Around Home

Foster predicts a nice October.

Cash paid for hides at Brown's Midway.

Eddie Morrison is attending Normal school in Victoria.

Mrs. W. Spooner, of Trail, was visiting friends in town last week.

Robt. Murray, of Kimberley, is visiting his mother Mrs. H. Murray.

Mrs. E. Mellrud returned on Tuesday morning from a trip to Spokane.

It is to be hoped that Turkey will be cooked and ready for Thanksgiving.

Ed. Rippeto is in charge of the culinary department at Steeve's ranch, Main river.

Mrs. S. Storer and daughter, Stella, spent the week-end in town the guests of Mr. and Mrs. J. H. Goodeve.

R. A. Roylance, who is employed on the Cascade-Rossland road, is spending a few days at his home in Anaconda.

The annual G. W. V. A. Masquerade dance will be held on Friday, Nov. 10th. Start and get your costume ready.

The possibility of war looms again on the horizon. It is sincerely hoped that the impending calamity will be averted.

Many are getting their exhibits ready for the Fall Fair at Rock Creek. Only about a week left —Friday, Oct. 6th. Dinna forget.

Many friends were pleased to see J. B. Desrosier in town this week and were congratulating him on his acquital in the recent liquor case.

C. E. Bartholemew, of Springdale, Wash., and three other gentlemen were in town this week looking over the Combination group.

Creighton McCutcheon, who spent the summer at Whittacker's survey camp, Cascade road, is visiting his parents, Mr. and Mrs. H. McCutcheon.

D. Cavaye, of the Bank of Commerce at Trail returned to that city on Monday after spending nearly three weeks vacation the guest of friends in this city.

John Mulligan, of Penticton, who has been doing some assessment on his mining properties at Phoenix during the past few weeks returned home on Tuesday.

The fine weather of the last few days has greatly speeded up fall work on the farms, and the end of the week will almost see the end of this work for the season.

Squirrels and chipmonks are numerous this year and doing great havoc in the orchards. Old timers state that this is a sure sign of trouble among nations and a hard winter.

Mr. and Mrs. Goodall, of Chatham, Ont., are visiting Mr. and Mrs. S. Fretz and Mr. and Mrs. S. W. Auger, of Eholt, while passing through on their way to California.

Mr. and Mrs. Jas. Muir and daughter, Dorothy, returned Monday evening from a week's holiday, motoring in the Okanagan, visiting at Penticton, Summerland and Vernon.

Mr. and Mrs. J. Hartman, formerly of the Queens Hotel at Phoenix and now of South Dakota were the guests of Miss Cassie McDonald on Thursday last. They are motoring to California.

Mr. and Mrs. Jas. Kerr, Mrs. J. Drum, H. R. Bidder, J. H. Goodeve, D. J. McDonald and Owen Wheeler are among the delegates from this district attending the Liberal convention in Nelson this week.

Annie Thorslund Dead

The sad death of Annie Sophia Thorslund, only daughter of Mr. and Mrs. John Thorslund of Greenwood, occurred at the Grand Forks hospital at 8.30 on Wednesday evening, Sept. 27th, following an operation for appendicitis, aged 13 years. Annie was sick only about a week and her untimely end has cast a shadow of sorrow over the entire community. Little Annie had a sweet disposition, quiet and unassuming. She was a member of the Presbyterian Sunday School and an industrious and promising student at the Greenwood Public School.

She was born at Mother Lode on July 13th, 1909 and lived in Phoenix, later moving to 49 Creek near Nelson and during the past three years lived in Greenwood. The heartbroken parents have the sympathy of the entire community in the loss of their only daughter. The funeral services will be held in the Presbyterian Church at 2 p.m on Saturday Sept. 30th.

Boy Scouts

Troup meets on Friday at 7 p.m.

CUBS

The Cubs will meet this week at the usual place on Saturday at 2.30 p.m.

James Mack has returned from a trip to Coalmont and the coast.

The bird shooting season opened on Saturday. Early in the morning shooting commenced and the guns continued firing until dusk. The hunters had varying success. Some got half a dozen, some only one, some got all they wanted, and some got none at all. The first day's shooting is no indication of what the season will be.

Geo. Bailey, representing the Day Co., a large American mining and smelting concern, of Republic, and J. McKay also of Republic, inspected the Republic group this week. A. J. Morrison showed them over he property and they are well pleased with the prospects. While here they also looked over the McKenzie fraction north of town.

Sometimes local news items is rather scarce, although material may exist for many interesting paragraphs, if only we knew the circumstances. Our readers could often help us out in this respect if they would only take the trouble to jot down a few notes of the occurrence or accident of which they know the particulars and send them in. We want all the real news of the district without the gossip, and will appreciate all the assistance our friends can give us in accomplishing that end.—Thank you!

A family of musical boys and girls have something which an unmusical family can never know. For this reason we would have every boy and girl study music. If the boys and girls never make any use of it when they leave home, the pleasure they get out of it while under the parential roof, and the pleasure the parents get out of it while the children are stepping from youth and maidenhood into maturity, the study of music is worth while. That happy time will be the brightest spot in their memories until the coming of old age.

The executive committee of the Greenwood Board of Trade met on Monday evening to take up the question of the discontinuance of the G. N. Ry. mail service, via Greenwood and Midway, by the postal authorities. The inconvenience caused by this and the delay in transmission of mail to Spokane and other points will materially affect this district and a resolution strongly protesting against the discontinuance was unanimously passed and ordered to be presented to the post office inspector in Vancouver and to the superintendent of railway mail service.

Midway News

Mrs. E. Hawkes and children returned from Kamloops last Wednesday the 20th.

Mr. and Mrs. S. Ades, of Nelson, are visiting Mrs. Chas. Moll. They expect to reside here.

Mrs. A. C. Mesker arrived from Spokane on Monday the 25th. She has been visiting with her daughter Mrs. H. C. Griffin.

The opening of the grouse season on Saturday last was well patronized by the residents. Ideal weather and birds plentiful inveigle the attention of the "scatter gun" enthusiasts.

Mr. and Mrs. J. Richter accompanied by their daughters the Misses Maude, Jean and Joan, have left for Kelowna to attend the Stampede, after which they will visit E. Hawkes at Tranquille Sanatarium.

The person accused of writing a certain article article under "Midway Notes" is entirely innocent. The Ledge is responsible for all news items and is willing to bear the blame, if any. The article referred to was exceedingly cleverly written and has been the means of much comment pro and con.

Conviction is Quashed

Five appeals against police court convictions connected with charges under the Liquor Control Act, were heard by His Honor Judge Brown in the County Court at Penticton last week.

The appeal entered by J. B. Desrosier, of Osoyoos, was against a conviction and sentence of six months imposed by Magistrate Pope on charges of selling liquor.

The case of Desrosier was unusual inasmuch as he pleaded guilty before Magistrate Pope. In court it was explained by his lawyer, R. L. Maitland, who was assisted by F. Aubrey, both of Vancouver, that Desrosier, being a foreigner, did not understand the plea when it was put in. During the proceedings, however, it transpired he had been in this country 36 years and his honor said he had heard him speak on a public platform sixty minutes when running for municipal honors in Greenwood.

Desrosier admitted selling beer to Liquor Board officials, but claimed to have given Constable Denny a drink of whiskey in the house, expecting and receiving no payment for it. His statement in this respect was sustained by Joseph Goldsmith, cook at one of the construction camps down the valley, an entirely independent witness.

In announcing his decision his honor said but for the evidence of Goldsmith he feared he would have had to convict Desrosier, who had degenerated since he left Greenwood, but in face of the evidence of Goldsmith a conviction was out of the question.

"Wedding Bells"

To see "Wedding Bells," Constance Talmadge's latest, release through Associated First National Pictures, Inc., and which will be shown at the Greenwood Theatre on Saturday Sept. 30, is like a little summer trip to New York and Palm Beach, with almost as many laughs as one could gather on such a trip.

All of Palm Beach's scenic splendors which necessarily must lend towards romance are brought out in a manner to please the summer vacationist who need must stay at home.

Kettle Valley Notes

Miss Victoria Shillcock left last Saturday for a trip to Spokane.

BORN—To Mr. and Mrs. G. P. Harper, a daughter on Saturday, Sept. 23rd.

Miss Hookham left on Saturday's train for her home in Stratford on Avon, England.

