Too many people pray for things that they too lazy to work for

The Grand Forks Sun

And KETTLE VALLEY ORCHARDIST

TWENTY-FIFTH YEAR—No. 30 "Tell me what you Know is true I can guess as well as you." FRIDAY, MAY 28, 1926

HEADS RED CROSS SOCIETY
Dr. James Lyons Biggar of Toronto has been appointed chief administrative officer of the Red Cross in Canada, with the title of Chief Commissioner. At various times he practised medicine in Ontario, Edmonton, and Victoria, B.C., and was medical officer to the 88th Regiment during the war. Dr. Biggar is a grandson of the late Sir Oliver Mowat.

REGULAR SESSION OF CITY COUNCIL

The eegular meeting of the city council was held in the council chamber on Tuesday evening, the mayor and all the aldermen being present.

The board of works reported that the repairs in the Munson block had been completed, and that Columbia avenue had been been put in good condition.

An offer from W. J. Barton to rent lots in block 4, plan 23, was accepted.

The fee of $5 for license iesued fo Ruth Hesse was ordered refunded, Miss Hesse having secured a position and not used the licenae.

The resignation of Ald. Liddicoat as engineer in connection with cement sidewalk construction was accepted and Ald. Donaldson was appointed to fill the vacancy.

The necessary bylaws in connection with a cement sidewalk on the south side of Winnipeg avenue, adjoining block 35, plan 72, were introduced and given their first reading.

The annual mayor's remuneration and the aldermen's indemnity bylaws were introduced and given their first three readings.

MUTUAL WILL BUY FRUIT IN OKANAGAN

Vernon, May 27.—President E. J. Chambers declined to be interviewed regarding the outcome of the negotiations which it is reported were made by the Associated Growers to buy the Mutual Brokerage houses.

From other quarters it has been learned that the Mutual Brokers are not going to disappear but will continue to operate on the prairies. There will be this difference, however, they will not there represent any Okanagan valley shippers. They will handle Okanagan valley fruit however, and to secure it they will send a buyer into the valley. Fruit will be purchased here and shipped to the prai ies for distribution. By this orrangement it is hoped that difficulties and losses which have in the past been a fruitful source of contention will be eliminated. Under the new arrangement it is expected that the Associated will, as heretofore secure a fair share of the business.

First Shipment of Naramata Cherries

Naramata, May 27.—J. Littlejohn made the first shipment for the year of Governor Woods c erries on the 27th inst. This is eight days earlier than last year and is, as far as is known, the earliest date for Naramata district.

VICTORIA DAY FIELD SPORTS

Following are the results of the field sports held in this city last Monday:

Boys' Race, under 8—Geo. Olson 1st, R. Kidd 2nd, Gordon Wiess 3rd

Girls' Race, under 8—Mary Kuva 1st, Velva Docksteader 2nd, Jean Kastikoff 3rd.

Girls' Race, under 8—Anduka Peterson 1st, Gladys Clark 2nd, Bernice Hull 2rd.

Boys' Race, under 10—D Waterman 1st. H. Wiess 2nd, Gordon Mudie 3rd.

Girls' Race, under 10—Lucille Donevan 1st, M. Love 2nd. Phyllis Simmons 3rd.

Girls' Race, under 10—Edna Scott 1st, Fern Henniger 2nd, Dorothy Innes 3rd.

Ladies' Race—Mrs. S. Hull 1st, Mrs. Farnsworth 2nd, Mrs. J. Kuva 3rd.

Boys' Race, under 14—Colin Graham 1st, M. Bailey 2nd, J. Allen 3rd.

Girls' Race, under 14—E. Innes 1st, Hazel Mason 2nd, M. Patterson and Reila 3rd.

Sack Race—H. Bailey 1st, L. Bailey 2nd, C. Scott 3rd.

Three legged Race, boys—Sonny Patterson and D. Waterman 1st, R. McKinnon and A. Deporter 2nd, James Robertson and Chester Hutton 3rd.

Girls' 3-legged Race—K. Davis and J. Mitchell 1st, Effie Donaldson and Jean Gray 2nd, Wilma Davis and Myrtle Mitchell 3rd.

Relay Race—W. Ronalds, Mason, Manson and Tutt 1st; D. Biddlecome, Jim Miller, E. Hutton and C. Ruse 2nd.

Three-legged Race, over 12—E Hutton and J. Miller 1st, Roy Cooper and Elmer Scott 2nd, Jim Robertson and H. Bailey 3rd.

Girls' Sack Race, 1—M. Dorner 1st, L. Donevan 2nd, K. Dorner 3rd.

Girls' Sack Race, 2—Florence McDonald 1st, M. Patterson 2nd, G. Mitchell 3rd.

Bicycle Race—R Sullivan 1st, Jim Shannon 2nd, Chas. Shannon 3rd.

