Three Cornered Contest In Greenwood Riding

Three candidates have entered the field in the Greenwood riding, for the Provincial election on Dec. 1st. On nomination day, Nov. 10th, the following were nominated: John Robert Jackson, farmer, Midway. John Duncan MacLean, provincial secretary, Greenwood. George Henry Pitman, farmer, Rock Creek.

To the Electors of Greenwood Riding

At a convention held in Greenwood on Nov. 2nd. I had the honor of being chosen as the standard bearer of the Conservative Party in this riding and as such I solicit your support.

As you are aware I am a farmer and having resided in the district for over 31 years, therefore, I am in a position to know the requirements of the different parts of this constituency and if eleected will do my utmost to advance your interests.

Sincerely yours,
JOHN R. JACKSON.

Around Home

Good skating is now being enjoyed on the pond.

H. H. Sawyer was in town from Carmi on Monday.

R. D. McKenzie, of Beaverdell, arrived in town on Monday.

J. E. Hoy shot three large deer up the No. 7 Road last week.

D. R. McElmon, Watchmaker and Jeweller, Greenwood, B. C.

Mr. and Mrs. A. J. Morrison returned from Spokane on Monday.

Al. Holmquist, of Beaverdell, was in town for a few days this week.

H. R. Bidder returned on Saturday from a business trip to the coast.

BORN.—In Trail on November 3, to Mr. and Mrs. J. P. Oliver, a daughter.

Posters are out announcing the annual masquerade ball on Friday Nov. 12.

Order your Christmas Greeting Cards now. Samples on display at Goodeve's Drug Store.

Mrs. E. A. St. George Smyth, of Grand Forks, is the guest of Mrs. T. W. Bingay in Trail.

Ralph Smailes, formerly of Rendell & Co., Greenwood, died recently on Vancouver Island.

Mrs. L. Terhune and two children left last Sunday to join her husband a Copper Mountain.

G. H. Pitman of Rock Creek, was the choice of the Farmers convention in Midway on Saturday.

Mr. and Mrs. Jack Ryan returned to their home in Rossland after spending a few days in town.

Splendid assortment of Neilson's chocolates, both in bulk and box, just in at Goodeve's Drug Store.

W. H. MacInnes, of Victoria, civil service commissioner for British Columbia, was in town last week.

Mr. and Jas. Drum have arrived in town. Mr. Drum intends working his mineral claim near the C.P.R. Depot.

The second annual masquerade ball to be given by the G.W.V.A. on Nov. 12th, promises to be even greater than last year.

H. McKenzie, of the Workmen's Compensation Board, with headquarters in Rossland, was in Greenwood on Monday.

Mr. and Mrs. J. S. Shaver have left Rock Creek for Trail where Mr. Shaver recently purchased considerable ranch land.

Howard Bush and W. J. E. Biker returned to Nelson this week, with three deer, the result of a hunting trip up the Main Kettle river.

Chas. King has taken up the morning mail delivery service with the post office inspector who has promised to given the matter his attention.

J. V. Mills, of Greenwood, and John Zurfluh, of Midway, have returned from a successful hunting trip up the Main Kettle river, bringing in a 2-point buck each.

Col. C. E. Edgett, D.S.O., the soldier-farmer candidate in the Yale by-election, will address a public meeting in the Greenwood threatre at 4 o'clock this (Thursday) afternoon.

Hon. J. D. MacLean was called to the coast for a cabinet meeting, and will return to Greenwood on Thursday. He will hold meetings at principal points in the riding at an early date.

Remember the 12th of November, Masquerade Ball. Three prizes to be given, Grand Forks orchestra and a sit down supper. A large crowd is expected and spectators will be charged 25c.

The Late Mrs. Keffer.

The many friends of Mrs. Emily C. Keffer, wife of Frederic Keffer, will be grieved to learn that she passed away at her home in Spokane, after an illness of three months. Mrs. Keffer lived in Greenwood from May 1896 to March 1915, and she was beloved by all for her charming manner and kindly disposition. Since 1915 Mr. and Mrs. Keffer made their home in Spokane, after spending 19 years in Greenwood, where her husband was consulting engineer for the B.C. Copper Co.

Born in Ohio in 1860. Mrs. Keffer was a student and librarian at the Ohio State university in Columbus. After her marriage in 1887 she removed to the mining regions of the western United States and Canada, where her husband was engaged in his profession.

She was prominent in many activities here and at Spokane and was a devoted member of the Christian Science church. Beside her husband, she leaves a son, Robert, who is a research chemist with the Anaconda Copper company in Mantana, and a brother, Milton Lahner, of Spokane; also three brothers and a sister in Columbus, Ohio.

The burial services were held on Monday, Nov. 8th, at 11 o'clock, from Smith & Co's undertaking parlors. She was laid at rest in the Greenwood (Spokane) cemetery.

Trail Ore Receipts

The Consolidated Mining and Smelting company received 12,125 tons of ore in the last eleven days of October, according to a Trail report. This is comparable with 12,733 tons in the last ten days of September. The receipts for the September period were regarded as among the greatest for ten days in the history of the company. The receipts in detail follow:

Bluebell, Riondel	185
Emerald, Salmo	38
Granby Con., Grand Forks	91
Josie, Rossland	228
Monarch, Field,	33
North Star, Kimberley	159
Paradise, Lake Windermere	35
Ruth, Ainsworth	63
Skyline, Ainsworth	63
Waterloo, Edgewood	8
Company Mines	11,230

Hon. W. J. Bowser, leader of the opposition, and J. R. Jackson Conservate candidate will address the electors of Greenwood Riding at Riverside Hall, Rock Creek, Friday evening, November 12th at 8 o'clock.

M. F. Madden, of Chicago, is on a ten days business trip to Greenwood. On being asked by The Ledge representative as to the future plans of the Providence mine, Mr. Madden had no statement to make, but said that work was going on steadily and that high grade ore is being shipped regularly.

E. E. L. Dewdney manager of the Bank of Montreal at New Denver, and Mrs. Dewdney are leaving for Rossland where Mr. Dewdney will manage the branch of the bank. A few days ago at New Denver they were presented with an illuminated framed address and a cheque for $225 on behalf of the citizens of the Slocan as a token of esteem in which they are held.

In our report of the Prime Minister's visit to Greenwood last week the writer inadvertently made a slight omission. By special request the Right Honorable Arthur Meighen asked to see Mr. T. A. Garland as he had promised to do so before leaving Ottawa as the premier is intimate with relatives of Mr. Garland, Mrs. Meighen, wife of the Prime Minister, is well acquainted with Mrs. A. B. Harris, having known one another in Birtle, Man. It was a great honor to Mr. Garland and to Mrs. Harris to be visited by a gentleman who holds the highest position in the land.

Central School Report October 1920.

DIVISION I

V. E. Tripp, Principal.

No. enrolled	39
No. with perfect attendance	25
No. of days school was in session	19

Perfect attendance:

Emmet Anderson, Jack Anderson, Agda Carlson, Dolly Granberg, Johnson Beattie, Gordon Jenks, Maria Williamson.

Samuel Eustis, Margaret Eddie, Anund Anderson, John Kerr, George Morrison, Silvia Price, Gertrude Dixon.

