GENERAL FLOAT

At Revelstoke the Y. M. C. A. has 340 members.

There are 150 men on the payroll at the St. Eugene mine.

More than 100 men are working at the Britania mine on Howe Sound.

In building operations this year Calgary stands fifth among the cities of Canada.

A Paris firm has been convicted of manufacturing cigars and cigarettes out of cocoa husks.

Nelson's power plant went on the bum this week and for 40 hours the city was in darkness.

Harry Green, one of the best known sporting men in the northwest, died in Spokane Wednesday.

Since acquiring the Nickel Plate mine in August, 1909, this company has paid $43,500 in dividends.

The Nelson board of trade is asking the Provincial government to establish a mining school in the Kootenays.

In the state of Washington druggists who wish to fill prescriptions for liquor must pay a licence of $25 a year.

The miners of Butte are sending $700 to the children of the locked out miners in Lead, North Dakota, to buy them Christmas presents.

In 1880 Spokane had a population of 300. In 1890 it had 19 922. In 1900 the city had jumped to 36,848. Now in 1910 the recent census shows a population of 104,402.

Seventy-five per cent of the applicants for positions in the Canadian navy have failed to pass the doctor on account of bad eyes and cigarette heart, although of lusty appearance.

The Christmas tree industry is a big one in Canada. As an instance, just at present a half a million trees are being cut in Quebec and are being shipped to New York and Boston.

In the eastern townships the French-speaking population is increasing and the English-speaking decreasing. This was shown very conclusively at Bedford, when the school commissioners sold three buildings that had formerly been used as English-speaking schools. The reason for disposing of them was that there were no scholars. The English-speaking farmers are selling out to the French and going west.

School Closes Today

The Moyie school closes today for the holidays. At the beginning of the new year the school will open with D. A. Macdonald of Kinnondale, Alberta, as principal. The trustees have not yet procured a teacher for the junior room.

Christmas Arrangements

There will be midnight mass at Catholic church Christmas Eve, and a union service by the Methodist and Presbyterian congregations in Morley hall Christmas night. There will be special music and singing at each of these services. There will not be a union Christmas tree entertainment as in former years, but each of the churches will probably arrange for a small entertainment of some sort for the children.

C. P. R. Holiday Rates

The holiday excursion rates of a fare and one-third will go into efiect on December 22nd, tickets good returning till January 5th.

Union's Anniversary

There was no chance for complaint at the way the members of the Moyie Miners' Union handled their 11th anniversary celebration, and there was no chance for a man to ask for his money back if he was not satisfied. For once the question of "filthy lucre" was entirely eliminated. Everything was free, and everybody was welcome. And the crowd that took advantage of the kind invitation and the hospitality of the union taxed Morley hall to its full capacity.

Eleven years ago last Monday night Moyie Miners' Union No. 71, W. F. of W., was organized by James Wilks of Nelson. In these years the union has had it ups and downs, its prosperous times and its times of advertisity. Its membership has varied from time to time. It has now approximately 150 and probably embraces 90 per cent of the miners working in the camp. During the past year this union has paid out in sick benefits $569, and donated to different causes $922. The union is sound financially, and has never had a defaulting official. Every day their hall is open to the public and for the past five years they have maintained a public reading room and library. At the present time Joseph McLaren is the union's president, and James Roberts is its secretary.

The entertainment Monday evening was well arranged. First there was the concert, then the supper and this was followed by several hours' dancing. Music for the dance was furnished by Thos. Sowerbutts and Mr. Mansfield of Cranbrook. Following is the concert program:

Selection, Pianoforte and Violin, Messrs. Mansfield and Sowerbutts.

Comic song, Clara Nolan's Ball, Thos. Bates.

Song, Silver Threads Amongst the Gold, Wm. Cliffe.

Recitation, The Face on the Bar-Room Floor, R. Smedley.

Song, Selected, Mrs. Innis.

Comic song, They Are Waiting There for Me, A. Pitman.

Song, Selected, Miss Gamble.

Comic song, McNamara's Band, T. Bates and company.

Song, Sing Me To Sleep, Wm. Kennedy.

Step-dance, Sailors' Hornpipe, Jos. McLaren.

Comic song, I'm Shy, Mary Ellen, I'm Shy, H. Jackson.

Song, Sing Again That Sweet Refrain, F. Perkins.

Song, Selected, Mrs. Wallace.

Recitation, The Cremation of San McGee, M. Martin.

Song, If Those Lips Could Only Speak, R. Smedley.

Selection by the Band, Marching Through Georgia, T. Bates and company.

Killed a Bear

James Lemmon killed a splendid specimen of the black bear out near Munroe lake a few days ago. The bear was in his den, but had not fallen into his winter slumber completely. Jim's dog went into the den and the bear chased him out. A bullet from Jim's trusty rifle did the rest.

In New Location

J. W. Fitch has most of his stock moved to his new location, the store formerly occupied by MacEachern & Macdonald. Tomorrow all of his business will be carried on from the new stand. His lease on the Morley building does not expire for some time, and therefore Morley hall will still be under his management.

It is not necessary to go up in an aeroplane to smoke K. & H. cigars. You can smoke them anywhere with perfect safety, except, perhaps, in a black powder mill. See the barkeeper for further information.

LOCAL ASSAYS

John Sullivan left Wednesday for the Estella mine on Tracy creek.

Miss Mabel Lutner is assisting Postmaster Smith during the holiday rush.

Next week all of the stores in town will be open during the evenings.

The ice on the Moyie rink will be ready for skating within a day or two.

Roy Garratt is here from Winnipeg and will succeed Mr. McNicol at the Porto Rico mill.

Martin Thorpe and wife have moved the Koch siding on the Slocan railway.

A daughter was born to Mr. and Mrs. Hugh Wier on Friday, December 9th.

W. H. Wilson, the Cranbrook jeweler, was in town Monday. Business is good with Wilson, and he is deserving of it. He hustles for it.

The Scandinavian Aid and Fellowship Society are planning for an entertainment in Morley hall on Monday evening, December 26th.

Crowe Bros. have decided to remain in business. It is their intention to clear out the dry goods business and deal in groceries exclusively.

Mrs. Deagon and daughter, Miss Flora, and sons Harry and Gordon, are preparing to move to Kimberley, where Mr. Deagon is employed at the Sullivan mine.

R. H. Stewart, general mine superintendent for the Consolidated Company, was in Moyie the first of the week looking through the St. Eugene.

John Barclay, formerly a clerk in R. Campbell's store, but who afterwards went into business for himself in Greenwood, was recently married in Baker City, Oregon, to Miss Stella Pound.

Gus Acklind, while cutting posts for W. Jones at Aldridge Wednesday, cut his foot very badly. He was brought to Moyie, where Dr. Coffin attended him, and he was later sent to the St. Eugene hospital at Cranbrook.

M. McNicol, who has been with the Porto Rico Lumber Company for the past three years, will leave shortly for Moose Jaw, where he will have a good position with the Beaver Lumber Company, of which the Porto Rico company is a branch.

Have You Seen Haney?

There is every reason for believing that Haney, the bandit who held up the C. P. R. train at Ducks, near Kamloops, a year or more ago, is now in hiding somewhere along the Crow's Nest road. A short time ago Haney and his gang were located near Lundbreck by the Mounted Police. A strong effort was made to capture them, but they made their get away and came to B. C. Shortly after the holdup at Ducks, Constable Ike Decker attempted to arrest Haney and another man; but was killed by Haney. There is now a reward of $6,000 for the capture of Haney. A man answering Haney's description has been seen around Yahk and Curzon lately, in fact it is believed he was in Moyie only a short time ago. Constable Browning of Moyie has been on his trail and is on the alert for any fresh evidence of him in this territory. The description of Haney is that he is about 35 years of age, heavy set and slightly bald. He has large hands and short, stubby fingers. The fingers are so short that the hands appear deformed. Brown hair tinged with gray, large ears, and a mole on right cheek. He goes well armed, and would probably be a hard man to take. It is believed that Haney and his comrades were contemplating another holdup when the police frustrated their plans.

IMPORTANT.
TOMORROW
All the Toys that will be left after tomorrow's special sale you can put in your hat. We bought TOYS and NOVELTIES expecting to sell to a crowded town. The man who never made a mistake never had much money to buy toys for the little ones. We made a mistake in buying so many this year and are not going to wait till after Christmas to sell them.
ALL ARE TO BE SOLD TOMORROW.
The price we will sell at will make you buy them even if you have to keep them till Xmas 1911. The SPECIAL SALE will include all Toys, Dolls, Ornaments, Novelties and a great many things all of which are required at this season of the year.
ALL BOYS and GIRLS will be presented with a nicely decorated bank free, on Saturday as long as they last. Be early.
CAMPBELL'S
For Quality.

