Mr. and Mrs. H. W. R. Moore and daughter, Nancy, motored to Penticton on Monday morning, returning Tuesday afternoon.

Around Home

A new dentist is expected in Greenwood in about ten days time.

The Ladies Hospital Auxiliary will hold a dance in the Masonic Hall on Friday, August 27th.

Mrs. G. B. Taylor is spending this week the guest of Mrs. Geo. Inglis at the Bell mine, Beaverdell.

Miss Vera Walmsley returned on Thursday morning last from a visit to Mr. and Mrs. T. E. Alty in Trail.

Mrs. S. A. Alty and granddaughter, Gladys, of Trail, are the guests of Mr. and Mrs. Wm. Walmsley.

R. Lee and G. Boag returned on Thursday last from doing assessment work on their claims at Lightning Peak.

Mr. and Mrs. R. Dodd and two children and Mr. and Mrs. Geo. Clerf and son, spent a few hours in Penticton on Sunday.

J. G. Brown, district resident architect, was in town on Sunday and expressed himself as well satisfied with the Public Building here.

Miss Mabel Johnson, of the Greenwood Restaurant, successfully underwent an operation for appendicitis today (Friday) in the District Hospital and is doing very nicely.

Dr. A. J. Dorman, dentist, left on Sunday for Kimberley where he has opened an office. The Doctor made many friends during his stay in Greenwood who regret his departure.

The streak of light across the sky on Tuesday night was the Northern Lights according to a local astrologist. The light was further south than usual and was noticed by many citizens.

Allan A. Morrison returned on Friday from a few days visit to Spokane. He was accompanied on the return journey by Elmer Swanson who caught the train here on Saturday for his home in Princeton.

The committee of the Eastern Star hospital fund are holding a dance at Biner's, Christina Lake, Aug. 4th, to raise funds for the hospital ward, Grand Forks. Tickets $1.00 including supper. Everybody invited.

Mrs. Oliver and daughter, Eileen, of Trail, were renewing acquaintances in town on Wednesday on their way to Vancouver by motor where they will visit for a couple of weeks. They were accompanied by Jack Oliver, jr.

Mr. and Mrs. Fred Hopkins and daughter, Alice, spent Friday night in town the guests of Mrs. Hopkins' parents, Mr. and Mrs. Mark Christensen. They were on their way home to Trail from a motor trip to Yakima, Wash., where Miss Gwen Hopkins is a nurse in training.

Mr. and Mrs. H. J. Purkis have bought the McCurrach residence, the deal being consumated by Charles King, real estate agent, on Wednesday. Mr. and Mrs. Purkis were able to move into their new home as their furniture had arrived this week via the Panama canal from England.

A. J. Morrison was down from the Wellington for a couple of days this week and reported that a new lead had been encountered in this mine. Al was putting in a sump in a drift made by J. D. Morrison and W. Youngston, former leasers, when he struck some high grade ore which has a width of about 16 inches.

P. H. McCurrach arrived in town on Tuesday and left on Thursday morning with Mrs. McCurrach and three children, by motor via Spokane for their new home in Cranbrook. The McCurrach family will be greatly missed in Greenwood, as they took a very active part in the social, athletic and church life of the town. Their many friends wish them much happiness and prosperity in their new place of residence.

O. B. Smith Formerly Of Phoenix is Dead

Vancouver.—A resident of this province for more than 30 years, and a well-known mining engineer, Oren Barron Smith, mining superintendent of the Granby Consolidated Mining, Smelting & Power Company Limited, for many years, residing at 4675 University avenue, West Point Grey, passed away at 7 a.m. on Wednesday.

Born in Palmer, Mass, Jan. 26, 1874, Mr. Smith was educated in the Palmer High School and the Wesleyan Academy, and later at Williston Seminary at East Hampton, Mass. In 1897 he graduated from the Boston Technology with the degree of Bachelor of Science. Two years later he joined the Granby C. M., S. & P. Co. Ltd., and became their superintendent of mines at Phoenix in 1904. Four years later he was promoted as the company's superintendent of all mines, and in the same year acted as assistant to the United States deputy mineral surveyor at Spokane. His death will be keenly felt by his many friends and members of the profession. Besides his wife, the deceased is survived by two daughters. At the time of his death Mr. Smith was engineer in charge of the Gleaner Consolidated Mining Company at Atlin, and was preparing to install additional machinery at the mine. Interment will be in the family plot, Ocean View Cemetery on Friday.

Midway News

The Farm Women will give a dance on Labor Day. Notices later.

The W. I. will meet on Saturday, Aug. 7th. Members please take notice.

Mrs. H. Pannell and children expect to leave for Vancouver on Sunday morning.

Born—At Vancouver on July 16th, to Mr. and Mrs. Ewart McMynn, a daughter.

The many friends of Mrs. J. Richter will be glad to know that she is much improved in health.

Henry Strauss has been confined to his home suffering from shock following a fall from a load of ties.

Silver Miners Get "Dolled Up" for Film

There was much tittering from the onlookers as several hundred miners in the silver mines of Idaho's Coeur d'Alenes appeared at work some time ago "all dolled up" in grease paint, rouged lips and penciled eyebrows. But it meant real money to them because they were to work for the movies in the filming of "Frivolous Sal." And so they went grimly before the cameras, wielding pick, shovel and electric drill regardless of the jibes hurled at them by friends on the sidelines. The scene provides an interesting sidelight as to how silver is mined, as well as a step to the climax of this thrilling picture of early mining camp life. Eugene O'Brien, Mae Busch, Tom Santschi, Mitchell Lewis, Mildred Harris and others for the cast. The picture will be at the Greenwood Theatre on Saturday, July 31st.

Arthur Graham and son Wesley, the Misses Sylvia and Iris Ashwell, Clarence Ashwell and Clarence Bradshaw returned to their homes in Chilliwack on Saturday after a few days visit with Mr. and Mrs. Geo. Clerf.

At a meeting of the Ladies Hospital Auxiliary on Wednesday evening Mrs. P. H. McCurrach was presented, on the eve of her departure for Cranbrook, with two pyrex dishes as a token of high esteem in which she is held by the members and other ladies in Greenwood. Mrs. McCurrach was the president of the Auxiliary and carried on her duties in a very efficient manner. Miss L. Bawtinheimer made the presentation and was fittingly replied to by Mrs. McCurrach.