Mrs. M. H. Glossop and two children arrived on Friday from Edinburgh, Scotland.

Mrs. R. E. Norris and Miss Gane left on Wednesday's train for Grand Forks to attend the Fair.

Mrs. M. Halket, who purchased the property formerly owned by Capt. H. W. King, left on Friday for Kamloops.

A cricket match was played on the hockey grounds on Wednesday at 11 a. m., between Kettle Valley and Grand Forks.

Mrs. Ed. Richter, of Rock Creek was unable to attend the Liberal convention in Nelson owing to a slight accident.

The Dance given in Riverside Hall last Friday night was a most enjoyable affair. The floor was never in better shape and the Kettle Valley orchestra was in fine trim. This was later in the evening supplemented by Mrs. Clarke, of Carmi. The supper was fine and the crowd jolly. The proceeds were in aid of the K. V. School.

Christian Valley

Guner Lindgren was down to Westbridge this week.

There are three men working on the road at Canyon creek. The bridge broke through in two places.

Mr. Tanner and son and W. S. Abel and son, of Rock Creek, are up building houses and clearing land on their pre-emptions.

There are no hunters in the valley yet. A few years ago it would have been full of Indians at this time, killing deer, smoking and drying the meat for winter. Very good work has been done in stopping so many from coming, as they shot everything in sight making it hard for the settlers to get any. As they cut up and dried the meat as it was killed, it was hard to say how many they got, but piles of deer hair found later in the fall by the settlers told its own story.

Many Gopers Destroyed

During this last spring and summer the Rock Creek Farmers' Institute encouraged the destruction of gophers by offering a bounty of 1 cent a tail in addition to the Government bounty to all members of the Institute and their children or dependents who would bring the tails in to a member of a Committee which they appointed to encourage and supervise the destruction of gophers.

Twenty-two hunters responded to the call and brought in a total of 6136 tails, pulling down $173.03 from the Government and $65.26 from the Farmers' Institute funds.

The champion destroyers were Mrs. Grace Henderson with 1317 and Charles Campbell with 1023 to their respective credits. Other creditable "bags" were 830, 498, and 474 and so down the scale to the small contributions of 28, 29, 30 and 32 which were received from small boys who certainly could have done better had they tried.

Fall Rye For Seed

In the shack, in the farm house, and in the city house, RED ROSE TEA is the standby.

RED ROSE TEA "is good tea" 18

Help The New Immigrant

In announcing Canada's new immigration and land settlement policy, Hon. Charles Stewart, Minister of Immigration and Colonization, made it plain that the cardinal features of that policy would be (1) careful selection of immigrants in country of origin, and (2) wise direction after settling in Canada.

The importance of these two things can hardly be over-estimated. In the past Canada has lost tens of thousands of immigrants who, after coming to this country, have drifted away to the United States or returned to the land from which they came. The reason is not far to seek. Many in the first place were not of a type or class at all likely to succeed in this country. Others, and probably a much larger number, became discouraged because, through lack of knowledge and "wise direction" they made fatal mistakes, resulting in loss and ultimate failure.

Careful selection of immigrants in the country of origin will operate to prevent men and women wholly unfitted by previous environment and training from succeeding in a new coutry like Canada from ever embarking on such a venture. For example, it is but inviting failure to send a man to Canada who all his life has followed, say the occupation of silk weaving. He knows silk weaving thoroughly, but is qualified to succeed at that and nothing else. To send such a man and his family to making a livelihood in Canada at farming, or lumbering, or mining, is to invite trouble all round. He has neither the training, the physique, or the adaptibility required to succeed.

What Canada needs and must have are the average sturdy men and women and boys in their teens who have the physique to stand hard work and can adapt themselves to manual labor. People who can work, and are willing and desirous of working on the land itself, are the type having the best possible chance of making a success in Canada.

But even more important than careful selection is the provision of wise direction after they have arrived in Canada. Many men and women having the qualities necessary to success have failed because of wrong direction, or no direction at all. They have become round pegs in square holes. Some have unfortunately located on land which was not suitable for agricultural operations. Failing where success was practically impossible they have left the country, whereas had wise direction been provided they would have been advised and assisted to locate elsewhere in Canada where success would have attended their efforts.

Therefore, the plan now proposed of keeping close check on every incoming immigrant and assisting him to get properly placed, and with advice and practical help when needed tide him over periods of discouragement and seeming, though only temporary, failure, appears to offer the best possible chance of peopling our vacant lands with men and women who will win out and make a real success in Canada.

Such a plan to succeed must have the cordial support of individuals all over the country, and the plan formulated of creating local community clubs to care for and assist incoming settlers, thus building up a great national welfare organization, is good.

Coupled with this is the other, and sensible plan, of placing these new settlers on lands fairly close to existing lines of railway but which are now held by speculators and absentee owners. These lands, it is proposed, to have listed and sold upon long terms of payment, involving only a small annual payment of principal and interest upon the amortization plan. Settlers so placed will have a much better chance to succeed than those placed scores of miles from any available means of transportation, or located in "colonies" off by themselves.

People now resident in the districts where these new settlers are to be placed should be ready to hlep them, because by their presence local taxation will be reduced and modern services and utilities now denied to them because of prohibitive cost will be made accessible. Placing these people within access of existing railways will operate to wipe out the present staggering debt on our National Railways, and in many ways this proposed more intensive settlement will make for success all round where the old policy of scattering people far apart over immense areas resulted so frequently in discouragement and failure.

German Aristocrats Taking Up Farming

Titled Ladies Are Making a Success Of Agriculture

The "Vons" are going back to the soil in Germany. Aristocracy and agriculture are finding a common meeting ground, which never would have been possible under the regime of the Hohenzollerns. It is nothing out of the ordinary to see a baroness feeding goats or a countess milking a cow. A hay wagon loaded with young women in farm attire is quite likely to have for its passengers a choice culling from the once privileged classes in Germany.

The English language, in a modified form, will ultimately become the universal tongue, according to one French professor.

The weight of the Great Pyramid of Egypt has been estimated at 6,000,000 tons.

On the Iceberg's Track

New Device of French Inventor for Detecting Presence of Bergs

Of all the perils dreaded by those who sail across the Atlantic, icebergs are by far the most formidable.

A new device has been brought out by a French inventor which detects icebergs when they are six miles away.

Melting ice sends out rays which are invisible to the eye, but will affect a delicate instrument called the thermo-couple.

This apparatus can be made so finely that it will register the presence of a lighted candle at a distance of half a mile.

The thermo-couple is connected to a telephone receiver on the bridge of the ship. When conditions are normal it emits a continuous note of unchanging pitch. As soon as an iceberg is approached, however, the note changes, and the look-out man knows at once that there is danger.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

BAYER M.D.

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds, Headache, Rheumatism, Toothache, Neuralgia, Neuritis, Earache, Lumbago, Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Indians Make Good Progress

Inspection Shows Good Farms With Heavy Crops, and Contented People

During his visit to British Columbia the Honorable Charles Stewart, Superintendent General of Indian Affairs, met an important deputation of Indians at Vancouver on July 24 to discuss with them their claims to aboriginal title in the lands of British Columbia. This has been a vexed question with the Indians since British Columbia entered Confederation. Much good work was accomplished in the morning and afternoon sessions of this conference. Mr. Stewart stated to the Indians that it was his intention to arrive at an amicable understanding without the necessity of going to the courts, and putting the Government and the Indians to unnecessary expense.

The Indians contended that the Indian title to the lands had never been ceded, and that they should be compensated for them on reasonable terms by the Dominion. Arrangements were made for a further conference at which negotiations will be carried on, which will no doubt bring about an amicable settlement in terms that will be accetpable to all concerned.

Mr. Stewart also visited the Kamloops Indian reserve and the large Indian industrial school located there, and observed the necessity for new buildings. He inspected the splendid farm which is being conducted by the staff of the school, and also viewed the lands which it is proposed to bring under irrigation at an early date.

In Southern Alberta, the Blood Indian reserve south of Macleod was visited, and an important meeting was held on the 1st of August, at which there was a large gathering of chiefs and Indians. The Minister explained what his policy would be with reference to the reserve, and assured the Indians that their interests would be in every way protected. The Minister inspected the boarding schools on the reserve and a hospital which is conducted by a staff of nurses belonging to the Grey Nuns order. Everywhere the Minister noticed evidence of progress on this reserve, the crops being particularly good, with an abundance of hay.

