ALEXANDER LAIRD, GENERAL MANAGER

CAPITAL, - $10,000,000 REST, - $7,000,000

COLLECTION BUSINESS

With its large number of branches, agents and correspondents, The Canadian Bank of Commerce is able to effect collections throughout the world promptly and at reasonable rates. Rates will be quoted on application.

FOREIGN BUSINESS

Cheques and drafts on all countries of the world, drawn in sterling, francs, marks, lire, kronen, florins, roubles or any other foreign currency, can be negotiated at The Canadian Bank of Commerce at reasonable rates.

CUMBERLAND BRANCH ..... W. T. WHITE, Manager

R. Grant & Co have just installed a new planer of the Berlin machine type. This machine is capable of handling a stick squaring 10x30 in., and can run flooring and smaller material at a speed that surprises the men who have to take the boards from it. The Berlin machines are among the best on the market.

Rev. B. C. Freeman will occupy his pulpit on Sunday next.

The death occurred at Ladysmith on Monday, May 15, of Peter Morrison, one of the best known residents of that city, and for many years a well known resident of Wellington. He had been ill for some time and the bereaved family were expecting the end The deceased, who was a native of Myra, Nova Scotia, aged 68 years, is survived by four sons, Don, Charles, Peter and Arthur, and one daughter, Miss Florence, who is at present attending Norman School, Vancouver.—Nanaimo Herald.

Mananager Curtis has too much jaw these days. He blames the mumps for it.

Victoria Day celebration promises to be a grand affair. See programme later.

Rev. W. Kidd, will preach in the Presbyterian church next Sunday morning and evening.

Mr. and Mrs. Beveridge, of Vancouver, arrived in town on Friday last, and left on Tuesday by wagon for Nanaimo.

Manager Hill of the Cumberland Hall Moving Picture Show, is out of town at present.

Mr. D. D. McRae arrived home on Saturday night from Harrison Hot Springs. "Mack" is looking the better of his boil. There is nothing like an annual bath, whether you need it or not.

Manager Lawrence of the Big Store, will leave on Wednesday morning for Vancouver on business.

A circular is being distributed throughout the town, and if the party who caused it to be printed and circulated, had any respect for himself or his family, he should be heartily ashamed of himself when he comes to his sober senses. We thought of publishing the contents of the circular, but out of respect for his family, we refrained. Some people glory in their degradation, and love to advertise it.

Locals.

No quorum, no city council on Monday night.

Mrs. J. J. Wier left by Sunday's boat for Victoria.

S. S. City of Nanaimo is on the Comox-Nanaimo route again. We thought the "Princess Mary" looked too good to last long.

Dr. and Mrs. MacNaughton left by Sunday's boat en route for the east.

Mr. A. McKinnon has sold his house on the corner of Derwent avenue and Third street, to Mr. John Bennie.

We omitted crediting Mr. Joseph Shaw, with the article on reciprocity, which appeared in our last two issues.

Mr. J. Bruce arrived home from Vancouver by Sunday's boat.

Mrs. D. Piket arrived home from Vancouver on Sunday last.

Mrs. W. W. Anderson and daughter, of Vancouver, arrived by Sundays boat on a visit to her parents, Mr and Mrs. T. Horbury.

Mr. P. P. Harrison has recently purchased a new McLaughlin-Buick five passenger touring car, and has sold his "Oakland" car to Dan Kilpatrick. Mr. E. C. Emde is agent for the McLaughlin-Buick car for Comox District.

Maxwell & Hornal, proprietors of the Star Livery Stable, have recently purchased at Vancouver, four horses, four buggies and a large furniture van. This enterprising firm has opened up a branch of their business at Courtenay.

Joe Walker has sold his house on the corner of Windemere avenue and Third street, to Dave Potter.

Methodist Conference.

Rev A E Roberts, secretary for the past six years of the B. C Methodist Conference, has been elected president, succeeding Rev Newton Powell. The first draft of the stationing committee for the Nanaimo district is as follows:

Nanaimo, Wallace street—S.J. Thompson.

Nanaimo, Haliburton street—John W Hedley.

Ladysmith—Forbes J Rutherford.

Cumberland — Barnabus C. Freeman.

Cumberland. Japanese mission—U. Oyama, native evangelist.

Richard E. S. Taylor, B.A., B.D., in China.

The Presbyterian Synod at Vancouver has adopted a resolution directing the attention of the general assembly to the notable increase in foreign immigration, and the consequent demoralising effect on the religious life of the Canadian people.

Mr. J. R. Johnston, of the Courtenay Hotel, Courtenay, has recently purchased a new five passenger touring car.

Mr. Joseph Shaw we are sorry to hear, was painfully, if not seriously injured by being thrown from a load of hay on the Company's farm, on Tuesday. Mr. Shaw was taken to the hospital.

Mr. Thomas E. Cartwright, who has been conducting a gents furnishing store here, has made an assignment of his business to W. J. Fraser of this city, for the benefit of his creditors.

Mr. and Mrs. L. A. Mounce and their son Shannon left by Sunday's boat for Vancouver. Mr. Mounce will visit Seattle before returning home.

Mr. and Mrs. C. H. Tarbell left by Sunday's boat on a two weeks vacation trip to Vancouver and Victoria.

Quite a few left by Sunday's boat for Vancouver to hear the Sheffield Choir.

Rev. Laffere and two daughters were among the passengers by Sunday's outgoing steamer

Customs Collector Geo. Roe, of Union Bay, left for Vancouver by Sunday's boat to hear the Sheffield Choir. George is a lover of good singing. We are sure he he will be perfectly satisfied.

Mr. W. W. Willard and his sister Mrs. J. H. Collins of Sanniel, with her two children arrived by Tuesday's boat.

Dr. and Mrs. Gillespie arrived home from Vancouver by Tuesday's boat.

OUR SPRING FURNISHINGS FOR MEN.

Embraces all that is newest, best and correct. We want you to call and inspect them—the very latest in Spring and Easter apparel for careful dressers.

(Continued.)

Chapter 26

THE first season of the Boom company was most successful. Its prospects for the future were bright. The drive had been delivered to its various owners at a price below what it had cost them severally and without the necessary attendant bother. Therefore the loggers were only too willing to renew their contracts for another year. This did not satisfy Newmark, however.

"What we want," he told Orde, "is a charter giving us exclusive rights on the river and authorizing us to ask toll. I'm going to try and get one out of the legislature."

He departed for Lansing as soon as the assembly opened and almost immediately became lost in one of those fierce struggles of politics not less bitter because concealed. Heinzman was already on the ground. Newmark had the shadow of right on his side, for he applied for the charter on the basis of the river improvements already put in by his firm. Heinzman wanted the improvements already existing condemned and sold as a public utility to the highest bidder. He offered further guarantees as to future improvements. In addition were other and more potent arguments proffered behind closed doors. Many cases resolved themselves into a bald question of cash. Others demanded diplomacy. Jobs, fat contracts, business favors, influence, were all flung out freely, bribes as absolute as though stamped with the dollar mark. Newspapers all over the state were pressed into service. Among these delicate and complicated cross currents Newmark moved silent, cold, secret. He seemed to understand them, to play with them, to manipulate them as elements of the game.

"What we want is a charter."

The fight endured through most of the first half of the session. At the last, however, the bill passed the board. The company had its charter.

"It's cost us plenty, anyway," Orde said when the charter bill became a law. "The proposition's got a load on it. It will take us a long time to get out of debt. The river driving won't pay quite so big as we thought it would," he concluded, with a rueful little laugh.

"Newmark & Orde means something to to these fellows now."

"It will pay plenty well enough," replied Newmark decidedly, "and it gives us a vantage point to work from. You don't suppose we are going to quit at river driving, do you? We want to look around for some timber of our own. There's where the big money is. And perhaps we can buy a schooner or two and go into the carrying trade. Newmark & Orde means something to these fellows now."

Chapter 27

IN the course of the next eight years Newmark & Orde floated high on that flood of apparent prosperity that attends a business well conceived and passably well managed. The Boom and Driving company made money, of course, for with the margin of 50 per cent or thereabouts necessitated by the temporary value of the improvements good years could hardly fail to bring good returns. This, it will be remembered, was a stock company. With the profits from that business the two men embarked on a separate copartnership.

Orde lived at ease in a new house of some size, surrounded by grounds. He kept two servants. A blooded team of horses drew the successor to the original buckboard. Newmark owned a sail yacht of five or six tons, in which, quite solitary, he took his only pleasure. Both were considered men of substance and property, as indeed they were.

Immediately after the granting of the charter to drive the river the partners had offered them an opportunity of acquiring about 30,000,000 feet of timber remaining from Morrison & Daly's original holdings. Orde finally completed the purchase on long time notes. Below the booms they erected a mill. The following winter Orde spent in the woods. By spring he had banked about 6,000,000 feet.

At the end of the fifth year the opportunity came to get possession of two lake schooners. Orde at once suggested the contract for a steam barge. Towing was then in its infancy. Orde thought that a steam barge could be built powerful enough not only to carry its own hold and deck loads, but to tow after it the two schooners. Newmark agreed with him. Thus the firm went into the carrying trade. The most important acquisition was that of the northern peninsula timber. Most operators called the white pine along and back from the river inexhaustible. But Orde saw the time not far distant when the world would be compelled to look elsewhere for its lumber, and he turned his eyes to the almost unknown north. After a long investigation he purchased 300,000,000 feet. This was to be paid for mostly by the firm's notes, secured by its other property.

To Carroll, Orde was always the same big, hearty, whole souled boy she had first learned to love. She had all his confidence.

Bobby had turned out a sturdy, honest little fellow, with more than a streak of his mother's charm and intuition.

