Saskatchewan Elections

Scott Government Sustained—Cabinet Ministers Defeated

The returns of the Saskatchewan election have come in very slowly, and all kinds of reports have been received over the wires. On account of the distance from the railway of many of the polls the first reports received could give only the leading candidates in all except the cities. This was misleading and was of little use in determining the result.

However, the latest reports now give Scott 26 seats and Haultain 14, although several protests are to be entered and the final result may be different. For instance Weyburn, which went Liberal, on account of the neglect to swear the deputy returning officer. In Loydminster the successful government candidate is a few inches withing Alberta. There are also many cases of corruption and irregularities.

Next to the party result is the defeat of the two cabinet ministers—Calder and Motherwell. Turgeon was also defeated in Prince Albert, but took Duck Lake. This is a severe blow to Scott and is the greatest satisfaction to the Provincial Rights. Every kind of scheme was adopted by the Scott followers to win and the short time allowed gave the Opposition little time to talk them. However the Opposition has reason to feel that they fought a good fight, since with a Government redistribution that brought in 15 new seats, the Haultain party secured 8 more constituencies.

The Government seats:— Arm River, North Battleford, Cannington, South Battleford, Canora, Estevan, Duck Lake, Francis, Hanley, Humboldt, Moose Jaw County, Moosomin, Regina City, Rosthern, Swift Current, Saskatoon City, Saskatoon County, Pelly, Redberry, Saltcoats, Weyburn, Touchwood, Vonda, Wauena, Yorkton, Loydminster.

The Opposition seats:-- Last Mountain, Milestone, Moose Jaw City, Maple Creek, Pleasant Hill, Pipestone, Prince Albert City, Prince Albert County, North Qu'Appelle, South Qu'Appelle, Regina County, County Souris, Regina County, Moose Mountain, Kinistino.

"Nothing but scandal," mourns the Albertan in reference to the Ames' charges. Then it says Clifford Sifton was probably crooked in his administration of the interior department. T. A. Burrows had the "get rich quick" game lashed to the post. No—there is "nothing but scandal." Calgary Herald.

Elections this fall

Ottawa, August 20.—The certainty that the Federal elections will be held this fall is increasing and no denials to the prevailing confidence of the Government.

Indeed all that the Ministers, even will venture on saying is that nothing decisive has yet been arranged.

It is the universal conviction here that the campaign will be begun after the garnering of the harvest and the elections brought on to wards the last of September or early in October.

Names the day

Ottawa, Aug. 21.—The most persistent rumor in Conservative circles is that the date of the Dominion elections is fixed for Friday, October 23rd. No confirmation can be obtained but the date is said to have been given out by high authority.

Montreal, Aug. 20.— It is authoritively stated here today that the Dominion elections will be held on October 22nd.

Premier McBride at Fernie

Fernie, Aug. 18.—Premier McBride arrived in the city today over the Great Northern and spent the afternoon with the relief committee discussing the relief situation and means for further aid. The Premier leaves on the Soo-Spokane flyer tonight on his return trip to Victoria. William Templeman reached here today and remains until tomorrow, looking into the situation.

Ladies Organize

A Ladies Auxiliary at the Brotherhood of Locomotive Firemen and Enginemen was organized on Wednesday evening. Mrs. McCanbley, of Calgary, having charge of the work a large membership. The officers elected for the ensuing year are:—

President—Mrs. A. C. Killins.
Vice-President—Mrs. O. Burge.
Past President—Mrs. Binkley.
Secretary—Mrs. J. Sarvis.
Treasurer—Mrs. Chas. Read.
Collector—Mrs. Chas. Harris,
Chaplin—Mrs. Solly.
Warden—Mrs. Clemmer.
Inner Guard—Miss Annie Wise.
Outer Guard—Miss Martha Wise.

The Ladies of the new auxiliary entertained a large number of invited guests in the lodge room on Thursday evening. Ice Cream and cakes was served, the evening being enjoyed by all present.

Bad MINE EXPLOSION

Seventy miners entombed at Wigan, England

Wigan, Aug. 19.—An explosion occured yesterday in the Maypole coal mine, belonging to Messrs. Pearson and Knowles. The head gear and ventilating apparatus of the mine was destroyed and about 70 of the miners are entombed. Only the smallest hope is entertained of saving the entombed miners.

Temporary repairs to the machinery enabled the rescuers to descend into the adjacent workings, only to find their way blocked by wreckage and gasses. Three dead miners were found and one terribly mutilated but still alive and several dead ponies. Four of the miners escaped alive. A number of the rescuers were overcome by the, fumes and brought to the surface in an unconscious condition. A frenzied crowd of relatives and friends of the entombed miners surrounded the pit mouth tonight anxiously awaiting news.

The search parties this afternoon were driven back by fire. A number of the rescuers were overcome by the fumes from the burning coal but were safely brought to the surface. It will be impossible to make a thorough examination of the workings until the fire has been subdued and the air purified.