Ethel Benson, Eraine DuHamel, Horace DuHamel, Allan Fraser, Ruby Goodeve, Mary Klinosky, Cicilia Hallstrom, William McLeod, Annie Thorslund, Ernest Wyder, John Wyder.

Senior Reader IV: Estella Storer, Edna Williamson, Mabel Axam, Ethel Fraser, Maria Williamson, Johnson Beattie, Gordon Jenks, Harold Folvik, Emmet Anderson, Joe Klinosky, Russell Eustis, Jack Anderson, Dolly Granberg, Agda Carlson, Lilly Intilla.

Junior Reader IV; Mildred McLaren, John Kerr, Anund Anderson, Margaret Eddie, George Morrison, Samuel Eustis, Silvia Price, Gertrude Dixon, Mary Kerr.

Senior Reader III; John Wyder, Allan Fraser, Ernest Wyder, Ruby Good-eve, Mary Klinosky, Eraine Duhamel, William McLeod, Cicilia Hallstrom, Joe Putzel, Horace Duhamel, Annie Thorslund, Ethel Benson, John McDonell, Joe Krouten.

DIVISION II

C. McIntosh, Teacher.

Perfect attendance:

Bessie Bidder, George Bryan, Myrtle Dixon, Lawrence Duhamel, Lloyd Eustis, Harry Hallstrom, Irene Inglis, Clarence Johnson, Doris Kinsman, Kathleen McLeod, John Putzel.

Proficiency List.

Junior III Reader: Bessie Bidder, Edward Wilson, Doris Kinsman, Myrtle Dixon, Kathleen McLeod, Tillie McDonell, Frank Campolieto.

Senior II Reader: Lawrence Duhamel, Clarence Johnson, Doris Dixon, Lloyd Eustis.

Junior II Reader: Irene Inglis, Percy Fraser, Harry Hallstrom, George Bryan, John Putzel. Helen Kerr.

DIVISION III

J. McKee, Teacher.

Number enrolled	29
Perfect attendance	18
Days school in session	19

Perfect attendance:

Eileen Bryan, Violet Benson, Lewis Clerf, Robert Carlson. Merideth Fenner, Roy Hallstrom, Lewis Mitchell, Robert Mitchell, Malcolm McLeod, Laura Mills, Bertram Price, Marguerite Ritchie, Alice Ritchie, Bruce Trehune, Irene Watson, Daisy Watson, Mary Skelton, Dick Morrison.

Proficiency List.

First Reader: Lawrence Folvik, Robert Mitchell, Lewis Mitchell, Edward Parry, Margaret Royce.

Second Primer: Merideth Fenner, Malcolm McLeod, Eileen Bryan, Mary Skelton, Daniel Kerr, Dick Morrison, Bertram Price, Marguerite Ritchie.

First Primer: Arthur Cox, Yvonne Swayne, Daisy Watson, Irene Watson, Allan McCurrach, Robert Carlson.

Receiving Class: Laura Mills, Bruce Trehune, Mary Putzel, Roy Hallstrom, Lewis Clerf, Alice Ritchie, Violet Benson, Charles Royce.

Hon. J. D. MacLean Receives Nomination

An open Liberal convention was held in Riverside Hall, Rock Creek on Friday evening, Nov. 5. It was attended by 200 people, including a large number of ladies. D. McPherson was appointed chairman and J. H. Goodeve secretary.

After a short speech by the chairman nominations were declared in order. W. Clark, of Rock Creek, placed Hon. J. D. MacLean's name before the meeting. It was seconded by representatives from all polling divisions of the Greenwood riding. No other name was brought forward, Dr. MacLean was then declared the unanimous choice of the convention, and was called upon for a speech, in which he showed the favorable record of the present government.

Mining News

In the course of a letter to the stockholders, L. L. Merrill, president, makes the following statement in reference to the suspension of operations by the Hedley Gold Mining company: "During the world war we continued operations at Hedley, as we felt it our duty, not only to British Columbia and the Allies, as the gold was needed, but also felt our moral obligation to the people of the town of Hedley. After the armistice was signed, we continued to operate, thinking all costs including supplies and so forth, would come down and allow us to make a fair profit. We have been disappointed in this conclusion and find that we can not earn reasonable dividends under existing conditions and maintain our reserves of ore. The mine, mill and other plant should be in good condition to start up when times justify it. We feel that under prewar conditions, or even 20 per cent thereof, we can earn good dividends."

"With copper selling below 15 cents, lead at close to six and a half cents and zinc at a little under seven cents, it must be apparent, even to the miner, that production costs must come down or employment largely cease. It is a matter of inexorable economics, dictated by the very human fact that producers will not function at a loss. After a world-wide orgy of high wages, high costs, high railroad rates, high money and high extravagance, the rapidly deflating balloon is descending to earth. There is no dodging the unescapable conclusion that earth must be reached with something of a bump, even though the pilot does his level best. All things considered, metals are selling at figures proportionally far below those prevailing in pre-war days and readjustment of a drastic nature is unavoidable. Necessarily, wages will be the last item of costs to come down, but come down they must, and there seems every reason to believe that the process will be in full swing during the coming winter. It is to be hoped that when the time comes, labor in the mining districts of the Northwest will do its own thinking and refuse to be led away into economic unsoundness by loud-mouthed agitators. The undivided efforts of all classes of society will be needed to keep the boat on an even keel, and labor's part will in great measure be the determining factor. Like youth, ecocomics must be served, and the day of service is at hand." Spokane Mining Truth.

Many complaints are being made of young children breaking windows in unoccupied buildings and parents would be well advised to caution their youngsters relative to this undesirable practice.

When you wish "somebody would invent something new to eat" you need BEECHAM'S PILLS. Even when digestion is good, poisons are formed during its processes that unless eliminated irritate mind as well as body.

(Continued)

Haight stood up. "Rot," he fumed—"all dunged rot. Whoever heard of such a law? Bosh! I tell you this world is full of smooth sharks who steal and do all sorts of shady things—even murder—and get away with it."

"No, they don't." Timberley's tones were crisp. "They pay—some time. Any day you care to—providing you know how—you may see that story I have just cited enacted here in this forest, Haight. Everything pays, some time, I tell you; everythin."

Haight rose and turned towards the tent. "Of course I know that you owe Dorkin a grudge, and that you're Injun enough to pay in full," he said quietly; "but," he added scathingly, "I never knew before that you had a streak of yellow that would go between you and your purpose and make you grope for a motive."

Timberley reached out and gripped Haight's thin arm in fingers of steel. "Haight," he said sombrely, "you're sick, fanciful; otherwise, I would put you across my knee and spank you good."

Haight turned fiercely upon his friend; then gradually the anger melted from his eyes; the long face became transfigured by a smile. Timberley caught a suspicion of moisture in the blue eyes now appealing to him.

"Haight," he said gently, "there's nothing I can tell you. Come, Musko has dinner ready, and I'm hungry as a hunter."

