JOHN MEYER - Proprietor

Statistics recently compiled show that British Columbia has more telephones to population than any other province of Canada. It is to maintain this enviable record that extensions of outside plant and central office equipment are constantly being made and this year large expenditures are planned. Facilities for adequate telephoning are always kept up to top notch, with the result that our whole system is in excellent condition, and we are in a position at all times to supply service when the request is made.

Black Tartar

(8614)

Will stand for Service In Anaconda For the Season 1922

Commencing May 22nd (Monday's only)

Terms: $5.00 deposit, Balance $10 when mare proves in Foal

J. ROYLANCE.

The nice warm weather of the past week has brought out the growth. Pasture is much benefited. The trees are putting on their foliage and are beginning to make things beautiful.

Around Home

Chas. Johnson has gone to Grand Forks.

V. S. Newton was in Rossland for the week-end.

R. A. Brown, of Grand Forks, was in town on Monday.

Nights are shorter everywhere, and so is summer underwear.

P. H. McCurrach motored to Grand Forks on Wednesday night.

F. M. Lewis, of Vancouver, was in town for a couple of days last week.

Murdock McLeod is employed by the S. K. P. & L. Co. in the Okanogan.

Mrs. S. J. Roylance, of Boundary Creek, was a visitor in town on Wednesday.

The next thing is to get your razor sharpened in readiness to shave the lawn.

Mrs. J. A. McCallum and Miss Pincott, of Grand Forks, were in town on Monday.

Art Murray left on Monday for Beaverdell where he has secured a lucrative position.

Midway and Greenwood will occupy the diamond at Ingram Bridge on May 24th.

After giving us a little bit of everything, May is now giving us something really good.

Miss W. Highman, of Grand Forks, was the guest of Mrs. C. Nichols, during the week end.

Harry Anderson, of the Premier mine near Stewart, is visiting his mother, Mrs. J. P. Anderson.

D. N. Morrison of Langley Fort, brother of the late Norman Morrison, is a guest at the Pacific Hotel.

During the past fiscal year $90,000 was collected at post offices on letters with deficient postage.

Mrs. A. Whiting and Mr. and Mrs. H. Snell motored over from Kettle Valley and Rock Creek on Monday.

Owing to Wednesday being a holiday the K. of P's will meet on Tuesday 23rd inst. Initiation and supper.

Navigation in the Yukon will open about the first week in June, when the parcel post service will be resumed.

L. Bryant was elected School Trustee by acclamation to fill the vacancy caused by the resignation of P. H. McCurrach.

There will be no service in St. Jude's church on Sunday next, but on Sunday, May 28th service will be held at 7.30 p. m.

Lee & Bryan are having the front of their store painted adding greatly to the appearance of this up-to-date establishment.

Fourteen cars were parked along Main St on Saturday night with several other cars up the street as well as some cars on the side streets. The light in front of the theatre is a great improvement.

At this festive season when hubby grabs the spading fork and makes a break for the garden, friend wife never knows whether he intends to fix up a place for her flowers or prospect for a can of angleworms.

John Baker appeared before P. H. McCurrach, S. M., on a vagrancy charge, last Friday. He pleaded guilty and was sentenced to pay a fine of $10 or 2 months with hard labor in Nelson jail. He was taken to Nelson by Constable Stewart.

A. R. Thomas, of Vancouver, secretery of a company which has been organized to develope some claims around Greenwood, is in town looking over some properties, near the Bay mine on the Phoenix road, with a view to developing and working them.

Community Spirit Needed

The town of Greenwood, in common with other towns of its size and importance in the province, would be a far better place for everybody if it were inoculated with the spirit of the community interest. It would be a painless operation just by extending the influence of the Boosters Club of Vancouver or the "Smile" Club of Winnipeg. What would be the result if the spirit that prevails in these clubs were adopted by the town generally? It would seethe with local patriotism and very soon everybody would be boosting for the town and prejudice against the town would disappear. Let us co-operate heartily to get a going concern here. We ought to use our utmost endeavor to get a mill and some of the mines going.

Today outside products to the amount of many hundreds of dollars are coming into this town and displacing that much home product, just because the people lack the spirit to declare that they will buy nothing but home made goods, in so far as they are able. In the one item of bread a family could be supported here for this article of food alone, and that family would become a home builder and taxpayer. Instead of that our staff of life is imported and takes away large amounts of money needed in the very worst way for the support of our townspeople. It is surely time that people wakened to the fact that it is to their own best interests to give local patriotism a trial.

Outlook in This Section Is Good

The prospect for a bumper crop throughout this section of B. C appears to be exceptionally good at the present time. Reports received from districts surrounding Greenwood are very favorable indeed. The wheat came through the winter exceptionally well. In some sections, however, it is slightly browned, due to the cold weather of a week ago, but this should regain its color and with a good shower of rain it will come again and be a first class crop. In low wet sections it is not in good condition but generally speaking the wheat crop promises to be one of the best in a good many years.

The first seeding of clover and grass is also in fine condition. Spring seeding will be pretty well completed by the end of the present week. The ground is in excellent condition for cultivating and a good seed bed is easily prepared. The warm weather will now greatly improve conditions.

Jimmie Henderson's house at Deadwood was burned to the ground about nine o'clock on Sunday morning. The fire is thought to have started from a spark from the chimney. Very little furniture was saved for the fire was so fierce and rapid that the family hardly had time to save their wearing apparel, in fact most of it had been burned. The loss is serious and there is no insurance.

It is dangerous to stand too close to the creek banks when the water is so high. Herb Cox had a narrow escape from drowning this week. He was standing near the creek on his ranch when the bank caved in. He had big rubber boots on and the water was so swift that he could not gain the bank. However, he was finally swept against a tree that had fallen across the creek and with great difficulty he managed to climb up on the tree and thus make for high and dry land.

Christian Valley

The meadows are looking green now and the gardens have begun to grow.

Frank Peterson and son, Sten, came up from the tie camp on Saturday.

Can any anyone tell us what is the size of the largest grizzly caught in this district? What is the largest black bear?

Mr. de Lautour, who has taken up land in the Valley came up with his farm implements on Friday. He intends to bring his wife and four little girls on Monday.

A. R. Lord, inspector of schools, and H. Snell, of Riverside, were up a few days ago. Mr. Lord was well pleased with Mr. Wilkinson's work in the school, Three pupils will try the entrance examinations in June.

Mr. Wilkinson and Frank Christian shot a grizzly bear a few days ago. It got away with three head of Mr. Christian's cattle last fall. It left part of the last one to finish in the spring so they waited for him to come around and managed to get him. He measured 9 ft 6 in but they saw he looked twice that as he stood on his hind legs blowing blood and foam up a tree after being shot. The dog saw him first and began to worry him and they were able to get two shots in his neck before he saw the hunters. As it was getting dark they decided to go down early next morning to skin him. They did so but werenot soon enough. Another bear had been ahead of them and eaten a hole in his side. They hope to get him later. As one of the hunters remarked: 'No more going to see the animals in Stanley Park after that.

Boundary Falls School Report for April

A. G. McLaren, Teacher

Days school in session	14
Total attendance	174
Average attendance	12.42

Perfect Attendance: Daniel Boltz, Andrew Swanlund, Annie Swanlund, Louise Swanlund.

Proficiency list: Senior 3rd, Annie Swanlund, Joseph Krouten; Junior 3rd, Caroline Casselman, Annie Casselman; Senior 2nd, Alice Casselman, Jovie Klenosky, Annie Klenosky; Junior 2nd, Daniel Boltz, Andrew Swanlund; 1st Reader, Helen Casselman; 1st Primer, Frank Krouten, Louise Swanlund, Verona Klenosky.