"I want to give him—all—the chance there is," Orde explained to Carroll. "A boy ought to start where his father left off and not have to do the same thing all over again."

"Why don't you let him continue your business?"

"Why don't you let him continue your business?" smiled Carroll.

"By the time Bobby's grown up this business will all be closed out," replied Orde seriously.

Three years after the conversation last mentioned, which would have made Bobby just eight, Orde came home on a summer evening, his face alight with satisfaction.

He believed he had found the opportunity, twenty years distant, for which he had been looking so long.

Orde and his wife sat together on the top step. He slipped his arm about her. They breathed deep of the happiness that filled their lives. Two shadowy figures defined themselves approaching up the concrete walk.

"Hello!" called Orde.

"Hello!" a voice responded.

"Taylor and Clara," said Orde to Carroll, with satisfaction, "just the man I wanted to see." The lawyer and his wife mounted the steps.

Clara Taylor stopped short and considered Orde for a moment.

"Let us away," she said seriously to Carroll. "My prophetic soul tells me they are going to talk business, and if any more business is talked in my presence I shall expire. Come, Carroll; let's wander down the street and see Mina Heinzman."

The two sauntered away.

"Look here, Taylor," broke in Orde abruptly; "you told me the other day you had fifteen or twenty thousand you wanted to place somewhere."

"Yes," replied Taylor.

"Well, I believe I have just the proposition."

"What is it?"

"California pine," replied Orde.

"California pine," repeated Taylor. "California's a long way off, and there is no market, is there?"

"It's cheap," replied Orde succinctly. "I don't say it will be good for immediate returns, but in twenty or thirty years it ought to pay big on a small investment made now."

Taylor laughed.

"Laugh all you please," rejoined Orde, "but I tell you *Michigan and* Wisconsin pine is doomed. Twenty or thirty years from now there won't be any white pine for sale."

"Nonsense!" objected Taylor. "You're talking wild."

"All right," said Orde quietly. "Well, what do you think of Indiana as a good field for timber investment?"

"Indiana!" cried Taylor, amazed. "Why, there's no timber there; it's a prairie."

"There used to be. And all the southern Michigan farm belt was timbered, and around here. We have our stumps to show for it, but there are no evidences at all farther south. You take your map and see how much area has been cut already. That'll open your eyes. And, remember, all that has been done by crude methods. The demand increases as the country grows and methods improve. It would not surprise me if some day thirty or forty millions would constitute an average cut."

"Why is it that no one"—

"Because," Orde cut him short, "the big things are for the fellow who can see far enough ahead."

"What kind of a proposition have you?" asked Taylor after a pause.

"I can get 10,000 acres at an average price of $8 an acre," replied Orde, "about 400,000,000 feet in timber."

"That's about 20 cents a thousand."

Orde nodded.

"And of course you couldn't operate for twenty or thirty years, and there's your interest on your money and taxes and the risk of fire and"—

"The big things are for the fellow who can see far enough ahead."

"Of course," agreed Orde impatiently, "but you're getting your stumpage for 20 cents, and in thirty years it should be worth a dollar and a half." At the present time sugar pine such as Orde described would cost $3.50 to $4.

Taylor relapsed into thought.

"Look here, Orde," he broke out finally, "how old are you?"

"Thirty-eight. Why?"

"How much timber have you in Michigan?"

"About 10,000,000 that we've picked up on the river since the Daly purchase and 300,000,000 in the northern peninsula."

"Which will take you twenty years to cut and make you a million dollars. Then why this investment thirty years ahead?"

"It's for Bobby," explained Orde simply. "A man likes to have his son continue on in his business. I can't do it here, but there I can. It would take fifty years to cut that pine, and that will give Bobby a steady income and a steady business."

"Bobby will be well enough off anyway. He won't have to go into business."

Orde's brow puckered.

"I know a man. Bobby is going to work. A man is not a success in life unless he does something, and Bobby is going to be a success. Why, Taylor," he chuckled, "the little rascal fills the wood box, for a cent a time, and that's all the pocket money he gets. He's saving now to buy a thousand dollar boat. I've agreed to pool in half. At his present rate of income I'm safe for about sixty years yet."

(To be continued.)

And That's No Joke.

"Now, Willie, what on earth are you crying that way for?"

"Boohoo! My teeth stepped on my tongue!"

Every Precaution Taken.

During a recent smallpox epidemic in Alabama special precautions against the disease were taken in the mining camps. In one of these camps the president of the mining company paid a visit of inspection and came upon an old negro leaning against the side of a building.

"Jake," asked the president, "are you afraid of the smallpox out here?"

"Some may be, sah," Jake replied. "As fo' me, I ain't scahed. I's jest gwine toh get me some lime an' limate mah house, an' den de doctah, he's comin' up an' 'sassinate mah fambly, so dat den, sah, if we do git de smallpox 'twon't be nothin' but de celluloid."—Woman's Home Companion.

Affected by the Heat.

Patience—That is a hot headed child.

Patrice—Yes. I believe he was brought up in an incubator.—Yonkers Statesman.

Accommodating.

"But I can't stand that hall room," explained the shivering lodger.

"What's the trouble, sir?" asked the considerate landlady.

"Why, every morning I actually have to crack the ice in the water pitcher."

"Oh, don't let that worry you, Mr. Rings. After this I will send the handy man up to crack it for you."—Pittsburg Press.

WHAT'S LIKE HIM?

The West Mourns the Loss of Dr. Lundy of Portage.

Dr. Frank B. Lundy, of Portage la Prairie, died a few weeks ago. A short time before his death he drove fifty miles across prairie, got caught in a blizzard, and slept all night under his upturned cutter. Such an experience was no novelty to Dr. Lundy. He belonged to the swift-passing type of prairie doctor that went the trails before there were railroads. In all Manitoba there was no character better known. He went to Portage in 1882 when the caravans of Red River carts came honking up from Fort Garry en route to Edmonton, Battleford and Calgary. Portage, now the junction point of four railways, three of them transcontinentals, was then the point where the old trails diverged. Dr. Lundy knew every trail, every coulee and every hill in that part of Manitoba. He was a young man when he started trailing; had spent a short while in Bruce County, Ontario, after graduating from Trinity in 1880. In the twenty-seven years of his trailing he saw many changes; more transformations in the country than in the science of medicine. He was a characteristic "old-timer," who knew as much about Indians as about white men. To doctor up a sick man best of a hundred miles away was part of Dr. Lundy's practical religion. He was never known to send a patient a bill; and he was never known to need money.

But one morning this "Dr. McClure," of the prairie, was found dead in his office. With a score of doctors in the town where once his had been the only shingle, he just quit—and the long trails of Manitoba will never feel the click of his horse's hoofs again.

The citizens of Portage were deeply interested in Dr. Lundy. There is much talk of a handsome stone memorial in the form of a statue, to adorn a public square in the town. If this act of benevolence is carried out, it will be but a feeble echo of the long line of benevolences practiced unostentatiously by Dr. Lundy.

The late doctor was born at Shakespeare, Ont., eldest son of Dr. J. B. Lundy, once of Preston, Ont. He was educated at the old grammar school at Galt, Ont. He entered Trinity Medical School, Toronto, in 1877; graduated Fellow of Trinity, and M.B., Toronto, in 1880; passed examination for license to practice in Ontario that year. He practiced a short time in Bruce County, Ont., going to Portage la Prairie in 1882. He lived there continuously until his death. Member of the Manitoba Medical Association; he was also past president of the College of Physicians and Surgeons of Manitoba.

Three Macdonalds In the Senate.

In the Senate there are three veterans of the Clan Macdonald, whose combined ages total 239 years. There is Andrew Archibald, from Charlottetown, who has seen 82 summers and as many winters. William is a political stripling of 79 years. He hails from Cape Breton, and can address the Upper House in Gaelic. Lastly comes William John, of Victoria, B.C., who is 78 and has a son old enough to be a commander in the new navy. The Hon. William John gave his colleague a rude shock recently when he suggested that the only thing the matter with the Senate was that the majority of its members had become too wearied with the burden of years to take any interest in public affairs. This humble expression of opinion was called forth by a motion of Senator David, himself 71 years of age, who, when he is not writing pamphlets eulogizing Sir Wilfrid Laurier, or acting as clerk of the City Council of Montreal, is trying to solve the problem of better distribution of work between the Commons and the Senate. Mr. David, therefore, moved that a committee of both Houses be appointed to discuss this matter, but the champion of "more work for the money" was obliged to go about his task with that diplomacy brought to a high state of perfection during his long experience with the aldermen of the metropolis.—Saturday Night.

Just Like the Men.

The discussions of the question of votes for women which have taken place in Toronto of late as a result of the visit of Miss Sylvia Pankhurst recalls a story of a retort once made by Sir Wilfrid Laurier to a member of a party of ladies which waited upon him as a deputation, asking for several things.

The main point was the necessity of enacting anti-cigarette legislation. The members were well-posted W. C. T. U. workers, and they presented their arguments with force and ingenuity. But presently one of the ladies strayed from her subject, in an attempt to bring tact as well as argument to bear an appeal to the Premier.

"If you would only do this for us and then give women votes, we would be glad to do something for you," she said.

"Ah," observed the Prime Minister, with his courtly smile, "you are as bad as the men, after all. Before you will give anything, you want something for yourselves."