Boys Under 16—W. Ronalds 1st, Geo. Manson 2nd, Jim Miller 3rd.

Girls' Race, 16—E. Collins 1st, E. Inn s 2nd, H. Mason 3rd.

In the baseball tournament Chewelah won first money and Colville second.

Great Poet's Cottage Now Free From Smoke

When William Shakespeare was eighteen years old in 1582, he ran away and married Anne Aathaway, in whose cottage at Stratford-on-Avon the young couple set up housekeeping. Anne cooked for her poet husband upon a crude kitchen hearth, and on rainy days the chimney smoked. He would complain, and she would scold.

If the Shakespearean hearth had not smoked, the course of literature might have been changed. The modest Hathaway cottage became a shrine for pilgrims from all over the world. Recently a new caretaker was installed who refused to cook her tea upon the aacient smoky hearth. In a tiny alcove off the kitchen a gas stove has been installed. The kitchen remains as it was when the great poet's bride used it, but for the first time the blackened ceiling beams are free from the haze of smoke that has clung around them for more than 300 years.

Sir Henry Thornton Congratulated on Reduction of Rates

Ottawa, May 27.—Estimates for the Canadian National railways were taken up by a special house committee on national railways today. Sir Henry Thoruton, president Canadian Nati ual railways, discussed the annual report of the road, iu which he thought the most gratifying feature was the saving in transportation cost, together with reduced cost of maintenance of ways. The fact that there had been a reduction in both, is said to mean that the reduction in maintenance cost has not been effected by letting the road deteriorate. Sir Henry Drayton congratulated Mr. Thornton on reduction in t ansportation cost.

The average young man makes love to a girl because he thinks she thinkf he ought to.

A contested will is a sort of hand-me-down suit.

PROTECTING THE MINE WORKERS

Victoria, May 27.—Regulations designed to provide still greater measure of protection for workers in the metalliferous mines of the province have just been approved and promolgated by Hon William Sloan, provincial secretary and minister of mines. These regulations cover every phase of the storing, handling and use of explosives in the metal mines of British Columbia. Hereafter none but properly qualified men holding certificates will be permitted to handle powder and conduct blasting operations.

Under the new regulations it is provided that every man handling explosives must undergo an examination by a mine inspector and hold a certificate from that official indicating that he is possessed of the necessary qualifications. Provisional certificates may be issued by the superintendent of the mine for a period not exceeding ninety days, or until the next visit of the inspector of the district, who will re examine the man and assure himself of his qualifications. Heretofore practically any worker has been allowed to handle and use explosives without restriction. Under the new system now being brought into effect all responsibility for the proper use and handling of explosives rests upon the man to whom the certificate is issued. It is his duty to see that the magazines for storing explosives are properly constructed, in accordance with the regulations and satisfactory to the mine inspector; that a supply sufficient for not more than twenty-four hours is allowed underground; that no naked lights shall be taken into any magazine or place where explosives are kept and, in general, see that the regulations are properly lived up to. All explosives used in the mine must be labelled with the date of manufactuee; it is prohibited to convey blasting caps and blasting powder together into the mine; restrictions are placed upon the thawing of explosives to the end that greater protection to the workers may be given. The operations of blasting are covered by the new regulations in strict manner, and, in fact, every phase of blasting operations is covered.

While the regulations call for a certificate being held by a person conducting blasting operations, it is provided that a prospector having charge of not more than twelve workmen and being in possesston of a special permit authorizing him to carry on blasting operations for quarrying, trench cutting and general surface prospecting, issued by the inspector of mines for the distr ct in which such prospector is at the time working, may conduct such blasting operations without being the holder of a certificate required under the regulations.

The applicant for a permanent blasting certificate must produce satisfactory proof that he is properly qualified to conduct blasting operations.

Logic either proves or disproves all things, but it doesn't accomplish any of hem.

Putting temptation to flight isn't as heartfelt as repentance,

FRANK HODGES
Secretary of the International Federation of Miners, who is engaged in lining up the unions in other countries to support the British miners. He was a member of Ramsay MacDonald's Cabinet.

RETIRING BANK MANAGER GI[illegible] GOLD W[illegible]

A very pleasant incide[illegible] in the private office of [illegible] Spink, of the local bra[illegible] Royal of Canada, last Mon[illegible] about twenty patrons of [illegible] gathered around the retiri[illegible] ger and presented him wit[illegible] some gold watch and [illegible] expressing regret at his [illegible] H. E. Woodland acted [illegible] man for the party, a[illegible] presentation speech and [illegible] address. Mr. Spink thanked the donors very heartily for the handsome present and assured them that he and Mrs. Spink would continue their residence here.

Following is the presentation address in full:

Grand Forks, May 24, 1926.

Geo. A. Spink, Esq., Manager, The Royal Bank of Canada, Grand Forks, B. C.

