VOL. 7, NO. 52 STEWART, BRITISH COLUMBIA, FRIDAY, MAY 28, 1926 $5 THE YEAR—10c. the Copy

ANNUAL REPORT ON B. C. SILVER

The report of directors of the Selukwe Gold Mining & Finance Co. for the year ending March 31 1926, is at hard. The ramifications of this company are so extensive, mining as they are in all parts of the world, that their full report cannot be covered in the scope of a newspaper article. However, their operations as pertaining to the B.C.Silver, are here given in a fairly complete form.

(It is not our fault that Mr. Banks spells ore shoot "ore chute." We copy his report as written.)

C.A.Banks, M.I.M. & M., engineer in charge, says:

There has been no change since my last report in the holdings of B.C.Silver Mines, Ltd., which consists of:—

(1) A group of 9 claims immediately adjoining the Premier mine to the north, and containing the lateral extension of the Premier orezone for a distance of approximately 3000 feet, and, in addition, the extension in depth of a further 800 lateral feet of this orezone, due to the orezone dipping into the B. C. Silver ground, and

(2) A group of 8 claims adjoining the Premier mine on the south side.

Development

In the period under review we have prospected part of the orezone both laterally and in depth, the development work accomplished amounting to a total of approximately 6000 feet of tunneling and diamond drilling.

Lateral Exploration

The position on March 25th, 1925—the date of my last report—was that we had located by tunneling, one ore chute, and, after an apparent gap in the zone of about 1000 feet, we had located by diamond drilling from the upper or No. 2 level, several silicified areas carrying values which pointed to the existence of commercial ore in this vicinity

During the past year this area was diamond drilled from the lower, or No. 3 level, and it was finally attacked by advancing this level until a rich orechute was encountered.

This chute shows continuous ore on the level for a length of 200 feet—150 feet is of good milling grade, averaging, I judge, between $20 and $30 a ton over a width of about 10 feet, and the remaining 50 feet is high grade ore, 30 feet of which averages $200 a ton over 4 ft. 6 in. in width.

A second chuto of ore was next located, about 80 feet west of and apparently parallel ing the above mentioned chute. This has been drifted on for 50 feet and, whilst on the whole the values to date are not commercial, it nevertheless contains some milling ore, and the probability is that ore of better grade will be disclosed by further development.

Our diamond drilling indicates that further ore will be found in close proximity to the above

The N. E. extension of these ore occurrences will probably al[l] encounter a granite dyke beyond which there are good chances of further ore, as there also are in the country between them, which area I do not consider disproved by the small amount of diamond drilling we have so far done there.

There are also possibiilties of finding ore on the Texada Fractional mineral ciaim, which will be later drilled from No. 2 level.

A raise is now being driven to connect for ventilating purposes. This raise started in high grade ore which was lost about 30 feet above the level—the raise is at a steep angle, about 75 degrees, and it is probable that the ore is lying flatter than this, and that it will later be found to the S.E. of the raise. The present position however, is that poor ventilation compels us to push the raise through as fast as possible.

During the months of January and February we shipped 276 tons of high grade ore from development.

This ore had a gross value of $37,507, or approximately $135 per ton, in gold and silver, and the net smeler return amounted to $34,312.74.

The above developments are extremely important as they show that, after an apparent gap in the orezone of 1000 feet or so, we have found a repetition of the high prade ore chutes similar to those existing in other parts of the orezone.

The ore was encountered at a vertical depth of 650 feet below the surface, or, allowing for an estimated dip of 60 degrees, and for the slope of the hill, a depth of about 900 feet on the slope of the vein.

Development alone will tell us how these ore chutes will behave above and below No. 3 level, but inasmuch as the ore occurrences are typical of the ore chutes on the Premier property, the probability is that our chutes will behave in a similar mannes, and that on mining they will be found to be large chutes of irregular form, with no definite walls, and with very variable values.

A peculiarity of some of these orebodies is that, although the whole orebody may be commercial, there are spots where, due to the very uneven distribution of values, a diamond drill can be put right through the orebody without showing any values whatever—this is what often happens, and it is largely for this reason that the orechutes are so difficult to locate.

Extension in Depth

Due to the fact that the orezone dips N.W. and passes thru the boundary of the Simpson M. C. (Premier Company) into the B. C. Silver ground between the Premier No. 3 and No. 4 levels, we get on the Oakville Fraction the downward continuation of the orebodies existing on the Premier Simpson M.C.

