OKANAGAN DISTRICT

Ferry, Summerland, East Summerland, Okanagan Lake.

IN accordance with Chapter 78, R. S. B. C. 1897, "Ferries Act," the Government of British Columbia invite applications for a charter for a ferry to ply between Summerland and a point on the opposite side of Okanagan Lake known as East Summerland, a distance of about 21 miles.

Applications will be received up to and including Saturday, the 28th day of September, 1907.

The charter will cover a period expiring on the 30th June, 1909.

The ferry shall make two trips each way every day, weather permitting.

Applications shall give a description of the vessel or vessels it is proposed to use, which must conform in all respects to the requirements of the "Steamboat Inspection Act," Chapter 46, 1898, and amending Act, Parliament of Canada.

Applications shall state the tolls it is proposed to ask for:—
Each adult passenger.
Each child (not in arms) under 13 years.
Each head of cattle, horse, mule or donkey, etc.
Each calf, sheep, goat or swine, etc.
Each vehicle with one horse and driver.
Each cart or waggon with one horse and driver, loaded.
Each vehicle with two horses and driver, unloaded.
Each vehicle with two horses and driver, loaded.
Each parcel of 25 lbs. and under
Freight, per 100 pounds, and under, non-perishable goods.
Freight, per 100 pounds, and under, perishable goods.

To the successful applicant the Government of British Columbia will pay at the expiration of every three months of satisfactory service the sum of two hundred and fifty ($250) dollars.

The Government of British Columbia is not necessarily bound to accept any application submitted.

F. C. GAMBLE,
Public Works Engineer.
Lands and Works Department,
Victoria, B. C., August 20th, 1907.

FERRY, SUMMERLAND-EAST SUMMERLAND, OKANAGAN LAKE.

NOTICE is hereby given that the time for receiving applications for a charter for a ferry to ply between Summerland and a point on the opposite side of Okanagan Lake, known as East Summerland, a distance of about 21 miles, has been extended up to and including Thursday, the 31st day of October, 1907.

F. C. GAMBLE,
Public Works Engineer.
Lands and Works Department,
Victoria, B. C., 20th September, 1907.

LAND REGISTRY ACT.

APPLICATION NO. 11805A.

TAKE NOTICE that an application has been made to register George Wellwood as the owner in Fee Simple, under a Tax Sale Deed from George Birkett Taylor, Collector of Municipality of the City of Greenwood, to George Wellwood, bearing date the 31st day of July, A. D. 1907, of all and singular that certain parcel or tract of land and premises situate, lying and being in the City of Greenwood, in the Province of British Columbia, more particularly known and described as Lot 5, Block 12, Map 21, City of Greenwood.

You and each of you are required to contest the claim of the tax purchaser within forty-five days from the date of first publication, and in default of a caveat or certificate of lis pendens being filed—and in default of redemption within such period, you will be forever estopped and debarred from setting up any claim to or in respect of the said land, and I shall register George Wellwood as owner thereof.

Dated, at Land Registry Office, Kamloops, Province of British Columbia, this sixteenth day of August, A. D. 1907.

W. H. EDMONDS,
District Registrar.

To John Hendrickson, Esq.

LAND REGISTRY ACT.

APPLICATION NO. 10805A.

TAKE NOTICE that an application has been made to register George Wellwood as the owner in Fee Simple under a Tax Sale Deed from Gerge Birkett Taylor, Collector of Municipality of the City of Greenwood, to George Wellwood, bearing date the twenty-fifth day of July, A. D. 1907, of all and singular that certain parcel or tract of land and premises situate, lying and being in the City of Greenwood, in the Province of British Columbia, more particularly known and described as Lot 8, Plan P, Map 45, City of Greenwood.

You and each of you are required to contest the claim of the tax purchaser within forty-five days from the date of first publication, and in default of a caveat or certificate of lis pendens being filed—and in default of redemption—within such period, you will be forever estopped and debarred from setting up any claim to or in respect of the said land, and I shall register George Wellwood as owner thereof.

Dated at Land Registry Office, Kamloops, Province of British Columbia, this sixteenth day of August, A. D. 1907.

W. H. EDMONDS,
District Registrar.

To George Cormack, Esq.

C. S. BAKER
Provincial Assayer and Ore Shippers' Agent. Correspondence solicited. Samples receive prompt attention.
P. O. BOX 123, GREENWOOD, B. C.

LOCAL HAPPENINGS.

Dr. Mathison, dentist, is out of town until October.

Harry Shallenberger of Spokane is in the city.

At the Mother Lode a new compressor is being installed.

F. W. McLaine has gone on a business trip to Penticton.

Judges should not carry their political animus to the bench.

J. Fox of Nelson, contracting agent for the C. P. R., is in the city.

Thomas Thomas has become the leading tailor of the Boundary country.

Died—In Greenwood, on the 12th inst., John Archibald McAllister, infant son of Mr. and Mrs. R. D. McAllister.

Harry Johns, superintendent of the Napoleon group near Bossburg, Wash., and Mrs. Johns are spending a few days in the city.

"Songs of a Sour-Dough" by Robert W. Service, now in its fifth edition, can be purchased at the store of J. L. Coles in Greenwood.

Benjamin Albert Perkins and Miss Hanna Dahm were married last evening by the Rev. M. D. McKee, Presbyterian minister. The young couple will reside at the Mother Lode.

Martin Burrell and wife left Grand Forks last Thursday for England, where they will spend four months after an absence of twenty years. Mr. Burrell will deliver several lectures in London upon fruit culture in B. C.

The case of McOrmond vs. Chesser, came up before Stipendiary Magistrate McMynn yesterday. The defendant was charged with unlawfully cutting timber on plaintiff's land. The parties agreed on the value of the timber taken and the magistrate dismissed the case.

The dance given by the local lodge of Rebekahs last evening was well patronized, in fact the hall was crowded. Good music, and an excellent supper were provided. The hall was tastefully decorated, and the affair was one of the most successful ever held in Greenwood.

N. F. Kendall has been transferred to the Bank of Montreal in Nelson. His place in the bank at Greenwood will be filled by J. A. F. Gillam of Vancouver. Mr. and Mrs. Kendall will be missed from the social circles of the copper metropolis, and carry with them to Nelson the best wishes of many friends in the Boundary.

A Sunday School convention for the Kootenay and Okanagan districts is to be held in the Baptist church, Nelson, October 22, 23 and 24. Each school outside of the city of Nelson is entitled to be represented by three delegates, for this convention only. Delegates will be entertained by their friends in Nelson. Their names should be forwarded to E. J. Cave of Nelson.

S. Yamada from Japan is visiting the camps in the Boundary. He is mining engineer for a copper mine in Japan that employs 10,000 men and produces twenty tons of copper a day. The miners work eight hours and get 30 cents a day. Japan produces about 40,000 tons of copper a year. Mr. Yamada is is also engineer for the Ikeda mines on Moresby island. From the Boundary he goes to inspect the mines and smelters of Montana.

The committee appointed at the mass meeting last week to look into the matter of having the Great Northern build a branch through Greenwood, drafted a resolution and sent it to Sir Wilfrid Laurier. When interviewed by the committee, the smelter managers were non-commital. The C. P. R. was treating the B. C. smelter very kindly and the manager had words of praise for that road, but is evidently too timid or politic to express himself publicly in reference to the entree of another railroad. Judging from the way the C. P. R. sometimes flashes the cinch, it is just as well to speak kindly, or not at all of that gigantic corporation.

Peter Lover of the B C mine appeared before W. G. McMynn, stipendiary magistrate, Thursday last, charged by Ij Evans with killing Kitty Winks, a cat belonging to Mrs. May. Mrs. May stated that the cat was a great pet, and that she loved it. Kitty Winks was a great hunter, Mrs. May said, and would kill birds, snakes, gophers and mice, but she had trained it so that it would not touch a chicken dead or alive. She would not take $100 for Kitty Winks. Peter Lover swore that the cat killed his chickens and that he had put a bullet through its head. After due consideration by the court the case was dismissed, each party paying their own costs. The case is probably the first of the kind in B. C., and should be put on record as a precedent.

Geo. R. Naden, M. P. P., is paying a short visit to his constituents.

This week a man with one leg has been making a financial canvass of the city.

F. F. and Mrs. Black of Nelson were in the city this week. Mr. Black is auditor for P. Burns & Co.

The assizes will be held in Greenwood on October 22nd. There are four civil cases and one criminal.

Rev. R. N. Powell of Nelson conducted the anniversary services in the Methodist church on Sunday.

The third furnace at the local smelter has been repaired and put in condition to be blown in at any time.

All the back yards in Greenwood will be put through the cleaning process by order of the local authorities.

Ore is being shipped from the Golden Eagle on the North Fork of Kettle river to the Granby smelter.

J. T. Beattie, manager of the Bank of Commerce, was called to Kamloops last Friday owing to the death of his father.

S. Beunerman of Midway returned last week from the Sturgeon Lake district, where he had been prospecting all summer. He made several locations of free-milling ore.

Charles Angove, one of the Boundary old-timers, is in the hospital at San Andreas, California, suffering from hemorrhage of the lungs.

There is no shut down at the factory in Nelson where the Royal Seal Cigar is made. It is still being smoked in all parts of the Boundary.

Mrs. (Dr.) Oppenheimer returned from Colfax, Wash., last week after a three months' visit with her parents, Mr. and Mrs. Adolph Fischer.

C. V. Semerad has returned from Edmonton and opened the dining room of the National hotel. Mr. Roy is a partner with him in the bar department.

The C. P. R. wish to announce round trip rates of fare and one-third for Thanksgiving tickets on sale October 29, 30, 31, with final limit November 2nd.

Hugh Cropley of Beaverdell came down from the West Fork Tuesday to meet his brothers, Chas. and Churchill of Strathcona, Alta., who are visiting in the district.

The quarantine against Phoenix will be lifted in a few days, provided no new cases of smallpox develop in the mountain city. The disease seems to be stamped out.