Dear Mr. Spink.—The undersigned customers of the bank have learned with regret of your retiremeht from active service with the bank and wish, at this timr, to express our appreciation of the courteous, capable and efficient way in which you have discharged the duties of manager of the Grand Forks branch over a period of many years.

We are glad to know that you plan to contoue your home amongst us and that our pleasant personal relations are not to be severed That Mrs. Spink and yourself may enjoy many happy years amongst us is our earnest wish.

In token of our personal regard and remembering your kindly interest in and painstaking attention to our business affairs, we ask you to accept this watch as a memento of the conclusion of a most honorable business career. Sincerely, Geo. D. Clark, H. E. Woodland, J. R. Mooyboer, Geo. H. Hull, E. Vant, O. G. Dunn, M. Henderson, Donald McCallum, H. H. Henderson, H. C. Kerman, J. Willis, J. P. C. Wright, S. R. Scott, John A. Hutton, A. D. Morrison, Geo. B. Garrett, E. C. Henniger, Ernest F. Laws.

Must Renew Mining Licenses May 31

Mining licenses in British Columbia expire on May 31 and if not renewed by that time holders of mining properties sacrifice their titles to properties.

Cherry Picking Time at Osoyoos

Cherries on E. R. Dawson's ranch at Osoyoos are being picked. They are of the Governor Wood variety and ripened May 6, five days earlier than last year.

"Picturesque America" Includes Picturesque Canada

1. Twin Falls, Yoho Glacier. 2. A Raft of Fun—Lake O'Hara.

Can you imagine a span of a thousand million years or so? If you can, try to picture to yourself the place where the Rocky Mountains now stand, with their snow-crowned peaks towering into the sky, at the bottommost depths of an inland sea.

Do you know how the Rockies were formed? By what Titanic forces these great masses were crumbled and folded and lifted high in the air?

It is a most interesting story that geology tells us concerning the formation of this gigantic range through the ages—aeons before the human race dwelt upon the earth, and only one of the many other fascinating things that one learns about one's own land, in "Picturesque America," a de-luxe volume, superbly illustrated with 500 photographs and charmingly written, which has been published recently by "The Resorts and Playgrounds of America," New York.

It is a compliment, and not one undeserved, to Canada, that this book, which describes so clearly and well, the wonders and beauties of the parks and beauty spots of North America, should give over more than one-quarter of its space to Canada's great playground. Yet it cannot but be recognized that her parks are unique in their magnificence of form and beauty of color, in their preservation of game and wild creatures, and in their possession of great virginal forests and vast regions as yet unexplored.

The National Parks of Canada are 14 in number and range in area from a few square miles to 4,000 square miles. For the most part they are found in the western part of the country; while the three most beautiful Rocky Mountain parks, Banff, Yoho and Glacier, lie along the main line of the Canadian Pacific Railway.

Many well-known writers, such as Robert Sterling Yard, Zane Grey, Mary Roberts Rinehart, Henry Van Dyke, Charles Lummis, Arthur Stringer, Mary Carolyn Davies, and J. B. Harkin have contributed to this volume, which maintains a high standard of literary quality throughout. Verses of nature by equally well-known poets are scattered throughout, and there is added a complete index and bibliography. Hence besides the charm of the book it is invaluable as one of reference. It would seem that its purpose—to make better known and thus better appreciated the scenic marvels of America's wonderlands, must be accomplished.

Notes • Notions • Notables

British Columbia's mineral production for the year 1925 is valued officially at $61,492,-242. In 1924 the total value was $49,704,604. This means that tnere was an increase of $12,-787,638, which incidentally works out at 26.2 per cent—a notable record. When production just tipped the $40,000,000 mark in 1916, the peak year of the war as far as mineral supplies from this province were concerned, the total was regarded as one that it would take a long time to pass. That was a year of highest prices ever paid and the sum received was no indication whatever of volume production. But as soon as the country returned to a peaceful basis new development took place and normal prices returned. What amount of work has been done in the last few years is reflected in the value of the output for 1925, the most pleasing feature being the enormous comparative increase during the year over the former and, still more when values are taken into full consideration, over the great year of 1916. The final figure for 1925 which has just been published is an excellent form of advertising for British Columbia. It assures the outside investor there is plenty of opportunity for his money to work with the prospect of good returns.

In Mexico the ministry of education resents the introduction of jazz, saying it is degrading and corresponding to the taste of savage tribes. Mexico is making efforts to discourage the spread of this American form of music among the younger generation.

Even birds have their romances and tragedies. Snow King, a mammoth white Canadian snow goose, was hunted for three years before a Kansas man finally shot him down. It was a triumph for the hunter, but it caused a love tragedy for what is believed to have been Snow King's mate. After Snow King's death another Canadian snow goose was observed paying frequent visits to the place where the first bird had made it fight for life. If it was love and fidelity that brought the second bird to the scene the tragedy has now been completed, for Snow King's mate has paid with its life.

