an interesting and popular figure, though the charm of his youth has inevitably departed. As a young man he captured all hearts much as Bonnie Prince Charlie did. But his has been a happier lot than that of any of the Stuarts.

From his wide travels he brought back a mature conception of duty, and at home he has studied closely the lives and fortunes of the British people. That he has never married is a disappointment. But this is a detail. No heir to the throne has more faithfully fulfilled the obligations of his position.—Philadelphia Inquirer.

A Royal Business Man

Lord Carisbrooke, son of Princess Beatrice, and a grandson of Queen Victoria, is not in receipt of any pension from the State, says the News of the World. He has to earn his livelihood, and is a director of several companies, including Lever Bros. He was trained for business as a clerk in the merchant banking house of Lazard Bros., and while there did the ordinary day's turn from 9:30 to 6 just like the other clerks.

Household Arts

by Alice Brooks

This Is a Jiffy Knit It Takes Little Time To Make

PATTERN 5395

If you want to make the most of your time, make this jiffy knit. Large needles and a heavy thread (candlewick, that very heavy cotton, or Germantown) make it get done in no time. The entire blouse is in one piece. You have only the side seams to sew. The openwork yoke contrasts effectively with the closer stitch of the body of the blouse. As you can see in the detail, the stitch of the blouse has the effect of stripes. The blouse, lovely for summer, will be very practical for fall and winter, too, short sleeves being quite the thing for wear with a suit. Directions for a plain knitted skirt come with the pattern.

In pattern 5395 you will find complete instructions for making the blouse shown and the skirt in size 16-18 and 36-40; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Little Journeys In Science

THE BUILDING STONES OF THE UNIVERSE

(By Gordon H. Guest, M.A.)

Scientists have discovered that in decomposing certain materials by means of such agencies as heat and electricity, one always finds substances which resist all efforts to decompose them. These materials which cannot be broken up into simpler substances are known as chemical elements. At the present time 92 of these simple and fundamental forms of matter have been discovered.

Water can be decomposed by electricity into the gases hydrogen and oxygen. Red oxide of mercury can be broken up by heat into mercury (quicksilver) and oxygen, and common salt, under certain conditions, yields the metal sodium and the greenish-yellow gas chlorine. Other important elements are iodine, iron, calcium, carbon, sulphur, nitrogen, silicon, aluminum, silver, and gold.

In recent times scientists have discovered that certain substances, known as radioactive elements, decompose spontaneously into other elements. The chemist has no control over these changes. This fact is illustrated in the metal radium, which spontaneously splits up, producing a number of other elements, such as helium, radon, and lead.

It is a very remarkable fact that when elements unite to form new substances, which are known as chemical compounds, they lose completely their own properties. An excellent example of this is common salt, which contains the element sodium (a soft, silvery metal that reacts violently with water to produce hydrogen) and chlorine (a greenish-yellow, poisonous gas). In chemical combination, however, these elements form salt, a white compound which is a necessary part of our diet.

Some common elements occuring naturally are gold, platinum, copper, oxygen and nitrogen. Most of the elements, however, are combined with others in compounds, and it has been found necessary to decompose compounds in order to obtain them. Most of the elements are solids, a few occur as gases and only two, mercury and bromine, are liquids under ordinary conditions.

Although there are 92 elements, only about 25 of these are at all common and important. Moreover, it has been calculated that about 98 per cent. of the earth's crust and the atmosphere is composed of only eight elements. These are oxygen (50%), silicon (26%), aluminum (7.3%), iron (4.2%), calcium (3.2%), sodium (2.4%), potassium (2.3%), and magnesium (2%).

The spectroscope, an instrument invented by the scientists for the detection of chemical elements, has enabled man to study the composition of the sun and stars. The elements aluminum, calcium, carbon, copper, helium, hydrogen, iron, nickel, nitrogen, oxygen, silver, and many others have been detected in the sun.

Thus science has revealed that all materials, from salt to star dust, are built of these simple and elemental forms of matter known as elements.

Recipes For This Week

(By Betty Barclay)

AMBASSADOR STRAWBERRY TARTS

1 cup cream, whipped
1 egg white, stiffly beaten
¼ cup sugar
½ teaspoon vanilla
1½ cups moist, sweetened coconut
1 cup sweetened sliced strawberries
6 baked 3½-inch tart shells

Combine cream, egg, sugar, vanilla, and 1 cup coconut. Place strawberries in bottom of tart shells, pile cream mixture on fruit, and sprinkle with remaining coconut. If desired, place one whole strawberry on each tart before sprinkling with coconut. Serve at once. Serves 6.

RED RASPBERRY JAM

4 cups (2 lbs.) prepared fruit
6½ cups (2¾ lbs.) sugar
½ bottle fruit pectin

To prepare fruit, crush or grind about 2 quarts fully ripe berries. Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent floating fruit. Pour quickly. Paraffin at once. Makes about 10 glasses (6 fluid ounces each).

Leprosy reached America from both Europe and Africa.

CHAPTER IX.—Continued

"Walk straight up the road till you pass my house and see a path leadin' into the woods. It's terrible steep and I ain't attempted it for years, though Tubbs and I got engaged to be married up there under the old pine. You'll find our 'nitials cut in the bark with a heart around 'em. Victor Tubbs is a real good carver. If you run into anybody from the Adam ranch, Nancy, tell 'em we'll want extry milk to-morrow. And would you mind peekin' in my bedroom window and see if Tubbs is sleepin'? He's got a delicate stomach, and his supper didn't set good last night."

Suppressing a smile at this unique request, Nance promised, and started on her way. The afternoon was all her own, and it was impossible not to feel a thrill at this unbelievable December day. The sun was warm; yet the paper reported a blizzard raging in New England! It seemed incredible; and next week, Nance mused regretfully, the Country Club would be gay with winter sports.

"I wouldn't be there anyway," she consoled herself, as the homesickness she had supposed vanquished, raised its head again. "I'd be at Edgemere wiping dishes for Mother, or mopping up puddles of snow brought in by Phil. Here's the Tubbs abode already. I must see if Victor's asleep."

This brought a smile, and homesickness retired to that place where such things go when we forget ourselves. Aurora's house which set back a space from the road, was a one-story affair covered with tree-bark, and almost hidden in a grove of stunted pines. Nance went softly up the path and peered in at a window. By pressing her face against the glass she made out an ornate iron bedstead on which the recumbent Tubbs was snoring peacefully; while one of his wife's rich layer cakes and an open jackknife stood on a nearby chair.

Thinking of Victor's "delicate stomach," the girl chuckled as she turned away. No wonder his suppers failed to digest! Should she tell on him? Nance decided against this; but vowed that Cousin Columbine should hear the story. It was too good to keep.

She still smiled as she resumed her walk; but that path into the woods seemed to elude her. Concluding that she had missed it, Nancy stepped aside to escape the dust from an approaching truck, and recognizing the hatless figure of Matthew Adam, hailed him as he was about to pass.

Although on one pretext or another, Mark had dropped in almost every day of the past two weeks, Nance had not seen Matthew since his blushing exit after colliding with Aurora Tubbs. He was blushing now, the girl observed, and wondered if it were the same blush, or a new one for her especial benefit! She said, as a shy smile hovered across his face on recognizing her: "Sorry to make you stop if you're in a hurry, but Aurora wants more milk to-morrow. And will you show me how I can reach that hill? I've lost my way."

As Matt slid lightly from the truck to stand beside her, Nance was again impressed with the young man's appearance. His blush had subsided; but something told her that he was truggling with embarrassment and furious with himself because of it.

"You should have turned off just after you passed Aurora's," he told her, "but it's no wonder you missed the trail, so few go up that way. It's an easier climb from the other side. If—if you don't mind riding on the truck I'll take you 'round."

He was blushing again. Nance caught the idea that he had forced himself to make the offer out of politeness, and thus responded: "Aren't you too busy?"

"Not busy at all; but this truck is second cousin to Methuselah, and—"

Nancy laughed.

"You needn't apologize for the truck! I'm tickled to go for a ride in anything at all. My feet have had plenty of use since I struck Pine Ridge; but that hill tempted me, and the day, too. Isn't it glorious."

With Matt's assistance she had reached the seat, and said, as they backed around: "Is it far to the other side of the hill?"

"A couple o' miles, maybe."

"Miles! Why I thought it was only a step!"

"To the top of that hill? Well, it's not much more, from here; but it's pretty steep, and we can ride half way up from the other side. My mother used to take us there on picnics when we were kids."

Seeing that the young man's embarrassment had dropped away when he spoke of his mother, Nance grasped the cue.

"Cousin Columbine tells us that Mrs. Adam is—well, what she said was: 'Eve Adam is a grand success as a mother'!"

"I'll say she is!" Matt faced her, smiling, and Nancy saw that he had completely forgotten himself at last. Then the color dyed his face again and he stammered awkwardly: "I—I don't mean that we boys have turned out anything above the average; but—but that—"

"I know what you mean," smiled Nance, coming to his rescue, "though I think Cousin Columbine meant just what you're denying. It must be nice to have such enviable reputations! How did your mother manage it with all four of you?"

She couldn't resist teasing him a little, but it was kindly tact which made her bring the conversation back to his mother; and Matthew answered: "By being herself, I guess. She was always on hand, you know, so perhaps we didn't get into as many scrapes as some kids. Mother's a wonder; and Dad is too. I'm rather crazy about my people, but—but I've said enough. Don't know what got me going or—"

"I got you going!" admitted Nance, a twinkle lighting her blue eyes. And then: "Oh, look! Is that a snow-capped mountain range on the horizon?"

Matthew nodded.

"Here's where we turn. Do you mind a little cross-country riding in this old wreck? You're likely to get some jolts, but—Look out there."

This warning was too late, and only a quick snatch of Matthew's arm which brought her tight against his khaki coat for just a minute, kept Nance from losing her balance as they dipped into a rain-worn gully. When he released her and the girl looked up, she saw that all his previous confusions were as nothing compared to the embarrassment that engulfed him now. This amused sophisticated Nancy, and she said demurely:

"Thanks for saving my life! Is that another of those pleasant little thank-you-ma'ams looming up ahead? If you'll tell me when one's approaching I'll hang on tight and save you the trouble of rescuing me a second time."

"It—it wasn't a bit of trouble," stammered Matthew. "I mean—I didn't in the least mind—I—"

"I'm glad to know that the experience wasn't unpleasant," broke in Nancy, her eyes dancing. "Do I get out here?" (as Matt, his face the color of a peony, stopped the engine.) "And do I keep straight on until I reach the top?"

