AUCTION SALES.

Sale of Dr. Kent's Homestead on Crescent Creek Island, together with stock, crops, etc., Thursday, Aug. 11th, at 10 a.m. on the premises. Particulars in advertisement. T. J. TRAPP, auctioneer.

Daily British Columbian

Monday Evening, August 8, 1887.

Already the Canadian Pacific Railway bridge across the St. Lawrence, at Ste. Anne's, is completed, and the first train has crossed. The solidity and durability of the structure are commended. It is little more than a year (June 1886) since the masonary was begun. Next week, passenger trains will run over the bridge. This is the second bridge over the St. Lawrence, and a third is projected; but when Quebec will be in possession of the facility which it covets but does not feel that it would be justified in paying for, belongs to the uncertainties. The widest span of the new bridge is 325 feet; the rest, with one exception which is 104, are 66 feet; in all there are fourteen. The cost is put down at about $2,000,000.—*Monetary Times.*

The cable brings us almost daily most surprising news of Russian movements in Central Asia. We are informed this morning that 5,000 Russian soldiers have entered Karategin, on the northern edge of the Pamir Plateau, not over three hundred miles from waters which join the Indus and flow for a thousand miles through India. We are also told that Russian surveyors have been baffled in their attempts to survey Kafiristan, the lovely mountain region just north of the Indus. A few days ago it was announced that Russia had asked permission of the ruler of Yarkand to move troops through his territory. Their destination, if not the Gobi desert, would necessarily be the region on India's northwestern frontier. The best writers on Afghanistan agree that Russia can find better routes to India than by way of Herat; and it is a noteworthy fact that her army is rapidly drawing near to the routes described by Boulger and others, that lead to India through the passes of the Hindoo Koosch mountains.—*N. Y. Sun.*

A *Herald* special from Newport says; The Board appointed by Secretary Whitney to inspect the Atlanta met on board the vessel on Monday, and an official report will be made in a few days. The result of the labors of the Board as summarized is that the ship at present is practically useless. Her structure appears to be strong and free from weekness, but her armament is *hors de combat.* The deck of the vessel remains intact, but the gun carriages' clip circle and clips will have to be repaired before further tests can be made. This portion of the fittings of the vessel evidently were not intended to retard the recoil of the guns and the damage done was in excess of what was reasonable. It is manifest from the location of the six-inch guns that if the eight-inch guns were in perfect order the six-inch guns would be idle, as it would be impossible to work both guns at the same time. The smaller secondary battery is also useless while either the eight or six-inch guns are being fired. The result is that the Atlanta, as a vessel of war, as her armament is now arranged, is absolutely worthless, and the discharge of her heavy powdered guns is likely to be followed by injury to the vessel. Three batteries, which ought to be so arranged as to be fired, if necessary, simultaneously, are inoperative for single fire.

On the 13th of November, 1848, Daniel Webster delivered an address in the Supreme Court of Massachusetts on the death of Chief Justice Mason. The following beautiful and impressive passages are among his closing remarks: "Nothing of chacacter is really permanent but virtue and personal worth. These remain. Whatever of excellence is wrought in the soul itself belongs to both worlds. Real goodness does not attach itself merely to this life; it points to another world. Political or professional reputation cannot last forever; but a conscience void of offense before God and man is an inheritance for eternity. Religion, therefore, is a necessary and indispensable element in any great human character. There is no living without it. Religion is the tie that connects man with his Creator, and holds him to his thrown. If that tie be all sundered, all broken, he floats away, a worthless atom in the universe; its proper attractions all gone, its destiny thwarted and its whole future nothing but darkness, desolation and death. A man with no sense of religious duty is he whom the scriptures describe in terse and terrific language as living 'without a God in the world.' Such a man is out of his proper being, out of the circle of all his duties, out of the circle of all his happiness, and away, far, far away, from the purpose of his creation." — *Inter Ocean.*

THE NEWS.

Mysterious Explosion—A Wonderful Jump—More Trouble With the Ironclads—Knave or Fool—A Doubtful Report.

The British Men-of-War to Take a Hand in the Fisheries—The Emperors Meet—The American Admiral Speaks—Harvest Reports.

By Associated Press.

A DOUBTFUL REPORT.

