ndian Mine Will Be Next Big Producer

ory of Accomplishment May Be Read in Record of Past Year's Development

AN MILL AND TRAM

e Now Proven Warrants Swift Development and Preparations for Profit Taking

There now appears to be no ubt that the Indian mine will, thin the next six to twelve onths, be placed on the lists as shipper. C D.B. Turner, conlting engineer for the comny, made a recent examination the property, and in the light information gained as the reit of development to date, has d out an extensive exploration ogram for the next two months least.

The last new ore body encounred in No. 1 tunnel is the best far opened, and is developing vorably. So satisfactory is it roving that diamond drilling s been contracted for to prove ore expeditiously the ore bodies advance of No. 1 tunnel and so to determine the ore bodies rectly under the new strike, ear the face of No. 1 tunnel orkings at greater depth and advance of the face of No. 3 nnel. Actual drilling on the rface will commence before the t of October and should be mpleted within six weeks, by hich time the new ore body in o. 1 tunnel will be sufficiently xplored to approximately demnstrate its extent and value, nd should the drill hole prove ccessful in cutting the ore exected, the management will be abled to know the capacity of e plant required for the mine nd mill.

When this development is comleted a concentrating mill can constructed on the unit basis, 150 tons daily capacity, and dded to in units as occasion arrants.

The first drill hole, 380 feet in ngth, will be put down near he Morn claim on Portland No. and should cut the veins interecting under conditions similar o the ore body near the face of No. 1 tunnel and approximately n the same horizon. The veins how high-grade ore on the surace, and some are 15 feet wide; herefore very satisfactory reults may be expected from this ole, which is 400 feet in advance of the tunnel.

The second hole, 540 feet in length, will encounter the veins directly under the ore body in No. 1 tunnel at 200 feet greater depth and approximately on a level with No. 3 tunnel, and once the ore is definitely established the No. 3 tunnel can be directly extended to it.

Briefly, it may be stated that the Indian mine main veins are very persistent, and extend in a general northerly and southerly direction along an intensely fractured zone. This zone cuts across the general N 20 deg W strike of the country at a narrow angle. Along the general northwesterly strike of the country bedded deposits are occasionally found and are called, for the purpose of distinction, the northwest series. Cross-fiissures, on a strike of N 30 deg. E intersect and cut through the north-south and northwest series, but are frequently obliterated at the crossings through subsequent movement along the north-south vein system. The ore bodies are replacement deposits in lenticular form and are found in all the veins mentioned, but generally at the intersections of the various fractures. In No. 1 tunnel an almost continuous ore body extended along a distance of 400 feet from the portal of the tunnel but this, properly speaking, is a series of closely connected lenzes. Near the face of No. 1 tunnel three veins of different strikes come together and it is here that the best conditions prevail. An average sampling across 26 feet gave a return of $25 per ton. A like condition is seen on the surface 400 feet in advance of No. 1 tunnel.

Altogether, 3200 feet of development work has been accomplished to date, comprising tunnels, drifts, cross-cuts and raises. The mine is equipped with one 12x10 Ingersoll-Rand compressor, driven by a 60 h. p. Fairbanks-Morse semi-diesel oil engine; one Rix 9x6 high speed air compressor, connected to an 18 h.p. gasoline engine; one large steel oil tank of 15,000 gallons capacity. The main haulage tunnels and drifts are equipped with all necessary air lines, ventilating pipe where required,

STEWART-HYDER LOCAL NEWS

Joe Jackson has returned from Rupert, where he took out his papers as a Canadian citizen.

Pat Daly was among the arrivals Saturday from Rupert, having been on a business trip to Juneau.

A.C.Knight of Vancouver, representing the Kelly Donglas Co., arrived on the Cardena and left on the Prince Albert.

Pat Benson, one of the camp's well known mining men, left for the south on business Saturday. He expects to return in about three weeks.

Andrew G. Larson, consulting engineer for a number of operators of the camp, arrived from the south Saturday to remain for a week or more.

Angus McLeod is clearing two lots on 9th street which he recently purchased from the government, on which he intends to build a home this fall.

O. M. Watson, of the Watson Construction Co., who have the Stewart-Hyder road contract, left for the south on business Saturday. He expects to visit Vancouver, Victoria and Seattle.

Roy Newton, who for several months has cooked at the Good Eats and Poodle Dog, left Saturday for Edmonton, where he has been offered an attractive position. He expects to return in the spring.

William Newell, being still in ill health, has secured the service of Mr Wall, who is now installed in charge of the barber shop. Mr Wall is an oldtimer of the Yukon, though coming here from Vancouver.

