DRIVING NO. 4 DUNWELL TUNNEL

Clearing Sites For New Operations Is Finished---Ore In No. 3 Tunnel Still Holding Good.

Extenslve clearing and grading for a new blacksmith shop and other buildings st the site of the No. 4 tunnel have been completed. The buildings are now being erected and driving of the tunnel proceeding with two shifts operating a heavy Ingersoll Rand drifter drill.

Two shifts are continuing the north drift in the No. 3 tunnel, the vein averaging ten feet in width with high-grade ore on the foot and hanging walls. An average across ten feet at the 195-foot crosscut returns values in gold and silver of $62, with gold values largely predominating: five feet on the hanging wall side of the vein returns an average value of $59 in gold.

READY TO WORK ON LAKEVIEW

Richard F. Hill, managing engineer for the Lakeview Mining Co., who recently acquired the Lakeview group from Charlie Bibeau and Jim McKay, arrived from Seattle Sunday, and after going up to the property, he yesterday sent a crew of men up the hill to build two small bridges and cut out windfalls across the trails so that supplies can be taken in to the property. Mr. Hill is a well known mining engineer and has had considerable experience in the north, having had charge of such properties as the famous Engineer mine in Atlin, the El Nido in Alaska, as well as acting in a consulting capacity for varions other producers.

Claims held and controlled by the company comprise a group joining the Dunwell property on the east and including the Lakeview claims No.s 1, 2 and 3 and Silver Bell Fraction.

For many years the Lakeview has been the same as a bank to McKay and Bibeau. Throuh rock and thin they have stayed with the camp. Other prospectors were trapping for a living during the lean winters.

Charlie and Jim shot a few moose and coyotes, and drew bounties. But they drew on their bank, the treasure left to them in Nature's rock ribbed vault, and these are some of the results that the smelters gave them.

SILVER CREST WILL OPERATE

Seymour Campbell Here To Take Charge of Work On High-grade Property Up Salmon River

Seymour Campbell, an early pioneer of the camp and one of the best known practical hard rock miners of the Portland Canal district, arrived Sunday to take charge of development on the Silver Crest, of which he has been appointed superintendent. Last summer Mr Campbell was in charge of the Georgia River Company's property, and left in the fall for Vancouver, where he spent the winter.

Wednesday morning he left for the property in order to size up the situation with regard to shipping in the mining and camp equipment, which arrived on the Cardena Monday night. His intention was to return the latter part of the week and then organize a crew for getting the necessities onto the ground. In 1919 Mr Campbell did a considerable amount of work on the Silver Crest and is thoroughly familiar with the property; but as each spring presents its own transportation problems this familiarity warned him to make a special trip preliminary to undertaking transportation of any magnitude.

Mr Campbell knows several high-grade showings on the property and will concentrate on these in an effort to open up a body of commercial ore from which shipments can be made. The Silver Crest is about 22 miles from tidewater and ore will have to be high-grade before it can stand transportation costs. It present road plans, as announced in the southern press, materialize however, the distance between the property and a wagon road will be very materially lessened.

The girls have started playing grass hockey. God help the team that goes up against this bunch of young savages; it will be murder in the first degree.

A shipment of 3970 lbs. of ore smelted at Tacoma gave returns at the rate of $48.78 per ton; 2611 lbs of ore returned 1.41 oz. of gold and 189.16 oz. of silver valued at $146.74, or giving a value of $112.40 per ton In 1914 a three-ton lot shipped to the smelter realized $953.57, or an average value of $317.86 per ton

Mr Hill, of course, cannot outline his plan of development until he has made a thorough examination of the property.

STEWART-HYDER LOCAL NEWS

W. H. Ryan is painting and decorating his house in Hyder.

George Clothier, resident government mining engineer, left on the Cardena for Rupert.

This week the Prince George will arrive on Sarurday, inaugurating the summer schedule.

Will Jancowski, who has been in Vancouver and Victoria for some months, returned Sunday

Herb Charlton returned Surday after spending the winter outside. He was as far south as Portland.

J. M. Kahlen M.E. of Vancouver arrived Sunday and expects to put in the summer at the Silver Crest.

Dan Anderson, manager for the Chief Metals Mining Co., leaves tomorrow on a short business trip to Seattle.

Mrs Martin has moved her cleaning and pressing establishment from the Carolan block to the Beaman block.

Stewart Citizens Association meeting in Moose Hall Wednesday evening, June 11. Important business will be considered.

Matt Menzigohr returned Sunday from a week's wisit with his family in Rupert. He spent the winter in hospital here nursing a broken leg.