Grote Stirling Again Chosen

Grote Stirling, of Kelowna, was the unanmious choice of the Yale Conservatives to contest the riding in approaching election at a convention of 186 delegates held in Penticton on Monday night. Rumors of another candidate contesting the nomination did not materialize and Mr. Stirling's name proposed by Dr. O. Morris of Vernon and A. S. Black of Princeton, was the only one brought before the convention. Mr. Stirling was warmly greeted by the large gathering and in a brief speech expressed confidence in a Conservative victory throughout the country.

Beaverdell Briefs

Col. C. S. Baker left on Monday for Nelson where he hopes to establish an assay office.

Mr. and Mrs. E. C. Lutner returned on Sunday from a week's trip to Spokane and other points.

Miss Elsa Olson, of Greenwood, has returned to her home after a ten day visit with Mrs. Ted Clarke.

Miss Esther Nordman has arrived from Nelson and is the guest of her sister, Mrs. C. H. Clegg, Sally mine.

Master Tommy Holmes, of Trail, a former resident here, is spending his holidays as the guest of Trapper Smith.

Alex McPhee is working on the Bounty claim, recently given up by the Federal Company, and is shipping some very fine ore this week.

The many friends of Mr. and Mrs. Pat Crane were glad to see them back in the camp over the week-end, after an absence of almost a year.

Mr. and Mrs. Barrett Clayton motored up from Seattle last week and are spending some time visiting the former's father, Walter Clayton.

Miss Ethel Sheffield is the guest of Mrs. J. Drum, Bell mine, for a few days, while enroute to her home in Toronto after several weeks visit at the coast.

Mr. and Mrs. Harrow and three children arrived last week from Scotland and have taken up residence in town. Mrs. Harrow is a daughter of David Smith, well-known oldtimer in the district.

A. W. Lutner and family, of Vernon, have been the guests of Mrs. A. Lutner, at the Beaverdell Hotel, for the past ten days and have left for a visit to Kettle Falls, Wn., before returning to their home.

Mr. and Mrs. C. Crossley left on Monday for their home in Nelson. Mr. Crossley has been here for the past two weeks overseeing the work of installing the new engine and compressor at the Revenge mine.

Mr. and Mrs. Reid Johnston left on Tuesday morning for Coalmont, to which station Mr. Johnston has been transferred. Reid was a very popular agent here and his many friends are sorry to see him leave.

The Chrysler Syndicate, now working the old Revenge property, have put on several men this week, and with the new plant working smoothly, hope to be shipping ore shortly. The showing is very encouraging.

R. L. Clothier is on a business trip to the coast and expects to be gone about ten days. During his absence J. D. Morrison is in charge of the Beaver, which is looking better all the time, some fine new ore being recently uncovered.

Tommy Crowe and Carl Carlson had a collision on the "hill" on Sunday, just above the Sally cook house, which crippled both Fords badly but did not hurt the occupants. Brush growing high on either side of the road prevented them from seeing each other.

RED ROSE TEA
"is good tea"
Red Rose Orange Pekoe is extra good. Won't you try it this time?

Have a Hobby

Among the many excellent features of that splendid organization, the Boy Scouts, is the encouragement and development of hobbies. It was recognized by the founder of the Boy Scouts that boys of a certain age invariably group together for their activities, whether in play or work; that the "gang" spirit prevails. And almost without exception these boys individually have some hobby which to them is of absorbing interest and arouses their enthusiasm, although to others it may appear quite unimportant, even futile.

It is part of the Boy Scout programme to encourage boys to adopt some hobby that is really worthwhile, one that appeals to them, and to then help them to develop a hobby to a point where it will prove of real value to them and to their fellow men. Thus the Boy Scouts offer badges for efficiency on the part of its members for an almost inconceivable number of things.

Life is full of instances of men and women who have developed their hobbies to a point where they became the real passion and business of their lives, resulting in important discoveries and inventions and bringing untold blessings to the world, as well as fame and often fortune to the hobbyist.

George Eastman, the Kodak inventor and manufacturer, was a bank clerk and, preparing for a holiday trip, he decided to take pictures of places visited to send home to his widowed mother. In those days, half a century ago, amateur photographers were few in number because the paraphanalia required was bulky and crude and the work of picture taking, developing and printing difficult. Eastman thought it could be simplified and in his spare time in his mother's kitchen made photography his hobby. The result is well known.

Luther Burbank's hobby was horticulture, and he amazed the world with his achievements in the development of new plants and flowers and in demonstrating how they could be improved in size and beauty. Jack Miner, Thompson-Seton, and others have made the life and habits of birds their hobby, with the result that mankind has learned how much we owe to the feathered folk, and how, without their help, destructive grubs, worms and insects would soon play havoc with gardens, orchards and our food supplies. Another man, Johnston by name, within the past twelve years has, as a hobby, grown all kinds of tropical and sub-tropical trees and plants with the result that he has proven that many things which the United States now imports from foreign lands to the extent of hundreds of millions of dollars can be raised at home.

Many a boy has a mechanical turn of mind which soon finds expression in some form of hobby and which, if rightly directed, encouraged and developed, may point to the occupation in which he may find the greatest enjoyment and success in life.

But apart from hobbies of this character, it is well that the business and professional man and woman should have a hobby. It should be something distinctly different from that of their everyday occupation. Thus the professional and office man will find health, recreation and downright pleasure in devoting his spare time to the development of some hobby that takes him out doors and calls for the use of his hands rather than the concentration of his mental faculties.

There is, fortunately, a growing realization of the value of hobbies, although they are not always classified as such. Service clubs in all cities are more and more turning their activities in the direction of helpful, humanitarian service. Thus we find these Club members making a real hobby out of providing outings for orphaned, under-nourished and crippled children, and finding as much pleasure in doing so as they provide for these little unfortunates.

Hobbies there are such as the collecting of stamps, coins, antiques, china, pictures and other articles too numerous to mention. These all have their value in freeing the mind from too close and constant application to business affairs and worries, even though they may not result in adding anything very worthwhile to the lives of others and the advancement of the world.

