AROUND HOME

Fishing is good in the Kettle river.

A look out station is being efected at Phoenix.

Joe Price returned on Saturday from a visit to Trail.

Geo. Elson, of Saginaw, Mich., is spending a few days in town.

H. H. Pannell, of Midway, spent a few hours in town today.

R. A. Morley, of Penticton, was in town on business this week.

C. F. Fletcher, of Trail, is spending a few days in Greenwood.

C. Saunier and E. Saunier, of Rhone, were visitors in town today.

Saturday was celebrated as Declaration Day in the United States.

Chas. Nichols returned home this morning after several weeks spent in Trail.

Mr. and Mrs. Harry G. Wilson and daughter Dorothy, are on a visit to Spokane.

W. H. Rambo is spending a few days in Greenwood on his way home to Beaverdell.

Miss Nellie Keir returned home on Monday from attending Normal School in Victoria.

Considerable rain has fallen in the district during the past week putting the crops in fine condition.

Thomas Williamson has arrived home from Victoria, where he was a student at the Normal School.

Mr. and Mrs. A. D. McLennan of Rock Creek, were the guests of Mr. and Mrs. E. F. Keir on Sunday.

Mr. Nasmyth, an insurance adjuster, was in town Tuesday adjusting the various claims for fires at Rock Creek and Greenwood.

Mr. and Mrs. Paul Harris, Mrs. Harry Hewer, son and daughter, of Spokane, were the guests of Mr. and Mrs. Jas. Skilton during the week-end.

McElmon, the watchmaker, has returned to Greenwood and opened a place of business opposite the Bank of Commerce and is ready to do watch and optical repairing.

Leon Starmouth, editor of the Mining Truth, accompanied by J. P. Kelly, A. L. Hooper and W. J. Kerby, were in town on Friday night last on their way home to Spokane from a visit to Wallace Mountain, Beaverdell.

C. R. Garris, C. P. Martin, H. Teichman, T. LaPause and son, of Spokane, were in town during the week-end and inspected the Combination mine. Mr. Garris says that this mine will be in operation in a short time.

J. C. Janikula, of Odessa, Wash., C. R. McClintock, of Spokane, and D. Salmquist, of St. Joe, Idaho, were in town last Saturday and were looking over the D. A. in which they are interested. They are well pleased with the showing on this property the tunnel now being in 400 feet.

Normal Results

Two hundred and fifty-two students attended the Provincial Normal School at Victoria during the session of 1924-25. Of that number 179 obtained full pass standing, three failed, two removed to Vancouver and nine left during the session. Those who obtained interim standing at the Normal School and have the necessary academic qualifications will be entitled to receive teachers' certificates for two years only. Interm certificates are made permanent as soon as the holders receive two consecutive satisfactory reports from their inspectors and are recommended by the latter for permanent standing. Miss Nellie Keir, of Greenwood, who received a full pass was among the honored students. Thomas Williamson, of this place, received an interm certificate.

Fire at the Providence

About 5.30 p.m. last Thursday lightning struck the compressor building at The Providence mine and immediately the building was a mass of flames. Besides the building, the blacksmith shop, compressor, motors and part of the gallows frame were completely destroyed. The heavy rain and no wind kept the fire from spreading. Men were soon on the scene and did great work in preventing the fire from doing further damage. On Tuesday the insurance adjuster visited the ruins. An electric pump is keeping the mine free of water.

Wellington Bonded

A. J. Morrison and John Hallstrom, of Greenwood have taken a lease and bond on the Wellington on Wallace Mountain from the owners Jas. Paton, Thos. Hemmerle, Mrs. McNeil and Mrs. Smailes.

The Wellington joins the Sally and considerable work has been done on this property in the past. Mr. Morrison returned to town on Wednesday bringing with him some very nice samples of ore.

Wallace Mountain Mines Paid Big Dividends

Dividends declared by mining companies in British Columbia in the year 1924, compared with 1923, according to the B. C. Department of Mines, are as follows:

Name of Company	1923	1924
Premier Gold Mining Co., Limited	$1,738,000	$1,715,000
Consolidated M. & S. Co. of Canada	632,022	641,043
Howe Sound Copper Co.*	198,415	198,415
Silversmith Mines Limited	150,000	175,000
Wallace Mountain Mines Limited	5,400	59,400
I.X.L. (Trail Creek Mining Division)	22,958	56,000
Bell (Greenwood Mining Division)	——	48,000
Apex (Slocan Mining Division	——	1,834
Mountain Chief Mines (Slocan Mining Division)	——	1,482
Belmont-Surf Inlet Mines	62,500	——
Total for year	$2,809,295	$2,896,174

The amount of $2,896,174 shown above distributed in 1924 by no means represents the total of net profit earned during that year. In nearly all cases substantial sums are set aside from profits to the credit of surplus and reserve accounts. Profits accruing through private companies and individual mining enterprises as a rule are not given publicity as dividends, as is the case with the larger companies, so that no record of these profits which in the aggregate are considerable, is available.

*The Howe Sound Copper Company is the holding company, for the Britannia mine in British Columbia, and the El Potosi mine in Mexico. Dividends paid by this company are therefore derived from the profits on operation of both mines, so that only part of the dividends paid, as shown, can be credited to the Britannia mine.

Midway News

Mrs. H. H. Pannell who is a patient in the Greenwood and District Hospital, is doing very nicely.

Mrs. L. Stapleton, of Spokane spent the week-end at the home of her parents, Mr. and Mrs. J. H. Bush.

A baseball game will be played on the Midway diamond next Sunday afternoon between the local boys of Midway and Greenwood.

A great game of baseball was played at Malo, Wash., last Sunday when Midway defeated Malo by a score of 11 to 9. Thomet made a spectacular play when he threw the ball from outfield to the home plate.