They ate dinner in silence. Even the Indian, who usually had some plan for canoe trip or sojourn to some noted trout streams to lay before his patrons, was quiet throughout the meal. Fragrant bacon and crisp trout, their vermilion spots still showing dully along their sides, disappeared quickly. Dinner over, Timberley, without so much as a word, caught up his hat, picked up rod and fly-book and turned towards the trail. Haight watched him from the corners of his eyes. "It's sure hell to be turned down by the one girl," he thought. "It's certainly working ructions with poor old Tom."

Half an hour later he came upon Timberley seated on a log, in a little glade overlooking a tumbling stream. His elbows were on his knees, and he was nursing his chin in his hands. Haight stepped on a dry twig and Timberley swung quickly about. "Oh," he said relievedly, "it's you."

"Tom," said Haight, coming forward, "I've been thinking things over, and something tells me you ought to go back to the city."

Timberley was silent.

"There's your work—you know," insisted Haight, and—and it don't seem that you've been able to get away from what you wanted to leave behind—does it."

Timberley threw out his arms in a gesture of helplessness. "Fate seems to be stacking the cards, Haight," he laughed shortly; "but I guess I'm too much of a gambler to quit a game in which everything worth while is staked. And, by God, it takes a crook to plan a system to beat a crooked game. Isn't that right?"

"That's what I'm afraid of, Tom. You're going to do something you'll regret all your life."

"No, I've already done that. What I'm going to do, I don't just know, definitely. But you can discard that notion of my going back to the city, because I'm not going. I'm going to stick with the big show."

"Hell!" Haight breathed the oath fervently, but in his eyes was the glow of admiration he had always felt for Timberley as a fighter and a rough-shod rider over all conflicting obstacles to his ambitions.

With a shrug, he turned back toward the trail; then he paused and said hesitatingly: "I'm leaving tomorrow for a point way up North, Tom. I can't tell you why I'm going, not yet; but you'll know some day, soon—it I have luck. Oh," as Timberley looked up consumedly—"it'll be safe going. I've got that half-breed, Dacho, for guide and he knows the woods like a book. He knows also what I'm after and where to get it. I can't say just how long I'll be gone, but you can stay right here with Musko, providing you won't go back to the city, and you'll be all right."

He paused, waiting for Timberley to storm an objection to his going off and leaving him alone with an Indian for company. But Timberley had resumed his former position, elbows on knees, chin in hands.

All he said was: "All right, Haight. See you to-night," and Haight sought the trail, grumbling.

For a long time Timberley sat in deep thought. Then he signed and, picking up rod and creel, made his way to the stream. He stood, watching the sunlight paint the tumbling water, slanting through the trees like a gleaming hand which seemed clutching at the swirling current with golden fingers. He sighed, as he watched it. That current was Destiny, those clutching fingers were mere atoms, who, like himself, were striving to sway it. Well, they couldn't do it. They might as well go with the current.

A narrow trail ran parallel with the stream. Aimlessly Timberley started to follow it. Perhaps it would lead to a larger stream, deeper water which would enter bigger trout.

For nearly an hour he followed the trail which gradually dipped deeper into the heavy forest. Here the aisles rested on moss and fern, mellow and golden toned. Dull and subdued, day groped through the far-reaching aisles of this, the silent sanctuary of the forest, an alien seeking freedom, yet lingering as though loath to creep beyond the wonders here disclosed.

And all the glad, sweet scents of the world seemed lingering in those darkened corridors; rose, jasmine, heliotrope, odors of myrrh and rare sweet scents of orchid. Subtle, illusive, like the Spirit of the Solitude to which they belonged, they formed the incense of God's great cathedral.

Deeper grew the shadows, as the forest became denser; and now, far ahead, grew up the rumble of deep, "strong water."

A little later Timberley heard the gnash and snarl of the rapid, distinctly. The forest lightened and all about welled up the murmur of the wold things; the chatter of squirrels, the notes of nesting wood-birds.

A glade, broad and verdant green, spread out before him, as he emerged from the trees. At its foot a wide stream flashed and shouted, as it dashed between jagged rocks and threw showers of spray upon the wild flowers lifting from its mossy shore.

Timberley caught his breath, as he gazed. Here was a picture his soul could grasp and understand; something strong, vivid, pulsating; something gloriously unfettered, that touched a chord deep within him and made his pulses leap.

His eyes wandered beyond the stream to a sloping tableland gemmed with tiny groves of fir and cedar; beyond these to a blue lake sleeping beneath a sky of swimming topaz. The white cabins in the clearing, he knew, must be those of Lookup Settlement; those lifting hills, beyond, must be Old Creation Hills.

A finger of forest ran out for perhaps fifty yards into the valley. Timberley wanted to view from its other side. There he could secure the full sweep of the wonderful panorama. He cut through the slender neck of trees and stepped out on the farther side.

Then he turned quickly as though to dive back into the forest again. But it was too late. The girl, seated before the easel, had seen him.

Gravely he lifted his hat and stood, waiting for her to speak. She had risen and the flush which had surged to her face at his intrusion had passed, leaving it deathly pale.

Without so much as a glance at him, beyond that first haughty and disdainful look, she picked up her easel and camp-stool and moved swiftly across the sward to the valley.

Timberley, head still uncovered, watched her until the poplars hid her; then he smiled bitterly. After a time he shook himself and walked slowly down to the stream.

As he stood gazing at the swirling water, his thoughts bitter as wormwood, a slow, revolving eddy at the foot of an obtruding rock broke suddenly, and a big trout leaped, painting a rainbow above the foam. At a time other than this, Timberley's heart would have gladdened at such a sight, and quickly would he have tied a fly in anticipation of a fight with such a monarch of the swift water. Now he allowed the challenge to go unaccepted.

Slowly he turned to retrace his steps to the forest, then stood frowning. A man, or rather a boy almost man grown, stood directly in his path. He was dressed in doe-skin shirt and leggings, and carried a rifle. He looked straight at Timberley from dark, fearless eyes.

Ordinarily Timberley might have treated such apparent hostility, as the bush-lad's attitude displayed, with easy tolerance or contempt; but just at this particular time he was in no mood for it.

He checked the words which the other's undisguised animosity prompted, the dull red of anger dyeing his face and neck as he said, slowly, "I presume you are acting bodyguard to the young lady whom it was my misfortune to frighten away, a few minutes ago?"

"If you mean by that, was I watchin' over her like, I kin tell you that I was. Only, she didn't know it."

"Oh," Timberley's lips twisted in a sneer. "The young lady is fortunate, I am sure. Well," he flared, losing control of himself before the cold, insolent eyes searching his face, "what the devil are you dogging me for?"

"I was wantin' to had to have a word or two with you," said the boy. "I've got somethin' here belongin' to you, Mr. Timberley. I found this tacked to one of the trees in Dorkin's Preserve. I didn't say anything to Dorkin."

He produced a white business card bearing Timberley's name and street address, and flung it at the man's feet.

(To be continued)

Palestine's Food Shortage.

The serious food shortage in Palestine has led the government to prohibit the export of cereals. From 400 to 500 head of Sudan cattle are being imported monthly by arrangement with the Egyptian and Sudan Governments. The army has ceased purchasing sheep and cereals from Palestine.

In some of the cities of Europe a dog is taxed according to its size—a little tax for a little dog and a big tax for a big dog.

A wounded chimpanzee stops the bleeding of the wound by placing leaves and grass on the injury.