Too much dependence is placed on "they say," which oftimes is worse than no authority at all. As a result some people "know" many things that are not so. Personal knowledge only is foundation for opinion.

Hazel Hannah Hitt of DeKalb, Mo., has a quilt at her home which she never uses. It just descended from one generation to the next. It is now two hundred and ten years old, having been brought to the United States in 1715. Hannah is a favored and persistent name in the family. Six Hannahs—Miss Hazel being the sixth—have owned the quilt.

In settlement for a large order of engineering material Soviet authorities of Russia sent a shipment of 3,000,000 eggs, the contract calling for payment "in kind."

Captain Wall, trainer of crocodiles, recently rode across the River Rhone at Valence on the back of one of his 400 year-old pets Though the captain used a cane to stimulate the speed of the crocodile, more than twelve hours were required to make the crossing. Happily, however, the crocodile's attention was not distracted by any floating objects n the river, as was that of the crocodile of which Alphons Allais wrote—by a pocketbook Allais' crocodile identified the skin of its mother in the material of the pocketbook, and shed many crocodile tears.

Prof. Max Meyer of the University of Missouri has invented an organ with which it is possible to play music written upon a scale of 24 notes instead of the usual 12 The tip of each key is detached on the instrument and when depressed produces a tone halfway between that of the key of which it seems a part and the next lower one.

Miss Emma Millette has become a sucessful business woman in Buffalo, N.Y., by realizing, early in her girlhood, how important the smallest details may be in the largest scheme of things. A New England factory worker, Miss Millette was a finisher who spliced together broken threads in cloths and rewove them into the fabric. Now she is head of a cloth weaving company which mends holes in clothing. In 1915 when in Trenton, N. J., she was out of work and unable to find employment. Then it occurred to her that if cloth frayed in the making could be repaired so that no trace of the break remains, then the cloth of worn garments could be made whole. She had a few cards printed announcing that she could weave over holes in torn, burned or worn clothing so that the damage would be invisible. Immediately she was overwhelmed with work. But the process of repairing fashioned cloth was not the same as that involved in repairing cloth in bolts, she discovered, and she gave up her Trenton business to go to New York city, where she found a job and in the evenings studied cloth and the various methods of making it. Next she trained young girls in the processes she had worked out. "The secret of good mending lies in the splicing and the weaving of the pattern," she said. "It takes five years for one to learn the process thoroughly, but once learned it is a valuable asset."

Father C. M. Heredia, a Jesuit priest at St. Francis Xavier's church, in New York city, has perfected a machine called a microvibroscope, which, he says, measures the infinitesimal vibration of the human body. The markings made by the machine, he asserts, analyze moods and personalitis and detect ailments. Two persons suffering from the same disease, he says, will produce similar curves on their charts.

Poems From Eastern Lands

China

Moral Lessons From Natural Facts

All true words fly, as from yon reedy marsh
The crane rings o'er the wild its screaming harsh.
Vainly you try reason in chains to keep;—
Freely it moves as fish sweeps through the deep.
Hate follows love, as 'neath those sandal-trees
The withered leaves the eager searcher seas.
The hurtful ne'er without some good born;—
The stones that mar the hill will grind the corn.

All true words spread, as from the marsh's eye
The crane's sonorous note ascends the sky.
Goodness throughout the widest sphere abides.
As fish round isle and through the ocean glides,
And lesser good near greater you shall see,
As grows the paper shrub 'neath sandal tree.
And good emerges from from what man condemns;—
Those stones that mar the hill will polish gems.

—From The Shi-King.

Ancient History

[TAKEN FROM TWENTY-YEAR OLD SUN FILES.]

The new Windsor hotel is shortly to be opened under the management of A. B. Sloan, an experienced caterer of Nelson.

The first stage of the twice a week service left this city for Franklin City at 7 o'clock Tuesday morning.

B. Lequime of this city is applying for a liquor license for a hotel at Franklin City.

The Boundary district led the province in ore production for 1905, according to a report just issued by the provincial minister of mines.

Edwin R. Shannon and Miss Ella Clark, second daughter of Mr. and Mrs. Robert Clark, were married on the 24th in Holy Trinity church, Rev. Henry Steele performing the ceremony.

John Heron, the well known ssenographer and bookkeeper at the Granby smelter, has entered into a partnership with N. D. McIntosh in the hardware business.

The first hutel iu Franklin City is now being erected.

HON. WILLIAM E. PERDUE
Chief Justice of Manitoba, is to be honored by Toronto University at the annual Convocation on June 3, when the honorary degree of Doctor of Laws will be conferred upon him.