Mr. Stewart also visited the File Hills and other reserves along the Qu'Appelle valley. He was especially impressed by the wonderful success made by the Indians in the colony who are carrying on farm activities independently. In all cases he found that these Indians were working their land according to the most approved scientific methods, and the results are shown by the splendid crops which these Indian farmers have this year. The Minister specially noted that Indians who had the advantage of being trained in Indian schools were in all cases carrying on their farming operations much more successfully than those who did not have the advantage of school training.

The Minister found the Indians contented and happy, and everywhere he went the Indians were found to be very busy with their harvesting operations.

R.C.M.P. Changes

Intimated that Headquarters May be Transferred from Ottawa to the West

That there will shortly be a radical change in the organization and jurisdiction of the Royal Canadian Mounted Police was intimated by Premier King, in the course of his speech at a banquet in his honor at Toronto. The Premier instanced as one of the striking evidences of the centralizing tendencies" of the recent Unionist Government, the change made in the Northwest Mounted Police whose headquarters were transferred from the Northwest to Ottawa, and its character changed from that of a "police for unorganized territories" to a "federal and practically military force." Already, said the Premier, the Liberal Government had discharged a large body of the new force, and he hoped that the time would soon arrive when the headquarters of the force would no longer be in Ottawa.

Nitrogen Preserves Tires

That tires filled with nitrogen will maintain their hardness for more than a year on cars driven thousands of miles over country roads was demonstrated in recent tests conducted in Germany. Loss of the nitrogen proved to be surprisingly small, and the rubber was preserved in better condition than that in air filled tires. Tires filled with pure oxygen deteriorated very rapidly in the tests, indicating that oxidation is largely responsible for the destruction of automobile tires.

Edmonton Band to Tour States

The Edmonton Great War Veterans' Association military band will leave early in November for a six months' tour of the United States.

As the itinerary includes concerts before President Harding at Washington, it is looked upon as being a tour of almost international significance, possessing, as it does, the endorsation of Canada's two leading men, His Excellency the Governor-General and the Prime Minister.

Recipe for Longevity

"Go to sleep as much as you can in the night time and keep yourself awake all day."—this is the recipe for longevity given by Sir Arthur Chennell, one of England's venerable retired high court judges.

New Building Material

Europe Using Discarded Shell Boxes Filled With Cement

Europe is trying something new and unique in building materials in connection with the great reconstruction movement in the battlefield districts. It is converting the boxes in which shells were transported to the front into building blocks. The boxes are filled with cement allowed to dry and then assembled like hollow tiles. They are said to form walls of great strength. In the present shortage of brick the cement filled shell boxes not only comprise a very acceptable substitute but greatly reduce construction costs.

DO YOU FEEL LIKE THIS WHEN YOU WAKEN?

Do you feel blue, sickly, heavy, tired to get up? If so, it's probably your liver which is slow, and needs to be toned and stimulated by Dr. Hamilton's Pills. It's a wonderful change Dr. Hamilton's Pills will make in a few days. They relieve the system of poisonous wastes, they aid the stomach, improve digestion, increase your appetite. You'll feel like new all over after using this health-bringing medicine. Thousands have proved it. Sold everywhere in 25c boxes, or The Catarrhozone Co., Montreal.

Hungarian Lake is Drying Up

Volcanic Changes in Bed Responsible - Say Geologists

The biggest lake in Hungary, Lake Balaton, covering 360 square miles, would appear slowly to be drying up. In some places the water has receded a mile from the old shore line within a few years and the shrinking continues.

No one can give an explanation particularly as there has been plenty of rain recently. Geologists say that volcanic changes in the bed of the lake are responsible.

KEEP CHILDREN HEALTHY

To keep children healthy the bowels must be kept regular and the stomach sweet. Nine-tenths of the ailments which afflict little ones are caused by derangements of the bowels and stomach. No other medicine can equal Baby's Own Tablets in guarding either the baby or growing child from the ills that follow a disordered condition of the bowels or stomach. They are a mild but thorough laxative and never fail to give results. Concerning them Mrs. W. B. Coolledge, Sarnia, Ont., says: "I have used Baby's Own Tablets for over three years and have found them the best medicine I have ever used for my children. I never have any trouble giving them to my little ones and they have saved me many a doctor's bill. My advice to all mothers of little ones is to keep a box of the Tablets in the house." The Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Pictures in the Album

Collection of Old Photographs Always Full of Interest

A local photographer with many years' experience estimates that only fifteen per cent. of the people ever have their photographs taken. No doubt he refers to photographs that are taken in the studios and does not include those snapshots which young persons are always taking whether the subject's face is in fit shape to be photographed or not.

At one time it was almost a duty to go to a "gallery" for a sitting, have a dozen portraits made in the cabinet size, and send one to each of your uncles and aunts and other relatives who on receiving them placed them in the large family albums, where they repose for all time.

It is always worth while looking into one of these old albums. Some of the weirdest looking persons imaginable may be seen looking out at you as you turn the heavy pages—men of twenty or thirty or forty years ago wearing little hard felt hats that do not seem half large enough for the heads they cover, and women in some of the most extraordinary getups. They actually used to dress like that, and, believe it or not, they pleased the eye of the male just as much as they do now.

One should stop occasionally and consider that in a few more years our general appearance will be as strange and outlandish to a new generation as these old photographs appear to us. We have to admit that the older folks "knew something" even if they did not know how to dress. Let us hope that our successors will take as kindly an attitude toward us.—Regina Daily Post.

For Lease of School Lands

Amendments to the regulations giving to the Minister of the Interior power to lease vacant and available school lands in the western provinces for recreational and exhibition purposes have been approved and made public. The previous regulations, it was held by the Department of Justice, did not provide the minister with sufficient power in the granting of leases for the above mentioned purposes.

How Times Do Change!

The Walkerton Telescope resurrects an article from a Walkerton paper printed fifteen years ago urging the farmers to pledge every candidate for Parliament to use his vote and influence in favor of a law prohibiting automobiles from using the public highways.—Kincardine Review.

The Coming of Better Times

Says Canada's Prosperity Depends on Development in West

Canada's prosperity to a great extent depends upon the development of the west, and the Federal Government, through immigration and the improvement of railroad terminal facilities, is determined to bring about that development, Hon. J. H. King, Minister of Public Works, and British Columbia's representative in the Federal Cabinet, declared at Victoria recently.

The Federal Government, Dr. King asserted, intended to co-operate with Provincial Governments in stimulating the settlement of the west and, with increased immigration and the western movement of trade, the minister foresaw for the west another period of prosperity like that which preceded the Great War.

CATARRHAL DEAFNESS

is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Circulars free. All Druggists.

A Vindictive Peace

General Hamilton Has Theory as to Cause of Unrest

General Ian Hamilton has asked an interesting question. "Why is it," he enquired "that the two last successful wars, one against the Boers in South Africa and the other against the Germans, had such opposite results? How is it that the Boer war put an end to the feuds, race-hatreds, bankruptcies, disorders and bloodshed which had paralyzed South African progress for a generation, while the great war, on the contrary, has inflicted race-hatred, bankruptcy and murder over the best part of the world, from Ireland to the Near East, and turned Central Europe into a seething caulron of hate?"

And the General has answered his own question, which was propounded at the recent unveiling of a war memorial. "It is because our politicians entirely ignored the ideals of those to whom he have raised war memorials by making a vindictive instead of a generous peace," he said.

"This is not the place to set forth what I think of the Versailles Treaty," the General continued. "All I can say is that in spite of it, the cause of peace is not yet lost if only you will fix your minds rather on the intentions of those boys to whom this beautiful memorial has been raised, than upon the acts which have frustrated those intentions."

Rub it in for Lame Back.—A brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Cheap Razor Blades

Many of the safety razor blades now reaching England from Germany were afloat during the war in the shape of armor-plated battleships, according to a firm which has been investigating to find out how the Germans could make blades so much cheaper than others. Some months ago a number of British war vessels were bought by the Germans to be scrapped. Razor blades are only one of the forms into which they have been metamorphosed.

The feminine vanity bottle was used thousands of years ago. Several estimated to be 2,000 years old have been found with mummies of Egyptian women of fashion. The Egyptian pots held stibium, a preparation of finely powdered antimony with which Egyptian women of fashion darkened their eyelids and pencilled their eyebrows.