TORONTO, Ont., Aug. 6.—It is reported to-day that vast beds of anthracite coal of the finest sort have been discovered nine miles from Campbelford, near Kingston, in the province of Ontario. The discovery was made on a farm by a doctor. The coal beds, which are said to be wonderfully large are near the iron mines.

FESTIVE FISHERMEN.

CHARLOTTETOWN, P. E. I., Aug. 6.—The American warship Yantic, which has been cruising around the coast after the interests of the fishermen, arrived here last evening and will remain until Saturday. Capt. Quigley, of the cruiser Houlet, has been sent to Tignish to watch Americans who have been purchasing supplies, etc., from Myrie & Co. They were in the habit of landing ostensibly for the mails, but would purchase supplies and have them expressed to a distance to the shore when a boat from the vessel would land and convey all necessaries. They (the Americans) have about, when ashore, taken charge of the place, destroying property. Since Capt. Quigley's arrival things have changed. If any Americans are ashore after sun down some of the cruiser's crew are with them to prevent any violation of the law.

MYSTERIOUS EXPLOSION.

CINCINNATI, Ohio, Aug. 6.—A terrible explosion occurred here in the vicinity of Walnut st. this afternoon. The roar was not unlike that of an exploding boiler. It was first supposed that an explosion of powder or a bursting boiler caused the racket, but a hasty investigation showed no trace of that sort. Peter Fisher, who was in charge of the building, was going up stairs at the moment. Four militiamen were passing at the time. As Fisher turned the knob an explosion filled the air, and one of the soldiers cried, "a man upstairs threw that." The shock prostrated the four militiamen, Chamberlin, Keleo, Smith and another. It is stated that whatever it was it exploded on touching the sidewalk, showing that it must have been a bomb of some kind. Officers arrived upon the scene and thoroughly searched the building. The searching party arrested the only occupant of the building upon suspicion. His name is Emil Lutz, aged 30, a German and single. He was found in the third story front room which he occupied. The police are searching for his partner, Peter Enge. The most plausible theory is that the bomb was intended for the soldiers.

A WONDERFUL JUMP.

CINCINNATI, O., Aug. 6.—At Coney Island, a pleasure resort 10 miles above the city, this afternoon, two æronauts named Young and Williams jumped from a baloon 3,000 feet in the air, and by aid of a parachute reached the ground in safety. It is their second descent in a week.

MORE TROUBLE WITH THE IRONCLADS.

LONDON, Aug. 6.—The engines of the Collingwood and Inflexible have broken down for a time. These great ironclads drifted helplessly in the Straits of Dover, in great danger of collision with each other. Powerful tugs have been sent to their relief and are endeavoring to tow them into port.

KNAVE OR FOOL.

NEW YORK, Aug. 6.—Thomas J. Mooney, the man who tried to burn the steamship Queen, was very quiet to-day in his cell. He feels very well satisfied with his treatment, but occassionally breaks out in denunciations of the brass-buttoned anglo-maniacs, who, he says, have insulted him. He means the police, who laughed when he gave vent to his views yesterday. Detective Vail said to-day that from observations, he had come to the conclusion that Mooney is perfectly sane. Capt. Gastlin hopes to establish Mooney's connection with the Wyandotte affair, and he says he has several clues in his possession which will cause that result. He entertains the belief that Mooney is one of the men who operated so much in London, Glasgow, Newcastle Upon Tyne, and Liverpool.

THIS AFTERNOON'S DESPATCHES.

BRITISH WAR SHIPS AFTER THE FISHERMEN.

HALIFAX, Aug. 8.—The British war ships now in North American waters are to take a hand in settling the fishery trouble. The announcement has caused general surprise on all sides. It is the first time that the British authorities have interfered in the fisheries fight, and the unexpected change of policy occasions no little anxiety among Americans here. The men-of-war will not act as patrols, or to keep American fishermen outside the forbidden waters, but will make seizures when they cross the line. There are war ships available for service at the moment, Admiral Lyons' flag-ship the Bellerophon, the Canada, and the Pylades. These vessels are now in Halifax harbor. The present intention is to send the ships early next week to the gulf of St. Lawrence to reinforce the Canadian cruisers, there already. It is not likely that more than 3 war ships will be put at the work of seizing Yankees, but if it should be considered advisable as many more can be ordered into these waters from Newfoundland and Bermuda at a few days' notice.

THE AMERICAN ADMIRAL SPEAKS.