Midway News

A baseball match will be played between Greenwood and Midway on the 24th of May at Ingram Bridge. Also grass hockey by two local teams.

Don't forget the "Big Hop" solo and whist drive at the old Lancashire Hotel, Midway, on Friday, May 19th. A good time assured, for the benefit of the Midway Baseball team. "Let's go."

Torodo at Midway will play baseball on Sunday 21st. inst.

IN MEMORIAM

In loving memory of Robert Thornton Lowery, founder of The Ledge, and last of the pioneer editors of the Kootenay, who passed away at Grand Forks, on May 20th, 1921.

"LEST WE FORGET"

Kettle Valley Notes

There is talk of fixing up some tennis grounds.

Mr. Creese, of Penticton was in the Valley on business.

Major K. R. Davies returned from Vancouver for a week or two.

With the advance of Spring the farmers are becoming more and optimistic.

Since the nice weather has set in things are picking up in great shape, as everybody is getting a hustle on.

The residence of Mr. and Mrs. A. E. Bonnett, Nicholson Creek, was burned to the ground last Saturday morning.

The Womens Institute are giving a Dance at Riverside Hall on the 24th. Proceeds to go to an invalid. Good music is guaranteed.

The Rock Creek and Kettle Valley Sunday Schools are holding their annual picnic on Saturday 20th inst. Motor cars are taking the parents and children to Myers Creek for the day. The grounds have been kindly lent by J. Jacques, Esq.

On the 24th there will be a grand Hockey match between Myers Creek and Rock Creek versus Kettle Valley and Ingram Mountain, which promises to be a very exciting game, at 2.30 p.m. There is also an open picnic on the Hockey grounds, so bring your lunch baskets and have a good day's outing.

Osoyoos Notes

Fishing is now good in the lake, trout bass and carp being numerous.

Two crews are working on the Osoyoos hill. This highway will soon be in splendid condition.

A survey party arrived on Thursday to do some work in connection with the Government Irrigation project.

The mosquitos have not yet arrived. An old resident remarked: "There is not a single mosquito in Osoyoos. They are all married and have large families.

Settlers are crossing the line daily on their way to Northern, B.C. Many different conveyances being used, autos, trucks, prairie schooners, buggies, saddle horses, etc.

On Tuesday last a truck passed through on its way from Oroville to Oliver with sixty one thousand (61200) eggs. Next week two similar loads will pass through. The hens had to work overtime to complete this shipment.

D. Patterson motored to Vernon last week. En route he met W. Dewdney, P. Pentecost and R. Spencer. At Vernon he attended the assizes. One prisoner received a sentence of 16 years and 20 lashes for inhuman treatment of his wife.

P. A. Tavener and party of the Dominion Museum at Ottawa have located their camp on the lake a short distance from here. Their object is to study the bird life of the Southern Okanagan. At present they are gathering all information possible regarding a flock of 20 Swans which are nesting in the vicinity. The local wild geese, known as the Hutchins variety, are also under their observation on account of the fact they have their nests in trees. There has been considerable discussion as to how they get their young ones down. It is generally believed they carry them in their bills. A bill is a very useful article.

RED ROSE TEA is good tea

Always Pure and Clean and Kept Good in the Sealed Package

Freight Rates And Business

A special committee of the House of Commons has been appointed to study the whole question of freight rates with a view to bringing about a reduction in the existing high schedule, which, it is generally agreed, is having a detrimental affect on business, is operating to prevent a revival in industrial activity, and is particularly paralyzing to Western agriculture.

The problem of reducing rates in the face of an annual deficit of many millions of dollars in the operation of the National Railways is admittedly a difficult one. The National Railways badly need every dollar of revenue they can get, and a substantial reduction in freight charges may prove a very serious matter for them. Yet anything less than a substantial cut will be quite ineffective in providing a much needed stimulus to business and an appreciable aid to the farmers of the country.

There is, however, much force in the argument that a lowering in the carrying charges of the railways will not necessarily mean a reduction in net revenue earned. On the contrary, it is well within the realms of probability that the result would be an increase in revenue. Present rates are perilously close to the line where they amount to actual prohibition of traffic, and if a reduction of rates has the effect of stimulating business and thereby increasing traffic the earnings of the railways may easily record increases rather than the much feared decreases.

Support for this view is found in a comparative study of the figures of revenue and expenditure of Canadian railways for the years 1920 and 1921. Freight rates were increased in September, 1920, and partly reduced in January, 1921, and in December, 1921. If the arguments of those opposed to rate reductions is good, then the deficits in operation of the railways should have been greater in 1921 than in 1920. Yet the reverse was the case. The deficit on the old Canadian Northern system was nearly $10,000,000 less in 1921 than in the previous year; the deficit on what are known as the Canadian Government Railways, chiefly the Intercolonial, was almost cut in two, being reduced by $5,000,000; the Grand Trunk Pacific, which showed a loss of $10,000,000 in 1920, dropped to just under $4,000,000 for 1921.

These three roads between them showed a deficit in operation for 1921 of something over $16,00,000 where in 1920 the total was over $37,000,000. The operating profit of the old Grand Trunk was increased and so, too, was that of the Canadian Pacific.

Of course, there may have been, and undoubtedly were, other factors contributing to the betterments shown. Nevertheless, the figures would seem to point to the conclusion that rate reductions were not in themselves disastrous, but that, on the contrary, they proved beneficial and were contributing factors in bringing about a marked improvement in railway finances.

Admitting, however, for the sake of argument that substantial rate reductions will result in an increase in the operating deficit of the Canadian National Railways, the question arises whether it would not be better to face that possibility and meet the loss out of general taxation for a year or two if, through such reduction in rates, there was marked encouragement given to agriculture, manufacturing and business generally throughout the Dominion, with a consequent lessening in unemployment and increased buying power by the people and some return of prosperity.

The present deficit on the Canadian National Railways is a heavy one, and constitutes a very real burden for Canadian taxpayers. It is almost more than they can bear, because, through lack of employment and general business depression, they have not the money. No matter how light taxes may be people cannot pay them without money and in the absence of means of earning money. But with a return of business activity and more employment the people would be able to more easily pay even somewhat heavier taxes, if necessary, to meet a slightly larger railway deficit.

The railways are one of the chief agencies in the upbuilding of trade and commerce, and if their rates are maintained at a level so high as to restrict traffic, they are not benefiting either themselves or the people and country they were created to serve, but are, as a matter of fact, killing the goose that lays the golden eggs.

The experiment of enforcing a substantial reduction in freight rates as a means of reviving business throughout Canada, and giving some much needed encouragement to agricultural production, may well be tried at this time.

New Postage Stamp Issue

Will Make Number of Changes in Canadian Stamp Colors

A number of changes in the color of Canadian postage stamps are being made to conform with the new international regulations. A straw colored one-cent stamp is being issued to replace the old green one-cent stamp which has been in use many years; and as the various post offices exhaust their supply of green stamps, they will be replaced with the new issue.

The red two-cent stamp is being replaced with a green stamp, and should a six-cent stamp ever be issued it will take the red color hither to distinguishing the two-cent stamp. The five-cent stamp is of a violet shade, while the 10-cent stamp is blue.

Recalls Days of Nelson

Mary Ann Carr, Born on Nelson's Ship, is Dead at Age of 85

Mary Ann Carr, who was born in the cockpit of Nelson's ship, Victory, near the spot where the famous Admiral fell, has just died at Portsmouth, at the age of 85.

Her memory of the early days aboard the ship was fresh up to within a few days of her death. She once saw a sailor flogged. The picture of the man suffering remained vivid in her mind through her long life. Only once did she see such a sight for on other occasions she was sent ashore to be spared the spectacle.