W. R. Tonkin was among the arrivals from the south Saturday. As well as being vice president of the American Mining & Milling Co., he is interested in a number of mining claims in the Bear and Salmon river valleys.

Bert Smith, superintendent of the Premier mine, left for his annual holiday Saturday. On his departure he was warbling that well known Holy Roller hymn: "I don't Know Where I'm Going, but I'm On My Way.

The Portland Canal News circulates from Keno Hill, Yukon Territory, to Texas—from Unalaska, Alaska, to Switzerland. Prove it for yourself by examining our subscription books.

Hugh B.McGuire, after spending the summer in charge of development work on the Premier Extension, left for the south and east Saturday. Having left the work for the winter in charge of contractors, he does not expect to return until spring.

The News $5 a year anywhere.

Wm. Whittaker, brother of L.S.Whittaker, left for the east last Saturday after spending the summer here.

Deputy Marshal McDonald of Hyder, accompanied by Marshal Beaumont of Juneau, paid Stewart a visit this week.

R.W.Martin has just bonded a group of claims adjoining the now famous Dunwell mine on Bear river. Details will appear next week.

Mrs Newell has returned from Boise, Idaho, where she attended the funeral of her son. Her many friends here sympathise with her in her bereavement.

R. R. Wilson, engineer in charge of developments on the Big Missouri, left for the south Saturday on business connected with the company's operations.

J. A. Williams P. C., returned Saturday from Westminster, and the same day took James Bowe out to Rupert, where he will be tried for an alleged assault on Joe Seguin.

Maurice D. Leehey, a well known mining attorney of Seattle and secretary of the Daly Alaska Mining Co., arrived from the south Saturday on business in connection with that property.

Frank Breeze, who has the L & L property on Glacier creek under bond, on which very good results are being obtained, left for the south Saturday on a business trip of two or three weeks' duration.

Mr and Mrs Geo. Mathieson, oldtime residents of Stewart, who came over from Alice Arm to attend the McNeil-Durant wedding, have returned to their home. They expect to return shortly and reside here.

Nels Olson, a mining man of many years' successful mining in Alaska, who has been in this district all summer acquiring mining interests up Bear river, left for Seattle last Saturday for the winter. He expects to be back in the spring with a development program lined up.

Noted Mining Man Here

Dan J. Williams, one of the best known mining men of the north, has spent several days in camp looking over a number of properties and greeting oldtime friends. Mr Williams is now manager of the Hirst Chichagof mine in Alaska, which is reported to be developing into a big producer. He took several millions of dollars from the Rocher de Boule mine in Hazelton for the owners, and has recently been connected with the Drum Lummon mine near Kitamatt.

BASKET SOCIAL DANCE FOR LOCAL HOSPITAL

Under the auspices of the Stewart General Hospital Board a dance and basket social will be held October 5 in the Hotel Stewart from 9:30 p.m. to 2 a.m.

The Hospital Board is very urgently in need of funds to maintain the Hospital during the coming winter.

Music, hall, coffee etc have been donated, and ladies are requested to each bring a basket supper for two. The baskets will be auctioned and sold to the highest bidder.

Admission, gentlemen, $1.50.

New Stamps Required

On and after the first of October postage stamps in payment of Excise Tax on checks, notes, receipts and such other documents laid down by law, will not be acceptable according to the latest regulation. A special Excise Stamp for these purposes is being issued and will be sold by the Chartered Banks of Canada, and by the Customs Offices.

Court for Naturalization

The following notice was posted this week:

"His Honour, Judge F' McB. Young, will hold court for the purpose of naturalization in the Government office at Stewart upon the 29th day of September, 1923.

Those intending to make application for naturalization please communicate at once with the Registrar, County Court, Prince Rupert, B. C.

J. P. Scarlett,
Mining Recorder.

Geologists Leave

Dr. George Hanson, accompanied by H.C.Gunning and R.H.B Jones, of the Dominion Geological Survey Department, left on the G.T.P. boat for Rupert last Saturday, having completed their work for this year in the Salmon river section of this district. They spent two weeks checking up the work done by the operators during the past year, with a view to bringing the geological reports up to date. In speaking to the News of conditions as found on their trip, Dr. Hanson expressed himself as being well pleased, and was of the opinion that everything now points to other mines being developed in the near future.

J.Campbell is building a barn back of the Hotel Stewart for his dairy herd.

DOMINO GROUP RICH IN SILVER

Another August Mountain Property Produces High-Grade Ore---Many Veins Discovered

Seven veins have been located on the Domino group of two claims, according to Roy Priest and Pat Benson, who came from the property recently with about 100 pounds of samples from four of the veins. Al Sweeney and Emil Olson, who were doing assessment work there, came down later and reported that they had opened up one vein with eight feet of solid ore, and had done some work on three others, the four veins being contained within a distance of 80 feet.