J. P. Hawkinson, proprietor of the Exchange Grill, returned Sunday from a vacation trip of six weeks, during which he visited his old home in Minnesota.

Committees of the Citizens Association, Board of Trade, Service Club and Moose will meet Tuesday night in Moose Hall to arrange a program for the First of July.

Patsey Hogan, known all over the north as the "Irish Swede," is back after a ramble since 1921 of something over 10,000 miles. He has recently been in Quebec and Ontario.

W. E. Griffith, who sells Ingersoll Rand mining equipment, is back in camp. He is going up to the Independence to see how their outfit is working, and take some photographs of the mountainside up which the boys dragged their comgressor through 20 feet of snow.

Since his return from Seattle a month ago, John Hovland has built an attractive and substantial addition to his home in Hyder and has also put his assay office into first-class shape. From now on he will be steadily on the job, a fact that will be much appreciated here, because quick returns on assay samples have been impossible to obtain for many months.

Three-room house for sale Furniture. Apply Mrs Mehlfeld, Hyder, Alaska. 2t

Chas. A. O'Neil left for Victoria Sunday.

McLeman & Hooton have received the agency for Ford parts.

R. L. Clothier left last Sunday for Victoria, where he recently purchased a home.

Chas. H. Mills, a garage man of Vancouver, is a recent arrival and may locate here.

Captain E. J. Williams brought J. A. Talbott over this week from Ketchikan on the Taku II.

T. W. McDonald, Deputy U. S. Marshal in Hyder, has bought Owney McFadden's race horse.

W. A. Allan, representative of the Dominion Rubber Company, is here on one of his periodical visits.

Mr and Mrs Billv Bunting and "The White Hope" returned Sunday from an extended visit with relatives in Spokane.

F. B. Shearme, who was connected with the early development of the Portland Canal mine arrived Sunday from Vancouver.

A. Strachan, manager of the Pioneer Laundry Ltd., of Rupert, visited Stewart from Sunday morning until Monday night.

J. O. Stenbraten, better known in all western mining camps as "Stamnede John," returned to camp Sunday. He spent most of the winter in Mexico.

Frank Fisher, superintendent of the Premier tram, is in hospital on account of being knocked off of a timber hook on wihch he was riding. He was pretty well scalped, but his worst trouble in his wrists and arms.

Work On Glacier Creek

All outside work is now about completed, including the laying of 1600 feet of two-inch air pipe from the Dunwell pipe line to the tunnel, the erection of a blacksmith shop and other buildings. Rails are now being laid in the tunnel, which is 260 feet long, this distance having been driven when the property was operated in 1910. It is expected that the drill will be in operation within a week, and the main vein encountered about 50 feet beyond the present face.

Conway Canvassing

E. J. Conway, field engineer for the Granby company, and nominee on the Conservative ticket for the povincial legislative assembly, is here this week electioneering. Mr Couway has not as yet informed this paper as to his program for "speechifying" in public. Everyone here likes E. J., and there is a great curiosity as to how he will size up in front of a crowd of miners and prospectors.

STAR & DANDY COMING AHEAD

Modern Camp Established And Development Work Proceeding As Physical Conditions Allow

Next Monday two shifts will be put to work on the Star and Dandy showing, according to Bob Martin, who came down from the property yesterday. The high-grade showings which have been exposed since his return from the east are to be developed with a view to making a producing mine as quickly as possible. The road bei g built by the B. C. government to the Dunwell will help materially in getting out ore shipments.

Bob will have an ideal camp for his crew at the Star and Dandy—spring beds, mattresses, and all the accommodations for a decent livlihood. Foundations for the camp are laid, timbers hewed out, and lumber for the buildings is now moving up the hill,.

The miners are putting in a tunnel to tap at depth the high-grade ore found last week on the surface, and if they hit the same values in tne tunnel as they had on top, Bob says he will keep on speaking to everyone the same as usual, but that he will have an awfully glad feeling permeating his system.

Bob Armour Here

Robert Armour, candidate for the legislature on the Provincial ticket in the Atlin riding, arrived from Anyox early in the week and has been around getting acquainted, going up to the Premier Wednesday. "Bob," as everybody calls him, has a pleasing personality such as would be expected of one who has been chosen to strive for the honor to which he aspires. He will address a meeting in the ballroom of the Hotel Stewart next Tuesday evening, and when he gets through speaking, which he promises will not be long, everyone will dance.

Bert Coming Back

Bert Kergin, who is out for reelection on the Liberal ticket, and who left his hearers with a friendly feeling toward him when he addressed them last week in the Opera House, will be back next week and hold a meeting at the Premier.