Be Your Own Doctor.

When you meet with an accident—a cut, a burn, a scald or a bruise—don't spend money needlessly in doctor's bills, but apply Zam-Buk at once. This herbal balm will end the pain, stop the bleeding, prevent festering and heal quickly. Keep a box handy.

For skin troubles Zam-Buk is equally invaluable. A skin disease cured by Zam-Buk does not break out again, because Zam-Buk cures from the "root" up.

Zam-Buk is best for eczema, boils, blood-poisoning and piles. All dealers 50c. box.

Zam-Buk

Increase Production of Penitentiary Industries

Proposal for Utilization of Convict Labor to Obtain Revenue.

An increase in the producing activities of the penitentiaries of Canada is said to be among the reforms which are being considered by the commission which is now enquiring into conditions with a view toward reform. The proposal would involve the utilization of convict labor in the manufacture of clothing, boots, etc., coupled with an extension of truck garden and fruit growing activities. A daily allowance would be made to the convicts, to be paid to their dependents, if any, or kept until the term of the particular prisoner had expired. This scheme has been worked with marked success in certain of the state penitentiaries across the line. In fact in some cases the production and revenues therefrom have been so great as to pay the expenses of the institution and contribute considerably to the state treasury.

The scheme, if adopted, must be such as not to seriously compete with the ordinary labor market. A further reform proposed is said to be the doing away with the locking up of convicts on holidays which fall upon a Monday. In such cases at present, incarceration for two consecutive days results.

Severe Penalty For Killing Tigers

Sumatra Needs Man Eater to Save Her Best Trade.

The natives of Sumatra were greatly excited when the Dutch governor forbade them to kill tigers under severe penalties. It was hard to convince them of the necessity to protect the terrible man eater. The most important industry of Sumatra is growing oil palm trees, and it was threatened by the increase of wild boars, which prefer the fruit to all other food, killing the trees with their tusks. The more tigers killed, the more wild boars there were. The tigers like wild boar meat better than any other, although it kills also cattle.

Under such circumstances, the government decided to protect the tiger to save Sumatra's main industry.

Want Embargo Lifted

Farmers of Scotland Think Embargo Against Canadian Cattle Should Cease.

Farmers of Scotland are becoming of the opinion that the embargo against Canadian cattle should be lifted, according to a number of letters that have been received by W. F. Stevens, secretary of the Western Stock Growers' Protective Association. "Unless we can get stores in unlimited quantities, many of the present feeding farms will have to be converted into breeding farms to maintain the supply of commercial animals," states W. J. Reid, of Dun, Forfarshire.

New Head to Research Council.

It is stated that President Mackenzie, of Dalhousie University, Nova Scotia, is the choice of the Dominion Research Council for the position of head of that body, left vacant by the resignation of Dr. MacCallum, who goes to McGill. "If President MacKenzie will accept the position, it is stated, he can have it. It is understood that Prof. McLennan, of Toronto, whose name has been prominently in connection with it, would not have accepted.

Too Many "Generals" In Mexico.

Because of the large number of "generals" who refused to be demobilized and insisted on being retained with their present rank, the Mexican War Department is reputed to be having trouble cutting the army down to 50,000 men. Advices say that the war department's budget for the coming year is a large one.

When a person employs a servant in Mexico, it is expected that the servants' entire family will reside with the employer.

Manitoba's Wheat Yield

Average Yield Per Acre For 1920 Given As Fifteen Bushels.

The average yield of wheat per acre in Manitoba for 1920 was 15 bushels, according to the final report of the department of agriculture for the year. Threshing is completed with the exception of a few fields of flax, according to the report. Much fall plowing has been completed and the land is in fine shape for next spring's work. The supply of winter feed will meet all requirements.

Following is a summary of conditions, as issued by George C. Batho, of the Manitoba Deparument of Agriculture:

"Threshing is practically all finished in Manitoba, although a few scattered lots of flax are yet unthreshed. Now that threshing is done, reports of correspondents as to yields should be fairly accurate. The averages of all reports submitted are as follows: Wheat just below 15 bushels; oats, 33 5-6; barley, 22 1-10; flax, 8 2-5; rye, 16 1-5; potatoes just over 100. The potato crop is all dug.

"October has been a very fine month, and, on the whole, the conditions for plowing have been excellent, and a larger area—in some places a much larger area—than usual is plowed. Several correspondents report that summerfallows are particularly satisfactory.

Quick Aerial Service Across Canada

Could Be Accomplished With Aerodromes and Wireless Outfits, Says Tylee.

With aerodromes marked out every 50 miles and with wireless control of the planes, there would be nothing to prevent a regular forty-hour air service between Halifax and Vancouver, according to General A. K. Tyles, air commodore, who reached Ottawa recently on his return from the trans-Canada flight. General Tyles flew from Winnipeg to Vancouver as a passenger during the recent flight and returned to Ottawa impressed with the possibilities of developing a commercial cross-Canada service.

Protect Your Machinery

Loss Would Soon Pay For Erection Of Shed.

How many farmers would leave $25, $50 and even $100 in bills out in the open during an entire winter? Sounds absurd, but scores of such bills, in their equivalent of farm implements, are left in the shelter of the broad skies all the year. Few farmers who follow this practice do so with a realization of the great loss they are sustaining on the money invested. A hundred dollar machine left out of shelter over winter, means a loss of from five to fifteen dollars. At this rate it is quite evident that a machinery shed would be paid for in two or three years, even at present building costs.

Bottle Takes Long Journey.

A bottle cast into the Atlantic Ocean near Newfoundland by Sergeant D. McInnes, of Edmonton, when returning to Halifax, September, 1919, after shooting at Bisley, reached Nieuport, Belgium, last August. The bottle contained a message from Sergeant McInnes to a Montreal paper. The finder of the bottle was Paul Vanthier, who mailed the message to Montreal.

A Sympathy Swindle.

An Englishman has just been arrested in London for swindling the relatives of dead soldiers. His plan was to read the death notices in the papers and to write letters to any ex-soldiers that might be on the list, asking for gifts of clothing. The bereaved families, glad to do an act of charity to an "old friend" of their lost sons, would send the clothing and frequently important sums of money.—London Graphic.

The difference between a country youth and a city youth is that the former wants to know everything and the latter thinks he knows it all.

By Speeding the Liver Dr. Hamilton's Pills Bring Good Health

Good for Men, Women, Children.

No curse seems harder to bear than the downright weariness and despondency that comes from a slow liver.

The man or woman who is pale, sallow, depressed, and out of sorts usually has Liver Complaint. Such people continually suffer from headache, constipation, ringing ears, lack of appetite, and poor digestion. What a world of good Dr. Hamilton's Pills will do in such cases! In one hour this smooth working medicine changes half sick folks into different looking and feeling people. No chance for headaches or costiveness when Dr. Hamilton's Pills get to work. Taken at night they restore normal conditions while you sleep, morning finds you fresh and hungry, headache all gone, cheeks rosy, eyes bright, spirits good.

Impossible to feel dizzy, to have weak back, to be nervous, depressed, sleepless, or out of sorts if you tone, regulate and cleanse the system with Dr. Hamilton's Pills. Good for men, women and children. Sold everywhere in 25c boxes.