Wigan, Aug. 19.—Later—It is not believed a single man of the 70 miners who were entombed by an explosion which occured yesterday in the Maypole coal mine here, survived the disaster. The four men reported rescued yesterday were engaged in an adjoining building. The ventilating fan which was put out of order by the explosion was repaired this morning and the mine having been cleared of gasses, the rescue party again descended.

The sight was horrifying. Not far from the bottom of the shaft 18 bodies were found all frightfully mutilated, legs and arms being blown off and heads battered almost beyond recognition.

The manager of the mine declares that between sixty and seventy men were underground at the time of the explosion and that there is no hope that any one will be brought out alive. The women and children, however, who remained at the pithead all night refused to leave until the bodies of their dead are brought to the surface. Nothing else will convince them of the hopelessness of waiting.

New High Explosive. KRUPP Armour torn to pieces

Munich, Aug. 21.—A new high explosive of a power beyond anything yet used in the German army, was tested here yesterday in the presence of the artillery proving commission from Berlin, representatives of the war ministry, the imperial navy and the fortress and ordinance department, with what are described as sensational results. Three shells,by electricity, tore Krupp armor plates to pieces. The explosive is the invention of Friez Gehre.

Hold-up at Phoenix

Phoenix, Aug. 20.—Crowell's hotel at Midway was held up at 11:50 last night by two highwaymen, who secured about $100 in cash. The two men drove through the town in the evening with a team of horses. As they were nearing the hotel on their return two dogs gave alarm, whereupon they were immediately shot by the robbers. After looting the cash register and the pockets of the proprietor, S. H. Crowell, the desperadoes drove off in the direction of Greenwood. This is the third holdup that has occured in the Boundary during the past month.

Injunction against Coal Co.

Vancouver, Aug. 19.—On the application of S. S. Taylor, K. C., Mr. Justice Morrison this morning granted the application of Andrew Laidlaw for an interim injunction against the Imperial Coal and Coke company, J. W. Pyke and W. H. Evans, from dealing in any way with certain coal leases in the Fording river district now in the name of Pyke.

United Church Entertainment

On Tuesday evening, August 25th, at 5.30 o'clock in the Presbyterian school room an entertaining evening, will be given in aid of the Lord's Day Alliance of the Dominion of Canada. The evening's entertainment will consist of songs, recitations, readings, and new lantern slides projected by electric light. The expectation is that representatives from all the congregations will take part. No charge will be made but a liberal offering is asked for to help a very important cause. The school room can be well aired and the concert begins after the heat of the day has passed. Further notices will appear later.

The Aurora Mine

Now being rapidly developed—Will install a five drill compression plant

Developments are showing in the Aurora mine at Moyie, that are satisfactory and work is progressing at a good rate.

The Aurora Mine is situated on the west side of Moyie Lake, and is supposed to be an extension of the famous St. Eugene and Lake Shore mines which are situated on the east side of the lake. The connecting link between these mines, is being sought for by a company known as the Cambrian Mining Company, who have constructed a cassion from the surface to the bottom of Lake Moyie, who are now sinking a shaft through the rock bed of the lake to the ore bodies which have been discovered by means of a diamond drill. From the extensive and thorough manner in which the prospecting has been done by the various mining companies interested, it is only fair to presume that the ore bodies on the east side of the lake in the St. Eugene and Lake Shore extends under the lake and into the Aurora property, on the west side of Moyie Lake.

The Aurora property, consists of five claims, and were located in 1897, by O. C. Johnson, Carl Neitzell, and Captain Ira B. Sanborn.

The locators found float, then small stringers of ore. These stringers were followed, by means of a tunnel, for a distance of 500 feet. with ore, varying in width from six to eighteen inches. Cross-cuts were driven to determine the width of the vein. A shaft was sunk to a depth of 170 feet, and connected with No. 1 tunnel, Another shaft was sunk, some distance to the south and west, and is down 100 feet, drifts have been run from the bottom of this shaft for a distance of 50 feet in search of the hanging wall. The ore body has been found by cross-cuts to be about 14 feet in width, with a pay shoot of six to eighteen inches of clean ore.

A second tunnel has been started, which will have a vertical depth of 170 feet below No. 1 tunnel, and will be connected by an up-raise with the upper tunnel, also by drifts with the shafts already down. This will give excellent ventilation to the mine.

The ore body, as estimated, has a width of 14 feet, with a pay shoot of clean ore of from six inches to two feet. The entire vein consists of concentrating ore. There seems to be a fault between No. 1 and No. 2 tunnel, with ore above the fault and below, its extent will be demonstrated by drifts from the up-raise as developments progressess.

The clean ore carries values in lead and silver. The concentrating portion of the ledge matter runs low in lead and silver. Assays from the clean ore gives 55 to 65 per cent in lead, and 12 to 14 ounces in silver.

The Aurora mine is being operated by a Moyie syndicate, composed of local business men and miners, who have a firm faith in the future prosperity of the mine. The new company have purchased a five drill compressor plant which will be installed by the first of the coming month. Then the lower tunnel will be driven with a,l possible despatch to where the connections are to be made with the upper tunnel and shafts.