D. J. Robertson, a mining engineer formerly with the B. C. Copper company, has gone to Sudbury, having accepted a position with the Victoria Mines near that city.

A. S. Embree is in the city for a few days visiting friends. He has been connected with construction work on the North Fork extension of the Kettle Valley line for the past year.

A beautiful home increases the joy in a household. One of the aids to the making of a beautiful home is wall-paper, and the right shades and kinds can be found at the store of McRae Bros.

A school boy, on being asked to write a sentence containing the word "diadem" is said to have produced the following gem: "I'd diadem sight sooner if I ate toadstools than if I didn't eat them."

Geo. C. Hodge, superintendent of the B. C. Telephone company, is in the city. Mr. Hodge has been at the coast for some time superintending construction work for the company. Geo. H. Halse, secretary of the company, is also in the city.

An analysis made of Boundary ores made in New York is as follows: Silica, 38 to 40 per cent.; sulphur 3 to 4 and 5; iron 15 to 17; lime, 18 to 22; alumina, 6 to 7; magnesia, 6 to 7; copper, 22 to 28 pounds per ton; gold, .06 oz.; silver, 40 ozs.

Grand Forks has shut out all forms of gambling, even to the shaking of dice, and will not allow tinhorns or cadets to live in the town. Liquor dealers must not sell booze to drunken men, and boys under 21 years of age are not allowed to congregate in any place for the smoking of cigarettes and drinking of liquor. The goodness of Grand Forks will probably drive the tinhorns up to Phoenix, where they can camp around Gene Shea's place and pick off drunken men who stagger into his gin-mill. If you are suffering from too much money drop into Shea's place and get drunk. You will be cured, provided the tinhorns are not all sick, and Shea is capable of getting your cheques cashed.

Born—In Greenwood, on the 12th inst., to Mr. and Mrs. R. D. McAllister, a son.

The sale of Chinaware at the store of McRae Bros. is still on and bargains are being secured every day. Ladies should not miss this opportunity to obtain goods that are chic for a small amount of money.

W. H. Chynoweth of the Mother Lode, received a telegram Saturday from Helena, Mont., informing him of the dangerous illness of his wife. He left on Sunday morning's stage. Mrs. Chynoweth has been ill for some time and went to Helena a couple of months ago to visit relatives there.

The annual meeting of the directors of the Providence Mining Co. was held in Greenwood last Tuesday. All the directors were re-elected with the exception of Mr. Heeney, Judge J. V. O'Donnell of Chicago taking his place. Arrangements were made for the future operation of the Providence and it will be known in a few days whether or not the shaft will be sunk to the 1,000-foot level.

McClusky, the blind miner from Phoenix, has sold his street gramaphone to Charles Shaw, and has gone to Spokane. Shaw, who is also blind, has gone on the road with the phone and will gradually work his way south until he reaches his old home at Placerville in California. Charley will be missed in Greenwood, for with only a cane to guide him he could find his way to any place in the city.

"The Messenger Boy" was played in the Auditorium Monday evening to a healthy audience. The plot of the play was only in sight occasionally, but the fun was apparent nearly all the time. There was quite a bit of love in the piece, one old joke, some cigarettes, a little villainy and "18 cents worth of beer." When one of the comedians told the other to take the growler down to the Pacific and have Alex Greig put all the froth on the bottom, the house fell down and one man in the "nigger heaven" laughed so much that his false teeth flew out over the railing and hit the bass drum on the cranium. The play as presented by the troup in this city is an excellent tonic for that jaded feeling that comes from the worries of life.

C. W. Deaver died in the hospital last Thursday, after a week's illness, from cerebro-spinal meningitis. He was only seventeen years old and had worked in the Mother Lode mine for nearly a year. He was a young man of exemplary habits and popular with those who knew him. His father took the remains to Vernon for burial. The funeral in Greenwood to the C. P. R. depot was largely attended by the members of the Miners' Union and Boundary Valley lodge, I. O. O. F. The disease from which the young man succumbed is rare in the Boundary, this being the first case. He was unconscious nearly all the time, but towards the end rallied long enough to point to a picture of Christ on the wall and assured his father that he was not afraid to die.

H. S. Pittendrigh, postmaster at Rock Creek, has been notified by the postal authorities at Ottawa of his dismissal and the appointment of his successor. Mr. Pittendrigh is a Conservative, and has held the office for nearly twenty years satisfactorily to the community which he has served. Mr. Ross, in making the change, is only living up to the practices of the Liberal party. Mr. Ross recommends the appointment of a county court judge. There are certain legal advertisements published in newspapers of the district. The law has given the judge the privilege, if he so chooses, to name the newspaper in which these advertisements shall be published. All judges do not claim this privilege. Mr. Ross owns a newspaper. His newspaper gets the advertisements. Thus Mr. Rossis pecuniarially benefitted. A logical sequence of the working out of Liberal machine methods—a recommendation, an appointment, a newspaper, an advertisement, and we have the complete circuit from the original donor back to his own pocket. One of the great failings of the Conservative party is its civil service reform pipe dream. When legal gentlemen, elevated to the bench, bring to that high office their political animus and political friendships, it's about time to drop the civil-service-reform phantasy, and deal exclusively in practical politics. The Liberals machine is practical. The Conservative leaders are visionary.

DEATH OF A PIONEER.

Charles Dietz died at the Old Men's home in Kamloops on the 9th inst., aged 79. Deceased was born near Stettin, Germany, Aug. 28, 1828. In his youth he was a sailor and came around the Horn to San Francisco in 1850. He followed placer mining in California until 1857, when he left for Victoria. He came up the Fraser to Hope and into the Similkameen. He came through by Rock creek before any placer was discovered there and went on to East Kootenay, where he followed placer mining for several years. Later he came to the Pend d'Oreille, and from there to Rock creek, where he struck what is known as White's Bar. He was one of the early prospectors at Camp McKinney, where he held mining interests at the time of his death. He had resided at Rock Creek for a number of years, and was taken to the home about two months ago. He was honorary president of the Kettle River and South Okanagan Pioneers' society, being the first of the old-timers in the country.

The Magdola cigar is made from choice tobacco, and smokers should look for it when in search of something that will delight the senses.

A SMELTER SHUTS DOWN.

W. C. Thomas, manager of the smelter at Boundary Falls, received a telegram on Monday from the office of the Dominion Copper company in New York, instructing him to suspend operations at the smelter and mines of the company. Mr. Thomas thinks the suspension will only be temporary, as he has received no instructions to clean up, and there is on hand at the smelter 1500 tons of ore and a month's supply of coke. The closing of the smelter and mines throws several hundred men out of employment. The street is full of rumors anent the shut-down. Some say that the C. P. R. wishes to get control of the stock in order to shut the Great Northern railway out of the field, while others think that the company simply cannot make money at the present price of the red metal. Just how the stockholders will face the matter is not known at present.

The Kootenay Belle is the name of a cigar that can be found in nearly every town between the blue Pacific and the wheat country.

CITY COUNCIL.

The council met Monday evening, all the members being present except Aldermen Gulley and Wood.

Letters from the Yale-Columbia Lumber company, U. B. C. M., and the treasurer's quarterly report, were received and filed.

The council decided to look over the ground in Anaconda and decide whether the main be extended to Mrs. Kane's or not.

It was decided that the reservoir on Providence creek be not completed, owing to the lateness of the season.

The water rate for the foundry was fixed at $5 a month.

The clerk was instructed to write Mr. Johnson and ask that the map of the waterworks be finished and delivered by Nov. 15.

Following accounts were ordered paid:

Pacific Coast Pipe Co	$405 85
E. W. Bishop	90 35
Bubar & McKay	27 20
W. H. Moore	4 55
Thos. Park	5 50
The Ledge	5 00
Greenwood Waterworks Co	138 25

Owing to the frequency of runaways in the city the bylaw in reference to the care of horses on the streets will be strictly enforced in the future.

The mayor reported that at the request of the medical health officer he had put on two guards at $4 a day to assist in keeping the quarantine against Phoenix.

The proper steps will immediately be taken to clean up the city.

When you want a monument or headstone, write to the Kootenay Marble Works, Nelson, B. C. *

School Report—September.

DIVISION I—J. L. WATSON.

Pupils actually attending	17
Average daily attendance	14.20
Percentage of regularity	83.53

Pupils present every session: Irene Crawford, George Redpath.

DIVISION II—H. G. MOFFATT.

Pupils actually attending	32
Average daily attendance	27.90
Percentage	77.81

Pupils present at every session: Ernest Anderson, Henry Anderson, Jean Crawford, Mandie Eales, Harold Hunter, Hazel Redpath, Edith West.

DIVISION III—C. M. MARTIN.

Pupils actually attending	30
Average daily attendance	25.82
Percentage of regularity	14.40

Pupils present every session: Leo Barnett, Jean Coles, Edward J. Crowley, Walter Jordan, Judith Johnson, Roy May, Daniel McKee, Josephine McKee, Celia McIntosh, Fred McDonald, Vera Redpath, Jack Wilson.

Card of Thanks.

On behalf of myself and family I wish to thank the Miners' Union, Boundary Valley lodge No. 38, I. O. O. F., the people at the Mother Lode mine and all others for their kindness and sympathy in our late bereavement.

GEORGE M. DEAVER.

Job Printing at The Ledge.

BABY BY PARCEL POST.

Novel Ruse Played by Parents of Child They Abandoned.

One of the most striking ruses of recent years for the abandonment of a baby has been successfully carried out in London.

The story of how the infant, a daintily clad baby girl, was left to the tender mercies of the world is a dramatic one. The ruse was carried out at a comparatively late hour at night by a well dressed man and woman.

They succeeded in getting a post-office messenger to take the baby as an "express message" for immediate delivery. It was a clever trick cleverly effected.

A well-dressed man, it appears, entered the West Strand postoffice in the evening, wrote a hurried note on a telegram form, and placed it in an envelope.

Turning to the counter, he requested the clerk to send the message by express messenger to the matron in charge of the Lying-in Hospital, City road. Having paid the necessary fee, the well-dressed man made a hasty exit.

Gets His "Package."