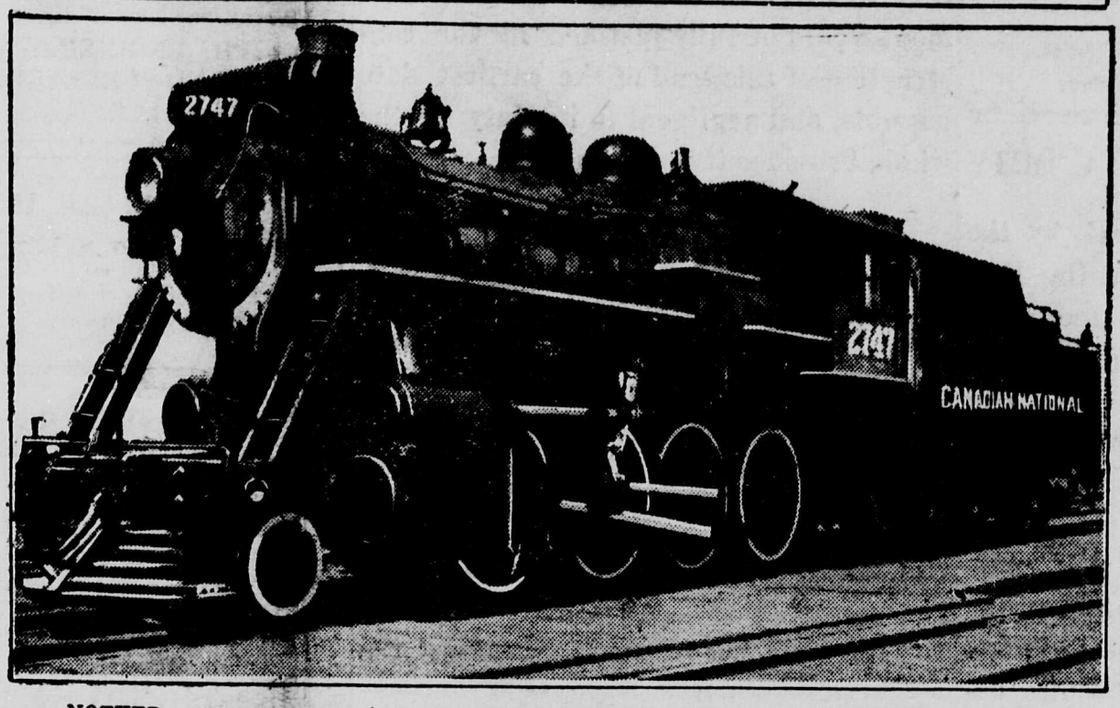
My report of last year stated that diamond drilling had proved values over a length of 200 feet in the area marked "B" on plan. Further diamond drilling during the year has increased this to approximately 300 feet.

In addition to this, the Premier Gold Mining Company are now mining a chute of ore between their No. 3 and No. 4 levels right on the boundary line. This chute is about 10 feet in width where I saw it and I judge from the mineralization that it contains good values.

We may later find that this chute will connect up with chute B and that we will get more or less continuous ore along the whole length of the boundary

(Continued on Page 3)

WESTERN CANADA'S FIRST HOME-MADE ENGINE



ANOTHER railroad milestone of Western Canada was passed on April 20, when the first engine ever constructed in this part of the Dominion was turned out of the Canadian National Railways Transcona Shops at Winnipeg, where it was built. Engine 2747 shown above was constructed entirely in the local shops, the work being done in addition to the regular output of repairs to other engines. After the various parts were made, the frames for the locomotive were laid down on March 11 and construction was completed on April 19th, a total of 27 working days, the first run being made to Winnipeg on the following day.

Number 2747 is classed as a 38% engine, is capable of main and branch line freight handling and has sufficient speed to run the Transcontinental. The weight of the locomotive and tender complete is 193 tons. After trial runs, it will be used on main line time freight trains on the Alberta district of the Canadian National, where the best use can be made of this class of locomotive and where the fuel saving devices with which it is equipped will give the most economical results. Number 2748, which is now in course of construction at Transcona, will be ready for service in Alberta in May.

STEWART-HYDER LOCAL NEWS

Harry Heywood, leading spirit of the Terminus, arrived from Victoria Monday.

J. V. Clegg returned Monday night from Victoria.

W. R. Tooth received six tons of galvanized iron to roof his hotels.

Harry Zeffertt, the clothing merchant, was welcomed home this week from England.