In 1898, Captain Sanborn built a small steamer, to be used on Lake Moyie, for towing ore laden scows from the mine to the railway on the east side of the lake. The former owners were ever confident of striking a large body of ore, as is the present company. Let us all hope that their confidence is not misplaced, and that the Aurora will be a mine second to none in the Kootenays.

Dutch prepare for war

The Hague, Aug. 21.—The Netherlands government is inclined for the present to adopt a waiting attitude against Venezuela, but is ready to take energetic steps whenever the developments demands.

It has been agreed to push all necessary preparations in order to be ready to support an ultimatum should it be decided to forward one to Castro.

Work will be rushed night and day at the naval dockyards to complete the preparations needed by the warships, so that they will be in readiness to reinforce the vessels now in the Caribbean by the end of next month.

Russian Empress

St. Petersburg, Aug. 21.—The health of the empress is again arousing anxiety at the Russian court. She appeared to be greatly benefited by the cruise in the Finnish archipelago, but since her return there has been a re-occurrence of hysteria, general weakness preventing the empress from walking and even from standing. It is said also that she is mentally depressed.

B.C. COAL LANDS

Corbin Coal and Coke Co. to operate in East Kootenay at once

Spokane, Aug. 21.—Seventeen sections, or 10,800 acres of coal lands in eastern British Columbia, within 300 miles of Spokane, will be developed by the Corbin Coal & Coke company, just incorporated in Spokane with a capital of $1,000,000. The incorporators who are also trustees of the company, are D. C. Corbin, president of the Spokane International railway company, and builder of the Spokane Falls & Northern; Austin Corbin, A. H. Sperry, Albert Allen, E. J. Roberts and G. H. Martin of Spokane; Alfred Page, Wardner, Ida.; and J. K. Sherwood of New York.

The lands to be developed are in the Flathead valley, in this province, and have been opened sufficiently to show it is a big proposition.

The articles of incorporation state the objects to be not only to engage in coal mining but to transact all kinds of business, such as building and operating railroads, dealing in timber, developing water power, and in fact any enterprise which it might be desired to engage in at any time in the future. The British Columbia railway company, in which D. C. Corbin and his associates are the principal stockholders, will build a line from McGillvray on the C. P.R. to the property in the Flathead valley 14 miles.

The object is also stated to be to obtain an act of parliament to enable the company to carry any of its objects into effect and to oppose any proceedings which may seem calculated, directly or indirectly, to prejudice the company's interests.

A Letter of Thanks

Victoria Aug. 15, 1908.

J. P. Fink, Esq.,
Mayor,
Cranbrook, B. C.

Dear Mr. Fink:—

In view of the prompt and generous way in which you as Mayor and the Citizens of Cranbrook generally came to the assistance of the sufferers by the fire at Fernie and vicinity I would like to convey to you and to the people of your city the grateful thanks of my Colleagues and myself on behalf of the Province of British Columbia.

On all sides there have been words of commendation for the attitude of Cranbrook in a most trying situation and I therefore cannot allow the occasion to pass without this expression of thanks.

Believe me,
Yours sincerely,
Richard McBride.

Methodist Church

August 23rd,, 1908.)

Services at 11 and 7.30. Sunday School and Bible Classes at 3.

Subject for evening discourse:—
"OUR UNSEEN ANGELS."

Tuesday. The League Social will give place to the united church entertainment to be held in the Presbyterian Schoolroom at eight.

Wednesday. Prayer Service at 8. A hearty invitation is given to visitors to this, and all other meetings in the church.

Members of the Methodist Church coming to the city are requested to call at the parsonage next to the church.

TENNIS TOURNAMENT

The Epworth League Tennis Tournament will commence on September 1st at the court on Armstrong Avenue. Entries for the following events may be made to President R. P. Moffatt at any time before the end of this month. A small entrance fee for those wishing to play will be made for each separate event.

Ladies singles, Gents singles, Ladies doubles, Gents doubles, Mixed doubles, and final doubles.

No entries will be received after September 1st, and the management will be obliged if all intending to take part will give in their names at once. This course applies to the members of the club only.

The usual monthly social of the Epworth League will give way to the united entertainment in the Presbyterian schoolroom on Tuesday next, when songs and readings and a lantern exhibit will be given. The aim is to have every church take some part in the program, the proceeds will be in aid of the Lord's Day Alliance funds.

Presbyterian Church

(August 23rd, 1908.)

Morning service as usual at 11.30, Subject. " The Friendship of David and Jonathan."

Sunday school at 3 p.m.

Short evening service at 7.30.

At both services an offering will be received to aid Rev. H. R. Grant and the Fernie Presbyterian Church. A manse and church are needed right away. Our town was providentially saved. Let us all use this as a thankoffering that our town was spared. Place offering in an envelope indicating that it is for the Fernie fund.

C. O. Main, Pastor.

Senator Templeman

at Cranbrook

Meets Board of Trade And is Banquetted

If the visit of Senator Templeman had any political significance it is a matter of congratulation that it was apparently sunk in the public interest. Certain matters had, in the interest of the city, to be brought before the Senator who is head of the department of mines at Ottawa and in this both parties laid down political differences and went straight for their objective letting politics slide in order to further the more vital and local issue.