A card party will be held in the new Farmers Hall on Friday June 12th. Dancing will follow card playing. The proceeds will go towards the purchase of a piano Admission, adults 50c; children 25cts. Farm Women are revuested to bring cake.

The Farmers annual celebration will be held at Midway on Dominion Day. A feature this year will be a track meet between all schools in the Greenwood district. Teachers in the schools are asked to encourage the pupils in this athletic meet. It is expected that silver cups and medals will be awarded.

Fire at Rock Creek

Rock Creek was visited by a big conflagration early Saturday morning, May 30th, when the Co-Operative store, Rusch's garage, barn and a house were destroyed. The fire started in the store, the building owned by Captain King and the store owned by a syndicate of local farmers. The building including the dance hall and the stock in the store were covered by insurance, but a $600 piano owned by the Farm Women had no insurance. The barn and garage building were owned by J. Luce with no insurance. A. Rusch's loss of tools and machinery is partly covered by insurance. S. Dahl's house had to be dynamited to keep the fire from spreading. For a time it appeared that the whole block of buildings was doomed, but a gallant fire brigade was formed, who succeeded in saving the rest of the buildings. The fire was spectacular, flames rising high and soon attracted quite a large crowd, who arrived in motor cars and on foot. Heroic efforts only on the part of the fire fighters prevented the spread of the fire to Mr. Luce's house, and the Rock Creek Hotel. W. Moll had the misfortune to have his car destroyed in the fire; also one of Arthur Rusch's. The origin of the fire is a mystery.

Rock Creek Items

(By G. Willis)

Mr. and Mrs. Waddell were visitors to town last Tuesday, from their ranch on the Main River.

The Woman's Institute held their monthly meeting on Saturday at Riverside Hall. There was a good attendance, and a most enjoyable tea was served by Mrs. J. C. Madge and her sister Mrs. Ed. Madge.

Last Saturday, Rock Creek basket ball school team, won a brilliant victory over Myncaster school team, by a score of 12-1. Next Saturday, June 6th there will be a game between Greenwood and Rock Creek, to be played at the School grounds at Rock Creek.

The Rock Ceeek Fall Fair is set for Friday, Oct. 2nd. Prize lists will be ready in a few days.

"Peter Pan" on the Screen

The secret of the origin of fairies is out. "Peter Pan" gives it away at last in Herbert Brenon's production of J. M. Barrie's famous fantasy for Paramount, to be shown at the Greenwood Theatre on Saturday, June 6th.

"When the first baby laughed for the first time, its laugh broke into a thousand pieces and they all went skipping about. That was the beginning of fairies," says Peter Pan.

Children who believe in fairies are the ones who keep them alive, according to Peter.

"Every time a child says 'I don't believe in fairies,' one of them suddenly dies. Fairies are nearly all dead now because so many children refuse to believe in them any more."

The adventures of the three Darling children, Wendy, John and Michael with Peter in the Never Never Land form the theme of Barrie's wonderful fantasy.

For more than twenty years, "Peter Pan" has been a favorite with millions of theatre-goers. For the first time this wonderful story has been brought to the screen.

Betty Bronson, chosen by Barrie, plays the title role, Ernest Torrence, Cyril Chadwick, Virginia Brown Faire and Anna Wong are featured in the picture.

May Build Sanitarium

Plans for a sanitarium to be erected just north of the boundary at a cost of $1,000,000 are being made by E. A. Sherwood of the Epso Products Company. One half million dollars would be used in addition for advertising. Los Angeles and San Francisco capital is being interested in the project.

An effort is being made at the present time to obtain a concession from the provincial government to operate a bar and arrangements are being made to purchase land on both sides of the boundary.

The medicated water of Bitter lake west of town would be piped to the sanitarium.—Oroville Gazette.

RED ROSE COFFEE "is good coffee"

"Dont's" and "Do's"

With the coming of the summer vacation period, the opening of summer cottages, the flocking of people to resorts, and the inauguration of automobile touring parties, the time has also come when all those who enjoy the advantages of these pleasures and health-giving pursuits should give heed to the taking of these little precautions which require attention if real benefit and not harm is to result from a holiday.

People living in cities and towns with all modern conveniences at hand are sometimes apt to take unnecessary chances, and to neglect matters which are so essential to the maintenance of good health and the obtaining of full enjoyment and benefit from the relaxation which summer vacations afford. Because of these little oversights it has been demonstrated on more than one occasion that epidemics of sickness have had their origin in summer camps and vacation resorts.

Quite a few "don'ts" are urged upon the attention of summer campers and vacationists, but all too frequently the things which ought to be done are overlooked. For example, people are urged not to leave a camp fire until they are assured that the last spark has been extinguished. They are warned not to unnecessarily cut down or mutilate trees and shrubs. Touring motorists are even asked not to pluck wayside wild flowers only to have them wither and die in a few hours, but to leave them blooming in their natural state, thus adding to the beauty of the highways and adding to the pleasure of all.

But there are "do's" which are equally, possibly more, important. The city camper, used to turning a tap in order to obtain pure water, should pay close attention to the source and quality of the water he uses for drinking and cooking purposes. Disposal of camp refuse and garbage demands careful attention. In towns and cities where there is methodical collection and destruction of such waste matter by the municipal health authorities, people are apt to forget that at camp and in summer resorts that duty involves upon themselves and that their own health, as well as of others, and the maintenance of enjoyable surroundings, depends upon how efficiently this is attended to. The proper thing is to bury all such matter, and bury it deep. Too much emphasis cannot be laid upon the importance of proper sanitary arrangements in camps, no matter how small, and at all summer resorts.