The main thing is to have a hobby. Parents should encourage their children in this direction and carefully refrain from ridiculing what may seem rather silly and purposeless to them. Sympathetic study of a child's hobbies may give a valuable indication of the direction which such child's training should be given.

The Dangerous Speed

Forty-five Miles An Hour Most Dangerous Motoring Speed In Doctor's Opinion

Forty-five miles an hour is the most dangerous speed for motorists, it was stated at an inquest in England by Dr. Eric Gardner, who has been keeping tab on automobile accidents for years.

When there is a crash at 90 miles an hour, the rider generally escapes with a few bruises, the doctor explained, his contention being that this was due to the fact that the person's body usually was thrown with such force that it "skipped" or hit the ground, rather a glancing blow and rolled more or less.

But if something happened when travelling at 45 or '0 miles an hour, Dr. Gardner said, the victim generally was tossed in such a manner that he often landed on his head, suffering serious injuries or death.

"Why do churches take up collections?"

"Need funds, I guess."

"Not at all! They don't want to make people good for nothing."

Display Canadian Emblem

Kiwanis Club in New Jersey to Place Canadian Colors Alongside Stars and Stripes

The Canadian emblem is to be displayed beside the United States flag at all meetings of the Kiwanis Club at South Orange, N.J.

The maple leaf banner was presented to the club recently by George H. Becker, president of the town council, in appreciation of the courtesy and hospitality shown him on his recent trip through Canada as a representative of the local club.

In Canada, Mr. Becker said, United States and Canadian flags were displayed side by side at Kiwanis meetings.

The club sang "God Save the King," after the presentation and the emblem was received by Captain George Edmison, world war veteran, formerly of Brandon, Man., and now pastor of the South Orange Presbyterian

Germany's Emergence

Forcibly disarmed amongst neighbors big and small still armed to the teeth, the German race is becoming potentially stronger than ever. How can they be kept for many years more under any kind of foreign dictatorship or tutelage? How can they be denied their demand for civilized equality in every respect? It cannot be done.—J. L. Garvin in London Observer.

On Treasure Hunt

Major B. A. Logan, manager of the mapping division of the Fairchild Aerial Surveys, has left New York for a treasure hunt in Nova Scotia, which, he said, may net him at least $100,000 and perhaps $2,000,000. The treasure was the cargo of a French pay ship which fell into the hands of the English off Cape Breton Island about the year 1700.

Mount Fryatt Conquered

One of the Highest Peaks in Athabasca River Section Has Been Scaled

Mount Fryatt, one of the highest and most formidable peaks in the Athabasca River section of the Canadian Rockies, has been scaled by Howard Palmer, of New London, Conn., and Dr. J. W. Hickson, of Montreal.

This mountain with precipitous shale slopes on one side, and great glacier fields on the other, had hitherto resisted all attempts to conquer it, and in recent years it had been placed in the category of those peaks which it was thought would never be climbed.

In several ways the climbing of Fryatt is unique. It was accomplished under severe handicaps, the hardest of which was caused by the pall of smoke from forest fires to the south. This smoke practically blanketed the valley and slopes and reduced visibility. In spite of this fact, however, the climb was accomplished in record time.

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVILINE

"My testimony should convince anyone that 'Nerviline' is a splendid preparation to use on swelled joints. Rheumatism left me badly crippled," writes Amos F. Fleury, from Kingston. "I went to McKay's Drug Store and they recommended Nerviline, which restored me completely."

For Rheumatic pains, Lumbago, Sciatica, you will get lasting satisfaction from a 35c bottle of Nerviline. Sold everywhere.

Enjoy Life In Siberia

German Army Officers Taken Prisoners By Russians Refuse To Be Repatriated

More than two hundred former German army officers and men, taken prisoners by the Russians during the war and exiled to Siberia, like the frozen wastes so well that they refuse to come back.

This is revealed in a statement of the German Government which denied reports that the Soviet Republic was detaining the Germans in Siberia against their will.

Since 1923, the statement continues, the government has offered each exile free transportation back home. In three years only fifty have taken advantage of the offer; while two hundred and sixteen have become Russian citizens. All have settled on farms and earning a good living.

Find Missing Link

Explorer Secures Photographs of Strange Tribe in Philippine Islands

Photographs of what their owner, J. Wetteroold, stated were specimens of a tribe of about 200 "missing links," which he had discovered in a remote district of the Philippine Islands, were exhibited in Victoria, B.C., when he arrived from Chile. Mr. Wetteroold is said to be a Swiss scientist. Wetteroold said he had secured the pictures with great difficulty, after remaining for seven days among the tribe of hill men. One of the photographs was of a woman who apparently had a tail-like continuation of the spine.

The tribesmen, according to Wetteroold, refused to pose for pictures, and those which he managed to take were snapshots secured while the subjects were unaware of his actions.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Director of Fox Breeders

Matthew Snow, of Winnipeg, was elected western director of the Canadian Fox Breeders' Association in convention at Summerside, P.E.I. P. J. Clark, of Summerside, was elected president.

Asthma!
Spread Minard's on brown paper and apply to the throat. Also inhale. Quick relief assured.
MINARD'S "KING OF PAIN" LINIMENT

Radio In Canada

Six Plants In Canada Engaged in the Manufacture of Radio Equipment

Production in Canada of radio apparatus including sets, parts and batteries reached a total value of $5,548,659 in 1925, according to a recent statement issued by the Canadian Government bureau of statistics at Ottawa. Six plants in Canada were engaged solely in the manufacture of radio sets or parts, nine other concerns made sets and parts in conjunction with the manufacture of other electrical apparatus and 12 of the manufacturers of batteries in Canada reported an output for radio purposes.

Statistics for 1925 show a substantial growth in the radio industry during that year and also reveal a tendency toward the production of complete sets rather than the manufacture of separate parts. In 1925 the number of complete sets manufactured by these companies was 48,498 and the selling value, f.o.b. works, was given as $2,196,024. Production of vacuum tubes amounted in value to $1,299,684 and was double that of the previous year.