"I'd better show you the way, hadn't I? That is—unless—unless you'd rather go alone. I—I don't want to butt in if—"

"Oh, come on," laughed Nancy. "I wasn't keen on solitude, if that's what you mean. And if you've got time to play around for an hour, nothing would please me more. Jack was vanquishing a wood pile; Cousin Columbine was napping, and Aurora was too much inclined to give advice, so I ran away.'"

Matthew laughed softly. It was a pleasant laugh and his voice was pleasant too, thought Nancy, when he forgot himself and spoke naturally.

"Aurora Tubbs strikes me completely dumb," he told her; "and advice is one of her strong points. She's never recovered from my going to college—thinks it was the last word in foolishness. What's she found to pick at about you?"

"Stockings!" said Nancy, and wondered if Matt, following close behind in the narrow path, was blushing again. "My sport hose got left at home, and she implored me to borrow a pair of Cousin Columbine's 'black cottons.' Honestly, I didn't know till I saw Cousin Columbine the day we came, that cotton stockings were manufactured any more."

"They're growing scarcer all the time," said Matthew gravely. "Even in Pine Ridge there's not much call for 'em; and the high lace boot is doomed.

Nancy whirled about. This was the strangest young man she had ever come across. One moment he stammered with confusion, and the next was saying something as amusing as it was unexpected. Their eyes met as she turned, and they both laughed, and laughing, felt better acquainted.

"I wonder," remarked the girl as she started forward, "where Cousin Columbine gets hers?"

"You mean the boots?"

Nance nodded because the trail was steeper here, and she found herself a little short of breath.

"Maybe she gets 'em where she gets the middies," suggested Matthew. "Slow down, Miss—er . . ."

"Don't be Victorian," said Nancy, without turning. "Was I going too fast?"

"Too fast for your own good, at this altitude. It takes time to get acclimated when you're transplanted from sea level. Has your brother found a job?"

"Not yet; and he's pretty worried. Oh, just look at the Peak! And—and—why I never imagined such a view. I didn't know there was anything like it in the world!"

Matt beamed, as pleased with her enthusiasm as if he were responsible for the view himself.

"Keep on," he told her, "till you reach that old pine that's been struck by lightning. That tree is practcially on the summit; and there isn't a finer view for miles."

"How could there be?" Nance stood, breathless at the foot of the ancient tree. Plains, and mesas, and mountains lay stretched before her—behind her—on every side; valleys that would be green as emeralds in summer; deep gorges; snow-capped peaks. "It's almost too beautiful to be true," she said at last. "Why has no one ever built a home, here on this spot?"

Matt tapped the scarred old tree trunk, shaved clear of bark where lightning had done its work.

"A house would be too good a target! This is the highest point in several miles. Are you afraid of thunder showers? If so, you'd better pack your trunk before the middle of May!"

"Are the showers so bad?"

Try D. D. D. Prescription now. Stops the most intense itching instantly. A 35c trial bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALM.

Talking About House-Flies —Do You Know This?

Doctors And Scientists Realize Danger To Human Life Caused By This Pest

A common house-fly has four black stripes on its back. It has large eyes, short feelers and one pair of wings. It has two small, round balancers, borne on slender stalks, which also act as organs of hearing.

A house-fly cannot bite. Its mouth is spread out for sucking. It has to soak a hard object, like a grain of sugar, with saliva from its own mouth before it can suck it up.

It breeds in heaps of filth and waste and carries disease germs on its hairy legs. It lays one hundred to two hundred eggs in one batch which hatch into maggots in twenty-four hours and after five days become the pupae. This refers to the in-between stage after they are maggots and before they are adult flies.

Is it any wonder that doctors, scientists, health authorities who realize the danger to human life which is carried around by this deadly pest, urge its extermination by every possible means. Infant Diarrhoea, which causes the death of so many little children during the summer months, has been directly traced to the common house-fly.

Cleaning up unsanitary, fly-breeding places around the house, keeping food and drink covered and cupboard doors closed, using screens on doors and windows will all help, but one of the safest, cleanest, surest, easiest methods of killing all the flies is to use Wilson's Fly Pads, for an hour or two daily during the warm weather. They'll keep you free of the disgusting pests. Isn't it worth a little thought for the children's sake?

"We've imposed on our neighbors long enough!"

"I ordered a telephone this morning," said Mr. Lumrick. "We've imposed upon our neighbors long enough.

"Our neighbors are good-hearted people--they've never uttered a word of protest. But I am sure we must have been awful pests, running into their house at all hours of the day and night to use their telephone.

"But thank goodness that's a thing of the past. I'm mighty glad—and I'll bet our neighbors will be, too."

THE CRESTON REVIEW

Issued every Friday at Creston, B.C Subscription: $2.50 a year in advance. $3.00 to U.S. points.

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, JULY 26

HOME BREW

The tabulated statement issued showing how the different districts voted in the recent election of the B.C. Tree Fruit Board is decidedly interesting in that it provides something definite on which to establish the importance of the Creston-Boswell area as to the number in the fruit growing industry. The statement sets forth that there are 212 registered growers in this district, which gives it the highest standing of the 25 enumerated, with the exception of Summerland, which has a registration of 259. Next to Creston is Penticton with 202, and then Salmon Arm with 126. For all Kootenay the total is 216. Grand Forks is shown as having 19.

Not so long ago much unfavor- criticism was levelled at the prairie agriculturist who would have nothing to do with anything but grain. Now it would appear that we have something of the counterpart of the Alberta agrarian in the B.C. fruit country. Look at this from the last issue of the Salmon Arm Observer: "The Vegetable Marketing Act is going to be felt by consumers this summer. The Mayor stated that a Chinaman who for years had sold vegetables grown at Armstrong will be unable to do so in future and the city will lose the $50 tax which he paid. The new act says that he cannot sell in Salmon Arm. He did a large business in tomatoes here."

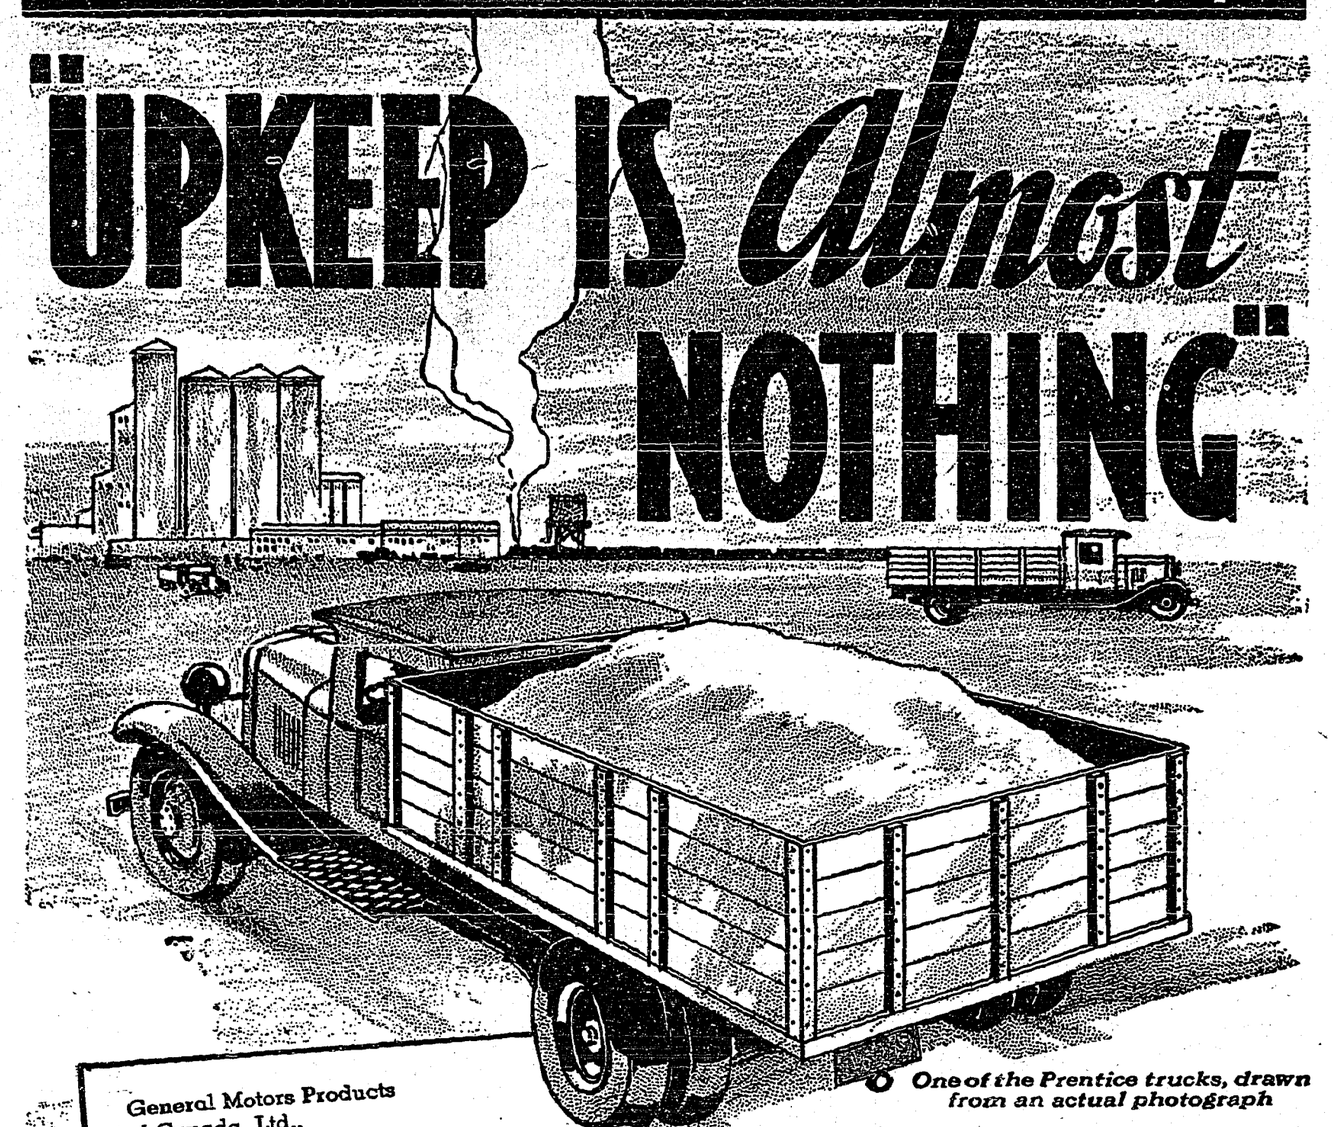
When it comes to giving practical encouragement to home talent the trustees of Creston school have established a creditable record in connection with the public school. For the 1935-36 term five of the seven teachers on the payroll are the product of the local public and high schools. And when it comes to teaching ability all five have records they may well be proud of. The three newcomers, Misses Webster and Moore and Ben Crawford, have been highly successful where previously employed, and Miss Hobden and Miss Holmes, who have had charge of Divisions 5 and 6 for the past three or four years are quite the equal of the best Creston has ever had in charge of the two junior rooms. With Principal Marriott and Miss Wade completing the staff it is no exaggeration to point out that the corps of teachers in the public school will compare with the best in the province. The Review hopes that with taxes coming in from the dyked lands within the next year the board will find itself in a position to give some increase in stipends. Just at present the local salary schedule is not a par with the ability of the teachers.