Mrs F. Pate of Vancouver is here with her son Kenny to visit for a mouth with her sister, Mrs Wm. Irwin.

Mrs W.R.Reid arrived Sunday from Victoria to join her husband, proprietor of the new Keith Hotel.

Miss June Brotherton of Minneapolis arrived Sunday and will spend the summer with her sister, Mrs Angus McLeod.

The road gang says the mosquitos are thick at Bitter Creek. Not so hungry as the thin ones. We have been told they sit upon the trees and bark, but W. H. Watson will have to verify this.

J.L.Freeburn, mining engineer from Seattle, who has the option on Victoria Mines, is here to look over the property. Mr Freeburn was interested in the development and operation of the famous Chichagof mine in Alaska.

SANDFORD—LEMPER

Chas. F. Sandford, U. S. Commissioner and manager of the Hyder Weekly Herald, and Mrs Louise Lemper, his linotype operator, were married last Tuesday morning in Stewart by Stipendiary Magistrate J. P. Scarlett. Thus is another instance of international amity recorded.

BIG BLACK BEARS BECOMING BOLD

Exploration work now being carried on under the supervision of R.G.Mellin M.E. on the property of the Georgia River Gold Mines Ltd. is meetifig with marked success. What is the assumed extension of the Southwest fissure has been increased for a distance of 900 feet and is now being crosscut at close intervals for the purpose of sampling.

The original inhabitants of the area, namely the black bears, have been doing their best to hold up operations by stealing food supplies, even going to the length of sneaking up and eating a man's lunch. Three of them have so far been shot without apparently disconraging the survivors.

MOVING SUPPLIES TO HYDER LEAD MINES

On Texas creek supplies are being moved into the camp of the Hyder Lead Mines Inc. and work is being started on the grading of a pack trail from the flat to the point selected for the erection of the mine camp. A full force will be put upon the driving of the main tunnel as soon as supplies can be packed through by horses.

For one week only, Constable Islip's furniture will be for sale at the Court House. Mr Islip's resignation has been accepted and he will move his family onto his Alberta ranch.

Alex McDonlad hurt his shin at Independence. Nurse Wells & Doc. Whillans fixing him up at hospital.

Printer has flu. Cant afford to go to hospital.

Basketball dance netted $93. Drummer named Rooney held winning ticket for $25.

YOUNG GEOLOGIST DIES IN PERU

William Donald Burton, geologist, died in Samne, Peru, on March 16. Mr Burton graduated from the University of British Columbia in 1923 and shortly thereafter was employed by the Premier Gold Mining Co. Ltd. as assistant geologist under the direction of A.H.Means, and later became geologist. During the winter of 1924-1925 he pursued graduate studies with distinction at the Massachusetts Institute of Technology, receiving the degree of master of science in geology. A part of the summer of 1925 was spent in field work in eastern Canada with the Canadian Geological Survey, and in the fall of the same year he went to Peru as assistant geologist and scouting engineer for the Northern Peru Mining & Smelting Co. It was on a field trip in Peru that he contracted the illness which proved fatal. His first and last contribution to geologic literature consists of a paper describing the Premier ore deposits. This article is to appear in an early issue of Economic Geology. In Mr Burton's death the mining industry loses a young man who at the outset of his career showed great promise and one who, had he lived, would have gone far.—Engineering and Mining Journal-Press.

All Moose Legionaires are expected to meet in Moose Hall next Friday at 8 p. m. W. R. Tooth, Assistant Herder.

TELEGRAPH CREEK TRAIL A DUTY

THE word received last week by the Board of Trade to the effect that the Provincial Minister of Mines will undertake this season the reconnaisance for a trail from Stewart to Telegraph Creek, can rightly be termed good news, for not only Stewart but also the country tributary to Telegraph Creek, for if this trail is so constructed as to enable the winter mails and travel to and from that interior district to come out via Stewart instead of as at the moment, by an 800 to 1000-mile detour via Atlin, development will be greatly facilitated and speeded up.

There is nothing tike isolation to retard the development of any new country. Cut 800 miles off even the winter travel to the Telegraph Creek-Dease Lake country, and watch it grow, and the revenue of the Government from it increase.

Such a trail as suggested would open a country for development as large in area as Vancouver Island, and just as rich in natural resources of minerals, coal, fur, land, timber and water power.