In every summer cottage, and included in the equipment of all touring parties, there should be a small First Aid kit containing those few simple but essential things required in case of minor accidents, poisoning, severe sunburn, etc. Remembering that a doctor or nurse may be many miles distant such simple remedies, and the easily understood directions which go with such a kit, may result not only in relieving pain and discomfort, but actually preventing serious illness.

A little consideration given to these matters at the opening of the camping season may mean all the difference between a summer vacation proving both enjoyable and beneficial and just the reverse.

A Non-stop Motor Trip

Two U.S. Men Attempting Drive From Coast to Coast

From coast to coast without permitting the wheels or motor of their automobile to stop is the large undertaking to be attempted by Lieutenant Leigh Wade, one of the United States World fliers, and Linton Wells, a writer. The two men have been in New York completing plans for the trip.

Never before has a non-stop drive from coast to coast been attempted. Wade and Wells are optimistic and expect to complete the trip successfully, arriving at Los Angeles or San Francisco in seven days.

Peevish, pale, restless and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Alberta Secures New Settlers

Large Number Have Arrived to Take Up Land This Spring

Considerable immigration has taken place into Alberta within the past month, large numbers of settlers arriving chiefly from Britain and European countries. Many inquiries from prospective settlers are being received at the offices of the provincial publicity commissioner and by the federal offices. During one week recently more than twenty homesteads were filed on at the Edmonton land office.

Tubular Camera Invented

A tubular camera, to be rammed down throats for the purpose of photographing the interior of stomachs, was exhibited at the convention of the American Pronchoscopic Society.

An Underground Garage

Parking Space Beneath Leicester Square, London, Would Relieve Traffic

An underground parking place is planned beneath Leicester Square, London. The model provides that cars and motorcycles shall enter and leave on the near side of the road, and thus avoid crossing other lines of traffic. Two entrances and exits will be necessary in case of breakdowns, accidents and repairs, but the entrances and exits would be easily controlled. All the parking space would be available without crossings, as the traffic would circulate in one direction only. Stairway accommodation would be provided between the underground garage and the street level.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonical in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

Factory Made 2,966,000 Rifles

At a luncheon to Australian school boys who visited Birmingham Small Arms Factory, P. Hannon, M.P., said that the factory's output of rifles during the war was 2,966,000.

B.C. Whaling Operations

Whalers operating out of British Columbia ports this season are expecting a good catch. The stations at Rose Harbor and Naden Harbor will both be operated.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

Italy Will Pay Says Premier

War Debt to United States Amounts To $2,138,543,852

Italy's sacrifices in the world war and her lack of riches entitle her to be placed in the category of privileged nations in regard to her war debts to Great Britain and the United States, in the opinion of Premier Mussolini, who spoke before the senate on the foreign affairs budget.

Italy's war debt, said the premier, amounted to 100,000,000,000 lire, half of which was to the United States.

(Italy's war debt to the United States amounts to $2,138,543,852.)

"The Italian Government recognizes its debts and has declared that, compatible with its present and future economic and financial situation, it will face its debts," the premier said.

Joint Stiffness Goes, Swellings Disapper, Pain Is Subdued

No Liniment Gives Such Universal Satisfaction As

NERVILINE

It is the great penetrating power of Nerviline that makes it so efficient in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment compares in pain relieving power with Nerviline. For the minor pains and ills that arise in every family, Nerviline should always be kept handy on the shelf. Use it for Rheumatism, Lumbago, Neuralgia and Colds. 35 cents at all dealers.

To Produce More Butter

Prairie Farmers Are Setting a New Record For This Year

The Canadian prairie farmers have set 25,000,000 pounds of butter as their objective for 1925.

Last year the farmers and dairies combined produced 22,000,000 pounds of butter, but as the report market has made rapid strides for Western Canadian butter, the dairies have induced the farmers to produce more cream.

A GRATEFUL LETTER

From a Lady Made Well By Dr. Williams' Pink Pills

"I wish from my heart I could persuade every person who is run down in health to give Dr. Williams' Pink Pills a trial." Thus writes Mrs. Louie Mitchell, Oak Point, Man., who further says:—"About a year ago I was a weak woman, suffering from a run down system and impoverished blood. Any little exertion would cause my legs to tremble and my heart to throb violently. I could not sweep a room or walk fifty feet without being exhausted. Then I began taking Dr. Williams' Pink Pills and after taking only six boxes I am as well and strong as ever. I can walk and run without stopping every few seconds gasping for breath as previously. Dr. Williams' Pink Pills will be my stand-by in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to anyone needing a tonic.

There are many troubles due to weak, watery blood which can easily be overcome by a fair use of Dr. Williams' Pink Pills. The sole mission of this medicine is to enrich and purify the blood and when that is done all the varied symptoms of anaemia disappear, and good health returns. You can get these pills through any dealer in medicine or by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

First Typist Passes

The First Woman to Operate a Typewriter For a Salary

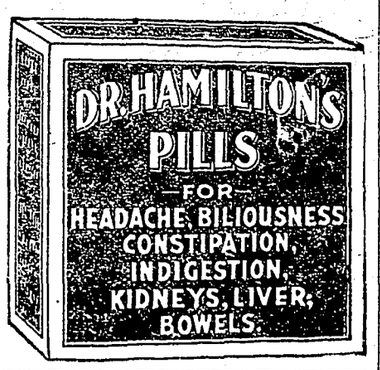
There has just passed away in New Jersey at the age of 75, Mrs. Mary Saunders, who was the first woman to work a typewriter for a salary and as a recognized occupation. When Mrs. Saunders first became a typist she used a machine that nowadays would seem only an interesting relic of a primitive past. It was ridiculously slow, but before she retired Mrs. Saunders was typing 100 words a minute on better machines. So smoothly and imperceptibly has the typewriting machine clicked its way into favor and power that people are apt to forget how much they owe to it, and that there was a day, not so long gone, when all such devices were regarded as nothing more than ingenious and impracticable toys.—Vancouver Province.