No Alum
No Lime Phosphate
"Alum in baking powder is dangerous and should be prohibited."
—Prof. Schweitzer, State Univ., Mo.
As a protection and a guarantee against alum, use
Dr. PRICE'S
CREAM
BAKING POWDER
It "makes home baking easy" and gives nicer, better and cleaner food than the "ready-made." There is no baking powder or preparation like it or equal to it for quickly and perfectly making the delicate hot biscuits, hot bread, muffin, cake and pastry.

WHY SUFFER FROM PILES?

Zam-Buk Gives Certain Ease

Friction on veins (the hemorrhoid veins) that are swollen, inflamed and gorged with blood, is what causes the terrible pain and stinging and smarting of piles. Zam-Buk applied at night will be found to give ease before morning. Thousands of people have proved this. Why not be guided by the experience of others? Mr. Thomas Pearson, of Prince Albert, Sask., writes: "I must thank you for the benefit I have received from the use of Zam-Buk. Last summer I suffered greatly from piles. I started to use Zam-buk and found it gave me relief; so I continued it and after using three or four boxes I am pleased to say it has effected a complete cure."

Mr. G. A. Dufresne, 183-185 St. Joseph Street, St. Roch, Quebec, P.Q., writes: "I can highly recommend Zam-Buk to everyone who suffers from piles."

Magistrate Sanford, of Weston, King's Co., N.S., says: "I suffered long from itching piles, but Zam-Buk has now cured me."

Mr. William Konty, of Upper Nine Mile River, Hants Co., N.S., says: "I suffered terribly from piles, the pain at times being almost unbearable. I tried various ointments, but everything I tried failed to do me the slightest good. I was tired of trying various remedies, when I heard of Zam-Buk, and thought as a last resource I would give this balm a trial. I procured a supply and commenced with the treatment. After a very short time Zam-Buk effected what several other ointments and medicines had failed to do—a complete cure."

Zam-Buk is also a sure cure for skin injuries and diseases, eczema, ulcers, varicose veins, cuts, burns, bruises, chaps, cold sores, etc. 50c box all druggists and stores, or post free from Zam-Buk Co., Toronto, for price. Refuse harmful imitations.

THE FISH'S BALLOON

SOME interesting data have within recent years been gathered with respect to the composition of the gas contained in the swimming bladder of fishes. Long ago it was discovered that it consisted of the principal constituents of the air, i.e., oxygen, nitrogen and carbonic acid; but these constituents are not combined in the fish's balloon in the same proportions that they are in the atmosphere, and, moreover, their proportions do not always remain the same in the fish.

At times the bladder contains hardly any oxygen, at other times oxygen constitutes nine-tenths of the contents. The variation in the quantity of oxygen is sometimes decidedly mysterious, and naturalists have offered various suggestions as to the cause of it. Some authorities contend that the fish may be able to control the quantity of oxygen in its bladder by its own will.

The Frenchman Biot thought he had solved the problem when he discovered that the proportion of oxygen was larger in fish that lived at great depths and smaller in those that lived near the surface of the sea, but later observations made by the officials of various fish commissions of the world seem to show that he was mistaken and that the deep dwelling fish carry no more oxygen in proportion than do those living in shallow water.

Some fish whose swimming bladders have been examined by naturalists aboard government steamers came from a depth of no less than a mile. Comparison between these and fish which seldom descend below two hundred feet in depth, and with others that prefer a depth of some five or six hundred feet, disclosed the fact that all had nearly the same proportion of oxygen to aid them in swimming.

The government railways of the State of Victoria, Australia, have placed an order in the United States for half a million dollars' worth of steel rails and fishplates. No American firm made an offer for the same quantity wanted by the State of South Australia, and that order went to a British firm.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

MISERABLE WITH DYSPEPSIA

Another Wonderful Cure By That Wonderful Fruit Medicine "Fruit-a-tives."

Mr. Mathias Dery, of 225 Church street, Ottawa, Ont., was treated for years by physicians for Painful Dyspepsia. He spent so much money for doctor's medicines without getting much relief that he had about made up his mind that his case was hopeless.

Seeing "Fruit-a-tives" advertised, however, Mr. Dery thought he would invest 50c in a box of these wonderful fruit juice tablets.

And this famous fruit medicine did for Mr. Dery what all the doctors could not do—it cured him.

He writes:—"Fruit-a-tives" positively cured me of severe Dyspepsia when physicians failed to relieve me."

"Fruit-a-tives" makes the stomach sweet and clean, insures sound digestion and regulates bowels, kidneys and skin.

50c a box, 6 for $2.50, or trial box, 25c—at all dealers, or from Fruit-a-tives, Limited, Ottawa.

Dr. Martel's Female Pills

SEVENTEEN YEARS THE STANDARD

Prescribed and recommended for women's all ments, a scientifically prepared remedy of proven worth. The results from their use is quick and permanent. For sale at all drug stores.

210 Temple St., Springfield, Mass.

LYMAN'S, LTD., Montreal, Canadian Agents. Also for sale by MARTIN HOLE & WYNNE CO., Winnipeg; THE NATIONAL DRUG & CHEMICAL CO., Winnipeg & Calgary and HONORE JAIN, Ste. Ida, Quebec.

Storyettes

WANDERING over a field one day a man came across a large stone inscribed:

"Turn me over."

After much difficulty he succeeded in turning it over, and found on the other side of the stone the words:

"Now turn me back again so that I can catch some other durn fool."

* * *

A PUPIL had been naughty all day, and the teacher sent him a note ordering him to stay after school.

The boy wrote an answer on his slate saying:

"Dere teacher,—Except the oner with pleasure. Always keep mi engagements with the ladies. Will be at the tristing place at four p.m."

* * *

EIGHT or nine women, assembled at luncheon, were discussing ailments and operations as eight or nine, or one or two, or sixty or seventy women will. The talk ran through angina pectoris, torpid liver, tuberculosis, and kindred happy topics.

"I thought," commented the guest of honor, "that I had been invited to a luncheon, and not to an organ recital."

* * *

ARCHBISHOP RYAN of Philadelphia has a kindly wit which some persons have misconstrued as caustic. At a dinner party a lady whom he had been chaffing thought she saw her opportunity and his dessert.

"A fig for you, your grace," she remarked pointedly, passing him a plate of figs in their leaves.

Her waist was cut very low in the neck. The archbishop only smiled politely, and, taking a leaf from the plate, said:

"A fig-leaf for you, Mrs. Jones."

* * *

GEORGE WASHINGTON PRIMROSE, thinking of matrimony and trembling on the edge, wrote to his married brother, Rufus, for advice.

"Dear Jawge" (wrote Rufus in reply) "every man shud marry. A wif is a man's gratest gift. She euthes his trubbles, dubles his jys and helps him in every wich way. The marid lif is the onoy lif specbully when yow is fortunate enuff fer to git a jool of a wif like mine.

"P.S.—Mandy has jess stept out. Yew blame fool yew, STAY SINGLE."

* * *

IN the trial of a case recently, in one of the Middlesex courts, a witness was asked to repeat a conversation that she had had with her husband.

Objection was made that the question should not be answered because the conversation was private in its nature. The judge then asked the witness whether anybody except herself and husband were present. She replied that her mother and the husband's mother were. Whereupon the judge remarked:

"It appears that both mothers-in-law were present; I shall therefore rule that the conversation was public."

* * *

IT was an English skipper of the olden time, who, having knowledge beyond the seeming needs, as he could read and use a chart, was dispatched to Rotterdam. After getting over the bar and well away to the east, he produced his charts and made a learned inspection; but the charts had been a long time in the locker, and circumstances combined to alarm him extremely.

He went up on deck and called to his mate:

"Put her about, Miko, the rats have eaten Holland!"

* * *

BACK in the forties there was an antique lawyer in Chicago of the name of Pallas Phelps—a name both classical and Yankee. He was a nondescript of the profession, who, though he often appeared in court, never had an office—at least, no one ever knew where his office was.

One day, when the unpaved streets were in a more than commonly filthy state, Judge Butterfield and Pallas Phelps met on a narrow street-crossing.

"Good morning," Brother Phelps," said the judge, "you haven't swept your office this morning."

