Cook by Wire

Electricity provides the cleanest, the most sanitary and the most hygenic method of cooking

The Electric range closely parallels the wood or gas range but excells either in flexibility of operation

With the Electric Range you cook under ideal conditions because

- Each cooking unit can be switched to high, medium or simmering heat and kept there as long as needed
- It is the acme of cleanliness
- Practically no heat escapes into the room
- The air is not vitiated
- There is no contamination of food
- You save food values through the retention of the essential salts and meat juices, on a six pound roast the saving is nearly a pound
- All the latest standards of range construction are used, including high oven, thermometer or glass door, porcelain splashers
- The fire risk is lessened because there are no open flames

We will gladly give you information on rates and electric ranges

Subscription $1.50 per Year in Advance

THURSDAY, JULY 13, 1916

We commend to our many readers and especially the ladies, a most useful publication containing two hundred and twentyfive recipes for preserving fruit, to be obtained free upon application to the Dept. of Agriculture at Victoria. Full instructions are given of the method of preserving fruit without sugar, and at a time when sugar is so dear the importance of this recipe cannot be over estimated Housewives will be well advised to put up all the fruit they can handle because as the war continues and the same conditions will prevail for some time after the war, the prices of food will steadily rise.

The general election is drawing near, as are the referenda upon women's sufferage and prohibition. Figuratively speaking, we should be at one another's throats, but for the discipline and anxiety imposed by the Great War. Our hearts will not be at the hustings, for they are drawn to graver issues than those between the would be 'ins" and their opponents. At least let the contest be a creditable one, for by any departure from the highest of standards in political contests, we shall shame the lads at the front.

An evidence of the improving prospects is afforded by the building permit recently issued in Vancouver for the erection of a new sawmill with a daily capacity of one hundred thousand feet. This is only one instance of many recent signs of industrial development The people of British Columbia need not worry about the coming revival, for it has already begun. The main thing is to elect a government which will take care that such development is not hindered, but rather carefully fostered.

The prairie harvest, according to the latest advices, will be from ten to twenty per cent below that of last year, for reasons which every farmer will understand. But for the lack of tonnage, we might expect much of the wheat to be handled via Vancouver this year, but there is little doubt that in the near future, wheat shipments will be made, especially as the harbours on this coast will permit of winter loading.

Much has been said by way of eulogy of the late Lord Kitchener but perhaps the greatest tribute of many was that phrased by the General Federation of Trade Unions in Great Britain, "he was not only an able, but a straight man." If all our public men could earn such an epitaph it would be a great thing for the progress of humanity.

Notes by the Way

The Washington people find that Prohibition prevents them keeping their pecker up, which that great man Sandeman, director of the Bank of England, recommended above all things, and that Honest Beer was the beverage for this, consequently they have petitioned to be allowed to brew and sell beer. The number signing aggregating in the neighborhood of 750,000 out of a total population 1,142,000 What are the people of this district going to do about this glorious Honest Beer, containing 2 to 4 per cent. alcohol against whisky 50 to 60 per cent.? Oh, Jonathan you are a cruel man for trying to rob me of my beer, but I'll bet you ten dollars to one you won't succeed.—Critic.

A few weeks ago we had a nice crop of clover growing on two lots. Upon awakening one morning we found 13 horses busily engaged in cropping it off Some careless person had let down the bars the night before. On Friday morning last we foung five horses in our garden. They had feasted on our clover and green oats, trampled down our flowers and rolled upon and otherwise maltreated our potatoes. If this thing keeps up much longer we will have no crop at all, and we are wondering who is going to pay the piper. The city officials say the animals were illegally at large, and the owner will have to settle. But what's the matter with the pound by-law?

Twenty-three years ago the teachers of the valley were not afraid to give school reports to the press. From the fyles of the Courtenay News of that time we note that the Courtenay school was called North Comox, the teacher was F. W. Robbins, salary $60 per month. There were enrolled during the year 25 boys and 21 girls, average monthly attendance 31. Expenditure for year $760. The Courtenay school was near Grartham and Jas. Halliday was the teacher at a salary of $50 per month The number enrolled during the year 13 boys and 9 girls, and the average attendance was 17 the expenditure for the year was $607.75.