Woman Motor Driver

Miss Marjorie Batten, a London woman who served in the Women's Legion, takes her place daily at Bournemouth as owner-driver of a 14-seater motor coach. She is believed to be the only woman motor coach driver in England.

Monkeys of Borneo are so troublesome to rubber growers that the plants while young are guarded.

Keep Minard's Liniment in the House



Jealousy At Empire Show

Some Overseas Workers Think They Should Receive Official Recognition

When the British Empire Exhibition at Wembley closed last year there was keen disappointment among the persons who had actively participated in the big show because no titles or other honors were bestowed upon them in recognition of their services.

Some of the dominions, not including Canada, felt hurt that, while the English chairman of the exhibition standing committee, Sir James Stevenson, was elevated to the peerage as Baron Stevenson, and the two luminaries of the exhibition next to him were the recipients of minor titles, no such recognition was accorded overseas workers.

Truth says very few officials of the British Empire Exhibition last year deserved any recognition whatever, seeing that they were absurdly overpaid and received extravagant entertainment allowances. One of the mistakes which caused last year's losses, Truth says, was the conflict between the military and civilian administration of the exhibition, and the bickering of last year is being continued this year.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Eclectric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticiapted.

Two Valuable Recipes

One Egg Cake

¼ cupful Borden's St. Charles Milk, diluted with ¼ cupful cold water.
¼ cupful vegetable cooking oil, scant 2-3 cupful sugar.
1 egg.
½ teaspoonful salt.
1½ teaspoonsfuls baking powder.
1½ cupfuls sifted flour.
½ teaspoonful vanilla.
½ teaspoonful lemon extract.

Beat the egg light and cream it with the sugar, salt and flavoring. Combine the milk, diluted, with the cooking oil. Sift together the dry ingredients and add them alternately to the first mixture with the milk. Beat thoroughly, turn into a lined, medium-sized pan and sprinkle nut meats, chopped raisins or cocoanut over the top. Bake in a moderate oven for thirty minutes.

Strawberry Short Cake

2 cupfuls flour.
2 teaspoonfuls baking powder.
1 teaspoonful salt.
2 rounding tablespoonfuls butter.
2 rounding tablespoonfuls granulated sugar.
1 cupful Borden's St. Charles Milk, undiluted.

Sift all the dry ingredients together, work in butter, as you would for pie crust, add the milk, beat with spoon (it will be very stiff) and bake 20 minutes in an oblong pan. Split the cake with a hot knife, butter the two sides and put them together with two quarts of strawberries which have been cut into small pieces, sweetened and allowed to stand before placing on cake.

Birmingham, Eng., produces the largest variety of manufactured goods of any city in the world.

Children Quickly Learn To Rely On Cuticura

To soothe and heal the rashes and skin irritations of childhood, Daily use of Cuticura Soap, assisted by Cuticura Ointment, will keep the skin and scalp clean and healthy and prevent simple irritations from becoming serious.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd. Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

The Typical Englishman

Portraits Drawn of Him Are Not True To Life

Foreigners, particularly in those moments when ill-will guides their satirical pencils, have a clear view both of his outward appearance and of its implied nature. They see him as a thin, fanged, hollow-cheeked giant, sharp with the angles of arrogance and heavy with the boots of stupidity and didacticism. That portrait of him we know to be unjust; we are prepared to swear, at any rate, that, contrary to the opinion of European caricaturists, a typical Englishman seldom wears a kilt, and that the thickness of his boots is due rather to the climate in which he is accustomed to live than to any brutal desire in him to tread upon the corns of sensitive strangers. The portrait that they draw of him when they are annoyed is indeed inaccurate, but is it any more inaccurate than his own traditional representation of himself as John Bull?—London Times.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Builds Safer Monoplane

Invention of Famous Dutch Aviator Will Lessen Danger

Herr Fokker, the famous Dutch aviator, has built a new monoplane that is very much safer than any other machine now in use. By a re-arrangement of balance and perhaps by other expedients of construction that he has not explained he has produced a plane that has very slight tendency to dive nose foremost when the power is suddenly shut off, accidently or otherwise. The other day at Croydon, England, he showed how he could stall his engine a thousand feet in the air, and then with arms folded descend, his monoplane on almost an even keel, to a point where a safe landing could be made. A new British aeroplane has been designed to accomplish the same result by means of slotted wings that divert the air currents when the plane ceases to move forward, so that it remains virtually on an even keel.—Youth's Companion.

MOST OLD FOLKS REQUIRE A HEART AND NERVE TONIC

After middle age little sicknesses and ailments seem harder to shake off than formerly as the heart action becomes weak and uncertain and the nerves are not as steady as they were in the younger days.

Now is the time when all aged people who wish to maintain their health and vigor and retain their energy unimpaired should use

MILBURN'S HEART AND NERVE PILLS

Mrs. M. O'Connor, Whitestone, Ont., writes:—"I have been troubled, most of my life, with shortness of breath, palpitation of the heart, and fainting spells. I was advised, by a friend, to try Milburn's H. & N. Pills, which I did, and at once found relief, and I have never had a really bad spell since. I am 80 years of age and I always keep them in the house, and feel that with their help I will see many years yet. I always recommend them to anyone who is suffering from heart trouble."

For sale at all druggists and dealers.

Scots Desert Porridge

Ham and eggs have replaced porridge as the popular breakfast dish in Scotland. The decline of the use of porridge, it was brought out recently at a board of agriculture inquiry, is attributed to a change in the national diet and began 10 or 12 years ago.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Facts About Infant Mortality

Interesting Discoveries By U.S. Department of Labor

More babies born during June die during their first year than those who are born in any other month. Those born during August stand the best chance. Twenty-five per cent. more boy babies die during the first year than girl babies. First year mortality rates among babies varies inversely with the earning capacities of their fathers. These were some of the facts discovered by the children's bureau of the U.S. department of labor recently in a study of the first year of 23,000 babies born in eight selected cities.