All that is required to make this trail a reality is the construction of a 20 or 30 mile link, and improvement of the existing trails. If this link is let by contract, in sections of two or three miles, or four at the outside, to men who want to stay in that country---and there are a number---it can become an accomplished fact; for an expenditure of some $30,000!

Have the present Provincial Government or the Governments of the past been justified in their expenditures for the development of Vancouver Island? If so, then why not an expenditure of $30,000 for the development of the country between Stewart and Telegraph Creek, as well as the territory tributary to that place, just as rich in natural resources?

How can the debt of this Province be reduced unless the revenues are increased? What section of the Province will increase the Provincial revenues as rapidly as the section that will be benefitted by this trail? NONE! Then the Government would be fully jnstified in the construction of thls trail at the earliest date possible, and negligent in its duty to the whole Province if it does not.

REASONS FOR EMPIRE DAY

We in Canada observe two national holidays, and it is well that we do, for they remind us of the great heritage which is ours, and the sacrifices made by our forefathers that we of this generation might enjoy the freedom and liberty, rights and protection, that we do. One of these is the 1st of July, and the other, celebrated last Monday, is the 24th of May, Empire Day.

It is well for us to pause in the rush of modern life and contemplate the meaning of these days. Empire Day, as is well known, originated in the annual commeration of the birth-day of that illustrious queen, Victoria, under whose beneficient soverignty the British Empire made such great strides, and at her death has been maintained as Empire Day, and as such rightly celebrated by the 518,684,000 people composing the British Empire, as the one day in the year by which to remind ourselves of the great heritage to which we are heir, with all its burdens and responsibilities spread over 18,344,111 square miles of the surface of this earth, embracing in its folds every known type, color and religion, peculiar to the peoples of this earth, from the most highly civilized down through every strata of humanity to the veriest savages.

General Smuts, that brilliant leader of the Boers 25 years ago, recently said: "The British Empire is the greatest force for peace that the world has ever known."

The Hon. Justice Field of the United States, speaking in Canada a few years ago of British law, justice and order said: "That is the secret of the British Empire—that it stands for order, for the sacredness of human life, for the protection of every interest, however humble....I am filled with wonder—you are part of a mighty Empire.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $77,382,953; Lode Gold, $118,473,190; Silver, $68,824,579; Lead, $70,548,578; Copper, $187,489,378; Zinc, $32,171,497; Coal and Coke, $260,880,048; Building Stone, Brick, Cement, $42,225,814; Miscellaneous minerals, $1,431,349; making its mineral Production to the end of 1924 show

AN AGGREGATE VALUE OF $859,427,386

The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895 inclusive, $94,547,241; for five years 1896-1900, $57,605,967; for five years 1901-1905, $96,507,968; for five years 1906-1910, $125,534,474; for five years 1911-1915, $142,072,603; for five years 1916-1920, $189,922,725; for the yea. 1951, $28,067,641; for the year 1922, $35,158,843; for the year 1923, $41,304,326 and for 1924, $48,704,604.

PRODUCTION DURING LAST TEN YEARS, $372,604,641

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been prospected; 200,000 square miles of unexplored mineral-bearing land are open for prospecting.

The mining laws of this Province are more liberal and the fees lower than of any other province in the Dominion, or any Colony in the British Empire. Mineral locations are granted the discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES, Victoria, British Columbia.

N. B.—Practically all British Columbia Mineral Properties upon which development has been done are described in some one of the annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Pacific Building, Vancouver, are recommended as valuable sources of information.

EMPIRE DAY

(Continued from Page 2)

Justice and Righteousness will make it last."

That noted enemy of everything British, Cardinal Manning, stated: "A greater miracle in the whole history of mankind I have never read of than that the numerically small British race should rule 240,000,000 (he could have said 315,000,000) of the Oriental races. So wonderful a phenomenon is not to be found in any record of the world.

Professor Muth of Munich, Germany, said: "A world Empire, such as the British, is the work of God—The British Empire was not created by human plans—But no other nation on earth can destroy the British Empire, for it is necessary in the defence of the liberty of the world."

And so can be cited in endless chain, tributes to our Empire and race, by friend and foe alike the world over; from Europe down through Africa, east through Persia, and across Asia, through every creed and color; the greatest miracle in the known history of mankind, carrying justice, freedom, liberty and progress to the ends of the earth A league of free peoples of every color, creed and stage of development, working out a high and still higher destiny, carrying the rest of the world in her wake.

Great reason have we for celebrating Empire Day.