IT HELPS

Coughs, colds, chronic Indigestion and Constipation are simply due to a catarrhal condition of the mucous membranes. The way to get rid of these troubles is to take something which will rid the system of catarrh

Wire Made by Ancients

Metallic Shreds Discovered Dating Back to 1700 B.C.

The manufacture of metallic filaments, or shreds, known as wire, dates back to the early ages of man. According to excellent authority, evidences of it can be traced to early Egypt. Gold wire is mentioned in connection with the decorations of the Sacerdotal robes of Aaron, while metallic shreds have been discovered that date back to about 1700 B.C. Homer and Pliny in their early writings made references to similar products. Metal heads, having imitation hair made of wire, were recovered from the ruins of Herculaneum.

From the remote times up to fourteenth century, wire was made by hammering out strips of metal, inasmuch as the modern process of drawing had not then been invented. The first advance in the process of wire manufacture was made when the "die" was introduced. This consisted of a flat block of metal, having a hole, slightly tapered, bored through it. The die was securely fastened to one end of a table (or "bench" as it was later called) in such a position that the hole was in a horizontal position and longitudinal to the bench; the smaller end of the tapered hole towards the far end of the table. A round rod slightly larger than the smaller end of the die hole was previously hammered out from a small casting while hot. It was sufficiently tapered at one end so that when inserted in the die, a few inches protruded from the opposite side. When this rod became entirely cold, the tapered end was inserted in the die. The protruding end gripped in a clamp securly fastened to a chain was pulled from the far end of the table. The rod was drawn through the die and by this simple process became wire.

Smaller sizes were obtained by retapering the end of the wire, inserting it through a smaller die and again drawing it. The reduction in diameter elongated the wire. The length of wire obtained in this manner was limited to the length of the table. This difficulty was later overcome by coiling the wire around a power-driven drum, instead of pulling it the length of the bench. This permitted the use of longer rods therefore giving a greater length of wire. The introduction of the rolling mill, taking the place of the laborious hand hammering of rods was a boom to the wire industry.

Overcrowded Britain

An eminent statesman reminded me the other day that in spite of the war the population of Britain has increased by 2,000,000 during the last decade. He asked me whether I thought the country could support them all, and I replied in the negative, suggesting that emigration is the only remedy. The trouble is that our surplus is among townspeople and not the rural workers needed by new countries.—London Sunday Pictorial.

A NERVOUS BREAKDOWN

When the Blood is Out of Order the Nerves Are Starved

The nerve system is the governing system of the whole body, controlling the heart, lungs, digestion and brain; so it is not surprising that nervous disturbances cause acute distress. The first stages of nervous debility are noted by irritability and restlessness, in which the victims seem to be oppressed by their nerves. The matter requires immediate attention, for nothing but suitable treatment will prevent a breakdown. The victim, however, need not despair, for even severe nervous disorders may be relieved by improving the condition of the blood. It is because Dr. Williams' Pink Pills enrich the blood that this medicine has proved beneficial in nervous disorders. The nerves thrive on the better blood made by these pills; the appetite improves, indigestion is better, sleeplessness no longer troubles the nerve-shattered victim, and life generally takes on a cheerful aspect. The value of these pills in cases of this kind is shown by the experience of Mrs. John W. Macdonald, Cardigan, P.E.I., who says:—"I have much cause to be grateful to Dr. Williams' Pink Pills. I was suffering from nervous breakdown, and my condition gave alarm to both my friends and myself. I suffered almost continously from nervous headaches, my appetite was poor, I hardly got any sleep, and in every way I was badly rundown. A friend advised me to try Dr. Williams' Pink Pills, and after I had taken them for a while there was a noticeable improvement in my condition. I continued using the pills until I had taken twelve boxes, when every symptom of the trouble was gone, and I have since enjoyed the best of health."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Agricultural Production

The estimated value of agricultural and livestock products produced in Alberta in 1921 was $137,455,706. Of this sum grains, fodders and vegetables accounted for $82,795,290; animals slaughtered and sold $17,290,416; dairy products, $25,500,000; wool $300,000; game furs, etc., $1,500,000; poultry and poultry products, $8,470,000; and horticultural products and garden stuff, $1,600,000.

Worms are encouraged by morbid conditions of the stomach and bowels, and so subsist. Miller's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Cherries Lead in Bacteria

A scientist has succeeded in calculating the number of bacteria in certain fruits. He found 1,000,000 in half a pound of gooseberries, 8,000,000 in a half a pound of grapes, and 12,000,000 in half a pound of cherries.—Cleveland Plain Dealer.

HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by catarrh. We do not recommend it for any other disease.

HALL'S CATARRH MEDICINE is a liquid, taken internally, and acts through the blood upon the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

F. J. Cheney & Co., Toledo, Ohio.

Sawdust as Cattle Food

A chemical process for converting sawdust of the soft woods into a carbohydrate food for dairy cattle is now being developed at the Forest Products Laboratory at Madison, Wis. Preliminary manufacturing and feeding tests indicate the success of the process. This would mean turning much of this waste product into profit.—From the June Popular Mechanics Magazine.

Proposed Experimental Farm for B.C.

It is reported that the next experimental farm to be established in Canada will be in Northern British Columbia, an immense tract of country of wonderful agricultural richness that is attracting the attention of many United States farmers. Minerals, water power, fish, fur and forests are also among its assets.

Insanity Laid to Microbes

After more than twenty years' work among lunatics an Edinburgh doctor has come to the conclusion that many forms of insanity are caused by the action of microbes.

Canadian National Excursions

Plan Your Summer Trip Via the National Route

The Canadian National Railways announce their summer excursion rates to the Pacific Coast and to Eastern Canada. The Pacific Coast trip through the Canadian Rockies, includes choice of route on land and sea, going or returning. A magnificent 750 mile voyage between Prince Rupert, Vancouver, Victoria and Seattle may be taken. The trip to Eastern Canada includes all rail and lake and rail, with choice of routes. See Toronto, Quaint Quebec, the Thousand Islands, and the magnificent Niagara Falls. Sail down the St. Lawrence.

The Canadian National trains cross the Rockies at the lowest altitude, the easiest gradients, and in view of Canada's highest peaks. Break your journey and stay at Jasper Park Lodge, Lac Beauvert, Jasper, Alta. The lodge is open from June 15th to Sept. 15th. It is modern in every respect, has a dancing pavilion, and commands a wonderful view of all the prominent mountain peaks. On your trip to the East, have your travel plans include a few days at "Minaki Inn," 115 miles east of Winnipeg. Decide now to take a holiday. You owe it to yourself and family. Get suggestions and full information as to fares, reservations, train service, etc., from any Canadian National Agent. Ask for free tourist booklets.

Nervous Breakdown

COULDN'T SLEEP NIGHTS

To those on the verge of a nervous breakdown the following symptoms present themselves; nervous headaches, a feeling of depression, fitful, disturbed, restless and unrefreshing sleep, often troubled with frightful dreams, avoidance of crowded places, dread of being alone, horror of society, etc.

When the nerves become affected in this way the heart generally becomes affected too, and on the first signs of any weakness of the heart or nerves, flagging energy or physical breakdown do not wait until your case becomes hopeless, but get a remedy that will at once quieten the nerves, strengthen the heart and build up the entire system.