Minard's Liniment for Backache

A man may shut his eyes to a painful truth, but he seldom shuts his ears if the aforesaid truth happens to be about his neighbor.

Minard's Liniment For Corns and Bunions

WRIGLEY'S "after every meal"

Parents:- encourage the children to care for their teeth!

Give them Wrigley's. It removes food particles from the teeth. Strengthens the gums. Combats acid mouth.

Refreshing and beneficial!

Old Ship Renovated

The Discovery, the old ship in which Capt. Scott made his memorable voyage to the Antarctic in 1901-4, has been partly rebuilt and refurnished at Portsmouth, and is now ready for another long voyage. She is a small, stoutly-built vessel, of about 750 tons.

Relieved Of Rheumatism and Lumbago

Now Quebec Man Recommends Dodd's Kidney Pills

Mr. George Tremblay Was Unable To Work But Is Now In Good Health

St. Marie, Que.—(Special).—"Your Dodd's Kidney Pills have done me a lot of good," states Mr. G. Tremblay, who is well known and highly respected here.

"When I sent for them I was unable to work. I took ten boxes and to-day I can do my work and am without pain. I recommend them to all who suffer with backache, rheumatism and pains in the kidneys."

Dodd's Kidney Pills are not put forward as a cure-all, but for the specific maladies for which they are recommended, namely, rheumatism, backaches, diabetes, dropsy, lumbago, urinary troubles and heart disease.

Dodd's Kidney Pills act directly and promptly at the seat of the trouble. They do not cause any derangements in the natural functions of any organ.

Dodd's Kidney Pills relieve after every other means have failed.

Modern Methuselah

The world's oldest man is believed to be a Kurd, named Noro, born in 1775, says the newspaper, La Bulgaria. A son of this 160-year-old man and his only descendant, died last year at the age of 97. In Jugo-Slavia is a man said to be 115 years old.

Alberta's Foreign Population

Alberta's total foreign population, according to a recent bulletin issued by the bureau of statistics, is in excess of 180,000 with approximately 100,000 Americans included in this total. About 5,000 Americans are resident in Calgary.

Ozark is a corruption of the French word aux arcs, and means "with bows," a term descriptive of the Indians who formerly inhabited the country.

A billion dollars' worth of American Liberty bonds have been converted into worthless securities.

How To Produce A Better Race

Laying the Foundations of Health For Future Generations

Can we produce in Canada a better, more efficient and a happier race? This is the question that the recently formed division of education of the Canadian social hygiene council under Professor Peter Sandiford and A. D. Hardie, M.A., have set out to answer.

For months these experts in conjunction with an advisory committee composed of biologists, hygienists, psychologists, educationalists and noted figures in the church and women's organizations have been searching for an answer which is not merely theoretically acceptable, but is definitely practical throughout the Dominion.

Findings are to be later embodied in official publications of the division of education of the social hygiene council, but a forecast of them is now available from recent pronouncements made by the directors of this department.

The answer to all three questions is yes, but the end in view of attaining better health, greater happiness and usefulness, as well as a prolongation of human life, in this country is dependent, here as elsewhere, on the somewhat slow process of education of the whole people in what life is and how it should be lived.

Starting with the thesis that if one entire generation can be fully educated in all the scientific standards of personal and social hygiene may mean to themselves and children, it is postulated that the succeeding generation will be an improved race.

In the opinion of these experts and their notable advisory committee, the question will be shown to resolve itself, in its final analysis into the problem of educating parents, because parents are the teachers in the pre-school years, a period of life now being recognized as the most important for not only laying the foundations of health, but of morals and character as well.

The report will emphasize the point that when parents are taught to realize that a child is made or marred physically, mentally and morally before he ever sets foot in a school, there will be a much greater readiness on their part to know and to teach the science of life.

A fundamental recommendation in the report will be that instruction of children from very early years shall be given in suitable form for their limited understanding but with neither evasions or sentiment, through such sciences as botany, zoology, physiology and household science, with more advanced knowledge of a protective character imparted not later than the age of ten to both boys and girls.

The paramount importance of training children from babyhood in right habits, and proper attitudes of mind will be emphasized, while the dangers of aloofness or silence about vital subjects on the part of parents will be pointed out along with the need of establishing confidential contacts with their children, and of implanting in them gradually an ineradicable respect for themselves, the family and the race.

Throughout the recommendations of this report will run the conviction that proper education of the young will depend first on instructed parenthood, secondly on the active co-operation of school, church and medical fraternity in ensuring a logical continuation of the work of building up a generation of instructed youth, and thirdly on the imperative necessity at all times of keeping away from an over emphasis on sex, while offering instruction to allay all natural curiosities and recreation or other wholesome activities to provide for both physical fitness and healthy minds in the young of the race.

ABLE TO DO HOUSEWORK NOW

Sick a Year. Got Great Benefit from Lydia E. Pinkham's Vegetable Compound

Bloomington, N. S.—"I took Lydia E. Pinkham's Vegetable Compound for pains and backache, also for nervousness, sick headaches and sleeplessness. I was troubled in this way for over a year, and a friend told me about the Vegetable Compound and induced me to take it. I must say I have received great benefit from it and am able to do my housework now. I recommend the Vegetable Compound myself and am willing for you to use this letter as a testimonial."—Mrs. William Morse, Bloomington, Annapolis County, N. S.

Do you know that in a recent canvass among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 98 per cent. replied "Yes."