The special message was handed to a commissionaire. As he left the post-office the author of the important dispatch accosted him: "Are you taking that special message to the City road hospital?"

"Yes," answered the unsuspecting official. "Well, I have a cab here," explained the excited customer. And, in spite of half-hearted attempts on the part of the messenger to explain that he had been given 4d for omnibus fares, he was inveigled into a cab.

Then, to his astonishment, a baby was thrust into his arms.

"This is the parcel," said the mysterious stranger. Although he did not quite understand, the commissionaire felt that everything must be in order. He had seen his employer in conversation with the postoffice clerk. He knew that he had to go to the City road.

Above all he was conscious of the fact that he was in a cab with a letter and a parcel to deliver. Though the parcel had developed into a singularly active baby, the commissionaire—accustomed to daily surprises in the ordinary routine of his business—proceeded on his mission.

The "gentleman" saluted the infant in perfunctory manner, and the lady who had handed the bundle of babyhood to the messenger, parted with it in a storm of passionate kissing. And the cab drove off.

Sent the Baby Back.

The note, written on a telegraph form, which accompanied the child and the commissionaire to the City Road Lying-in hospital read:

"Please take in baby until to-morrow. Am writing."

It was addressed to the matron. Naturally the City road hospital authorities were astounded to receive such a message and such a charge. After consultation among the head officials the baby was refused, and the commissionaire advised to take it back to the place whence it came.

So back the unfortunate man went to the Strand postoffice. The commissionaire had to pioneer his little charge to Bow street, and from this centre of wisdom the baby derelict was forwarded in the arms of a nurse to the Strand workhouse. And there, foredoomed apparently to eternal charity, this 6 weeks old girl remains.

The foundling is a girl. A pretty little baby, about 6 weeks old, with dark gray eyes and quite a lot of dark brown hair.

She arrived at the workhouse clothed in a long nightgown, hand worked with silk, and wore silken shoes. A petticoat of thick wool and a pink and white shawl formed other important details of her outfit.

Her Queen's Letter.

In a secluded part of the Kurachi district in Scinde lives an old woman who is the envy of all her neighbours, the cause being that she is the possessor of a letter written by the late Queen Victoria.

A quarter of a century ago she came to England bent upon presenting a petition to the Queen. When she reached Buckingham Palace the Queen was preparing for a drive. The woman expressed her desire to see Her Majesty, and explained that she had come from India.

Permission was granted for her to present the petition, and the Queen then wrote a few words on notepaper bearing the Royal watermark, to the effect that she had seen the Indian beggar, who was an interesting personage.

When she arrived back at Scinde the woman showed the Queen's letter to the local authorities, who presented her with a piece of land, which she has cultivated very diligently.

She has more intelligence than the average village woman, and in spite of her seventy years she still rides a pony.

Ghost Wore Plug Hat.

A new ghost story is told by Lloyds Weekly, of London.

A party of Norwood machine minders, going home in the early hours of Saturday morning, were suddenly scared by a ghostly figure racing past them to the railway station.

The apparition was clothed only in a white nightshirt and a silk hat, and under its arm carried a book and a folded newspapers. One of the workmen tried to stop the seeming phantom, but it was too quick for him. As it reached the railway station the figure stopped suddenly. When the machine minders came up they found an awakened and much distressed somnambulist, who turned and ran for home while they unsympathetically laughed.

The Raven.

Many birds seek the protection which the presence of man affords against furred and feathered foes when the breeding season approaches. Not so the raven. Its distrust of us is profound, and its nest is placed in some wild spot far out of reach of our possible attack or succor. But there are other enemies. I know of a pair that built on the side of a projecting crag high up on the cliffs of Rathline island. Some fierce peregrine falcons occupied the other side of the crag, and when one day their eggs were taken by an adventurous collector they, sharing the popular opinion of a raven's blackness, concluded that their neighbors were the offenders and wreaked their grief and vengeance upon them. When, on their return from a foraging expedition, the falcons found their nest despoiled they were seen to hold a consultation, and after much deliberation they suddenly arose and both in one accord flew at the ravens' nest and sacked it, tearing it in their rage and indignation until not one stick was left upon another.—London Standard.

CONDITIONS ON MARS.

Days and Years and Light and Heat on the Red Planet.

The days in Mars are of about the same length as ours—24 hours, 39 minutes, 23 seconds. Mars makes her orbit around the sun in a little more than 686 days; therefore the seasons are almost twice as long as they are with us. The atmosphere of Mars is rich in watery vapors. Oceans can be seen, and at the poles thick ice, which melts when summer comes. The variations in temperature are extreme. Mars receives only half as much solar heat as our globe does. The sun appears half as large, and the nights receive their light from two moons, which are smaller than ours—Deimos and Phobos.

The weight is such that one of our kilograms would only weigh 376 grams there. A man is only able to carry his own weight on his back. Transported to Mars, he could carry three times as much, something like 225 kilos. In taking observations of Mars through the telescope one can see a distinct red disk, marked with more or less brilliant spots. Some of the spots which are greenish are the oceans; other very red ones are the continents, greater in extent than the oceans, which is the opposite to the way the earth is disposed. The most brilliant spots are the ice covered regions of the poles, and the clouds are almost equally bright. The atmosphere of Mars is more transparent than ours, and its sky is incomparably clear.

The waters of Mars are more divided and distributed in inland seas joined by long arms, which are sometimes incurving, but oftenest almost rectilineur, and which mark the brilliant surface with dark lines, just as the line of lead divides the panes of glass in our church windows. All these dark lines form a pattern which is relatively symmetrical and which does not seem to have been made by chance. A plan so regular must have been designed, and for a long time the observers of Mars have been disposed to consider these lines as canals dug by the inhabitants of the planet for the needs of their civilization.—Charles Torquet in Metropolitan Magazine.

RARE HALF DOLLARS.

Good Specimens of Those Dated 1796 and 1797 Are Valuable.

The half dollar is one of the most plentiful of all the series of United States coins, having been issued regularly each year with but five exceptions since the coinage of the denomination first began in 1794. These exceptions were the years 1798, 1799, 1800, 1808 and 1816.

This is the reason why so few of them are rare nowadays and that many specimens of the early dates are to be had for little more than face value in a condition that would indicate they were only a year or two old, instead of dating back nearly a hundred years, as many do.

Altogether there have been issued 235 varieties of the half dollar, and all of the branch mints have struck coins in this denomination, except those of Dahlonega, Ga., and Charlotte, N. C., which were authorized to strike only gold coins.

The very rare half dollars are those dated 1796 and 1797. Of those of 1796 there are two varieties, one with fifteen stars on the obverse around the bust of Liberty, the other with sixteen stars. Each of these two varieties has brought over $100 when in perfect condition.

The 1797 half dollar is the next rarest, and a very fine specimen of this coin has brought as much as $120. The next rarest is the 1838 half dollar struck at New Orleans, with the mint letter "O" under the bust. This coin is worth from $50 to $75. Another rare half dollar was struck at the San Francisco mint in 1866. This coin omits the motto of "In God We Trust," which is borne by all the other varieties of the year, and is valued at $24.—Elder Monthly.

Stars and Storms.

Most people suppose that when the stars appear to lose their liveliness of light and shine without twinkling, as minute bright points in the sky, fair weather is in prospect. Studies lately made in this country seem to contradict this popular belief. It has been found that when the stars are feeble in their scintillations foul weather is at hand. The night before a most violent storm in the south, for instance, the stars hung so quietly in the sky that they seemed to have entirely lost their scintillating power.

This is said to be only one instance among many which show that an unusual steadiness in the light of the stars precedes the appearance of storms.

When to Take Tea.

Our conclusions with regard to tea are that its original popular use as a stimulating beverage with breakfast and tea is justified and harmless, but that its indiscriminate consumption with meat foods or during proteid digestion is likely to be harmful. China tea, on account of its less tannic acid content, is less harmful than Indian tea. Our results with ginger beer showed that this beverage was practically without influence upon digestion.—Hospital.

On the Last Day.

Gabriel—I've blown my trumpet three times and nobody pays any attention to it. Israfel—That's strange. Gabriel—Isn't it? People just make a hasty jump for the curbstone and then look to see which way the auto went.

A Submarine Earthquake.

Three French sardine trawlers while engaged in fishing about sixty miles from Belleisle declare themselves to have been the eyewitnesses of a submarine earthquake. At a distance of about five miles from where they were the crews saw a dense black smoke rising from the water, and, satisfied that a ship was on fire, they bore in that direction. No ship could they see or any trace of one, but from the water there continued to issue the cloud of smoke, and as they got nearer they also saw sheets of flame rise from time to time. In fear for their own safety, they drew back to their former position, whence at night they continued to see the smoke and flame.

THE GROOM MUST PAY.

Queer Marriage Custom Among the Quebec French Canadians.

A singular marriage custom prevails among the French Canadians in Quebec. After the morning marriage service in the church the bridal party in caleche or carriole make a tour of calls upon relatives and friends during the day and then return again to church for vespers.

Before the evening dance at the bride's new home comes the supper. When the company rise from the table the bride keeps her seat, and some one asks with great dignity: "Why does madam wait? Is she so soon in bad grace?"

She replies: "Somebody has stolen my slipper. I cannot walk."

Then they carry her, chair and all, into the middle of the room, while a loud knocking announces a grotesque ragged vender of boots and shoes. He kneels before the slipperless bride and tries on a long succession of old boots and shoes of every variety and size until at last he finds her missing shoe.

The groom redeems it for a good price, which is spent in treating the company. If the groom is not watchful they steal her hat and cloak, which he redeems in the same way, and they have been known to steal the bride, for which there must be liberal pay. The event of the evening is a good jig, in which a guest volunteers to outdance the bride. If successful the visitor demands a prize from the groom.

A MADDENING PRANK.

The Queer Joke That Eugene Field Played on a Printer.