The Christian Scientist, published at Boston, Mass, in a lengthy article on Vancouver Island, has the following: "A traveler recently here predicted that the Island is destined to rank as one of the world's great touring fields. This is indicated partly because the people have taken pains to make the wonders of their home accessible. Realizing what an asset they possessed in their rugged scenery of well nigh unlimited variety, they set about putting up excellent hotels, and constructing a system of splendid highways, so that those who came might do their sightseeing in comfort. One of the delightful trips on the island may be taken by motor car from Victoria north to Alberni. The island highway runs three quarters of the distance; this road is believed to be one of the finest automobile highways an the continent. The first 20 miles of the Malahat Drive affords views that for scenic beauty and variety compare favorably with those to be found anywhere in America. Then the route leads through farming country, past lakes and hills, and finally takes the traveller through a great forest, up to the summit, from which he may look down on the harbor of Alberni."

The Sandwick Ladies Aid Society wishes to thank everyone who helped in making their festival a success either in donations or in taking part in the programme, and are pleased to state that they cleared $108. We are sorry that Mrs. Clayton's name was omitted as taking part in the programme.

Council Meeting

At the adjourned meeting of the council on Monday evening the council decided to get an estimate on filling in the road across the slough before going ahead with rebuilding the bridge. Mr. McCann brought in a piece of the end of one of the timbers which showed that the bridge was pretty well gone in places.

The chairman of the Finance Committee reported on the money required to finish the year's business, and recommended that the rates of assessment be 6 mills on unimproved land, 18 mills on wild, and 2 1-2 mills on the dollar for school purposes. This adopted on the motion of Alds. Aston and McKenzie.

When the matter of the accounts which had been laid over came up Ald. Hurford moved, Ald Aston seconded that $1.75 of the account of the Review be paid, and that the account for advertising in connection with the incorporation of Courtenay as a city be received and filed.

Ald. McKenzie moved and Ald. Kerton seconded that all the accounts re the Bubar case be referred to the finance committee to pay if found correct.

The account of W. A. W. Hames for assessing was ordered received and filed.

The by-law fixing the rates was introduced and given its 1st 2nd and 3rd readings.

By-law no. 20, amending the Trades License bylaw was finally adopted on motion of Ald. Hurford and McKenzie.

F. Movitz, Mgr. Phone 33, End of Bridge

Cut the Clover Early

It is the rule of many farmers to let the clover crop turn brown before it is cut. This may add a little to the weight but it detracts from its feeding value,

Hay must smell sweet and have a good color in order to be rated first class. Over ripe clover is dusty, woody and smells like tobacco. This may be pleasing to the owner, but to the cow's uneducated taste it is not. Properly cut clover will retain its green color even after being thoroughly dried. A ton of green, sweet smelling hay is worth two tons of that which is over ripe.

Clover when allowed to turn brown in the field gets brittle and most of the blades powder and are lost in hauling. There seems no good reason why farmers fail to transfer their clover from the field to the hay mow in a condition which will be acceptable to the animals and profitable to themselves.

Under the new egg act every farmer or poultry producer selling eggs wholesale is required to mark all receptacles in plain letters with the country of origin and the grade Those taking their own eggs to market are required to mark them B.C.Fresh in letters plainly marked on the sides, ends or top of receptacle or case. Every egg which has been preserved, whether by water glass, limewater or salt or any other preservative must be so stamped with gothic letters. This also applies to all eggs from Oriental countries.

Letter to the Editor.

Editor Courtenay Review

Dear Sir—:As your remarks re electric lighting issue are a little misleading allow me to state the views of the council as I interpret them.

It is not a question of calling oneanothers bluff as you intimate. but the Courtenay Electric Light Co. are under the impression that the city accepted the terms of Mr. Peterson's contract in which all renewals of lamps were to be supplied at expense of consumer. You state that minute book clearly states the situation; whereas nothing can be found to show that this decision was reached. The ex-aldermen deny that the city accepted Mr. Peterson's contract, furthermore the Electric Light Company released Mr. Peterson of this contract. Last year's council did not sign a single bill for renewals of lamps, and in conversation with four of last year's aldermen, two believe that city should pay for renewals and two declare that company should keep lamps in working order

You know the present council trys to be fair. They have offered to pay for lamp outside McPhee's out of their own pockets, but will net spend the city's money unless it is absolutely clear that the Company's claim is just.

I can emphatically state that no contract to pay for renewals has been signed by any councilman at any time nor is there any motion on minute book that city pay for lamps.

Yours very truly
R. U. Hurford.

[Ald. Hurford is quite right in his contention that the city has never signed any agreement that they would pay for any renewals of lamps, and we were of the impression that the Council only agreed to pay for the "juice" used in the four central lamps when they were taken over by the city at the request of Mr. Peterson and others but the minutes referring to the matter read: that the city assume the responsibility for the four central lignts.—Now what is the responsibility.]