From sentiments uttered and unexpressed at the school ratepayers meeting last week in connection with the taking on of senior matriculation work at the high school it could not help but be inferred that due consideration was not being accorded when doubt was expressed of students being willing to pay $75 to take the work locally. While under the new Normal School entrance regulations it might seem unjust to stand in the way of a deserving student taking the teachers' training course by charging to high a fee, there is the other side to the argumeut that if it is to be just as easy to get senior matriculation in the future as it has been to get the junior high standing up to the present, there will be no let up in the desire to get into the teaching profession, a check on which the department doubtless has in mind in tightening up the regulations. And in reply to the charge that pupils from homes of meagre means would be discriminated against the Review cannot help but repeat that what is worth having is worth working for, and anyone who has arrived at the age of 18 or 19 years should not be incapable of earning sufficient to pay this tuition fee. At Fernie, some years ago, when the work was inaugurated there the charge was $150. An extra teacher was hired for this work specially, and six or eight students was the minimum. If with the completion of the new four-roomed school Creston has a spare classroom it mignt not be a bad idea to try it out as did Fernie at the inception of the work.

Now that the dykes have held and there is assurance of a very satisfactory first-year crop being harvested on the lands of Creston Reclamation Company, Limited, the board of trade, possibly in partnership with the company, should have in mind some sort of suitable recognition of the assistance given board committees and compano officials in various ways to make the big dyking project possible. What we have specially in mind is the wholehearted co-operation accorded the project by the drainage districts in Idaho. When one considers the very necessary help they so readily gave and contrasts it with the pussyfooting indifierence shown by suen so called friendly organizations as the Nelson board of trade, all the Review can say is that the best that can be shown in the way of appreciation is none to good for the friends at Bonners Ferry. They have stood shoulder to shoulder with Creston on reclamation for more than a quarter of a century and this cheerful and and effective team work must not go unrecognized.

A. E. PRENTICE operates 16 CHEVROLET TRUCKS . . . yet

"UPKEEP IS *almost* NOTHING"



One of the Prentice trucks, drawn from an actual photograph

General Motors Products of Canada, Ltd., Oshawa, Ontario:

"As a fleet owner, I am pleased to say that Chevrolet trucks are very satisfactory in every way in their performance. We operate sixteen of these trucks practically all the time and have ever since 1929. Our chief work has been gravelling, hauling two yards on a ton-and-a-half Chevrolet truck, and when harvesting we haul a great deal of grain in this district over long distances. The load of grain is never less than ninety-two bushels to a truck. Our speed is from thirty-five to forty miles per hour and our gas mileage is figured from twelve to fourteen miles per gallon. Up-keep of our trucks is very low or almost nothing, as we generally run each truck fifty thousand miles and then overhaul truck completely, making it ready for another fifty thousand miles.

As operating is very cheap and repairs very reasonable it would be hard to persuade me in any way to change to another kind of truck."

A. E. PRENTICE, Dauphin, Man.

CT-65C

MEN who study haulage costs—like Mr. Prentice, who writes the letter reproduced herewith about his sixteen Chevrolet units—know that Chevrolet Trucks are as outstanding in economy and durability as they are in low price. Chevrolet Trucks handle tough hauling jobs at lower cost because they are built to Chevrolet's own high standard of quality in every part. They keep on saving you money, day after day and year after year, because Chevrolet quality means stamina and longer life. You get top economy—top dependability—in Chevrolet and Maple Leaf Trucks. And if we're not mistaken, that's exactly what you want!

A complete line of Chevrolet ½ and 1½ ton Trucks . . . Maple Leaf 2 ton Heavy Duty Trucks . . . new General Motors Trailers . . . and Dual Performance Maple Leaf units. A wide selection of General Motors-built truck bodies. Low delivered prices, easy GMAC terms. New Owner Service Policy.

Our K. B. O. Broadcast

Invermere is having its usual fall fair on August 29th and 30th.

Kimberley will spend $4500 in improving sanitary conditions at the school buildings.

The Okanagan will be shipping cantaloupe by the first of August. The crop is not as large as last year.

Kimberley ratepayers voted $1000 to be used by the trustees in giving deserving teachers raises in salary.

The Okanagan vegetable crop is not selling as well as a year ago. This year the season is late and competition has to be met with vegetables produced at prairie points.

Kimberley ratepayers were in generous mood at the annual school meeting when a committee was named to get the cost of a brick building to replace the present frame structure.

Under the new Vegetable Marketing Act outsiders may not peddle their wares in other towns, and Salmon Arm will lose a $50 trade license formerly collected from a Chinese from Armstrong who did a big tomatoe business in the former town.

"Go Into Your Dance"

with

Al. JOLSON and RUBY KEELER

R. Crawford left yesterday for Rykerts where he is taking on the work of assistant customs officer under Chas. Davis, collector. Bob made the best showing of the ten candidates who wrote at Cranbrook last month in connection with qualifying for this position.

EYE SPECIALIST COMING TO BONNERS FERRY—Dr. O. M. Drake, well known in this section, will be in Bonners Ferry one week, beginning August 13th. Practice li ited to the fitting of glasses. 30 years practice in Idaho. Remember the date.

Celli's orchestra will play for the Holy Cross Church benefit dance at Park pavilion, Friday evening, August 2nd, to which the admission is 50 cents. The lucky tickets will be drawn at the dance on the four prizes in the drawing contest in aid of the district Catholic Church.

The hottest weather of the season was encountered on Monday when the mercury hit 93 in the shade. During the past week the valley has encountered a couple of thunderstorms—Friday and Wednesaay: that produced between them three quarters of an inch of moisture.

Al's Four Aces orchestra has taken a lease on Park pavilion for Saturday night dances for the balance of the season, commencing July 27th. The orchestra is made up of Alf. Speaker, banjo and saxaphone; Tom Lacey, Saxaphone; A. Goplin, drums, and L. Anderson, piano.

Tom Crawford, jr., who successfully completed his second year in arts at the University of Alberta, received word from Edmonton on Wednesday that he had won the exchange scholarship with the University of Torohto. This year, as in 1934, Tom also captured a scholarship in English.

A number of the younger friends of Maisie Ferguson were entertained at the Legion Hall, Monday evening, honoring her birthday. Dancing and games were features of the evening. Tap dancing by Thelma Erickson, Beryl Palmer and Maisie Ferguson was popular with all present. A tasty supper was served by Mrs. C. Lowther and Mrs. W. Ferguson, following which the evening's guest was the recipient of a number of lovely gifts.

Miss M. V. Warmington of Birmingham, England, is a Creston visitor this week, a guest of Mr. and Mrs. D. Bradley. Miss Warmington is mathematical mistress at Sutton Coldfield high school in that city, who has been doing exchange teaching the past year at a high school near Boston, Mass., and since it has closed has been holidaying at California and Pacific coast points, and is now en route for home. A sister of Mr. Bradley's is head mistress at Sutton Coalfield.

With the arrival on Monday of R. Skeldon of the firm of Moncreiff & Vistaunet of Vancouver, who have the contract for Creston's new four room public school building, excavation work for the full basement is now under way, and plans are completed so that all other work will follow along without loss of time. Mr. Skeldon assures that preference will be given to local labor and where possible the work will be sub-contracted locally, and in this connection states that the contract for the plumbing and steam heating has been awarded A. S. Reed

Dr. C Wace, medical superintenent of Queen Alexandra Solarium, has the authority of the provincial board of health to travel in British Columbia and to conduct a survey of the crippled children of the province. To obtain information as to the number of crippled children requiring treatment, the facilities for providing such treatment in any partciular area, and to review cases which have been under treatment in any Institution for children, at the request of that Institution. Dr. Wace will be in Creston on August 5th.

The July meeting of the Women's Auxiliary to Creston Valley Post Canadian Legion was held in the Legion hall on Tuesday evening last. The meeting was in charge of the president, Mrs. W. V. Jackson, with twelve members present. A letter from the Women's Institute, as to the union library was discussed, and the meeting favored a visit by Dr. Stewart to outline the play. The annual picnic for the returned men and families was up for discussion and committee will assist with the effirt. The affair will be held next month. Mrs. Mallandaine will be asked to represent Creston auxiliary at the provincial convention at Kamloops. The standing committees will be named at the August meeting. A social hour followed the business session. Hostesses were Mrs. Vigne, Mrs. D. Ross, and Mrs. Watson.

The July meeting of Creston Hospital Women's Auxiliary was held on Thursday afternoon The president, Mrs. R Stevens, was in the chair, and there were fifteen members and two visitors in attendance. For the visiting committee Mrs Goodwin reported, and Mrs Jas. Cook submitted the report of the buying committee. The visiting committee for the ensuing month is Mrs. C. Kirk and Mrs Maxwell. Activities for the autumn were fully discussed and various plans made. In the absence of Mrs. Hare, who represents Creston on the district executive of hospital auxiliaries, Mrs. Stevens reported that a meeting hab been held at which Mrs. S. Parker, Canyon, was named president, and Mrs. Hare, secretary. Meetings are to be held quarterley. After adjournment the tea hostesses were Mrs. C. Kirk, Mrs. G. Jacks, Mrs. G. R. John and Mrs. Cartmell.

Erickson

E. Parks of Kimberley is an Erickson visitor this week, a guest of Mr. and Mrs. W. Currie.

Carol Healey left for Vancouver on Saturday, where she expects to remain for some time.