When Eugene Field was city editor of the Kansas City Times he found great amusement in annoying one of the characters employed on the paper. Ferguson was one of the "makeups" on the paper, and in Wyandotte, where he resided, just over the line from Kansas City, he was the leader of a local temperance society. For over a year Field, on coming down to the paper to go to work, would write a personal concerning Ferguson. Generally it ran like this: "Mr. John Ferguson, the well known 'makeup' of the Times composing room, appeared for work yesterday evening in his usual beastly state of intoxication." This entertaining bit Field would send down in a bundle of copy, and the others of the composing room would set it up and say nothing.

Poor Ferguson knew that this awful personal was in their midst and every night would go carefully over every galley for the purpose of locating and killing it. It gave him vast trouble. Every now and then Field would not write his personal about Ferguson and then the bewildered Ferguson was worse off than ever. As long as he could not find it it might still be there. It almost drove the poor man off the paper. Now and then it escaped his eagle eye and was printed. On such occasions Ferguson's burdens were beyond the power of even a Christian spirit to bear.

Old Medicine.

The following are among some of the fantastic cures presented by the medical authorities of early times, as given by Dr. Hugo Magnus in his book, "Superstition in Medicine."

Remedy Against Bellyache: "Take the heart from the living heart and wear it as an amulet at the left thigh."—Alexander of Tralles.

Remedy Against Epilepsy (advised by the Physician, Moschion, Diorthotes, Alexander of Tralles, Book I, Chapter XV, page 570): "The forehead of an ass tied to the skin of the patient and worn."

"'Gather iris, peonies and nightshade when the moon is in the wane, pack them into linen and wear as an amulet.' Advised by the magician Osthanes, Alexander of Tralles, Book I, Chapter XV, page 566.

The Australian Natives.

An English author writes of the Australian natives: "Between tribe and tribe war for purposes of territorial aggrandizement is unknown. They may fight about women or in the blood feud, for, as nobody is supposed to die a natural death, every death is thought to be caused by hostile magic. Fights are not now resolutely waged, but merely to draw first blood, as a rule, and, as there are no conquests, there are no slaves and very little material progress. There are no hereditary chiefs, though among some socially advanced tribes a kind of magistracy or a 'moderatorship' of local groups in the tribal general assembly is hereditary in the male line."

A Good Word For Tobacco.

A nobleman that was extreamly fat was reduc'd to an ordinary Size by chewing Tobacco, which also does good in an Asthma. 'Tis of great use in Camps, where there is many times Scarcity of Vituals and Cholicks and the like.—"Compleat Herbal," 1654.

Closer to Nature.

We get closer to nature when we are creating, whether in art, in literature, in invention or in working at new and progressive ideas. We can feel our mind reach out into infinity and grasp and bring back something fresh, new, something never seen on this earth before.—Success Magazine.

Curious Place Names.

Chicago is an Indian word, meaning wild onion or skunk weed. Chesapeake is also Indian and is variously interpreted as highly salted water, great waters or country on a great river. Chautauqua is also an Indian word and has had several interpretations, as a foggy place, a bag tied in the middle (referring to the shape of the lake), a place where a child was washed away, where the fish are taken out, place of easy death or, finally, place where one was lost. Des Moines is usually supposed to refer only to the Trappist monks, and it is also connected with an Indian word meaning the road. Niagara is an Indian word, signifying across the strait or at the neck. Shenandoah is Indian and means the spruce stream or a river flowing along side of high hills. Massachusetts means near the great hills or the hill shaped like an arrowhead or, again, the blue hills. Mississippi means great water or gathering in of all the waters or an almost endless river spread out.

SORE FEET

Sore, hot, aching or blistered feet are cooled and healed by Zam-Buk. Store girls, postmen, policemen, farmers and all who stand and walk a lot should test its value!

Zam-Buk also cures chafing sores, insect bites, sunburn, ulcers, eczema, heat sores and all skin diseases and injuries. Gives ease in cases of piles.

50c. a box at all stores, or Zam-Buk Co., Toronto.

ZAM-BUK GIVES INSTANT EASE

Is It True?

A writer in the "Grand" remarks in a casual way. "Some time ago I saw a couple of brown-paper parcels being handed into a first-class carriage at Euston station. Inside the carriage was an elderly gentleman with a long white fringe of hair surrounding a bald cranium. It was Sir Wilfrid Laurier, the Canadian premier. 'I didn't like packing them in my trunks,' he explained, 'and I thought they'd better go in my stateroom on the steamer. So I had my secretary wrap them up like ordinary parcels, although they're rather heavy.' What do you think they were? The two massive gold caskets containing the freedom of London and Bristol. The Bristol box wasn't presented at Bristol, as the papers said, but the mayor of the city brought it to the Hotel Cecil in a cab and gave it to the premier after dinner on Dominion day. They tell me the mayor was as nervously proud of his gift as a hen with one chick."

It Is a Liver Pill—Many of the ailments that man has to contend with have their origin in a disordered liver, which is a delicate organ, peculiarly susceptible to the disturbances that come from irregular habits or lack of care in eating and drinking. This accounts for the great many liver regulators now pressed on the attention of sufferers. Of these there is none superior to Parmelee's Vegetable Pills. Their operation, though gentle, is effective, and the most delicate can use them.

The Bird Dealer—It's a bloomin' shime, Jim, swindlin' a pore 'ard workin' cove like this.

His Friend—W'y, wat's the matter?

The Bird Dealer—W'y, 'ere I slaved all day Sunday a-paintin' up a sparrer into a red 'eaded Belgian canary, an' I'm blowed if the feller as bought it ain't give me a bad 'arf crown.—Sketch.

SAVES LITTLE LIVES

Most liquid medicines advertised to cure stomach and bowel troubles and summer complaints contain opiates and are dangerous. When the mother gives Baby's Own Tablets to her little one she has the guarantee of a government analyst that this medicine does not contain one particle of opiate or narcotic. Therefore, she can feel that her little ones are safe. There is no other medicine can equal Baby's Own Tablets in preventing summer complaints or curing them if they come on suddenly. Keep a box of Tablets always at hand—they may save your child's life. Mrs. C. E. Hancock, Raymond, Alta., says: "I have used Baby's Own Tablets for summer complaints, constipation and sleeplessness, and always with the best results." Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"Well, George, do you know it is 1 o'clock? What have you to say for yourself?

"I did have s-s-somethin' to s-say, my dear, b-but you've gone an' s-scared it out of m-my head. Oh, I remember it now."

"Well, what is it?"

"Good night."—Cleveland Plain Dealer.

Pale, sickly children should use Mother Graves' Worm Exterminator. Worms are one of the principal causes of suffering in children and should be expelled from the system.

The village carpenter had given so freely of his services and sound advice toward rebuilding the little memorial chapel that when it was completed all the summer people agreed that he should be asked to speak after the luncheon which was to follow the dedication exercises.

The day and the carpenter's turn came duly.

"Ladies and gentlemen—my dear friends"—he began, his good brown face very red indeed. "I am a good deal better fitted for the scaffold than for public speaking."

Then he realized what he had said and sat down amid roars of laughter.—Youth's Companion.

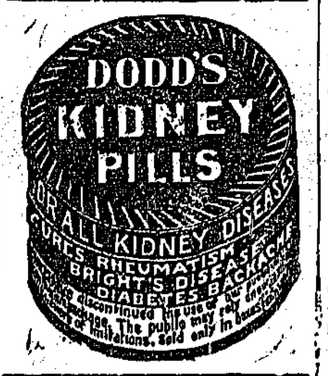
Itch, Mange, Prairie Scratches and every form of contagious Itch on human or animals cured in 30 minutes by Wolford's Sanitary Lotion.

At Guibollard's funeral his deadly enemy, Calino, was observed walking in the procession, a sight which enraged the widow very much.

"Ah," she cried, "how dare he, the hypocrite! If my poor husband was here he would never have allowed the wretch to follow him at his funeral."—Bon Vivant.

"But, Captain Brace, why do they always call a ship 'she'?"

"Lord, miss, you wouldn't ask that if you'd ever tried ter steer one."—Judge.



WEIRD INCIDENT.

Red Stream Flows From Coffin Buried For Centuries.

A weird and startling incident that occurred in an ancient Colchester church has caused much speculation as to its nature.

Some workmen employed in restoring the historic church of St. Giles, were carrying away a leaden coffin containing the remains of Lord John Lucas, who was buried in 1671. As they moved the heavy casket they in some way fractured it, and were astonished to see a large quantity of red fluid, having the appearance of blood, running from the hole in the lead.

They at once concluded that the fluid was blood, and the discovery naturally caused great consternation among them, seeing that the coffin is 236 years old.

The rector, the Rev. W. M. Bellamy, and others were called to inspect the fluid, and they also were convinced that it was actually blood that oozed out of the coffin. Anyway, the incident is probably unique in the annals of sepulture.

The bodies of Lord John Lucas and Lady Anne, his wife, have long rested in the vault under the vestry at St. Giles's Church.

The coffin containing the remains of Lord Lucas bears an inscription in Latin to the effect:

Sacred to the Memory of the most noble John Lord Lucas, Baron Shenfield, who died July 2, 1671, aged 65.

This Lord Lucas was the first lord, and founded the family now represented by Lord Lucas, better known as Mr. Auberon Herbert. Lord John was the elder brother of Sir Charles Lucas, whose execution after the siege of Colchester by the Cromwellians is commemorated by an obelisk in the local Castle park.

The vault at St. Giles's is required for a new heating apparatus, and permission was granted by the present Lord Lucas to remove the coffins for re-interment in the churchyard. It was in the journey to the churchyard that the cleavage was caused in the coffin containing Lord John's remains, and the mystifying fluid streamed out.

The incident recalls many superstitions as to the bleeding of bodies after death, such as being signs to the living that deceased had met with foul play, or was anxious to warn survivors of impending disasters.

A practical solution of the occurrence was given on Saturday to our Colchester correspondent by Dr. Henry Laver, F.S.A., the president of the Essex Archaeological Society, and a great authority upon matters scientific. He at once said that it was not blood at all that came out of the coffin. "If you get a body buried in an hermetically sealed lead coffin," he added, "liquid exudes and cannot get out or dry up. It is a red liquid and when cleavage is made it runs out looking like blood, but is not blood at all."