* * *

ONE morning a congressman went into a country hotel in California and gave his order for breakfast to a waitress who seemed utterly indifferent as to whether he got food or starved to death. She kept him waiting a long time, and his impatience grew until he had to give it vent.

Calling a waitress who passed by his table, he asked:

"How long have you been here?"

"Who, me?" she asked sweetly. "I have been here three weeks."

"Then," said the hungry one, "you are not the one who took my order. That one left here before you came."

* * *

TOM MARSHALL, the great Kentucky orator, was also a great masticator of tobacco, and one of the most uncleanly of men in the disposition of the salivary "juice," an abundant deposit of which usually decorated his ample shirt-bosom. The contrary of Marshall in this particular was Return J. Meigs, clerk of the national Supreme Court, whose person and office were always models of neatness and cleanliness.

One day Marshall entered the clerk's office, as usual masticating a great quid of "doglog," and before he had finished his business found it necessary to unload.

"Where do you keep your spittoon, Mr. Meigs?" asked the advocate, after a fruitless search for the desired utensil.

"I do not keep one," said the clerk.

"Where do you spit?"

"I do not spit."

"I mean, where do I spit?—I chaw, Mr. Meigs."

"Generally you spit on your shirt bosom, Mr. Marshall."

The great advocate left the office, discharged his cargo of tobacco, and, returning, resumed his examination of the records with complete serenity.

* * *

AN Irishman at a fair got poked in the eye with a stick and took proceedings against the offender. Said the magistrate: "Come, now, you don't really believe he meant to put your eye out?"

"Faith, you're right this time," said Pat, "for I believe he tried to put it farther in."

* * *

A GOOD example of the kind of story Mark Twain used to like to weave into his after-dinner speeches was the tale of the drinker who unwillingly put in an application for membership in a temperance society, sailed the next day on a three-years' voyage, on which he kept his pledge in spite of longing and temptation, and returned to resign only to find that his name had been blackballed originally.

* * *

THE slow train is still the target for the shafts of the humorist. Recently, a wag sent the following letter to the editor of a country paper:

"Sir,—Is there no way to put a stop to begging along the line of the railway? For instance, yesterday an aged mendicant with a wooden leg kept pace with the afternoon express all the way from Blankton to Spaceley and annoyed the passengers exceedingly, going from one open window to another with his importunate solicitations."

* * *

LUTHER BURBANK, the plant wizard, at a dinner at Santa Rosa, praised California as a winter and summer resort.

"Besides our superb climate and our superb scenery," ended Mr. Burbank, "there is the further advantage of our reasonable prices. There are no Monte Carlo prices here. At a Monte Carlo hotel the proprietor said one day to the clerk: 'Has Lord Loftus, room 373, received his bill yet?' 'Yes, sir,' said the clerk, 'I sent it up to him an hour ago.' 'Strange!' mused the proprietor. 'As I passed his door just now I could have sworn I heard him singing.'"

* * *

THE witness looked youthful, and appeared to be rather uncomfortable, too. Consequently counsel assumed his most imposing manner.

"You describe yourself as a writer?" he began.

"Yes, sir."

"What kind of a writer—a sign writer?"

"No, sir."

"Not an author?"

"Partly, sir."

"What do you mean by 'partly'?"

"I'm in father's office, sir. He's a money lender, and I'm the author of all the sharp letters to backward borrowers. If you remember, I sent you one last week, sir."

* * *

A GREAT sporting event was taking place on the village green, the annual football match between the married men and the uncaptured. As the local doctor was refereeing, and the parson and curate were acting as linesmen, the match was being played in a very sportsmanlike way, but nevertheless Bill Jones, the bachelors' centre-forward, met with a bad accident. His leg got broken. While the injured limb was being put in splints the bachelors' right back turned to his partner and remarked:

"It's a good job the doctor was referee to-day."

"Aye," replied the other, "Bill allus was a lucky chap."

* * *

HE was a New Yorker visiting in a South Carolina village, and he sauntered up to a native sitting in front of the general store and began a conversation.

"Have you heard about the new manner in which the planters are going to pick their cotton this season?" he inquired.

"Don't believe I have," answered the other.

"Well, they have decided to import a lot of monkeys to do the picking," rejoined the New Yorker. "Monkeys learn readily. They are thorough workers, and obviously they will save their employers a small fortune otherwise expended in wages."

"Yes," ejaculated the native, "and about the time this monkey brigade is beginning to work smoothly a lot of you fool Northerners will come toating down here and set 'em free."

* * *

THE unexpected defence of alcohol by Sir James Crichton-Browne at a meeting of the Sanitary Inspectors' Association was characteristic of the eminent knight-errant of science. Sir James is constantly arousing controversy by the independence and originality of his views. He revels in wordy warfare, and one of his most famous battles of the pen was with Mr. Winston Churchill, in The Times, on the subject of Harris tweeds.

He has denounced all sorts of things in his times—impure milk, unsound meat, insanitary and ill-ventilated houses food adulteration, injudicious dietary, and so on.

Sir James is a capital speaker, especially after dinner. As a post-prandial orator, he is one of the few who still cultivate "old fashioned" eloquence, and are careful of the literary side of their addresses. In this respect his manner harmonizes with his appearance, for he treasures an enormous pair of whiskers of the Dundreary pattern.

Although an out-and-out Scotsman he is not afraid of telling a story against his race. He says that, during a visit to Jamaica, feeling a little lonely, he asked a colored official:

"Are there many Scotsmen in these parts?

"Not many," was the reply, "just a few—but quite enough."

Two and a Half Hours on Operating Table

Specialist Could Not Remove Stone in the Bladder

GIN PILLS PASSED IT

Joliette, P.Q.

"During August last, I went to Montreal to consult a specialist, as I had been suffering terribly with Stone in the Bladder.

"He decided to operate, but said the stone was too large to remove and too hard to crush. I returned home and was recommended by a friend to try GIN PILLS.

"They relieved the pain. I took two boxes and went back to the specialist. He said the stone was smaller, but he could not remove it, although he tried for two hours and a half. I returned home and continued to take GIN PILLS, and to my great surprise and joy, I passed the stone.

"GIN PILLS are the best medicine in the world, and because they did me so much good, I will recommend them all the rest of my life. 46

"J. Albert Lessard."

50c a box—6 for $2.50—at all dealers, and money back if they fail to give relief. Sample box free. National Drug and Chemical Co., Dept. R.P., Toronto, Ont.

"Those," smiled the young man, "are the latest style in pyjamas."

"Pyjamas, is it? An' w'at bes the use av thim?"

"Why gentlemen who pretend to any fashion wear them when they retire."

"Retire fr'm bizness, ye mane?"

"No. When they retire for the night. Go to bed."

"Ah-h, me young fellor, that's it, is it? Well, now, Patrick McCaffery's not goin' short anything av a fash'nable way av slapin'. Oi'll take a suit av 'em."

"Yes, sir. What size of shirt collar?"

"Sixteen an' a half."

So the clerk put up the purchases and Mr. McCaffery went happily home. He had a little scheme to astonish Mrs. McCaffery. Going straight upstairs, he put on his new suit, hid the pyjamas in the closet, and went downstairs again, where he displayed the new clothes to the delight of Catherine.

"Ah-h-h, but," thought Pat to himself, "wait till you see me pyjamas."

A little before his usual hour for going to bed Pat said: "Well, Katie, darlint, Oi'll go upstairs and lay away me garmints."

Mrs. McCaffery finished the socks and mittens she was mending, and then followed Pat. When she got to the bedroom door it was fastened.

"Pat, w'at bes ye doin' wi' th' dure locked?" she called.

"Whisht, Katie. Oi'll let ye in in about a minit. Oi'm gettin' up a little s'prise f'r yez."

Two or three minutes passed, but Pat did not open the door. Katie got impatient and thumped on it. "Pat McCaffery, let me in. What divilmint are ye up to anyways?" A smothered voice spoke from within. "Just wan moor second, Katie."

Another minute passed, then Katie kicked the door, and shouted: "Patrick McCaffery, is ut crazy ye are? Open th' dure, or Oi'll schrame f'r an officer." The door was opened, and there stood Pat. He surprised her, all right. The pyjama trousers had fallen down over his feet, he had on his nightshirt, and the pyjama shirt over that. His hair was in his eyes and his face red with anger.

Mrs. McCaffery screamed, "Howly hivins, Pat! Are yez havin' a fit?"