Radio licenses were issued by the department of marine and fisheries during the twelve months ending March, 1926, to 134,486 persons. Ontario led all provinces with a total of 60,110; Quebec was next with 21,141. Registrations in the other areas were as follows: Saskatchewan, 15,944; Manitoba, 14,503; British Columbia, 4,494; Alberta, 7,152; Nova Scotia, 3,288; New Brunswick, 2,612; Prince Edward Island, 202; Yukon, 23; and the Northwest Territories, 17. Licensed broadcasting stations, not including amateurs, numbered 55, distributed as follows: Ontario, 24; British Columbia, 10; Saskatchewan, 7; Alberta, 6; Quebec, 4; Manitoba, 2; New Brunswick and Prince Edward Island, 1 each.

SOME SYMPTOMS OF THIN BLOOD

Everybody Should be Able to Recognize Them Because Early Treatment is Important

Anaemia, or lack of blood, is a stealthy disease and is often quite advanced before it is recognized. It is much easier to correct in its early stages, but if unchecked causes weakness, loss of weight, lack of vigor and ambition.

Some symptoms of anaemia are loss of appetite, indigestion, headaches, sleeplessness, shortness of breath after slight exertion, and often extreme nervousness. If you have any or all of these symptoms begin treatment now with Dr. Williams' Pink Pills, the tonic which will make the blood rich and plentiful. Every part of the body will respond to this treatment as is shown by the case of Mrs. Isaac Bell, Sr., Port Anson, Ont., who says:—"A few years ago I was a very sickly woman. I was all run down and my nerves badly shattered. I had taken doctor's medicine, but as I got no help from it, I tried other medicines, but with no better results. One day while reading a newspaper, I came across an advertisement of Dr. Williams' Pink Pills describing a case very much like my own. I decided to try them, and by the time I had taken two boxes I could feel the benefit I was getting from them, so I cheerfully continued the treatment and was soon a well woman in better health than I had enjoyed for some years. In view of what Dr. Williams' Pink Pills have done for me I cheerfully recommend their use to all weak, run-down people."

Dr. Williams' Pink Pills are sold by all druggists, or may be had by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont. A free booklet, "Building Up the Blood," will be sent to any address on request.

More Wheat This Year

Predicted World's Output of Wheat Will Show An Increase

Prospective wheat production this year in twelve countries, producing 63.5 per cent. of all wheat in the northern hemisphere last year, exclusive of Russia and China, is placed by latest estimates at 1,897,000,000 bushels, compared with 1,880,000,000 bushels last year.

Production in European countries is expected to be smaller than last year, but the decrease is more than offset by prospective increases in the United States, the department of agriculture announced in making public estimates from abroad.

Canada Protects Railways

The custom of American manufacturers of automobiles to drive new cars across the Canadian border has aroused the customs department at Ottawa, the officials of which maintain that this is a discrimination against the railways that should be stopped. They say it is not only unfair to the railways, but if allowed to continue would cause congestion in the highways at times.

Life is an uphill road if you happen to be going in that direction.

Minard's Liniment for Rheumatism

The fly family learns the shortest distance between two points

GERMS—6,000,000 germs on a single fly, says a noted health officer. Protect your family with Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills *all* the insects—and does it quickly. Get a Flit can and sprayer today.

Will Be Presented With Medal

Scottish Scientist To Be Honored By American Chemical Society

Sir James Irvine, principal of the University of St. Andrew's, Scotland, since 1921, and a member of the advisory council, department of scientific and industrial research, has arrived in Canada. The object of his visit to this continent is to receive the Willard-Gibbs gold medal from the American Chemical Society. The last scientist of note to whom this medal was awarded was Madame Curie. Although Sir James was of inestimable value to the British Government during the war on account of his studies and discoveries of antidotes for poison gas, the American Chemical Society is presenting him with its high token in recognition of his valuable researches on sugar—principally dealing with starch—and celluloise. The presentation is to take place in Chicago, September 17.

Minard's Liniment for Burns

Question Of Naturalization

This Matter is to Come Before the Imperial Conference

The fact that Canada was the only Dominion that had failed to reply to a circular from the Dominions' office relating to the naturalization of children of British subjects born abroad during the war, was mentioned in the British House of Lords by Lord Desborough.

Replying to a question he stated that nationality having become a subject of imperial importance, it would be placed on the agenda of the imperial conference.

Will Develop Oil Lands

The Hudson's Bay Company has issued a statement announcing that an arrangement had been reached for the exploration and development of the company's oil rights in Canada. The arrangement is with E. W. Marland, and a company will be organized to be known as the Hudson's Bay Marland Oil Company. Arrangements for a complete geolgical survey of the land in question already are under way.

International Territory

North Pole in the Midst of the Arctic Sea and Not on Land

The North Pole is international territory, and no nation could make an individual claim to it, Roald Amundsen, the Norwegian explorer, said in response to a question put by the Aften Pesten, of Copenhagen. He had received the following from the newspaper:

"Was it Peary, Byrd or Amundsen who annexed the North Pole?

Amundsen replied:

"The Norwegian expedition proved the North Pole not to be situated on land, but on a sea, and as the Arctic Ocean has been proved to be international, no individual nation, Norway, the United States nor any other, could say it had annexed the North Pole."

Relieves Asthma at Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Poor Boys' Road to Fame

Is the country reaching a state in which it will be necessary to put it that any poor boy can aspire to high office provided he can first become a rich man?—Boston Transcript.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

When a bachelor does find his ideal woman it may be only to discover that she is looking elsewhere for her ideal man.

A man never really knows the value of a dollar bill until he is followed by a persistent collector.

Candy That Looks Sweet
When candy looks tempting it will sell readily. When its richness is enhanced by an Appleford wrap it will be in greatest demand.
Here are four kinds of Appleford wraps:
1. Twisting Tissue that resists tearing.
2. Softer tissue for caramels. Keeps its shape when folded.
3. Transparent wraps that reveal richness of taffy and butter scotch.
4. Wax coated liners

Scientific Research

Persistent Application of Scientific Methods to Greatly Benefit the Country

Canada cannot expect to make the most of its opportunities and its great natural endowments unless it follows the example of other countries and pays more attention to scientific research. It is interesting, therefore, to see certain signs of progress along this line. The members of the Canadian Pulp and Paper Association have lately made an arrangement with McGill University in Montreal for co-operation in celluloise research work. The association will erect a $350,000 building on land leased at a nominal figure from McGill, and the association and the department of industrial and cellulose chemistry of the university will co-operate in laboratory work, including experimental processes for making artificial silk. The university will study the fundamental problems and the association will apply the knowledge thus gained to specific industrial conditions in Canada.