This means that 98 out of every 100 women are in better health because they have given this medicine a fair trial.

Mrs. Morse is simply another case of a woman receiving "great benefit." Women suffering from the troubles so common to their sex should listen to what other women say who have experienced the same sufferings and found relief. Give this dependable medicine a chance—and at once. It is sold at all drug stores. G

Water Changes Color In Norway Fjord

Scientists Are Trying to Account For Strange Phenomenon

Sognefjord, the longest and most famous of the Norwegian fjords, is experiencing a strange phenomenon. The water, usually clear and dark with the darkness of its immense depth suddenly has become opaque and milky. All the fish have disappeared.

Helland and Hansen, the oceanographer, is proceeding to the fjord to make scientific investigations. Samples of the water will be sent to Oslo (Christiania) for an examination by experts. Sognefjord is a long, deep and narrow inlet of Norway, running east from the sea. In places it is 4,000 feet deep, with mountains beside it rising to 5,000 feet.

Pearls Found In Cocoanuts

Formed By Same Process As Other Pearls Says Dutch Botanist

A Dutch botanist announces that he has discovered pearls in cocoanuts. The gems are round, perfect in form, milk-white, but lack the iridescent sheen of the oyster pearl. They are very rare and difficult to secure, for the natives of tropical islands prize them as talismans and are reluctant to part with them. They are formed by a process similar to that which produces shell-fish pearls. Certain cocoanuts are "blind"; that is, they do not have the three "eyes" at the end, to one of which the embryo of the seed is normally attached. Caged inside the nut and unable to develop normally the embryo becomes impregnated and covered with lime salts from the milk of the cocoanut.

Barges To Transport Buffalo

With the building of two barges at Waterways, first steps in the shipment of approximately 2,000 Wainwright buffalo to northern reserves will be under way.

Each barge will have a capacity for four cars, built to hold about 200 animals. Under the plans already made the buffalo are to be taken to between 30 and 40 miles south of Fort Fitzgerald, where they will be turned loose to roam on an extensive reserve with their wild cousin, the wood bison.

A Crossword Puzzle

One of our great educational crossword puzzles called the other day for a word in three letters meaning where you sit on Sunday, and the neighbor women of the older set think it's a pew, while those of the middle-aged and younger sets feel sure it must be car.—Columbus, Ohio, State Journal.

The Surest Way

A correspondent wonders which is the best way to make sure of admission to a court during the hearing of murder trial. We do not recommend it, but by far the surest method is to commit the murder.

Leaning More Than Ever

Celebrated Tower of Pisa Now Fourteen Feet Out of Plumb

The celebrated Leaning Tower of Pisa is leaning more than ever. In a hundred years it has added more than a foot to its inclination and now is a trifle more than fourteen feet out of plumb.

How much further the campanile can lean and still be considered safe Italy's engineers and architects are not prepared to say. They are sufficiently roused, however, to cause the government to appoint a commission to take measures to insure that the six-century-old wonder shall stand for ages to come.

It will be a feat of engineering to jack up this monument and replace the ancient foundations.

Visitors to Pisa taken to the tower by their guides after they climb the winding stairs to the belfry, are led around to the lower side and invited to look down. Many after one look draw back in fright.

From the top the effect of the list is so striking as to give one the impression at first that the tower is actually falling, and some sensitive travellers, it is related, have had to be restrained from attempting to jump, the effect of falling is so real.

There are two other leaning campaniles in Pisa, and this fact has been an added argument for those who assert that the engineers of Pisa built their towers that way because they wanted to. However, it is hardly possibly that Bonnano and William of Innsbruck anticipated that their tower would lean beyond the marks they had set, even if the specifications had called for a list to the south.

Prince Conducted Orchestra

Assumed New Role During Dance at King Williamstown

The Prince of Wales personally conducted the orchestra during one of the numbers of a dance given in his honor at King Williamstown, S.A. Without any arrangement he strolled over to the orchestra which was playing Second to None, took the baton and conducted the piece to its end.

Thousand of kaffirs garbed in fantastic combinations of native costume and improvised European dress, gathered from all surrounding countries and hailed the Prince. One Zulu in full fighting trim and with a war shield lashed to his back, smashed through the streets on a motorcycle to reach the Prince's levee.

A kaffir paraded the ground near the Prince's headquarters attired in navy blue trousers, a black dinner suit waistcoat and a rough imitation of a tail coat made from wildcat skins.

There were large numbers of kaffir women with faces painted red, some were clad in long skirts, some wore short-sleeved and low-necked blouses, but for the most part both men and women were equipped only with their usual reddish brown blankets and bead necklaces.

The crowd, estimated to number more than 10,000, cheered tremendously as the Prince arrived.

The only white persons permitted at the gathering were the Prince of Wales, members of his staff, and a few local officials and newspapermen.

Would Enjoy Moose Hunt

Prince of Wales Replies to Letter Nipigon Man

Neil McDougall, who five years ago showed the Prince of Wales how to hook speckled trout along the banks of the Nipigon River, told the Toronto Women's Press Club of a letter written by His Royal Highness's secretary shortly before the departure for South Africa. Replying to Mr. McDougall's renewed invitation for a moose hunt, the secretary expressed the Prince's delight at the proposal, and stated that he would certainly make arrangements to stop off at Nipigon on his next visit to the E.P. Ranch, which, he hoped, would be next fall—"that is, providing you don' try to marry him off," the letter concluded, naively.

B.C.'s Export of Power

In connection with the export of power, it is interesting to note that British Columbia is third among the exporting provinces; Ontario is first and Quebec second. In the last fiscal year, the Western Power Company of Canada exported 40,531,531 kilowatt hours, the B.C. Electric 754,558 kilowatt hours, and the West Kootenay Power and Light Company 545,600.