"Fit, is ut? Divil a fit can Oi get. The dommed little shrimp of a clerk niver towld me it t' pyjamas go on over th' nightshirt, or varsa versy."

A CROW'S STRATAGEM

A CROW had been captured by the children in a Southern family and brought home and tamed. They were very fond of the crow and treated it with kindness. As in most houses where there are children, there was also a pet cat. The cat and crow were not friendly.

One day an unusually nice morsel was given to the cat. This the crow not only looked at with envious eyes, but made several attempts to secure. The cat beat off each attempt, however, and the crow had to resort to stratagem.

Disappearing through the open door, he returned in a few moments with a long string that had been ravelled from a rug carpet. Placing this on the floor some little distance in front of the cat, he proceeded to wriggle it as he had seen the children do when playing with the cat. The cat instantly jumped to catch the string. This was, of course, exactly what the crow wanted, and he pounced upon the coveted morsel and flew away with it.

THE PRAYER OF THE HORSE

To thee, my master, I offer my prayer. Feed me, water and care for me, and when the day's work is done provide me with shelter, a clean, dry bed, and a stall wide enough for me to lie down in comfort. Talk to me. Your voice often means as much to me as the reins. Pet me sometimes, that I may serve you the more gladly and learn to love you. Do not jerk the reins, and do not whip me when going up hill. Never strike, beat, or kick me when I do not understand what you want, but give me a chance to understand you. Watch me, and if I fail to do your bidding, see if something is not wrong with my harness or feet.

Examine my teeth when I do not eat. I may have an ulcerated tooth, and that, you know, is very painful. Do not tie my head in an unnatural position, or take away my best defence against flies and mosquitoes by cutting off my tail.

And, finally, O my master, when my useful strength is gone, do not turn me out to starve or freeze, or sell me to some cruel owner to be slowly tortured and starved to death; but do thou, my master, take my life in the kindest way, and your God will reward you here and hereafter. You will not consider me irreverent if I ask this in the name of Him who was born in a stable. Amen.

THREE LONDONS

ROMAN London lies buried about eighteen feet below the level of Cheapside. In nearly all parts of the city there have been discovered tessellated pavements, Roman tombs, lamps, vases, sandals, keys, ornaments, weapons, coins, and statues of Roman gods.

When, a little over a century ago, deep sections were made for the sewers in Lombard Street the lowest stratum was found to consist of tessellated pavements. Many colored dice were lying scattered about, and above this stratum was a thick layer of wood ashes, suggesting the debris of charred wooden buildings.

One of the gifts made by King George—then Prince of Wales—to Canada during his visit was the chair used by Wolfe during his campaign in this country.

WHOLE COUNTRY IS RINGING WITH IT

WONDERFUL CURE OF RHEUMATISM BY DODD'S KIDNEY PILLS

Mrs. Hutchins of Dunham, Que., could not walk across the room—Story of her speedy and complete recovery.

Dunham, Que. (Special).—Missisquoi County is ringing with the story of Mrs. G. M. Hutchins, who after suffering from Rheumatism, Lumbago, and Neuralgia, is again a strong, hearty woman. In an interview Mrs. Hutchins says:

"I was affected with Rheumatism, Neuralgia, and Lumbago. My limbs would swell; my muscles would cramp; I was nervous and had a heavy dragging sensation across the loins.

"I could not even walk across the room. Then I started to take Dodd's Kidney Pills, and after taking six boxes found myself in the best of health—as well as ever I was in my life."

Mrs. Hutchins' troubles were all caused by Kidney Disease. That's why Dodd's Kidney Pills cured them so completely and quickly. Dodd's Kidney Pills cure only Kidney Disease, but they are a sure cure for any form of it from Backache to Bright's Disease.

PAT BOUGHT A PAIR OF PAJAMAS

Having Become a Boss He Felt That He Ought to be Up-to-Date

WHEN Pat McCaffery got a boss's job he thought it due to his advancement in society to sport a new suit. While at the men's furnishing store he noticed some pyjamas.

"An' w'at be ye askin' for thim summer outin' suits?" he asked the clerk.

Your Druggist Will Tell You Murine Eye Remedy Relieves Sore Eyes, Strengthens Weak Eyes. Doesn't Smart, Soothes Eye Pain, and Sells for 50c. Try Murine in Your Eyes and in Baby's Eyes for Scaly Eyelids and Granulation.

The Horseman

HORSEMEN should know more about growing and keeping horses' feet right than they do. Canadian breeders of Clydesdales, trained as they are to recognize merit in a wide hoof head, a broad strong foot built to wear and last on a hard city pavement, have learned a great deal more about the importance of a good foot than about how to get it, and how to keep it. The fine free step of the broad-footed Clydesdale with the foot lifted jauntily, carried straight ahead and set firmly down, tells a story of something more than nicely adjusted articulation of joints and co-ordination of muscles, with lines of power identical with those of resistance. Does it not tell a story of footsteps that are free from pain and all feeling of discomfort? Going farther back, does it not mean a good, free circulation of blood, and of a circulation able to take up waste matter—in fact, of a well nourished foot?

Dry, hard feet tell a story of insufficient nourishment. Certain conditions may assist in producing this situation, and it is wise to correct or alleviate them as much as possible. In stables where feet appear to become dried out, attempts to correct this by stuffing the frog with wet clay have been popular. This has been a partial success at least, but it is doubtful if a horse appreciates going to bed with his feet soaked with cold mud, much more than his owner, would, although in the latter case the consequences might be more immediately disastrous.

There might be a little lost and a good deal gained if this side of the argument were kept more prominently in view by horsemen whose chargers are troubled with dry, hard or contracted feet. Such means as are conducive to general good health and thrift, accompanied by others well known to be useful in stimulating the nourishment of any part, by stimulating the blood circulation. Such methods as standing, "tubbing" the feet in warm water, afterward giving a cold bath and drying thoroughly, should be well worth a patient trial for feet showing a tendency to become dry and brittle. The human finger nail, when it becomes dry and brittle, usually becomes thin as well. Treatment with olive oil will usually improve it in a very short time. The same could be tried on a dry brittle hoof. The use of a very light blister around the hoof head is known to be of benefit. All of such plans should appear more hopeful and more humane than standing a horse for hours in wet clay or stuffing his feet with it.

* * *

As a result of the first Kansas and Oklahoma Futurity, the breeders in that section of the country have awakened to the fact that the small breeder has an equal chance with the large breeder in winning rich stakes. It is said that quite a number of owners did not start their colts in this event, as they thought that the time would be much faster than the stakes were really won in. The result was that a number of colts that would have made a very creditable showing and would perhaps have won a portion of the purse, remained in the barns. Breeders in other sections of the country have learned this self-same lesson by actual experience, and statistics show that over 50 per cent. of futurities, including the Kentucky, are won by the so-called small breeder. The small breeder has, in many respects, a decided advantage over the large breeder, for he pays more attention to the mare and to the development than is possible for a man who has from fifty to one hundred mares. The giving of futurity stakes by Breeders' Associations in different sections of the country is an excellent thing, and it is to be hoped that the Kansas and Oklahoma Futurity will be exceedingly well patronized in the future.

* * *

One of the best prospects for the 2:16 trotting classes next season is the bay mare, Martha Todd, 2:15¼, record made on a half-mile track. This mare has been a most consistent performer for the last two seasons. Last year she was started five times. In her first race she was distanced, but after that she was never outside of the money, winning two second and two third moneys.

* * *

Dealers in horses of high enough class for park use and street driving in the large cities are anticipating the best fall trade they have experienced in several years. Such horses as the market demands are exceedingly scarce and are higher than was ever known before. The breeding districts have been thoroughly searched during the summer, and, while the supply secured is more limited than usual, some of the animals now in the market are of excellent class and prospective purchasers are eagerly looking them over and making their selections.

* * *

The most recent sensation is the marvelous victory of the bay colt Justice Brooke, who put the colt record at 2:09¼. While this work will not compare with the phenomenal record of Native Belle 2:07¾, it gives him the two-year-old colt championship, which, for so many years, was held by Arion. It is always interesting to study the pedigree of a colt of phenomenal speed. The sire of Justice Brooke was Baron gale 2:11¼. He was by Baronmore 2:11¼, dam Nightingale 2:10½. Here we have well developed ancestors on both sides of the line. Baronmore was by Baron Wilkes 2:18, and his dam was May Wagner by Strathmore, and her dam was Mary S. by Alcantara. There is a strong interblending of the blood of George Wilkes on the sire's side.

