LIBERALS WILL CONTROL HOUSE

Gain Enough Seats to Have Working Majority—J. C. Brady Wins Over Stork In Skeena Riding

Prince Rupert, Sept.16.—The election returns to date give the following results: Liberals, 119; Liberai Progressives, 11; Conservatives, 91; Progressives, 8; United Farmers, 11; Labor, 2; Independent, 2. Mr King will have 129 members pledged to his support, therefore the resignation of the Meighan Government is expected at the earliest possible date.

J. C. Brady, Coaservative, is undoubtedly electrd in Skeena riding. With a number of small polls to hear from, Mr Brady is today leading by something like 250. Later returns cannot make much change.

Election day passed quietly in Stewart, with both sides working hard to round up the votes. Stork carried the town by a majority of eight. A total of 366 votes was cast, the same number as last fall.

WILL PREMIER TAKE TORIC?

Louis Reynolds, well known oldtimer of Stewart and Alice Arm, arrived from the latter camp Monday night. He says there is a belief there that the Premier Gold Mining Co. are about to take over the development of the Toric mine. Bert F. Smith, superintendent of the Premier, recently examined the Toric, and on his suggestion some shots were put in that resulted in disclosing the richest ore ever discovered on that property. Mr Smith took 900 pounds of this ore out with him. Mr Reynolds says he was familiar with the Dolly Varden mine in its palmiest days, and that no ore ever produced by that famous property could excell that found in the Toric, in the quantity of native silver contained.

The Norco took out 41 tons of Riverside concenrrates.

Boy Scouts Cabaret Dance at 9:30 sharp in the Opera House next Friday night.

In the tennis tournament the Rolston cup for mixed doubles was won by Miss Muriel Crawford and James Morice.

A large shipment of material for a heating plant, and bathroom fixtures, for the men's living quarters at the B. C. Silver, arrived Saturday.

BIG SHOWINGS ON DALHOUSIE

Development work on the Dalhousie group this summer has disclosed the presence of three distinct ore deposits, all differing in character, but each worthy of extensive exploration. W.A.Pratt of Vancouver, who is heavily interested in the property and has spent most of the summer there, has brought in a display of samples from the various veins.

Most of the work has been concentrated on a vein that is about 20 feet wide and is heavily mineralized with iron sulphides and copper, the ore averaging about $25 per ton in all values. A cut was made across this vein and faced up to a height of 12 feet, and a tunnel has been started. This vein has been picked up 1000 feet further up the hill where samples taken assayed $54 with $20 in gold.

Another vein nine feet wide has been traced for a distance of 3000 feet and carries from 10 to 15 per cent copper and from 8 to 12 ounces in silver, with only a trace in gold.

An immense zinc deposit has been partially exposed by open cutting, but Mr Pratt says the extent of this can best be determined by diamond drilling which it is expected will be undertaken next year.

Before starting to mine, a good trail was built from the foot of the mountain to the property, and a log camp constructed at an elevation of 2200 feet. This work consumed considerable time but is of a permanent nature and an asset for the future.

SUCH IS LIFE IN STEWART

"Rap-rap-rap" resounded on the cabin wall.

"Darn that woodpecker" said the toiler to himself. He had been lying awake for five minutes trying to make up his mind to get up and light a fire.

"Rap-rap-rap."

The Rib awoke with a start.

"Who's there?" she demanded

"Rap-rap-rap."

"Who is it?"

"Rap-rap-rap."

"If you wont tell who you are and what you want, you can just keep on knocking."

So the woodpecker kept on knocking.

A daughter was born to Mr and Mrs J.M.Grey in the Stewart General Hospital at 11 p. m. Sept. 13.

Dalby B. Morkill is this week surveying the Marmot Metals Co. ground on the south fork of Marmot river.