This you will find in

MILBURN'S HEART AND NERVE PILLS

Mrs. M. Damgand, Young's Cove Road, N.B., writes:—"I was bothered very much with my heart and nerves; had nervous headaches and dizziness, could not sleep at nights, and my appetite was all gone. I was on a nervous breakdown when a neighbor told me to try Milburn's Heart and Nerve Pills. This I did, and before I had the second box used I was better and would advise anyone who has nerve trouble to take them."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Low Price of Manitoba Farm Land

That land in Manitoba is equal to that of soils in Illinois and Iowa, where the land is sold at $400 an acre, is one of outstanding statements of Prof. Bracken, of the Agricultural College, in his report tabled in the Legislature. In the survey covering the Dominion the average price of Manitoba farm lands was returned at $35.

Requisite on the Farm.—Every farber and stock-raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

The Mysterious Dogs

Method Adopted by Farmer to Protect His Fruit Crop

A phonograph that acts as a policeman has been rigged up by a fruit farmer in the United States in his orchard.

This is the way he worked it. He rigged up an old phonograph inside an unused beehive and had a record made of the fierce barking of dogs. Then he connected the machine by an electric wire with his house, which was within sight of the road. As soon as he sees an automobile stop in the road, he turns on the switch and the raiders are frightened by the barking of dogs, though they cannot see the animals.

However, the motor thieves never wait to find out where the barking is coming from.

Just as there is a potential statue in every block of marble, so is there an ideal self in every man. Be, then, the sculptor of your own character.

Whistling Hare Discovered

Among the natural history curios discovered by the Mount Everest expedition was a whistling hare.

Japan has built a great arch, 60 feet high, overlooking Tokio, to commemorate those who died during the war in the service of the empire.

Ask for Minard's and take no other

Farmer Premiers

Five of the Provincial Premiers Are Farmers by Occupation

When the Premier of Manitoba makes the point that he is a farmer he calls attention to the fact that farmer premiers are quite common in Canada. Leaders of the Ontario and Alberta Governments are farmers both politically and by occupation. The Premiers of Manitoba and British Columbia are Liberals in politics and farmers by occupation. The Premier of Saskatchewan is a farmer in politics and is down in the Parliamentary Guide as a farmer by occupation. This accounts for five of the nine provincial premiers. Three of the others are lawyers, and the fourth a merchant.—Vancouver Province.

Corns Between the Toes, Painlessly Removed

A real, sure, dependable remedy that has been lifting out corns for the past fifty years will surely lift yours out. Putnam's Corn Extractor is the old reliable corn remedy—it stands the test of time and never fails, 25c everywhere.

Honoring the Flag

Not Enough Importance is Attached to Flag Flying in Canada

Most people will endorse the Minister of Finance, Hon. Mr. Fielding, in his defense of the expenditure of a few thousand dollars a year—present estimates provide $5,000—for flags for public buildings, against the criticism of Mr. Duff, Lunenburg, who holds it a waste of money to fly flags from the buildings every day of the year. The increased brightness that is given to the atmosphere in which we live by wind-tossed flags is well worth the cost. It is worth far more than the cost. The trouble is that we haven't enough flags. As a people we Canadians contrive to make our workday life pretty sombre at best. Some people seem to look upon is as a sign of moral perversity, at least of weakness, to have our goings and our coming, our labor and our relaxations attended by cheerfulness and gaiety. They can associate only dull care and dark solemnity with serious purpose. Not enough importance is attached to the amenities of life. When we grow older as a nation we will have more appreciation for them.—The Ottawa Journal.

Japan Buying Lumber

Japanese Government Bans Production of Lumber from Native Forests

According to Mr. J. Sito, of Kobe, who arrived in Victoria with a party of Japanese lumber and pulpwood buyers, said to represent $35,000,000, Japan is to make an unprecedented demand for Vancouver Island lumber this year. The principal reason for this heavy foreign buying is that Japan has banned the production of lumber from native forests. Inquiries for almost every type of lumber have for some time been pouring into the Vancouver Island market.

Passed His Exam

The shoe dealer was hiring a clerk. "Suppose," he said, "a lady customer were to remark while you were trying to fit her. 'Don't you think one of my feet is bigger than the other?' what would you say?"

"I should say: 'On the contrary, madam, one is smaller than the other.'"

"The job is yours."

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Grazing Leases Altered

Information has been received in reference to amendments to the grazing leases from the Timber and Grazing Lands Branch at Ottawa, in respect to an Order-in-Council dated April 12th and applicable to Manitoba, Saskatchewan, Alberta and the Peace River tract. According to the document, "Provision is made for the renewal of grazing leases now in existence, having less than five years to run, for the payment of rental at the rate of two cents per acre per annum. This is compensation for improvements left by a lessee on his leasehold. The four years cancellation is eliminated."

House Flies Are Fast Travellers

House flies have a considerable range of flight. Some that were dusted with finely powdered red chalk and afterwards released were taken within less than twenty-four hours in flytraps six miles away. Observations at Rebecca Shoal off the coast of Florida seem to show that flies came down the wind from Cuba, ninety-five miles away.

The Sueez Canal was opened in 1869.

War Base at Suez Has Been Dismantled

Was One of Greatest Centres During World War

What was once considered the greatest military dump in the world, El Kantara, the British army base on the east side of the Suez Canal, has now almost entirely reverted to the wilderness of sand and silence whence it rose.

Its passing marks the demise of one of the most important "war baby" soldier cities.

In 1914, El Kantara was merely the name of a "place" on the Suez Canal, 45 minutes by train from Port Said. With the beginning of the Palestine campaign, the transformation began. Pioneers, engineers and army service corps detachment mapped out a town.

There were erected enclosures for cattle, horses, mules, donkeys, fodder, for great guns and small limber carts. Later there appeared enclosures for prisoners and the miscellany of canteens, contractors' huts, officers' quarters and barracks that made up a great war centre.

When the armistice was signed, El Kantara's stores included quantities of every appurtenance of war. Its dismantling began in 1920. Contractors rushed in and secured great bargains. Gradually the vast accumulation dwindled, until recently the Disposals Board finished its work and the site was handed over to the Egyptian Labor Corps—a delapidated, empty hulk.

Dye Skirt, Dress Or Faded Draperies In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

A Vegetable Octopus

South American Plant Crushes Life From Human Beings

A plant found in South America—a kind of vegetable octopus—has been known to kill human beings. One specimen was found by a naturalist near Lake Titocaca. This man, attracted by the agonized howling of his dog, found the animal "enveloped in a perfect network of fine, rope-like tissues and fibers," and it was only with greatest difficulty that he cut them away.

Whilst freeing the dog he felt "the fibers curl like sinuous living fingers about his hands," and it required all his strength to free himself from the grip of the plant. Both man and dog were blistered and bloodstained by the attack of this "land octopus."

The "cannibal tree" of Australia, which resembles an enormous pineapple—some nine or ten feet high, with a fringe of huge, strong leaves at the top—has the reputation of being able to crush the life out of a human being—the leaves closing on him like a trap and mangling his body.

The "telegraph plant"—a native of India—has tremendous electrical powers. Each leaf is composed of three leaflets, the largest of which stretches out to the sun during the day but hangs down at night, while the two smaller ones move in circles, round and round, by means of jerking motions.

Severe shocks have been experienced by unsuspecting people, who have investigated too closely the "perpetual motion" of the leaflets, and it is conceivable that—to anyone with a weak heart—such shocks might prove fatal.

Keep Minard's Liniment in the house

Prophesies Radio Talks With Mars

Will Come Within Next Decade Says Marconi Expert

"If there be intelligent life on Mars, Venus or any other of the planets, I believe communication will be established between the earth and the people of these outer worlds through the medium of wireless telephony within the next decade," was the prediction made by a Marconi expert.