Sergeant Evans who is recruiting for the Canadian Engineers, expects to be here on Monday of next week looking for men to join that corps. He will be accompanied by Mr. Alex. King well known in the district. Men of all trades and horsemen needed and they will be employed as such, and not at pick and shovel work, as so many imagine. Men who are capable don't have to use a pick and shovel they are too badly needed for that' The engineers do not have much drilling to do, and this should appeal to many as they can get away quicker. If any more of our youag men are thinking of going to the front this will be an excellent chance.

Mrs. J. W. McKenzie, sr., Mrs M. H. Piercy, Mrs. Smith, Miss Danard and Miss C. Milligan motored to Campbell River last Thursday week. After having tea at the Willows hotel they were shown over the new hospital by Miss Powell, matron, and Dr. Shaw, surgeon in charge, and returned home at a late hour, having spent a thoroughly enjoyable day.

The Furnace Fire

The following lines in the London "Daily Chronicle" are a tribute to the stokers of the Royal Navy, who, of all ranks, have the least chance of escape should disaster befal the ship.

"Oh middy lad of the beardless chin
Canst tell thy friend how the fight doth speed?
For little I hear save the cannons din,
As I stoop my ravenous fire to feed!"
"Oh, stoker man of the shaggy head,
We steam in the wake of a flying foe!
But our sides are torn and our decks are red,
And the water entereth from below!"
"Pray for us middy lad, pray for us all!
Pray for the soul of son and sire
For the ships good smoke is her funeral pall:
I have seen her doom in the furnace fire!"
"Oh, stoker, man of the mighty frame,
Dost hear the boom of our forward gun?
Why starest thou at the roaring flame?
Lo, the day of the Prussian wolf is done!"
"Oh, middy lad of the sparkling eye,
I know it is death that our guns bequeath:
But the words of the furnace flame are wise:
Beware the last snap of an old wolf's teeth!"
"We have finished her, stoker man!....God above all!
Hark to the shouts of son and sire!
I go to cheer with the gunners tall.....
While thou dost gaze at thy furnace fire!"
"Oh, middy lad, hast thou life to show?
Canst see thy friend in the gathering gloom?
They mined our path ere they went below....
And some are trapped in this iron tomb!"
"Oh stoker man of the tender hand
My arms are crushed, and I cannot stand,
But the pain of it all is no longer there!"
"Courage, my middy lad.... God's above all!
For by the soul of son and sire
I can hear the Master Bosun's call:....
I can see his face in the furnace fire!"

Production and Thrift

"CANADA from her abundance can help supply the Empire's needs, and this must be a comforting thought for those upon whom the heavy burden of directing the Empire's affairs has been laid. Gain or no gain the course before the farmers of Canada is as clear as it was last year—they must produce abundantly in order to meet the demands that may be made, and I believe this to be especially true in regard to live stock, the world's supply of which must be particularly affected in this vast struggle. Stress and strain may yet be in store for us all before this tragic conflict is over, but not one of us doubts the issue, and Canadians will do their duty in the highest sense of that great word."—*HON. MARTIN BURRELL, Minister of Agriculture.*

"MODERN war is made by resources, by money, by foodstuffs, as well as by men and by munitions. While war is our first business, it is the imperative duty of every man in Canada to produce all that he can, to work doubly hard while our soldiers are in the trenches, in order that the resources of the country may not only be conserved, but increased, for the great struggle that lies before us. *'Work and Save'* is a good motto for War-time."—*SIR THOMAS WHITE, Minister of Finance.*

THE CALL OF EMPIRE COMES AGAIN IN 1916

TO CANADIAN FARMERS, DAIRYMEN, FRUIT GROWERS, GARDENERS

WHAT IS NEEDED? THESE IN PARTICULAR—

WHEAT, OATS, HAY,
BEEF, PORK, BACON,
CHEESE, EGGS, BUTTER, POULTRY,
CANNED FRUITS, FRUIT JAMS,
SUGAR, HONEY, WOOL, FLAX FIBRE,
BEANS, PEAS, DRIED VEGETABLES

We must feed ourselves, feed our soldiers, and help feed the Allies. The need is greater in 1916 than it was in 1915. The difficulties are greater, the task is heavier, the need is more urgent, the call to patriotism is louder—therefore be thrifty and produce to the limit.

"THE AGRICULTURAL WAR BOOK FOR 1916" is now in the press. To be had from The Publications Branch, Department of Agriculture, Ottawa.