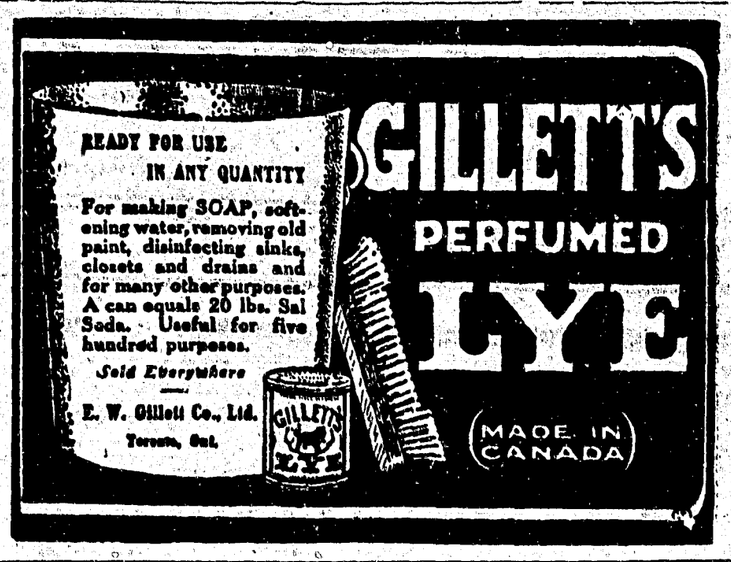
The Wrong Quotation.

It is related of an absent-minded Canadian professor that he once ordered a wreath to be sent as a floral tribute to a deceased trustee and, on being asked what message was to be written on the card expressing sympathy, replied abstractedly, "I really don't know. I'll think of something."

Taking out his fountain pen he wrote a line on his card and returned it to the florist's assistant, who sent it with the flowers, little knowing the translation of the line which had been written in a fit of abstraction, but which was fatally apropos. "Facilis decensus Averni." (Easy is the descent to Lake Averni—the mouth of Hades.)

More Butter; Less Cheese.

Prince Edward Island dairy products for 1910 were worth $574,600, an increase of $12,000. Cheese decreased and butter increased.



SPOHN'S DISTEMPER CURE

For DISTEMPER—Pink Eye, Epizootic, Shipping Fever, and Catarrhal Fever.

Sure cure and positive preventive, no matter how horses at any age are infected or "exposed." Liquid, given on the tongue, acts on the Blood and Glands, expels the poisonous germs from the body. Cures Distemper in Dogs and Sheep, and Cholera in Poultry. Largest selling live stock remedy. Cures La Grippe among human beings and is a fine kidney remedy. 50c and $1 a bottle; $6 and $12 a dozen. Cut this out. Keep it. Show it to your druggist, who will get it for you. Free Booklet, "Distemper, Causes and Cures."

An Interesting Report

Published elsewhere in this issue is the Annual Report for the past year of the Board of Directors of the Canada Cement Company as read by the President, to the Shareholders, at the Annual Meeting held in Montreal on the 21st of February.

The frank statement of the policy and the general attitude of fairness evidenced by this address, are such as to warrant more than passing comment. Any lay member of the community reading the report must surely feel disposed to echo the hope expressed by the President, that the increased demand and increased output in the year to come will result in further savings in the cost of manufacture; and it further cannot be but felt by the public at large that any such reductions that may be obtained will, according to the broad-minded policy of the Company, be used as an advantage to the customers of the Company—the concern depending for their profits upon increasing volume of business.

Especially interesting is the statement that the policy of the Company is such as to tend towards equalization of the price of cement throughout Canada so far as possible.

Another noteworthy feature of the Report is the provision made for employes to become possessors of stock. This is, as pointed out, a policy already in force in some of the largest institutions, and shows that the Canada Cement Company are quick to appreciate any means of stimulating interest and confidence upon the part of the staff.

The strong financial position of the company is a well known fact, and all that is necessary to ensure the continued success of the concern is continued prosperity of the country, together with an increased realization of the importance and economy of cement as a building material.

Woman's Influence as Usual

"Hallo!" exclaimed a costomonger on meeting an acquaintance. "Wot damages did yer get for being in that motor-'bus accident?"

"'Eavy ones, my boy," was the reply accompanied by a grin. "I got twenty pounds for myself and twenty pounds for the missus."

"The missus! Was she hurt, too?"

"Yes, in course; I 'ad the presence of mind to fetch her one over the 'ead 'fore we was rescued!"

The sun is a repeater. Why not the heart?

"SLOGGER WILLIAMS."

Tom Brown's Famous Schoolmate Is a Professor In England.

Rev. Chancellor Bulkeley Owen Jones, who, as stated in The Daily Mail is the original Slogger Williams, one of the heroes of the great fight described in "Tom Brown's Schooldays," gave his version of the famous encounter to a representative of that journal and, incidentally, had some remarks to make on the life of the public schoolboy of the 'thirties and 'forties.

The chancellor, who is now in his eighty-eighth year, is a man of fine physique, hale and hearty, with all his faculties unimpaired. After a life of useful service he has retired to pass the evening of his life in the beautful little town of Deganwy, on the banks of Conway River, one of the beauty spots of his native country.

"Whether the public schoolboy of to-day is as hardy as of yore I cannot say." he remarked. "I am so old that my knowledge of public schools of the present day is limited, but we were certainly not pampered at Rugby. I had to travel there on the box-seat of the old stage, and I remember that on one occasion I got so cold that I nearly fell off the seat. Whenever I went home at holiday time I paid $20 journey money to Bangor by old Thomas, as related in the book. Other boys had longer distances to go—some to Scotland.

"In my time at Rugby the only places available during the daytime for washing the hands and face was the venerable and much-respected pump in the quadrangle. There was a penalty attached to non-ablution before early school, and at was that the offender should be placed under the said pump and the defect remedied by a deluge on the back of the neck. This remedy was applied in a good many instances without injurious effects, but in the case of a Welsh boy named Williams the punishment was so severe, the weather and water being so cod, that his circulation was stopped and Williams well-nigh ceased to exist.

"Our football matches in those days were much more strenuous than they are nowadays. We, of the Schoolhouse, about seventy in number, played the rest of the school, about 300. We used to 'hack' one another in a most ferocious manner, and I have marks on my shins to this day which I gained at Rugby more than seventy years ago. These games were excellent training for the pugilistic encounters which were then not uncommon."

Describing his fight with Tom Brown, the chancellor gave a version somewhat different from that of the Rev. Augustus Orlebar, his opponent, who said that neither of the parties could claim the victory.

"What happened was this," said the chancellor. "It was a rainy day, and a lot of boys were gathered in the Schoolhouse hall. Orlebar was teasing a little fellow, and the little fellow said to me 'Spank him, Jones.' I caught him a rather sharp tap; he lost his temper and knocked me down. At once the boys in the hall shouted, 'Fight! Fight! Jones and Orlebar!' There was no help for it, and we had a rare set-to. My own opinion is that I won, because when Arnold came and caught us Orlebar had fainted.

"My face was so disfigured that the doctor did not know me. When he found out who it was he gave me a double punishment, first for talking in chapel and second for fighting. I had to write out 500 lines of Virgil. Orlebar was a mighty hitter and punished me severely, but I was in the better condition at the finish, the reason being that I had just been out twice with the Big Side hare and hounds. It was a fine sport for keeping a man in condition. Orlebar and I were the best of friends both before and after the fight."

Of Tom Hughes himself the chancellor had little to say. "He was rather a quiet lad, and not very popular," he remarked. "I think it is a mistake to assert that Dean Stanley was the prototype of little 'Arthur.' The character was made up from a number of boys."

Pop Go 100,000 Weasels.

"No end of trappers," said a big London fur-store manager, "are on the war-path after ermine fur for the robes of royalty and nobility. The stoat, or ermine weasel's skin, only measures a foot long by three inches wide, so about 100,000 weasels will be wanted for coronation robes.

"The more biting the cold where the animal is trapped, the whiter is the fur. And it is 'parky' in Siberia! During last coronation there was a weasel famine, and fine skins popped up to half-a-sovereign apiece.

"Ermine fur is used either plain or 'powdered' on the cape of the robe. There the rows of little black dots indicate the degree of the wearer.

"These dots, very carefully inserted at measured intervals, are made from the fur of the blue-black seal, dyed black.

"But, black or white, the seals are not having such a time of it just now as the weasels."

The Irony of Fate.

"What is your understanding of the irony of fate?" asked the bashful young man.

"Well," the beautiful girl replied, "if two fellows should fight over me and it shouldn't get into the papers I should think that was about it."

Thoughtful.

"I'm sure he'd make a good husband."

"What makes you think so?"

"He never forgets to take my gloves out of his pocket when I give them to him to carry for me."

Not Definite.

"And if you marry my daughter," said old Gotrox, "how long will it be before you call on me for aid?"

"Can't say," answered the young man. "It depends on how long it is before she wants to eat."

To Stop Swearing.

A "Clean Mouth League" has been organized at Kemptville, Ont., to clean language from profane ejaculations and impure expressions.

Did Napoleon Have a Double?

That Napoleon did not die on the Island of St. Helena, but that the man who did die there was Napoleon's double, is the contention of Charles Omerra, who brings forward curious documents which, according to him, prove his contention. This double is alleged to have been seized and placed on board the Bellerophon, while the real Napoleon fled to Austria and died at last under the windows of his only son, the ill-fated l'Aglon.

Face Sores and Eruptions

Zam-Buk Will Quickly Heal.

The approach of Spring finds many people with unsightly face sores, eruptions, boils, etc. In this connection Zam-Buk is invaluable. An illustration of the way in which it cures even the most serious and chronic cases of eruptions, sores and ulcers, is provided by Mr. R. H. Barker, of Glencairn, Ont. He says:

"I never could have believed that any remedy could cure so quickly and at the same time so effectively as Zam-Buk cured me. My face began to be covered with a kind of rash, which itched and irritated. This rash then turned to sores, which discharged freely and began to spread. I first tried one thing and then another, but nothing seemed to do me much good, and the eruption got worse and worse until my face was just covered with running sores.