"Don't think I am drawing the long bow in making this prophecy, as I feel firmly convinced that, provided there are people in the tenements of the sky with a civilization approaching ours, radio wireless will span the void that stretches between the earth and the planets and carry a spoken message to those with ears to hear.

"The uninitiated may smile at this prediction, but an announcement that the feat has been accomplished would not surprise me in the least."

Growth of Canadian Industry

Illustrating the growth of the manufacturing industry in Canada, J. S. McKinnon, president of the Canadian Manufacturers' Association, stated that Canada's exports of manufactured goods represented in value $47 per head of population, whilst the export of United States manufactured goods represented $50 per head of population.

France Has Largest Sailing Ship

The largest sailing ship afloat is a French five master, La France, a steel bark of 5,633 tons burden, which carries 30 sails and a crew of 54. Her best fair-weather run is 322 knots in a 24-hour day, though she has logged as much as 421 knots in a hurricane. Not many steam freighters could beat those figures.

Mrs. Edmonds Makes Gain Of Fifteen Pounds

"I Honestly Believe Tanlac Saved Her Life," Declares Husband In Remarkable Statement Praising Master Medicine.

"The way Tanlac has restored my wife's health and built her up makes me one of the happiest men in Canada,' said Wm. A. Edmonds, 398 King Edward St., Winnipeg.

"Two years ago her health began failing and she suffered terribly from indigestion, gas on the stomach and heart palpitation. Her head and back pained her continually and she had nervous spells when she would shake like a leaf. Finally her strength left her entirely and she was confined to her bed for one solid year.

"Everything possible was done for her and almost as a last resort, I had her try Tanlac. After taking it awhile she began to improve, and today her health is fully restored. She is not only in splendid health, but she has gained fifteen pounds in weight. I honestly believe Tanlac saved her life, and I am more than grateful."

Tanlac is sold by all good druggists.

Save the Surface

America Spends Almost as Much on Cosmetics as on Education

The American people spend annually $750,000,000 for face powder, cosmetics and perfumeries and $1,000,000,000 for education. It is interesting to note that the amount America spends annually for face powder and its accompaniments is almost as much as she spends for her entire educational system. Looks as if America thought about as much of the outside of her head as of the inside. And as a matter of astonishing fact, the amount actually spent by America for face paint annually exceeds all she pays for the salaries of the teachers in all the high schools who are trying to get something into the heads of pupils in between times while they are applying the paint on the surface.—The Christian Herald.

Praises this Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

Where Britain Leads

Hearst Paper Speaks Kindly of British Statesman

It is not often that one of the Heart papers speaks kindly of Britain or British statesmen. All the more unusual is the opinion of the New York American that Arthur Balfour's is "a rich, full life if one was ever lived; author, statesman, philosopher, sportsman; a personality that charms young and old." The American frankly admits that "what keeps the British Empire in the forefront of the nations is her transcendant leadership." "We shall come into our own," it says, "when our Balfours feel the call of public service more strongly than the lure of private gain. That will be when, as in Britain, our people give to public service its rightful appreciation as the greatest of all forms of achievement."—Brantford Expositor.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes and the callouses, without soreness or irritation.

Chinese Guarded Silk Secret

For centuries after its first discovery China carefully preserved the secret of silk culture, and amassed great wealth by exporting it to India, Persia and Arabia.

Murine for Your Eyes. Night and Morning. Have Clean, Healthy Eyes. If they Tire, Itch, Smart or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Soothes, Refreshes. Safe for Infant or Adult. At all Druggists and Opticians. Write for Free Eye Book. Murine Eye Remedy Co., Chicago

Headache

Recurring headaches usually come from an exhaustion of the nervous system, and they do not disappear until the vigor of the nerve cells is restored by such upbuilding treatment as Dr. Chase's Nerve Food.

Temporary relief by use of powders is often obtained at an enormous expense to the nervous system and the general health.

Get the nerves right and the headaches will not return.

Mrs. W. J. Pearse, Nunn St., Cobourg, Ont., writes:

"My system became run-down and I suffered greatly with pain in my head. This was so severe that I would have to bind a cloth tightly about my head so that I could get my work done. A friend advised the use of Dr. Chase's Nerve Food, and after taking the first box I found quite an improvement in my condition. I continued using them until I had taken about seven boxes, and they strengthened and built up my system splendidly, completely relieving the pain in my head."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

WORLD HAPPENINGS BRIEFLY TOLD

Goods in kind to the value of 80,000,000 gold marks were delivered to the allies by Germany during the first three months of the present year.

Winter wheat production in the United States this year was forecast at 584,793,000 bushels by the Department of Agriculture, which announced the condition of the crop on May 1 as 83.5 per cent. of normal.

James R. Davis, Federal Prohibition Director for Michigan, has asked headquarters at Washington for three motor boats of high speed to aid in curtailing liquor traffic on the Detroit River.

The University of Saskatchewan is experimenting with a scheme for domesticating the buffalo. Buffaloes in the Canadian parks are increasing so rapidly that they will soon be on the market for food.

The United States Government in its negotiations with Mexico over the question of United States recognition has asked guarantees of religious freedom in that country, it is stated on high authority.

Over 50,000 Government employees in France are being dismissed for reasons of economy. The wholesale dismissals will mean a saving of 300,000,000 francs. Most of those dismissed were taken on as auxiliary servants in the war period.

Something of a sensation has been caused by the announcement of Rev. G. Quinlan Warner, of Cronyn Memorial Church (Anglican), that he is calling a meeting soon for the discussion of the possibilities of a faith-healing cult.

Wizo, approximately 100 years old, known as the Queen of the Stony Reserve Indians, died near McLeod Lake, 12 miles north of Whitecourt, according to word reaching Edmonton. Her husband, who died three years ago, was believed to be 104 years old at the time of his death.

RHEUMATISM?

Health is the Most Valuable Asset You Have. You cannot Afford to Neglect It

Crofton, B. C.—"I was troubled for years with inflammatory rheumatism and rheumatic fever. I tried several cures for rheumatism, but did not receive any benefit from any of them. I had been in the hospital for months, being unable to walk. A friend advised me to try Dr. Pierce's Anuric Tablets. After taking the first bottle I began to improve, and after taking six bottles I had no more rheumatism. I think Dr. Pierce's Anuric is the most wonderful medicine that any one can take for rheumatism. I have recommended these tablets to several of my friends and they, too, have all been benefited by them."—Melville Collinson.

People are realizing that the kidneys, just as do the bowels, need to be flushed occasionally. The kidneys are an eliminative organ and are constantly working, separating the poisons from the blood. Uric acid backs up into the system, causing rheumatism, neuralgia, dropsy and many other serious disturbances.

This can be avoided by stimulating the kidneys to increased action, and because of its tonic effect on these organs any one would do well to get Dr. Pierce's Anuric Tablets which are to be had nowadays at almost any drug store or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial package and write for free, confidential medical advice.

SUNDAY SCHOOL LESSON

LESSON FOR MAY 21

HILKIAH'S GREAT DISCOVERY

About a hundred years elapsed between the reformation under Hezekiah and that of Josiah. Some time during this time the book of God's law had been lost. Two wicked kings had reigned in this interval. The Lord had given Hezekiah much wealth. His son Manasseh, coming into possession of his father's property, and being ungodly, would naturally neglect the Bible, if not purposely try to put it from sight. Those who do not obey the law of God are usually interested in putting it out of sight.

I. The Book of the Law Found (vv. 14-17).

1. The Occasion (v. 14). It was while repairing the temple during Josiah's reformation that the law was discovered.

2. The Book Delivered to the King (vv. 15-17). Upon making a report to the king of work done, the king was told of the finding of the book of the law by Hilkiah, and the book delivered to him.