At a meeting of the Board of Trade held in the Council Chamber Senator Templeman after hearing Joseph Ryan give some of his experiences in the St. Mary's valley country and listening with every show of interest to facts concerning the iron deposits on Bull river and Baker mountain and the galena and gold copper of the upper part of the Stf Mary's promised, if men and money could be found, to send in the Geological Survey party here in the early future. He gave the most unqualined promise to see that this was done. He also promised to bring the matter of having Cranbrook elevated from a customs subport to the dignity of a port of entry, and also the matter of the Federal building before the minister responsible for those things. Mr. Brock, the head of the Geological Survey department, said that the party would soon be with us, and that the district offered solutions of geological problems that it was essential to have settled between them and the corresponding department of the United States working in the Couer d' Alenes country to the south of us.

The net result of the visit may be summed up in saying we are certain to have the district carefully examined by the members of the Geological Survey department. This may not convey a great deal of meaning to some people, but those who know anything about minerals know how vital it is to have reliable data from independent sources as to geological conditions before mining can be undertaken with any certainty of profitable working. The timber will not last always, and the time is now when we must seek by all means to have matters in train to take up the exploitation of our mineral wealth that lies at our doors.

The Senator was entertained to a most successful banquet at the Cranbrook Hotel at which some fifty sat down. It was strictly non-political, and from first to last there was not a semblance of a discordant note. Once again Cranbrook proved itself a city where all parties and every man stands with his fellows, solidly, shoulder to shoulder, where the thing to be done or carried is for the benefit of the city or the locality. G. T. Rogers made a most excellent chairman, brilliant, tactful and witty. Senator Templeman delivered a capital speech and touched delicately on the legislation passed during the last session at Ottawa. J. A. Harvey, K. C., was at his best in his address to the toast of British Columbia. Joseph Ryan tried his wings in oratory on the mining question He was followed by J. F. Huchcroft in a strong plea for a visit from the Geological Survey department. Dr. King, M.L.A., gave a brilliant review of the salient points of Canadian history. All was over at about 2 a.m., and the true success of the banquet was appreciated to lie more in the cordial spirit born of it than of anything in the eating, drinking or oratorial line that dignified it.

BRADLEY — TISDALE

An event of great interest to their many friends and acquaintances was the marriage, on Thursday evening, of Arthur James Bradley and Miss Annie Leah Tisdale, at the home of Mr. and Mrs. R. A. McBurney. The ceremony by Rev. C. O. Main was quiet and simple, only the immediate friends being present. Later in the evening a few of the close friends of the young couple arrived and showered their congratulations upon them. A very enjoyable evening was spent in various games, after which, a beautiful wedding cake was cut by the bride and was served along with coffee and delicious ice cream. Early in the morning the guests reluctantly withdrew wishing the happy couple every blessing on their married life.

Mr. and Mrs. Bradley are both well known in Cranbrook, and are among our most popular young people, and while Cranbrook regrets losing them it is with the hope that they may be happy and prosperous where-ever they are.

The bride and groom received many tokens of the high esteem in which they are held. The gifts, consisting of cutlery, silver ware, hand painted china, cut glass, linen, etc., Among the gifts was a beautiful cut glass fruit bowl presented to the bride by the members of the Presbyterian Guild of Knox Church, accompanied by an address of congratulation and appreciation of the personal worth and faithful work in the church.

Mr. and Mrs. Bradley left for Vancouver on the "Flyer" on Friday morning leaving behind them pleasant memories, and carrying with them the heartiest wishes of their friends.

LOCAL NEWS

Dr. H. Watt, of Fort Steele was in Cranbrook Tuesday on business.

A. Grez, drove over from Fort Steele Tuesday on business.

G. G. Jewell, president of the Jewell Lumber Company, of Jaffray, was transacting business at Cranbrook Friday.

BORN, at Cranbrook Sunday August 16, to Mr. and Mrs. R. Wark, a daughter.

BORN, at Cranbrook, Sunday August 16, to Mr. and Mrs. T. Rowan, a daughter.

NEWS ITEMS

Lord Strathcona, High Commissioner of Canada in Great Britain, has accepted an invitation to attend the provincial fair at New Westminster in September.

Most of the contractors on the Grand Trunk Pacific railway along the Skeena have established camps and the clearing of the right-of-way along that river is well advanced.

"I do not think that there is a country quite the equal of this great province of British Columbia in the whole wide world for the hunting of big game," says Philipp Oberlander, a noted sportsman of Austria, who is now in B. C.

WANTED.—A girl to do general house work, apply to Mrs. Harry Pettet's residence on Fenwick Avenue

Now comes a dark cloud

C.P.R. Mechanics' Strike

The strike of the mechanics and other workmen of the Canadian Pacific Railway comes at an unfortunate time for this country. It seems to have affected shops extending from coast to coast. While no very accurate statement of the number of men who went out is obtainable, a conservative estimate places it at over 6,000.