"Apart from the pain (which was very bad), my face was such a terrible sight that I was not fit to go out. This was my state when someone advised me to try Zam-Buk. I got a supply and within a week I could see that the sores were rapidly healing. A little longer, and Zam-Buk had healed them completely, and my skin was as clear as if I had never had a sore. We shall never again be without Zam-Buk in the house."

Zam-Buk is unequalled for Spring rashes, eruptions, children's sores, scalp diseases, ringworm, ulcers, abscesses, eczema, tetter, piles, cuts, burns, bruises, and skin injuries and diseases generally. All druggists and stores sell at 50c. box, or post free from Zam-Buk Co., Toronto, for price. Refuse harmful imitations. Zam-Buk Soap, which may be had from any druggist at 25c. a tablet, should be used instead of ordinary soap in all cases of eruptions and skin diseases.

"The moonshine distillery has moved ten miles further." "Great sakes!" exclaimed the colonel. "Have you got to change the town site again?"—Atlanta Constitution.

Shiloh's Cure quickly stops coughs, cures colds, heals the throat and lungs. - - - 25 cents.

Money talks, but it seldom stays with us long enough for the familiarity of slang.

What you like about a woman is you never know what she is going to do; and what you don't like about a man is sometimes you do know.

USING PURGATIVES INJURES HEALTH

What You Need in Spring is a Blood Building Tonic

A spring medicine is an actual necessity to most people. Nature demands it as an aid in carrying off the impurities that have accumulated in the blood during long winter months of indoor life. Unfortunately thousands of people who recognize the necessity for a spring medicine do not know what is best to take and dose themselves with harsh, griping purgatives.

This is a serious mistake. Ask any doctor and he will tell you that the use of purgative medicines weakens the system, but does not cure disease. In the spring the system needs building up—purgatives cannot do this—they weaken you still more. The blood should be made rich, red, pure, and only a tonic medicine can do this. The best blood building, nerve restoring tonic medical science has yet discovered is Dr. Williams' Pink Pills. Every dose of this medicine actually makes new, rich blood. This new blood strengthens every organ, every nerve and every part of the body. This is why Dr. Williams' Pink Pills cure headaches and backaches, rheumatism and neuralgia, banish pimples and eruptions, and give a glow of health to pale and sallow cheeks. Men, women and growing boys and girls who take Dr. Williams' Pink Pills eat well, sleep well, and feel bright, active and strong. If you need a medicine this spring—and most likely you do—try this great reviving tonic and feel the new life, new health, and new strength it will put into you.

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50, from The Dr Williams' Medicine Co., Brockville, Ont.

To be loved into service is better than to be spanked into servitude.

The wise man treats his friends well but not often.

A Safe Pill for Sufferers.—There are pills that violently purge and fill the stomach and intestines with pain. Parmelee's Vegetable Pills are mild and effective. They are purely vegetable, no mineral purgative entering into their composition and their effect is soothing and beneficial. Try them and be convinced. Thousands can attest their great curative qualities because thousands owe their health and strength to timely use of this most excellent medicine.

A spoonful of vinegar put into the water in which meat or fowls are boiled will make them tender.

Hamlins Wizard Oil is recommended by many physicians. It is used in many public and private hospitals. Why not keep a bottle on hand in your own home?

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Grand Forks, B.C.," will be received at this office until 4.00 P.M. on Monday, May 29, 1911, for the construction of a Public Building at Grand Forks, B.C.

Plans, specification and form of contract can be seen and forms of tender obtained at the office of Mr. Wm Henderson, Resident Architect, Victoria, B.C., at the Post Office, Grand Forks, and at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures; stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

AFTER SUFFERING YEARS

Cured by Lydia E. Pinkham's Vegetable Compound

Fox Creek, N.B.—"I have always had pains in the loins and a weakness there, and often after my meals my food would distress me and cause soreness. Lydia E. Pinkham's Vegetable Compound has done me much good. I am stronger, digestion is better, and I can walk with ambition. I have encouraged many mothers of families to take it, as it is the best remedy in the world. You can publish this in the papers."—Mrs. WILLIAM BOURQUE, Fox Creek, N.B., Canada.

The above is only one of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, actually does cure these obstinate diseases of women after all other means have failed, and that every such suffering woman owes it to herself to at least give Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation, or giving up hope of recovery.

Mrs. Pinkham, of Lynn, Mass., invites all sick women to write her for advice. She has guided thousands to health and her advice is free.

If the coal fire is low throw on a tablespoonful of sugar and it will be more easily brightened and rekindled.

To whom it may concern: This is to certify that I have used MINARD'S LINIMENT myself as well as prescribed it in my practice where a liniment was required and have never failed to get the desired effect.

C. A. KING, M.D.

If the world isn't better for your having lived in it, it ought to help some when you get out of it.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children and it does its work surely and promptly.

The Duke of Brambilla is performing daily operations in the Italian hospital, New York, having come to United States to study American surgery.

For Skin Health

A lifetime of disfigurement and suffering often results from improper treatment of the skin or neglect of simple skin affections. Cuticura Soap, assisted by Cuticura Ointment, affords the purest, sweetest and most economical method of caring for the complexion, preventing minor eruptions from becoming chronic, and speedily dispelling severe eczemas and other torturing humors, itchings and irritations, from infancy to age.

Cuticura Soap and Ointment are sold by druggists everywhere. *Potter Drug & Chem. Corp., Sole Props., Boston, Mass.* Mailed free, Cuticura Book on the care of skin and scalp.

W. N. U., No. 839.

SNAPPING A LYNX.

Ernest Thompson-Seton Tells of an Adventure With a Camera.

The camera is gradually replacing the rifle as a weapon for sportsmen. It does not bag the dead carcasses of beasts, but it secures what is more valuable, a record of their appearance and habits in the living state. The very act of making the photographic "shot" also discovers traits in the wild subject that a powder-and-ball hunter would never suspect. Ernest Thompson-Seton tells in Scribner's of a surprising revelation concerning the lynx. One of those supposedly savage animals had been driven from cover and cornered by Seton and two Indians.

He faced about at bay, says the writer, growling savagely, thumping his little bobtail from side to side and pretending he was going to spring on us. I took photograph number two at twenty-five yards. He certainly did look fierce, but I thought I knew the creature as well as the men who were backing up. I retired, put a new film in place and said:

"Now, Preble, I'm going to walk up to that lynx, and get a close photo. If he jumps for me, and he may, there is nothing can save my beauty but you and that gun."

Preble, with characteristic loquacity, said, "Go ahead."

Then I stopped and began slowly approaching the desperate creature we had at bay. His eyes were glaring green, his ears were back, his small bobtail kept twitching from side to side and his growls grew harder and hissier as I neared him. At fifteen feet he gathered his legs under him as for a spring, and I pressed the button, getting number three.

Then did the demon of ambition enter into my heart, and lead me into peril. The lynx at bay was starving and desperate. He might spring at me, but I believed that if he did he would never reach me alive. knew my man—this nerved me—and I said to him, "I'm not satisfied; I want him to fill the finder. Are you ready?"

"Yep."

So I crouched lower and came still nearer and at twelve feet made number four. For some strange reason, now, the lynx seemed less angry than he had been.

"He didn't fill the finder. I'll try again," was my next. Then, on my knees, I crawled up, watching the finder until it was full of lynx. I glanced at the beast; he was but eight feet away. I focused and fired.

And now, oh, wonder! that lynx no longer seemed annoyed; he had ceased all growling and simply looked bored.

We stood aside; he saw his chance and dashed for the tall timber. As he went, I fired the last film, getting number six, and so far as I know that lynx is alive, and well, and going yet.

A Great Geographer.

In an article under this title, in The Geographical Journal, Mr. J. B. Tyrrell gives an outline of the work of an explorer of the old type. David Thompson was born in London, England, in 1770, of Welsh parentage. When seven years old he was placed in the Grey Coat School, a London charity institution which is still in existence. He studied here for seven years, learning the rudiments of navigation, which later in life became useful to him. In 1783 the Hudson Bay Co. applied "to know if this charity could furnish them with four boys against the month of May next for their settlements in America." Thompson was the only boy available, and was apprenticed to the company for seven years, and was sent to Fort Churchill.

Thompson spent fourteen years with the "ancient and honorable" company, and during these two terms of service he surveyed most of the rivers tributary to Hudson Bay from the south and west, going as far as the east end of Lake Athabaska.

In 1797-8 he made a long journey through all the principal water courses of the northwest.

His last years were spent either in Glengarry County, Ontario, or in Longueil, opposite Montreal, where he died on Feb. 10, 1857, at the ripe old age of eighty-seven years. His wife, a child of the western country, whom he married at Isle a la Crosse, on the Churchill River, survived him by less than three months, dying on May 7 of the same year.

Canada's Boundary.

While the boundary between the United States and Canada follows for many hundreds of miles the River St. Lawrence and the Great Lakes, there is a vast distance of prairie land beyond with no natural demarcation. This is marked with pillars of iron and wood placed one mile apart. These are supplied alternately by the Canadian and the United States Governments, and run from Lake of the Woods to the Red River Valley. Beyond mounds of earth and cairns of stone are used as marks. The pillars are hollow castings, eight inches square at the base, four at the top. Inside are well-seasoned cedar posts. Each pillar is inscribed in raised letters on the north, "Convention of London"; on the south, "Oct. 20, 1818." The stone cairns are seven feet high, eight feet at the base and shaped like a pyramid. Earth is used where stone is not available.

Canada's Available Water Power.