BEAUTY OF THE SKIN

is the natural desire of every woman, and is obtainable by the use of Dr. Chase's Ointment. Pimples, blackheads, roughness and redness of the skin, irritation and eczema, disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample free if you mention this paper.

Dr. Chase's Ointment

Canadianizing Canada

The Value of Tourist Travel to the Dominion

Travel is one of the greatest elements in education and is one of the fundamentals of good citizenship. The desire to know one's own country should be inculcated into the system of every Canadian and to obtain any adequate knowledge, how can it be acquired better than by travel? "Canadians, See Canada," and "See Canada First," etc., have been adopted as slogans in the endeavor to create in the minds of Canadians the advantages of national travel and the attractions Canada has to offer.

The purport of this article is not only to give expression to the importance of Canadians seeing Canada that they may have a fuller appreciation of what their own country has to offer them in the way of scenery and interest, but to emphasize particularly the value of tourist travel to the nation, and the duty we owe ourselves in developing our tourist territory—so to speak to capitalize the scenery. Possibly no other country in the world gives up to its people a greater area of country for recreation purposes and these great playgrounds are not confined to any particular section but are spread from the Atlantic to the Pacific. Then again from the seashore resorts of the Atlantic and the lower St. Lawrence to the Pacific Coast the interests are so varied and so distinctly different from one another that our Canadian people may use their vacations for years and find new scenery and new interest annually. From the quiet beauty of the Maritime Provinces to the more rugged scenery of the Province of Quebec, the almost continuous lake and river country of Northern Ontario, the Rocky Mountains so immense, beautiful and wonderful, on to the Pacific Coast, one cannot imagine without personal vision and knowledge what a wonderful asset we have in our widespread playgrounds and national parks.

But to make the most of these wonderful heritages, to realize the fullest amount of profit, they must be developed. The Provincial and Dominion Governments must be keenly alive to what the possibilities are. Good roads to the wonder places and beauty spots are essential so that the way of the tourist may be made easy and attractive.

Much has been done by the railways to advertise our tourist territory, which has resulted in millions of dollars being spent in Canada annually, principally by our neighbors to the south of us, but the fringe has as yet only been touched. The Canadian National Railways have just opened Jasper Park Lodge, in Jasper Park, that largest and most wonderful of all our national parks, 4,400 square miles of magnificent mountainous scenery. There wild life roams unmolested and thousands of tourists from all parts of the globe will gladly assemble annually when the park is fully developed with good motor roads, and the system of lodges so auspiciously opened on June 15th last are extended through the park. Jasper Park is but one of the many feature places to be developed. Mount Robson Park, just fifty miles west from Jasper station, is another. Aside from Mount Robson being the highest peak in the Canadian Rockies, 13,068 feet), the park which is entirely within the province of British Columbia, is an Alpine kingdom in itself, but until such time as it is developed, the glory and majesty of its scenery is denied the tourist who does not choose to ride a cayuse.

By way of comparison it has been stated that tourist traffic in California alone nets approximately a hundred million dollars a year, and the more Northern Pacific Coast States, Washington and Oregon, add fully half that amount to the total, whereas it has been said that tourist traffic in Canada all told, did not net beyond ten or twelve millions.

Again, the provinces of Nova Scotia and New Brunswick have all the advantages of the State of Maine, but comparatively little has been done to develop them. What this development may mean in a measure can be expressed by the fact that Maine last year reaped a harvest of over $40,000,000 in tourist business.

Our wonderful tourist territory is undoubtedly one of our largest assets, and greatest heritages to be developed, and in the opinion of international travellers who have visited us, Canada possesses the finest aggregation of scenery in the world. —Toronto Saturday Night.

Company U.S. Is In

The list of absentees among the supporters of the League (of Nations) is more easily called than the roll of its membership: Abyssinia, Afghanistan, Ecuador, Germany, Hungry, Iceland, Mexico, Russia, Turkey and the United States.—Raymond B. Fosdick in the Atlantic.

Practice Makes Perfect

After a few years of marriage a woman can mentally plan a dinner party, make over an evening gown or redecorate the house while she is automatically kissing her husband goodby, after breakfast.—Helen Rowland.

In the government of their East Indian possessions the Dutch have a law which provides that the testimony of one white man will be equal to that of seven natives.

After London, in point of population of British cities, come Glasgow with 1,000,000 inhabitants, and Birmingham, with 800,000.

Says Tanlac Is Fine To Build Up Weight

Persons suffering from stomach trouble and who are under weight find an ever-ready friend in Tanlac. This celebrated medicine has ended indigestion and increased the weight for thousands of people everywhere. Mrs. M. Sanderson, wife of a well-known grain buyer of 691 Anderson Ave., Winnipeg, Man., says:

"I got so weak and run down the least bit of housework was too much for me. I just dreaded to eat, for my food would sour and keep me in misery for hours. I gained twelve pounds and look better and feel better than I have in years."

Under nourishment is the cause of most cases of under weight. Tanlac enables the stomach to extract the healthy nutriment from the food, build up the whole body and increase the weight to normal. Millions of people have testified to its great benefits. Get a bottle today at any good druggist.

The Fear of War

Lord Robert Cecil Discusses Conditions in Troubled Europe

"When we come to analyze the situation closely we find that the fear of war is the beginning of unwisdom," said Lord Robert Cecil recently discussing conditions in Europe. "Russia's apprehensions have been translated into vast armies withdrawn from reproductive work, ill-fed, ill-clothed, ill-disciplined, and consequently a greater menace to their friends or fellow-citizens than to their enemies.

"In France the fear of war has led to the establishment of those armies of occupation on the Rhine that are costing bankrupt Germany more than one million pounds a week—more than two thousand million marks.

"Fear of war is leading a section of public opinion in England to demand a vastly increased air service, and still further concentration upon scientific methods of slaughter. In all directions we find that knowledge is still harnessed to destruction; that the readiest means of money-making is to invent something that can destroy life-energy faster than nature can replace them. Behind all these manifestations lies fear."

It will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Eclectric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

World's Obsolete Ships

Nine Thousand Vessels Will Soon Have to be Replaced

Shipbuilding companies the world over are looking forward to the time when 9,000 vessels of 13,000,000 gross tons, or nearly one-fourth of the world's merchant marine, must be withdrawn from active operation. This is the total of the ships which have passed the age of twenty years, when boats are considered obsolete and ready for replacement. There are now throughout the world approximately 3,000 vessels of 6,000,000 tons between twenty and twenty-five years of age. There are 6,000 of 7,000,000 tons more than twenty-five years old. Under normal conditions many of these vessels would have been withdrawn and broken up before this. During the war and in the period of prosperity immediately afterward they were operated at a profit despite heavy insurance cost and upkeep.

Ask for Minard's and take no other

The world's nut trees are said to be capable of supplying nourishment to its entire population.

A female aligator will lay as many as 100 eggs at one time.

MOTHER SAVES DAUGHTER'S HEALTH

Lydia E. Pinkham's Vegetable Compound Helped Both Mother and Daughter

Lumsden, Saskatchewan.—"My mother had taken Lydia E. Pinkham's Vegetable Compound and when I needed something for my periods I took it and got good results. I recommend it to women with any female troubles and I know other women who have been helped by it and do the same."—Mrs. Max Retzer, Lumsden, Saskatchewan.

Many cases like this come to our notice. Lydia E. Pinkham's Vegetable Compound is often recommended by the mother and the grandmother too, for bear in mind, it has been helping women for nearly fifty years.

Women Tell Each Other

In your own neighborhood are women who know the value of this wonderful medicine and they talk to one another about it. So if you are troubled with pains and irregularities, a tired feeling, nervous and sleepless spells, or have other annoying symptoms caused by some female trouble, you have only to ask some neighbor what she thinks of your taking Lydia E. Pinkham's Vegetable Compound.

WORLD HAPPENINGS BRIEFLY TOLD

Thieves stole over £540 worth of platinum while it was being heated in crucibles over a furnace in a temporarily vacant Paris laboratory.

Tommy "Peewee" Tucker, 18, amateur flyer, and Archie J. Stowell, 28, professional aviator, were instantly killed when their plane, piloted by Stowell, fell 350 feet near Tulsa, Okla.

The Soviets have sold Germany some 20 warships as old iron, according to advices from Russia. They include the Admiral Makaroff and the Gromboi.