You get the full weight of tea marked on the sealed Red Rose package.

The tea is weighed on our costly automatic electric scales before it goes into the package.

In the sealed package, you get not only full weight, but full flavor, full strength and all the good qualities of Red Rose Tea protected against the air, odors and dust.

RED ROSE TEA

Red Rose Coffee is as generously good as Red Rose Tea

Be An Optimist

Show Patriotism By Having Faith in Canada.

Canada is emerging from the after-war muddle with the sun of prosperity shining bright over her broad domain. Her barns are bursting with the foodstuffs for which the older countries hunger. Her gold and silver mines are pouring forth th ir riches. Her almost inexhaustible deposits are daily taking on new values. Her frozen north is seeping with oil that will feed the millions of autos for five hundred years to come.

Canada is coming back to normal—coming fast—coming also to a great period of prosperity.

Hasten its coming by drowning your pessimism.

Prove your patriotism by becoming an optimist.—Toronto Telegram.

A patent has been granted a Connecticut inventor for a slight but sufficiently strong structure to be erected over city buildings to form an airplane landing field.

The bean was cultivated by the Incas before the time of Columbus.

MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

To Can Whitefish

Canning Will Give Industry An All Year Market.

Canada is to add whitefish to the world's appetizing canned foods. A factory for canning the whitefish of Northern Canadian lakes is to be established on Lake Athabasca, Alberta. Whitefish swarm in these northern waters, but owing to lack of transportation and refrigerating facilities, they supply only a winter market. They are taken in nets lowered through holes in the ice, where they are frozen in temperatures that make all outdoors a refrigerator. They are hauled on dog-sleds to the railway and shipped all over Canada. A United States market has been established in Chicago and other western cities.

In summer the industry is suspended because the fish spoil before they can be got to market. Living in ice-cold water, the whitefish of the Canadian north have a finer flavor than those of the more southern latitudes. Canning them will give the industry an all year market. Whitefish are one of the most extensively marketed of fresh-water fish. Vast quantities are taken in the Great Lakes and shipped all over Eastern Canada and the United States, even in summer.

Britain After the Toy Trade

Have Launched a Big Campaign to Supplant Foreign Toys.

British toy makers have launched a big campaign to supplant foreign toys in the British markets, and since the war a large number of new firms have begun manufacturing and old ones have extended their production. The campaign is being conducted by the British Toy Association, which has branches in all of the principal cities in the United Kingdom where the toy and game industries are prominent. Special advertisements are being inserted in the leading magazines and newspapers, calling attention to the comprehensive range of toys now being manufactured in Great Britain and urging the British public to give preference to British-made goods.

The custom of using a coat of arms is traced to early Biblical times.

COOKS!

Sloan's Liniment (Pain's enemy)

is always ready to ease rheumatism

"AT the very first twinge, down comes my bottle of Sloan's; then quick relief, *without rubbing*, for it's stimulating and scatters congestion. The boys use it for stiff muscles, and it helps Sally's backaches, too." 35c, 70c, $1.40.

(Made in Canada)

Choosing Coal by The Microscope

Series of Microscopic Tests By Which Various Coals Are Classified.

The selection of the particular coal to give the best results for certain purposes has always been an important matter for the engineer. Today, with the enhanced cost of coal, it has become a vital problem. Hitherto it has been the custom to rely upon open chemical compositions and tests of the heat value of the coal, but the engineer of a leading firm which buys about a quarter of a million tons of coal every year for various uses, confirms the suspicion that something more is needed before the most economical coal in each case can be determined. He has worked out a series of microscopic tests by which various coals are classified, each class being most efficient for steam raising, or gas production, or some other particular service. The method adopted is to grind the surface of a small sample of coal exceedingly smooth, fix it by the smooth surface to a piece of glass and grind away the remainder until a slice thin enough to transmit light remains on the glass. When examined under the microscope this slice reveals the inner structure of the coal. The behavior of the coal when fixed corresponds to its structure, which thus provides an index to the use which ought to be made of the coal. The same investigator has found that very uniform results are given by samples from the one seam of coal, so that one or two tests are sufficient to determine the qualities of the seam. If this method is developed it will become possible to order coals according to an exact specification, much as is now done with special steels and alloys.

Cotton Seed.

Cotton seed was treated as garbage in 1860; by 1870 it was being used as fertilizer; in 1880 its usefulness as food for cattle had been recognized; and in 1890 its potentialities as a table food were being advertised the country over. Now it is one of the most important of the sources of oils, varying from the clearest "olive" to the coarsest paint-oil.

The largest edible oysters in the world are found in Australia. They measure sometimes more than a foot across the shell.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves's Worm Exterminator.

In Reduced Circumstances.

The former Kaiser has lost a large part of his wealth and has now an income amounting to a bare $600,000 a year. Still, he can do pretty well with that in Holland, which is an inexpensive place to live in.—From the Cleveland Plain Dealer.

One Great Essential —To a Woman's Health Is Her Nerves

Nature intended women to be strong, healthy and happy as the day is long, instead of being sick and wretched. But how can any woman be healthy and happy when the whole nervous system is unstrung. The trouble is they pay more attention to their social and household duties than they do to their health. Is it any wonder then that they become irritable and nervous, have hot flushes, faint and dizzy spells, smothering and sinking spells, become weak and nervous, and everything in life becomes dark and gloomy.

Milburn's Heart and Nerve Pills are the very remedy that nervous, tired-out, weary women need to restore them to the blessings of good health.

Mrs. P. H. Ryan, Sand Point, N.S., writes: "I have been a great sufferer from nerve troubles. I was so weak and nervous I could not sleep at night and my appetite was very poor. I could not walk across the floor without trembling. I had hot flushes and fainting spells. When I was on my second box of Milburn's Heart and Nerve Pills I began to feel better and kept on until I had used six boxes, when I felt like a different person. I am never without them in the house and recommend them to all who suffer with their nerves."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Old Roman Roads

Formed the Backbone of the Transportation System of the Ancient Empire.

Some of the roads built by the Romans 2,000 years ago are still in active use. These roads have lasted through the centuries simply because of their massive construction.

An earth subgrade, carefully prepared and drained, was the foundation for four layers of materials, each so carefully laid that it contributed greatly to the long life of the road.

First came the statumen, or foundation, then the rodus, next the nucleus, and finally the pavement or wearing surface. The statumen and pavimentum consisted of large flat stones, while the two intervening courses were built of smaller stones laid in lime mortar.

For the chariot and pack-horse traffic of Roman times, such roads seem ridiculously heavy, but the wisdom of the builders was amply demonstrated by the 800 years during which the Roman road system formed the backbone of the transportation system of the ancient empire.

The First Electric Ship.

The Cuba, the world's first electrically propelled passenger and freight ship, was sent on her first trial trip from Brooklyn recently. The Cuba is 300 feet in length and has accommodation for 260 passengers.

Kill the Germs of Catarrh

BY ACTING TODAY YOU CAN QUICKLY CURE CATARRH AND AVOID BRONCHITIS, PERHAPS CONSUMPTION.

Most Agreeable and Surest Cure Is Catarrhozone, Which Cures Every Curable Case.