A. M. Jonnson, President of the Canadian Club of Boston, visited Montreal for the first time on the new "Redwing" train now running between the two cities on Canadian Pacific lines. In telling of the charitable and naturalization aid given Canadians by the Canadian Club of Boston, Mr. Johnson said there were some 900,000 Canadians in the State of Massachusetts. Of this number 80,000 are in Boston.

Sir Esme Howard, British Ambassador to the United States, stated on his arrival in Toronto on a C.P.R. train that the question of European peace was the most urgent and immediate problem of the day. It was necessary for Great Britain to assist in maintaining peace and the League of Nations offered a suitable vehicle. Sir Esme claimed that if the League disappeared England would be compelled to join some European combination against any country which threatened to dominate the continent.

Net earnings of the Canadian Pacific Railway for March were $2,-824,177, an increase of $706,965 over the same period last year, and the best March net since 1918. For the three months ending March 31 net earnings were $6,531,067, an increase of $2,675,385 over the corresponding period of last year and the best showing for the three months since 1917. Gross earnings for March were up $1,330,271, while expenses increased only $623,306.

The development of tourist traffic to the Dominion has been one of the most noteworthy events of the Canadian economic situation in the post-war period. Holiday makers of the United States apparently find Canada's vacation charm irresistible as the number of visitors shows large increases every year. In 1925 2,-429,144 United States' automobiles entered Canada for touring purposes, as compared with 1,889,210 in 1924. A new record is expected this season.

YOUNG AT 50

Dr. Legard's New Life Tablets

Imparts to the Old and Middle-aged **Youthfulness, Energy and Fitness,** retards mental and physical decay, thus promoting longevity, Preserves the arteries and tissues, Sufferers from Deafness with its many distressing accompanying ailments, as Head noises, deriveal most immediate benefit. Calm refreshing sleep assured. Gloom, Depression and Nervousness is banished under the influence of these Life-giving Tablets Wrinkles, hard lines and blemishes disappear. The skin becomes clear, light and elastic and the complexion bright and smooth. Think of the blessings of perfect health, the possesion of few; the joy of a clear Youthful appearance and tingling blood, of lustrous hair, bright eyes and health tinted cheeks; the beauty of radiant life and the realisation that Time has been put back Ten years to the envy and admiration of your friends, and the unbounded satisfaction of yourself. Can you allow a golden opportunity like this to pass? Remember there are no arduous rules to follow, no restriction on diet, nor are there any ill effects after. On the contrary it gives the entire system a feeling of exhaltation with increased mental and bodily vigour. Why not look and feel **30** at **50?** Do not delay, commence the treatment at once. You will never regret the slight cost incurred for such incalculable benefits. The price of these Marvellous Tablets including Mail Charges is **3 Dollars** per bottle, dispatched in plain wrapper on receipt of amount.

Putting Farm Work Horses in Condition

© Underwood & Underwood.
Harvesting small grain in the great Northwest.

Progress in farm field work in the coming months depends largely on the condition of the work horses. Soft from the winter's rest, farm work horses require conditioning just as an athlete requires training for his test.

Every farmer knows that two or three weeks spent in a gradual toughening and conditioning of a horse for the heavy work is more than made up before the season of heavy field work is over. Not only does this conditioning include breaking them in to the long hours of hard pull that they must undergo, but applies as well to breaking them in to a working ration.

It is poor practice to allow a horse to pasture on much new lushy grass if he is to go on a strenuous work schedule. A little grass is good for him, helps to condition him, but he must have oats, bran or old corn, or still better, a combination of the three and good sound hay. These are the best possible rations in the spring and early summer. The horse that is fed a major ration of grass soon gets soft, sweats profusely, lags and quickly plays out. Oats, bran, corn and hay will give him stamina and leave him in the best condition at the end of the day.

By treating old Dobbin fairly, getting him ready for spring work with daily exercise, keeping him thoroughly groomed, especially while shedding, and a work ration instead of his winter feed will pay big dividends in a short time.

If the horse takes a long time to shed his coat, this can be facilitated by thorough, frequent grooming and if this does not do the work, a clipping all over will get him through the shedding period quickly. After the horse has started to work in the field, it is advisable to bathe the shoulders and neck two or three times daily with cold, soft, salty water or with white oak bark tea which toughens and cleanses the chafed parts.

A prominent veterinarian states that excessive sweating is remedied by clipping the horse. Excessive sweating weakens the animal and it is doubtless quite advisable to clip him to relieve this condition. It is also true that this practice enables the horse to be thoroughly groomed in much less time than when it retains its long winter coat of shaggy hair.