SEALED TENDERS will be received by the undersigned up to Thursday, August 1st, 1935 for painting the two-room junior public school building. Lowest or any tender not necessarily accepted. For all particulars apply H. W. McLAREN, Secretary School Board, Creston.

J. Currie of Trail is a visitor here with his parents, Mr. and Mrs. W. Currie.

Mrs. Mermet and Mrs. Lemoigne were weekend visitors with friends at Yahk.

Birth—At Creston hospital, July 21st, to Mr. and Mrs. R. Clarkson, Arrow Creek, a daughter.

Miss Ella Alton, who has been here for some months, returned to her home at Fernie at the end of the week.

Mr. Jino Ciccone of Vancouver is visitor with his friend Corrie Celli, and will be remaining for a few weeks.

Mrs. Ron. Lidgate of Calgary, Alberta, is renewing acquaintances here at present, a guest of her mother, Mrs. A. McKelvey.

Miss Margaret Fraser, who has been teaching at Alexis Creek, in the Cariboo, arrived on Monday for the summer holidays.

R. M. Teleford was a Sunday visitor at Cranbrook taking a hand in the Creston - Cranbrook baseball game, which Creston won 7 5.

Mrs. E. Kopenick and children, who have been visiting her parents, Mr. and Mrs. Healey, for some months, left for Vancouver at the end of the week.

Alice Siding

Kirk Beard of Lister is a visitor this week with Mr. and Mrs. John R. Miller.

Mr. and Mrs. Bill Marshall of Stavely, Alberta, were visitors for a few days last week, guests of Mr. and Mrs. Frank Martin.

Ray Keirn, in company with Percy Robinson of Creston, left this week for a few days' camping and fishing up Summit Creek

John and B. Dale of Cloverdale were guests of Mr. and Mrs. W. A. Pease one day last week. They were motoring through to Calgary.

Mr. and Mrs. H. MacDonald of Calgary, Alberta, arrived at the end of the week on a visit with the latter's parents, Mr. and Mrs. J. H. Webster.

With the start of central packing of cherries at the end of the week, F. W. Ash has resumed his position of warehouse foreman at Creston for the Co-Op. Fruit Exchange.

Haying on the flats commenced this week. There is a limited supply—on the Reclamation Company lands that are not in cultivation. Chas. Sutcliffe is supervising operations.

At the annual meeting of the school district ratepayers on the 13th, $400 was voted to finance the school for the ensuing year So far as can be learned Principal Page will be back for another year.

The heavy rainfall of Friday night and Saturday morning was much to the liking of the raspberry growers. Another storm threatened Tuesday afternoon and evening but passed over without any rainfall.

Good Meats

at ECONOMICAL PRICES!

It is most important to have good meats for healthy, active bodies. And it is most important to obtain good meats at economical prices to keep within the family budget. We are always on the job to make your shopping satisfactory.

Creston Drug & Book Store

GEO. H. KELLY

THE REXALL STORE

MASS BUYING PROBE EXPENSES ARE SUBMITTED

Ottawa.—The mass buying commission cost the Dominion treasury about $475,000, Hon. R. B. Hanson, minister of trade and commerce, told the House of Commons, but he believed "a very large sum of money" had been turned into the finance department from tax-dodgers brought to light during the probe.

The minister said he was not sure of the tax collections because they did not come under his department. He had been informed however, they were substantial.

William Golding (Lib., South Huron) protested against Norman Sommerville, of Toronto, commission counsel, being paid a daily fee of $150 and $15 expenses a day. He said Sommerville was paid for 196 days although the commission only sat 124. The remaining 72 days were occupied with Sommerville "schooling and prompting witnesses," consulting auditors and investigators, although "my own opinion," he said, "is those witnesses should have come without any interference whatever."

The South Huron member said one witness from the west was on the stand only a few minutes one day although his bill was $149.50. An ordinary three-cent stamp represented the value of his evidence. Another witness cost over $150 to suggest farmers be stopped from selling produce on their farms and urging rail-grading for hogs.

The government had no control over fees, Mr. Hanson said. The commission paid its own accounts. When Sam Factor (Lib., Toronto South-Centre) charged the accounts of auditing firms, particularly Clarkson, Gordon, Dilworth, Guilfoyle and Nash, had not come before the commission, the minister promised to bring the account.

New Wheat Board Bill

Farmer May Now Sell Under Two Plans

Ottawa.—The interpretation of the new wheat board bill as viewed by the special committee of the House which revamped it, was explained by John Vallance (Lib., South Battleford), one of the members of the committee.

"Let us take for example a minimum price of 70 cents a bushel," said Mr. Vallance. "The producer would have to decide whether he would turn over his wheat at that price to the board and be entitled to further payments if the board operated at profit or sell out entirely at a higher price to the grain trade.

"The minimum price would be fixed at the start of the crop year. Provision is made that the price would not be lowered during that crop year and there would be no object in increasing it during a crop year for the producers in any event would get the benefit of any higher price the wheat might bring.

"This act differs from the Argentine method in that under control in that country the board only buys when at the minimum price and pays no premium to producers if it makes a profit.

"The new bill is fairly acceptable to Liberal members of the committee with the important exception that they wanted the board appointed for one year only with provision for extending it from year to year if thought necessary. The measure on the other hand makes the board permanent unless eliminated by act of parliament."

Wheat Marketings Lower

Ottawa.—Wheat marketings in the prairie provinces for the week ended June 21 amounted to 1,704,259 bushels, a decrease of 997,227 bushels compared with the previous week, and a decline of 947,005 bushels against the same week last year, the Dominion bureau of statistics reported.

Rudyard Kipling's Works

London.—Some 310 examples of Rudyard Kipling's early work, published in newspapers, were sold at auction for £230 (about $1,150).

Plenty Of Moisture

Conditions Throughout Canada Generally Favorable

Ottawa. — Moisture conditions throughout Canada are generally favorable to growing crops, says the telegraphic crop report issued by the Dominion bureau of statistics.

Dry areas are practically confined to Vancouver Island, parts of the lower mainland of British Columbia, districts in southern Alberta and parts of southwestern and west-central Saskatchewan.

Crops are late throughout Canada and except where moisture is limited, warm weather is needed to promote growth, says the report.

The report continues:

"In prairie provinces grain crops have made good progress during the past two weeks. Drouth areas are limited. The most variable conditions now exist in Alberta where drouth is an important factor in the south.

"In British Columbia dry weather has reduced yield on Vancouver Island and in the lower mainland area. Conditions are satisfactory in interior points with fruit crops developing rapidly.

"Manitoba: Rainy weather continues in Manitoba and during the last half of the week drenching rains were received over the western portion of the province.

"Grain crops are about one week late and growth is heavy.

"Saskatchewan: Rainfall during the past week favored the eastern and northern sections of the province. Recent warm weather has stimulated growth and crops in most parts of the province have made good progress.

"Moisture conditions are generally satisfactory but rains are still needed in southwestern and west-central Saskatchewan. Grasshoppers are still hatching but outbreaks are very patchy and have been effectively controlled. Cut-worms and wire-worms are active in some areas. Root rot is also reported. Summerfallow is about half completed. Pastures are in good condition."

Senator May Resign

Will Leave 17th Vacant Seat In Upper House

Ottawa. — While the resignation had not been received by the Dominion government or the speaker of the Senate, it is understood Senator John McLean (Cons., Souris) intends to resign his seat in the Upper House. Illness has prevented the 88-year-old Maritime Senator, oldest member in the upper chamber, from attending in the Senate last session of this year.

When it does occur, the resignation of Senator McLean will create the 17th vacancy in the upper chamber. Hon. J. A. Macdonald, member of the Bennett cabinet for Prince Edward Island, is mentioned prominently as successor of Senator McLean.

Japanese Steamer Sinks

Collides With Freighter And Over 100 Persons Drowned

Osaka, Japan.—The collision of a small Japanese steamer with a freighter on the pitch dark, fog-bound Japanese inland sea claimed 104 lives, a checkup by shipping officials disclosed.

Crowded with holiday passengers the steamer Midori Maru rammed with the freighter Senzan Maru and sank almost immediately.

Rescue vessels, including the Zenzan Maru, picked up 91 of the 166 passengers of the Midori Maru and 56 members of the crew of 85 in the storm-tossed sea. Eleven bodies were recovered, including those of three women and an infant.

New C.P.R. Ships

Glasgow.—The Canadian Pacific Steamships will replace its liner of the older type lately discarded, Sir E. W. Beatty said on the occasion of his inspection of the giant new Cunarder, "Queen Mary," now building.

Trade Treaty With Poland

Ottawa.—Premier R. B. Bennett announced in the House of Commons a trade treaty has been signed between Canada and Poland. He tabled a copy. 2106

NEW PRIME MINISTER

Hon. A. A. Dysart, leader of the Liberal Party in New Brunswick, who, by virtue of his overwhelming victory in the recent provincial general elections, becomes the new Prime Minister of New Brunswick.

Air Liner Reported Lost

Believed To Have Fallen Into Channel Off Isle of Wight

Portsmouth, Eng. — A destroyer and Royal Air Force flying boats searched in vain for a British air liner reported to have fallen into the channel off the Isle of Wight after sending out SOS calls. No trace of the wreckage was found but a patch of oil on the surface about 10 miles from shore gave a clue to the probable fate of the two persons aboard, Pilot Captain Ogden, 30, and a passenger named Grainger. The machine was flying to England from the Channel islands.

Wins Wager For Hike

Saskatchewan Man Completes 10,000-Mile Walk Ahead Of Time

Sudbury, Ont.—Ernest A. Wall, of Waldeck, Sask., the 10,000-mile hiker, arrived in Sudbury, July 2. He reported he had completed his 10,000-mile walk, four days ahead of time, winning a wager with the mayor of his home town that he would accomplish the feat in one year. He left Waldeck July 6, 1934, and spent six months in New Brunswick. Wall says he has the original 10-cent piece with which he started his journey.

Heavy Rains In B.C.

Nelson, B.C.—Damage to highways and bridges has been fairly heavy in the Kootenay and Okanagan districts where rivers and creeks have been swollen to new flood levels by the heaviest rains in 10 years, British Columbia public works officials here said. The Mission river at Kelowna has broken all flood records.

New Tariff Adjustment

B.C. Premier Sees Necessity Of Revision Of B.N.A Act

Prince Rupert, B.C.—Necessity of a revision of the British North America Act as it affects the relations of the provinces with the Dominion was stressed by Premier T. D. Pattullo in a luncheon address.