James Stewart of Stewart Bros owners of the Stewart townsite and heavily interested in the Dunwell mine, returned Sunday from Victoria, where he now makes his home.

LIBERALS HAVE POLITICAL MEET

Bert Kergin Makes Good With a Local Audience, While Minister of Lands Dissapoints

Hon. T. D. Pattullo, Minister of Lands, and H. F. Kergin, member for Atlin during the past four years, arrived in Stewart Sunday morning, and in the evening addressed a largely attended meeting in the Stewart Opera House, leaving for the south Monday night.

The Opera House was crowded to the doors, and the closest attention was paid the speakers, there being no interruptions in the way of heckling. Mr Pattullo skimmed over the accomplishments of the Liberal administration, but proved somewhat of a disappointment to those who know him as probably the best platform speaker of the province, since he held himself down to plain, almost colorless statements, without attempting to arouse any degree of enthusiasm in his audience, which he could easily have done. He has been working very hard since the campaign opened however, covering practically the whole of the province and addressing scores of meetings.

Bert Kergin, on the other hand surprised even his closest acquaintences by the improvement he has made in ease and eloquence since entering the legislative assembly. He told of pioneering in this town, and of what he has done in the way of securing appropriations in spite of the fact that this district did not support him in the last election. He promised that if he is returned he will, in the future as in the past, play no favorites, but to endeavor to gain every advantage for all parts of the riding, irrespective of sectional political preferences as expressed at the polls.

No More Men Wanted

On account of 40 workingmen arriving on the last boat, the Citizens Association have found it necessary to send advertisements to papers in Rupert, Vancouver and Victoria, telling men that there are more workers in camp now than there are jobs, and for the rest to keep away for the present at least.

Jack Fitzgerald of Fitzgerald Bros., locators of the Independence and other prominent properties of the district, returned Sunday from a winter's vacation in the south, and on Monday went up to the Independence.

METALS, MONEY AND PROSPERITY

IT IS SIGNIFICANT that the contraction in amount of national currency—of gold or of paper backed by gold or something of tangible worth; something that will buy anything and everything in the marts of the world—is always coincident with an economic decline and often a forecast of disaster. It is immaterial whether or not the gold is in circulation. It matters nothing whether advantage is taken of the government's promise to exchange paper money for gold; inaction in this respect merely indicates that the people have confidence in the national stability.

There is ample historical evidence to show that the failure of mining or the diminution in metallic reserves has been the signal for economic decay. Ancient Rome furnishes an excellent example. The silver discoveries in Mexico and South America had a very potent effect on the countries themselves and also on the nations that absorbed the output. The rise of Great Britain has been due largely to the accumulation of metallic currency and the success of mining operations all over the globe; her decline in recent years has been coincident with a diminution in metallic reserves. The economic chaos in Germany may be traced directly to the absence of currency of international trading value.

With the obvious facts in history available, it is difficult to appreciate the positiveness with which the abolition of gold as a standard is recommended by some as a cure for economic instability. Early in 1922 Mr. Ford suggested the issuance of national paper money, backed by nothing more tangible than the undeveloped water-power resources of the South. More recently Mr. J. M. Keynes, well known as the author of "Economic Consequences of the War," has published another book, "Monetary Reform," in which he affirms that the gold standard is a "barbarous relic" that is now "remote from the spirit and requirements of the age."

No logical alternative to the gold standard has been suggested, and those who advocate its abolition would do well to study history and note the close harmony that has always existed between prosperity and the accumulation of metallic reserves; and, conversely, the chaos that has resulted from depletion. Of course, one may say that the possession of gold naturally indicates prosperity; but several economists ahd near-economists appear to argue that national success may coincide with an absence of tangible reserves.

Statistics on the mining, use and resources of gold, silver, copper, lead and zinc will always offer a good index of national prosperity.---Engineering and Mining Journal-Press.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timber land, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on prescribed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes: minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment for stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Applications for grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free or partially free permits are available for settlers, campers and travellers with stock for personal use.

CITIZENS!

Forest Fires will destroy our tie industry, which last season produced over a million ties and brought half a million dollars into the district.

HELP PREVENT FOREST FIRES-- IT PAYS!

PLATINUM IN ALICE ARM

Platinum has been added to the long list of minerals found in the Alice Arm district, accorning to the Herald. The discovery was made by Archie McPhail, who sent samples of ore south for assaying. The samples were taken from the Rex property and the values obtained were platinum $4.80 and gold $10.80 per ton. Previous assays had gone as high as $17 in gold. The ore carries 97 per cent silica.

This is, as far as is known, the only ore sample in the district to be assayed for platinum. and the results obtained will undoubtedly encourage prospectors to have similar assays taken.