PLEASED WITH CHIEF METALS

Highly pleased with their visit to the property of the Chief Metals Mining Co., situated a short distance southeast of the Big Missouri, and with the outlook for the district in general, a party of heavy shareholders left for their home in Seattle last Sunday after spending a week in the camp. They are: O. H. Ebbinghouse, president of the company and chief of the fire department in Seattle; G. Norton, company director and sergeant on the Seattle police force; W. Erickson and O. Carlson, hotel men.

Mr Norton, who spent sixteen years in the mines of the southwest states, is emphatic in his assertion that nowhere in the famous mining districts can the extent of mineralization and general value of the ores compare with the Portland Canal district. "If this section lay anywhere in the States," he said, "there would be a stampede that would surpass all records in the history of hard rock camps. The nearest I have seen to this is the old Leadville camp." Both Mr Norton and Mr Ebbinghouse are satisfied that in the Chief Metals they have a nice milling property, the latter declaring that there would be no question about providing funds to place the property on a productive basis.

Emil Davis, manager of the property, reports that the tunnel is now in 185 feet, following a vein that varies from four to six feet in width and carries values from a few dollars up to $65 per ton. The program laid out for next year includes the construction of a power plant and the installation of a compressor and machine drills.

RECONNOITERING TELEGRAPH TRAIL

The reconnaisance party for a route for a trail from Stewart to Telegraph Creek, left last week consisting of Tom McLean in charge, with Tim Williams and Alex McInnes, both men who know the back country well, having prospected and trapped in it for years. The party will first proceed to Meziadin lake, from which point they will explore the country over to Bowser lake for a better route than now exists. From Bowser lake they will try and locate the best route through to a point somewhere near the 9th cabin on the Telegraph trail.

Great satisfaction at this reconnaisance being made is felt locally. For years the News, the Stewart Board of Trade, and residents here as well as Telegraph Creek, have been trying to get this trail, which will make accessible a large, important country. It is hoped that next year construction of the trail will be undertaken.

GREAT FIND ON OUTLAND SILVER

What is declared by oldtime miners and prospectors of the district who have seen it to be a discovery of first magnitude, has been made on the Outland Silver Bar property near the head of Salmon glacier. This consists of uncovering an immense deposit of galena ore, lying between two dykes which, by actual measurement, are 125 feet apart, though whether the entire space between them is filled with the vein cannot be determined until a tunnel is driven and crosscuts run.

The find was made well up on the mountain and an open cut 12 feet in length put in without locating either wall of the vein. Two hundred feet down the hill from this some shots were put into the capping and the same character of ore disclosed. A tunnel has been started from this point, and it is possible that work upon it will continue during the winter.

C.F.Hibbard, a prominent fur man of Seattle, who has made a great deal of money in mining, is heavily interested in the Outland Silver Bar, and upon receipt of the news of this recent strike came up to see it. Last fall, when this vein was unknown, and before the present season's work had greatly improved the ore showings on the veins previously located, Mr Hibbard declared himself as determined to "go the limit" on this property. "I seem to have a faculty for picking winners," he said, "and am satisfied that this is another one."

Pat McBride, known all over the northwest as a successful prospector and a good judge of mineral properties, says the new vein on the Outland Silver Bar is the "biggest thing" he has seen in the country.

Farewell Party

Many Stewart people spent a very enjoyable evening at the home of Mr and Mrs S. Smith. The event was a farewell party to Geo. Rowland, who expects to leave Stewart next Sunday. It was a lively affair from the start, games and dancing occupying most of the evening. Many regrets were expressed at the loss of one who has become so much a necessary part of the community life.

SEATTLE CO. ON MARMOT

Thos. Campbell, well known mining man, who is heavily interested in the Marmot river section, returned from the south Monday night after an absence of more than a year, and will engage in active development on a group of Marmot river claims for a Seattle company. He will first examine the work done during the summer on the various claims of the group, and then decide upon his program, which is already determined to the extent of putting on a crew to work until the snow drives them off the hill. The result of this will to an extent determine the character and location of the development to be started next spring, for which the company have already provided funds.