The history of the trouble between the company and the men forms rather an involved story. It principally concerns the western divisions. One union claim is that there should be no third-class among the boilermakers receiving 40 cents per hour. The men also object to the increasing of the apprentices in every shop from 20 for every workmen to 25. When an employee has been wrongfully discharged according to the verdict of an investigation, the men claim he should be reinstated and paid for lost time. There is also the question of mechanics in wrecking crews. Yesterday at West Toronto the strikers claimed they had grievances about pay and other things.

Within a few days wheat will be waiting on western plains to be rushed to the sea. Promises of a plenteous yield have made Canadians optimistic, but now comes a dark cloud on the horizon in the shape of a strike. Can Canada afford a strike at such a critical juncture? Does it not remain with authorities high up in the councils of the country to see that some settlement is arrived at, and that soon? The men on strike are those who care for the rolling stock of the company. Consequently the safety of passengers depends to a large extent upon their daily efforts.

Ball Game at Moyie

The Cranbrook baseball team went to Moyie on Sunday last to play a Moyie nine. A large number of Cranbrook rooters and fans went along just to make things lively.

The score was: Cranbrook 20, Moyie 1.

KEEP THEM IN AUSTRIA

Ottawa, Aug. 20.—Dr. Hart and Count von Gagern are in Ottawa to plan if possible, to bring out the thousands of Austrian farmers to the Canadian northwest next spring. They claim the intended immigrants are well educated and are good people and are able to speak English.

Longboat a has-been

Tom Longboat was beaten by Percy Sellen of Toronto in a five mile open race at the police games at Toronto Thursday. Sellen finished 220 yards ahead of the Indian, winning in 26 minutes 26 seconds, last time for a soft track. Flannigan was disgusted and the manager and his protege are said to have parted company.

To prevent Mining Disasters

Three thousand two hundred miners lost their lives last year by accidents under ground hundreds were injured, and heartaches and hardships were brought to those affected.

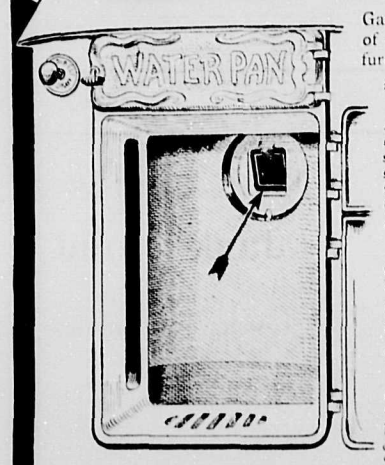
The coal mines of Alberta are already employing many men. With the advent of railway facilities new mines will be developed and thousands more will go down to mine the fuel which has been so conveniently distributed throughout the province. Laws regulating the working of mines must be framed and executed intelligently in order that our record of disaster from accidents may not be attributed to ignorance or neglect.

A convention of experts on the prevention of mining disasters is to be held in Pittsburg next month. Britain has gone into the question very thoroughly, but today's reports of the Wigan disaster show that fatalities are bound to occur. Sometimes these disasters are due to carelessness on the part of the men themselves, but very often ignorance either on the part of the miner or the officials, is responsible for death or property loss.

An experimental station, where tests of gases, explosives, fire damp and other destructive agencies can be carried on. will be in use at the convention, and practical demonstrations can be given and their effects ascertained. This plant is to be kept in operation constantly after the close of the convention, and reports will be issued by the government monthly, giving the result of the observation and tests.

The Alberta government must keep up to the times in all matters pertaining to the safety of the coal miners. We have had comparatively few fatalities so far, but care must be exercised that this hazardous occupation be not rendered even more so by an error of omission on the part of those who have the matter under their control. Calgary Herald.

Heading off a Risk



Gas is liable to puff out of the front door of any furnace unprovided for gas escape.

"Sunshine" Furnace has Automatic Gas Damper directly connected with smoke-pipe. Gas pressure sways damper sufficiently for it to escape up chimney (see illustration), but heat doesn't escape.

What does "Sunshine" Gas Damper mean to "Sunshine" Furnace? Means protection to the furnace parts against evil effects of gas.

What does "Sunshine" Gas Damper mean to "Sunshine" householder? Means furnace can be operated without fear as to "puffing" gas; furnace can be left without doubt as to whereabouts of gas.

What does "Sunshine" Gas Damper mean to "Sunshine" coal account? It means, instead of owner with "ordinary furnace" fear having to keep check-draft indefinitely closed to "let off" gas—when there's two-thirds parts of heat-energy to one part of gas passing up chimney—draft can with all safety be opened, and coal saved for another day's duty. 4

ESTABLISHED 1895

A. B. Grace, PUBLISHER AND EDITOR.

SATURDAY, AUGUST 22, 1908.

AT this writing, says the Calgary Herald, it is by no means certain which side has won in yesterday's strenuous contest, but enough is known to satisfy the public that the Scott government has suffered a great moral, if not an actual defeat. Looking over the battlefield and seeing two, if not three of his cabinet ministers among the slain and Mr. Haultain standing after a valiant fight at the head of about half the members in a house of forty-one, Premier Scott must find it hard to discover any cause for jubilation.