Dr. Laver went on to explain that the lead coffins of to-day were not so perfect as in olden times. Then they were cast. Modern ones are made of rolled lead, and the joints give way where they have been lead soldered. In the old coffins of cast lead there were no joints to give way.

The old Roman coffins were made with burnt joints, and are perfectly good to-day, as witness specimens in Colchester museum.

RISEN FROM THE RANKS.

Notable Career of An Australian Officer Who Is Leaving the Army.

Col. Harry Finn, C.B., late inspector-general (local major-general) of the forces of the Commonwealth of Australia, who figured in the late Birthday honors, has decided to leave the army on pension after over 36 years' service, 10 of which were spent in the ranks. Col. Finn has had a remarkable career. The brother of a troop sergeant-major, who served in the Indian Mutiny, he enlisted in his brother's corps (the 9th Lancers) under an assumed name, and rose to squadron sergeant-major. He was specially mentioned for his fine work in the Afghan war, and received a commission in the 21st Hussars (now Lancers). He got the adjutancy after only three years' commissioned service, and he was the youngest field officer in the service when promoted major. He again distinguished himself during the famous charge at Omdurman, and got a brevet lieutenant-colonelcy. Col. Finn is one of the very few officers of his rank who wears the ranker's medal for distinguished conduct in the field.

The Press In India.

Judgment, carrying with it small damages, has been delivered in the libel action brought by six members of the Calcutta police force against The Indian Daily News. The action was based upon that journal's criticism of the conduct of the plaintiffs in connection with a murder case two years ago, when a charge was brought against an innocent man.

During the libel trial it was elicited that the Government of Bengal had financed the police officers and given a promise that it would pay the costs of the proceedings, whether they won or lost. This revelation has provoked severe and very general criticism.

The Statesman declares that never has a British Government at modern times struck so cowardly a blow at the independence of the press. The Indian Daily News itself says that useful criticism on the part of the press in India, similar to that properly indulged in by English journalism, must now be regarded as impossible. It remarks that the Government of Bengal appears more anxious to hound down the independent critic than to put the Administration in order.

All on Show.

"It seems to me," said Mrs. Oldcastle, "that if I had as many idiosyncrasies as Mrs. Woppleson has I'd try to conceal a few of them."

"Yes," replied her hostess as she lightly tapped upon her $12,000 vanity box, "but she seems to think she can't even go shoppin' without havin' all of them as well as every diamond and ruby on that she's got."

Literary Item.

"They say very few authors sleep more than seven hours a day."

"But think how much slumber they furnish other people."

Soft.

Cholly — I wish that I could find something to absorb my mind. Molly—Have you thought of trying blotting paper?

Among all the fine arts, one of the finest is that of painting the cheeks with health.—Ruskin.

STOMACH TROUBLES OF LONG STANDING

When Doctors' Treatment Failed This Severe Case Was Entirely Cured By

DR. CHASE'S KIDNEY-LIVER PILLS

Doctors failed to cure Mr. De Courcey because they were satisfied to treat the stomach instead of getting at the cause of trouble in the liver and bowels.

The most complicated and deep-seated digestive troubles yield to Dr. Chase's Kidney-Liver Pills, because of their direct and combined action on the liver, kidneys and bowels. We are continually receiving such letters as the following in regard to the failure of mere stomach treatment.

Mr. Patrick De Courcey, Midgell, lot 40, P.E.I., writes:—"For some time I had stomach trouble, and was scarcely able to do anything at all. I was treated by doctors, but they did not seem to do me any good. A friend advised me to try Dr. Chase's Kidney-Liver Pills, and I did so, to very great advantage, for my old trouble has disappeared, and, though past middle age, I feel young and hearty again. I have great confidence in Dr. Chase's medicine."

Another interesting case of liver derangements and stomach trouble is that described in this letter:—

Mrs. James Monteith, Saurin, Simcoe county, Ont., writes:—"I have used Dr. Chase's Kidney-Liver Pills for liver complaint, biliousness and terrible sick headaches, and have found that they are more effective than any treatment I ever tried. They cleanse the system thoroughly, remove the cause of pains and aches, and make you feel fresh and strong again. Dr. Chase's Kidney-Liver Pills are also excellent for stomach troubles."

By means of their direct and specific action on the liver—causing a healthful flow of bile—they regulate and enliven the action of the bowels and ensure good digestion in the intestines. At the same time they stimulate the kidneys in their work of filtering poisons from the blood.

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.

A Third Party's Taste.

Miss Chellus—I'm told that your husband, when he was in a mellow mood the other night, remarked that he had "married beauty and brains."

Mrs. Bride—Well, well, how nice!

Miss Chellus—Nice? Surely you'll investigate, won't you? Evidently he's a bigamist.—Philadelphia Press.

Holloway's Corn Cure is a specific for the removal of corns and warts. We have never heard of its failing to remove even the worst kind.

If I were asked who were the cleverest man at repartee, I should unhesitatingly reply Mr. W. S. Gilbert, and Robinson. There is one delightful instance of his wit I remember. He walked into a club one day, when a man with a drawl approached him and said:—

"I say, have you seen a waiter in here with one eye called James?"

"What was the name of the other eye?" asked Mr. Gilbert, without smiling.

Minard's Liniment for sale everywhere.

There was a specialist in a certain complaint who always insisted that, as he was an exceptionally busy man, his patients should partialy divest themselves of clothing before coming into his presence. One day a man came in without having done this, and was about to speak when the doctor broke out with:—

"Don't you know my rule about taking off your clothing? Go and do it at once."

"But—"

"I refuse to see you until you have removed your upper clothing," replied the doctor.

A moment later the man appeared partially undressed.

"That's better," said the doctor. "Now, what's wrong with you?"

"I only came to ask you to settle this little tailor's bill which has been outstanding so long," said the victim.

An old Hebridean was giving a visitor some account of his experiences during a slight seismic disturbance.

"I suppose," remarked the Sassenach, "it was rather a surprise you to find the crockery jumping off the shelves?"

"Aye, it wiss that. But the wee wiss mair surprised still. I've been marrit near thirty years, an' it's about the only throuble in the hoose she hisna' blaimmed me for."—London Tatler.

Sorry for the Queen.

An English professor wrote on the blackboard in his laboratory:

"Professor Wilson informs his students that he has this day been appointed honorary physician to her majesty, Queen Alexandra."

In the morning he had occasion to leave the room, and found on his return that some student-wag had added to announcement the words:

"God save the Queen."

If attacked with cholera or summer complaint of any kind send at once for a bottle of Kellogg's Dysentery Cordial and use it according to directions. It acts with wonderful rapidity in subduing that dreadful disease that weakens the strongest man and that destroys the young and delicate. Those who have used this cholera medicine say it acts promptly, and never fails to effect a thorough cure.

The coming sale of Orleans house is a reminder that many anecdotes of Louis Philippe, who gave the modern name to the mansion, still linger around Twickenham. When "Egalite" returned to England after the loss of his kingdom, he went one day to Twickenham to see some of his old tradesmen, and was saluted by a stout person whose name he could not recollect. "What were you when I lived here?" asked the ex-king. "Please your royal highness," was the reply, "I kept the Crown," meaning the public house near the entrance to Orleans house. "Did you?" rejoined Louis Philippe; "well, my good fellow, you were lucky; you did what I was unable to do."

Minard's Liniment Cures Burns, etc.

"If I have ever nature-faked," said Rev. William J. Long, the gifted nature writer in Stamford, "I have done so unconsciously. My knowledge, not my veracity, has been at fault.

"You know," resumed Mr. Long, smiling, "anyone may nature-fake through ignorance. Thus:

"One day I was addressing some Stamford school chaps on the subject of bees, and, turning to a bright-looking little chap, I said:

"'With what part of the body does a bee buzz, Jacob?'

"Jacob answered confidently, but ignorantly, launching a tremendous nature-fake:

"'Its buzzum, sir,' he said."—Boston Post.

THE RECORD ADMIRAL FURNACE

Is fitted with the improved Record Triangular Grate—the most perfect furnace grate on the market. Of the four triangular grate bars, each bar is operated by the use of a handle applied to either of the two centre bars. To remove this handle after shaking is impossible until the grate bar has been returned to its original position, flat and in place, without any of the cogs sticking up. The result is that the bars are always flat under the fire and that it is impossible for lumps of coal to drop through and be wasted. The Record Triangular Grate can be entirely removed from without without lying on stomach or bothering with a light. 104

TRISCUIT

is the food of health and strength. It is Shredded Whole Wheat, compressed into a wafer, and is immeasurably superior to white flour, bread or pastries. It is delightfully satisfying as toast. Delicious with cheese.

MORE WHOLESOME AND NUTRITIOUS THAN MEAT.

Pen-Angle

The underwear that fits perfectly, wears out slowest, and neither shrinks nor stretches, is named PEN-ANGLE, and bears this trade mark in red. Who sells it, guarantees it, in the maker's name. Made in many fabrics and styles, at various prices, in form-fitting sizes for women, men and children. PEN-ANGLE Guaranteed Underwear wears best and

fits better

School Children's Definitions

"A vacuum is nothing shut up in a box."

"'Etc.' is a sign used to make believe you know more than you do."

"The equator is a menagerie line running round the centre of the earth."

"The climate of Bombay is such that the inhabitants have to live elsewhere."

"Henry VIII was brave, corpulent and cruel; he was frequently married to a widow, had an ulcer in his leg and great decision of character."

It Needs No Testimonial—It is a guarantee in itself. If testimonials were required they could be furnished in thousands from all sorts and conditions of men in widely different places. Many medicines are put forth every year which have but an ephemeral existence and then are heard of no more. Dr. Thomas' Eclectric Oil has grown in reputation every day since it first made its appearance.

Have you heard the story about Mr. Jacob Astor and the man he met at Niagara? When Mr. Astor went to view the Falls—so the story goes—there was a man near him who groaned in a most alarming fashion on seeing the water. Mr. Astor asked him if he was unwell.