The death of Henri Vignaud, Honorary Councillor for the United States Embassy and Dean of the Diplomatic Corps, was announced by the Paris Herald.

King Albert of the Belgians has accepted an invitation to take part in New York in 1924 in the third centenary celebration of the founding of that city.

A floating mine of German construction has been discovered by the fishermen of Antibes right across the route of the steamers plying between Marseilles and Nice.

Lord Reading, the Viceroy of India, sent to the Dalai Lama over the new telegraph line to Tibet, recently opened, the King's thanks for his friendly greetings.

The Government of New South Wales has agreed in principle to the immigration scheme under which the Commonwealth and New South Wales and Great Britain each pay one-third of the cost of taking out-land settlers.

The Combined Court of British Guiana has, by resolution, authorized the Colonial Government to take over and maintain the wireless station established in the colony by the Admiralty some years ago.

There is coal at Gros Cap, eleven miles from Sault Ste. Marie. Seven pieces were brought to the Sault and placed on exhibition by Charles O'Connor, who has staked out a claim in the Gros Cap field.

George Salem, an Egyptian student, fired a shot at an automobile in front of the Palace of the Elysee, Paris, believing the car to be President Millerand's. The shot went wild. President Millerand was at his country residence at Rambouillet at the time.

The Ford Automobile Company has bought a large tract of land on the outskirts of Antwerp, where an assembling plant will be erected, the plant will be ready for operation early next year. Automobile parts will be sent from Detroit to Brussels and the cars assembled there.

Sir Lee Stack, the Governor-General of the Sudan, has been negotiating in London for further financial support for Sudan irrigation schemes. It is understood that matters have been so arranged that it will be possible to resume during the autumn, work on the Blue Nile dam, Wakwar, which was suspended last winter.

A proposal is made to establish an aerial line of communication between Tullelar, on the South-West Madagascar coast, and Antsirabe, in the interior, which is shortly to be in railway communication with Antananarivo. The line will reduce to two days a journey which at present takes one month.

Short Crop in France

Whole Wheat Bread to Replace the White Loaf

Whole wheat bread will replace throughout France the pure white loaves and rolls that since the war have received such a warm welcome back to the French dinner table. This is due directly to the fact that this year's wheat harvest in France is estimated much below the yield of last year when there was a bumper crop of 88,000,000 quintals.

It is feared that before the 1923 wheat crop can be reaped the country will have to buy some 20,000,000 quintals of foreign grown wheat to meet the requirements of the population.

Unfit to Live—Must Die

This verdict is rendered a thousand times every week—no corn can live, it must pass out, drop off, if Putnam's Extractor is applied to corns and warts. Use the old reliable "Putnam's," it never fails, 25c at all dealers.

Great Strength In Tiny Bodies

Lifting Powers of Certain Insects Compared With Man

Probably the most wonderful feature of a mosquito is its muscularity. This may seem a ludicrous statement, but a great surprise waits anyone who for the first time examines one of these insects under a glass. Size for size, a mosquito's wing muscles are equal to an eagle's. Even on a calm day, a mosquito can fly forty or fifty miles without a halt; and with a helping wind, three times this distance! The ordinary housefly, too, has astonishing wing strength; tests have shown that when it desires really to hurry it can "dash" 160 feet in a second—110 miles an hour straight-away.

Imagine a man who could lift 73,800 pounds! He would have all known "strong men" of past and present beaten so far that comparisons would be ridiculous. But that is what our average man could lift were he as strong in proportion to his size as a crab; a weight 490 times its own is just a good average lift for a crab! The muscles of a large oyster, too, will support a weight of thirty-seven pounds.

A Belgian scientist found that a bee, weight for weight, was thirty times as strong as a horse. It has been found that an ordinary housefly can lift a matchstick and that in doing so it exerts as much power in proportion to its size as a man when he holds aloft on his feet a beam fourteen feet long by thirty inches square. Even a very small bug can drag six matches—the equivalent to a man's pulling 330 beams as large as himself.

Spiders sometimes exhibit wonderful strength, especially in conflict. There is a spider in Java that is the dread of all other insects; it makes a web that can hardly be cut with a knife! With spiders size is not always a measure of strength; but this fellow has both bulk and power.

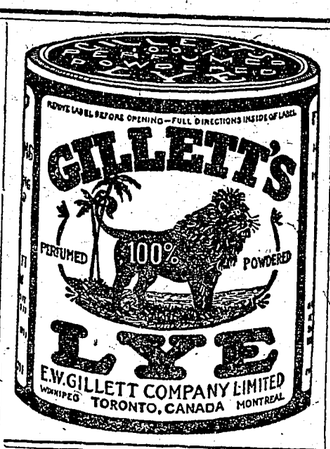
One writer states that an ordinary ant can carry ten times its own weight. Personally, I have seen them do far more than this.—L. E. Eubanks.

Old Hundredth

"Old Hundredth" has been variously ascribed to Martin Luther, Dr. Jno. Dowland and William Franck. Dr. Lowell Mason wrote quite a treatize on the old tune in 1852, saying emphatically it was written by Guillaume (William) Franck in 1543. But later musical historians and antiquarians who have investigated more closely say it was composed by Louis Bourgeois, born about 1500 and died about 1572—some say in the massacre of St. Bartholomew, in 1551-52.

The electric eel, found in Brazil and Guiana, can administer quite a severe electric shock, sometimes strong enough to overcome a horse.

A man of seventy has renewed his finger nails 186 times and has grown 7 ft. 9 in. of nail on each finger.



A Good Teacher

Value of Serving Hot Lunches In Schools

Experience has shown that where hot lunches have been introduced into schools, there has been better attendance on the part of the children because of their better physical condition. There have been fewer failures, and the average class grades have been higher. The money spent on the re-education of backward children might far better be spent in making possible the hot school lunch.

Mental efficiency is dependent upon physical well-being. A child's brain cannot work if he is not supplied with the proper food. A tired, inactive child has a tired, inactive brain.—From The American City.

PALE AND SICKLY GIRLS AND BOYS

Need All the Strength That Rich, Red Blood Can Give Them

Youth is the time to lay the foundation for health. Every girl and every boy should have plenty of pure, red blood and strong nerves. With thin, impure blood they start life with a handicap too great to win success and happiness. Rich, red blood means health, full growth, strong nerves, a clear brain and good digestion. In a word pure blood is the foundation of health.

The signs of weak, watery blood are unmistakable. The pale, irritable girl or boy, who has no appetite or ambition, is always tired out, short of breath and does not grow strong, is a victim of anaemia—the greatest enemy of youth. There is just one thing to do for these girls and boys—build up the blood with Dr. Williams' Pink Pills. You can't afford to experiment with other remedies, for there must be no guesswork in the treatment of anaemia. Dr. Williams' Pink Pills act directly on the blood, giving it the elements it lacks, thus developing strong, healthy girls and boys. Mrs. R. Kinch, Hepworth, Ont., tells as follows what these pills did for her daughter:—"I think it a duty to let others know the benefit which Dr. Williams' Pink Pills have been to my daughter, and I hope this may be the means of inducing some other sufferer to try them. She was weak, nervous and badly run down. She took medicine from the doctor but got no benefit, and finally she was not able to walk to school. I was advised to give her Dr. Williams' Pink Pills, which I did, and after taking them for a time she was restored to perfect health. I cannot speak too highly of these pills."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

Editorial Apology

The editor of a small paper in a remote district of Southern California found himself unable to insert his usual coumn of births, marriages and deaths. Thinking that some apology was needed for such an untoward circumstance, he inserted the following, in clear, black type: "We regret that owing to pressure upon the space several deaths have been inevitably postponed."

Birmingham, Ala., claims the largest Sunday school attendance in proportion to population of any city in the world.

A truckload of hay was one of the wedding presents given to the bride of a Newmarket trainer in England.

Cable Between Continents

Duplication of Pacific Cable From Canada to Australia

When completed, the duplication of the Pacific cable from Canada to Australia and New Zealand, will prove one of the greatest engineering feats ever accomplished. The cable runs from Vancouver and touches Fanning Island, Norfolk Island and Fiji. An enormous number of messages pass over it, and although the new line will cost something like two million pounds it will soon justify the expenditure of this enormous sum. More than seven thousand miles of cable will be needed, and one stretch of the line will be the longest in the world—a distance of 3,458 miles. Some idea of the amount of work that this cable will have to do may be gathered from the fact that nine million words are telegraphed to and from Australia every year.