Death On Warts

Apply Minard's daily. Warts dry up and disappear. Also relieves bunions.

MINARD'S "KING OF PAIN" LINIMENT

Can Control Electric Trains By Radio

Conductor and Engineer Could be Eliminated Says New York Expert

According to Mr. G. Y. Allen, radio expert, of New York, through the use of modern developments in radio, it is entirely possible to operate electric trains from a central control office.

Mr. Allen does not advocate the elimination of the engineer, the conductor and train crew, although he says it now is entirely feasible, through the combination of automatic control and radio supervisory control, to start a train without a crew, run it at full speed over clear tracks, slow it down or stop it, in accordance with the signals of an automatic block signalling system, start it up again when the signals clear, stop it at its next station stop and open its doors.

"The supervisor at the control office would receive complete information by radio at all times as to the position and operation of the train," Mr. Allen explained. "He could take personal charge of its operation at any time; and he could talk directly to the passengers to give them any desired directions."

New Zealand Tourist Makes Unusual Request

Wanted to Make His Own Bed in Hotel

Hale and healthy at 91, John G. Kelley, well-to-do farmer of New Zealand, stepped briskly up to the desk in one of San Francisco's most exclusive hotels and addressed the clerk, who smilingly held out a pen to the prospective guest.

"Not so fast, young man," he cautioned. "I've got one request to make before I write my name in that book. If I stop at this hotel I want it understood that I'm to be permitted to make my own bed. I've been doing it for 80 years now and, well—it's got to be kind of a habit, you might say."

Kelley said he was on his way to Ireland, where a sister died recently, leaving him £20,000.

To Build More Elevators

Tenders for the construction of 80 elevators for the Saskatchewan Wheat Pool, Elevators, Limited, have been called. The first batch of new grain elevators will be constructed at points where neither the Saskatchewan Co-operative Elevator Company nor the United Grain Growers, Limited, have elevators at present.

Canadians Great Butter Eaters

With 3,600,000 milch cows, 200,000 dairy farmers, 1,500 creameries and many thousands of cheese factories, Canadians are the greatest butter eaters in the world, according to D'Arcy Scott, secretary of the national dairy council of Canada. Their per capita consumption in 1923 was 27.43 pounds.

For Aches and Pains Use Minard's Liniment

Water Clocks Used By Ancient Greeks

Hours of Day in Summer Longer Than Hours of Night

By the ancient Egyptians the day was divided into 24 hours of equal length. The Greeks adopted a different system, dividing the day, that is, the period between sunrise and sunset, into 12 hours, and also the night. Whence it followed that it was only at two periods of the year that the length of the hours during the day and night were uniform. In consequence, those who adopted the Greek system were obliged to furnish their water clocks with a compensating device so that the equal hours measured by those clocks should be rendered unequal according to the exigencies of the season. In summer, when the period of daylight is longer than the period of darkness, the hours of the day were longer than the hours of night, because day and night, whether long or short, were each divided into 12 hours.

This water clock of the ancient Greeks, also used by the Romans, was called clepsydra, from two Greek words, meaning to steal water.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Meant It Kindly

An Isle of Wight clergyman, returning to his parish after a prolonged absence, astonished a meeting of the Guild of Dear Old Souls by exclaiming cheerfully, "I am delighted to see so many old Cowes faces around me!"

To Install Radio Fog Stations

Radio fog stations, which will send out continuous signals, enabling fog-bound ships to determine their positions, are to be installed at seven points on the United States' shores of the Great Lakes.

"What word in four letters beginning with 'h' means everything?" asked the crossword puzzler. And then he did not appear satisfied when someone said "hash."

Palestine To Have Its Own Coinage

Over Thousand Years Since Last Last Coins Were Issued By Jews

Palestine, by a recent decision of the British Government, is to have its own coinage, the names of the units—shekels, dianars and prutahs—being those used in an ancient monetary system closely connected with Jewish history.

It was about one thousand eight hundred years ago that the last coins issued by a Jewish nation were put into circulation.

GIVE CONFIDENCE TO YOUNG MOTHERS

A simple and safe remedy for the common ills of childhood should be kept in every home where there is a baby or young child. Often it is necessary to give the little one something to break up a cold, allay fever, correct sour stomach and banish the irritability that accompanies the cutting of teeth. Experienced mothers keep Baby's Own Tablets on hand for such purposes and young mothers can feel safe with a box of the Tablets ready for emergencies. The Tablets are a mild but thorough laxative that act without griping and they are guaranteed to be absolutely free from opiates or other harmful drugs. They are sold by all druggists or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Believes Canada Will Be Leader

Hon. Wm. Morrow, L.M.C., member of the legislative council of the Upper House of South Australia, who arrived in Toronto recently, predicts that within a few years, Canada, and Ontario particularly, will be among the leading countries of the world.

One minute after garlic is eaten by the cow the flavor is present in the milk.

WHERE does the money come from that buys the food and clothing, pleasures and amusements, and everything else that a community like this requires? The farmers get their living off the farms, but there are hundreds of men who are not farmers. These live and clothe themselves nicely, eat early vegetables and fruits from the south, and buy autos and maintain them. The farmers sell fat cattle, hogs, sheep etc. Eggs, butter, cream, poultry, fruits, grain and all other farm products would bring the amount up to $100,000 sold in this district. Then we have our lumbering and tie making interests which will add another $100,000. There is also the great basic industry of mining which would bring this amount up in the millions. The tourist traffic and trapping privileges bring in large amounts also. Indeed the income from this district will amount to millions annually. With this amount we can buy lots of autos and eat lots of Southern strawberries.

Egg Preservatives

(Experimental Farm Note)

CHEAP EGGS IN WINTER

Many families, even of farmers and other poultry keepers, have very few eggs to use from October to February, when the prices are high. It would be easy for them to preserve and store as many as required, if they would but take the trouble to do so.