Citizens of Grand Forks are asked to note the following extracts from the 1925 Amendments to the Hospital Act:

(4) Where there is, either within or without the limits of any municipality, a hospital which is maintained by the municipality, or to the support of which the municipality is chief contributor with the exception of the Crown, the municipality shall not be liable in respect of any patient treated in any other hospital, except in cases of emergency, or where the hospital so maintained or supported is not in a position to furnish the special treatment necessary for any certain patient, and authority for that patient to apply for admission to the other hospital has been given by the Mayor or Reeve or some duly authorized officer of the municipality, in which cases the municipality shall be liable to the extent set out in subsections (1) and (2).

Nova Scotia Interior as Moose Pasture

Nova Scotia is a country of lakes and streams, offering many ideal canoe trips, and the interior is a great moose pasture. Ideal, too, is the moose hunting, because both the canoe and automobile are used by hunters and guides, thus saving many miles of weary hiking through the wilderness. On the Liverpool chain of lakes reached from South Milford via Annapolis Royal or Digby, and on Lake Kedgemakooge, Lake Rossignol, Lake Munro, Loon Lake and the Liverpool River expert Indian and white guides use the canoes for long distances and even call the moose to the shore with their birch bark horns. When some distant point is to be reached from "Del" Thomas' South Milford camp, canoes, guides, hunters and duffle are loaded upon a big motor truck for the journey.

South Milford is 15 miles from Annapolis Royal and is a favorite outfitting point. So is the Kedgemakooge Rod and Gun Club, on famous Lake Kedgemakooge, in the heart of the wilderness 36 miles from Annapolis Royal. Both of these camps have ample accommodations and plenty of canoes and reliable guides.

The Nova Scotian moose season lasts from Oct. 1 to Nov. 15. Deer are as plentiful as moose, and the open season for this game lasts from Oct. 16 to Nov. 31.

Although large numbers of moose are shot each year, many with magnificent "spreads," the annual increase is said to equal the kill. Such guides as Louis Harlow, half-breed Micmac and Sam Globe, full-blooded Indian, are expert moose callers and stalkers and rarely disappoint the hunter. The cleverness with which they simulate the calls of the cow moose with a simple roll of birch bark fashioned into a horn, is sure to fool the wisest old bull in the wilderness. When the calling season is past, the moose no longer comes to the hunter and the hunter must go to him. Neither canoe, nor automobile figures much in this phase of moose hunting except that one, or both, may help the hunter near the place where the quarry is supposed to be and carry him home when the hunt is over.

FROM EVERYWHERE

Recent improvement in Oriental trade is being indicated by the heavy cargoes carried by the last few liners sailing for Japan and China from the Port of Vancouver. Vancouver merchants view the partial recovery in the volume of business being done with China as a sure sign that the country is coming back to normal. This improvement is noted especially in the recent heavy bookings of the Canadian Pacific steamers.

Whole families of Indians on the Island of Manitowaning, in Georgian Bay, work all winter making twelve-inch bark canoes which are sold as ornaments. A shipment of four thousand eight hundred of these passed through Dominion Express yards at Montreal recently for a New York destination. The old-time Indian canoe is represented in every detail and every one of the tiny vessels is beautifully decorated.

A passenger on a Quebec train was suddenly stricken with an epileptic fit and collapsed in the Windsor Station, Montreal, recently severing an artery in the neck. Constable W. W. Peterson, of the C.P.R. investigation department rendered first aid immediately until the ambulance was called. On arrival at the hospital the house surgeon complimented Peterson on his clever work. Constable Peterson is a member of the C.P.R. Police First Aid team.

Don't give away all your good advice. Save a fittle for yourself.

All men are equal before the law, but not before the mother in-law.

Ambling Along With the Trail Riders

(1) Chief Buffalo Child Long Lance. (2) Lunch on the Wolverine Plateau. (3) One of the Guides. (4) On the Wolverine Plateau with Tumbling Glacier in the background. (5) Chief Louis Arbel with his Kootenay Indians.

The Official Ride of the Trail Riders of the Canadian Rockies, commenced this year on the morning of August 8th and ended at Wapta Camp on the night of the tenth. Over a hundred members participated. They rode across country between Marble Canyon, on the Banff-Windermere Highway, to the Bungalow Camp at Lake Wapta.

The Riders, among them a number of prominent society people, scientists and artists, all travelling on horse-back, blazed a new passage across the Wolverine Plateau. Six countries were represented: Canada, the United States, Australia, France, the West Indies and England. The artists, of whom there were six, made sketches of the virgin scenery along the route of the newly discovered trail.

Seven Indians were in the party, six being Kootenays under Chief Louis Arbel, while the seventh was Chief Buffalo Child Long Lance who gave a lecture on the Indian Races of Canada to the Canadian Club of Montreal during the winter, and is rapidly becoming famous as an authority upon Indian affairs.

The artists included Leonard Richmond, R.B.A., and A. L. Leighton of England; Carl Rungius, Belmore Browne and Richard M. Kimbel, of New York, and R. Palenske of Chicago. Paris was represented by the Duc de Nemours, who recently purchased a ranch near Calgary.