HALIFAX, Aug. 8.—Admiral Luce, commander of the United States naval force in North Atlantic waters, has authorized the statement that his ships were not sent to the gulf of St. Lawrence to prevent by force the seizure of American fishermen by Dominion cruisers, but rather to render such moral support as the mere presence of federal ships might afford. In the event of a seizure of an American fishing vessel for an alleged violation of the laws of the Dominion, the case must be fought out, he says, in the courts.

HARVEST REPORTS.

LONDON, Aug. 8.—The wheat crop of France it is estimated will amount to 110,000,000 hectolitres, against 105,000,000 in 1886. The Russian harvest reports are satisfactory. The crop is especially good in Bessarabia and Podalia, and doubtful in Volhynia, Minck, and Moheeler owing to excessive rain. It is fair in the provinces bordering on the sea of Azov and the river Don, and exceptionally fine in Charkoff and Pottava.

THE MEETING OF THE EMPEROR'S

GASTON, Aug. 8th.—The scene at the parting of the Emperors yesterday was touching, Emperor William pressed the hand of Emperor Francis Joseph and said: "By the Almighty's leave, revoir until next year." Emperor Francis Joseph replied, "It is sure and certain." It this point Emperor William was overcome with emotion, he kissed Emperor Francis Joseph again and again and they finally separated.

THE CHINESE WALL.—An American engineer, who has made the subject a special study on the spot, has calculated that the Chinese wall has a contents of 18,000,000 cubic metres (6,350,000,000 cubic feet). The cubic contents of the Great Pyramid is only 241,200 metres. The material used in the construction of the Chinese wall would be sufficient to build a wall round the globe 1.8 metre (six feet) high, and 0.6 metre (two feet) thick. The same authority estimates the cost of the Chinese wall to be equal to the railway mileage of the United States (128,000 miles). The stupendous work was constructed in the comparatively short period of twenty years.—*Iron.*

Sir John Lubbock, M.P., has succeeded in teaching a black poodle dog "a little light reading." He took pieces of cardboard and painted on them the words "food," "out," "bone," "tea," etc. Then by associating food in the animal's mind with the card bearing the word "food" he succeeded in getting it to pick out the card bearing the word. Again, when asked if he wanted to go out he fished "out" the card bearing that word, and so forth.

In Algeria there is a small stream which the chemistry of nature has converted into true ink. It is formed by the union of two rivulets, one of which is very strongly impregnated with iron, while the other, meandering through a peat marsh, imbides gallic acid, another ingredient in the formation of ink. Letters and other manuscript matters are satisfactorily written with this singular natural compound of iron and gallic acid.

"Have you decided on your summer suit?" inquired Gus Snoberly of Charles Knickerbocker. "No," was the melancholy reply, "but I believe my wife has." "Your wife has?" exclaimed Snoberly, somewhat puzzled. "Yes, I believe she calls it a divorce suit. It's all the rage now."—*Exchange.*

A certain doctor having heard a village poet repeat some verses on a scolding wife was so delighted with them as to request a copy. "There is no necessity for that," said the poet; "you have got the original."

The Great French Remedy, Dr. Le-Duc's Periodical Pills. These Pills are compounded from the purest drugs, and from those only which are known to act upon the *Generative Organs* in Females. They are first enclosed in an air-tight capsule, and by this means made to retain their full strength for years in any climate. Ask us for private circular. A. M. HERRING & D. S. PRAISEWORTHY.—"Last summer I was entirely laid up with liver complaint, a friend advised me to use Burdock Blood Bitters, I did so, and four bottles cured me. I cannot praise this remedy too much." John H. Rivers, Orr Lake, Ont.

Daily British Columbian

Monday Evening, August 8, 1887.

A Crying Shame!