The necessity of such revision was being recognized with unanimity all over Canada, the premier said, even in Ontario and Quebec and it was important the people of this province should realize it.

Tariff adjustment to permit of fairer treatment for British Columbia in relation to the east and a redefinition of sources of revenue and taxation for Dominion, provinces and municipalities to eliminate overlapping and ease as far as possible the tax on land were also essential Premier Pattullo declared.

Bonus To Be Paid

Farmers Shipping Milk To Cheese Factories Will Profit

Ottawa.—For the month of July, a bonus of 1¼ cents a pound will be paid all farmers who ship milk to cheese factories, Minister of Agriculture Robert Weir announced in the House of Commons.

The money will come from a fund of $1,000,000 which the House considered as a means of equalizing dairy prices.

Primary reason for the cheese bonus was to prevent farmers switching production from cheese to butter and forcing down prices to world figures.

First bonuses will be paid in July, the minister said, through the cheese factories. It would be at least 1¼ cents a pound and might run to 1½ cents.

Frown On Seances

Bishop Of London Warns People Against Spiritualism

London.—The bishop of London, Rt. Rev. A. F. Winnington Ingram, issued an order forbidding any church building in his diocese to be used for seances and warned people against the "peril" of getting in touch with spirits through spiritualism Writing in his diocesan leaflet, he urged them to give up "this unauthorized attempt to communicate with the other world," and described their efforts as "very dangerous, dishonoring to the dead and waste of time for the living."

New Air Mail Service

Bombay. — The British government's new air mail plans provide for an air service operating between London and Australia and between London and the Union of South Africa, by way of Egypt, it was announced.

ARABIAN CROWN PRINCE VISITS LONDON

Here we see the Crown Prince of Saudi Arabia being welcomed by the Earl of Dunmore, on behalf of King George, on his arrival in London on a visit. The Emir Saud is heir to King Abdul Ibn Saud.

HEAVY DAMAGES FROM FLOODS AND STORMS IN WEST

Winnipeg.—A two-year-old boy was given up for dead as western Canada counted damage of thousands of dollars from the worst storms and floods in 25 years.

In western Manitoba, eastern Saskatchewan, the Peace River area of north Alberta, and in British Columbia rain-swollen streams overflowed their banks, inundating farm lands, sweeping away bridges and driving settlers and farmers from their homes.

Five bridges already have been wrecked in the Kootenay and Okanagan districts of the coast province. The Mission river at Kelowna has broken all flood records, officials said, while at Penticton two bridges have been carried away. The police building at Kamloops is surrounded by water.

Slave Lake, Alberta, residents abandoned their homes to seek refuge of tents on higher ground. Every stream and river in the Peace River country was reported on the rampage, with no indication of a let-up in the flood situation.

A serious situation existed in northwestern Manitoba following a week-end of storms that brought 8½ inches of rain to one point. Thousands of acres of farm land were hailed out in the Grandview district, with damage up to 80 per cent. Hundreds of poultry were drowned, hayracks, granaries and small barns carried away. Gales and hail tore off roofing and flooded stores.

At Rorketon, police withdrew from a three-day search for two-year-old Arthur Godsworth, who celebrated his second birthday recently.

The boy disappeared then, and police considered it impossible he could have survived three nights of torrential rain and mosquitoes.

Though the rain had ceased, floods in western Manitoba showed no signs of subsiding. Highways were washed out and farm lands flooded over a wide area. A Canadian National Railways train was derailed into a ditch by flood-covered rails, four coaches buckling up behind it. No one was reported injured.

A gale of cyclonic proportions wrecked the farm buildings of Alex. Dykun, at Gilbert Plains, where the train was derailed. His house and contents were strewn for a mile from where the dwelling was situated. Dykun was injured when part of a wall toppled upon him.

Employees at the Dauphin, Man., power house worked to maintain a crippled electric light and power service, pumps fighting to keep rising flood waters from the machinery. The dam at the town's source of water supply was swept away.

But on the brighter side of the flood picture was the lush green verdure over the entire western Manitoba and eastern Saskatchewan.

A New Racket

Ottawa.—The new "racket" of signing books or sheets and contributing $1.00 or similar amounts in anticipation of getting higher returns if additional persons sign, is declared an offence against the criminal code under an amendment adopted by the senate banking and commerce committee. Any operator of such a scheme may be fined up to a maximum of $500 under the amendment.

Radio Commission

Ottawa.—The House of Commons retraced its steps to make a correction in the bill extending the life of the Canadian Radio Commission until March 31, 1936. Under an amendment to the bill made in the senate the whole radio act which established public ownership of radio would have terminated on that date.

Vesuvius Active

Naples.—Mount Vesuvius erupted with a tremendous explosion, blowing a piece of its cone from the crater high into the air. Naples residents were alarmed but the Vesuvius observatory issued a statement minimizing danger of the eruption.

Crop Conditions Are Satisfactory

Recent Rain Benefits Raspberry Crop and Does Little Damage to Cherries—Export Varieties are Lightly Thinned.

The past fortnight has been much hotter, fortunately it wa: recently broken by a heavy thunder storm without much loss to the grower, some hail fell but it was for a very short period and confined to a small area Very little damage was done as the stra /berry season is drawing to a rapid close, and the first cut of alfalfa was safely uuder cover. A few growers thought that the cherries would suffer severely but little damage occurred as the weather stayed cool for the next day.

Strawberries will be ove· in a week, carload shipments terminated on 18th, the crop ran a little over the growers estimate, verv little loss occurred in the field for the six weeks period of picking that the Valley growers have now enjoyod, a loss of quality occurred for the two stormy periods, as the berries ar rived sof for a day or so on the prairie markets after each rainstorm.

Raspberries slow at first are arriving now in greater quantities, they will benefit greatly from the recent rains, daily receipts will be heavy this week which should reach their peak next week.

Ch rries are arriving in greater numbers daily Royal Annes are about over, Bings have been coming in slowly last week, but carload shipments can be expected this week, followed by Lamberts around the end of the month. The recent rains caused very little splitting and depredations from birds are no worse than what generally occurs. Central packing is being put into operation by nearly all the packing houses, the season may open with a few mixed carloads of chiefly cherries and raspberries being shipped out together, the pre-cooling plants at Creston and Wynndel are now being used to full advantage.

Bush fruits will soon be over as the recent hot weather ripened the currants quickly, as the market demand for them is never very keen, a large proportion of them will be sent to the jam factory.

In the orcha·ds growers are still thinning, export varieties are being worked over lightly, otherwise it is afraid the fruit would size too much for the overseas market, which is expected to absorb a larger quantity this season owing to a short crop over there from spring frosts. All tree fruits are sizing more rapidly though it will be a few weeks yet before early pears and green cooking apples will be sufficiently grown to be ready to pick. Where irrigation is available it has been in full swing since the advent of he hot weather

Tomatoes are looking better, the fruit sizing and taking shape on the first trusses, it will be near the middle of August before any quantity will be ready to ship.

The second crop of alfalfa is well advanced the recent rains will improve the quality and quantity very much, it should be ready to cut early in August

The recent rains greatiy benefitted all garden truck crops and hillside pastures.

Co-Op. Opens Fine New Store

30 x 40-Foot Addition Home of Butcher Shop and Grocery—Very Latest Equipment—Big Crowd on Opening Day.

With a steady stream of customers from opening at 8 a.m. until closing shortly after 10 p.m., the spacious addition that has been put to the store of Creston Valley Co-Operative Association was opened on Saturday under most auspicious circumstances.

The addition, which is 40 x 30 feet, is on the east side of the store, and the well proportioned plate glass windows, the exterior color scheme of white and black and the interion trim of the same colors, along with the modern equipment and with the otherwise well equipped and well planned interior combine to create a retail trading centre of which Creston and the Co-Op. shareholders, management and staff may well be proud.

The interior of the old store has been almost completely re-arranged, with part of the space now available for the display of goods that heretofore were on display in rather cramped quarters The feature of the new store is the butcher shop, which is in charge of E. Gay, originally from Regina, Sask., who had had much experience and is a recognized authority on meats.

The butcher shop occupies a space 12 x 40 feet. The whole shop is modernly equipped, An air-conditioned counter, 12 x 4 feet is used for the display of meats with which the shop is completely stocked. The upper section is of triple glass, which allows the customer a full view of the meats to be had. This counter is mai tained at a temperature of from 34 to 36 degrees, and meat is kept entirely free of discoloration and shrinkage.

A walk-in meat cooler has its location in the centre of the shop. It is 9 x 12 x 9 feet. In this compartment meat, butter, eggs aud milk can be kept with no danger of spoilage. It has been demonstrated that this cooler expedites the handling of eggs, as at this temperature they remain fresh for almost three months. Two service windows are built in the side enabling salespeople to get butter without entering the cooler.

An electric meat slicer is used which reduces waste to the minimum. Besides slicing ham it is also used for less firm meats and does its work withont in any way damaging even the most tender cuts. The shop will specialize in Swift's products, but when first class meat can be obtained locally the latter will be given the preference.

The electric equipment was installed by the engineer o the Canadian General Electric Company, and the wiring was done by West Kootenay Power & Light Company, Limited. At the rear of the butcher shop is the kitchen in which sausage, hamburger, and cooked meats are prepared. An electric meat grinder is used. The grocery department has been moved from the old store to the new addition, and occupies a space 40 x 18 feet. It is fitted up with shelves and counters. and several display stands. Two new fixtures are added. These are for the display of soap and groceries, and the whole place has a striking appearance in color scheme of white and black.

A water cooled vegetable rack is installed in the window, the contents of which are kept fresh as they are steadily sprayed with cold water from a small fountain placed in the centre of the container. At the rear of the addition is a commodious storeroom. A complete plumbing system further modernixes the premises.

The old store is to be turned into a ladies' and gents' wear department, with a boot and shoe section in the centre. In the alcove will be placed the hardware stock, which will include a full line of china. Furniture will also be handled on a small scale As before, the egg grading station is in the basement, and there is no change in the location of the flour and feed departments.