This was the second annual Ride and Pow-pow of the organization. On the morning of August the eighth, motor cars conveyed the Riders from Lake Louise and Banff to the point of departure on the Banff-Windermere Highway. There guides and horses were in readiness and the party immediately mounted and the Ride commenced. The trail led up Tumbling Creek, past Tumbling Glacier and on the Wolverine Plateau where lunch was 'served'. The ride then proceeded along the Plateau with the Wolverine Palisades, Mount Helmet and the Washmawapta Icefield and Waterfalls on the left, giving the riders a view of the Ten Peaks on the right.

That night camp was pitched on the Goodsir Plateau and before retiring the campers gathered around the fire for the usual sing-song, in the shadow of the cliff which rises sheer six thousand, five hundred feet above its valley.

On the second day the ride led down to Goodsir Creek and up McArthur Creek, past Lake McArthur. That night was spent of the shores of Lake O'Hara, the camp there being placed at the disposal of the Trail Riders by the Alpine Club of Canada. The day ended again with a sing-song.

On the third day, August 10th, the final ride was made from Lake O'Hara to Wapta Lake, where the expedition was concluded with a Pow-wow, sing-song and pale-face dance at Tipi Camp. It is expected that another ride of a similar nature will take place next year as the undertaking impressed those who took part as one of the most enjoyable outtings they have experienced. Not only does the Ride provide an uncommonly pleasant holiday for sportsmen from Canada and the United States, but it also serves the excellent purpose of making the scenery and the fishing and hunting facilities of the Rockies known abroad.

DO YOU WANT THE PEOPLE TO READ YOUR ADVERTISEMENT

People take The Sun because they believe it is worth the price we charge for it. It is therefore reasonable to suppose that they read its contents, including advertisments. This is not always the case wifh newspapers that are offered as premiums with chromos or lottery tickets

WE DO NOT WANT CHARITY ADVERTISING---

Advertising "to help the editor." But we do want business advertising by progressive business men who know that sensible advertising brings results and pay. If you have something to offer the public that will benefit them and you as well, the newspaper reaches more people than a bill board

SUN READERS KNOW WHAT THEY WANT

NEWS OF THE CITY

Mr. and Mrs. James Grisdale and son arrived in the city on Wednesday from Kamloops, having made the trip in a motor car. Mr. Grisdale is the new manager of the Royal Bank of Canada here. He was manager of the Kamloops branch for six years. The family will reside in Hon. Martin Burrell's residence.

Rev. F. E. Runnells of the United church will leave for his new charge at Riverside church, in the Vancouver West Presbytery, next Tuesday, accompanied by his family. He will preach his farewell sermon on Sunday next. Rev. W. T. Beattie, his successor here, will arrive in the city next week

The public school children who went over to Nelson last Friday under the of Mr. Hine and Miss Harrigan to participate in the annual track meet sport of the public school of that city, won eight first prizes and four seconds. Evelyn Collins of this city made the highest individual score at the meet and won a silver medal.

Thursday, June 3 (king's birthday), being a public holiday, the wickets at the post office will be open for one hour only, from 9 till 10 a.m. Mail for boxholders will be sorted as usual upon arrival of trains.

R. Campbell and A. D. Morrison spent Sunday and Monday at Penticton and Oliver. They made the trip in a motor car. If you are interested in a daylight ghost story, interview them.

Mrs. Ommanney has disposed of her poultry business to Clinton Atwood,

C. H. Robinson, fishery overseer, will meet those interested at the city hall on Monday next at 8 p.m. to discuss fishing regulations.

W. Lon Johnson, of Colville, lieutenant governor of the state of Washington, was a visitor in Grand Forks on Tuesday.

Capt. Wm. Frakes returned on Friday from a fortnight's visit to his sister and niece at Armstrong. He also visited Banff.

Mr. and Mrs. G. A. Spink will leave on the 5th prox. on extended vacation tour through eastern Canada.

Thos. Meakes, city electrician, and family are spending a short vacation with relatives in Vernon this week.

Mrs. A. R. Buchan and daughter Rosamond of Trail visited friends in the city on Monday.

Midway will hold a district track meet of school children on Thursday, June 3.

Kenneth and Helen Campbell returned home from Vancouver on Monday.

Mrs. Roy Faulkner of Marcus visited relatives in the city on Monday.

Mrs. Larama of Trail visited friends in the city on Monday.

ALBERTA WILL VOTE JUNE 28

Edmonton, May 27.—Writs were issued today calling a general election in Alberta on Monday, June 28, with nominations on Friday, June 18. Seventeen advance polls will be held.

Must Ship Fruit Through Associated

Mr. Justice D. A. McDonald gave judgment last Friday in the Nelson assizes for the Associated Growers of British Columbia, which sued Samuel Hall, a Burton rancher, for $345 damages for breach of contract and for an injunction preventing his shipping of fruit through other channels than the Associated Growers during the continuance of his five year contract.