II. The Effect of the Reading of the Law (vv. 18-28).

Shaphan the Scribe read the law before the king.

1. The King Rent His Clothes (v. 19). As the law was read before him he was led to realize more seriously the awful extent of the nation's departure from God. He knew that sin merited punishment. The function of the law is to reveal sin. The man who will honestly hear the demands of God's law will fall upon his knees and cry for mercy. The rending of the royal robes indicated that the king was penitently sorrowful.

2. The King Sent a Deputation to Make Inquiry of the Lord (vv. 20, 21). The king included himself in the guilt before God. "Go inquire for me and for them that are left, for great is the wrath of the Lord that is poured out upon us." His sense of sin was so keen that he sent them to inquire as to whether there was any means of averting the judgments of the Lord. Instinctively the human heart turns from God's threatening judgments to a means of escape. The soul that sorrows for sin inquires for a way of escape. The law prepares for the gospel. The law is our schoolmaster to bring us to Christ. The soul under condemnation inquires, "What must I do to be saved?"

3. The Message of Huldah, the Prophetess (vv. 22-28). (1) Confirmation of what the law said (vv. 22-25). She said that all the curses written in the law must fall, for the sins had been so flagrant that God's wrath could not be restrained. Destruction was hanging over Jerusalem and it was too late to avert it. It was not too late to repent to obtain mercy from God, but the outward consequence of sin must be realized. This finds fulfillment on every hand today. The murderer must hang. His soul may go directly to heaven, provided he has accepted Jesus Christ. (2) Acceptance of Josiah's repentance (vv. 26-28). Because of his tenderness of heart and deep penitence, the Lord said he should be gathered to his grave in peace and should not see all the evil to be brought on Jerusalem and its people. What Huldah said was true even though Josiah died in battle (35: 23-25). When God accepts a man and forgives him, his death is a peaceful one even though it may be on the battlefield. God's presence is with him and he thus will go straight to the heavenly home.

III. The Law Obeyed (vv. 29-33).

1. The King Read the Law (vv. 29, 30). He gathered together the inhabitants of Jerusalem, including the priests, Levites and elders, and read unto them the law.

2. The King Made a Covenant Before the Lord to Keep His Commandments and Testimonies (vv. 31, 32). This was done sincerely—with all his heart and soul. He caused all that were present to stand to it.

3. The king took away all the abominations out of all the countries that pertained to Israel (v. 33). All the days of the king they departed not from following after the Lord.

New Trans-Atlantic Cable

Said to Represent Greatest Progress in Cable Construction

Plans for laying a new cable across the Atlantic to Northern Europe have been completed, Newcomb Carlton, president of the Western Union Telegraph and Cable Company announced recently.

The cable, according to Carlton, will represent the greatest progress in cable construction in history.

It is the invention of engineers connected with the Western Electric and American Telephone Engineers.

Whereas, the old cables under the Atlantic are capable of handling 5,000,000 words a year, the new line, Carlton said, will carry 40,000,000. It will be laid from New York to the Azores and from there to a German port.

Carlton has just returned to the U.S. from England and Germany. He secured a contract with a new German company to co-operate in the new cable management.

The cable will be laid by the summer of 1923, Carlton said.

Camels Live a Century

Camels sometimes live to the age of a hundred years.

Minard's Liniment used by Physicians

A Combination Of Straw And Feathers

A crown of straw, a brim of feathers, in loosely drawn strands, make up this charming little hat, which is sure to enhance the charms of the most beautiful face. It is a decidedly stunning model and one that will find favor in the eyes of most women. The disk of straw which adorns the peak makes it distinctly Russian in mode.

The Chief Danger

"Are you going any further West?"

"I planned to do so," said the foreign visitor. "Is there any danger from Indians?"

"Not if you keep out of the way of their motor cars."—Birmingham Age-Herald.

THOUSANDS CONVERTED

Through ignorance, many have suffered aches and pains long thought incurable. But doubt quickly turns to belief when sciatica, lumbago and neuralgia are healed with Nerviline. It's soothing healing powers are really wonderful. Nerviline sinks in quickly, it penetrates into the sore muscles and brings grateful relief. The hundred and one minor ills that come to every family yield quickly to Nerviline. Try it. 35c at all dealers.

Would Remove Embargo

Former British Agriculture Minister Desires to Lift Stigma from Canadian Cattle

Lord Ernle, former minster of agriculture, writing to the London Times with regard to what passed at the Imperial conference of 1917 concerning the Canadian cattle embargo, says he then accepted the conference resolution that store cattle from Canada should be admitted as soon as possible after the war, but stated at the time that the representatives present could speak only for Great Britain and before reaching a final conclusion would have to consult their Irish colleagues.

"A definite pledge, therefore lies, if anywhere, in the resolution of the Imperial conference," Lord Ernle states.

Continuing Lord Ernle says he believed that a change of policy would be forced upon them by the activities of the German submarines. The necessity of supplying the country entirely from the home sources was contemplated at that time, and while the country could have held out for two years, the cattle supply of the United Kingdom would have been cut to the bone. Of two alternatives in that case, in the rebuilding process, Lord Ernle said the admission of Canadian cattle would have been chosen but immediate action was required and Canada would have been unable to supply the United Kingdom with anything like the number required under two years. However, the danger gradually receded and the country emerged with its cattle supply intact.

Lord Ernle says while the admission of Canadian cattle to that country is not required by conditions of the cattle breeding industry there, he is prepared to favor the removal of the unfair stigma of Canadian cattle being infected by disease by admitting for a definite period of years a limited number of store cattle.

Shackleton Buried March 5.

Captain L. Hussey, of the British Antarctic expedition ship Quest returned to Montevideo from Georgia Island, the gateway to the Antarctic, where he buried the body of Sir Ernest Shackleton. He reports that the burial took place at Grytvicken, March 5, in the graveyard of the little English Church, without ceremonies.

Conscientious Citizen

He who regards his citizenship as a sacred trust must inform himself about public questions, the principles and policies of parties and the qualifications of candidates. He must vote according to conscience in every election. He will obey the law, even when not in sympathy with all its provisions. He will respect the rights of others to hold convictions differing from his own.—Detroit News.

ECZEMA You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c. stamp for postage. 60c. a box; all dealers or Edmanson, Bates & Co., Limited, Toronto.

Ways of Measuring

How Lloyd George Got Even With the Chairman

A correspondent sends us the following little anecdote illustrating Lloyd George's ready wit. On one occasion when he was to address a meeting in South Wales, the chairman, thinking to be funny at the speaker's expense, said in introducing him, "I heard so much about Mr. Lloyd George that I naturally expected to meet a big man in every sense, but, as you can see, he is very small in stature."

Lloyd George arose. "I am grieved to find," he said, "that your chairman is disappointed in my size, but this is the way you have here of measuring a man. In North Wales we measure a man from his chin up, but you evidently measure him from his chin down."

After that the chairman made no more personal remarks.

SATISFIED MOTHERS

No other medicine gives the same satisfaction to mothers as to Baby's Own Tablets. They are equally good for the newborn babe or the growing child and are absolutely guaranteed to be free from opiates or other harmful drugs. They are a mild but thorough laxative and cannot possibly do harm—they always do good. Concerning them Mrs. Jos. Ache, Coteau Road, N.B., writes:—"I think that Baby's Own Tablets are a marvellous medicine for little ones. I gave them to my little girl with such good results that I now strongly recommend them to all mothers." The Tablets are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wishes Lloyd George Success

Failure Means War for Europe Says Gen. Smuts

Lieut.-Gen. Jan C. Smuts, Premier of the Union of South Africa, in a statement to the Cape Times on the subject of the Genoa conference said he prayed for victory for Lloyd George, for if all that resulted from the conference was the Russo-German treaty and the division of Europe into two armed camps, Europe would irrevocably split and Genoa would become a new and fatal milestone in European policy.