The old store has been refloored The sides and front of the structure are painted white and black, and the building stands out at the equal of the best in Creston's business section. The work of erecting the new building and also the reconstruction of the old store is in charge of Axel Anderson & Son

Discussing the opening day with the Review, Manager H. Langston said, "An all time record for the number of individual customers served in a single day was established. Specials were keenly appreciated, and the volume of customers was increased somewhat by the youngsters who came from all parts of the valley for the caps given away gratis by the Ellison Milling Company. People voiced appreciation of the new meat service and the more advantageous arrangement of the store as a whole. Due the hotweather the great variety of cooked meats was the more appealing. It was 10.30 p.m. before the last customer was happily disposed of."

The Co-Op.'s Start

With this substantial development by the Co-Op. a sketch of its business life will be of interest While the store in Creston has been serving he public for eleven years, the first store owned by the firm was opened at Erickson in 1921, following a meeting of those interested held at Erickson school house in September of the same year. The first president of the association was W. G. Littlejohn; vice-president, G. W. Harrison, who was also the first store manager; treasurer, T. R. Mawson; secretary, G P. Smith, with the late M. R. Palmer, Hilton Young and R. A. Palfreyman completing the directorate. Prior to opening the store coal was handled, with the first store stock consisting of general products, flour and feed. Starting with 20 shareholders the number has now grown to 97. In 1922 the store management was assumed by LeGrande who came from Nelson to take the position, but in August of the same year he was succeeded by J. E. VanAckeran, who was in charge until 1925. His successor was L. Littlejohn who was in charge until the Erickson branch was closed in 1931.

When the Co-Op. first opened at Erickson it handled flour and feed on a percentage basis for the old Creston Fruit Growers Union. Trade was never up to expectations at Erickson and in 1924 the Co-Op took over the feed department at Creston of the Union, the store being managed by R. A. Palfreyman, and was located in the present office of Creston Co-Operative Fruit Exchange. In August of that year a meeting of shareholders decided to erect a retail store on the present site. It was 30 x 40 feet and has served the firm well up till the present expansion. Mr. Palfreyman was in charge until 1932, at which time the management passed on to Mr. and Mrs H. Langston. Since that time business steadily increased and the first notable development was the establishment of an egg grading station, which the new management handled for about a year, and then secured the services of P. Argyle, who is still in charge.

The Co-Op is the first firm in town to inaugurate rural delivery and now serves the area from Huscroft to Wynndel, with Jas Handley in charge. Miss Dorothy Sinclair Smith has recently been added to the staff.

Sirdar

Tony Kopeck left for Nelson on Sunday on business.

George Sukeroff was a business visitor to Nelson at the weekedd.

Miss Margaret Lombardo of Revelstoke has arrived here where she will spend an extended visit.

Miss Rosie Passcuzzo, who spent a few days in Nelson with Mrs. J. Harlow, returned Saturday morning.

J O. Pike superintendent of Bayonne mines, was a business visitor to Nelson at the beginning of the week.

Miss C. Minunza of Blairmore, who has been spending a few days with Mr. and Mrs. S. Passcuzzo, returned on Sunday.

Dave Gordon of Vancouver was at Atbara on Saturday spending a few hours with J. S. Wilson on his way home from the prairies.

The water as indicated by guage at Slough bridge reads 11.01 a fall of 0.39 for the week. The weather was variable over this period.

Bass are to be seen in very large numbers at Slough bridge. These fish are very large this year, but sportsmen state that they will not bite.

Ties from Atbara are going out in greater numbers now and the trucks on the haul from Goat Creek have to work late as has the loaders.

The hay crop here has been safely garnered and in good condition. Other ranch crops are coming along nicely and it looks as if the ranchers are to have a good year.

Sydney Rogers and Dom Passcuzzo spent a few days this week fishing at Hall Creek. The sport was good. Several parties from Creston were also in at the weekend.

Mr. McMaster, government bridge expert, along with A. L. Palmer of Creston, were at Tye by motor boat this week looking over the bridges on the road to the Bayonne mine.

Seventeen men are at present engaged at the Wisconsin Mine on Midge Creek. The packing in of machinery has been completed and camp installed. Developement is now under way.

Lin Anderson, blacksmith and powder man on the road construction gang here, has been transferred temporarily to Creston to do the blasting at the widening going on at the K.V. Highway.

W. H. Cartwright, game warden, has been very active here this past week checking up on the many sportsmen fishing at the various creeks on the Lake. A motor boat is in commission this year for this work.

The younger set have put on beach parties several times this week with swimming and games, followed by a repast. The weather is ideal. The mosquitoes being almost over making these occassions most enjoyable.

A remarkable large number of autos passed through on Sunday for the ferry at Gray Creek. The morning ferry was taxed to capacity to cope with the number. Very few cars had B.C. licenses, Alberta being the best represented province.

Every endeavour is being made to get the roads and bridges to the Bayonne mine into shape so that the haul of ore from the dump at the mine can be proceeded with. The present good weather is expected to make this possible very shortly.

The results of last Sunday's pigeon race from here to Cranbrook showed remarkable velocity results. The time taken to cover the distance was one and a half hours. Another pleasing feature was the fact that every bird reached home. Liberations by private members of both the Cranbrook and Kimberley clubs have taken place almost every day this week, from several lakeside points.

The meeting of Sirdar school district ratepayers was held Monday night in the schoolhouse to elect a trustee in place of R. Heap and pass the annual appropriations. A motion to re-elect Mr. Heap for another term was passed unanimously. The amount appropriated was the same as last year. Several improvements are to be carried out on the building and grounds. J. S. Wilson was in the chair, with Mrs. Martin as secretary of the meeting.

The Country Weekly Newspaper

"What do you think of the future of country newspapers?"

This question was asked Mr. Wright A. Patterson by a teacher of journalism in one of the western United States state universities in the course of a conversation in which the successful efforts of big city dailies and periodicals to increase circulation in rural sections was noted, and the editorial content of these publications discussed. In answer, Mr. Patterson painted a picture of the future as he sees it.

Admitting that there is a place for the small weekly newspaper—and there is, and probably nowhere more decidedly so than on the prairies of Western Canada—the important question is: How is that position to be maintained, improved, developed; and are our Western Canadian editors alive to the situation and endeavoring to meet it? If they are, they will undoubtedly receive the public support they will so well deserve.

Both weekly newspaper publishers and the reading public will be interested in Mr. Patterson's word-picture as it is presented in a recent issue of The Publishers' Auxiliary. While a bit too lengthy for complete reproduction in this column, excepts may be given:—

"There has been, within the last quarter of a century, a radical change in the people of the rural communities—the people of the towns and on the farms. Up to a quarter of a century ago, these communities were self-centred. The people seldom got beyond their local market place. It was a day's task for the farmer and his family to get as far away from home as the nearest town, possibly not more than three or four miles away. The only form of conveyance was the farm wagon, or the horse and buggy. The roads were narrow stretches of dirt that were, during portions of the year practically impassable. From one year to another the vast majority of the rural people—the people of the towns and farms—did not get beyond their municipal lines. It was the exceptional rural family whose children went away to school. The students at universities were largely from the cities and the number attending universities was small as compared to the present time.

"Under such conditions the horizon of the rural family was extremely limited. Its members had practically no contact with the outside world and quite naturally the interests of these rural people centred about themselves and their neighbors.

"The country newspaper that catered to that local interest, that recorded the events in which the people of each community played a part, was satisfactory to the people of these communities. To this local news coverage, many editors added some general news and entertainment material and made for that time a satisfying newspaper that met very rural reader-demand.

"Today conditions are radically different. The automobile and good roads have made travel possible. The day's trip now is to the city anywhere from 50 to 300 miles distant from the rural home. The World War took tens of thousands of the boys of the farm into distant training camps and associated them with boys from every section of the nation, and with every class. It sent them across the ocean into far distant lands. It widened their horizon to include practically the entire world and all classes of people and all forms of activities. It gave them a new outlook and new interests. That was 18 and 20 years ago. The farm and town boys of the World War days are now the men, the heads of families, of the rural communities of these days.

"The radio has brought the world to the rural community fireside. It has widened the view of the people of these communities until it includes all Canada, the United States, England, France, Japan, Australia and every known point in the world.

"Go to the universites to-day and a large percentage of the students are from the towns and the farms. These young people are acquiring for themselves and taking back to the rural homes from which they come, an increased interest in national and world affairs, in history in the making, in the arts and sciences and in literature.

"As a class the rural audience of to-day is a more intelligent audience than that of the city. The people of the towns and farms have to-day a wider interest than the average individual of the city. They are in no sense provincial.

"It is such an audience the country newspaper of to-day and to-morrow must appeal to if it is to live. It must bring to them intelligent interpretations of what is happening throughout the world because it is to-day their world, and they know that its happenings may directly concern themselves. The cotton farmers of the Southern States know that happenings in far-away Japan may make or break the price they get for their cotton. They know that should war come between Italy and Ethiopia, it might affect the regulation of the waters of the Blue Nile and so affect the cotton crop of the Egyptian Soudan and create a larger demand and higher price for American cotton—their cotton. The wheat farmers of Western Canada know that drouth in Russia, in Argentine, in Australia, in France or many other sections of the world would certainly raise the price they would get for their product.

"The people of the towns and farms insist upon keeping in touch with those national and world affairs that have a direct bearing on their lives. They expect the newspaper they buy to bring to them interpretations of such happenings. They do not want rumors and surmises, but they do want statements of fact and what such facts mean. They will buy the newspaper that gives them such information."

Weekly newspaper editors are awakening to these new conditions. They are realizing that it is quality not quantity of reading matter that is demanded, and that the demand can be met in the limited space of eight to 10 or 12-page papers, giving them room to cover the community happenings and with that interpretations of events in the nation and the world, and a reasonable amount of entertainment.

For the paper that does these things there is a future. Such a paper will cover all of the to-day's national and world interests of its readers and will make itself so meet the newspaper needs as to leave no necessary place for a paper from the outside. For such a paper there is a future, greater than that of the past, and the majority of the editors of country newspapers are awake to these things. The small minority that are not, or do not awaken will, in time, pass out of the picture.

New Form Of Flight

Man In Florida Has Used Wings With Success

The idea of strapping "wings" on a man was elaborated in some detail by Leonardo da Vinci. At the Science Museum in South Kensington there is the original "Ornicopter" designed by Frost in 1902. It is a beautiful work but never flew. It seems now that a new form of flight has been made practicable by Clem Sohn, known as the "human bat" who only recently flew over Daytona Beach, Florida, with "wings" of his design attached to his arms and "webbed feet". The earliest dreamers who sighed for the wings of a dove could have done the same if only they had had some means of alighting safely. The parachute has made bird-like flight possible. Once the airman has thrown himself from an airplane at a suitable height he has only to fall 1,000 feet to gather a speed of 100 to 150 m.p.m. At this speed he can glide bank, turn, or execute any manoeuvre.