The dam of Justice Brooke is Expectation, by Autograph, who is by Alcantara by George Wilkes. Her dam, Miss Copeland 2:25½, is by Almont Star by Almont. The dam of Nightingale was Mabel by Contention, by Allie West. This is a remarkably rich pedigree with strong speed lines all through it, in which, however, the blood of George Wilkes and Mambrino Patchen predominate. There are very few breeders who have had the honor to produce a two-year-old champion colt. When the famous Palo Alto Stock Farm was in the limelight, and Charles Marvin was developing the youngsters, he gave us Fred Crocker 2:25¼ in 1880. In 1881 he handed out Willdower 2:21. In 1888 Sunol came along in 2:20¼ and later in 2:18. In 1891 he drove Arion in 2:10¾, which has remained the champion colt record until Justice Brooke reduced it. George W. Moore, owner of Dromoro Farm, St. Claire, Mich., is the owner and breeder of the colt, whose prospects are brilliant for further championship honors.

A Safe Pill for Suffering Women.—The secluded life of women which permits of little healthful exercise, is a fruitful cause of derangements of the stomach and liver, and is accountable for the pains and lassitude that so many of them experience. Parmelee's Vegetable Pills will correct irregularities of the digestive organs and restore health and vigor. The most delicate women can use them with safety, because their action, while effective, is mild and soothing.

Shiloh's Cure quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.

70 Years Old

GRATEFUL FOR MEDICAL AID

"Though I had passed by seventieth birthday," writes R. A. Silvera from Duncan P.O., "I am painfully aware that one of the penalties of old age is the slowing down of the activities of the system. One of the most dangerous conditions of old age is constipation, an indirect cause of many sudden deaths. I have used many medicines, but none so suited to old age as Dr. Hamilton's Pills. They are wonderful regulators—keep the stomach and bowels in perfect condition, prevent indigestion, biliousness, liver complaint and constipation. I recommend Dr. Hamilton's Pills because they never grip nor cause distress—just a mild tonic laxative."

By using Dr. Hamilton's Pills regularly you have a guarantee of good health, 25c per box, at all dealers, or The Catarrhozone Co., Kingston, Ont.

A Pill That Lightens Life.—To the man who is a victim of indigestion the transaction of business becomes an added misery. He cannot concentrate his mind upon his tasks, and loss and vexation attend him. To such a man Parmelee's Vegetable Pills offer relief. A course of treatment, according to directions, will convince him of their great excellence. They are confidently recommended because they will do all that is claimed for them.

Shiloh's Cure quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.

That Cold Room

on the side of the house where winter blasts strike hardest always has a lower temperature than the rest of the house. There are times when it is necessary to raise the temperature quickly or to keep the temperature up for a long period. That can't be done by the regular method of heating without great trouble and overheating the rest of the house. The only reliable method of heating such a room alone by other means is to use a

PERFECTION SMOKELESS OIL HEATER

Absolutely smokeless and odorless

which can be kept at full or low heat for a short or long time. Four quarts of oil will give a glowing heat for nine hours, without smoke or smell.

An indicator always shows the amount of oil in the font. Filler-cap does not screw on, but is put in like a cork in a bottle, and is attached by a chain and cannot get lost.

An **automatic-locking flame spreader** prevents the wick from being turned high enough to smoke, and is easy to remove and drop back so that it can be cleaned in an instant.

The burner body or gallery cannot become wedged, and can be unscrewed in an instant for rewicking. Finished in japan or nickel, strong, durable, well-made, built for service, and yet light and ornamental. Has a cool handle.

Dealers Everywhere. If not at yours, write for descriptive circular to the nearest agency of the

The Imperial Oil Company, Limited.

We go to all parts of the world for the wonderful ingredients of Psychine (pronounced Si-keen). We combine these ingredients in the finest chemical laboratories in Canada, and so great is our 30-year-old faith in this preparation that we'll buy a 50-cent bottle of it from your druggist and give it to you to try.

For nearly the third of a century we have known what Psychine will do. We have known it to cure hundreds of thousands in that time, of some of the most desperate cases of disease known to medical science.

We have received thousands of unsolicited testimonials, which we will gladly let you look over should you desire.

Think of it, a third of a century's experience with one preparation, a third of a century's intimate knowledge of what extraordinary cures it has made—almost a lifetime!

Do you wonder then with that perfect knowledge of Psychine, that we are anxious to bring it to the notice of everyone in Canada suffering from disease?

Do you wonder that we want those to know who are using wrong methods of cure, who are not getting well, and who we know will be benefited by Psychine.

Do you wonder that we can buy hundreds of thousands of 50-cent bottles of Psychine from the druggists of Canada to give to those who wish to try it?

* * *

Psychine builds vitality.

It strengthens and increases the white corpuscles of the blood—the phagocytes, the policemen or scavengers of the blood.

These white corpuscles of the blood, when strong enough, destroy every disease germ that gets into the body, keeps the body healthy.

If these white corpuscles are not in sufficient numbers or are not sufficiently strong, then these disease germs destroy them and disease holds the body. That's the cause of nearly every disease that afflicts the human race. For years, centuries, in fact, it has been recognized that herbs are the most effective treatment for disease.

It is only within recent times that we have been able to tell just why they were so effective.

Because certain of them increased and strengthened the white corpuscles or phagocytes.

These herbs are employed in compounding Psychine.

We go all over this world to obtain these herbs. Arabia, South America, China and Japan all contribute.

And the result is a preparation that will restore health and build vitality as no other preparation will.

That has proven itself in nearly the third of a century's use as no other preparation has proven itself.

That is a most effective treatment for:

La Grippe	Bronchial Coughs
Bronchitis	Weak Lungs
Hemorrhages	Weak Voice
Sore Throat	Spring Weakness
Anaemia	Early Decline
Female Weakness	Catarrhal Affections
Indigestion	Catarrh of Stomach
Poor Appetite	Night Sweats
Chills and Fevers	Obstinate Coughs
Sleeplessness and Nervous Troubles	Laryngitis and Dyspepsia
After-effects of La Grippe.	Pleurisy, Pneumonia and

Now we don't ask you to take our word for the tremendously beneficial effect of Psychine. Fill out the coupon below, mail it to us and we'll give your druggist an order (for which we pay him the regular retail price) for a 50-cent bottle of Psychine to be given you free of cost.

We will undoubtedly buy and distribute in this manner hundreds of thousands of these 50-cent bottles of Psychine.

And we do that to show our entire confidence in this wonderful preparation.

A confidence that has been based on our 30 years' experience with this splendid preparation, with a full knowledge of the hundreds of thousands of cures it has made.

COUPON No. 95

To the Dr. T. A. SLOCUM, Ltd.
193-195 Spadina Ave., Toronto

I accept your offer to try a 50c. bottle of Psychine (pronounced Si-keen) at your expense. I have not had a 50c. bottle of Psychine under this plan. Kindly advise my druggist to deliver this bottle to me.

My Name.....

Town.....

Street and Number.....

My Druggist's Name.....

Street and Number.....

This coupon is not good for a 50c. bottle of Psychine if presented to the druggist—it must be sent us—we will then buy the 50c. bottle of Psychine from your druggist and direct him to deliver it to you. This offer may be withdrawn at any time without notice. Send coupon to-day.

Gas Distended His Stomach

Caused Palpitation and Prevented Sleep. When Health Was Gone, Cure Followed Use of "Nerviline."

"My last wish will be," writes Harry P. Pollard, a well-known boot and shoe traveller of Hartford, "that everyone with a bad stomach may learn as I did, before it's too late, that Nerviline is the one remedy to cure. Why, I was in mighty bad shape, my digestion was all wrong, and every night I would wake with a start and find my heart jumping like a threshing machine. This was caused by gas on my stomach pressing against my heart. When I started to use Nerviline I got better mighty fast. It is certainly a grand remedy for the travelling man, keeps your stomach in order, cures cramps, prevents lumbago or rheumatism, breaks up chest colds and sore throat—in fact, there hasn't been an ache or pain inside or outside for the past two years that I haven't cured with Nerviline. Do you wonder I recommend it?"

TESTIMONIAL NO. 4890

For general household use Nerviline has no equal; it will cure the aches and ailments of the entire family—refuse anything but Nerviline. In two sizes, 25c and 50c, all dealers, or The Catarrhozone Co., Kingston, Ont.