"Oh, no, but what a waste of water!"

"Perhaps you are an engineer, and would like to turn this waste water to power?"

"No, it isn't that," replied the other. "I'm a milkman."

The Veracious Verger—In this far corner lies William the Conker; b'ind the orgin, where you can't see 'em, are the tooms of Guy Fox, Robin 'Ood and Cardinal Wolsey. Now does that guide book, as I sees you 'ave in your 'and, tell you who is lyin' here, sir?

The Skeptical Tourist—No; but I can guess.—Cleveland Leader.

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75c per bottle. Sold by all druggists.

Take Hall's Family Pills for constipation.

Vaudeville Manager—I can't book your act—no profanity is permitted in this house.

Vaudeville Artist—There's not a profane word in our entire sketch.

Vaudeville Manager—I know, but we don't like our audiences to swear, either.—Pittsburg Leader.

ENGLISH SPAVIN LINIMENT removes all hard, soft or calloused lumps and blemishes, from horses, blood spavin, curbs, splints, ringbone, sweeney, stifles, sprains, sore and swollen throat, coughs, etc. Save $50 by use of one bottle. Warranted the most wonderful Blemish Cure ever known.

A good story is told in connection with the last Ascot race meeting, says a London paper. An American who was used to going into racing booths in his own country, ordering luncheon and paying a dollar, found himself hungry at the royal meeting, so he walked into the first tent handy and told the attendant to give him something to eat. The man put a sumptuous luncheon before him, to which, as well as to the champagne, the visitor did ample justice. He then handed the attendant five shillings, received his thanks and was bowed out of the tent, inwardly congratulating himself on the moderateness of the charge. An English friend whom he met outside said:

"I did not know you were acquainted with Lord H."

"Neither am I," was the answer.

"Oh, I beg your pardon," said the interrogator; "I thought you were, as you came out of his tent."

All over the world there are 562,436 miles of railway lines now open. America, with its vast territory, has 285,781 miles, and Europe is a poor second with 193,133 miles.

The Cough of Consumption

Your doctor will tell you that fresh air and good food are the real cures for consumption. But often the cough is very hard. Hence, we suggest that you ask your doctor about your taking Ayer's Cherry Pectoral. It controls the tickling, quiets the cough.

Ayer's — We publish our formulas. We banish alcohol from our medicines. We urge you to consult your doctor.

One of Ayer's Pills at bedtime will cause an increased flow of bile, and produce a gentle laxative effect the day following. Formula on each box. Show it to your doctor. He will understand at a glance. Dose, one pill at bedtime.

—Made by the J. C. Ayer Co., Lowell, Mass.—

BLOOD SUBSTITUTE.

Why Saline Solution Is Sometimes Injected Into the Veins.

Occasionally in cases of serious wounds where there has been great loss of blood the published reports state that "saline solution" was injected into the veins to supply the deficiency. The average reader, however, has a very vague if any idea how a solution of salt takes the place of blood.

Not to go into a complete analysis of the blood, it is sufficient to note that of 1,000 parts, 780.15 is composed of water, albumen 65 parts, sodium and potassium 8.371, coloring matter (supplied by the red blood corpuscles) 138, leaving only some 12 parts to be composed of fibrin, fat, calcium and magnesium, etc. Where there is serious loss of blood a state of collapse sets in because, the normal weight of blood being reduced, the heart's action is diminished, there being less resistance for that organ to overcome.

To counteract the result of shock and collapse it is necessary to stimulate the heart by restoring the normal weight; in other words, to get it to work by giving it something to work on. As the analysis shows, of 1,000 parts of blood nearly 800 are composed of water and sodium, and therefore a plain saline solution makes a good substitute. The heart does not know the difference, and it goes to pumping away as usual as soon as this imitation blood gets in the veins. The saline solution serves to tide the patient over the danger point. As the food is converted into chyle, new blood is formed, the red corpuscles are supplied rapidly from the normal tissues, and the saline solution is thrown off through the secretions in the usual way.

Formerly transfusion of blood was the means employed, but this always objectionable method has been supplanted. The greatest objection to the transfusion of blood from one person to another was that to supply the necessary amount to restore the wounded patient it was inevitable that the volunteer should be almost as badly drained, so that the physician would have two patients on his hands where he had one. Besides, there was always the risk of transfusing disease to the patient with the other's blood. Dogs and sheep have been sacrificed to surgery for this purpose, but most people prefer to use blood of their own manufacture to any imported from beasts or their fellow creatures.

ITEMS OF INTEREST.

The first of the modern bank notes were made in China about the year 1000 A. D.

Blood in its natural state contains a surprising amount of pure air, amounting to nearly seven-eighths of its entire bulk.

The wasp's nest is constructed of a first class article of papier mache, made from the pulp of wood, with an animal glue specially prepared by the wasps for the purpose.

The honey of the snapdragon cannot be extracted by the common bee, which has not weight enough to pull down the lower jaw of this curious flower. Only the bumblebee has access to the interior.

The first trapdoor was made by a species of African spider which has its nest in the ground and closes the entrance by means of a trapdoor opening outwardly and covered with bits of earth and grass in order to escape observation.

Women's Love of Ugly Men.

The illustrious men in history who were distinguished as much for the fascination which they exercised over the fair sex as for their talents and ability were, as a rule, plain and insignificant in appearance. Julius Caesar was a very ill favored man, and yet when a mere strippling, before his fame in Rome, girls of his own age sighed for him and mature women longed for his love. Among the men of later times who were renowned in like manner were Sir Philip Sidney, plain almost to ugliness; Paul Searron, the comic poet, a cripple; Voltaire, unmistakably ugly, and Rousseau, whose manners were awkward as his face was plain, while John Wilkes, who had the power to subjugate any woman who spoke to him for even five minutes, was admitted by his own showing to be the ugliest man in England in his time.

The Toe Nails.

Owing to the friction and pressure to which toe nails are exposed in all persons who wear boots or shoes there is a great tendency to thickening on the underpart of the free growth, the portion of the nail that extends beyond the toe point. This thickened part sometimes gets pressed against the flesh, and then very painful corns result. The preventive treatment is to keep the nails cut short and to remove the rather soft thickened parts with a blunt pocket knife or scissors blade.

Pleasant.

"Tommy," said the young man to his prospective brother-in-law, aged five, "will you be sorry when I marry your sister?"

"Yes," answered the little fellow; "I'll be sorry for you."

The Difference.

Harry—Do you know the difference between capital and labor? Jack—No. Harry—Well, if I loaned you 25 cents, that would be capital, and if I tried to get it back, that would be labor.

The Drawback.

"So Snooks married his stenographer? Well, she doesn't have to work any more."

"Well, she doesn't draw wages any more."

Colds and Cologne.

Grip and colds, according to a French physician, will yield if met at the very beginning with a copious supply of the best cologne. Pour the cologne into a handkerchief rolled to a funnel and inhale the fumes steadily every two or three minutes. After a burning sensation has been experienced one may wait ten or fifteen minutes before taking another sniff. If the bad symptoms have not subsided after twelve hours of this remedy it shows that the malady was too far under way.

ALL HAIL PE-RU-NA.

A Case of STOMACH CATARRH.

Miss Mary O'Brien, 306 Myrtle Ave., Brooklyn, N.Y., writes:

"Peruna cured me in five weeks of catarrh of the stomach, after suffering for four years and doctoring without effect. In common with other grateful ones who have been benefited by your discovery, I say, All hail to Peruna."

Mr. H. J. Henneman, Oakland, Neb., writes: "I waited before writing to you about my sickness, catarrh of the stomach, which I had over a year ago.

"There were people who told me it would not stay cured, but I am sure that I am cured, for I do not feel any more ill effects, have a good appetite and am getting fat. So I am, and will say to all, I am cured for good.

"I thank you for your kindness. Peruna will be our house medicine hereafter."

Catarrh of the stomach is also known in common parlance as dyspepsia, gastritis and indigestion. No medicine will be of any permanent benefit except it removes the catarrhal condition.

Gained Strength and Flesh.

Miss Julia Butler, R. R. 4, Appleton, Wis., writes she had catarrh of the stomach, causing loss of sleep and appetite, with frequent severe pains after eating. She took Peruna, her appetite returned, she gained strength, flesh and perfect health.

Not Sentient Verdure

She (gushingly)—Don't you love all the fresh, green young things?

He (judiciously)—Yes, if they ain't human.—Baltimore American.

Customer—That ice cream freezer you sold me doesn't do the work you claim for it at all.

Salesman—No? Perhaps you—er—didn't use the best quality of ice. It's very important to have the ice very cold, you know.

A Pill for Generous Eaters—There are many persons of healthy appetite and poor digestion who, after a hearty meal, are subject to much suffering. The food of which they have partaken lies like lead in their stomachs. Headache, depression, a smothering feeling follow. One so afflicted is unfit for business or work of any kind. In this condition Parmelee's Vegetable Pills will bring relief. They will assist the assimilation of the ailment, and used according to direction will restore healthy digestion.

Friend—What is that you are writing so busily, Elsie?

Elsie (newly married)—A curtain lecture for my husband. I'm not going to sit up until it pleases him to come home.—Meggendorfer Blaetter.

Minard's Liniment Relieves Neuralgia

"So Crimson Gulch has lost several of its prominent citizens since I was here before," remarked the traveller.

"Yes," answered Bronco Bob. "There has been a good deal of gun play lately."

"I suppose it's the old story of the survival of the fittest?"

"Not out here. It's the survival of the quickest."—Washington Star.

Minard's Liniment Co., Limited.

Dear Sirs,—I had a Bleeding Tumor on my face for a long time and tried a number of remedies without any good results. I was advised to try MINARD'S LINIMENT, and after using several bottles it made a complete cure, and it healed all up and disappeared altogether.

DAVID HENDERSON.

Belleisle Station, King's Co., N.B., Sept. 17, 1904.

According to Rules

Sentry—You can't leave.

Soldier—But I have the captain's oral permission.

Sentry (importantly)—Let's see it!—Translated for Transatlantic Tales from Il Motto per Ridere.