The Rex property joins the David Copperfield on the south, which joins the Dolly Varden. The vein from which the samples were taken is about eight feet wide. It is practically touching the Dolly Varden railway, thus ensuring easy transportation of supplies and ore shipments. With a 30-foot tunnel a depth of 75 feet can be obtained.

Not much development work has been done on the property, but it is the intention of Mr McPhail to do considerable work this year, which will consist chiefly of surface stripping of the vein, and open cuts.

ESPERANZA MINE SHIPS MORE ORE

Another shipment of ore from the Esperanza mine was made during the week, consisting of about 30 tons, says the Herald. The ore was all sacked and was hauled to the wharf over the Dolly Varden railway tracks. It was shipped to the Anyox smelter for treatment.

Work at the mine is being steadily carried on with a force of elght men. The ore vein is very consistent and the outlook of the property is encouraging.

All the ore now mined is being taken from the tunnel directly above the Baldy tunnel. A tunnel is now being driven from the Baldy workings to strike the ore vein now being mined, at a lower depth, and when this has been done increased shipments from the mine will be made.

ALICE ARM MINING HAS BRIGHT FUTURE

(Alice Arm Herald)

Although the prospects for the operation of the Dolly Varden mine are not particularly bright for this year, due to entanglements of the owners, it is evident that several properties will be operated this year.

The Homestake Mining Co. will commence development work on their property as soon as the snow is off and transportation available.

The Keystone Mining Co. will also commence operations on the Sunset property on Roundy creek as soon as supplies can be taken in.

Several mining engineers, representing powerful mining companies, are slated to visit the district this year and it is highly probable that properties that bave been inactive for the past few years, will be again developed.

Those connected with mining, continually stress the fact that plenty of capital is available for investment in mining properties, and with the high-grade showings, both on the surface and underground, coupled with the magnificent record of the Dolly Varden, there is no reason why Alice Arm properties should not be developed.

The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $76,962,203; Lode Gold, $113,352,655; Silver, $63,532,655; Lead, $58,182,661; Copper, $179,046,508; Zinc, $27,904,756; Coal and Coke, $250,968,113; Building Stone, Brick, Cement, $39,415,234; Miscellaneous minerals, $1,408,257; making its mineral Production to the end of 1923 show

AN AGGREGATE VALUE OF $810,722,782

The substantial progress of the Mining Industry in this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895, inclusive, $94,547,241; for five years, 1896-1900, $57,607,967; for five years, 1901-1905, $96,507,968; for five years, 1906-1910, $125,534,474; for five years, 1911-1915, $142,072,603; for five years, 1916-1920, $189,922,725; 1921, $28,066,641; for the year 1922, $35,158,843; and for 1923, $41,304,320.

PRODUCTION DURING LAST TEN YEARS, $350,288,862

Lode mining has only been in progress for about 33 years, and not 20 per cent. of the Province has been even prospected; 300,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

For Atlantic steamship sailings and further information apply to R. F. McNaughton, District Passenger Agent, Prince Rupert, B. C.

HYDER OBSERVES DECORATION DAY

Hyder residents celebrated Decoration Day, May 30, by clearing up the new cemetery and grading a road in to it from the main Salmon river road, thus fittingly observing the day that was originally set aside as a memorial to those Union soldiers who lost their lives in the civil war during the early '60's, and is observed in all the settled communities by decorating the graves of former soldiers and sailors.

The town of Hyder was deserted, the women and children making a picnic of the event, while the men did the heavy work of falling superfluous timber, taking out stumps and doing the necessary grading. At noon everybody had a big outdoor lunch, in the preparation of which Lon Doggett acted as principal chef. A mammoth mulligan and a corresponding pot of baked beans, camp style, formed the central attraction, but there were the finer accessories, usually associated with social functions of the effete Outside, such as ice-cream, angel-food cake, nuts etc.

The new cemetery site is located on the gentle slope above the "first rock cut" on the Salmon river road, about a mile north of Hyder, and is a vast improvement over the original site set aside by the Forest Service, which is in the midst of heavy timber on the river bottom, a mile further from town. In anticipation of a new site being selected, Frank Johnson, who died last winter, was buried there, and also Fred Dorey, Sam Fry and Wm. Murphy, who lost their lives in a fire that destroyed a cabin in which they were sleeping early in May. There are about a dozen graves in the old site, and it is possible that the bodies may be moved to the new cemetery some time in the future.

WANTED

Partner with some selling ability; must have some capital to put in a manufacturing business; ready sale here; must be young, not above 35. Apply Candy Man, Hotel King Edward, or write S. E. S., Box 3, Stewart, B. C. 2-2t