However, should he be able to open up shipping ore in a spot from which the ore can be safely moved during the winter season, work will continue throughout the winter.

BIG TIME AT HICK DANCE

The Hick Hard Times Dance given last evening by the Stewart Basketball Club was a huge success. The club's splendid five-piece orchestra supplied the music for the crowded floor of dancers, and kept up the enjoyment until the wee sma' hours. The supper tables were placed down the center of the floor, on which a supper, served by the girl members of the club, of baked beans, with a keg of cider in a corner.

Original and comic costumes were the feature of the event, Ross Nicholson being the hit of the evening, dressed as a farmer shiek. (Some say it came natural to him.) A number of prizes were awarded, Jas. Morice getting 1st for gentlemen, as a chicken inspector, (for which position it is stated he is well qualified.) Miss Thelma Burleigh of Hyder won first prize for ladies' costume, being dressed as a hard times cow girl. The first prize in the lucky number dance was won by Margaret Jancowski and Bernie McDonald, and the second by Bonnie Campbell and Johnny Donahue. Three prizes were awarded in the next lucky number dance: 1st by Violet Watson and E.R.Stivers; 2nd by Mrs Blue and Mr Inkman and 3d by Miss Mutas and an officer of the S.S. Mogul.

The affair was declared by all to be one of the best, and great credit is due Miss Mary Tompkins for the organization.

The Club wish to take this opportunity of expressing their appreciation of the attendance of a large number from Hyder

SITUATION ON THE DUNWELL

Managing Director Tells of Plan to Raise $70,000.00 And Reasons for New Stock Issue

R.M.Stewart, managing director of the Dunwell mines, in a statement recently given to the Victoria press, said that any little excitement concerning the Dunwell can only proceed from a lack of knowledge of the exact situation of the company's affairs caused through wild reports and rumors.

Mr Stewart explained that in carrying out the plan of development, which included the erection of an up-to-date mill, power plant and tram line, provision is being made for blocking out ore bodies in the mine so that, once work is started, there will be no let-up from lack of ore supply. This makes it necessary, in the opinion of the directors, to have an additional $70,000, or ten per cent of the present capitalization.

The proposition for the absorption of this amount is to offer this to the present shareholders on easy terms, pro rata to the holdings they now have. This matter, the statement asserts, and the whole situation, will be laid before a meeting of the shareholders at the earliest opportunity.

The development account that has absorbed the surplus capital really constitutes an investment in the mine. It has been carried out under the instructions of Matthew Little, engineer in charge, and has been done to ensure a continuous supply of 100 tons of ore per day for the mill, the building of which has been completed and machintry ordered, the delivery and installation of which are now being awaited.

Geological Party Leaves

Having finished their work for this season the geological survey party headed by Doctor Hanson left for the south Saturday. Dr. Hanson's assistant, F.F.Osborne will go to Yale to complete the course for his Doctor's degree; the other members of the party, Robt. Henderson and Jas. Sinclair, have homes in Vancouver. The former is attending the B.C. U., and the latter is a graduate of that institutiou.

Service Club card party and dance tonight.

ELECTION COMMENT

THE election campaign is over, and Canada will be able to settle down once more to the business of development. A diagnosis is as yet impossible, situated as we are here in Stewart, yet a few things are clear. The people of Canada as a whole spoke on the 14th in no uncertain terms, vindicating the low tariff policies of the Liberal Party. Low Tariff and Free Trade thought would appear to dominate the Canadian People, except in sections. Quebec, with the memory of Sir Wilfred Laurier still fresh in the minds of the people, went practically solid Liberal. The Conservative vote predominated in the Maratimes, likewise in Ontario, though in this Province the Liberals made surprising gains. The Prairies ran true to their Free Trade thought, resulting in few Conservatives being elected. British Columbia, being fundamentally an embryo industrial Province, returned nearly a solid Conservative block, the Liberals losing two seats. This was the only Province in which the Conservatives made any gains.