"Poor Gruet got nicely fooled."

"How's that?"

"He married his landlady, thinking he wouldn't have to pay board."

"But how did he get fooled?"

"As soon as she was married she sold the place and he has to pay board for two."—Newark Advertiser.

Celluloid Starch

Perpetual Motion Cranks.

In the days of the Mayflower the first perpetual motion inventors took out their patents for "Engines which being put in order will cause and maintayne their own mocions with continuance and without any borrowed force of man, horse, wind, river or brooke," and in the last century they have applied for about 600 patents which are based chiefly on the force of gravity, loss of equilibrium, specific gravity of floats and weights immersed in water or other liquid, accession of receptacles inflated with air or gas under water, compression and subsequent expansion of gases and of the surface tension of liquids. So sanguinely hopeful are these ingenious designers that in many cases they provide brakes to stop their machines if necessary or to prevent any dangerous increase of speed. The care and thought expended on the principle and detail of many of the inventions demonstrate that many men of mental ability cling to the idea that perpetual motion is possible and that they themselves are successfully solving the problem.

How to Shoot a Rattler.

The writer once saw an Indian kill a rattlesnake in a very peculiar manner. The rattler was about ten feet from the Indian, who was resting the rifle on his knee, apparently taking aim. Whenever he moved the weapon a few inches the snake would move around and get exactly in line with it. Then, to show how the thing was done, the Indian moved about the snake in a circle, and the reptile moved as if its tail were on a pivot, always keeping its head and body in line with the gun. The Indian then agreed to bandage his eyes and shoot the snake in the mouth. The writer bandaged the Indian's eyes, and, holding the gun by his side at arm's length, the latter pulled the trigger, and the ball entered the snake's mouth and passed the whole length of its body. "How do you take aim?" was the query. "The snake, he takes aim," was the reply. We have talked with an old hunter on this proposition, and he claims that a rattlesnake will always range directly in line with a gun or stick pointed at it.—Exchange.

Snakes as War Weapons.

When Hannibal, the great Carthaginian, was fighting Eumenes of Pergamos with a fleet of very inferior strength he hit upon an artifice which would scarcely be sanctioned by the laws of what we are pleased to call civilized warfare. He discovered by means of a bogus message under a flag of truce on which ship the king was. He then caused poisonous snakes to be inclosed in earthen jars. These he distributed among several ships and ordered them to close up on the king's galley. In the melee that followed the jars were flung on to the deck. The curious bombs were greeted at first with ridicule, which soon changed to panic when the nature of their contents made itself manifest. The galley was extricated from the fight as soon as possible, and the captains of the others, believing that the king had taken flight, followed suit, with the result that Hannibal gained a complete victory.

Cats as Retrievers.

"It is claimed," said a Chicago antiquary, "that cats may be trained as retrievers—trained to swim to your slain birds and bring them back to you in their mouths. The thing sounds incredible, but look here."

He held up the photograph of an ancient Egyptian painting. Men with spears rode on the Nile. In some of the boats large cats sat on their haunches in the stern, while toward others several cats swam with dead birds in their mouths.

"This picture," said the antiquary, "proves that the Egyptians used cats for hunting dogs. If they, why not we? The original of the picture is in the British museum, where there are also several pieces of carving that display the cat in the role of a retriever."

The German and the Fatherland.

A German always remains a German. He respects and loves his fatherland, although isolated and separated from it by boundless oceans and vast continents. A German heart always remains true to the country where it first commenced to beat until it is silenced by death. As a rule, to which there are few exceptions, a man who is loyal to the country of his birth will be loyal to the country of his adoption.—Dr. Nicholas Senn.

Niagara.

Niagara is a corruption of the Seneca word "neagara," meaning "across the neck," an allusion to a strip of land between the lakes. The name has been subjected to many changes since the discovery of the cataract, more than thirty different readings being found in the writings of the various early explorers and geographers.

What He Would Do.

Grandpapa — Tommy, Tommy, you aren't behaving well. Do you know what I should do if I were a little boy like you? Tommy—Yes, grandpapa, you'd do the same as I do, 'cause if you didn't you wouldn't be a little boy like me.

The Universe.

The heavens themselves, the planets and this center, observe degree, priority and place, insisture, course, proportion, season, form, office and custom, and all in line of order.—Shakespeare.

The Ambitious Boy.

A boy at seventeen can practically determine for himself whether he will be a simple burden bearer for others as long as he lives, a leech on society or whether he will be a broadminded, useful and successful man. If the boy at this age has no ambition to be anybody and is content to simply let things flicker and take his chance with others just like him, frittering away his opportunities to acquire knowledge and caring only for the trivialities of life, he can make up his mind to carry a hod, ride the brake beam of a freight car or dodge the police as long as he lives, or he can resolve to be a man in the highest sense, seek every means for physical, mental and moral growth and development and must graduate into the ever widening field of utility and success. It matters little what his boyhood environment may be, if he but has the ambition and well grounded purpose he will climb out of it.

ORIGINAL HANDS-UP MAN.

Career in Crime of "Old Bill" Miner, Now Serving Life Sentence.

William A. Pinkerton, head of the detective agency, makes a point of keeping in close touch with the police authorities all over the country and never misses a convention of the International Association of Chiefs of Police. They met in Jamestown recently, and Mr. Pinkerton told them the story of "Old Bill" Miner, who first used the expression "Hands up!" a cry which has startled so many thousands of victims.

Miner, according to Mr. Pinkerton, was one of the first holdup men to operate on the Pacific coast, and is now serving a life sentence in the West Westminster (British Columbia) penitentiary for the robbery of a Canadian Pacific train at Durrer, B. C., early on the morning of May 9, 1906.

"'Old Bill' Miner," said Mr. Pinkerton, "was one of the most remarkable single handed stage and train robbers that ever operated in the far west. He never belonged to any organized band of holdups, generally working alone. On rare occasions, however, he selected an assistant. He always went about his work in a matter of fact way, never posing as a 'bad man' and never taking human life.

"As early as 1869 he served a term for stage robbery in San Quentin. When he got out of prison in 1879 he robbed the Del Norte stage in Colorado of $3,600. He escaped with the booty, finally going to Michigan, where he posed as a California capitalist. When his funds ran low he returned to Colorado and took part in several other holdups.

"For a California stage robbery in 1881 he was sentenced to twenty-five years and was released in 1901. His long imprisonment apparently did little to reform him; for in a year or two he held up the Oregon Railway and Navigation company's train at Milepost 21, near Corbett, Ore. Although a reward of $1,300 was offered for Miner he was not captured.

"A year later he held up the Canadian Pacific's transcontinental express at Mission Junction, B. C., securing $10,000 in gold dust and money. The Dominion government offered a $5,000 reward for him, which was increased to $12,800 by the rewards of the Canadian Pacific and the provincial authorities.

"Ignoring the price on his head, Miner held up another Canadian Pacific train at Durrer, B. C. He compelled the engineer to uncouple the mail car and haul it a mile from the rest of the train, where he rifled it of registered letters. Miner believed that the express packages were in the mail car, and when he found they were not he did not have the nerve to go back. He escaped to the islands off the coast. The large rewards offered induced posses to take up the pursuit, and he was captured by the Canadian constabulary after having put up a fight in which one man was wounded. He was sentenced to imprisonment for life."—New York Tribune.

A Naval Prediction.

The chief constructor of the French navy is quoted as saying that he is convinced that the battleship and armored cruiser must before long be merged into a single type, the battle cruiser. This resultant concentration of great attack and defense with extreme speed will, he believes, be found illustrated, say, in 1915, in a vessel of 25,000 tons, mounting a unit battery of high caliber guns and developing a speed of not less than 22 knots. The French constructor is also persuaded that any navy now bold enough to lay down battleships of 25,000 tons displacement will by one stroke secure a tremendous advantage over all its rivals, because a squadron of four such vessels will greatly outclass six battleships less effective in the energies that can be assembled.—Engineer.

The Biggest Horse.

Nebraska Queen, the largest mare on earth, is a product of the breeding farm of S. E. Sparks at Falls City, Neb. Mr. Sparks is to the horse world what Burbank, the noted Californian is to the world of vegetables and fruit. It is his purpose to make two big horses grow where one little one grew before, and he is doing it. He has raised a number of large horses but none so large and perfect as Nebraska Queen. She is 20.1 hands high, eleven feet eight inches in girth, thirty-two inches length of head, nine feet three inches in girth, forty-two inch shoulder, twenty inch throat, eighty inch collar and weighs over 2,800 pounds. She is perfect in every proportion, kind, gentle and intelligent of beautiful color and is truly a model horse.—Kansas City Journal.

A Losing Game.

Two ice cream venders were fined at Tower bridge police court yesterday for gambling with their customers. It was stated that a coin was spun, and if the vender guessed correctly he got the money and gave no ice cream. If he lost, he gave the winner a penny's worth of ice cream and a halfpenny. The advantage seems to us to be too much with the customer. It is worth paying more than a penny to get out of having east end ice cream.—London Globe.

Manila Hemp.

Manila hemp is the most valuable cordage fiber in the world. Apparently it cannot be grown successful anywhere else. The plant looks exactly like a banana plant. The mode of stripping hemp is still very crude. The invention of a successful machine would increase the production enormously. Last year's exports were valued at $10,612,632.

The Tallest Men of Europe.

The tallest men of Europe are found in Catalonia, Normandy, Yorkshire and the Ardennes district of Belgium. Prussia gets her tallest recruits from Sleswick-Holstein, the original home of the Anglo-Saxons; Austria from the Tyrolese highlands. In Italy the progress of physical degeneration has extended to the upper Apennines, but the Albanian Turks are still an athletic race, and the natives of the Caucasus are as sinewy and gaunt as in the days of the argonauts.

THE CRESCENT SYMBOL.

How It Came to Be Adopted by the Mohammedans.