Empire Trade Agreements

New Deal With Canada Desired By Australian Premier

A new trade agreement with Canada embodying additional features is desired by Australia, Prime Minister Joseph A. Lyons of that Dominion said in his conference with Prime Minister R. B. Bennett.

The empire trade agreements negotiated in 1932 had proved satisfactory and had brought about an increase in trade. Australia was anxious to achieve further increases and believed a revision of the present treaty in the light of experience would accomplish this. While it was true Canadian exports to Australia had increased more rapidly than Australian exports to Canada, Australia had no grievance and did not consider it had got the worst of the bargain.

Vimy Pilgrimage

Dominion Organizer Leaves For Europe To Complete Plans

Ben. W. Allen, Dominion Organizer of the Vimy Pilgrimage which is being planned by the Canadian Legion of the British Empire Service League, sailed on the Cunard-White Star Liner Alaunia to complete arrangements for the reception and billeting of Canada's Peace Army which, at this time next year will be crossing the Atlantic en route to the Battlefields of France and Belgium.

"While the climax of the Pilgrimage will undoubtedly be the Unveiling of the great Memorial on Vimy Ridge," Mr. Allen stated, "the itinerary will include visits to the Battlefields and cemeteries in the Amiens, Arras and Ypres sectors, where the Canadian Corps fought its greatest battles and Canada's citizen soldiers made their greatest contribution towards victory and peace."

On the continent, Mr. Allen will confer with the French and Belgian authorities and ex-servicemen's organizations regarding the official part of the program and will complete the arrangements for the route to be followed and the transport and billeting facilities. "We have already had indications," Mr. Allen said, "that our old allies propose to make our visit next year the occasion for joyful demonstrations of comradeship and international friendship. It will be a tremendous experience for the 'troops' and their families."

In London, Mr. Allen, will confer with officials of the British Empire Service League, the Dominion Office and the Canadian High Commissioner regarding the ceremonies which will be held during the four-day visit of the Pilgrims to the Empire capital. Other bodies interested in the arrangements for the Pilgrimage and on whom Mr. Allen will call while in England, are the Canadian Battefields Memorials Commission, the Imperial War Graves Commission, and the Canadian Pacific and Cunard-White Star Steamship Lines.

Throughout his trip, Mr. Allen will be accompanied by Mr. J. R. Bowler, M.B.E., General Secretary of the Canadian Legion, Dominion Command.

Donaldson Atlantic Line

Change Of Name Is Announced By Agents

Donaldson Atlantic Line is the new name for the former Anchor-Donaldson Line, it was announced by Cunard White Star Limited, who are their agents in Canada and the United States.

"The change of name signalises the return of the Canadian-Scottish passenger service to complete control by the Donaldson interests which originally promoted it," stated George D. Huband, deputy chief Canadian representative of Cunard White Star, in an interview at Montreal.

"The Donaldson Line itself commenced its Canadian operations in 1870 and has since then maintained continuously its Canadian operations in service between Canada and its home port of Glasgow. Its growth has also been marked by the acquisition of the old Allan Line service to South America, the development of the Montreal-Bristol Channel trade and the service from Vancouver to Great Britain."

New Gyroplane Tried Out

Will Rise Vertically And Attain Ordinary Horizontal Speeds

A newly perfected gyroplane, an aerial craft capable of rising vertically like a helicopter and attaining horizontal speeds comparable to those of ordinary aeroplanes, went through an initial trying out at Villacoublay, France.

Its propellers are placed in horizontal positions, powered by several motors.

FASHION FANCIES

964

DRAMATIC DOTS FOR PLAY SUIT FOR COUNTRY OR THE BEACH QUICKLY MADE!

By Ellen Worth

The practical playsuit patterned for to-day is the ideal thing for active sports and for camp wear.

It favors the tailored shirtwaist lines, with that little girl air about it, that you'll love.

The suit, buttoning from neck to hem, makes it especially easy to slip into. Generous plaited insets at the sides, lend plenty of freedom to the detachable skirt.

While gaily dotted pique—strawberry pink on lighter pink ground—made the model pictured, there are numberless other smart and inexpensive schemes for this easily made playsuit.

Style No. 964 is designed for sizes 12, 14, 16 and 18 years. Size 16 requires 4⅝ yards of 39-inch material for the entire outfit.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day. the price is 15 cents.

Use Your Head!

Times are better . . . why not get back to Ogden's? You no longer need deny yourself the best cigarette tobacco when it costs so little!

Get yourself a package of Ogden's Fine Cut . . . smoke it with "Vogue" or "Chantecler" papers . . . and you'll say: "Happy days are here again."

Fifty-two Poker Hands, any numbers, now accepted as a complete set.

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

Air Routes Are Valuable

Make Communication With All Parts Of Empire Possible

Air and Empire are closely linked. The most valuable bonds in any empire are its communications. The Romans knew that. Their roads were veins for their empire's life-blood. But the speed of modern transport has made communications ten times more valuable. If Britons and Americans could have used airplanes to exchange their views in 1775 America might never have left the Empire. The more air routes we open to keep the Empire together the fewer problems will arise to keep it apart.—London Sunday Express.

Delegates Entertained

At the annual convention of the Saskatchewan Rural Municipal Secretary-treasurers, the delegates and wives were entertained at a theatre party given by the Central Press Limited, Regina, and greatly enjoyed the picture "In Caliente" shown at the Capitol theatre. 2108

TIRED and IRRITABLE

Do you feel weak and nervous? Is your housework a burden? Take Lydia E. Pinkham's Vegetable Compound. Mrs. M. A. Kelly of Woodstock, New Brunswick, says, "I was weak and rundown. A neighbor brought me your Vegetable Compound. It helped me so much that I am taking it now at the Change."

Get a bottle NOW. It may be just the medicine YOU need.

Try Lydia E. Pinkham's VEGETABLE COMPOUND

MARKETING PLAN FOR WHEAT CROP WINS APPROVAL

Saskatoon.—Complaint of misrepresentation in the press of the wheat marketing legislation was made by L. C. Brouillette, president of the Saskatchewan Wheat Pool, speaking at the evening session of the convention of the United Farmers of Canada at Saskatoon. He praised the plan as likely to give a substantial reduction in interest rates on the money required and providing leadership in marketing whch he held might lead to co-operation with other exporting countries.

As far as the compulsory features of the measure were concerned, they appeared just as clearly in this act as in the original bill.

There was no guarantee in the original draft of what the board would do. Under the present act if the board wished to apply these features the minister of trade and commerce could give effect to them.

Papers had referred to a strong pool delegation at Ottawa. There was one person. It would have been more correct to speak of the strong grain trade delegation there.

There seemed a misapprehension in the House of Commons as to the services that Mr. McFarland was to render, an opinion that his job was to market wheat. His work was to stabilize the market to enable the farmer to get a price.

Explaining the act he pointed out that of the advisory board of not more than seven members, four must represent the producers.

In regard to financing the provisions were broad enough to allow access to the Central bank through the government. This should result in low interest rates. He anticipated a substantial reduction. Wheat was the best of security in view of the present world situation.

With an idea of causing a low minimum price to be set, statements had appeared that the western farmer could produce wheat at 40 cents per bushel, about half the real figure.

Mr. Brouillette held that the minimum price should not be a price certain to be realized for the grain but one approaching the cost of production.

The principle of protection of industries was established in Canada. Enormous payments had been made by the west to the east on this account. This act was an attempt to let the farmer share in that protection.

A tax on flour had been considred but it would have fallen on poor people. This system was better as the prosperous would contribute a larger share.

If the minimum price was what it should be, the speaker could not see where a bushel of wheat would be offered on the open market.

A grain trade representative had wanted the wheat board to buy on the futures market. He had told the committee he was opposed. It was not the intention of the act to stabilize the futures market. That attempt had been the cause of grief to Mr. McFarland. The amendment did not go through the committee.

He condemned the talk of "sales policy" which he said had caused a fall at Liverpool costly to Canada.

He saw the new system as giving leadership in marketing. Brokers had no more interest in Canadian than other wheat. This legislation was a step in the right direction.

Two Passengers Killed

Six Others Escape When 'Plane Wrecked In England

London.—Two persons were killed in the blazing wreckage of an aeroplane which crashed at the edge of Heston aerodrome after a takeoff for Spithead for the silver jubilee review of the British fleet.

The dead were two passengers, Major J. H. Hobbs and N. Newhouse. The pilot and the five other passengers, including one woman, Margaret Vickers, were rushed to hospital suffering from burns and injuries.

Severe Hail Losses

Damages Reported To Be Heavy In Some Alberta Areas

Calgary.—Heavy hail damage to crops, in some cases reported to be 100 per cent., was caused by storms which struck several districts of southern Alberta last week. Areas hit were Stavely, Carseland, Strathmore, De Winton, Granum and Macleod.

Serious losses were suffered at De Winton as hail swept a large area aorund that town and continued east toward Carseland and Strathmore. Strathmore's losses were reported to be light while at Carseland damage was fairly heavy. De Winton's losses will run between 75 and 100 per cent. over most of the district. Hailstones as large as marbles fell.

Heavy losses were feared at Stavely and Granum. Heavy rain fell over most of the southern section of the province and at Brooks it was reported to approach cloudburst proportions.

From Airdrie came a report that a severe electric storm struck the district and farmers six to eight miles south were hailed out in the heaviest hail storm in several years.

Recovery In Australia

Premier Lyons Tells Of Methods Taken To Cut Expenses

Vancouver. — Everybody had to take a "cut" to help Australia get on her feet economically, Prime Minister Joseph Lyons of that dominion said during a brief stay here.

"The bondholders had to take less, the public servants had to accept reductions, the taxpayer had to pay a bit more," he said. "Since the turning point in 1932 we have been able to lighten those burdens. The public servants on the lower levels have had their pay restored; the taxpayer has had his burden lightened. We have cut the land tax in half to help the farmers. Recovery in Australia is not complete, but it continues."

Air Mail Cachets

Inaugural Flights On Kenora-McKenzie Route Announced

Moose Jaw.—Inclusion of the town of Cole as a point of call on the air mail route from Kenora-McKenzie Island-Red Lake on August 15 brings special commemorative cachets on mails to be carried on the inaugural flights, according to informa- received at the Moose Jaw post office.