You May Be Ill To-Night Have You a Remedy?

It may be a disordered stomach, perhaps cramps or acute indigestion. If you have no remedy handy, you're bound to suffer. Twenty drops of Nerviline in sweetened water will ease the pain and enable you to get a good night's sleep. Whether it is Neuralgia, Sick Headache, or some other minor ache or pain, Nerviline can be used internally or externally and will be found a true friend for every family. Large 35c bottles sold everywhere.

Ten Years' Homicides

List Is a Terrible Blot Upon Civil Order

During the last ten years there have been 85,000 unlawful homicides in the United States, almost as great a number as the country's loss through active participation for two years in the greatest war in history. Ninety per cent. of these deaths are directly traceable to the use of pistols and the indiscriminate carrying about of them in the pocket.

Many of the people thus killed could no doubt be better spared than most of the lives lost in the war. At the same time such a list is a terrible blot upon civil order and the sanctity of law as against the individual caprice of hatred, revenge or even just resentment.

The practice of carrying a pistol by people who have no furtive or criminal intention is dangerous, harmful and ridiculous.—Winnipeg Tribune.

Will Make Investigation

U.F.A. Probing Working of Cheque Stamp Legislation

The United Farmers of Alberta intend to make a searching investigation into the working of the cheque stamp legislation. It has come to their knowledge that some of the livestock commission men are charging the cost of the stamps back to the stockmen, and that this also applies to transactions with farmers in connection with grain shipments.

The position taken by the U.F.A. is that according to the act such a course is illegal, and a wire has been sent to the Minister of Finance asking if this charge can be legally exacted.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Strange Geographical Theory

German Scientist Says American Continent Is Drifting Farther West

Is the American continent drifting westward and slowly leaving Europe behind? It is, if the theory propounded to the Savants of the British Association at Hull by the German geologist, Wegener, is correct. Dr. Wegener declares that the various continents originally were jointed at the poles, but that now they are drifting away from the poles and from east to west. America is moving westward faster than Europe, he said, and Greenland still faster than America. He added that this movement had been proved by experiments at observatories in Europe and at Washington.

In the discussion which followed Prof. Turner, of Oxford, said there were no astronomical observations worthy of serious consideration in support of Wegener's theory. Greenland, he admitted, had an apparent drift, showing a change of three-quarters of a mile in position between 1923 and 1907. All other evidence, however, was against the existence of changes in latitude and longitude.

Determined to See Alike

Lord Shaw, in an interview on his return to London from a tour in Canada and the United States, where he addressed national gatherings of the bar, said what struck him most at the meetings which he had addressed was the manifest determination of the Americans and Canadians to see eye to eye with each other. He said he did not bring back any impression but those of the highest omens for the happy relations of Great Britain, the United States and Canada.

To demonstrate the strength of a certain make of writing paper, five girls grouped themselves on a frame suspended from a single sheet of the paper. The total weight it supported was 769 pounds.

Wild cucumber plants in the Middle West of America are regarded as a menace to domesticated plants, through their disease-carrying properties.

A Simple Little Gown for the Pretty Little Miss

Here is an evening gown of gray chiffon, whose charm lies in its delicacy of color and its simplicity of line. The flowers at the belt are its only trimming.

Red Cross Nursing Outposts

Extending Nursing Facilities to Outstanding Sections in Saskatchewan

The Red Cross will establish one of its Nursing Outposts at Kelvington, thus bringing the total of hospitals and outposts operated by the Red Cross in Saskatchewan to eight, located at Paddockwood, Carragana, East End, Robsart, Bengough, Cut Knife, Meadow Lake and Kelvington.

The Red Cross has also decided, working in co-operation with the Rural Municipalities of Souris Valley No. 7, and Lomond No. 37, to place district nurses at Colgate and Bromhead, the cost of such service to be divided equally between the Red Cross and the municipalities.

This decision was reached at a recent meeting of the committee on Medical and Nursing Services. Reports presented to the committee showed that during the six months of the year, nursing days in the six outposts in operation for a whole or part of that period totalled 1,435, and that 35 babies were born.

The Council of R.M. of Bengough No. 40 are so well satisfied with the work being done in the Red Cross Outpost there that at a recent meeting it was decided to make important alterations and extensions to the present building, or build a new, larger and more modern one.

The two years for which the Red Cross agreed to operate the outpost at Paddockwood expire in October, and the people there have petitioned for a renewal agreement, and in so doing refer in terms of high praise to the splendid services rendered to them in their isolated location, far removed from all other medical or nursing help.

The Red Cross has also authorized the establishment of an outpost at Medstead on condition that a suitable building is provided, but steps in that direction have been deferred until next spring.

Eleven graduate nurses are now employed permanently by the Red Cross in Saskatchewan. The expenditure for the past twelve months in equipping and operating outposts and maintaining district nurses in the field has been approximately $20,000, while donations for this work have amounted to about $4,000.

Have the Right Idea

Want All School Books for Alberta Printed at Home

That all the school readers used as text books in the Alberta schools should be printed in Alberta, instead of being contracted for with outside firms, doing their work entirely outside the province, is the contention of various labor and other interests that have laid the matter before the Government. Fred White, one of the Calgary members of the Legislature, is specially interested in the question and has taken it up with the Department of Education.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

By a new invention, it is possible to speak a message into a telephone receiver and have it recorded on a gramophone record at the other end of the wire, according to recent information.

Seamen have observed the glow of Rio de Janeiro, a city famed for its brilliant illumination, 100 miles out at sea.

PETRIE'S MACHINERY TORONTO

SUNDAY SCHOOL LESSON

LESSON FOR OCTOBER 1

BIRTH OF JOHN THE BAPTIST

We are today entering upon a six months' course of study in the Gospel of Luke, whose general subject is "Jesus the World's Savior." Today's lesson concerns the birth of John the Baptist, the forerunner of Christ.

I. The Parents of John the Baptist (vv. 5-7).

1. When They Lived (v. 5). "In the days of Herod the King." They lived in a day when ungodliness was rife. The priesthood was very corrupt and the ruling classes were wicked. Zacharias and his wife lived in a time when it was not so easy to be godly.

2. Their Character (v. 6). They were righteous before God. To be righteous before God is a high tribute. Many appear to be righteous before men who are not righteous before God. Their lives were so mated that they walked in the commandments of the Lord blameless. How beautiful it is when husband and wife are united in the Lord and walk together in fellowship with God.

3. They Were Childless (v. 7). Though this godly couple were well mated and they possessed the joy of the Lord in their souls, there was a real lack in that home.

II. The Birth of John Promised (vv. —8-17).

1. By Whom (v. 11; cf. v. 19). The angel Gabriel appeared and made known the good news to Zacharias. This exalted being, the special messenger of God, was sent to make this disclosure.

2. When (vv. 8-14). While officiating as priest this good news came to him. Zacharias must have been definitely praying about this very matter (v. 13). As he burned incense, which typified prayer, the multitude without were praying.

3. Characteristics of the Child (vv. 15-17). (1) Shall be great in the sight of the Lord (v. 15). Though the people did not greatly esteem him he was highly esteemed by the Lord. This is infinitely better than if he had been greatly esteemed in the eyes of men or in his own eyes. This is the esteem for which we all should long and pray. (2) Shall drink neither wine nor strong drink (v. 15). The child shall become a Nazarite, separating himself from the sensuous things and dedicating himself to the service of the Lord. (3) Be filled with the Holy Ghost (v. 15). The energy of the divine Spirit would enable him to lead the people to repentance (v. 16). (4) Shall go in the spirit and power of Elijh (v. 17). In this power he was to prepare the people for the coming of the Savior and the salvation which He was to bring.

III. Zacharias Asking for a Sign (vv. 18-23).

Although the aged priest was earnestly praying for the salvation of Israel the gracious promise of the angel, which was the beginning of that salvation, staggered his faith. He was unable to believe that that for which he fonly hoped and prayed would be realized. The angel gave Zacharias a sign. He was smitten with dumbness which was to continue until the fulfillment of the promise. Because he refused to praise God in faith for this gracious promise God caused his tongue to be silent until the promise was fulfilled and his lips could open in thanksgiving and praise. Though he was thus rebuked, at the same time his faith was strengthened by the manifestation of the supernatural. God wants us to trust Him, to believe His promises, no matter how contrary to reason they may seem.