The saying that there is nothing so uncertain as an election, was never more emphatically emphasized. Locally the opinion was prevalent in all parties that the Conservatives would carry the day throughout the Dominion, but when the ballots were counted the reverse proved to be the case. A preponderence of local opinion considered likewise Stewart town would result in a Conservative majority. This too proved a surprise, the Liberals getting a majority of eight. Again, many Conservatives agreed with the Liberals that Skeena was the safest Liberal seat in B. C., and practically impregnable, and that Fred Stork, the strong Liberal candidate, would be returned; but on the ballots being counted, here again was a surprise, Brady, the Conservative, in the riding as well as Prince Rupert, being returned by a, considering the strength of the Liberal candidate, substantial majority.

These three features can be considered the surprises of the campaign, from at least the local point of view.

One reason that we attribute to the Conservative defeat is the blocking tactics adopted by the Conservative Tactical Committee of the last Parliament. These tactics so disgusted a large section of the Canadian Electorate, alienating their support to the point that when on the 14th the opportunity offered to register a protest by the ballot, they were not slow in taking advantage of it.

The election has, however, aside from teaching a few lessons, cleared up a most unsatisfactory condition, in that it has given the Liberal Party a clear majority in the House, and so eliminated for several years to come at least, the curse of Group Government, such as Canada has had for the past 11 months. Mr King will now be able to form and carry on a Government, without being dictated to by a small group, representing a very small minority of the electorate. For this the country as a whole will be very thankful, and glad the election was brought about.

Through The Mails

The service of the Bank of Montreal is as wide and comprehensive as the postal system itself.

This service enables customers living in remote districts to transact their banking by mail as satisfactorily as if they could make personal visits.

Smile Awhile

Convincing Himself

Two backwoodsmen in Maine knocked at the door of a farmhouse in Maine. "Hello Ed!" said one of them to the farmer. "Say, we just come across the dead body of a man over there in the hollow, and we thought it was you."

"That so? What'd he look like?" asked the farmer.

"Well, he was your build —"

"Have on a gray flannel shirt?

"Yep."

"Boots?"

"Yep."

"Knee or hip boots?"

"Let's see. Charley, was they knee boots or hip boots? Oh yes, they was hip boots."

"Nope," said the farmer, "Twasn't me."

Solving the Mystery

The widow of a farmer, striving to keep the farm going, had difficulty with her hens, and wrote the following letter to the Department of Agriculture:

"Something is wrong with my chickens. Every morning I find two or three lying on the ground cold and stiff with their feet in the air. Can you teli me what is the matter?"

In the course of time she received this reply:

"Dear Madam: Your chickens are dead."

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASE

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

BRITISH COLUMBIA
The Mineral Province of Western Canada
Has produced Minerals valued as follows: Placer Gold, $77,663,045; Lode Gold, $122,808,459; Silver, $74,111,397; Lead, $89,218,907; Copper, $197,642,647; Zinc, $39,925,947; Coal and Coke, $273,048,953; Building Stone, Brick, Cement, $44,905,886; Miscellaneous minerals, $1,594,387; making its mineral Production to the end of 1925 show
AN AGGREGATE VALUE OF $920,919,628
The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895 inclusive, $94,547,241; for five years 1896-1900, $57,605,967; for five years 1901-1905, $96,507,968; for five years 1906-1910, $125,534,474; for five years 1911-1915, $142,072,603; for five years 1916-1920, $189,922,725; for the yea. 1951, $28,067,641; for the year 1922, $36,158,843; for the year 1923, $41,304.320 for 1924, $48,704,604, for 1925, $61,492,249
PRODUCTION DURING LAST TEN YEARS, $404,649,375
Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been prospected; 200,000 square miles of unexplored mineral-bearing land are open for prospecting.
The mining laws of this Province are more liberal and the fees lower than of any other province in the Dominion, or any Colony in the British Empire. Mineral locations are granted the discoverers for nominal fees.
Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.
Full information, together with Mining Reports and Maps, may be obtained gratis by addressing
THE HON. THE MINISTER OF MINES, Victoria, British Columbia.
N. B.—Practically all British Columbia Mineral Properties upon which development has been done are described in some one of the annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information. Reports covering each of the six Mineral Survey Districts are published separately, and are available on application.