ANNUAL REPORT ON B. C. SILVER

(Continued from Page 1)

line of the Simpson M. C. Although this part of the property will undoubtly yield a considerable tonnage of good grade ore, it must be remembered that this is not immediately accessible to us, as it will have to be reached either by a shaft or a low level tunnel.

Equipment

An air compressor of 1000 c. f. capacity is now being erected, and will probably be in use early in April; in this connection the mine is now being relaid with larger air mains.

An electric storage battery locomotive is being installed.

A short aerial tram was installed from the portal of No. 3 tunnel to the road, ¼ of a mile below, to facilitate the handling of high grade ore, and an additional bunkhouse was built.

South Group

The rocks on this group are similar to those existing on the B. C. Silver North Group, and there is an attractive shear zone cutting across it.

During the summer of 1925 we commenced a surface contour survey of the group, and this is now about half completed.

This work will be of assistance in later helping us to intelligently prospect the ground.

General

The ore bodies have been found as a result of close study of the geological conditions and a comhensive and systematic program of tunneling and diamond drilling of the ore zone, which scheme of development was decided upon after we lost the first ore body marked "A."

The present position is that five ore chutes have been located to date. Some time in April we will have our new equipment installed and we will then be able to develop more rapidly, and in this way we hope to quickly put the property in a position where we can figure ore reserves.

Conclusion

I have to thank the Premier Gold Mining Company for the assistance they have rendered us during the year.

I am pleased to record the excellent and loyal service rendered by the mine superintendent, C. B. North, and his staff, and I wish to thank the Selukwe directors and shareholders for their steady support over the long period which has been necessary to develop the property into a mine.

Consider

If Dunwell in May, 1925, was worth $4.50, with very little cash in hand and practically no treasury stock, and capital of $350,000,—

What is Dunwell worth the present day, with $275,000 available for mill, tramway and development?

The present market on this stock is around $1.75 to $2.00.

This is the third time Dunwell has offered an opportunity in Canadian Mining Investments.

WATER NOTICE
Diversion and Use.

TAKE NOTICE that Northland Mining Company Limited, Non-personal Liability, whose address is 405 Dominion Bank Building, Vancouver, B. C., will apply for a licence to take and use Twelve (12) Cubic Feet per second of water out of Goat Creek which flows northwesterly and drains into Daisy Lake about 500 feet north of Troy Mine Camp on Salmon River, Portland Canal Mining Division of British Columbia, about 22 miles north of Town of Stewart.

The water will be diverted from the stream at a point about two Thousand (2000) feet east of Troy Mining Camp at head of the falls between Dilworth Glacier and head of Canyon on Goat Creek, and will be used for Mining, Milling and Power purposes upon the Mine described as The Troy Group of Mineral Claims as recorded at the Office of the Mining Recorder at Stewart, B.C.

This notice was posted on the ground on the 19th day of April, 1926.

A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed in the office of the Water Recorder at Prince Rupert, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

The date of the first publication of this notice is April 30, 1926.

Local Stocks
(By H.W.M.Rolston & Co)

On authentic information being made public that the Premier interests had dropped negotiations for the Indian, there was a heavy slump in this stock. As this stock was purely a gamble, all the large shareholders appear to be quite ready to take their losses, and in consequence large blocks are being offered with very few buyers. Until some future program is outlined for the Indian, even lower prices than at present prevail are looked for.

Dunwell is showing marked signs of advancement. This stock is becoming very tightly held, and more and more by the investing public. Reports from the mine are more than favorable

Independence appeared very active on the southern markets, undonbtedly caused by the facts that the company's property is being examined by American capital. In consequence higher levels are looked for in this stock

L &L showed continued weakness with very few buyers in the market.

Porter Idaho was in slight demand on the southern markets, but the price being too low to tempt any of the large shareholders.

Premier continues to hold at the new low levels, though by previous records the present low price on this stock is only temporary,

On the rumor spreading that B.C.Silver had run into some exceptionally high grade ore, this stock was brought into demand locally at higher levels.

The market closed as follows:

	Bid	Asked
B. C. Silver	$ 2.00	$ 2.15
Dunwell	1.90	2.10
Glacier Creek	.10	.13
Independence	.08½	.10

80,000 WOMEN USE PACIFIC

Pacific Milk is used by some 80,000 women, or rather cooks, for camp chefs use a great quantity too.

This approval by four in five of the women in the territory where Pacific Milk is available, is proof of its better quality and more natural flavor.