Notwithstanding all efforts made by the board of trade to have the buoys properly placed at the sand heads so as to make navigation safe, nothing has yet been done. Some time ago three new buoys were brought up by the Rithet and put down on the north side of the entrance to the channel, but Capt. Rogers informs us that the first of these buoys is so insignificantly small that it cannot be discerned at any distance, and it is of very little use as a guide. In perfectly clear weather a steamer can find her way into the Fraser without difficulty; but if it is rough, or if the atmosphere happens to be obscured by smoke or fog, it is impossible to find the channel without great risk and delay. For some time both fog and smoke have been prevailing on the straits, and vessels attempting to enter the river are compelled to grope their way until the buoys are found. No. 1 buoy ought to be large enough to be plainly visible at a distance of two or three hundred yards through smoke or moderate fog. We understand that Capt. Lewis, whose business it is to look after these things, is still waiting for the return of the str. Douglas. Now, the snag boat Samson is lying at this city idle—waiting for the Douglas also. The Samson is far better adapted than the Douglas for handling buoys, and it would be only the work of a day for her to place a good buoy on the north sand head until the channel has been properly surveyed and all the buoys removed to their proper positions. But we are told that the department refuses to engage men to perform this work. The practice has been to take the men off the Douglas and put them on the Samson for the purpose of placing the buoys, because it is cheaper than hiring a crew for the snag boat. It is monstrous that such a state of things should be permitted to exist for a single day. The supineness of the government with respect to the buoys, the channel, and the character of some of the steamers on the Westminster-Victoria route is seriously threatening to destroy the shipping of Fraser River. At an interview between the board of trade and Hon. Thos. White on Friday Mr. White mentioned that he had been warned against taking the steamer at Westminster for Victoria, and he and his friends consequently went via Vancouver! This is not an exceptional case. We have heard of others coming over the C. P. R. who have received similar advice and taken it. Moreover, it is a well-known fact that more than half the people who travel between this city and Victoria go by way of Vancouver because they will not take the delays and risks incident to the river steamers. When the people of this city come to realize the importance of obtaining reasonable attention to these matters they will probably make themselves heard; but the damage that is being done to the navigation of Fraser River through the indifference of the officials and people may be difficult to repair. In our issue of Saturday we printed a letter from Mr. John E. Lord which contained some remarks respecting the sandheads improvements worthy of serious attention. Whether the work already done there has been thrown away, as Mr. Lord states, we are not prepared to say. The importance of applying the appropriations obtained for that work intelligently and efficiently, however, no one will question; and the suggestions on that point contained in the letter seem to us reasonable. It will be very discouraging to find that the work of two or three years has been wasted, and that the undertaking will have to be commenced anew. Obviously the Dominion government would be saving much money, as well as greatly promoting the public interest, if it would set aside at once an appropriation sufficient to do the whole work, and have it completed with all possible haste. The estimate, we believe, is a very moderate one, and would not in the least embarrass the federal treasury. In the mean time we earnestly hope the authorities will see the immediate necessity of hastening to place proper beacons at the sand heads before a serious marine diaster adds to the responsibilities already resting upon their shoulders. There is an excellent buoy at the mouth of the old south channel (now not used at all); and if the Samson was commissioned to take up this buoy and put it on the north sand head so as to mark the entrance to the present channel, the existing danger would be materially lessened. If the Dominion government is too poor or too indifferent to the public interest to do this, let the city subscribe enough money to put the Samson in commission one day and save the reputation of our river. We shall willingly be one of the subscribers.

A. Mayhee, Merchant, Warkworth, writes: "I have sold some hundreds of bottles of Dr. Thomas' Electric Oil, and it is pronounced by the public 'one of the best medicines they have ever used'; it has done wonders in healing and relieving pain, sore throats, &c., and is worthy of the greatest confidence."

EXTENSIVE

AUCTION SALE

—OF—

Live Stock, Farming Implements, Growing Crops of Oats, Wheat, Turnips and Potatoes,

AND THE

Far Famed Homestead of Crescent Creek Island, near Ladner's Landing.

I HAVE RECEIVED INSTRUCTIONS from Dr. Kent, who, on account of the death of his only son, has determined to retire from farming, to sell by Public Auction on

Thursday, 11th August, 1887,

On the Premises, at 10 a. m., the whole of his valuable Homestead, which consists of 377 acres (more or less) of some of the very best land in British Columbia, and which will be offered in lots as follows:

1. 57 acres, with Homestead, which consists of large Barn, Farm Buildings and Dwelling House, 3 acres of Orchard, in which are many choice varieties of apple and other trees. A large portion of this land is thoroughly cleared, fenced and cropped, which, upon inspection, will be found exceptionally rich and fertile, and the crops, which are standing, will speak for themselves.
2. South ¼ Section—160 acres; all bottom land.
3. North ¼ Section—160 acres; all bottom land.

The Crops consist of Oats, Wheat, Turnips and Potatoes—all of which are good and will be sold as they stand.

In Barn—9 tons Oats and a large quantity of new Hay, unbaled.