Hall alleged his fruit had been refused by the organization, which therefore released him from his contract. The refusal was denied by J. J. Campbell, Kootenay director of the Associated.

Immigration to Canada in 1925 totalled 84,907, of which 35,362 was contributed by the British Isles, 17,117 by the United States, and 31,828 by other countries. In addition 39,989 Canadians who had established homes in the United States and resided there for a period longer than six months returned to live in their native land.

A new cash-on-delivery parcels system has been inaugurated at Post Offices all over Great Britain. Parcels up to the value of £40 (about $195) may now be posted at any post office to any address in Great Britain, the value being collected by the Post Office authorities and remitted to the sender. The system seems to be meeting with success.

Business conditions on the Pacific Coast continue on the upward trend with great activity in construction work. The lumber industry outlook is brighter and there have been important developments in new sawmill construction. The fishing industry is on a better footing, pulp and paper mills are active and additional power programmes are being worked out.

Statistics of the output of apples in the five principal producing provinces show that Ontario has the lead as the greatest apple producer. Decreases in output in Nova Scotia, New Brunswick, Quebec and British Columbia are reported with a remarkable increase in Ontario. The figures by provinces for 1925 are as follows:

	Quantity (Barrels)	Value
Nova Scotia	956,056	$ 4,203,252
N. Brunswick	69,292	367,247
Quebec	109,004	741,227
Ontario	1,587,848	8,336,202
B. C.	858,570	6,310,489
Totals	3,580 770	$20,057,417

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B. C., or any Government Agent.

Records will be made covering only land suitable for agricultural purposes, and which is not timberland, i. e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown Lands, not being timberland, for agricultural purposes: minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, on conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

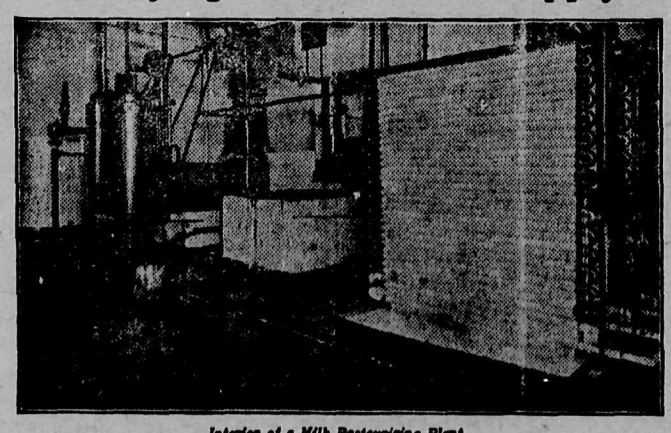
LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING.

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers up to ten head.

Chief Inspector Sounds Keynote to Purifying Nation's Milk Supply



Interior of a Milk Pasteurizing Plant.

At the 14th annual convention of the International Association of Dairy and Milk Inspectors held at Indianapolis, recently, leading authorities of the United States and Canada submitted interesting and informative papers relative to the purification of the nation's milk supply.

In the closing session of the series of meetings, Dr. Roy F. Leslie, Chief Meat and Dairy Inspector of Cleveland, Ohio, emphasized the great importance of co-operative measures by the producer in the production of clean milk.

"With co-operation on the part of the milk producers," said Dr. Leslie, "much can be done along this line that would otherwise be impossible." He then told of how the public was kept informed of steps taken to control the milk supply with a view to safeguarding the health of all who use milk and dairy products.

"In Cleveland," said Dr. Leslie, "more than 70% of the milk is sold at one or another of a system of chain stores where the customer is given an allowance of 2 cents on the purchase of each quart of milk."

The 2 cents allowed covers the cost of delivery in the home and represents a saving of about 12% to the consumer.

Milk in Cleveland must be sold within 36 hours of pasteurizing.

Mr. J. V. Quigley, dairy adviser, Kansas City Consumers' League, Kansas City, Mo., followed with an account of the work of purifying the milk supply of that city.

He stated that milk produced in dairies where they follow all sanitary regulations such as clean stables, clipped udders and flanks of milk cows, thorough grooming and brushing of the animal before milking, and periodical tests for bacteria, brought to producers in the league 2 cents to 3 cents more per quart of milk than is received by those who were not members of the Kansas City Consumers' League.

Throughout the series of meetings, stress was laid upon the rapid strides being made towards a thorough and comprehensive inspection program of the milk supply of cities throughout the United States and Canada.

It is certain that the results of this work are reflected to a great extent in the increased consumption of milk by the people of the United States, and this increased consumption is sure to be reflected in monetary advantages for both the producer and the distributer. High quality will increase milk consumption and high consumption of milk will keep the milk market steady.