This is the sort of initiative and aggressive attack on industrial problems that has stimulated production in other countries. Success in this particular line of research would greatly increase the aggregate value of our forest products.

It was also announced a short time ago by Dr. MacLean, president of Manitoba University, that important progress had been made in developing a rust-resisting wheat. This is something in which the west is immensely interested, since the rust has reduced the value of the wheat crop by many millions in recent years.

Individual industries and the country as a whole stand to gain enormously from the persistent application of scientific methods in solving the problems incident to Canada's economic development.—Free Press.

The Tactful Victim

He.—"Do you want to marry a one-eyed man?"

She.—"No, why?"

He.—"Then let me carry your umbrella."

One reason the majority of women do not take any stock in the wisdom of Solomon is because they have heard that he had 700 wives.

While a pretty woman may not care to be brainy, a brainy woman always wants to be pretty.

RUN-DOWN AFTER BIRTH OF BABY

Ottawa Woman Made Strong by Taking Lydia E. Pinkham's Vegetable Compound

Ottawa, Ontario.—"I was terribly run-down after the birth of my third baby. I had awful bearing-down pains and was afraid I had serious trouble. I was tired all the time and had no appetite. My sister-in-law is taking Lydia E. Pinkham's Vegetable Compound and cannot praise it too highly and asked me to try it. I have had splendid results and feel fine all the time now. Any one who needs a thorough pick-me-up soon learns from me what to take."—Mrs. RENE PAQUIN, 320 Cumberland Street, Ottawa, Ontario.

Terrible Backache

Hamilton, Ont.—"After my baby was born I had terrible backache and headaches. I could not do my work and felt tired from the first minute I got up. But worst of all were the pains in my sides when I moved about. I had to sit or lie down for a while afterwards. I could keep my house in order, but many things had to go undone at the time, because of my ailments. I was told by a neighbor to take Lydia E. Pinkham's Vegetable Compound, as she said it would build me up. I was relieved before I had taken the first we bought and have not had any trouble like it since."—Mrs. T. MARKLE, 115 Ferguson Avenue South, Hamilton, Ontario. C

Observatories For Greenland

U. S. Weather Bureau to Establish Stations to Study Weather Conditions

The United States weather bureau is co-operating with the University of Michigan in a reconnaissance expedition to locate sites for weather observatories on Greenland's inland ice-caps, it has just been announced by the department of agriculture.

Information to be gained at these observatories may throw much light on the formation of the severe storms which sweep the North Atlantic steamship lanes, it is stated.

The full text of the department's statement follows:

"Greenland's icy mountains, famed in the century-old hymn, are in reality one immense flat ice-cap extending two miles above sea level and spread over a base of rock surface for hundreds of miles. Except for the margin along the coast, which is rough and broken like other Arctic ice formations, this ice is, so far as known, so smooth that an aeroplane could land on it almost anywhere without difficulty. It has been represented by some that the special contour of this ice-cap causes the cold winds that form above it to develop hurricane velocities, and that they are influential in carrying many of th esevere North Atlantic storms that take heavy toll of life and shipping.

Scientists feel that meteorological observations should be taken at points where these winds originate, and such may ultimately be of great value to vessels at sea. To establish stations for making observations and for investigating other weather phenomena characteristic of Greenland, the University of Michigan has sent an expedition which left Sydney, N.S., the last week in June, and will set up a base at Holstesborg, Greenland.

Another problem to be studied by the expedition is that of dealing with icebergs near their birthplace on the borders of Greenland's ice-cap. It is thought that it may be possible to break them up with explosives much as ice dams are broken, before they drift down to endanger shipping in trans-Atlantic steamship lanes. This summer's expedition is chiefly for reconnaissance in preparation for the major explorations and studies to be made in 1927.

Anti-Strike Technicians

Motor Car Must Be Reckoned With In Transportation Strikes

Gasoline is establishing itself as an anti-strike weapon to be reckoned with. During the first day of the subway strike it is estimated that between 150,000 and 200,000 private automobiles, not normally employed for city travel, were mobilized to carry a considerable part of the public to and from its work. A community's transportation is the most exposed sector on its economic front. It is only in connection with transit or railroad strikes that aggressive labor speaks of paralyzing the communal life. Yet complete paralysis has been made difficult by the advent of the automobile. Business and social life can be crippled, and in the case of a prolonged strike may conceivably be paralyzed. But a transportation strike cannot, in the nature of things, be prolonged. It must be quickly won or lost. The speedy victory has been made much more doubtful by means now at the disposal of a community to carry on somehow. The role of the automobile in combating transportation paralysis, threatened or attempted, has been demonstrated in Great Britain.—New York Times.

Minister: "Sandy, Sandy! Playing the pipes on the Sawbath Day! Mon, I wonder at ye—dae ye no' ken the Ten Commandments?"

Sandy: "No, I dinna ken them; but just whustle the tune an' I'll have a shot at them."

You have to have a pull to get along in this world. Ask any fellow who has tried to make the varsity crew.

British Poise

Temperament, Stability and True Sportsmanship of the British People

The conduct, temper and general behavior of the British people during the great strike have called forth merited words of praise. To no nation was the unmistakable rebuke to communism more pleasing than to United States, where the foreign element is always threatening and where the real temperament, stability and true sportsmanship of the genuine Britisher is, perhaps, least understood.

The whole world is indebted to England for a system of government that works wherever it is applied, for a judicial system and code of laws which are yet unexcelled, for a spirit of true sportsmanship that allows the strongest adversary a fair chance, and now the Mother Land has with poise and dignity given such a rebuke to communism as to win the admiration of the world.—Farmer's Advocate.