35 head of Stock, consisting of 1 yoke of Work Oxen, 10 excellent Milch Cows, and a number of Heifers, Steers and Calves.

Also, a number of Farming Implements and 4000 Snakes.

This will be found a good opportunity for any parties who are seeking improved Farms, there being a great scarcity of really good farms in the market.

Terms of Sale—Negotiable notes at 3 months will be accepted for all sums above $50; under that amount, net cash.

T. J. TRAPP,
dwjy28td Auctioneer.

ESTABLISHED 1875.

The West Shore

FREE

For the balance of 1886, including the mammoth holiday number, to all who subscribe now for 1887.

With the January issue THE WEST SHORE will begin its twelfth year. Every number contains original illustrations of *scenery, towns and industries in the* Pacific Northwest, equaling in excellence the best productions of Eastern magazines. The contributed articles, general literature and stories are entertaining and carefully edited, making the magazine a chaste family visitor. The comments on events of interest to this region and the large amount of information concerning our various resources and the progress of development given in every number render it extremely valuable. No family can afford to do without it, and every one financially interested in the Pacific Northwest or desirous of learning its resources will find it invaluable.

If the subscription price ($2 per year) is sent in now you will be entered for 1887, and the remainder of 1886 will be sent as a *premium.*

L. SAMUEL,
(ad lib) 122 Front Street, Portland Or.

"I take only one English weekly paper, *The Spectator*, and one Canadian, *The Week*, and as a rule I should be puzzled to say which I should miss most."—From a letter by Thomas Hughes, author of "Tom Brown's School Days."

The Week:

A Canadian Journal of Politics, Society and Literature.

PUBLISHED EVERY THURSDAY, AT $3.00 PER ANNUM.

Independent in politics, THE WEEK appeals by a comprehensive Table of Contents to the different tastes which exist within the circle of a cultured home.

An average of fifteen short, crisp Editorials is given in each number upon CANADIAN, AMERICAN, and ENGLISH POLITICS and LITERATURE.

Amongst the regular contributors is Professor Goldwin Smith; and a distinguished public man in London has kindly undertaken to supply regularly an English Letter. Paris and Washington Letters will appear at regular intervals.

In addition there are special contributions from some of the ablest writers in the Dominion and the United States.

THE WEEK

has now entered upon its third year with most encouraging prospects, and with many new features.

C. BLACKETT ROBINSON,
5 Jordan St., Toronto, Ont.

Sample copies free on application.

THE WEEK is one of the most influential journals in Canada.—Truth, London, England. fel3

Fire! Fire!

TESTIMONIAL!

Vancouver, 23rd June, 1886.

MR. G. ROBERTSON,
Vancouver:
Representing Goldie & McCulloch,
Galt, Ont.

SIR.—We the undersigned having witnessed the terrible fire which wiped out of existence the young city of Vancouver, on the 13th inst., have, after the fire, examined the safes sold by you, some of which were put to the most severe test, *having been surrounded by large quantities* of lard and bacon, and we are pleased to testify to the remarkable manner in which every Safe sold by you preserved its contents, not only books and papers, but also thousands of dollars in paper money were taken out in perfect condition. We can, therefore, with the greatest confidence, *recommend them as thoroughly fire proof:*

THE BRITISH COLUMBIAN

Printing Company

(LIMITED.)

ON THE 10TH OF JANUARY, 1887, the COLUMBIAN Newspaper and Printing Concern was purchased by a joint stock company composed of citizens of New Westminster, to be known as the "British Columbian Printing Co., Limited." The concern has been for nearly a year owned and controlled by the British Columbia Stationery and Printing Company, of New Westminster, Victoria and Vancouver. The object of the new company is to continue the publication of the BRITISH COLUMBIAN newspaper and carry on a general printing and publishing concern, controlled entirely by those whose individual interest it will be to promote the development, especially of the Mainland. There will be no slackening of the energy hitherto displayed in the management of the establishment, and its patrons may rely upon receiving full value for their money. The COLUMBIAN will continue to be entirely independent in both Dominion and provincial politics, and will devote itself to the advancement of such schemes as may be considered in the public interest. The concern is now entirely separate from any other business, the book and stationery establishment in this city having been taken over by Mr. T. R. Pearson, who will continue to carry it on in his own name and for his own benefit. It is desirable that a daily newspaper should be maintained in this city, and the new company asks for public patronage on the ground that it is engaged in an enterprise calculated to promote the public welfare. It asks that the COLUMBIAN be judged on its own merits and supported only so long as its policy is consistent with its professions. In consequence of this business change all accounts due the concern must be settled without delay so that the books of the former company may be adjusted and closed. Address all communications and remittances to

The World's Big Guns.