Catarrhozone proves especially good in those chronic cases where mucous drops down the throat, sickens the stomach, and pollutes the breath. When the nostrils are stuffed, only a few breaths through the inhaler are needed to clear the passages, and where there is coughing and sore bronchial tubes, the soothing, healing properties of Catarrhozone act almost as magic.

Once you stop taking medicine into the stomach and get the healing oils and pure balsams of Catarrhozone at work you can be sure of quick and lasting cure for nose colds, catarrh, weak lungs, bronchitis and speaker's sore throat.

The complete $1.00 outfit of Catarrhozone is sufficient for two months' treatment, and is guaranteed. Smaller size 50c, at all dealers, or the Catarrhozone Co., Kingston, Ont.

Communication with the Dead.

Thomas A. Edison does not believe that human personality exists after death. Yet, he added, he was still working on his apparatus for communicating with the dead. Mr. Edison compared his apparatus to a valve which, turned by the comparatively puny human hand wielding one-eighth horsepower, release the energies of a mamoth turbine with 50,000 horsepower.

Record Revenue from Fish and Game

Ontario's revenue from the fish and game department for the fiscal year ending Oct. 31, is one hundred thousand in excess of the revenue for last year, and greatly in advance of any other year in the history of the department.

Masterpiece For Montreal.

Lord Atholstan has purchased Gabriel Max's celebrated masterpiece, "The Raising of Jairus' Daughter," for presentation to the Montreal Art Gallery.

Minard's Liniment Co., Limited.

Gent'eman, I have used MINARD'S LINIMENT on my vessel and in my family for years, and for the every day ills and accidents of life I consider it has no equal.

I would not start a voyage without it if it cost a dollar a bottle.

CAPT. F. R. DESJARDIN.

Lucky is the man who loses his reputation—if it is bad.

Minard's Liniment For Diphtheria.

When The Day Is Over

When the household cares and the worries of everyday life have dragged you down, made you unhappy, and there is nothing in life but headache, backache and worry, turn to the right prescription, one gotten up by Dr. Pierce fifty years ago.

Everything growing out of the ground seems intended for some use in establishing natural conditions. Dr. Pierce, of Buffalo, N. Y., long since found out what is naturally best for women's diseases. He learned it all through treating thousands of cases. The result of his studies was a medicine called Dr. Pierce's Favorite Prescription. This medicine is made of vegetable growths that nature surely intended for backache, headache, weakening pains, irregularities, and for the many disorders common to women in all ages of life.

Orillia, Ont.:—"I suffered from a bad case of woman's trouble with backache, nervousness, disordered digestion, irregularity and I had great pain all the time, sometimes I would faint at my work. I had one physician after another but they did me no good. I then took Dr. Pierce's Favorite Prescription and it fixed me up all right, I look much better and feel fine. I will recommend the 'Prescription' to all suffering as I did."—MRS. MAYBELLE B. GRATRIX, 115 Albert St.

Write Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for confidential advice and you will receive the medical attention of a specialist, wholly without fee—no charge whatever.

Progress of "Wireless"

Connecting all Parts of the Empire by a Network of Radio Circuits.

Radio-telegraphy has made such progress recently that it may yet supersede the costly and frangible ocean cables. In comparing the two systems, Rear-Admiral Bullard of the United States navy, said that in the past fifty years there has been practically no development or increase of efficiency of the cable. Lieut.-Col. B. C. Gardiner, one of the British delegates, stated that the Imperial Communications Committee, which deals with the questions of cables and the wireless policy of the British Empire, had recommended the erection of twelve high-powered radio stations in England, India, Africa and other parts of the United Kingdom for the purpose of interconnecting all parts of the Empire by a network of radio circuits. These stations are to be owned and operated by the British Government, and not by private capital. In the United States the Navy Department has entered into close relations with a private company which is completing a radio central station system to provide lines of communication to all parts of the world.—From the Toronto Globe.

Want Advanced Legislation

Urge That Domestics Be Included In Compensation Act.

At a meeting of the United Women's Educational Federation of Ontario held at Hamilton, a resolution was passed petitioning the Ontario Government to include domestic servants as beneficiaries under the Workmen's Compensation Act, and requesting that domestic servants come under the provisions of the Minimum Wage Bill.

A resolution was passed calling upon Hon. R. H. Grant, minister of education, to have swimming pools installed in all public schools in the province.

"My Back Is So Bad"

PAINS in the small of the back, lumbago, rheumatism, pains in the limbs all tell of defective kidneys.

Poisons are being left in the blood which cause pains and aches.

The kidneys, liver and bowels must be aroused to action by such treatment as Dr. Chase's Kidney-Liver Pills.

There is no time for delay when the kidneys go wrong, for such developments as hardening of the arteries and Bright's disease are the natural result.

One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. Chase's Kidney-Liver Pills

Winter Holiday Resort

A Delightful Trip Through The Canadian Rockies to the Pacific Coast.

Shortly after leaving Calgary the route of the Canadian Pacific Railway winds for some distance through the foothills before plunging into the fastness of the mighty Rockies. Then for over five hundred miles a continuous panorama of bewildering magnificence is presented, which no pen can adequately describe. Wondrous glacial fields, startling precipices, snow-capped peaks, wide forest areas, clear lakes and peaceful valleys combine in enchanting array. Add to this the 165 miles steamer trip on the palatial Princess Steamers from Vancouver to Victoria and Seattle on Puget Sound, the most charming inland voyage known, and you have a pretty fair idea of what the Canadian Pacific has to offer the traveller to the Pacific Coast.

Vancouver Island is recognized as Canada's all-year resort, where golf, motoring and other outdoor pastimes may be enjoyed every day in the year. Thousands of miles of magnificent motor roads radiate from Victoria to various points of interest.

A visit to the coast that does not include a few days at Victoria cannot be justified. It is rather a pity to spend the time "doing" cities that are in most of their essential features very much alike, if it means eliminating Victoria, when by a four-hours sail by steamer on one of the most beautiful stretches of inland waters in the world, your trip may take on all the characteristics of a foreign tour.

A trip to the Pacific Coast this winter will be time and money well spent. Any Canadian Pacific Agent will gladly furnish particulars and any information which may be required.

The Modern Newspaper

Is One of the Greatest Factors in Our Complex Civilization.

The modern newspaper, with its vast circulation and wide appeal, is a critic of the time—a mirror of the moment. It is the schoolmaster of the world. But it is more than that: It is an ever-kindly friend, a staunch and certain help in trouble. It reaches to every corner of the land, stretching out the hand of comradeship to every townsman and every cottager. During the war its power was invaluable. It brought the last poor crumb of comfort to many in the knowledge—conveyed by some pictured trinket—that even in death they were not forgotten. The universal knowledge that publicity brings makes all mankind your friend. It is the lodestar of civilization.—London Daily Express.

Catarrhal Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.

ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

All Druggists 75c. Circulars free.

F. J. Cheney & Co., Toledo, Ohio.

Origin of Dollar Mark

Accountants First Used it to Save Time.