General Smuts said that if the faith of France and Russia in militarism prevails against the desire of Britain, former neutrals and many late enemies for disarmament, then the policy for disarmament, which Britain is adopting on land and sea, would yet prove a fatal blunder and it were far better for Britain to face realities at once and arm in her turn.

Unless Lloyd George could succeed in modifying the militarist policy of Poincare and Chitcharin, disarmament must disappear throughout Europe. Armaggedon would become the only goal of western civilization.

Wolves Infest Eastern Europe

Packs Increased During the War and Now Become a Menace

The growing danger from wolves in Europe is one of the strange results of the war. Wolves have always been more or less trouble in Eastern Europe, but the people have managed to keep the packs reduced. However, during the war, when men were fighting each other instead of wolves, the animals began to increase.

Now reports tell of the boldness of the wolves and the large packs they are travelling in. They have attacked many villages, in numbers as large as 50. In one place in Jugo-Slavia they even attacked a train.

Sea Invades British Coast

In the past forty years more than 3,000 acres of the English coast have slipped into the sea.

Elephant Matures at 40

The elephant does not reach full maturity until it is forty years old.

A Double Escape

DOCTOR'S DAUGHTER'S STORY.

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison. Doesn't it show there's a vital need for keeping a reliable antiseptic like zam-buk, always handy?

When called upon at 3, Bushness Avenue, Mrs. J. E. Zealley, daughter of the late Dr. Bevan, of St. David's, S. Wales, said:—"My boy Alfred scatched his leg with the brass tag of a shoe lace. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about zam-buk I decided to give it a trial. To my great relief, the balm soon caused healing to set in. All inflammation and poisonous matter was quickly removed by zam-buk. It healed the sore without leaving a scar.

"Again when I fell over a steel fender and injured my knee badly, zam-buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to zam-buk, and it cleansed and healed the wound in a few days." Equally valuable for eczema, pimples, cuts, burns, etc.

Canadian Authors' Association

Montreal Branch Now Numbers 129 Members

The annual meeting of the Montreal branch of the Canadian Authors' Association indicates progression in both membership and influence. Among those entertained by the branch during the past year were Mr. Bliss Carman, Mrs. Nellie McClung and H. M. Meredith, son of the famous novelist, of the publishing house of Archibald Constable, London, Eng. Miss J. E. Sime, whose recent novel, "Our Little Life" has been so favorably reviewed, was elected chairman for the present year. The branch, which now numbers 129 members, will hold monthly informal meetings during the coming year.

A CORDIAL INVITATION TO DISEASE

This is an apt description of Constipation. It's an unnatural condition to begin with—but it's dangerous because it leads to indigestion, fills the system with poisons, brings on anæmia. You don't need a purgative, you don't want to weaken the system by a harsh gripping medicine—what you need is mild natural stimulant to the bowels. You get just what you need in Dr. Hamilton's Pills which tones up the liver, restore the bowels to perfect action and positively end constipation. You'll feel tip top after regulating your system with Dr. Hamilton's Pills. Good for young and old—a real family medicine. 25c all dealers or The Catarrhozone Co., Montreal.

Prince Sends More Stock

Horse Valued at $55,000 Sent to Royal Ranch in Alberta

Four pure-bred race horse stallions and five mares have recently been shipped by the Prince of Wales from England to his ranch at Beddenfield, Alta., which he bought when he visited Canada in the summer of 1919. One of these stallions was purchased in England recently for 55,000. Since His Royal Highness has had his Alberta ranch he has made several shipments of pure-bred stock from the Old Country. The last consignment of horses was sent over in charge of a special staff from one of his English farms.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

In England, there are, according to the latest statistics, among others, 312 women physicians, 380 women journalists, 219 women pallbearers, 622 female cab drivers, 74 women chimney sweeps, 438 female smiths, 493 female drummers and 3,669 professional painters.

Nine-tenths of the tea imported to the United Kingdom comes from India and Ceylon.

MOTHER SAVES DAUGHTER'S HEALTH

Lydia E. Pinkham's Vegetable Compound Helped Both Mother and Daughter

Lumsden, Saskatchewan.—"My mother had taken Lydia E. Pinkham's Vegetable Compound and when I needed something for my periods I took it and got good results. I recommend it to women with any female troubles and I know other women who have been helped by it and do the same."—Mrs. Max Retzer, Lumsden, Saskatchewan.

Many cases like this come to our notice. Lydia E. Pinkham's Vegetable Compound is often recommended by the mother and the grandmother too, for bear in mind, it has been helping women for nearly fifty years.

Women Tell Each Other

In your own neighborhood are women who know the value of this wonderful medicine and they talk to one another about it. So if you are troubled with pains and irregularities, a tired feeling, nervous and sleepless spells, or have other annoying symptoms caused by some female trouble, you have only to ask some neighbor what she thinks of your taking Lydia E. Pinkham's Vegetable Compound.

German Money Makers

Presses and Engravers Inadequate to Meet Demand

A terrible tragedy has transpired in the German Government's bureau of engraving and printing. Plates cannot be engraved fast enough and presses run fast enough to turn out thousand mark paper notes. Germany's paper note printing presses have reached their physical limit and the demand for paper money still greatly exceeds the supply.

Solving the dilemma, the German Government for the first time in the history of the mark has decided to print and issue 5,000-mark notes, which are much easier manufactured than the impressive 1,000-mark bills. The new 5,000-mark notes will appear on the market in the course of the summer. Germany's largest monetary unit, the one thousand mark note, is worth at today's rate of exchange $3.50, and the smallest paper note, that of 1 mark, is worth 3½ mills.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Alberta as a Seed Producer

Where Oats and Other Cereals Reach State of Perfection

Alberta, it is officially stated, has supplied the rest of Canada with a half million bushels of seed oats this spring. It is equally significant that orders came from every other province in the Dominion. As a seed-producer this province is only getting started, but it is getting started right, and is already securing results. Alberta oats stand in a class by themselves; no other part of the continent can produce either the quality or the quantity per acre. What is true of oats is true of other grains, and of grasses and vegetables. We may not grow here as wide a variety of crops as is possible in more southerly latitudes and lower altitudes, but what can be grown is grown to perfection. More and more the older provinces and the states will recognize that they must come to Alberta for hardy and virile seed. Much credit for what has been attained, and for the greater achievement in prospect, is due to the persistent and successful efforts which have been made by the faculty of agriculture at the University to interest Alberta farmers in seed-growing and to direct their operations in a way to build up a high reputation for their product. And the showing made last year and the year before, when Alberta exhibits carried away a good many of the coveted awards at the international hay and grain show at Chicago, has not been barren of practical results. It pays to produce the best; and then to let the world know that we have it.—Edmonton Bulletin.

Are Britons Decadent

Idea Dispelled by Statistics of University Boat Crew

In the annual university boat race between Oxford and Cambridge which came off a month or so ago, the eight oarsmen in the Cambridge boat averaged six feet one and three-quarter inches in height and one hundred and seventy-eight and a half pounds in weight as they stepped into the shell—which, out of training and in street attire, would mean an average of close on 200 pounds, says the Ottawa Journal. Only one man in the crew was under six feet; two of them were respectively six feet five and six feet four and a half in height. The Oxford eight averaged six feel half an inch in height and 172 pounds rowing weight. The gigantic Cambridge crew were as good in the boat as they were big; they won in very fast time—almost the fastest of the records of the university boat race, which go back now nearly a hundred years.