The havoc made in the Alanta's fixtures by the inadequacy of her gun carriages to hold and control her pivot guns, calls attention to the fact that while the latter are very powerful for an unarmored cruiser of her size, they would make a small show compared with the heaviest ordance now carried in war ships. The progress of thirty years in constructing heavy guns has been extraordinary. The largest pieces found on war vessels in 1860 threw a ball weighing sixty-eight younds, with an initial velocity of 1,570 feet per second, and an energy of 1,100 foot tons. Now initial velocities in high-power guns have been increase to 2,100 feet; projectiles in the maxium weigh as much 2,300 pounds, and in some cases are propelled by charges of nearly half a ton of powder, while the 110-ton guns of the Ben bow reach an energy of about 60,000 foot tons. Passing over the triumphs obtained by intermediate calibres, which were remarkable in their day, we find the largest French steel guns, such as are used for the armament of the Terrible, completed at Brest, the Requid, built at Bordeaux, the Indon.itable, built at L'Orient, and the Caiman, finished at Toulon, weigh each about seventy six tons. They deliver a projectile weighing 1,716 pounds, with a muzzle velocity of 1,739 feet per second, and a muzzle energy of 30,000 foot tons. The guns are rifled breechloaders. The French have other powerful guns, those constructed on the Bange system being well known. The Armstrong guns now mounted for service in the Italian armorclads Duilio, Dandolo, Italia, and Lepanto weigh 100 tons each and throw a projectile of 2,000 pounds. These have long been familiar, but the later breechloading guns are improvements over the early muzzle loaders. The most powerful of them take a powder charge of about 772 pounds, and have an initial velocity of 1,835 feet second and a muzzle energy of about 51,000 foot tons. Guns of 105 tons have also been made at Elswick for the Francesco Lauria, the Andres Dona, and the Morosini. In these the weight of the charge is 600 pounds, the weight of the projectile 2,000 pounds, the muzzle velocity 2,019 feet per seeond, the muzzle energy 56,547 foot tons. These will undoubtedly prove most formidable weapons. The largest Krupp gun weighs nearly 119 tons. It is over 46 feet long, has a calibre of 15¾ inches, and fires a shot weighing 2,314 pounds, with a muzzle velocity of 1,800 feet. The maximum elevation gives it a range of nearly 7½ miles. Its power of penetration into wrought iron is estimated at about 41 inches at the muzzle, 31 inches at the distance 1,100 yards, and 30 inches at 300 yards. At the distance of three miles its striking average is still about 28,000 foot tons. The Italians have two of these guns mounted in a shore battery, for which purpose they are intended. The English 110-ton gun, manufactured at Elswick, is about 44 feet long, and its actual weight 247,785 pounds. The screw block removed in loading, weighs 2¼ tons. The projectile is a bolt weighing 1,800 pounds, and 16¼ inches in diameter. With 850 pounds of powder the actual muzzle velocity attained 2,078 feet, and the muzzle energy 34,000-foot tons; so that with 850 pounds, which the gun is constructed to use, an energy on the projectile of 62,700-foot tons is expected. The recoil of the gun is very small. The British also have a powerful new gun in their 63-ton steel breechloader, which will be carried on the Rodney. It is expected to throw a 13¼-inch shot, of 1,250 pounds, with a powder charge of 580 pounds, and to attain 2,100 feet muzzle velocity. Should these expectations be realized, this gun, though much lighter, will be more destructive than the 80-ton gun of the inflexible, which takes a projectile of 1,700 pounds with a cartridge of 450 pounds, reaching a muzzle velocity of 1,600 feet. It is said that the next step attempted in heavy gun construction will be that of a 150-ton monster, this project being attributed to the Essen works. It would throw a shell six feet long, weighing a ton and a half. There are also some guns under construction which are expected to accomplish great results on somewhat new theories, as in the case of the one manufactured for Colonel Hope. This is to take an enormous powder charge, and to have correspondingly great penetrative effect. But without going into the possible successes of the future, those which have already been achieved are sufficiently astonishing.—N. Y. Sun.