IV. The Promise Fulfilled (vv. 57-63). When the time came for the birth of John, Elizabeth brought forth a son and the neighbors rejoiced with her. On the eight day they circumcized the child and gave him a name according to the instruction of the angel (v. 13). The name John was contrary to the family custom. By means of writing Zacharias made known the name which he would have by divine instruction. At this time God opened the mouth of Zacharias and he offered up praise.

Grew In Esteem

Flowers Despised by Country Dwellers Valued in City

One morning a summer resident started from Coolbeigh with a bunch of flowers in her hand.

"Going to tote that whiteseed into the city?" inquired the man who drove her to the station, with evident scorn.

"Yes," said the young woman, quite unmoved by his opinion.

On the train she was joined by another young woman, who had formerly lived in the city, but had married a Coolbeigh man a few years before.

"Those are pretty daisies you have," she said tolerantly.

"Yes, I think they are," said the summer visitor, smiling to herself.

An hour later she handed the flowers to a friend in a busy office.

"Oh, what lovely marguerites," cried the recipient.—Washington Post.

Icebergs in the Arctic regions are neither so large nor so numerous as those seen in the Antarctic seas, but they are usually loftier and more beautiful, with spires and domes.

In places the thickness of a whale's skin is 2 ft.

Holland has 930 miles of canals.

Minard's Liniment Lumberman's Friend

OIL LIGHT BEATS ELECTRIC OR GAS

BURNS 94% AIR

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent. air and 6 per cent. common kerosene (coal-oil).

The inventor, T. V. Johnson, 579 McDermot Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make $250 to $500 per month.

Getting Rich

Quickest Way Is Not Always Safe and Sure

Two full-page magazine advertisements come to our attention. Both point the way to wealth—so they say. One, in the most reputable advertising medium in the country, advises you to "make the money you work for, work for you." The advertiser is the Government. It offers you treasury securities. "In only five years your $80 becomes $100," the advertisement says. Not a very quick way to get rich, to be sure, but a good way to get rich surely. The other advertisement is in an oil journal. "Ten chances at a fortune," it promises. "Our 50 per cent. dividend proves our plan to be a sure winner." Think of that—your $80 becomes $120 right off the bat—maybe! A good way to get poor quickly!—Minneapolis News.

Dye Skirt, Coat, Draperies With Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

May Eliminate Paper Waste

New Process Dissolves Ink and Leaves Paper Clear

A process to remove ink from old newspapers so the paper can be used again for printing purposes has been developed by the United States forest products laboratory located in Madison, Wis. One mill under commercial conditions has de-inked 1,500 tons of old newspapers and has remade the paper into newsprint stock of desired length and color which was accepted by publishers as standard.

Bentonite, a clay-like substance formed from volcanic ash and found largely in Wyoming, is used in the de-inking process. It dissolves the ink and leaves the paper perfectly clear. Because of the cheapness of the new process laboratory officials say they believe that much of the 2,200,000 tons of newsprint annually used can now be salvaged.—Thrift Magazine.

Launches Glider 4,000 Feet Up

Herr Klemperer, celebrated German gliding champion, had a narrow escape from death at Zurich. He launched his diminutive motorless glider from a balloon at 4,000 feet and dropped like a plummet toward earth, falling in fifteen seconds, but averting a fatal crash.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Right You Are

"Running a business," says someone, "is a good deal like riding a bicycle. You have to keep on going or fall. There are darned few men who can stand still and maintain their balance in the store, or on a wheel.—Better Business.

It's a fine thing to keep out of trouble—

but it's a finer thing to know how to get out of trouble after you have gotten into it.

Many people thoughtlessly get into trouble by loading up with heavy, indigestible foods which fail to supply the essential elements for repairing the daily wear on their nerves and body tissues.

It is well to know that Grape-Nuts with good rich milk is a highly nourishing food, providing all the necessary nutritive and mineral elements in proper form for ready assimilation by the system.

When you make Grape-Nuts a substantial part of your regular daily diet, Nature will quickly assert herself and build healthy nerve cells and sound body tissues.

Crisp and crunchy Grape-Nuts, made from wheat and malted barley, is a satisfying food for breakfast—a welcome answer to the call of appetite.

The familiar Yellow package contains more nourishment in less bulk than any other cereal food.

"There's a Reason" for Grape-Nuts —THE BODY BUILDER

THERE is much mystery about the principle of life. Some animals are very tenacious of life. We once heard of a man who had a dog accused of killing sheep. One of his boys held the dog with his head over a block and the man struck a heavy blow with the poll of an axe upon the head, and the dog stiffened out and apparently died. A lad dragged the carcass across a ten acre field to a gully and buried it. Next morning the dog came and licked the man's hand, and it lived for many years after but gave up the habit of sheep killing. A story of a broad mullett swimming across a pond after it was skinned and ready for the pan is told by men whose word may not be doubted. A supposedly dead coon was skinned and its body thrown out. A few minutes later that body rose up and walked about. Every hunter knows that wounded ducks are hard to kill.

The life principle has other peculiarities than its occasional miraculous tenacity. It sometimes deserts a useful man without compuntion, and leaves a useless man to live to old age. Old fashioned people are sometimes inclined to blame the Lord for the excentricities of the life principle which he has made, but the laws of nature and the cunning old devil are revealed in the process of investigation.

List of Wedding Gifts

The following is a partial list of the wedding gifts gratefully received by Mr. and Mrs. Gus Graser:—

Mr. and Mrs. Brown, kitchen set of aluminum; Mr. and Mrs. J. P. Anderson, kitchen sauce pan aluminum; Mrs. Anderson and Miss Olson, kitchen sauce pan aluminum; Mr. and Mrs. G Sutherland, beautiful picture; Mr. and Mrs. R Bours, dining room clock; Mr. and Mrs. S Bender, rug; Mr. and Mrs. Keir, teapot; Mr. and Mrs. Kerr, pair of bath towels; Mr. and Mrs. Boag, Baby boot in a pair of bath towels; Mr. and Mrs. G. S. Walters, cheese dish; Mr. and Mrs. G. W. A. Smith, cheese dish; Mr. and Mrs. E. Lund, table linen; Mr. and Mrs. R Roylance, table linen; Mr. and Mrs. Fraser, bed linen; Mr. and Mrs. W Docksteader, bed linen; Mr. and Mrs. W Lakeland, Maltese lace table cloth; Mr. and Mrs. C Gauvreau, side board scarf, Mr. and Mrs. W Walmsley, pair bath towels; Miss L Boot, table linen; Mrs Mace, doilies; Miss O'Connell, embroidered handkerchief; Mrs. Axam, real lace handkerchief; Miss C. McDonald, doilies; Mr. and Mrs. Henderson, pin cushion; Mr. and Mrs. Legault, hand painted fruit dish; Mr. and Mrs. Goodeve, hand painted fruit dish; K. of P., hand painted fruit dish; Mr. and Mrs. A. N. Mowat, hand painted berry dish; Misses Axam, hand painted bon bon dish; Mr. and Mrs Fleming, cake plate; Mr. and Mrs. Bush, large hand painted cake plate; Mrs. Lyons, hand painted cake plate; Mr. and Mrs. McPherson, hand painted cake plate; Mr. and Mrs. Fenner, hand painted cake plate; Mr. and Mrs. Maletta, cake plate; Mr. and Mrs. Bombini, berry dish; Mr. and Mrs. Folvik, casserole pie plate; Mr. and Mrs. C. King, hand painted bon bon dish; Mrs. Thomas, hand painted spoon tray; Geo. Gray, hand painted spoon tray and a silver baby spoon; E A Wanke, hand painted pepper and salt shaker and tray; Mr. and Mrs. Hartland, two hand painted cups and saucers; Mr. and Mrs. Maloney, two hand painted cups and saucers; Mr. and Mrs. Compolieto, cup and saucer; Miss A. Bryan, hand painted cream and sugar set; Mr. and Mrs. J McDonell, hand painted cream and sugar set; Mr. and Mrs. A Webster, cut glass cream and sugar set; Mr. and Mrs. J Docksteader, silver plate butter dish; Taylor & Jenkin, silver plate butter dish; Mr. and Mrs. Gulley, pyrex beandish and syrup jug; Mr and Mrs. McLaren, pyrex bean dish; Mrs Stapleton, pyrex pudding dish; Miss J Murray, hand painted tea pot stand; Mr. and Mrs. G White. hand painted berry set; Mr. and Mrs. A J Morrison, hand painted berry set; Mr. and Mrs. Lee, hand painted berry set; J. Hallett, hand painted cup and saucer; Mr. and Mrs. L Bryant, hand painted bon bon dish; Mi s N Axam, pyrex pudding dish; Master E and A Granberg, salt and pepper shakers; Rosie and Sonny Bombini, salt and pepper shakers; Mr. and Mrs. G Clerf, silver card tray; H Bryan, silver sugar tongs; Mr. and Mrs. Si Smith, pearl necklace; Elizabeth and Sylvester McDonald, silver berry spoon; Mr. and Mrs. McDonald, half doz silver tea spoons; Miss D Granberg, silver meat fork, sugar spoon and butter knife; Mrs. F Peterson, silver cold meat fork; Mr. and Mrs. J N O'Neill, silver cream ladle; Miss A Stewart, silver jam spoon; Mr and Mrs. C Nichols, silver butter knife; Mr. and Mrs. P H McCurrach, silver meat fork; Mr. and Mrs. Taylor, silver sugar spoon; Mr. and Mrs. Sater, silver butter knife, sugar spoon and cream ladel; two presents with cards missing; gift of brides parents, Mason & Rich piano and a china closet; gold signet ring to groom; Miss P. Spooner, bed spread; Mr. and Mrs. W Spooner, table linen.