The Merry Muse

SHE WAS THE BOUGES

A suffragette 'way down in Gloucester
Married a fellow named Foucester.
Two years later she died,
And he said, as he sighed,
"Well, anyway, I never houcester."

OVER IT NOW

Time heals all our wounds, as it dims
all our joys,
I've loved, and I've worked in the
sweat of my brow;
I used to go out for a time with the
boys—
Oh! I was a sport—but I'm over it
now!
I sit in the evening of life and look
back
On the furrows of life I was anxious
to plow,
And only one thing I can feel that I
lack—
Ah, once I was young—but I'm over
it now!
That's all in my life I would care to
call back—
The youth that is fled—but I'm over
it now!

HOPE

A man who hoped and did no more,
With long and tangled hair,
Sat in his little cabin door
And lightly laughed at care.

Day after day he clung to hope,
The winds blew fair and ill;
He used no water and no soap,
His hair grew longer still.

His cabin sagged around one end,
His shoes fell from his feet,
He sat alone, without a friend,
But still found hoping sweet.

At last the wall fell in, one day,
And crushed him where he sat;
Another, passing, heard him say:
"I'd not expected that!"

Moral.

The man who hopes may be serene,
With ne'er a fear nor flutter;
Hope is a staff on which to lean,
But 'tis not bread and butter.

SONG OF THE GERM HUNTERS

We have harried the germs, in spite of
their squirms,
And have slain the same in their lair.
We are after the fly with the baleful
eye,
And the skeeter must say its prayer;
We have purified wells and have killed
off smells
That have risen unto the skies,
But in spite of our toil, and the water
we boil,
The public ups and dies.

We have swept the streets, screened
fruits and meats,
We have had milk pasteurised;
No bacillus thrives upon human lives
Which we've properly sterilised;
The insidious bug in the barber's mug
We have given a rude surprise,
But what's the use?—some screw is
loose—
The public ups and dies.

In the days gone by no "Swat the Fly"
Was the usual summer sign;
But it somehow fell men lived as well—
Their lives were as yours and mine;
So something's wrong with the germ
fiend's song—
What it is we can't surmise;
But the cinch remains that, spite of our
pains,
The public ups and dies.

A number of Chinese girls, specially trained in San Francisco, have begun work in Pekin as central operators in the telephone system recently opened up. Subscribers, when ringing up, address them as "Lily of the Air" and "Butterfly that talks."

FASHIONS AND FANCIES

THE first cool days of autumn invariably arouse interest in the never entirely dormant subject of dress, and every woman instinctively begins planning for the winter outfit. To be smartly gowned in the early spring and early autumn tells tremendously, for it must be admitted that the majority of women are a bit lazy about starting in to order new gowns ahead of time, always deluding themselves with the idea that they will be able to find something ready made, some model costume that will be just right, or that their favorite dressmaker will put all other orders aside to attend to their demands or commands.

One of the most independent of mortals is the successful dressmaker at this season of the year, for she realises that her clients are quite at her mercy and often, in consequence, are willing to pay any price to secure something "fit to wear," and the fashionable dressmaking establishments have to work day and night to turn out the orders that are fairly hurled at them when the weather suddenly turns cold and

Black and White Velveteen Costume

the last spring's serge or cloth costume that has been depounded upon for second best at least proves so totally out of style from the latest Paris information as to be deemed quite impossible. It certainly is a wise woman who gives her orders well in advance and has at least her tailor street costume ready to put on the moment the thermometer drops to a seasonable record.

The black satin gowns, with coat to match, or the coat and skirt with fancy waist, that were so fashionable in Paris in the early summer but were quite too warm to be worn in New York after the early part of May, are to be seen now and will be worn until really cold weather begins, for satin has considerable warmth as a material and an interlining in a jacket of the present style does not interfere with its lines nor with its fitting well.

Invariably the skirt is short and the jacket is of medium length, the skirt being narrow but not exaggerated; a band around the hem or two bands at the side or across the back to hold the fullness for the upper part of the skirt is not by any means narrow, and a few gathers around the sides and at the back are in fashion; the front of the skirt is plain and straight and the band does not extend across the front breadth in many of the models. There is, however, great variety in the skirts and in the way the band is put on. One favorite design has a wide band around the entire skirt; over this falls another much narrower band, which directly in front is turned back and forms a fold that reaches to the waist, gradually tapering off to a point; the skirt is wider than this second band, but the fullness is gathered into it. There is nothing exaggerated about this model, which has been most successfully made up in black satin and is now being copied in smooth cloth.

A point worthy of note is that almost without exception any model gown made in satin can be successfully carried out in broadcloth, cashmere de soie or chiffon velvet, but of the three materials the cloth is the best. Most beautiful are the cloths for this winter, fine in texture, with a wonderful finish, warm and at the same time light in weight. Every indication is toward a cloth winter, for gowns for the house are being made in cloth, as are also the most elaborate street costumes.

Until winter begins the satin costume will be smart for street wear, but as satin is a material that has always been classed with summer fabrics or with indoor gowns, to make the satin street gowns attractive there will be seen trimmings of fur and velvet. This is to be a season of fur and velvet anyway, and the broad band around the skirt, the large shawl collar and deep cuffs of fur are becoming and can be transferred to cloth or velvet costume when desired. A charmingly inconsistent costume is of mousseline de soie or silk veile made up with sealskin and lined with satin. This is too eccentric to be generally recommended, but the idea can be worked out in the satin without the veiling of mousseline de soie. Strange fashions or details of trimming are popular this season on account of the permitted combination of velvet and fur with other materials, and it is interesting to note how by the use of the velvet or fur new lines can be given and a model that would be unbecoming be transformed into one that is both smart and attractive. The long plain panel down the front and the band around the lower part of the skirt can be arranged to give length, while flat bands and folds put on skirt and waist, with spaces between, if carefully arranged, will not make the wearer look short and stout, but will give a slender appearance.

This season the short skirt gown seems destined to receive more attention than usual, one reason being undoubtedly because short gowns are unprecedently fashionable. In consequence the number of short costumes required is greater, and there is a marked difference in the styles for morning and afternoon. The practical serviceable tailor costumes of serge, cheviot, or corduroy, is almost a matter of course in the requirement of even the simplest outfit, and this winter is more than ever popular. Plain and mixed materials are in fashion, and there are many mixed patterns in cheviot and homespun that are attractive and smart. These fabrics should always be made up simply, the straight, narrow, not exaggeratedly narrow skirt, the medium length coat, preferably single breasted, with turned down collars and small revers, is always the best model; sleeves of medium size, coat shape, and with turned back cuff; the cuffs are fashionable this season with no trimming. This same severe style looks well in rough serge, or heavy camel's hair or zibeline, all of which are in style this winter.

Serge costumes, and especially the rough weaves, have been so popular for so many months that it has been most emphatically declared that they would be rated old-fashioned this season. It is certain that the less exaggeratedly rough, wide weave is not so fashionable, but there are a number of extremely smart gowns of the skirt and coat order now being turned out in rough serge. For one thing, the narrow, plain skirt looks best made in the heavier fabrics, for pleats and folds in heavy weight are clumsy and thick. There are many attractive dark blue and black serge costumes of a medium cord. These are trimmed with black satin and with black soutache; not elaborately trimmed, never overtrimmed, they are smart and becoming; less severely practical than the heavier grades of material and not so aggressively tailor-made, they are most popular. Quite a coquettish touch is given by the ubiquitous satin scarf dark blue lined with lighter blue, which is sometimes worn as though part of the coat, or there is introduced some color in embroidery on the collar and on the front of the jacket. Any one of the more elaborate models now exhibited in serge can be copied and elaborated on cloth or velvet.

Velvet is fashionable this season, and not only silk velvet, but corduroy and velveteen in all colors are in demand. Quite a novelty is the striped velveteen and velvet, the dark color with hairline of white, and made with revers and cuffs of plain white cloth or velvet; it is becoming to almost every woman. The objection has been made that with the hairline of white the gown is not so suitable for afternoon and reception wear, but it is more like corduroy, which does not rank with silk and chiffon velvet. So smart and novel is it that the objections raised will not be lasting. The same model is copied in plain or black color, with the trimmings in either velvet or satin, while fancy buttons are an addition if not an improvement.

Velvet combined with cloth will, as has already been stated, be one of the most popular combinations of the winter. A cloth gown with a velvet coat is a most useful, practical style, and while the fashion at present calls for velvet trimming on the skirt, the costume can be made with velvet only in the coat.