Thought Green Unlucky

Famous Irish Politician Had Violent Dislike For Emerald Hue

Parnell, the famous Irish politician, had a deeply-rooted dislike of green. He is said to have held it to be "the color of abandonment and misery," and suffered agonies if compelled to speak in a hall draped with green. One of his intimate friends records that he "often speculated as to whether Ireland's long-continued bad luck had not come from her national color being green, and one of his favorite schemes was that under Home Rule he would change the national color to something else." Sir Edward Burne-Jones, the celebrated English painter, also believed that green was an unlucky color.

Military Guard For Bank

Troops On Duty At the Bank of England Every Night

The custom of having a military guard at the Bank of England dates back to the time of the Lord George Gordon riots when the bank was threatened by the mob, and only relieved by the soldiers. Ever since then a guard of one officer, two sergeants, two corporals, a drummer, and 29 privates has been on duty there every night, coming off at six or seven in the morning, according to the season of the year. By custom, the guard is the guest of the bank, the officer in particular being given a rather ceremonial dinner, to which he has the privilege of inviting two friends.

Crime In Britain

About 150 Murders Committed Every Year In England and Wales

The number of murders committed every year in England and Wales has remained almost consstant at 150 for the last fifty years, and in 1922 and 1924 the figure was exactly correct, according to the crime statistics for 1924, which has just been published. One-third of the total are murders of infants aged one year and under. Only forty-two people were tried for murder in 1924, fourteen being sentenced to death and ten executed. Eleven were acquitted, fourteen were found guilty but insane, and three found insane on arraignment.

Using Less American Coal

The United States department of commerce, through the bureau of foreign and domestic commissioners, in a circular on the trade situation in Canada, declares the market in Canada for American anthracite coal is steadily decreasing and the only possible way to arrest the movement is advertising and educational campaign. It says importers of Welsh coal have tried these methods successfully.

The only kind of fruit Noah had in the ark was preserved pairs.

ECZEMA IN FORM OF RASH

Lasted About a Year. Healed by Cuticura.

"My scalp started to get red and itchy and had a burning feeling. Later eczema broke out in the form of a rash and spread to my face and body. It was itchy all the time, and my woolen clothing made it worse. My face was disfigured, and my hair fell out and got dry. The trouble lasted about a year.

"I began using Cuticura Soap and Ointment and after using one cake of Cuticura Soap and one box of Cuticura Ointment I was healed." (Signed) Miss Alice Bickell, R. R. 5, Woodville, Ont.

Daily use of Cuticura Soap, Ointment and Talcum helps to prevent skin troubles.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd, Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Extend Area For Buffalo

Range in Northwest Territories Increased By 6,500 Square Miles

The great area of natural buffalo range partly in the Northwest Territories and partly in Alberta, known as Wood Buffalo Park, has just been increased by the addition to its southern portion of 6,500 square miles. The park now extends 175 miles from north to south and 150 miles from east to west at its widest point, with a total area of 17,000 square miles.

This added area, it is stated, contains some of the best buffalo grazing lands in the north. A number of animals from the 1,634 shipped north in the summer of 1925 from Buffalo National Park at Wainwright spent a portion of last winter in this locality, returning north to the main herd in the spring. These animals were not molested while outside the park boundaries, but as the supervision of the wardens is more complete when within established limits it was thought adviseable to extend the park to take in this eminently suitable territory.

Provision has been made in the park regulations to permit Treaty Indians, who hunted other game in that area in the past, a continuation of that privilege, and to allow those half-breeds and whites, who have in the past hunted and trapped in the recently added portion to continue as heretofore under permit from the park superintendent. The molesting of the buffalo in any way is of course not permitted.

Triumph For Telephone

Returns From Alberta Provincial Elections Handled By Phone

For the first time in Canadian election history, all the results of the recent provincial election in Alberta were handled by telephone, instead of by telegraph. This result was a triumph for the Alberta Government telephone department. In less than three hours after the close of the polls the results in all of the 2,450 polls in the province, including the north country, were known, with the exception of a few from the most-isolated polls, the first choices or elected candidates had been tabulated in every constituency.

Nearly 300 people in as many telephone exchanges in the provinces were engaged in the work of collecting the returns. One hundred and eighty-five thousand miles of rural and long distance wire carried the news, covering the province with a vast network of telephone communication. Special telephone compiling operators were placed in the daily newspaper offices in Edmonton, Calgary and Lethbridge, five at Edmonton handling 26 ridings, four at Calgary handling 16 ridings and two at Lethbridge handling six ridings. The returns were handed to the newspapers as soon as received, and conveyed over Canadian Press wires. In five constituencies the entire work of compiling all returns was handled by the telephone department.

Minard's Liniment for Sore Feet

A Modern Cinderella

London Saleslady is Society Debutante At Royal Court

A Cinderella in real life has been found by London society.

Miss Dorothy Knaggs, daughter of Lady Knaggs, was presented as a society debutante at the most recent brilliant Royal Court at Buckingham Palace. She was sponsored by Lady Cadham, her aunt and wife of the chairman of the Great Anglo-Persian Oil Company.

It has now been discovered that at 8 o'clock on the morning after the court, Miss Dorothy Knaggs, saleslady, presented herself for duty at a big department store. None of her fellow workers knew anything about the presentation.

"Jameson certainly had a big bump on his head when he came to the office yesterday."

"Ah, he told me that the girl he married was a brick.

The London Zoo has a white elephant.

It isn't distance that lends enchantment to spring.

Cancer Research

British Empire Cancer Campaign Publishes Annual Report

The annual report of the British empire cancer campaign gives the results of the investigations by the workers at the Cancer Hospital into the causation of cancer.

It was found that cancer producing tars and paraffine were largely those which had been heated in manufacture to a very high temperature. Somethings occurs at these high temperatures which effect a change in the substances subjected to them and endow them with a mysterious cancer-producing power.

So far, no light has been thrown on the nature of this change. There seems to be very little in the idea that tar produces cancer because of or by means of the arsenic contained in it.

The workers at the Cancer Hospital believe that they have disposed of the idea that the presence of one cancer protects against the growth of others. They have not so far been able to find any support for the virus theory of cancer causation as propounded last year by Dr. Gye.