Business Directory.

The following Business Directory relates only to persons whose advertisements appear in the DAILY COLUMBIAN. It has been found true, as a rule, that persons who advertise liberally are liberal in their dealings, and many persons make it a rule to give preference in their dealings to those establishments which advertise freely. WHAT PHYSICIANS SAY ABOUT THE
STARR KIDNEY PAD.

"Treatment by Absorption has for some time been recognized by Medical Men to be the most simple and effectual means of conveying to Diseased Organs, "Curatives," but in cases of Kidney Disease and Complaints attendant thereon, successful treatment was practically impossible until the introduction of the Starr Kidney Pad. It costs less than a single prescription and is immeasurably *more decisive and effective than any quantity of internal Medicinal dosing.* Worn immediately over the seat of Disease, its curative properties become absorbed by the diseased and enfeebled Organs, continuously and directly, as required to insure in return their healthy action and original vigour. It is comfortable to the patient and pleasant in its effects, and cures when nothing else can. The Starr Kidney Pad accomplishes positive, decisive results. A more valuable discovery as a true remedy for Kidney Diseases was never made.—*Medical Gazette*

The Starr Kidney Pad, manufactured in Toronto, is a permanent sure cure for diseases, disorders and ailments of the Kidneys, Bladder and urinary secretive system, or attendant complaints, causing pain in the small of the back, sides, etc., producing urinary disorders, such as too frequent, scanty, difficult, painful or copious micturition, inability of retention and sedimentary urine, dropsical symptoms, etc., denoting the presence in the system of diseases common to the urinary secretive organs—known as gravel, catarrh of the bladder and passages, Bright's disease, diabetes, dropsy, piles, nervous debility, etc. Send for pamphlet to LANGLEY & CO., Wholesale Agents, Victoria. HEAD OFFICE, TORONTO, CANADA

A HOME COMPANY.

This Association merits the confidence the Public is reposing in it from the following FACTS:—

The Security offered to policy holders is unsurpassed by any Company doing business in Canada,

It has no schemes of insurance, but the well-established lines, hence the policy holders cannot be misled as to their contracts.

Its statements to the public can be readily understood, its cash statement showing every item of income and how expended.

Its position is ascertained annually from a detailed valuation in which every item of liability is included.

Its progress has been unexampled in the history of insurance in Canada.

Its policies are indisputable after three years, and non-forfeitable after two years' existence.

Its profits are distributed upon an equitable basis. The profits to one class of policy holders are not lessened to give larger profits to any other class, which method affords superior advantages over the uniform bonus plan of distribution.

Liberal Conditions as to Residence and Travel.

☞ Persons sending in advertisements should be careful to state whether they are to appear in the Daily Edition, or the Weekly, or both.

D. ROBSON, Manager.

NEW ADVERTISEMENTS THIS DAY.

Tenders ..... R. I. Bentley

Daily British Columbian

Monday Evening, August 8, 1887.

Tenders are called for supplying the Asylum with milk for the coming year.

There was a fine rain at Chilliwhack yesterday, which will greatly benefit growing crops.

Among the freight from east today was 2 carloads of firebrick consigned to Dougles Island, Alaska.

8 Cars of freight arrived today from the east, including a car of machinery for the Brunette Sawmill Co.

The electric light was tested at Vancouver Saturday night, and the *News* says it gave entire satisfaction.

The thunder storm of yesterday has cleared the atmopshere, and it has been extremely pleasant today.

A large separator, (Minnesota Chief) is on the C. P. R. wharf consigned to Chapman & Bryne, North Arm.

The Gladys brought down several thousand bricks to-day from McLellan's brick yard at Port Haney.

The Northern Pacific Railway has made the rate for passengers from the east the same as to Portland, Tacoma and Seattle.

Among the freight brought over by the str. Dunsmuir on Saturday was 2½ tons of wool from Lasqueti Island for the woollen mill.

There is nothing equal to Mother Graves' Worm Exterminator for destroying worms. No article of its kind has given such satisfaction.

The excavation for the new Bank of British Columbia building will be completed in a few days, and building operations will then begin.