EXPERIMENT AT CAP ROUGE

In order to secure information regarding the best methods of preserving eggs, an experiment was started in 1916 at the Cap Rouge Experimental Station. Eight methods were tested: 1. Wrapping in paper and leaving undisturbed; 2. Wrapping in paper and turning daily; 3. Packing in oats; 4. Packing in sawdust; 5. Compose Gaulin; 6. Armstrong paste; 7. Lime water; 8. Waterglass.

RESULTS

It was soon found that the two best methods, by far, were the lime water and the waterglass. These have been continued to date and very little difference has been found, though different lots of eggs are tested each year by the Dominion Chemist and the Dominion Poultry Husbandman, at Ottawa, and by the Superintendent of the Cap Rouge Experimental Station.

BEST METHODS

Use one pound of good, freshly burnt quicklime to five gallons of water. Slake the lime with a small quantity of water, just about enough to cover it, and then stir the milk thus formed into the water. Keep well stirred for a few hours, allow to settle, and pour the saturated water over the eggs. With waterglass, use about four pounds in ten gallons of water.

GENERAL ADVICE

All eggs used should be perfectly fresh and, if possible, from flocks having no male birds. The eggs should be completely immersed during the whole period of preservation, and the vessel should be kept covered. The best temperature, though not absolutely necessary, is from 40° to 45° F.

Beaverdell

Mr. and Mrs. J. Drum motored to Greenwood on Sunday.

P. H. McCurrach, of Greenwood was a visitor to our thriving burg last week.

Ed. Nordman returned on Wednesday from a business trip to Rossland.

Roy Clothier, manager of the Beaver mine, paid Greenwood a business visit during the week.

Owing to an increase in freight and express coming to Beaverdell an agitation in under way to have a station agent here.

A rich strike was made at the Beaver last week. The lead is over three feet wide and is very rich in high grade ore.

There were several mining and newspaper men in town during the week, among them being the editor of the Mining Truth.

Geo. Inglis is in Greenwood recuperating from the effects of poison ivy. We will be glad when George is able to be with us once more.

Mr. and Mrs. Crane and son, Walton, returned last week from Snohomish, Wash., where they attended the funeral of Mrs. Crane's father, Mr. Walton.

T. W. Clarke will open his new store on Saturday. In the evening a house warming will be held in Mr. and Mrs. Clarke's new residence. As Mr. and Mrs. Clarke are popular and ideal entertainers a big crowd and good time may be expected.

Greenwood and District Hospital

The Board of Directors of the Hospital wish to thank Dr. and Mrs Francis as also Mr. and Mrs. L. Bryant for their great consideration in allowing their houses for the accommodation of the nurses of the Hospital during the month of May, when the Hospital was overcrowded with patients.

Donations to Hospital for May

H. Smith, flowers, rhubarb; fish and eggs; Rock Creek Farm Women, magazines; Mrs. Axam, pickles and flannel; Mrs. G. S. Walters, serviettes; Mrs. Lund, fruit and flowers; W. B. Fleming, magazine; J. H. Goodeve, ice cream; Mrs. Morrison cake buns and flowers; Jack Roylance, meat; Mrs. Francis, baby shirt; Mrs. Jenkin, tray cloth and rags; Mrs. Sortome, milk and rags; Mrs. J. H. Goodeve, bread; T. Crowley, capsolin; Mrs. L. Portmann, fruit; Rev. W. R. Walkinshaw, flowers; Mrs. McGillivray, door stops; Mrs. Sater, oranges; Mrs. Kingsley, tomatoes and fruit; Mrs. Johnson, Rock Creek, rhubarb; Mrs. E. Mellrud, tray cloths; Mrs. Skilton, doughnuts; Mrs. Hallstrom, milk; Mrs. Bellgrove, bread; Mrs. Pannell, chicken; Mr. and Mrs. Chas. Graser, rhubarb.

Approximately five millions dollars will be spent in maintaining and constructing new highways within the Province of Quebec during the present year. At present there are 2,586 miles of highway in the province stretching into all parts of Quebec and linking up with main roads in the U.S. and the sister provinces to the East and West.

According to a report prepared by the Merchants Exchange of Vancouver, forty-two regular steamship lines are now operating out of that harbor, the gross tonnage for last year being 14,473,518 which is over a million tons in excess of the 1923 figures. The Canadian Pacific Railway is now erecting a new pier there which will be one of the finest and largest on the continent.

The Campbell River Company of White Rock, has purchased the entire holdings of the James Logging Company of Vancouver which include 35,000 acres of timber lands, containing over two billion feet of logs, a saw mill with a capacity of more than 50,000 feet of lumber a day, three large tugs and a complete logging outfit. A sum of more than five millions dollars is said to be involved.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to ten head.

BRITISH COLUMBIA
The Mineral Province of Western Canada
TO END OF DECEMBER, 1924

Has produced Minerals as follows: Placer Gold, $77,382,953; Lode Gold, $118,473,190; Silver, $68,824,579; Lead, $70,548,578; Copper, $187,480,378; Zinc $32,171,497; Miscellaneous Minerals, $1,431,349; Coal and Coke, $260,880,048; Building Stone, Brick, Cement, etc., $42,225,814; making its Mineral Production to the end of 1924, show an

Aggregate Value of $859,427,386
Production for the Year Ending December, 1924, $48,704,604

The Mining Laws of this Province are more liberal, and the fees lower, than those of any other Province in the Dominion, or any colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Full information together with Mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES
VICTORIA, British Columbia.

N.B. Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B.C. Reports of the Geological Survey of Canada, Pacific Building, Vancouver, are recommended as valuable sources of information.