The brutality of the Liberals to Mr. Haultain at the formation of the western provinces will always stand as one of the worst political crimes of our history. For eighteen years he had given the Territories a clean and statesmanlike administration. At great personal sacrifice, on the smallest salary ever paid to a premier ($2,500), he devoted his genius with absolute loyalty, to the public service of a country large enough for an empire. During the whole of his eighteen years' stewardship there was not even a breath of suspician against the integrity of his government. He conducted a purely non-party government and in his selection of colleagues and deputies he leaned more to Liberals than to Conservatives, as witness his association with Messrs. James (now Senator) Ross, A. L. Sifton (now chief justice), G. H. V. Bulyea (now lieutenant-governor), as his ministers of public works, and J. A. Calder as his deputy minister of education (now one of Scott's ministers). What more natural, more decent, more British than that he should be offered the premiership of one of the new provinces? In the language of the west it "was coming to him." But Sir Wilfrid Laurier, upon the advice of small men did the small thing and handed over the honor to a party puppet. The public of Saskatchewan have done what the public of Alberta would have done in a tenfold more emphatic manner—shown their disgust over the turning down of Frederick Haultain, one of the really great men of Canada.

The result in Saskatchewan is a powerful sign of the times. It is a sign of the quiet but unmistakable revulsion of feeling that is working in the minds of all decent men against political indecency. Yesterday's vote of the men of Saskatchewan cannot but exercise a strong influence on the coming dominion elections. That Mr. Haultain and his friends, without money and against the powerful and sinister influences behind Scott, for he was backed up by all the election machinery of the Laurier government, succeeded in making such a showing as they did yesterday is more than encouraging to those who want to see good government in Canada and are tired to death of the hypocrisy and grafting which of late years has characterized so-called Liberal rule.

The Herald congratulates Fred. Haultain on yesterday's results and has no sympathy to express for Mr. Scott and the federal politicians whose tool he has always been. The only pity is that the people of Saskatchewan did not sweep the Scott party and its record clean off the slate.

• • •

It is a stinging indictment that a party entering parliament by the almost unanimous verdict of a province should so disappoint the people that in mere self-defence they feel it incumbent to gerrymander the boundaries of the constituencies and increase the representation to save themselves from being pitched out of power, neck and crop at the next provincial election. But the farmers pay the freight so why consider expense?—Advertiser Lacombe.

• • • •

The Conservatives were able to govern 5,000,000 Canadians at a cost per capita of $8 14. The Liberals are unable to govern 6,000,000 for less than $18 per head. At the next meeting of the stockholders it will be necessary to vote a change of managers. The books show that the more expensive management was the more inferior as instead of reducing the firm's debts, they have been increased $12,000,000.

• • • •

Peck Macswain, has joined the noble army of martyrs. He no longer lingers around the place where the flowing bowl is placed on the counter at a "short bit." He is a "holocaust", also a protectionist. He is fighting fires, "forest fires", not booze fires, preserving the stately and grand forests of the Kootenays for future generations. "Peck" last week was up against the real thing. While working on the fire line, he encountered a bear. A real genuine live bear. "Peck" was armed with a six-pound axe, but he had lost no bear, hence he ran to the nearest pine tree, and climbed and climbed until he was thirty feet from the ground, and the bear. The bear followed "Peck" to the stately pine. Mrs. Bear seemed to have fallen in love with "Peck", or the pine, for she hugged it, then hugged it again, but it was too small for her to climb, and "Peck" was saved the necessity of becoming more intimately acquainted with Mrs. Bruin. Peck, held down his neat in the pine for seven long hours, and now knows "how the world looks to a man up a tree."

$1000 REWARD

The sum of $1,000 will be paid for information leading to the conviction of the party or parties who set the fire that consumed a skidding of logs situated a half mile west of Little's pre-emption and two miles northwest of Wattsburg. The fire was started at about 5:30 p.m., today.

Dated 6th August, 1908.

The Wattsburg Lumber Co., Ltd., Per A. E. Watts.

Black Watch Remarkable for richness and pleasing flavor. The big black plug chewing tobacco. 2267

Beekeeping

An Observatory BEE HIVE

It is safe to say that in no other way can so much practical knowledge be obtained about bees as by observing them working in a normal way through the glass sides of an observatory hive. You will see the bees coming in with their loads of nectar and pollen and depositing them in the cells, the nurse bees feeding the larvae and the comb-builders making comb. You may also observe the queen in her arduous duty of laying two and even three eggs per minute.

One of the best educators of beginners is the observing hive. Very few use the observing hive as a means of acquiring a fair knowledge of the habits of the bee. Books are good, but what you read is easily forgotten, and nothing will impress facts upon your mind as readily as witnessing them. Not only does the beekeeper gain much from his observing hive, but he also interests his neighbors and all who visit him, for very few sciences are as old and as little known as bee-culture.