The crescent symbol of the Mohammedans has nothing to do with their peculiar religious opinions and ceremonies. It was not originally a symbol of the followers of Mohammed at all, but was first used by the Byzantines. Thousands of coins have been found in all parts of Turkey which date back to the time when Constantinople was known as Byzantium, and on each of these the symbol of the crescent appears, proving conclusively that it was in use as an emblem among the people of that region long before Byzantium was overthrown and its name changed to Constantinople. The story of the origin of the crescent symbol is as follows: When Philip of Macedonia besieged Byzantium he had planned to storm the city on a certain cloudy night, but before his arrangements were completed the moon shone out and discovered his approach to the besieged citizens, who accordingly marched out and repulsed his forces, something which would have been impossible in the darkness. After that event all Byzantine coins bore the symbol of the crescent moon, which was always alluded to as the "savior of Byzantium."

After many years the hordes under Mohammed II. captured Constantinople. At that time the crescent was used everywhere and upon everything. Suspecting that there must be magical power in the emblem, the Mohammedans appropriated it and have since used it as their only symbolic decoration.

A DROP OF WATER.

It Has a History That Is Full of the Wonders of Romance.

Water that is now in the ocean and in the river has been many times in the sky. The history of a single drop taken out of a glass of water is really a romantic one. No traveler has ever accomplished such distances in his life. That particle may have reflected the palm trees of coral islands and have caught the sun ray in the arch that spans a cloud clearing away from the valleys of Cumberland or California.

It may have been carried by the gulf stream from the shore of Florida or of Cuba to be turned into a crystal of ice beside the precipices of Spitzbergen. It may have hovered over the streets of London and have formed a part of murky fog and have glistened on the young grass blade of April in Irish fields. It has been lifted up to heaven and sailed in great wool pack clouds across the sky, forming part of a cloud mountain echoing with thunder. It has hung in a fleecy veil many miles above the earth at the close of long seasons of still weather. It has descended many times over in showers to refresh the earth and has sparkled and bubbled in mossy fountains in every country in Europe.

And it has returned to its native skies, having accomplished its purpose, to be stored once again with electricity to give it new life producing qualities and equip it as heaven's messenger to earth once more.

The Roman Climate.

Gales are very rare in Rome and never blow with extreme violence. The most striking peculiarity of the Roman climate is the absence of high winds. The air is pure and clear, owing to the almost complete absence of smoke, even in the winter months. The average yearly movement of the air is only five miles an hour. This is of enormous advantage in winter, since the "tramontana" (north wind), which is the prevailing wind in this season, is, if strong, decidedly cold and bracing, but when under eight miles an hour is delightful for most people, including invalids. The south winds are essentially sea breezes. They frequently alternate with the tramontana. The sirocco (southeast wind), which fortunately does not often blow, is moist and enervating. It gives rise to languor in most individuals.

A Story of Blaine.

James G. Blaine made his first appearance on the stump in the canvass in Maine in 1856. He went to Farmington to hear Senator William Pitt Fessenden speak and with no intention to speak himself. But Mr. Fessenden did not arrive on time, and some of his Augusta friends put Blaine forward to take the platform. He likened his situation to that of a farmer who had a horse for which he asked $500. A horse trader offered him $75 for the animal. "It's an awful drop," said the farmer, "but I'll take it." The story took and so did the speech that followed.

Modesty.

True modesty is a discerning grace and only blushes in the proper place, but counterfeit is blind and skulks through fear, where 'tis a shame to be ashamed t' appear; humility, the parent of the first, the last by vanity produced and nurs't.—Cowper.

Full of Grit.

"Fifty miles an hour, now," hissed the daring motorist as he gripped the steering wheel still more firmly. "Are you brave enough to stand it?"

"Yes; I am full of grit," replied the pretty girl as she swallowed another pint of dust.

Conversation.

The reason why so few people are agreeable in conversation is that each is thinking more of what he is intending to say than of what others are saying, and we never listen when we are planning to speak.—Rochefoucauld.

He Should Be Rich

"Is Howard stingy?"

"Is he stingy? Why, that man won't even buy a calendar for fear he may not live the year out to use it up."—Life.

Minard's Liniment Cures Dandruff.

The erection of biological and fisheries buildings will be proceeded with at once at Victoria.

"The congregation paid up every cent of my back salary today," announced the village minister.

"How in the world did they happen to do that?" queried his astonished wife.

"I announced from the pulpit," explained the good man, "that unless I got it I would not be able to take the three months' vacation I had planned."—Chicago News.

Roof for the Years to Come

SALE OF CROWN-GRANTED MINERAL CLAIMS.

For Unpaid Delinquent Taxes in the Rossland Assessment District, Province of British Columbia.

I HEREBY GIVE NOTICE that on Monday, the 4th day of November, A. D. 1907, at the hour of 12 o'clock, noon, at the Court House, in the City of Rossland, I shall offer for sale at public auction the crown-granted mineral claims hereinafter set out, of the persons in said list hereinafter set out, for the delinquent taxes unpaid by said persons on the 30th day of June, 1907, and for costs and expenses, including the costs of advertising said sale, if the total amount due is not sooner paid.

LIST ABOVE MENTIONED:

Rossland, B. C., October 4th, 1907.

J. KIRKUP,
Collector.

THE LEDGE

Is published every Thursday at Greenwood, B. C., and the price is $2 a year, postage free to all parts of Canada, United States, Mexico and Great Britain. To other countries it is sent postpaid for $2.50 a year. Address all letters to The Ledge, Greenwood, B. C.

R. T. LOWERY,
PUBLISHER.

GREENWOOD, B. C., OCT. 17, 1907

THE craze for locating timber is still on in British Columbia.

GREENWOOD may yet be a second Butte. Rome was not built in a night.

COPPER may be a little low in price, but ham and eggs still holds its own.

THE C. P. R. can make a hit in Greenwood by opening a down-town office.

IT has not been necessary to fumigate any of the telegrams from Phoenix.

WHEN corrupt and dishonest men are exalted a blot is put upon the municipality or the nation.

GRAND FORKS has become so good lately that you cannot shake the bones in that city. Shaking hands is still legal.

THE biggest potato on earth has been raised at New Denver, and already the Irish are looking for the road that leads to the Lucerne of North America.

THE strongest men in the world are the porters at the railway stations in Turkey. They live upon figs and black bread. That diet must be better than beef.

EVERY province should have comfortable free institutions where the aged of both sexes can live in ease and plenty when too old to battle with the world for a living.

MINING camps must be kept clean if the inhabitants desire good health. The towns in the Boundary can stand a few stiff jolts of chloride of lime, and the authorities should see that it is administered.

IN B. C. it is unlawful for children under fourteen years of age to carry firearms unless accompanied by father or guardian. It should be unlawful for some children twice that age to carry guns, judging from the many accidents that occur in the land.

IT is not thought that Lemeiux will do much in Japan towards settling the Jap question. However, he may be able to pick up some pointers in reference to running a postoffice department cheaper, and upon his return be able to increase the surplus in his department.

THIS having to put a cent stamp on every paper we send into the States makes an editor wish the times were here again when the editor in Canada had not to pay any postage on his papers. Not because it costs a cent, but merely the annoyance of the affair. The high rate of postage to publishers sending papers into the States is a blow at advertising Canada. If the press stood together it would be taken off.

SOME of the most filthy things in this country are the $1 and $2 bank notes. They are never washed and smell like a backyard in Phoenix. No doubt disease germs are passed around with this kind of money, and the banks would do well to fumigate all the bills passing through their hands. About the only fumigation they ever receive is that from the smoke of cigarettes blown upon them by bank clerks. We have burned up a lot of this tainted money, but the amount in circulation seems to be great as ever. "Filthy lucre," as it were.

Gold filled watch chains from $2 up. A. Logan & Co.

Fresh and Salt Meats, Fish and Poultry
Shops in nearly all the towns of Boundary and the Kootenay.

Hotel Brooklyn Phoenix - - - B. C.
Is opposite the Great Northern depot, and is a delightful haven for the weary traveler. Great veins of hot water, run through the entire house, and bathrooms are always at the service of those in search of material cleanliness. The dining room is an enemy to dyspepsia, while the artistic appointment of the liquid refreshment room makes the drinks go down like eating fruit in a flour garden. The sample rooms are the largest in the mountains and a pleasure to drummers with big trunks.
JAS. MARSHALL, Prop.

Drink
Kings Liquer Scotch Whiskey
12 Years Old
J. W. Burmester's White Port.
Jas. Hennessy & Co's 3-Star Brandy.
GREENWOOD LIQUOR CO.
IMPORTERS, GREENWOOD, B. C.

Special Order Tailoring.
In order to meet the requirements of these progressive times and conditions. I have added a special order, custom tailoring department to my already established business. I will represent, as their agent for the Boundary country, the high class and up-to-date special-order custom tailors, The Rex Tailoring Co., Canada's Best Tailors. A full line of samples to select from and now on view at my store. All orders placed with us will be promptly attended to. All garments strictly custom made. Union Label on every garment. Maximum of excellence for minimum of cost, and our motto is: "Once a Customer Always a Customer."
T. Thomas = = = Merchant Tailor
Copper street, Greenwood, B. C.

The Pacific Hotel..
Is under the management of Greig & Morrison. The rooms are comfortably furnished, and the bar contains the best brands of wines, liquors and cigars.
The Pacific Cafe..
Is the best appointed Restaurant in the interior of British Columbia. The best cooks and most attentive waiters only employed. Open all the time
Howard Moore, Proprietor.

Windsor Hotel
Is the best furnished hotel in the Boundary district. It is heated with steam and lighted by electricity. Excellent sample rooms. The bar is always abreast of the times, and meals are served in the Cafe at any hour, day or night.
Ernest J. Cartier, Prop.

Plumbing

R. A. MATHEISON, Secretary.

THE DOMINION HOTEL
In Phoenix is situated on a delightful elevation and from its windows can be seen all the scenic beauties of this famous copper camp. The excellence of the cuisine attracts the attention of all who are kind to the inner man, and the bar contains fluids that would please a Greek god, while it is not necessary to be up so high in order to smoke any of the cigars. Miners, Millionaires and Tourists always welcome.