According to official estimates made by the Department of the Interior, the available water powers of the Dominion of Canada are capable of developing energy representing more than 25,000,000 horsepower, which if produced from coal would represent a consumption of more than 562,000,000 tons per annum, at the rate of 21.9 tons of coal to the horsepower.

A Profitable Flock.

Coronation Gift to King George V.

The loyal subjects of His Majesty in every part of the British Empire, bearing the Christian name of George, are invited to unite in making a gift to His Majesty on the occasion of his coronation, the most auspicious event of his life.

The contribution may be as small as a penny, but in no case may it exceed five dollars.

A list of the names of all donors, but not the amount given by each, will be sent to the King, who will decide what form the present is to take. From the interest already aroused it is anticipated that there will be a liberal response, and that a sufficient sum will be raised to pay for a handsome personal ornament and still leave a large sum to be devoted to charity.

His Excellency, Earl Grey, is taking the interest in this fitting tribute, and at his request, His Honor, Sir Daniel H. McMillan, is initiating the movement in Manitoba, and consents to allow all sums contributed in this province to be sent to him at Government House.

The mayors and reeves of cities, towns and villages, the public school teachers, and the members of Canadian Clubs and other patriotic societies are cordially invited to co-operate in bringing this most loyal project to a successful conclusion.

The last day for receiving contributions is April 23rd, and if this province is to make a creditable showing no time is to be lost.

There is no set method of work. Each city, town, school or patriotic society may work as it thinks best.

All letters containing contributions are to be addressed to

SIR DANIEL H. McMILLAN,
Government House,
Winnipeg.

Envelopes also to be marked C. G., K. G.

Any further information may be had on writing to R. H. Smith, Hon. Secretary C. G. K. G., Winnipeg.

Winnipeg, March 15, 1911.

The world won't let us practice Christian Science on our debts.

Braid of check material is best mended by using several shades of silk or in one needle.

Feeding is fatal to genius and besides geniuses don't deserve it.

Nature's Cure for a Cough

Dr. Chase's Syrup of Linseed and Turpentine is the Most Largely Imitated Medicine in the Country.

What to give the children for croup and colds is the problem mothers now have to solve. Most of them finally decide on Dr. Chase's Syrup of Linseed and Turpentine, and make it a rule to always have some in the house.

In this medicine are linseed, turpentine and other well known ingredients of unmistakeable value in the cure of colds. It is pleasant to take, so much so that children delight to use it.

So generally is this great medicine used that several imitations have been put on the market. All alike in name only. They are not made from the same formula, nor do they bear the name of Dr. Chase.

You know what you can expect from the use of Dr. Chase's Syrup of Linseed and Turpentine, but you cannot put much faith in an imitation which sells on the reputation of the article it imitates.

On every bottle of the genuine will be found the portrait and signature of A. W. Chase, M.D., the famous Receipt book author. This is for your protection and for the protection of your children. Be sure to get the genuine, even if it costs a few cents more. 25 cents a bottle, family size 60 cents; all dealers or Edmanson, Bates & Co., Toronto.

Sidetrack fair weather friends by saving your money for a rainy day.

There's a lot of gasoline wasted in family arguments.

FROM EVERY CORNER OF THE DOMINION

COME REPORTS OF CURES MADE BY DODD'S KIDNEY PILLS.

Magdalen Islands, Quebec, tell of Mrs. Cormier, a sufferer for six years, who was made a new woman by Dodd's Kidney Pills.

Amherst Island, Havre Aubert, Magdalen Islands, Que., (Special).—That suffering women in all corners of Canada are being restored to health by Dodd's Kidney Pills is shown in the press every day, and this island is not without its striking example. Mrs. Peter C. Cormier, a well known and estimable resident, tells the following story of her cure:

"For six years I suffered with Rheumatism, Backache and Nervousness. I could not sleep nor eat, and I was always tired. My limbs were heavy and I had a dragging sensation across the loins.

"Hearing of cures by Dodd's Kidney Pills I decided to try them. Seven boxes made a new woman of me."

For a score of years Dodd's Kidney Pills have been in use in Canada. They have been tried in thousands of cases and there is not on record a single case where they have failed to cure diseased Kidneys. Thousands of Canadian men and women will tell you they owe their good health to Dodd's Kidney Pills.

A Close Shave

"One of these men, a Calabrian named Morta, went to his partner's shop and tried to shoot him while he was engaged in shaving a customer. The bullet shaved the face of a boy who was waiting.—Egyptian Gazette. And very likely the lad had only dropped in for a hair cut.—Punch.

Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lungs. . . . 25 cents.

Every time your anger comes up your horse-power goes down.

Minard's Liniment relieves Neuralgia

Many a man who is willing to be a scoundrel would object to being called one.

Sleeplessness.—Sleep is the great restorer and to be deprived of it is vital loss. Whatever may be the cause of it, indigestion, nervous derangement or mental worry, try a course of Parmelee's Vegetable Pills. By regulating the action of the stomach, where the trouble lies, they will restore normal conditions and healthful sleep will follow. They exert a sedative force upon the nerves and where there is unrest they bring rest.

Hew to the line, but see that the line is in the right place.

Five thousand Japanese joined in a lantern celebration of Washington's birthday at Honolulu.

To clean silk and woollen clothes of grease spots, they may be gently rubbed with a cake of magnesia, laid away for several days, and then shaken out. It will not hurt to press the magnesia in with a hot iron, first covering the fabric with brown paper.

Minard's Liniment Cures Dandruff

A strange fact about coal is that it is always delivered to both the buyer and the cellar.

A BOOK FOR MOTHERS

Every mother is naturally anxious for information that will enable her to keep the little ones in good health. The Dr. Williams' Medicine Co., have issued a little book which contains a great deal of information on the care of babies and young children that every mother ought to know. The book will be sent free to any mother who will send her name and address, with the name of this newspaper, to The Dr. Williams' Medicine Co., Brockville, Ont.

The Cynic—"I suppose she is all the world to you?"

The Lover—"Not exactly; but she's all I want of it—5,000 acres and an Elizabethan mansion!"

To keep a parasol looking well have a bag for it hung inside the closet door, where the dust will not get at it. Brushing a silk parasol soon wears it out.

PILES CURED IN 6 TO 14 DAYS
Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days. 50c.

Chiropodists say that a shoe that will not allow the great toe to lie in a straight line should not be worn if it is desired to avoid bunions.

The merits of Bickle's Anti-Consumptive Syrup as a sure remedy for coughs and colds are attested by scores who know its power in giving almost instant relief when the throat is sore with coughing and the whole pulmonary region disordered in consequence. A bottle of this world-famed Syrup will save doctor's bills and a great deal of suffering. Price 25 cents, at all dealers.

Bent whalebone, the genuine article, may be straightened by soaking before used in boiling water for a few minutes and then ironing it straight.

Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lungs. . . . 25 cents.

A savory breakfast dish may be made as follows: One large cup of calves' liver and bacon minced, half of a sweet green pepper cut fine, all browned well in a pan liberally greased with butter and then four eggs stirred in until the eggs are set.

CANADA CEMENT COMPANY, LIMITED.

Annual Report of the Board of Directors.

TO THE SHAREHOLDERS:

Your Directors beg to present herewith the annual statement of the affairs and financial position of the Canada Cement Company, Limited, as of the 31st December, 1910.

In presenting the Balance Sheet, we call attention to the Company's strong financial position as disclosed by the large amount of cash on hand, and other quick assets, and the comparatively small amount of current liabilities. After providing for interest on our Bonds and Dividends on our Preferred Stock for the year, we have been able to set up reserves for depreciation, extraordinary repairs and renewals, bad debts, etc., and carry forward a substantial balance to Surplus Account.

The consumption of cement during the past year was not as large as anticipated. Our business also suffered on account of the Railways not being able to meet our full requirements for cars during the heavy shipping season; consequently, we carry over from last year 781,116 barrels of cement.

Early in 1910 the price of our product was fixed at a lower price than cement had ever been sold for in Canada, excepting for a short period in 1909, but your Directors are pleased to state that the anticipated savings in manufacturing and distributing our products were such that they were able to still further reduce this price.

We trust, when you consider the above mentioned conditions, and also the fact that during 1910 our plants were only operated to 57.6 per cent. of their capacity, the profits shown will be satisfactory to the Shareholders.

During the current year we look for a larger natural demand, which demand will be stimulated by continuing to manufacture a strictly high grade article, and by selling it at the lowest possible price. This anticipated increase will enable us to operate our plants to better advantage than in the past, but we do not expect that the demand will be sufficient to enable us to put into operation either of the two plants which have been idle since the organization of this Company. However, it is confidently expected that the increased demand, and increased output, will result in further savings in the cost of manufacture and distribution, and it is the policy of your Directors to give your customers the benefit of these reductions.

The Shareholders' profits will depend on the increased volume of the Company's business, the policy of the Company being the maintenance of such a stable position as will insure regular and uniform payments of interest on its bonds and dividends on its Preferred Stock, and at the same time be in a position to withstand any unforeseen emergency that may arise consequent on business depression or otherwise, which condition naturally necessitates the accumulation of, and the maintenance of, a large cash reserve.

It is also the policy of the Company to equalize the price of cement throughout Canada in so far as the physical conditions make such possible, and in furtherance of this policy, your Directors have arranged to purchase a site near Winnipeg, on which they will erect, this year, a mill to grind clinker, which clinker will be shipped from one of our Eastern mills. The buildings, machinery, etc., will be planned so that, should it at any time in the future be advisable, a Burning Department can be added, and the clinker produced on the property.