A thousand little things are absolutely needed to be known if one desires to succeed. All can be made clear by the use of an observing hive. To those who keep bees in the city or country this hive is a source of endless amusement. One cannot conceive the lack of knowledge on the subject of bee-culture among the masses till one shows the observing hive.

HOW TO MAKE IT.

If you are using in your yard a movable frame hive the matter is simple enough. Make the two end pieces, the bottom and cover, the same length and height as your hives in your yard, but only wide enough for three frames of comb. Five inches inside measurement is about right. The sides should be made out of good, clear window glass; this constitutes the body of the hive. The bees enter a tube and crawl through the tube into the hive. The tube is made two and one-half inches wide and one-half an inch high inside measurement and about 20 inches long, or longer if necessary. The hive cover has a hole in the centre two and a half inches in diameter, covered on the under side with wire netting. This hole is for two purposes. If the bees need feeding a pint fruit jar can be filled with syrup, then covered with one thickness of cheese cloth and inverted right on the wire and the bees will do the rest. The other purpose is to ventilate the hive in very warm weather. This hole should be covered with a small block.

HOW TO GET BEES INTO IT.

Of course it would be useless to put a swarm of bees into a glass hive, for a dark hive suits them better. About six days after you have had a swarm go to the parent hive and you will find a number of ripe queen cells, from which queens will emerge in a day or two. Take three frames of hatching brood, with one or more queen cells covered with adhering bees, and place them into hive. Put on the cover and carry to the porch of your dwelling or other suitable place, and adjust your hive in position. Some of the old bees will leave, but those that are hatching will make it their home.

HOW TO PLACE IT IN POSITION.

For best results it is necessary to have on the porch a vine of some sort for a screen. Honeysuckle trained on chicken wire makes a splendid network of foliage that can hardly be improved upon. This wall of foliage is necessary for two purposes it shades the hive, making it comfortable for the bees. The direct rays of the sun, shining through the glass would kill the larvae and drive the bees from the hive. The bees enter the mouth of the tube and crawl to the hive. Very rarely indeed is there a bee to be seen on the porch. You may have your family on the porch at any time without fear of being stung. By observing the hive every day you will learn a great many things about bees that have previously been a mystery to you.—F. G. Herman, in American Cultivator.

Try Preventics, At My Risk With Book on Colds.

Just to prove merit—to show you how quickly Preventics can and will check colds or the Grippe—I will mail you free on request these samples and my book. Simply address—Dr. Shoop, Racine, Wis. Preventics are thoroughly harmless little Candy Cold Cure tablets. No Quinine, no laxative, nothing sickening whatever.

To check early Colds or Grippe with "Preventics" *means sure defeat for Pneumonia.* To stop a cold with Preventics is surely safer than to let it run and be obliged to cure it afterward. Preventics will however reach a deeply seated cold. But taken early—at the sneeze stage—they break or head off these early colds. That is surely better—that is why they are named "Preventics." Promptness however is all-important. *Promptness in the use of* Preventics may save half your usual sickness. Feverishness, night or day, with child or adult, suggests the need of Preventics. Write Dr. Shoop, Racine Wis., today for samples and booklet. Preventics are sold by

BEATTIE & ATCHISON.

SPOKANE Interstate FAIR

Ore Display — Drilling Contests

The liberal awards made in this department in 1907 brought out a very creditable exhibition, and the same awards will be made again this year, in hopes of bringing out an even better display.

Freight will be paid on all ore samples sent in which are billed to the Spokane Interstate Fair, and which are allowed to remain in the Permanent Display at the Fair Grounds, but no express charges will be paid.

The Rock Drilling contest put on in 1907 was such a success that it will be held again for more liberal purses, and a large entry list is expected.

CLASS 1—ORE DISPLAYS.

The Spokane Interstate Fair will give a handsome Silver Trophy Cup, valued at $100.00, for the best general display of Mineral exhibited by any one Camp or District, variety, quality and arrangement to be considered.

The Spokane Interstate Fair will also give a Silver Trophy Cup, valued at $25.00, to each seperate Camp or District represented, which Cup will be awarded to the mine in each Camp or District making the best individual showing, variety, quality and arrangement to be considered. No cup will be awarded to any mine unless it has competition from the District which it represents

The Spokane Interstate Fair will also award Diplomas to any meritorious exhibit not receiving any of the above prizes.

CLASS 2—MISCELLANEOUS.

For the handsomest and most unique Cabinet Display made by any one *individual*, a cash prize of...$25.00
For the best topographical map of any Mineral District or Camp, a cash prize of $10.00

In both above lots, Cabinets and Maps having won prizes at this Fair in 1907, will be excluded from competition, but may be entered for exhibition only.

Class 3—Rock Drilling Contest.

The Spokane Interstate Fair will give a Purte of $1,250.00 for three Rock Drilling Contests. This money will be divided as follows:— $1000 for a double hand contest of which $750 is for first prize and 250 for second; $200 for a single hand contest, of which $150 is for first and $50 for second;6 for a Boy's Drilling Contest, for boys 15 years old or under, of which $40 for first and $10 for second.