The finish of the skirt around the bottom is carefully considered this season. The band of contrasting material may be quite wide or quite narrow, but a band is essential. There may be one or two rows of broad braid, with a finish at either edge of soutache, or there may be only a band of the same material as the gown; if it is a figured material the band is either bias or so arranged that the design is at a different angle, when the material is plain then there is a fold of satin or velvet above the band. This trimming breaks the too-plain line of the skirt when it is made without a tunic, for the quite plain skirt is not fashionable.

Last year's pleated skirts are by no means hopeless, however. The inner pleats can be taken out, some if not all, or the upper part of the skirt can be left, the pleats stitched down, and then a plain band of cloth, satin or velvet can be put around the bottom and the skirt thus transformed and made up-to-date.

GARGOYLES

IT is thought that the earliest of the more elaborate attempts to transform roof-spouts into details of ornament is seen in the case of the cathedral at Rouen, where the figure of a great dragon was adopted for one of them.

This grotesque and fearsome species of creature is said to have terrorized both banks of the Seine and to have ravaged terribly the city of Rouen until it was slain by St. Romnus, bishop of the cathedral there. In compliment to the valorous bishop, therefore, the carcase of the dreadful beast was embodied in stone and set up as a warning to all depredators and evil spirits. The name given to this creature is said to have been "gargouille," and hence the name given to its effigy.

Serge Costume with Soutache Braid

One ugly creature having served as a model for a stone effigy on so famous a church as that at Rouen in the seventh century, it is easily conceivable that it may have set the fashion for other churches. The superfluous hideousness of so many of these objects certainly supports the notion that in part their sculptors were actuated by the idea of frightening the uncanny element from the sacred edifices of the worshippers.

The beginning of all forms for the gargoyle is the dragon, and toward the end of the thirteenth century, when the propriety of adopting this creature had become an old tradition of church architecture, the form of the monster was transformed into a thing of some approach to grace and elegance. In the meantime, however, almost every bird and quadruped of evil repute and of a figure that could by any malevolent ingenuity be distorted into something frightful had been summoned to the spiritual defence of the church; and, when animal shapes had been made to undergo every contortion that could be conceived, they were combined with human figures and faces.

And so it happens that on many of the finest churches in Christendom may be seen not only almost every kind of bird and beast, real and legendary, but everything uncanny and diabolical in human form.

MAGIC BAKING POWDER
Does not contain Alum

In the treatment of summer complaints, the most effective remedy that can be used is Dr. Kellogg's Dysentery Cordial. It is a standard preparation, and many people employ it in preference to other preparations. It is a highly concentrated medicine and its sedative and curative qualities are beyond question. It has been a popular medicine for many years, and thousands can attest its superior qualities in overcoming dysentery and kindred complaints.

LAZY MEN ARE GOOD HUSBANDS

THAT interesting international question as to why so many American girls prefer to marry Englishmen, is being raised in London silent Gertrude Atherton's declaration that if she ever marries again she will marry an Englishman. As usual, local complacency has decided it to be because the home product has more domestic virtues. But Carl S. Hanson, in the "Smart Set," expresses a new view of the question. He says:

As a man, I can't tell what the girls *preference should be*, but as an American, I can make a guess as to why an Englishman should interest an American girl when she stalks him in his native wilds.

The matter can certainly have nothing to do with breeding, for the American is not behind the Englishman in delicacy. A partisan of the American might fairly maintain his superiority in this respect, for the real Englishman is often unsparing of the feelings of others, while the real American would rather lose a tooth than speak a hard word. It can have nothing to do with cosmopolitanism, if we mean by cosmopolitanism the urbanity which enables one to get on anywhere without friction, for in this the New Yorker can give the Londoner cards and spades and beat him out with one eye shut. Nor can it have anything to do with culture, for if we have any national vice, it is culture.

At the end of the day the New Yorker's brain is tired from work, and he wants to be amused, while the Londoner, who hates work, and hasn't done anything anyway, just begins to use his brains. The Londoner's brains are always saved for opinions, dogmas or how to run the cosmos. The Londoner's opinions make him democratic, the American's make him orthodox. The American offers you a cigar; the Londoner a pipe. On treading on your toes, the American apologises, "I beg your pardon." The Londoner bites off "Sorry!" Morning, noon, and night the Londoner dresses to please himself; morning, noon, and night the American pleases to dress like everybody else. There is a type of the American; there are innumerable types of Londoners.

It is this unflagging zeal in opinions that makes the Englishman interesting. Far from being a hide-bound conservative, he is a democratic Socrates, often a nuisance, going the rounds to convert other people to his views. This is the special charm of the Englishman—he makes you think. He is hospitable; he is a gracious host; he is a good fellow and thorough-going—but so are other people—so are we. It is only when there is an opinion in the air, no matter what, that he brings in a flood of new ideas, together with his habit of positivism, and leaves the American miles behind. He's the product of the environment that will make for tomorrow's better democracy.

A BON MOT

THE "Entente Cordiale" may be all very well, but it caused no little inconvenience a few days ago to a certain well-known and popular aviator, who, at a dinner given to famous flying men, where a great many French guests were present, was, on entering the room, pressed to propose the health of the French aviators present—if possible, in their own language.

The airman's vocabulary of the French language was strictly limited; but, nevertheless, he attempted to do his best, and he struggled gallantly with his task. Whether or no he made himself intelligible to the foreigners is a mystery that has never yet been solved.

However, his friends were very pleased and proud of his performance; and, when he had finished, there were loud calls for a speech in English also.

"Ladies and gentlemen"—said the aviator—"it is most awfully good of you to show your appreciation of my efforts to speak in the French tongue, but I am sure you can have no idea of the torture I endured ever since coming into this room when I learned the task before me. Believe me, I've been suffering a perfect agony—the thought of what was before me completely spoilt my excellent dinner, I assure you—even the whitebait became 'betes noires' for me."

SOME BIG THINGS

THE tallest monument is the Washington obelisk, 555 feet high; but the tallest monolith is in Karnak, Egypt, being 100 feet in height. The highest chimney, measuring 474 feet, is in Glasgow. The largest aqueduct in use is the Croton of New York, which is thirty-eight miles long, but the longest ever built is in Peru, 360 miles in length.

The deepest coal mine is near Lambert, Belgium, 3,500 feet deep; the biggest dock is at Cardiff, Wales; and the strongest electric light is at Sydney lighthouse, Australia; while the largest lighthouse is at Cape Henery, Virginia, being 165 feet high and eight feet thick. The greatest bank is the Bank of England, in London; the oldest college is University College, Oxford, founded in 1050; the largest library, the National, in Paris, containing nearly 3,000,000 volumes. The largest theatre is the Paris Opera House, covering three acres; the largest bronze statue, that of Peter, the Great, in St. Petersburg, weighing 1,100 tons. The biggest stone statue is in Japan, forty-four feet high; the largest college is in Cairo, with over 10,000 students and 310 teachers. Damascus has the honor of being the oldest city.

The most costly book in the world is a Hebrew Bible, owned by the German Government, which a few years ago refused the Pope's offer of $125,000 for it. The most costly medicine a few years ago was metallic gallium, which sold for $150,000 a pound; but radium is now the priceless gem of the medical world, selling for more than that price an ounce. A man would have to be exceedingly ill before sending for such a prescription, even though he were a millionaire.

Though orchids frequently bring prices that make the poor man stagger, the highest price for a single flower was given for a tulip in Amsterdam by an enthusiast, who paid $250,000 for it. The Rothschilds smoke the most costly cigars that are made—the Henry Clay Sobranos, which cost $1.50 each. They are wrapped in gold leaf and packed in little inlaid cedar-wood cabinets.

A CENSUS OF PESTS

IT is probable that few persons save naturalists ever consider the enormous amount of life other than human which exists in any country, civilized or not, densely peopled or thinly settled. A plague of rats in London, within recent years, prompted an interview with a distinguished scientist, who estimated that within the area of Greater London there were twenty million rats—more than three times as many rats as people.

Sparrows undoubtedly come next in point of numbers among London's warm-blooded population; but the scientist preferred to make his estimate cover all the birds in the United Kingdom. He believed that the bird population would average eight hundred to the square mile. That would give a total of nearly ninety-seven millions. Thus the bird population outnumber the human by more than two to one.

As for the insect population, that is quite beyond any statistician; but, allowing that each bird eats only fifty insects a day, British birds would consume more than a million insects in a year. Yet such an estimate seems quite futile when we consider that the insect population of a single cherry-tree infested with aphides was estimated by a competent authority to be twelve millions.