And further, an agreement has been entered into whereby this Company expects to acquire, in the near future, a property at Exshaw, which, added to our Calgary plant, and the projected plant at Winnipeg, will put us in the position of anticipating any extraordinary growth in the consumption of cement in the Great West.

With a view of educating the public, and popularizing the use of cement, in addition to the ordinary advertising, the Company has published a small book illustrating some of the many uses to which cement may be put, for which book there has been a great demand, 25,000 applications for same having been received during the past six months.

For the purpose of stimulating interest in the Company on behalf of the Employes, both in efficiency and cheapening production, as well as creating a feeling of mutual goodwill, your Directors deem it expedient to introduce a system, already adopted by several large industrial corporations with beneficial results, viz., to enable employes to become the possessors of Preferred and Common Stock at prices which will be attractive to them, the employes paying a fixed amount per share per month out of their earnings, and the Company carrying the stock for them, charging a rate of 5 p.c. interest. If the plan is put into effect, all dividends will be credited to the employes applying for the stock. Said stock will be held in trust for the employe for a term of five years, excepting in exceptional cases, such as death, when his heirs will receive what benefit a deceased employe has derived from subscribing to the stock.

Your Directors feel that the policy, as herein outlined, will, as nearly as possible, make the interests of the consumers, the employes, and the shareholders identical, and will inure to the most enduring and beneficial results for all concerned.

All of which is respectfully submitted,

On behalf of the Board of Directors,

WILLIAM C. EDWARDS,
President.

TOM'S ESCAPE

TOM BROWN was the son of a pioneer. His home, a small log cabin, stood, with two others precisely like it, in a clearing.

The Browns' nearest neighbors lived four miles distant down the river, at a settlement known as "Hopper's Clearin'." Travel was neither easy nor safe in those days, and although Tom had made the trip several times, he had always gone under the protection of his father or a neighbor. These events had been red-letter days of fun and excitement to him, for there was always the danger of capture by the Indians, who infested the region.

One sunny morning in spring two white-faced men staggered into the Brown cabin and silently laid Mr. Brown on his rough couch. To Tom's terrified inquiries, they only said that he had been set upon by an Indian and

that they had arrived upon the scene just in time to prevent his being scalped. It was their opinion, they said, that the tribes were making ready to go on the warpath, and they told Tom he had best barricade the cabin against sudden attack.

After they had gone, Tom made a brief examination of his father's inert body. He made up his mind that, although there was no immediate danger, it would be by far safer to procure a doctor. Tom sat on the side of the pallet to think. That there was a good doctor at "Hopper's Clearin'," he knew. How to reach him was the question. The men in the cabins were needed, every one, to protect the women and children.

Tom listened anxiously to his father's heavy breathing, and a sudden brave resolve came into his heart.

He reached for his father's rifle, but on second thought put it down again. He knew that his aim was poor and that it would be safer to go unhampered by a heavy rifle, trusting to the swiftness of his legs instead of to weapons.

The lad crept to the door, opened it and closed it softly behind him. A glance at the sun showed him that the day was well on its course. With the peculiar long, swift, easy stride of the backwoods, the boy swung into the forest trail.

His nerves were strung at high tension; every squirrel that darted across his path struck terror to his soul, every swaying of bushes in the wind was to his excited mind the movement of a dusky body.

It was dusk, and the boy found the trail harder to keep to. He forgot caution and cracked branches and thrust aside bushes without thought of danger in his eagerness to reach the "clearin'."

He was within a mile of his destination when suddenly two brown arms shot out from the underbrush, seized him and dragged him roughly from the trail. Bravely Tom conquered his impulse to scream or struggle, realizing that resistance was the surest way to antagonize the warrior. So, ruthlessly as he was dragged through the heavy undergrowth, the torture of twigs snapping in his face and thorns scratching his hands wrung no cry from his lips. Finally the warrior dragged him into a circle of savages, who sat, grotesque in their warpaint, around a huge fire.

Tom determined on his course of action at once. Pulling himself together, he walked up to the chief.

"How?" he said, then turned and sat cross-legged by the open fire, gazing into the blaze with all the stolidity he could muster.

An approving grunt swept the circle.

After a time Tom allowed his eyes to travel round the faces. They finally encountered those of an Indian lad about his own age, who rose and came lightly forward. "How?" he said, and smiled, holding out his hand, white man's fashion.

Conquering his astonishment, Tom shook his hand warmly and tried to engage him in talk.

But the lad only smiled and answered "How?" to all questions. As the night advanced, the hideous group wrapped themselves up one by one and fell into heavy slumber. Tom stretched himself on the ground, giving a contented sigh for the benefit of any Indian who might be listening.

Tom now had leisure to think. He realized that the Indians were in an unnatural condition, stupefied as it were, and he wondered if he had better risk all in a sudden swift dash for liberty. He had almost made up his mind to do so, when chancing to turn, he found the Indian lad at his elbow.

Tom drew back in alarm, but the boy uttered a reassuring grunt, motioning him to bend down at the same time.

"Get away now," he said. "Indian all full firewater. All sleep till tomorrow. Get firewater from wagon near Hopper's Clearin'. Make them crazy. Knock man down, try to scalp him, only because full firewater. My people no want to go on warpath. Crazy only with firewater."

"Won't you get into trouble for setting me free?" asked Tom.

The Indian laughed.

"They forget they capture you tomorrow. I no want tribe to go on warpath. I want be friends with white man. Come."

He showed Tom how to lie on his stomach and wriggle along with a curious snakelike movement. With the craft of a born woodsman, Tom could soon crawl as well as his teacher.

Slowly the boys wriggled their way out of the circle of heavily breathing men, stopping often as the warriors stirred in their uneasy slumbers.

Once in the forest path, Tom turned to his rescuer and held out his hand. The little Indian lad took it gladly.

"You brave boy," he said, laughingly. "We no want our people kill each other just now, do we?"

"We sure don't!" answered Tom. "You're a good sort. If I ever can do anything for you or your people, let me know."

"I will," said the Indian.

"How did you learn English?" asked Tom, curiously.

"I not Indian, all. I white baby adopted by this tribe. See?" and he rolled back his cloth at the neck. The skin was brown, but no browner than Tom's. The boy laughed at Tom's exclamation of amazement.

"They good to me," he said. "I love this people."

"Come home with me," said Tom earnestly. "Don't waste your life with savages."

"No," said the lad, "I love my people. They are good to me. The white people cast me out."

For a moment his dark eyes looked fierce. Then nodding his head, he glided away, leaving Tom standing in the pathway.

Some days later Tom told the story to a number of men gathered in his father's cabin. One of the listeners, a hardy, wiry-looking Frenchman, listened hungrily to every word, asking all manner of questions. That night he left the camp and was not heard of again until five years later, when during the Black Hawk war Tom stumbled across an elderly Frenchman and a young fellow who looked enough like him to be his son, dead on the scene of battle, dressed in the garb of the Indians. Stooping closer to the young face, Tom realized

that the body was that of the boy who had saved his life; while that of the man was his old neighbor, the Frenchman.

How Animals Pass the Winter

DO YOU know why bears, badgers, raccoons and skunks sleep through all the long winter?

It is because none of them is a good runner or hunter. They eat berries, corn, nuts, eggs, frogs, insects, worms, mice—everything, in fact—during the summer months. The consequence is that they are very fat when autumn comes, and are quite ready for a nice, long, warm nap.

The bear generally manages to find a cave for his winter bedroom, although, if nothing better offers, he will take shelter under a log.

Badgers and skunks prefer to dig their own refuge, while the raccoon always finds an old decayed tree trunk the most comfortable winter quarters. Woodchucks and chipmunks also sleep away the cold months in burrows, which they dig themselves.

Two very interesting animals are the muskrat and the beaver. The muskrat builds his house of rushes, twigs, mud and roots. He always makes two or three doors to it and locates them always below water level.

Though the world outside freeze solid, the muskrat is happy and comfortable all winter. He does not sleep, but swims and dives for his food under the ice.

Did you know that the beaver's house sometimes covers a space about 12 by 15 feet in area?

His large room measures 5 feet long, 3 feet wide and 2 feet high. It is built in wonderful fashion, of sticks and mud, and its entrance, like that of the muskrat, is under water. Beavers live on the bark of trees principally, and they have a very good plan of storing their material for the winter.

Before freezing time comes, they cut down poplars or other trees which may be used by them for food.

They cut their store up into pieces from two to six feet long and place them under water near their houses. Truly a wise plan, which removes them from the reach of the jaws of the ravenous wolves and foxes, always so ready to attack any living thing in winter time.

The Treasure by the Sea

THE iron gates of the grim old castle by the sea swung open, and through them passed an old, old woman and a little girl.

"Oh," said the child sadly, "I'm so lonely here! Can't we go down to the beach by ourselves and explore the caves?"

"I should love it, my princess," said the woman, "but we must not forget that your enemies are many and dangerous. It would be a very imprudent thing to do."

"All nice things are imprudent," pouted the child.

"I wish I were just an ordinary girl instead of a princess." She stood looking out to sea, when suddenly a twinkle of mischief came into her blue eyes.

"I wish to go back to my room," she said, "and lie down all by myself. I'm very tired."

Full of anxiety that the child was ill, the nurse hurried her back to the castle.

Alone in her room, the princess wriggled out of her fussy frock and donned a simple sailor costume; then she tucked her despised curly hair under a cap and surveyed herself with satisfaction in the mirror. Quietly she slipped to the window and looked out; the coast was clear.

It was the work of a moment for her to climb on the window sill and from there on to the strong ivy, which was thick as the branch of a tree with age. Carefully but fearlessly she descended to the earth. Suddenly she stopped short, remembering that every exit to the beach from the castle was well guarded. In a disappointed fashion she turned to go back, when she remembered an old orchard behind the kitchen garden. She dodged round the corner of the house and soon found herself in the orchard.