Before 1880 the dollar mark ($) was seldom used. It appeared in the eighteenth century manuscripts not more than fifteen or twenty times. But the dollar was then a familiar coin. The sums are given in dollars, but not one of the signers used the $ symbol; they wrote "dollars," or "doll.", or "ds." The dollar mark clearly came over in general use from the accountants or book-keepers who first employed it as a means of saving time. It is a remarkable coincidence that the three names by which the Spanish dollar was known, peso, piastre and piece of eight, all began with the letter p, and all three formed the plural by the addition of the letter s. Hence p and ps answered admirably as abbreviations for any of these names. Men wrote p with a flourish and raised the s somewhat above the p. The transition from this symbol to the dollar mark apparently came about unconsciously, in the effort to simplify the complicated motion of the pen.

New Manitoba, north of latitude 53, last year produced from natural resources $3,500,000 worth of commodities, including copper and gold ores, fish, furs, timber and agricultural products.

Women have poor heads for figures. That may be why it is almost impossible for one to figure her age correctly.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

HOUSEHOLD NECESSITY

Gillett's Lye has long been regarded as a household necessity because of the fact that it is useful in so many ways, and so satisfactory in every respect that no woman feels that she can keep house without it. Makes the finest kind of soap for washing and cleansing. One can of Gillett's Lye will make ten pounds of good soap in twenty minutes. Many of its uses are shown in booklet under the label.

"GILLETT'S LYE EATS DIRT"

Made in Canada

Horseback Riding

A Saddle Horse For Every Family Is Advocated.

Horseback riding is a more general sport now than it has been for many years past—since the days when the saddle horse was used of necessity. Now he's used for exercise and diversion. There are more privately owned saddle horses and many more horses kept for hire today, than before the advent of the motor car.

The Horse Association of America shows proof that good riders need not be born horsemen, but can be made under the schooling of experienced riders and the horse itself. The association urges saddle horses and ponies for children especially. Boarding stables and riding academies have reduced their prices this fall, following the drop in cost of oats and hay.

Hamilton Bassett, the Billy Sunday of the west, says it means less work for the undertakers. "A child that is brought up with a horse or pony for a companion, is a child that is early taught self-control and poise, not by precept and principle but by experience," he says. "If there were a pony in every home, there would be less erratic children and less work for the juvenile courts, less drugs, less work for the undertakers."

"Pape's Diapepsin" for Stomach

"Pape's Diapepsin" is the quickest, surest relief for Indigestion, Gases, Flatulence, Heartburn, Sourness, Fermentation or Stomach Distress caused by acidity. A few tablets give almost immediate stomach relief and shortly the stomach is corrected so you can eat favorite foods without fear. Large case costs only 60 cents at drug store. Absolutely harmless and pleasant. Millions helped annually. Largest selling stomach corrector in world.

Irkutsk, Siberia, with a population of 120,000, has had an average of 500 murders a year for decades.

A whale is able to remain under water for an hour and a half without coming up for air.

A Born Politician.

Little Joey Jesso was entertaining his sister's nervous admirer, and, after making the usual juvenile remarks on marbles and tops, he announced "Ethel told ma yesterday you was a born politician." The young man was delighted, and, wishing to know more, added: "That so? Why does she think that?" "That's just what ma wanted to know, and Ethel said it's because you can do so much talking without committin' yourself."

RICH, RED BLOOD NECESSARY TO HEALTH

When the Blood Becomes Weak and Watery a Tonic is Needed to Build it Anew.

Why are we being continually told that good, health-giving blood must be bright red? What has color to do with the quality? Just this—the oxygen in the air is the great supporter of all organic life. One function of the blood is to take the oxygen from the air—which it meets in the lungs and deliver it to the tissues of the body. When the blood, filled with life-sustaining oxygen, is sent out by the heart, it is bright red. When it returns, impure and deprived of oxygen, it is dark.

You will see, therefore, that there are two prime requisites of health, pure air and bright red blood—the pure air to furnish the oxygen, the rich red blood to carry it where it is needed. Dr. Williams Pink Pills make your blood rich and red because they increase its power to carry oxygen, actually making it so much more able to carry increased life and strength to every organ in the body.

Pale anaemic people whose nerves are on edge, whose cheeks are pale, and who tire out easily, should try Dr. Williams Pink Pills, and note the steady improvement that follows their use. A case in point is that of Mrs. J. P. Rolston, South River, Ont., who says:—"About two years ago my system was in a badly run down condition, and I kept growing worse all the time until I could hardly do my housework. I had severe headaches and pains across my back and under my left shoulder. I did not sleep well and would feel just as tired when I got up in the morning as when I went to bed. Life seemed a burden. I had taken doctor's medicine for a long time, but it did not meet my case, at least it did me no good. Then, as a result of reading about Dr. Williams Pink Pills, I decided to try them. When I had taken a couple of boxes I felt much better, and when I had taken five boxes more I felt that I was again a well woman. I have not since felt any return of the trouble and I advise all women who are broken in health to give Dr. Williams Pink Pills a trial."

These pills are sold by all medicine dealers or will be sent by mail, post paid, at 50 cents a box, or six boxes for $2.50, by The Dr. Williams Medicine Co., Brockville, Ont.

Manitoba Egg-Laying Contest

Ten Single Comb Anconas Give 2,041 Eggs in Year.

A pen of single comb Anconas, owned by W. H. Howe, of Winnipeg, won the egg laying contest conducted for the province at the Brandon Experimental farm. This pen laid 2,041 eggs in one year.

A pen of White Wyandottes, owned by Thos. Lund, of Stonewall, is second with 1,842, while a pen owned by W. H. Simmington, of Brandon, was third with 1,830. These three pens also were the three highest egg layers in the Dominion. Each pen contains ten birds.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

World Press Congress Postponed.

The press congress of the world, which was to have been held at Sydney, Australia, in 1918, but was postponed till March, 1921, has been further definitely postponed, mainly through travel cost and other difficulties.

INVENTIONS

Five Miles of Warships

Surrender of German Navy Has Been Completed.

The final batch of surrendered German warships arrived in the Forth at Edinburgh the other day. The concluding surrender included five cruisers—the Lubeck, Stettin, Danzig, Augsberg and the Munchen.

Lined mostly off the Linlithgowshire shore, the ships stretch for five miles above the Forth Bridge.

They will be disposed to minor naval powers such as Brazil, Chili and Poland.

The vessels are somewhat dilapidated and look shoddy in appearance compared to the British warships.

Minard's Liniment For Garget in Cows.

Winnipeg Building Permits.

From January 1st to the end of September this year the total value of the building permits issued in Winnipeg was $8,498,400. This is the highest figure that has been reached over a similar period since 1912, indicating that the city is getting back to its pre-war stride of prosperity.

1000 Eggs in Every Hen

New System Of Poultry Keeping—Get Dollar A Dozen Eggs—Famous Poultryman.

TELLS HOW

"The great trouble with the poultry business has always been that the laying life of a hen was too short," says Henry Trafford, International Poultry Expert and Breeder, for nearly eighteen years Editor of Poultry Success.

The average pullet lays 150 eggs. If kept the second year, she may lay 100 more. Then she goes to market. Yet, it has been scientifically established that every pullet is born or hatched with over one thousand minute egg germs in her system—and will lay them on a highly profitable basis over a period of four to six years' time if given proper care.