These commemorative cachets will be "Kenora-Cole," "Cole-McKenzie Island," and vice-versa in each case.

Covers should be sent to the district director of postal services, Winnipeg, not later than August 10.

Experimental Station Post

L. B. Thompson To Take Over Duties At Swift Current

Ottawa.—L. B. Thomson, officer in charge of the Dominion range experimental station at Manyberries, Alta., has been appointed superintendent of the experimental station at Swift Current, Sask., it was announced from the agriculture department. Mr. Thomson succeeds Hon. J. G. Taggart, now minister of agriculture for Saskatchewan.

Mr. Thomson was born in New Zealand 35 years ago. He is a graduate of University of Alberta.

Grain Elevator Burned

Lethbridge. — Breaking a drouth spell of more than six weeks during which Lethbridge had the lowest June rainfall on record, heavy showers, amounting to cloudbursts in places, fell over the Lethbridge area. At Barons, No. 1 Pool elevator was struck by lightning and burned, with a loss of slightly over 13,000 bushels of wheat.

Ontario Needs Farm Help

Ottawa.—Acute shortage of experienced farm labor on nine agricultural fronts in Ontario, with an anticipated scarcity of a tenth district, was reported to the department of labor following a Dominion-wide survey. Ontario alone stood in this category. All other provinces telegraphed local supply would meet labor demands. 2108

TO RETIRE

Hon. R. C. Matthews, Minister of National Revenue in the Dominion Government, will not seek re-election to parliament during the coming General Elections. Ill-health is the cause of his retirement from politics.

Wheat Board

Expected To Commence To Function On Sept. 1st

Ottawa. — The Canadian wheat board probably will take over operations Sept. 1, it was learned here. Until it begins to function no announcement is expected as to the disposal of the wheat carryover, except the repeated assurance of Premier R. B. Bennett it would not be dumped on the market.

The visible supply of Canadian wheat is now somewhat under 200,000,000 bushels and will be less at the end of the crop year, July 31. It is not expected much new wheat will come on to the market before Sept. 1 because the late spring held back seeding, so the visible supply should continue to fall until that date.

Personnel of the new board will be announced shortly and one of its first duties will be to decide the minimum price to farmers. The suggestion has been advanced to the government farmers should receive 50 cents a bushel for number one northern on the farm as a first payment. This would be around 70 cents at the head of the lakes, it is contended.

The act creating the board provides the board buy wheat from the farmer at a fixed minimum price and make later payments if it is able to dispose of the wheat at prices higher than the minimum.

Prize For Westerner

Montreal.—Sydney Buckwold of Saskatoon, student in the third year of the faculty of commerce at McGill University here, has been awarded the Joseph H. Jacobs prize for accountancy. The prize is valued at $25.

Alberta Elections

Date For Polling In Provincial Contest Set For Aug. 22

Edmonton, Alta.—All parties are preparing for what promises to be one of the most keenly fought campaigns in years following official announcement Alberta provincial elections will be held Thursday, Aug. 22, with nomination day, Aug. 12.

Announcement of polling date was made by Hon. George Hoadley, acting premier, in the absence of Premier R. G. Reid, leader of the United Farmers of Alberta forces, which party has held power for 14 years.

Floods in northern Alberta which handicapped compilation of voters' list caused the government to postpone selecting a date until now, Mr. Hoadley said. However, the flood situation had not improved materially and it was decided further delay would be inadvisable, particularly in view of the prospect of an early Dominion election.

All political parties, including the newly-formed Aberhart Social Credit Party, have been holding nominating conventions during the past few weeks, and it is expected more than 200 candidates will be in the running for the 63 seats in the legislature.

Strikers At Vancouver

Men Decline To Work At Relief Camp

Vancouver. — Approximately 150 relief camp men who went on strike at four camps near Hope, 80 miles from here, arrived in Vancouver by freight train.

When the men declined to work, camp authorities issued an ultimatum that they must work or leave camp. Some 50 British Columbia police were sent to the camps to enforce the ruling.

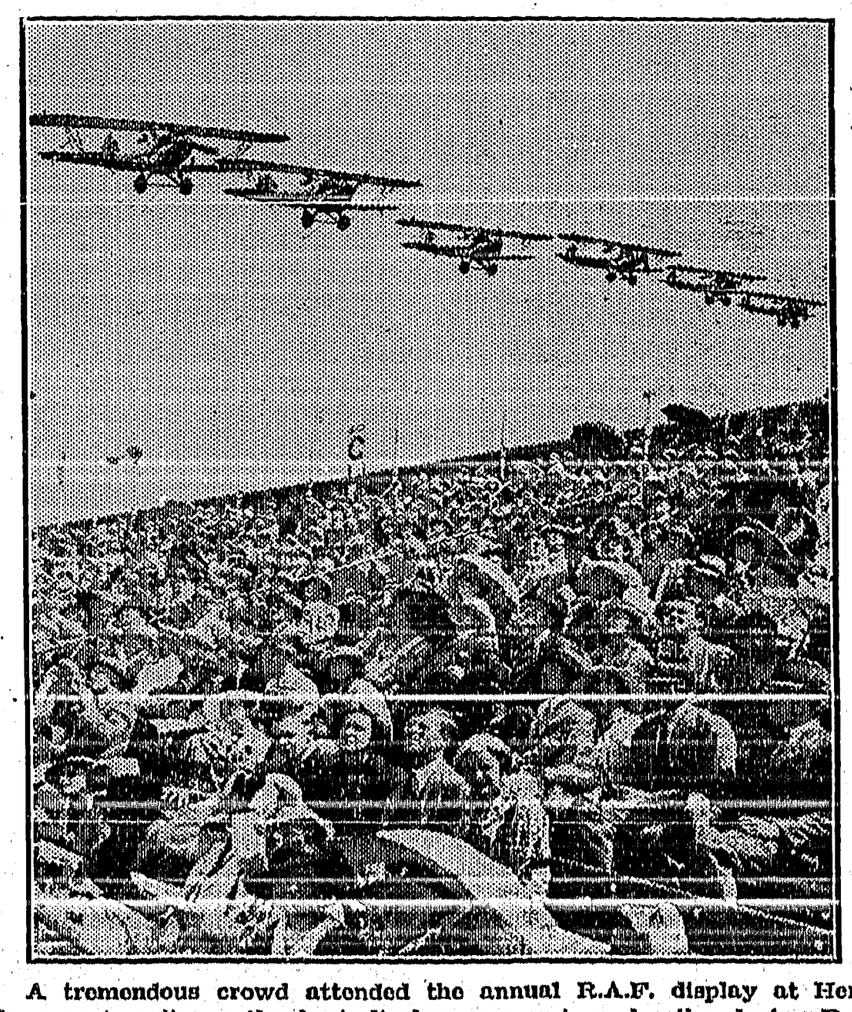
There was no trouble. The men continued to decline to work and were taken in trucks to Hope where they caught a freight. Each man was given 60 cents on leaving camp.

A delegation from the strikers waited on provincial relief officials and asked for relief. They were refused. Most of the strikers, it is reported, are members of the groups which arrived in Vancouver recently from Regina.

New Governor-General

London.—Canada's next governor-general, Lord Tweedsmuir, was guest of honor at a luncheon tendered by the Canadian Chamber of Commerce. "I am warned off every variety of politics and will be for the next five years," he said smilingly. He sat as a Conservative in the House of Commons here for some years, as John Buchan, before elevation to the peerage.

ROYAL AIR FORCE THRILLS THOUSANDS



A tremendous crowd attended the annual R.A.F. display at Hendon this year to witness the best display ever put on by the daring British fliers. Here we see part of the No. 26 Squadron of Audax 'planes roaring over the heads of a small section of the crowd.

SEEK SOME WAY TO AVERT AN ETHIOPIAN WAR

London.—Anthony Eden, again in the role of peace-maker, will head Great Britain's delegation to the League of Nations council session opening this week called to seek some way to avert an Italo-Ethiopian war.

Other developments in the East African situation, which British officials continued watching close were:

Malcolm MacDonald, secretary for colonies, told the commons Britain's military forces in Kenya, bordering Ethiopia and Italian Somaliland, had been "partially redistributed" in view of "possible contingencies on that frontier."

Sir Samuel Hoare, foreign secretary, replying to questioners, expressed his belief it was not necessary to reinforce the normal peacetime garrison in the Sudan.

Usually well informed quarters said Britain was ready to authorize arms shipments to Ethiopia, following receipt of communications from Emperor Haile Selassie certifying his empire's need of two shipments held up here "for the legitimate use of the Ethiopian army."

Medals For Veterans

Alberta Men Honored For Service In Riel Revolt

Edmonton.—While an enthusiastic audience of 4,200 paid homage with applause, 27 of the early west's famous fighting men who participated in the campaign against the rebel Louis Riel in 1885 got recognition for their part in that historic struggle when they received "peace medals" given to them at the Edmonton exhibition by the Northern Alberta Pioneers' and Old-Timers' Association.

The veterans marched single file on to the stand, shoulders squared and heads erect, giving little evidence that half a century had passed since they had stood in that fashion in soldier ranks. Hon. W. L. Walsh, lieutenant-governor of Alberta, and Major General Hon. W. A. Griesbach lauded their conduct in the frontier warfare.

Inspect Armament Plants

Sir William Jowitt Wants To Get At The Bottom Of Trade In Arms

London.—Summoning of many distinguished British financiers and industrialists as witnesses, an inspection of Britain's armament plants, and finally nationalization of these plants were urged upon the royal commission on private manufacture and trade in arms by the Union of Democratic Control.

The president of the union, Sir William Jowitt, on the witness stand urged the commission to "take steps comparable with those taken in America in getting at the bottom of things."

Aerial Cruiser

Largest Land Plane Ever Assembled Awaits Tests In U.S.

Seattle. — A giant aerial battle cruiser, described by its builders as the largest land plane ever assembled in the United States, awaited tests here before being submitted to the army corps.

The 15-ton ship, with its huge mid-wing spread of 105 feet and an overall length of 70 feet, is powered with four 725-horsepower motors, equipped with automatic variable pitch constant speed propellers. It is reported capable of flying from 200 to 250 miles an hour.

Victims Of Chinese Flood

Hankow, China.—Unofficial reports from Tienmen, Hopeh province, said 14,000 bodies had been recovered from the flooded Han river. These advices said 4,000 refugees had been rescued from tree-tops in that vicinity. Tienmen is 75 miles west of Hankow.