Here she had a jolly time climbing the trees and running about. Finally she came to an old moss-grown rock, and stood idly kicking it.

Suddenly and without warning it flew back on grooves, and she almost fell into a round dark hole; she started back, but a moment afterward was bending eagerly over a shaky, decayed-looking ladder which led downward. Then she began to descend. As her weight struck the seventh step she heard the stone overhead roll back into place. Evidently this was a mechanical arrangement. The child now found herself in almost total darkness. This bothered her until she remembered the small electric lamp in the pocket of her suit.

Holding the contrivance high overhead, the child saw that she was in a wide, uneven passageway that seemed to be carved out of solid rock. Although it was damp and dark, she felt no fear.

She had gone some distance down the passage, when she was confronted by a large door heavily bound with iron. Setting down her light, the princess picked up a sharp-edged stone and loosened the hard crust of earth which had formed about the cracks.

She gave it a final shove, and it swung creaking back.

The child now found herself in a square chamber.

Her light, held high, cast queer shadows over the rocky walls and outlined in grotesque fashion a chest in one corner. With an exclamation of surprise, the princess started toward it. She tugged at the lid until it flew up, disclosing to her wide eyes the most beautiful jewelry, the most wonderful vases and vessels of gold and silver, curiously carven, she had ever seen. Faintly, the princess recalled old tales of the pirates who long ago had stored their treasure in the caves along the beach. She realized that she had probably stumbled across the secret cave of some cruel old seadog, who had spent his life in amassing these precious things and then, perhaps, had gone to his long sleep in a watery grave before having a chance to tell any one of its whereabouts. After a time the princess realized that it was growing late, that she would be missed.

She went along the passageway to the ladder. When she had reached the top she realized that the stone was too heavy to roll back.

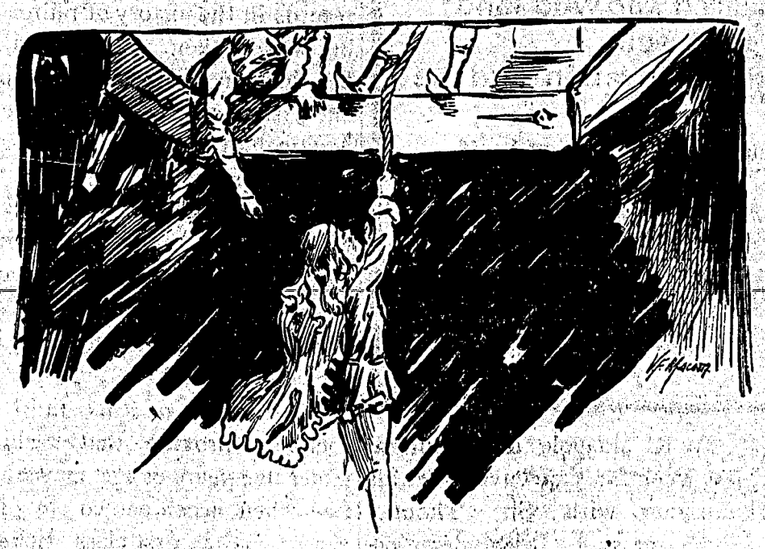
A feeling of suffocation almost overcame her. She was caught—trapped in this underground world! A thousand horrible thoughts crowded her mind. Suppose she should starve to death, here in the midst of the pirate hoard!

Slowly the princess descended the shaky ladder. Suddenly a thought came to her: If this were a pirate cave, it must have some entrance by way of the sea. Perhaps one of the caves on the beach was the outlet. At the far end of the treasure room she found a door similar to that by which she had entered. With might and main the princess struggled until it swung back. Scarcely had she time to pass through, when it closed with a heavy thud. Startled, the princess looked back, but what had been the door now resembled a solid wall of rock.

Curiously she turned back to find where the door began and where the rock. Her search was in vain; it was a masterful piece of cleverness.

Looking down the corridor, the princess saw that it was very much like that which she had passed leading to the treasure room; but the ground was curiously smooth and even and the salt smell of the sea struck her eager nostrils. Her idea was correct, the cavern gave on the sea. Eagerly she pressed forward. Soon she could hear the breaking of waves on the rocky beach; then she could see light, like a pinpoint, far away.

With a glad cry she ran forward, but soon stopped in dismay. At her feet, inside the passage, inside the



mouth of the cave, gurgled the white-capped, hungry waves of the sea!

A glance showed the princess that the water was rising rapidly and that her escape by way of the cave was thus cut off. Collecting her scattered wits, the little girl began to make an examination of the rocky walls of the corridor. With desperate hope she tested every crack that looked as though it might be part of a secret door.

The hungry sea crawled higher and

higher, and the child was almost in despair, when suddenly the rock gave way, and the princess stumbled blindly through an opening. Though she had lost all hope of escape, she started once more down a passage that looked precisely like that by which she had come. At last her journey ended in a small square room.

Weak and exhausted from fright and weariness, her hands torn and bruised with her struggles, the child fell in a sobbing heap on the sharp, rocky floor. Soon she buried her head in her arms and sank into a deep, dreamless sleep. When she awoke, she realized that she had slept for some hours. She lighted her electric contrivance and scanned the cave afresh. There were no doors or openings, save that through which she had come. Holding the light high, the

child examined the ceiling. With a beating heart she realized that it was made of wood. Moreover, she could dimly see a square trapdoor in one corner. If she could but make out, some way, to knock on it!

Going immediately underneath it, the princess could distinctly hear the sound of voices and the scurrying of many feet. Evidently there was some excitement in progress overhead.

Weakly the princess tried to call out to attract attention, but her voice was very faint and the noise overhead great. She wasted no more time, but removed one of her heavy walking shoes and sent it with all her strength against the wooden door. A silence followed, and the princess knew that she had been heard. The other shoe followed, and the princess paused for breath. Cold perspiration covered her forehead, but at intervals she continued her calling. After a short time she could hear the regular hacking of an ax on the sodden boarding. At last, with a splitting and tearing of wood, a light shone down.

"Are you there, princess?" called anxious voices.

"Yes," answered the princess weakly. "Oh, come get me quickly, quickly, nursie!"

There was a scurrying above. With the greatest care the princess was helped up a ladder and found herself in the castle kitchen.

When the excitement of her recovery was somewhat subsided, the princess told her story.

"Little girl," said her uncle kindly, "you may be responsible for more good than you dream of now. Your own country is hard pressed for funds. This wealth which you have found may be the means of saving your kingdom from a horrible war. With its help I think I may promise to take you back to your native land and your playmates in a short time."

And so it proved. But it was no longer a sad, lonely little princess who dwelt in the grim old castle. The underground world she had discovered was her own realm to govern as she willed. It was the very best playhouse a princess ever had, and the child was happy and contented until she sailed away for her native land.

THE STORY OF THE SNOWDROP

ONCE many, many years ago there lived a little princess. She was not an ordinary princess, but a daughter of the great king who reigned over the "Little People of the Snows." Her home was a vast and wonderful palace made of snow; her playground was the most beautiful garden in all the world, for the flowers were made of purest, new-fallen snow and the trees and shrubs were fashioned of green ice. When the light shone on the garden it seemed a blaze of gorgeous jewels.

One day the princess, in wandering about the palace passages, happened on a corridor which led she knew not where. On and on she followed it, until she came to strong dungeon cell. She looked in and saw a splendid young knight clad in green armor.

Although he was different from any person whom the maiden had ever seen before, she felt strangely attracted to him.

All the "Little People of the Snow" had flaxen hair and blue eyes, but this stranger had eyes of velvet brown and his waving hair was dark as night.

He told the princess that he was one of the children of the earth, who had strayed into the world of the "Little People" and had been taken prisoner.

Every day for a long, long time the princess visited the young knight in his dungeon. And as time passed, she grew to love him dearly—and he, too, loved her.

Hour after hour would she sit by Galanthus' (that was his name) side while he told her beautiful tales of the great world whence he had come and the workings of Mother Nature. The months flew by as a single day to the happy maiden and the happy knight, and before they knew it spring was on the way. Now the first breath of the south wind is death to the "Little People" unless they fly to the tall mountaintops, where the South Wind cannot pursue them. But the princess was so happy with Galanthus that she forgot all about the coming of the South Wind, which meant death to her.

One day she was with the young knight, when the wind came up out of the south and rocked the snow palace from its very foundation. The princess trembled and wept in affright, for she knew that it meant death to her. Then the young knight, Galanthus, sprang to her side and folded her in his arms to comfort her.

Lo! In a flash he was completely changed. His green armor faded to a dull, rusty brown. But he held the frightened princess closer still in his arms, and slowly, slowly they both sank into the bosom of the earth.

Now, Mother Earth was very sorry that the Snowdrop must lose her friends and playmates of the snows, and so she gave the Knight Galanthus permission to bring her up out of the earth once a year to find them.

She waits all winter long while Galanthus pushes his way through the hard earth. As soon as he can, he folds her in his long green cloak and lifts her high in his arms. So far she has always been too late to find any of her brethren. But she does not grieve very much.

She loves Galanthus, and she is content to be with him, although it means going back to the dark earth. She knows that he would be very, very lonely if she should leave him in the darkness and fly away with her sisters to the Land of Perpetual Snows.

French Fashion Notes

PARIS.

HUGE sailor hats of natural-colored pongee are shown for the late summer days. And, if you wish, you can find felt shapes, faced with velvet and simply trimmed with wings or scarfs. But these are advanced models, shown only to a chosen few.