Dr. Lumsden's researches at the Lister Institute are declared to be of the most promising character. He has obtained an anti-serum which causes cancers in rats to disappear, but he has found it impossible to make any application of it as yet to human needs.

An interesting communication in the report comes from Professor R. T. Leiper, who by a series of careful studies disposed of the theory of "cancer houses." He acquits the cockroach as a carrier of the agents of human cancer.

An American's Belief

Gentleman From Indiana Thinks Edmonton District Finest In America

John J. Judy, formerly of Judyville, Indiana, owner of the famous "Dan Patch" and "Judy Patch," pacers, head of a chain of 25 general stores, bank president and newspaper publisher, but now a citizen of Edmonton, living at 7420 106th Street, believes no other place is as good as the province of Alberta, according to the Edmonton Journal.

In 1907 he traded a Dan Patch colt for a half section of farm lands near Wetaskiwin, Alberta. A little later he traded Judy Patch for a second half section, both unseen. It was not till 1924 that he came to the Edmonton district to look over his land.

"I came, I saw and I was conquered," said Mr. Judy. "I farmed it two years and then sold it. Now I'm an Edmonton citizen and I'm here because I think this district is the finest on the North American continent, bar none."

"When I came west two years ago it was my 61st trip," he said. "Now I'm here for keeps."

Mr. Judy has succeeded in growing outdoors in Edmonton some of the finest varieties of strawberries ever seen in the city.

The Friend of All Sufferers.—Dr. Thomas' Eclectric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a coutinent. It is on sale everywhere and can be found wherever enquired for.

Little Helps For This Week

And thou shalt be secure, because there is hope.—Job ix., 18.

And, as in sparkling majesty a star
Gilds the bright summit of some gloomy cloud,
Bright'ning the half-veiled face of heaven afar;
So when dark thoughts my boding spirit shroud,
Sweet Hope! celestial influence round me shed,
Waving thy silver pinions o'er my head.
—John Keats.

Hope is the cordial of the human heart.
—Robert Burns

Hope never hurt anyone, never yet interfered with duty; nay, always strengthens to the performance of duty, gives courage, and clears the judgment. Saint Paul says, "We are saved by hope."
— George MacDonald.

Sweet Young Thing: "Why are you running that steam rolling thing over that field?"

Farmer: "I'm going to raise mashed potatoes this year."

Village Curate.—They tell me you have a model husband, Mrs. Briggs.

Mrs. Briggs.—Yes, but he ain't a workin' model.

The magul, a Mexican tree, supplies from its bark a thread three times as strong as ordinary cotton.

Minard's Liniment for all pains

Carry it always with you!

Baldwin Deluged With Pipes

Tobacco pipes, new and old, cheap and expensive, of every conceivable design and variety, have been showered upon Stanley Baldwin, the prime minister, in such numbers that it has become a problem at No. 10 Downing Street as to what is to be done with them.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea, carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Woodrow Wilson Portrait

A portrait of the late President Woodrow Wilson, auctioned off with those of other statesmen painted at the Paris peace conference by Sir William Orpheu, of the Royal Academy, London, has brought $13,000, the highest figure bid at the sale.

Fresh Supplies in Demand.—Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

As Much As He Knew

After the household has been completely disorganized for three weeks, the society reporter refers to is as a "quiet home wedding."—Detroit News.

Open Beaver Trapping South C.P.R. Main Line

Regulations fixing the open seasons on game in British Columbia for the coming season, and involving important changes in the province's fur protection policy, were announced last week.

While the open seasons for most game animals follow closely those of last year, the Game Board, which prepared the new regulations, is embarking on far reaching changes in trapping rules.

All fall trapping of water animals is prohibited, while on the other hand, the big area south of the main line of the Canadian Pacific Railway is open for the first time in five years to spring trapping of beaver and muskrat. To restore these animals there, a five year close season on trapping has been in effect, and it has been remarkably successful. As a result, the Game Board believed trapping can be allowed again without fear of depleting the fur-bearers seriously.

Explaining the decision to abolish fall trapping of water animals, M. B. Jackson, K.C., chairman of the Game Conservation Board, says that this step is being taken both in the interests of conservation and of the trappers themselves. Fur taken in the spring, he pointed out, have a value far greater than those taken in the autumn.

A summary of the open seasons in this section (Eastern district) is as follows:

Mountain sheep, south of the C.P.R. main line, Sept. 15, to Dec. 15.

Bear, (except white or Kermodie bear), throughout the Eastern district, Sept. 15th, to June 30, 1927. Provided that no bear shall be trapped.

Deer (Mule, White-tail and Coast), bucks only, throughout the northern and eastern districts (except white-tailed deer in North and South Okanagan and Similkameen electoral district and in the Grand Forks-Greenwood electoral district, west of the summit of the Midway mountains), Sept. 15 to December 15.

In the northern and eastern districts, all fur-bearing animals (except beaver and muskrats) Nov. 15 to April 30, 1927.

In the northern and eastern districts, muskrats and beaver, March 15, 1927, to April 30, 1927.

Ducks (except Wood and Eider ducks), Wilson snipe, coots, greater and lesser yellowlegs, geese and brant, Sept. 15 to Dec. 31.

Blue Grouse only.—In the eastern district, in that portion thereof known as the Grand Forks-Greenwood electoral district and that portion of the Similkameen Electoral district situate and lying to the east of Allison creek, the South Similkameen river and the Pasayton river, Oct. 1 to Oct. 15.

Quail and European partridge—In Electoral District of Similkameen, Oct. 15 to Nov. 15.

All dates are inclusive.

Warning

Under the provisions of the "Sheep Protection Act" all dogs in the province must be licensed. Licenses can be had from any Government Agent or Provincial Constable. Those desiring to obtain licenses by mail, can receive same by giving sex, name and description of dog. Any dog found of the owners premises without a collar and license tag is liable to be shot. License fees: Male dogs $1.00, females $2.00.

Here and There

Tremendously rapid development of forest and water power resources of the Province of Quebec is indicated in the forecast of revenue totalling $6,000,000 from these sources for the current year. Last year the same resources produced a revenue of nearly $4,500,000.