OLD TRAGEDY IS REVEALED

What might be all the visible remains of a tragedy some years ago was found recently by R. F. "Dick" Sullivan and Jess Setterington on the glacier at the head of the west fork of Sutton river, which drains into Hastings Arm.

The glacier is about 1¼ miles wide, and while crossing it at a point some four miles from its foot, about half way across they came upon the remains of two canvas kit bags, two canvas coats a badly rusted automatic pistol, hair brush, rotten remains of underwear and other clothing, fishing rod and a rotten prospector's hand book. Close to the spot was a large, deep hole in the ice.

The clothing etc had the appearance of having lain on the ice for perhaps as long as nine years. Down near the foot of the glacier they found an old hand sleigh, some three miles from the clothing but with impassable ice between. The first articles had been scattered, as though the people to whom they belonged were in trouble and had left suddenly, going through their kit hurridly before leaving. The fact that no cooking utensils were to be found would support this theory.

If the men had been coming up the ice from Hastings Arm it is hardly likely that they would have left their sleigh at the foot, and if they had been going down the ice they would not have left their kit when they had a sleigh to take it on. Then again, the ice being bad between the two points, they would not have taken a sleigh over it; therefore the possibility offers that the sleigh and the clothing had nothing to do with each other.

The manner in which the clothing etc was scattered would indicate the possibility of some one having been lost in a fog or caught in a snow storm and run short of food, and as a result being badly up against it.

On the other hand there is the possibility of a quarrel or perhaps one man going into a crack in the ice, and the remaining man, having too much stuff to take out, left what he did not need, though even with this he would hardly have left his own as well as his partner's coat behind, as was apparently done.

Inquiries made among the old timers locally have failed to elicit any information as to men being lost in that section, but it is possible that they went up from Hastings Arm, in which case nothing would be known of them here, but might be found out from old-timers in Anyox.

Pure beer promotes true temperance

WHEN pure beer, as is the case of British Columbia, is available to the people, the drinking of liquors of high alcoholic content is lessened and true temperance is promoted. The legal, above-board and Government controlled sale of beer in British Columbia, in licensed premises by the glass and in Government stores by the bottle, has removed this Province from among the communities in which alcoholism is a factor of importance.

The attempt at total prohibition made in the United States early showed its complete bankruptcy from a moral point of view and its utter failure as regards enforcement. Now its ill consequences from a social standpoint are becoming evident.

To mention only one result, among seven million people insured by the Metropolitan Life of New York the death rate from acute alcoholism has increased 600 per cent. since the enforcement of prohibition was attempted. Which means that as pure beer was taken from the people an illicit trade in concentrated and easily handled liquor of high alcoholic content, and mostly poisonous, sprang up and drunkenness increased.

Recent deaths from poison alcohol, made from motor radiator spirit, in Ontario and New York afford an example of the harm of preventing the use of light beverages such as pure beer. This flood of death-dealing poison, naturally, did not affect Quebec, where pure beer is to be had by the people in the most free and open manner.

The people of British Columbia are protected against the danger that comes from making distilled liquors a beverage—for which they were never intended—and against the poison brews that flood the United States, for British Columbia is provided with pure beer by the five modern plants of the Amalgamated Breweries, the sale of which is supervised and controlled by the government throughout.

Pure beer is a healthful and invigorating beverage of a definite food value, with an alcoholic strength of 4½ per cent., as required by law in British Columbia, only sufficient to stimulate the digestive system in the most favorable degree. Its consumption, inasmuch as it displaces the drinking of strong distilled liquors, is a GUARANTEE OF TEMPERANCE.