The following rules will govern these contests: Competition open to all; entries close on October 5 at noon. An entrance fee of $15 per man will be charged in each contest, and $10 of this will be returned to each man who drills. Any one entering and not drilling will forfeit *entire entrance fee.* No entrance fee for Boys' contest. Time allowed in two hand contests will be 15 minutes in single hand contests 10 minutes; *for Boys' contest 5 minutes.* All tools must be furnished by contestants; drills for two hand contest to caliper ⅞-inch at bit and at point 3 *inches back of bit;* drills for single hand contest to caliper ¾-inch at bit and at point 3 inches back of bit. Boys to drill with ¾-inch *steel. Drills may be swedged* for three inches back of bit, but must caliper full measurement at bit and at point 3 inches back of bit. Any *weight of hammer* allowed. Two assistants will be allowed to each team in two handed contests, one to coach and one to look after water; *only one assistant allowed in single* hand contests; under no circumstances are assistants allowed to assist in changing drills. The Spokane In*terstate Fair will furnish* the best granite obtainable for this contest; if possible, same will be procured from Gunnison quarries. Con*tests will commence on* Monday, October 5, and continue throughout the week, and will be put on either at night or in the day time, at op*tion of Fair management.*

If interested write to Robt. H. Cosgrove, 218 Hutton Block, Spokane, Wash., for complete copy of *rules, etc.*

MINSTREL'S COMING

Prepare to shelve melancholia, and get your laughing apparatus in working order, for those funny, funny fellows, the Minstrels, are coming to town, and this time it is the largest one on the road. Richarda & Pringle's; guess you know them, for they have been coming here for years. Don't wait now till the last minute to get your tickets, and then meet with disappointment, because you remember perhaps what a bumper house they drew the last time they were here, and the crowds they turned away. Maybe you were one of the disappointed ones. Then if so, profit by your experience and buy your seats early; They will be placed on sale today at Beattie & Atchison's. They have a big troupe this year, forty people.

There will be a big parade at noon, and unless you watch yourself the band will make you forget your dinner, because it's the best ever. Wednesday, August 26th is the date of their appearing at the Auditorium

Cures Woman's Weaknesses.

We refer to that boon to weak, nervous, suffering women known as Dr. Pierce's Favorite Prescription.

Dr. John Fyfe one of the Editorial Staff of THE ECLECTIC MEDICAL REVIEW says of Unicorn root (*Helonias Dioica*) which is one of the chief ingredients of the "Favorite Prescription":

"A remedy which invariably acts as a uterine invigorator * * * makes for normal activity of the entire reproductive system." He continues "in Helonias we have a medicament which more fully answers the above purposes *than any other drug with which I am acquainted.* In the treatment of diseases *peculiar to women* it is seldom that a case is seen which does not present some indication for this remedial agent." Dr. Fyfe further says: "The following are among the leading indications for Helonias (Unicorn root). Pain or aching in the back, with leucorrhœa; atonic (weak) condition of the reproductive organs of women, mental depression and irritability, associated with chronic diseases of the reproductive organs of women; constant sensation of heat in the region of the kidneys; menorrhagia (flooding), due to a weakened condition of the reproductive system; amenorrhœa, suppressed or absent monthly periods, arising from or accompanying an abnormal condition of the digestive organs and anæmic (thin blood) habit; dragging *sensations in the extreme lower part of the* abdomen."

If more or less of the above symptoms are present, no invalid woman can do better than take Dr. Pierce's Favorite *Prescription, one of the leading ingredi*ents of which is Unicorn root, or Helonias, and the medical properties of which it most faithfully represents.

Of Golden Seal root, another prominent ingredient of "Favorite Prescription," Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago, says:

"It is an important remedy in disorders of the womb. In all catarrhal conditions * * *and general enfeeblement, it is useful."*

Prof. John M. Scudder, M. D., late of Cincinnati, says of Golden Seal root:

"In relation to its general effects on the system, *there is no medicine in use about which there is such general unanimity of opinion.* It is *universally* regarded as *the* tonic useful in all debilitated states."

Prof. R. Bartholow, M. D., of Jefferson Medical College, says of Golden Seal:

"Valuable in uterine hemorrhage, menorrhagia (flooding) and congestive dysmenorrhœa (painful menstruation)."

Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the diseases for which they are recommended.

A cup of BOVRIL is a fine tonic in any season, but it is valuable in many other ways. A little added to Hashes and Stews greatly improves their food value. Try it when warming Canned Meats.

The Fun Starts

"Lion Brand"

The Fun starts at the opening of school, and then look out for the lively boy. He wants to look decent all the time but he has got to have his fun and the care of his clothes is a secondary matter; try the Lion Brand of Boys Suits and Knickers and you will get the best on the market. Coats are made with French facings which gives them a solid and lasting appearance—Knickers have have double seats and double knees—double sewn seams and linings boxed in—nothing on the market to equal them, and the price is no higher than what you pay for inferior goods. Once a customer always a customer.