Sixty men from the training camps in Brandon and Claydon, England, have been accepted by the Canadian Government and sailed on the "Empress of France" at the end of June. They proceeded to Winnipeg after landing at Quebec and will be placed on specially selected farms.

Saskatchewan exported last year 77.4 per cent. of its total production of creamery butter, according to a statement made by the Provincial Dairy Commissioner. The increase in production in 1925 over that of 1920 had amounted to 126.8 per cent., the output last year totalling 15,946,233 pounds.

Close on one hundred pilgrims from St. Paul and Minneapolis passed through Montreal recently on their way to the famous shrine of Ste. Anne de Beaupre, near Quebec. They were the advance guard of the great army of pilgrims that visit the shrine every year. While stopping off in Montreal they visited the St. Joseph Oratory in that city, also well-known as a shrine.

Hundreds of students and co-eds from Canadian and American universities have been passing through Montreal recently to board ships for Europe in connection with the Overseas Collegiate Tours that have grown increasingly popular of late years. Many of these collegians travel by Canadian Pacific boats, the "Empress of France" on a recent trip carrying over 250 of them.

Clad in gorgeous scarlet tunics, plentifully decorated with gold braid, forty members of the world-famous Coldstream Guards Band, of London, reached Quebec recently on the Canadian Pacific liner "Montcalm" on their third visit to Canada, having been here in 1904 and again in 1911. Under the command of Lieutenant R. G. Evans they will play at Brandon, Calgary, Edmonton, Saskatoon, Regina, Vancouver and the Toronto Exhibition.

The Government of the Province of British Columbia

Liquor-Control Plebiscites Act

Proclamation of Returning Officer

Province of British Columbia

In the Grand Forks-Greenwood Electoral District

TO WIT:

PUBLIC NOTICE is hereby given to the Electors of the Electoral District aforesaid that I have received His Majesty's Writ to me directed, and bearing date the sixteenth day of July, 1926, commanding me to cause the following question, namely:—

Do you approve of the sale of beer by the glass in licensed premises without a bar under Government control and regulation?

to be submitted according to the "Liquor-control Plebiscites Act" to the said Electors of the Electoral District aforesaid; and, further, that in obedience to the said Writ a poll shall be opened at eight o'clock in the forenoon and shall be closed at seven o'clock in the afternoon on the 21st day of August, 1926, for taking and receiving the votes of the said Electors of the Grand Forks-Greenwood Electoral District aforesaid at the respective places following:—

Polling Divisions

Beaverdell,	Cascade,	Midway,
Boundary Falls,	Christian Valley,	Paulson,
Bridesville,	Eholt,	Riverside,
Brown Creek,	Fife,	Rock Creek,
Carmi,	Grand Forks,	Westbridge
	Greenwood,	

of which all person are hereby required to take notice and to govern themselves accordingly.

GIVEN under my hand at Greenwood, this 20th day of July, 1926.

GEORGE H. GRAY,
Returning Officer.

WATER NOTICE

Clearing Streams

TAKE NOTICE that W. E. McArthur, whose address is Midway, B.C., will apply for a licence to use the waters of the Kettle River and West Fork of Kettle River for "Clearing-streams" purpose (i.e., clearing and improving the stream for the driving, booming, or rafting of logs). The points on the stream between which it is proposed to clear are from Midway to East Fork on Kettle River and from Westbridge to Carmi on West Fork of Kettle River. The estimated mileage between the said points is 75 miles. The term proposed for the licence is 20 years. This notice was posted on the ground on the 5th day of July, 1926. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Grand Forks. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

W. E. McARTHUR, Applicant.

The date of the first publication of this notice is July 8th, 1926.

PURE BEER PURE BEER PURE BEER PURE BEER

Facts

of the Brewing Industry in British Columbia

THE Brewing Industry of British Columbia employs hundreds of men with an annual payroll of about three-quarters of a million dollars, using per annum nearly ten million pounds of malt, made from barley grown in Canada, and over one hundred and fifty thousand pounds of hops produced in British Columbia.

IT requires over one hundred thousand dollars for fuel, mined in British Columbia, to produce the Beer consumed in this province. Many hundreds of thousands of dollars are paid by the Brewers annually for materials such as bottles, cooperage, crownstoppers, labels and bottle wrappers—all of which are manufactured in Canada.

THE taxes paid by the Breweries to the Government amount to over eight hundred and seventy thousand dollars per annum, exclusive of income taxes.

THE citizens of this province must recognize the importance of such an industry and help to build it up; payrolls and industries are building cities and are the foundation of prosperity.

THE Amalgamated Breweries of B. C. are manufacturing good Beers, fully matured and aged, a product recommended by physicians on account of its nourishing and health-giving qualities; these beers contain only a very low percentage of alcohol and therefore are the proper stimulant needed when exhausted or overworked, as recognized by medical authorities.

THE Vancouver Brewery Limited, Rainier Brewing Co. of Canada Limited, Westminster Brewery Limited, Silver Spring Brewery Limited and the Victoria Phoenix Brewing Co. Limited, members of the Amalgamated Breweries of B. C., are under supervision of the Liquor Control Board, and their Beers are analyzed from time to time by expert firms of the continent upon instigation of the Liquor Control Board, which gives ample assurance to the public that they receive only pure and wholesome Beers when bought either in the Government Vendor Store or in licensed beer parlors.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to ten head.

The Mineral Province of Western Canada

TO THE END OF DECEMBER, 1925

Has produced Minerals as follows: Placer Gold, $77,663,045, Lode Gold $122,808,459; Silver, $74,111,397; Lead, $89,218,907; Copper, $197,642,647; Zinc, $39,925,947; Miscellaneous Minerals, $1,594,387; Coal and Coke, $273,048,953; Building Stone, Brick, Cement, etc, $44,905,886; making its Mineral production to the end of 1925, show an

Aggregate Value of $920,919,628

Production for the year ending December, 1925, $61,492,242

The Mining Laws of this Province are more liberal, and the fees lower, than those of any other Province in the Dominion, or any colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Full information together with Mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES,
VICTORIA, British Columbia.

N.B. Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B.C. Reports covering each of the six Mineral Survey Districts are published separately, and are available on application. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.