The members of the Amalgamated Brewers are: Vancouver Breweries Ltd., Rainier Brewing Co. of Canada Ltd., Westminster Brewery Ltd., Silver Spring Brewery Ltd., and the Victoria Phoenix Brewing Co. Ltd., where the beer supplied to the people of British Columbia is made.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

Local News Notes

Miss Blanchard left for Vancouver Saturday.

Miss Elizabeth Pitt left for Rupert Saturday to resume her studies.

A. W. Pratt, of the Dalhousie Mining Co., left for Vancouver Saturday.

Twenty tons of Porter Idaho ore went out Saturday bound for a smelter.

D. W. McLeman received a shipment of blacksmith coal and cement Saturday.

A. and C. Manning of the Premier staff returned last Monday night from a trip south.

Joe Green returned from Seattle Monday night and left for Ketchikan Wednesday.

A. D. Steeds, on the mechanical staff of the Premier, returned Saturday from a trip outside.

Mrs J. V. Clegg left for Victoria Monday night, having received word that her mother is sick.

F. C. Winkler of Victoria, who owns considerable property in the Salmon basin, arrived Saturday to do some assessments.

P.E. Peterson, metallurgist at the Big Missouri, returned Saturday from a visit to his old home in Lead, South Dakota.

Mrs G.C. Andrew has received word that her sister, Mrs W.W. Wallace, formerly Miss Bess Clothier, of Woodstock, Ont., is the mother of twin girls.

Mr and Mrs Wm. Jancowski returned home Saturday. Mr Jancowski has been relieving the liquor vendors at Smithers and Terrace while they took their vacations.

A Woman's Logic

Mrs Jones cast an entirely new light—and, it may be, a wholly reasonable one—on the problem of women's dress the other night. She and Mr Jones were awaiting callers, and Mr Jones surveyed her new gown rather critically. "Isn't it a little extreme?" he suggested. "A trifle short and low cut?"

"Oh, I don't know," said Mrs Jones, "They are coming to see me, aren't they—not the dress?"

Magistrate (severely to old offender)—"So you've been fighting your wife again. Liquor?"

Prisoner—"No, she licked me.

"How long is it since you have been in a police court?"

"Twenty years, your honor."

"And where have you been since then?"

"In prison."

Watch found. Enquire News.

Local Stocks

(By H.W.M.Rolston & Co)

The most spectacular stock was Dunwell, which was very heavily traded in and as said in last week's issue, sagged very rapidly in the early part of the week but soon picked up again. There is a strong rumor that the Dunwell management intend placing a further 70,000 shares on the market to registered shareholders only at $1.00 per share. It appears as if this issue is in no way in connection with present development plans, but the management deemed it wise to have a bigger operating plan at the mine end.

The public are very easily stampeded in the Dunwell market, and the brokers are strongly advising the holding of Dunwell stock, as it is known that ore reserves are blocked out sufficient to run the mill the better part of a year, and also that there is plenty of cash to finish the mill, tram and power plant.

Marmot Metals was actively traded in, but the market stood up very well under some heavy offerings. It is reported that engineers who recently went over the property were very well pleased and it is quite possible this property may be turned over to a large operating company.

Through the hectic period of the Dominion election the local stocks held very firm, and higher levels are confidently looked for.

The market closed as follows:

	Bid	Asked
B. C. Silver	$ 1.95	$ 2.10
Dunwell	1.25	1.30
Glacier Creek	.07	.10
Independence	.06	08.

FROM
PRIZE
HERDS

Pacific Milk comes from prize herds but climate and soil is a great help to them. The pasture in Fraser Valley, the home of this good milk, is unrivalled. Our dairy cattle have a world-wide reputation. The Dominion Government has recorded their number, quality and production. Australia, United States and the Asiatic countries import them for breeding. Pacific Milk can be nothing but good.