The samples brought down show a variety of ores, all however, running heavy to silver and lead. Grey copper, steel galena, coarse-grained galena samples were shown, some being solid mineral and others carrying a gangue of live quartz. They were more or less stained with azurite, malachite and silver chlorides. Pat Benson, who left immediately for the south, has wired in that the samples from the largest vein assayed $452.50.

The Domino is located on August mountain, near the head of Salmon glacier, which has come into prominence this year on account of the extremely rich ore found on a number of properties there. The claims are owned by Roy M. Priest, and were located by Bill Murphy.

Prominent Londoner Here

The second member of the London Stock Exchange to visit the camp this summer was Mr. F. D'A. Vincent, of the firm of Vincent & Co., London, who is heavily interested in the B. C. Silver. Accompanied by his daughter, Mr Vincent arrived Saturday and went straight up to the mine for the purpose of making a personal examination. Mr Vincent is a man of long experience in mining ventures all over the world, on the London Stock Exchange, and is probably one of the best posted men in England on this camp, having very closely watched all operations now under way. A brother of Lord Dabernon, British Ambassador to Germany, Mr Vincent is in a position to keep a very close watch on the financial as well as political developments in Europe, vital factors in the development of a new mining camp.

G. D. B. TURNER AND INDIAN MINE

IN THE news columns of this issue appears the story of the developments at the Indian mine to date---a story of accomplishment of which the management may well be proud.

COMING into the district approximately two years ago, Mr. G. D. B. Turner spent some time first of all studying its geology, which resulted in his taking over the Indian property, situated a short distance westerly from the Premier mine, on the British Columbia side of the Salmon River Basin.

APPLYING the lessons taught by the Premier and other openings throughout the section, coupled with a cautious and economical management, and with the able assistance of Mr. R.L.Clothier as manager and engineer of the mine, the eastern syndicate backing Mr. Turner have been given a good run for their money, and the old Indian Mine Company shareholders have at the same time been amply protected.

IN SHORT, the placing of the Indian in the class of a mine, as has been done, is an example of what scientific study, coupled with perseverance and courage on the part of the management and backers, will do in the mining game in this district; for bringing the Indian to its present prominence as a soon-producer has been a herculean task. Not only have the many local natural difficulties had to be overcome, but so also have the mischievous criticisms and mockings, apparently carefully placed by evidently maliciously inclined minds for purposes peculiarly remote.

IT IS SUCH men as Mr. Turner and the people associated with him who develop new mining fields, and who therefore, as in the case of the Indian, deserve the congratulations of the entire district, as their success means much to the community as well as the industry.

GROWTH OF STEWART

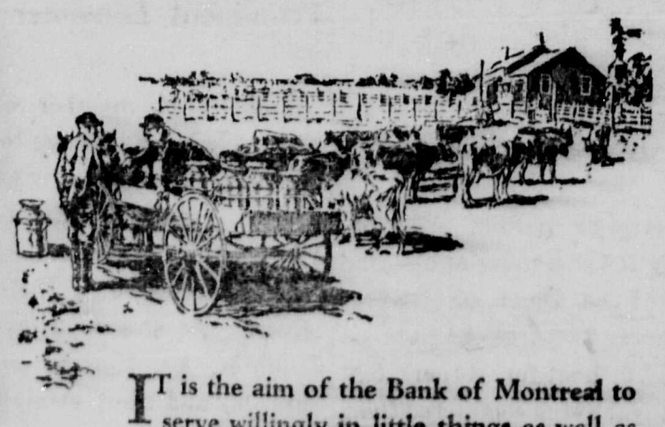
NOW that winter is again approaching, it is interesting to look about and note the progress made in the actual town itself since the first of the year, signifying a growth that is really remarkable, and establishing definitely the nucleus of what in a few short years will be a thriving and populous mining centre and, it is reasonable to predict, the terminus of a transcontinental railway.

IN GLANCING over the field it is found that, with an increase of approximately fifty per cent in the population, the following businesses have come into evidence: A bakery, meat market, three restaurants, a new general store, building supply and furniture store, another rooming house, dairy, power plant supplying light and water but temporarily out of commission owing to a breakdown, another barber shop, a doctor, two customs brokers, picture show, high school, stipendiary magistrate and constable. Eight residences have been built or are under construction, besides double that number of cabins; fourteen new families have taken up permanent residence; two market gardens have been prepared for cultivation next summer; every house and cabin in town has been occupied all summer and will continue to be all winter; the hotels and rooming houses have been full all year.

