Ottawa

The Nation's Capital

HER PART IN ONE of Canada's earliest transportation projects —the Rideau Canal—and her point of vantage on the early lines of travel to the West, give Ottawa an interesting place in the commercial history of Canada.

Ottawa, originally founded with the unromantic name of "Bytown," became the capital of Canada in 1867, when the scattered colonies and territories which had passed through many political vicissitudes since they had obtained responsible government were united as the Dominion of Canada. Beautifully situated on the Ottawa River, near the mouth of the Gatineau, with the blue Laurentian Mountains forming a majestic background, Ottawa is the residence of the Governor-General, the meeting-place of the Senate and the House of Commons, and the administrative headquarters of the government departments.

Her political effulgence sometimes tends to dim her commercial significance. When the nation speaks from Parliament Hill, the hum-drum whirl of Ottawa's factories, and the thunder of Chaudiere's mighty power, are often forgotten. But Ottawa still predominates in the lumber industry; and, blessed with an unfailing supply of natural resources and a million horse power at her doors, she has developed many of the industries, some of national importance.