Port Hope. — The C. P. R. Port Hope bridge is fifteen hundred feet long. It is an interesting question how long it will require to paint it and how much paint will be used on the work. There are at present eleven men swinging the brushes; they will be busy for at least eight weeks and three hundred gallons of paint will spread over the long span. The work of preparing the girders is a big job and a tedious one. Men go over the entire structure with small picks and hammers removing all the corroded parts after which it is brushed down with steel brushes. A graphite paint is used and it comes all ready prepared for the work. The wages of the men for this job will exceed two thousand five hundred dollars, which gives some idea what the painting account for the C. P. R. would amount to each year. There are two cars which provide eating and sleeping quarters for the men. It is just seven years ago that this big structure was given a liberal coat of paint.

Montreal.—Mr. Alfred Price, General Manager Eastern Lines, Canadian Pacific Railway, for over forty years, who has relinquished his duties with the railway for an indefinite period, left Montreal on the C. P. S. "Montrose" recently, bound for England.

Mr. Price, who is accompanied by his daughters Misses Laura and Grace Price, will spend some time at Torquay, Devonshire, England, where it is hoped Mr. Price's health will be restored.

Several of Mr. Price's friends went aboard the "Montrose" to see him off. Amongst the Canadian Pacific officials present were: A. D. MacTier, Vice-President; James Manson, Assistant to Vice-President; John J. Scully, General Manager Eastern Lines; W. G. Annable; W. Ballantyne; Arthur Allan; George H. Ham; John Leslie, C. P. R. Comptroller, who was accompanied by Mrs. Leslie and Miss Leslie. There were several other friends and well-wishers present. Souvenirs presented to Mr. Price included a pair of binocular glasses.

Mr. Price's cabin was lavishly decorated with flowers by his friends.

Good, Wholesome Baking Powder

is never violent in action but is perfectly balanced, leavening the dough thoroughly and uniformly through and through.

Dr. PRICE'S CREAM BAKING POWDER

MADE IN CANADA

works so evenly and surely that it insures the wholesomeness of your baking.

It is made of Cream of Tartar, derived from grapes, and adds the quality touch to baking that no other kind of baking powder provides.

Vancouver. — With every hotel along the Canadian Pacific Railway taxed to capacity, and with the coastwise steamship offices reporting a greater volume of travel than ever before in their history, Western Canada is enjoying a tourist traffic this year that has never been equalled in past seasons.

During the past few days it has been necessary for the majority of the hotel motor buses to make four and five trips to the hotels from the steamers in order to accommodate the incoming passengers, and the trains both from the east and from local points have been similarly well filled with visitors.

"Tourist traffic over C.P.R. western lines is far greater than it was in 1921," said General Passenger Agent H. W. Brodie on his return from an inspection trip which carried him as far as Banff. "Travel is now at its full height and many Americans are seeing Canada. Trains both east and westbound are well filled, and Western Canada is enjoying a great summer season."

All the mountain resorts along the main line of the C.P.R. are being well patronized, and the Arrow Lakes and Okanagan scenic points are also the Mecca for hundreds of tourists from the American side.

Boats bound for Alaskan ports are being well filled every trip, while the ferry steamers between Vancouver Island and Seattle and Vancouver are loaded to capacity every trip.

The opening of the Banff-Lake Louise road through the mountains has done much to bring a large volume of auto tourist traffic to Canada this year, state C. P. R. officials, and when the Banff-Windermere highway is opened this fall it is expected that there will be another large volume of tourist traffic diverted through British Columbia.

"Many cars are coming from Spokane and Seattle up through Lethbridge into Banff and Lake Louise," says Col. Clarence Lougheed of Calgary, "and when the highway right through the mountains is completed both Alberta and British Columbia will get a large volume of auto traffic annually. Hundreds of cars have come through Alberta this year, and they would continue on and return to the United States by way of Vancouver if the roads were open. Alberta autoists are also anxiously awaiting the completion of the roads through and it will undoubtedly mean a big thing every year to British Columbia."

To most people, the connecting or disconnecting of a telephone seems a simple operation of installing or removing the instrument. As a matter of fact, in every case it necessitates changes in the cables and wires overhead or underground. It also necessitates changes in central offices wires and switchboard connections; in-subscribers' accounts and directory listings; and frequently requires new "drop" lines from open wires or cables. The problems of station movement are among the large problems of telephone service. Because of the double operation of disconnecting and reconnecting, the work involved is often twice as great as in the case of new subscribers.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and must make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvement to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptors holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time in which the heirs or devisees of a deceased pre-emptor may apply for title under this act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31st, 1920.

SUB-PURCHASERS OF CROWN LAND

Provision made for insurance of Crown Grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers up to ten head.

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

BRITISH COLUMBIA

The Mineral Province of Western Canada

Has produced Minerals valued as follows: Placer Gold, $76,177,403; Lode Gold, $105,557,977; Silver, $55,259,485; Lead $48,330,575; Copper, $166,393,488; Zinc, $21,884,531; Coal and Coke, $225,409,505; Building Stone, Brick, Cement, $34,072,016; Miscellaneous Minerals, $1,210,639; making its Mineral Production to the end of 1921 show

An Aggregate Value of $734,259,619

Production for the Year Ending December, 1921, $28,066,641

The Mining Laws of this Province are more liberal, and the fees lower, than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES
VICTORIA, British Columbia.

Dated at Penticton this 9th day of September, 1922.

E. T. COPE,
Provincial Collector.

Princeton Assessment District

I HEREBY GIVE NOTICE that, on Thursday, the 12th day of October, 1922, at the hour of 10 a. m., at the Provincial Police Court, Penticton, B. C., I will sell at Public Auction the lands in the list hereinafter set out of the persons in said list hereinafter set out for delinquent taxes unpaid by said persons, on the 30th day of June, 1922, and for interest, costs and expenses including the cost of advertising said sale if the total amount due for the period ending December, 31st, 1920, is not sooner paid.

The Collector will be pleased to receive any information respecting the following list, where the owner is a member of the Allied Forces and entitled to the benefits of Section 29 of the "Taxation Act Amendment Act, 1918."

LIST OF PROPERTIES.

Dated at Penticton this 9th day of September, 1922.

E. T. COPE,
Provincial Collector.

Kettle River Assessment District

I HEREBY GIVE NOTICE that on Thursday, the 12th day of October, 1922, at the hour of 10 a. m., at the Provincial Police Court, Penticton, B. C., I will sell at Public Auction the lands in the list hereinafter set out, of the persons in said list hereinafter set out for delinquent taxes unpaid by said persons, on the 30th day of June, 1922, and for interest, costs, and expenses including the cost of advertising said sale if the total amount due for the period ending December 31st, 1920, is not sooner paid.

The Collector will be pleased to receive any information respecting the following list, where the owner is a member of the Allied Forces and entitled to the benefits of Section 29 of the "Taxation Act Amendment Act, 1918."