All told, Stewart so far during 1923 has made remarkable progress and the growth during the years to come promises to be still more rapid. The faith of her oldtimers is being justified, the dreams of her future are commencing to unfold—Stewart the village, Stewart the town, and Stewart the city to be.

Jim Greer, of the New Denver Leaser, is a live newspaperman. He reads his exchanges.

SMALL ACCOUNTS WILLINGLY HANDLED



IT is the aim of the Bank of Montreal to serve willingly in little things as well as large—to be generally helpful to its customers regardless of the size and extent of their dealings with the Bank.

For years the Bank of Montreal has co-operated with its customers, assisting in various ways in matters of finance and business.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre, second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 10 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heir or devisee of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 28, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of pre-emptions, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, fulfilment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes must be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free permits for settlers, campers or travellers, up to ten head.

Shoughs Go To Mexico

H.C. Shough and Mrs Shough, pioneers in the Willow Creek gold camp and Portland Canal district, expect to depart the first of next week, enroute on an extended trip to Mexico. They will go from Seattle to the state of Sonora, their destination, by automobile. The Shoughs have disposed of all their mineral holdings in the Portland Canal camp and plan to devote their time to developing their properties in Mexico, located by them last year. Mr Shough very frankly admits that Mrs Shough is just as good a prospector as he is, and he has passed most of his life in this vocation.—Alaska Weekly.

Howe Sound at Capacity

Howe Sound Co. has at last brought its copper mining operation in British Columbia up to full capacity. According to a working report, the Britannia Mining and Smelting subsidiary handled 75,000 tons of ore in June, the complete rating of the 2500 tons a day plant which was put into operation last February. No statement of metal production has as yet been given out.

Copper production costs are understood to be very low, as labor efficiency is exceptionally high. Only 500 men underground are required to maintain the present tonnage basis, an average of about five tons per man.

Postponement Refused

Justice Murphy has refused to postpone a sale of gold and copper mines owned by the Maple Leaf Mines, Limited, near Grand Forks, and originally bonded for $200,000. The sale follows judgment for $4200 obtained against the company by its former managing director, H. W. Young. Judgment was secured last June and since then unsuccessful attempts have been made to collect, culminating in an order for sale under execution process.

Tom Blytheman has made a new strike which shows good silver values on a claim on Deep creek where it heads into Dome mountain, and will do all the work he can this season. Tom Brewer, another Telkwa man, has discovered what looks like another promising prospect in the Dome mountain district.

A new find of silver-bearing copper ore was made within the Silver Basin radius, at the head of the north fork of Kleanza creek, at a point where the Legate, Chiminess and Kleanza form their common source, by Thomas Sculley and associates, and six claims were located. Through further exploration they found some very high grade chalcocite ore. The completion of the Kleanza creek trail will facilitate the exploration of this district.

Some of the best ore that was ever brought from Nine-mile mountain near Hazelton, was discovered recently by Thos. Railson on the old Lead King property. This is a new vein which Railson reports having traced for 800 feet. The ore is from one to two feet wide, and is a clean, high-grade product.

Has produced Minerals valued as follows: Placer Gold, $76,542,203; Lode Gold, $109,647,661; Silver, $59,814;266, Lead, $51,810,891; Copper, $170,723,242; Zinc, $24,625,839; Coal and Coke, $238,-289,565; Building Stone, Brick, Cement, $36,605,942; Miscellaneous minerals, $1,358,839; making its Mineral Production to the end of 1922 show

AN AGGREGATE VALUE OF $734,259,619

The substantial progress of the Mining Industry in this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895, inclusive, $94,547,241; for five years, 1896-1900, $57,607,967; for five years, 1901-1905, $96,509,968; for five years, 1906-1910, $125,-534,474; for five years, 1911-1915, $142,072,603; for five years, 1915-1920, $189,922,725; 1921. $28,066,641: for the year 1922, $35,158,843.

PRODUCTION DURING LAST TEN YEARS, $339,280,940

Lode mining has only been in progress for about 33 years, and not 20 per cent. of the Province has been even prospected; 300,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

INDIAN MINE

(Continued from Page 1)

track, mine cars and air drills. The camp buildings include three bunk houses, cook house and dining room, with ample accommodation for 30 men; office and assay building, and stables situated at Thirteen-mile, near the present end of the wagon road.

The mine is connected with the Stewart dock by a good wagon road up the Salmon river valley, and thence by three miles of trail to the mine. The Provincial governmeni have commenced the construction of a high-level bridge across Cascade creek with a view of extending the road to the mine. Transportation from the contemplated mill to the Stewart dock presents no particular problem, since no difficulties will be encountered in the construction of an aerial tram.

Thirty men are now employed at the mine, some of whom are preparing stations for the diamond drills.

Lawrence, the watchmaker.