How to work to get 1,000 eggs from every hen; how to get pullets laying early; how to make the old hens lay like pullets; how to keep up heavy egg production all through cold winter months when eggs are highest; triple egg production; make slacker hens hustle; $5.00 profit from every hen in six winter months. These and many other money making poultry secrets are contained in Mr. Trafford's "1,000 EGG HEN" system of poultry raising, one copy of which will be sent absolutely free to any reader of this paper who keeps six hens or more. Eggs should go to a dollar or more a dozen this winter. This means big profit to the poultry keeper who gets the eggs. Mr. Trafford tells how. If you keep chickens and want them to make money for you, cut out this ad and send it with your name and address to Henry Trafford, Suite 264P, Tyne Bldg., Binghampton, N. Y., and a free copy of "THE 1,000 EGG HEN" will be sent by return mail.

MONEY ORDERS

Buy your out of town supplies with Dominion Express Money Orders. Five dollars costs three cents.

SALESMEN WANTED to represent "CANADA'S" GREATEST NURSERIES." Big list of general nursery stock (fruit and ornamental), seed potatoes, etc., recommended by Western Experimental Stations. Big commissions, full or part time, exclusive territory. STONE & WELLINGTON, Toronto, Ont.

Goitre Removed

BY ABSORPTION METHOD

Dr. W. J. Hughson's Famous Goitre Remedy removes Goitre safely and permanently, so that it will never return. For free booklet containing particulars of this excellent remedy, write S. W. Hughson, Dept. W.N. 69 Bordeb St., Toronto, Ont.

STAMMERING

and Defective Speech quickly and permanently cured. Private individual instruction and training. Terms moderate—no large advance payments necessary. Write for free information.

Transcient display advertising 50 cents an inch each insertion.

Business locals 12½c. a line each insertion.

City Council

Regular meeting of the City Council was held in the Council Chambers on Monday, Nov. 8th. Mayor Gulley in the chair and Aldermen Morrison, McLeod, Jenkin and King being present.

Application was made by the boys of the town for renting of the skating rink for the coming season. Alderman Morrison and the city clerk were appointed a standing committee to deal with this and make suitable arrangements with the boys for the coming winter pastime.

A request was also received from the basket-ball players for the use of hall in Miller block for basket ball games. After investigation by the Fire, Light and Water committee this hall was reported as unsuitable for the games, and other quarters will have to be applied for.

The street lighting was strongly criticized and Clerk was instructed to register complaint to the manager of the Waterworks company.

Offers for property now held by city were rejected until the time limit for redemption by payment of taxes was reached.

Accounts as reported and passed by Finance committe were ordered paid.

The Fire Chief reported that fire alarm apparatus had been tested and was in good working order.

The account rendered from boys of the Fire Department for their service at the recent fire was ordered paid and the Fire Chief was instructed to convey the thanks of the Council to the Fire Department for the efficient manner the outbreak was handled.

Council then adjourned until next meeting on Nov. 22nd.

A Guarantee

The publishers of the Family Herald and Weekly Star of Montreal are doing the right thing with the public. Ninety per cent. of newspapers have already raised rates. The Family Herald publishers guarantee a full year's subscription at the old rate of $1.50 a year to all who remit before December 1st, 1920. We learn that many old subscribers are renewing for two years in advance and thousands of new subscribers are being added. It is a great paper and the best value on the Continent.

Wonderful improvements have lately been made in the Family Herald. Members of the Imperial Press Conference, who lately visited Canada, says it has no equal in the British Empire. Canadians should appreciate a paper at the price. After December 1st they may have to pay more.

When the Mistake is Yours, Help Correct It.

Sometimes as soon as you give the operator a telephone number from memory, you realize you have called the wrong number. The first impulse is to hang up the receiver, but, you should wait and say to the other party, "Beg pardon for calling the wrong number," Then everybody feets all right about it.

If you hang up the receiver without acknowledgiug your error, the operator gets the blame when she tells the other party that "there's no one on the line."

BRITISH COLUMBIA TELEPHONE COMPANY.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Rossland Assessment District

I HEREBY GIVE NOTICE that, on Monday, the 15th day of November, 1920, at the hour of 10 o'clock in the forenoon at the Court House, Rossland, I shall offer for sale at Public Auction the Mineral Claims in the list hereinafter set out of the persons in the said list hereinafter set out for delinquent taxes unpaid by said persons on the 30th day of June 1920, and for interest, costs and expenses, if the total amount due is not sooner paid.

The Collector will be pleased to receive any information respecting the following list where the owner is a member of the Allied Forces and entitled to the benefits of Section 29 of the "Taxation Act Amendment Act, 1918" and amendments thereto.

Dated at Rossland, B. C., this 2nd day of October, 1920.

H. R. TOWNSEND,
Collector for the Rossland Assessment District.

The Women of British Columbia Have Received From The Oliver Government

Woman's franchise.

The Mothers' Pension Act, one of the most important acts for the benefit of women ever placed on the statute books of the Province.

A minimum wage law for girls and women, raising the minimum salary per week from the $4.00 paid in some instances, to $12.75 and over per week.

Equal rights to the mother with the father in the guardianship of minor children.

An amendment and improvement to the law respecting the maintenance of deserted wives.

Provision for the appointment of a superintendent of neglected children.

A new adoption act, providing that a child adopted by a family is given the full legal status of a child born to the foster parents.

A juvenile court to which the first women judge in British Columbia has been appointed.

A more humane and considerate treatment of the inmates of the Girls' Industrial School and Boys' Industrial School has been inaugerated.

An important amendment to the Marriage Act, placing the mother on equality with the father in the matter of consent to the marriage of a minor child.

This Liberal Administration has received and improved educational laws and regulations, giving better opportunities to children in isolated districts to secure an education. Its Health Department has given valuable assistance in the training of rural nurses. It has provided for veneral disease control. It has broadened the course in manual training, domestic science night schools and agricultural teaching. It has provided schools for mentally deficient children, the deaf and dumb. It has established a school for the education of the blind, and a provincial technical school. It has provided for financing the erection of buildings for the University of British Columbia. Its Health Department has given special attention to the work of fighting tuberculosis. The death rate from this disease has dropped from 1.23 per thousand of population in 1917-18 to .82 in 1919-20.

The Oliver Government has more beneficial social and domestic legislation to its credit than has any or all previous governments of British Columbia, and its efforts in this direction will be continued.

Your Vote for the Liberal Candidates On December 1 will ensure a Continuance of these good works

BRITISH COLUMBIA

The Mineral Province of Western Canada

TO END OF DECEMBER, 1919

Has produced Minerals valued as follows: Placer Gold, $75,722,603; Lode Gold, $100,272,431; Silver, $50,432,304; Lead $43,821,106; Copper, $153,680,965; Other Metals (Zinc, Iron, etc.), $16,818,487; Coal and Coke, $199,123,323; Building Stone, Brick, Cement, etc., $29,991,757; Miscellaneous Minerals, etc., $785,918; making its Mineral Production to the end of 1919 show an

Aggregate Value of $670,649,894

Production for Year Ending December, 1919, $33,296,313

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Full information, together with mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES
VICTORIA, British Columbia.