Lord Avebury once calculated that a single ants' nest might contain as many as four hundred thousand individual insects. Recent researches have shown that these figures were too high; yet the actual facts are astonishing enough.

A French entomologist killed the ants in five hills by means of a poisonous gas, and undertook the prodigious labor of counting the dead. The result showed that in the smallest hill there were nearly eighteen thousand ants; in the largest, ninety-four thousand; and no man would dare estimate how many ants escaped.

Siamese imports of alcoholic beverages last year amounted to $547,142, but only $361 of it was from the United States—California wines.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Eclectric Oil possesses more power in concentrated form than one hundred times the quantity of many unguents. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

SNUFF

SNUFF, to the ordinary individual, is just snuff, nothing but snuff. He would not apply to it even the modified classification of eggs; that is, new-laid eggs, fresh eggs, and eggs. But he would be hopelessly wrong. According to the New York Evening Post there is a shop on Broadway where it is possible to obtain two hundred distinct varieties of snuff. There is the dark Black Rappee from France, the De Adrien Delpit made from Perique tobacco, the Irish and Scottish snuffs, the snuffs from Austria, from Portugal, from Germany, from Russia, and many other lands. Who uses them? Connoisseurs, travelers who have picked up the habit, and foreigners are ready buyers. But the great field for the sale of snuff is in the South. There its use is still very general. Some folk take it in the good old-fashioned way, by a pinch inhaled through the nostrils, but the working population, the mill hands especially, use it differently, by "dipping." For this a small stick is usually necessary, on which the powder is poured and which is then applied to the inside of the mouth, and especially the gums. Some varieties are exceedingly costly, priced, as they are, at from thirty to forty dollars a pound.

IGNIS FATUUS

SCIENTISTS have never explained to their satisfaction the light known popularly as the "will-o'-the-wisp" and also known as ignis fatuus. The phenomenon has been attributed to the combustion of carbons and sulphurs ignited by sulphuretted hydrogen. This theory has been shown to be a fallacy by persons who have passed their hands through the so-called fire and felt no heat. The strange fire flies fastest over cemeteries and over lowland and swamps when no wind is blowing. Superstitious people attribute the flickering fires to the souls of the dead. The most plausible theory is that the phenomenon is due to radioactive emanations rising from beneath the ground.

THE SONG OF THE TRAMP

I gather here and there a pie,
And here and there a biscuit;
I snatch a spoon when no one's by,
It always pays to risk it.
I sleep at noon where waters flow
To soothe the weary bummer,
For men may come and men may go,
But I go on all summer.

I ride beneath the rushing freight
From Boston to Chicago;
I watch each chance to desecrate
The box of Wells & Fargo.
I sing and whistle as I go—
November finds me lonely,
For in November falls the snow—
I walk in summer only.

The Krupp steel with which Dreadnoughts are sheathed is made by "boiling" ordinary molten steel in huge cauldrons, holding from forty up to one hundred tons of metal. Small quantities of chromium, nickel, and manganese are added to the mass while it is in a state of effervescence.

Corns and warts disappear when treated with Holloway's Corn Cure without leaving a scar.

One Year $2.00

FRIDAY, DECEMBER 16, 1910.

The inmates of the Louisiana State Asylum are arranging to publish a paper. Many regard it as a crazy undertaking.—Province.

The St. Eugene mine still maintains its place as one of the heavy shippers of silver-lead ore. This is not an idle assertion. The figures tell the story.

A pastor of an Easten church has struck upon a simple and effective way of inducing the women to remove their hats during the service. He merely requests that all under 35 kindly remove their headgear, and in less than two minutes there is not a crowned head in the house.

Hon. Richard McBride celebrated his fortieth birthday yesterday. The premier was born in Wew Westminster on December 15th, 1870. He was only 33 years old when he became prime minister. The whole people of the province, without regard to party affiliation, wish Premier McBride many happy returns of the day.

That the possibilities of the west are almost unlimited is well illustrated in the case of Mayor L. D. Taylor of Vancouver. Fifteen years ago he was in Vancouver broke, after coming down from the Skeena river where he had been prospecting. In time he became manager of the Vancouver World, and from that time on his progress was rapid.

The latest arrival in the journalistic field is the Creston Valley Echo, with R. O'B. Fitzgerald as editor and John Atherton as manager. The fact that Creston is supporting two newspapers speaks well for the place. The Echo is a six column publication and starts out with a satisfactory amount of advestising patronage.

The annual report of the provincial chief fire ranger deals with solid facts and points out many truths. His suggestion that brush and slashings be burned late in the fall or early in the spring is an excellent one. He also suggests that the railway companies put on more adequate patrol during the dry season. He says the most dangerous cause of fires and the hardest to control is the railway locomotives. The rights of ways are not properly cleared in the first instance and the growth is allowed to gather from year to year. In the fall and spring this yearly growth of bushes is cut and piled and left along the right of way, to become a fire trap of the worst description in the dry season. Moreover after fires have been started and spread off the rights of way the railway companies do not seem to consider that they have any further duty in try- to control such fires.

CHINOOKERS

(spokesman-Review.)

The best of whiskey sometimes gets the best of men.

One of the beautiful thoughts of the season is that the ice man has to buy coal.

It's a pity that about the only thing that rhymes with "carol" seems to be "barrel."

The modern spirit leans too much to what we can get rather than what we can do.

Some men seem to think home is a place to go after every other place is closed up.

What's the use of saving money on the upper berth and than paying it out in the diner?

After a loud talker has yapped for several minutes, did you ever notice the effectiveness of the man with a quiet voice?

Hiram Hobbs says: "A feller that plays the parlor organ and sings ballads most always has no sense about other things."

The man who fervently announces that he just loves children has no hesitation in barring them out of his rented apartments.

"Have you read the president's message?"

"Certainly."

"I congratulate you."

"You needn't. I'm a proof-reader."

Edison on Hereafter

Here is a statement made by Thomas A. Edison the other day: "No, I do not believe a man's mind lives after him. His work lives after him, but his work is a material thing.

"The Golden Rule is all that is needed. I'm dead five hours every night, and when I die and decompose I shall live only in phonographs and tickers and storage batteries. I shall not be playing a harp or boiling in oil or haunting anyone. I shall be dead."

Big Stock Farm

Fred K. Hurry, the Creston dairyman, has formed his business into a partnership with an increased capital. The intention of the company is to stock the reclamation farm near there with 600 or 700 head of beef cattle and a large number of hogs. The dairy business will also be enlarged. From information obtained it will only be a short time until this company will be to Creston and this district what the Hazelwood company is to Spokane.

Plan Tour to Europe

Rev. Robt. Hughes of Cranbrook is organizing a party to visit England early next summer. The party will leave Vancouver the last week in May next and the tour will be made through England, Ireland and Scotland. The trip will cost $397.50. Complete particulars will be furnished by Hr. Hughes.

The Royal Seal cigar has been before the smoking public for a lozen years. It is made in Nelson and can be bought in nearly every mountain town.

The MOYIE DRUG & STATIONERY STORE

A Sure Cure

A long felt want has at last been supplied. A Brooklyn inventor has devised a remedy for snoring. It consists of a simple adjustable sling that holds the jaws in position and controls the boisterous nasal currents. It is called the "Anti-Snoror," and no family should be without one. Below is a testimonial from a woman in Yonkers:

"My husband used to look like a subway entrance when he was asleep and he threw off a line of disturbances that sounded like a live stock train in a smash-up, but one of these contrivances completely sterilized his snooze. The first night he wore it he was so quiet I had to wake him up to make sure he wasn't dead."

Once Was Enough

They met by chance,
They'd never met before;
They met but once,
And she was smitten sore.
They never met again—
Don't care to, I allow,
They met but once—
The auto and the cow.

Mine Victims Buried

Last Tuesday at Blairmore 21 of the victims of the Bellevue disaster were buried at Blairmore. Eight hundred were in the funeral procession. The total number dead is about 31.

Musicians Good. Poor Show

The "Joshua Simpkins" company held forth at Morley hall Tuesday night. The band and orchestra were good, but the play itself was below the averege.

The K and H cigar has jumped to prominence through the excellent flavor of the tobacco out of which it is made.

Collar Bag, $1.00

THIS Collar Bag would make a most practical and attractive Christmas Gift for any man. It is made of fine brown morocco leather, lined with silk, has leather draw strings and tassels, and holds 12 collars.