Black satin bonnets lined with soft frills of lace are shown for autumn, while huge flat shapes of satin faced with black velvet and having oval crowns are displayed for evening wear. Plumes trim many of the large hats.

The "Manteau Japonaise" is much in vogue. Brilliant embroideries are used on the outside and contrasting satin on the inside, the favorite colors being blue, coral, emerald, green and apricot. Brocade and voile over satin form many charming evening models. High belts, draped as the Japanese do their sashes, are used.

In the smartest furrier's in the Rue de la Paix there is displayed a muff of chinchilla three-quarters of a yard long. Muffs and scarfs are fashioned of cashmere shawls.

A coarse black rep is being used for suits. White moire and white cord are the trimmings most favored for this new fabric.

Skirts are still scanty.

Ostrich plumes for evening fans are now in order. These have beautifully decorated handles and are hung on jeweled chains.

Blue serge for a little girl's frock is trimmed with plaid silk in bands on sleeves and yoke, with a crisp little frill of pleated linen edging the collar and sleeves.

High waist lines, stripes, beads, short jackets, the oriental and the directoire influence are the guiding posts along the fashionable way. Just which idea will dominate it is difficult to predict.

Let us hope that the great designers, busy now with the coming fashions, will be merciful and launch a variety of modes for waiting womankind to wear becomingly. ELOISE.

To Clean Embroidery

FRENCH chalk is excellent for cleaning embroidery that is too fragile to be washed with soap and water. The chalk should be made quite hot and sprinkled thickly over the embroidery, which is then rolled carefully up so that the chalk is inside.

Leave it in a dark place for a week or ten days, shake it out well and the embroidery will be quite fresh again.

If the embroidery is wanted in a hurry, the hot chalk should be rubbed through it as though it were being washed. This process should be repeated several times, and if some dirt still remains use a little more chalk and leave it overnight, if possible.

Wedding Rings for Men

"IF WE only thought what the wedding ring originally meant, I think most of our modern brides would be insisting that their husbands should wear one, too," said a pretty young matron the other day. "Back of everything else it is a mark of bondage; and nowadays men are—or should be—as much bound by marriage as are women. It is a pretty German custom, this exchanging of rings, and I am glad to see it is spreading in America.

"When I was married I told James he had to let me give him a ring. He was to be marked 'married' as well as I. Certainly, all the girls who object to the word 'obey' in the marriage service ought to insist on this change also."

Go, Lovely Rose!

GO, LOVELY rose.
Tell her that wastes her time and me,
That now she knows,
When I resemble her to thee,
How sweet and fair she seems to be.

Tell her that's young,
And shuns to have her graces spied,
That had'st thou sprung
In deserts where no men abide,
Thou must have uncommended died.

Small is the worth
Of beauty from the light retired.
Bid her come forth,
Suffer herself to be desired,
And not blush so to be admired.

Then die! that she
The common fate of all things rare
May read in thee,
How small a part of time they share
That are so wondrous sweet and fair.

—Edmund Waller.

Mounting Photographs

IF YOU have a number of photographs of your European trip, or copies of famous pictures, or prints of your favorite poets or musicians, or any other of those small, unmounted photographs and prints that one collects and then hopelessly carries about in a bag or box to the end of time, try arranging them in a frieze around the wall of your living room or study. Get glass exactly the size of each and fasten them tightly by means of glass-headed pushpins firmly inserted at each corner. There will be no frame to hide any of the picture, and the effect is quaint and artistic.

If you have a low picture molding, so much the better; arrange them in pleasing order in the same way on this. Nothing could be prettier than a wall done in brown burlap, with a walnut molding and light paper or paint above and a frieze of these photographs in sepia or carbon. They give a tone to a room that it needs only a little leather-covered furniture, a rug or two, a marble cast and a bit of pottery to complete. And the glass-mounted photographs are the keynote of all.

Hatpin Protector

THE woman who must travel with five or six extra hatpins—for now that the pins match the hat, each hat taken along on a journey means two or three hatpins to go with it—should provide herself with a large, flat cork, such as is used on pickle bottles and jelly jars. Stick the points of the hatpins well into this, and you can carry them tucked into a corner of your trunk or suitcase, with all perishable heads carefully wrapped in tissue paper or absorbent cotton.

Even better than cotton, is surgeon's wool, if you can obtain it. The whole combination of cork and pins may go into an empty fan or glove box, and thus be doubly out of the traveler's way.

What have you to Sell?

We are starting a campaign to advertise Victoria and the Island generally in all parts of Canada, Great Britain and the United States, and we want your assistance in this work.

There is going to be great development on the Island in the immediate future, and you and we must do our part in this expansion.

Development means the influx of people and money and we want you to assist us in properly placing both.

What have you for sale? Write and give us the following particulars:—

Description of property and number of acres
Number of acres of cleared and wild land
Number of acres of good soil
Number of acres under cultivation and the nature thereof.

In a word, tell us all about your property and, if possible, send us photos of it.

Quote price and terms, and make the price an appeal to reason.

Beating the Railroad.

Oklhahoma is about to acquire a remarkable family, Mr. and Mrs Frank Scott, of Highland, Kan., are seeking a location for a home somewhere in the state where they can obtain plenty of land. They will need it, for they have not been married quite ten years, and are the parents of nine teen children, all of them boys, and thirteen of them living. They hold the record on triplets, having five sets to their credit, and two sets of twins. All of the thirteen boys living are under five years old. Mr and Mrs Scott are the children of farmers living near Highland.

Last fall, the Scotts deciding that they must find more land, went to Alberta, Canada. They were not satisfied there and returned. On the return trip all records in the history of railroading were broken. Mrs Scott and her thirteen children all rode on one first-class passenger ticket. At Omaha the conductor made a vigorous protest.

"Madam, you cannot carry a whole Sunday school along with you on that one ticket, and you need not tell me these are all yours. You will have to pay fare for some of them."

"The rules of this railroad company provide that a child under five years of age may ride free when accompanied by its parents on a first class ticket, don't they?" retorted Mrs. Scott.

"They do, but you will have to show me."

Then Mrs Scott dug down into her valises and brought out the family bible, in which were recorded the names and ages of each of the children. The conductor had to give in. The mother and children occupied five double seats in the homeseekers' car and paid for only one.

The names of the Scott children begin with A. They are:—Ashbell, Archer and Austin, triplets, 4½ years old; Arthur and Arnold, twins, 3¼ years old; Allan, Almon and Albin, triplets, 2½ years old; Albert, Albion and Adolph, triplets, 18 months old; Abel and Abner, twins, 6 months old. Mrs Scott is 30 years old, and her husband is only a year her senior. The mother and children are now in Highland, Kas., while the father is in Oklahoma seeking a suitable location for his large and promising family. He probably will buy some cheap Indian land through the Indian agency at Muskogee.—Ex

JOHNSON BROS.

FOR SALE—A light driving team, mares, quiet and not afraid of autos; also light double harness. C. J. B WARD, Little River's road, Comox.

LOST—A pay envelope containing $78 15, on Saturday last, either between McKinnon's store and the Bank of Commerce or between J. Marocchi's and No. 7 station. A substantial reward will be paid to the finder by returning to Tony Jakano or this office.

Mr. and Mrs. William Sloan and family left Nanaimo on Monday for London to attend the Coronation ceremonies.

Mr R. Marpole left Montreal last week for Vancouver after an interview with Sir Thomas Shaughnessy. It is understood that the plans for the extension of the E & N northwards to Comox and beyond have been approved, and that the company's aggressive policy will be continued with vigor.

The friends of this paper will please hand us news items when they are fresh. We prefer not to publish a birth after the child is weaned, a marriage after the honeymoon is over or the death of a man after his widow is married again.

J. H. Hawthornthwaite, M.L.A., is no longer a socialist, not at least as far as he is visible to the naked eye. J. H. was not very rampant in the last session of the legislature. Comparing the Socialist Jim of a few years ago who used to declaim upon the time when the red flag would proudly float from the gilded dome of the Capitol in Victoria, with the respectable and easy-mannered capitalist into which Mr. Hawthornthwaite has lately developed, you would hardly recognise him as the same man.—Sunset.

It is against the law to blow up fish with dynamite, and this fact was brought home quite forcibly to two Nanaimo men on Monday when they were each fined $100 and $20 costs for using dynamite in Little Qualicum. The two men guilty of the infraction of the Act visited the stream in a one horse rig. Leaving their out fit on the roadside they travelled a short way down stream where they brought their dynamite into action. A farmer residing in the vicinity got wise to the game, and after cutting loose the horse so they could not make their escape, telephoned for Provincial Constable Kellett, at Nanoose, who without delay hastened to the spot and placed the two offenders under arrest. They appeared before Mr Robt Hicks, J.P., at Parksville.

WANTED—A few boarders in private family. Apply this office.

Do you know that an editor or a reporter for a newspaper can in his rounds stop and ask a hundred persons "What is the news?" And ninety out out of the hundred will reply, "Nothing special and yet fifty out of that number know something that if not found in the next paper will astonish them greatly and disappoint them more, and perhaps makes them madder than hornets. Don't be afraid to let the newspaper man know it.

The idea of teaching every girl to thump a piano, and every boy to be a bookkeeper will make potatoes worth $8 a barrel in 20 years.

The Princess Mary had 148 passengers from Vancouver on Monday evening for Nanaimo, including 39 immigrants from the Old Country, who are going to take up their residence in that city.

This is the first spring in the history of Comox District that the local demand for eggs has been equal to the supply. Nothing pays better than poultry, if they are rightly managed. Begin with the little fellows and feed them CHICK FOOD, which is a mixture of bone meal, wheat, oats, corn and other grain, cut and blended in the right proportion to make them thrive and grow.