It was the fashion before the war to talk of the physical decadence of Englishmen, the text being afforded by the underfed and undersized inhabitants of the slums of the great industrial centres. But the war saw six millions of vigorous men in the British army and navy, and several millions of effective men in the coal mines, engineering works, shipyards and other home work in the British Isles, and the idea that any large proportion of the adult male population of Britain was effete was dispelled. And judging by the statistics of the latest university boat race, showing two exceptionally powerful crews physically, one of them probably the finest which ever competed, the well-to-do class in England are still at the height of stamina.

Cynosure Means Tail of a Dog

We are accustomed to hear a conspicuous object or individual referred to as the "cynosure" of all eyes, without perhaps realizing that the word is derived from a Greek expression meaning, "The tail of a dog." The constellation now familiar as Ursa Minor was called "Cynosure" by the Greeks to whom the shape suggested a dog with the pole-star as its tail. Milton, in the lines in l'Allegro which run "Where perhaps some beauty lies The cynosure of neighboring eyes," has given the word its modern significance.

New Egyptian Flag

It is announced that the new Egyptian flag will be green with three white stars and a white crescent. The royal flag will have in addition a crown.

Minard's Liniment Lumberman's Friend

Stops Bronchitis Quickly, Helps Irritable Throat, Ends Sneezing, Coughing

Relief comes at once when you breathe in the soothing vapor of Catarrhozone. Once its healing, piney essences strike the bronchial tubes, you realize that a powerful treatment is at work. Irritation can't live in the throat of a person inhaling Catarrhozone. It is so soothing, so warming, so full of concentrated healing power that you get results at once. Catarrhozone strengthens the weak throat, stops the cough, removes that hacking irritating necessity to clear the throat, makes even the chronic sufferer realize that at last he has discovered a real friend. For coughs, colds, catarrh and winter ills, nothing in the family could be better than the complete dollar outfit. Small size 50c, trial size 25c, all dealers or the Catarrhozone Co., Montreal.

Unbreakable Glass

Bohemian Inventor has Apparently Met With Success

According to recent reports a Bohemian inventor, after 13 years of research, has succeeded in producing unbreakable glass. At a recent demonstration, it is said, plates and vessels of the material remained whole when thrown to the ground from a height of 12 ft. Meat was roasted on a thin glass plate over an open fire at a temperature of 750 deg. F. Tin was melted in a glass pot, and nails were driven in a piece of hardwood, using a piece of glass for a hammer.—From the June Popular Mechanics Magazine.

There are seven joints in a giraffe's neck, the same number as in the neck of a man.

YES, we suppose that it might be correct to call a maker of suspenders a hold-up man.

PERHAPS one reason a man has more pockets than a woman is because his collar is too tight to permit him to throw things down his shirt-front.

MORE cheering news for the young men who are "contemplating." Illinois Retail Jewellers association predicts a rise in diamond prices.

NEWSPAPER editors have to contend with two classes—those who want to know why it was published and those who want to know why it wasn't.

NOTHING is wholly bad. There is something good even in bootleg whiskey. The chap who drinks it is usually dead before he gets to the quarrelsome stage.

A species of frog capable of rendering seventeen musical notes, has been found in Louisana. Chance for leaders of jazz orchestras to spring something new.

AN expert declares a man can marry on $100 a month if he gets the right kind of a wife. But by the time he's found out that he hasn't the right kind it's usually a bit late to change.

No, Mabel, names don't always fit. For instance Blanche Love, of Akron, is suing for a divorce, and Geo. Honey wants a divorce from his wife, Ivah B. Honey. Though part of Ivah's name seems to fit. Evidently George thinks he was stung.

HEALTH expert says onions will cure and prevent toothache and neuralgia. You'll never be troubled with them, he says, if you eat an onion every day. And there are other things you will not be troubled with. Other people's society for one.

The Accidental Honeymoon

Robert Warwick, the brilliant young star who interrupted his career to serve Uncle Sam on the fighting front in France, will be the screen personality which will prove a box-office factor at the Greenwood Theatre on Saturday, May 20, when "The Accidental Honeymoon," the last picture in which he appeared before leaving for France, will be shown.

Robert Warwick has long been regarded as one of the big stars of the picture world. His talent and acting versatility have won him a remarkable screen following, and now his patriotism is giving his admirers still further reasons for worshipping at his shrine.

The Ledge has always room or one more ad.

Baseball Teams Practices

The Midway and Greenwood baseball teams are practising hard for the match to be played at Ingram Bridge on May 24th. A large number of players for each of the teams turn out and their respective managers are well pleased. The Midway boys are shaping up well and Manager Borders is counting on a team that will go through and bring home a championship.

The Greenwood boys are under the watchful eye of Manager Geo. Gray. He has a good bunch of boys fighting for a position on the team and it is going to keep him moving to pick the right man for the right place. Brosser, who pitched for Grand Forks last year will twirl the ball this year for Midway while Lockhart will help a lot in the twirling end of the game for Greenwood.

There is every reason to suppose that there will be some good baseball played in the Boundary this season. Any sport that is played fair and clean has the support of the people and the baseball teams will get this support.

Two women were seated in a tram car discussing their favorite operas, and as the conductor advanced to take their fares, one of them, handing him her fare, remarked, "I simply adore Carmen!"

Blushing to the roots of his hair, the embarrassed conductor replied: "Try the driver, miss; he's a single man!"

Your Town

If you want to have the kind of home town
Like the kind of a town you like
You needn't slip your clothes in a grip
And start on a long, long hike;
You'll only find what you left behind
For there's nothing that's really new;
It's a knock at yourself when you knock your town,
It isn't your town—it's you.

You wouldn't expect if you mined your soil,
Bumper crops that you use to get;
Nor aught but runts from feeding that stunts;
Nor payment without a debt
One gets returns from what he earns
Something must first be due,
If your town doesn't pay, look at it this way:
It isn't the town—it's you.

Real towns are not made by men afraid
That others will get ahead,
When everyone works and nobody shirks
You can raise a town from the dead
And if while you make your personal stake,
Your neighbors can make one too,
Your town will be what you want it to be
It isn't the town—it's you.

ANONYMOUS.

Float

FLOAT is not a periodical. It is a book containing 86 illustrations all told, and is filled with sketches and stories of western life. It tells how a gambler cashed in after the flush days of Sandon; how it rained in New Denver long after Noah was dead; how a parson took a drink at Bear Lake in early days; how justice was dealt in Kaslo in 93; how the saloon man outprayed the women in Kalamazoo, and graphically depicts the roamings of a western editor among the tender-feet in the cent belt. It contains the early history of Nelson and a romance of the Silver King mine. In it are printed three western poems, and dozens of articles too numerous to mention. Send for one before it is too late. The price is 50 cents, postpaid to any part of the world. Address all letters to

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and must make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvement to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptors holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time in which the heirs or devisees of a deceased pre-emptor may apply for title under this act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31st, 1920.

SUB-PURCHASERS OF CROWN LAND

Provision made for insurance of Crown Grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfilment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers up to ten head.

BRITISH COLUMBIA
The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $76,177,403; Lode Gold, $105,557,977; Silver, $55,259,485; Lead $48,330,575; Copper, $166,393,488; Zinc, $21,884,531; Coal and Coke, $225,409,505; Building Stone, Brick, Cement, $34,072,016; Miscellaneous Minerals, $1,210,639; making its Mineral Production to the end of 1921 show

An Aggregate Value of $734,259,619

Production for the Year Ending December, 1921, $28,066,641

The Mining Laws of this Province are more liberal, and the fees lower, than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES
VICTORIA, British Columbia.