Salmon are now ascending both branches of the Thompson in large numbers, but their quality is not superior.—*Kamloops Sentinel.*

"Two knots an hour isn't such bad time for a clergyman, smilingly said the minister to himself, just after he had united the second couple.—*Merchant Traveler.*

Copies of the new British Columbian Directory have been delivered to the Victoria dailies, and are very favorably spoken of, both as to matter, printing and binding.

It is reported that the British government has decided to subsidize the C. P. R. route for the transportation of British mails, but the report is probably premature.

Work on the Red River Valley Railway to the boundary of Manitoba goes on rapidly. It is generally believed the Dominion government will do nothing more towards hindering the scheme.

The city schools re-opened this morning. There were 26 in attendance at the high school, and 246 at the public school, making 272 in all. This is considered a very good showing for the first day.

It was expected that the dyes for the woollen mill would arrive this evening. If they come the mill will probably be put in operation to-morrow or Wednesday. There are now something over five tons of wool on hand.

The str. Rithet arrived from Victoria at 6:45 last night. She brought 30 tons of freight for the city and up-river, and 26 tons for the railway. The Rithet delivered a large lot of tin at the canneries on her way up.

In the Vancouver police court Saturday morning fines amounting to $180 were imposed on inmates of disreputable houses. In this city these houses are permitted to go on, apparently, without any interference at all from the police.

Our friend of the Victoria *Times* still persists in stating that Mr. Higgins has been most shamefully used by the government in connection with the treasurership. This is in spite of the protests of Mr. Higgins, who himself proposed Mr. Turner as treasurer.

The main pipes for the Kamloops water-works are now being laid from the reservoir down towards the sawmill and along Victoria st. eastward to the new town. Great activity is manifested in the work and it is expected that the water will be soon available to our residents.—*Sentinel.*

PARLOR SOCIAL.—A Parlor Social under the auspices of the Methodist Ladies' Aid will be given at the residence of Mr. D. S. Milligan, Agnes st., on Wednesday evening, Aug. 10th, at 8 o'clock. Refreshments and a suitable programme. Admission, 25 cts.

ANOTHER EVIDENCE.—The people of Victoria, having boycotted the C.P.R. steamers because they wouldn't stop at that city, the *Times* now calls for a *boycott against the telegraph lines* until a better service is provided! We are of opinion that Mr. Dunsmuir was not far astray when he said in the legislature: "Victoria is the most sectional and selfish place in the province: it wants to get everything and give nothing!"

ANTHRACITE COAL.—It is expected that shipments of coal from the anthracite mines of Alberta will be made regularly to this province during the fall and Winter. We have not yet heard of any arrangements for supplying the market at this city. If our citizens were sure of obtaining a regular supply at fair prices, many of them would prepare to use this kind of coal. It is infinitely superior to the bituminous coal for domestic purposes, and we hope to learn that our market will be supplied at prices which will bring it within the reach of all.

FAST TIME.—Mails which left Yokahama on July 13th were delivered on Puget Sound on July 30th. This is the service furnished by the new steamship line between Japan and British Columbia. It goes to show that the most available route for quick transit to the Orient is from ports of the Pacific Northwest. When we take into consideration the fact that the steamships now in use on the new line are slow as compared with the "gray-hounds" of the Atlantic service, we can easily predict what may be accomplished in the future towards reducing the time of passage between America and Asia.—*Seattle Post.*

STILL HEDGING.—We must protest against the hedging of the *News*. His claim was that he had a circulation in this city larger than the combined circulation of the *Guardian* and *Columbian*. He now, apparently, wishes to compare the circulation of his paper with that of the *Columbian* only. This we cannot permit. When he gets through with proving (or failing to prove) that his circulation in this city is greater than the *two* Westminster papers, we shall be ready to arrange for a comparison of circulation between the *News* and the *Columbian*. The terms of our challenge required him to put up his deposit first, and we should cover it, that proposal was perfectly reasonable, and we have already insisted upon our cotemporary showing it to be unfair or else accepting it. Until he does one or the other there is nothing remaining to be said.

THE NEW SILVER BONANZA.—Work at Illicillewaet mines is being pushed with energy and exceptional evidences of prosperity are evident. Messrs. G. B. Wright & Co. have over 50 men at work mining, and many more engaged in building trails through their mines. The mines are situated about 3 miles from Illicillewaet station, and about 5,000 feet above the C.P.R. track. The ore mined is chiefly silver and is very rich, some samples assaying $2,000 to the ton. $700 to the ton is said to be the average assay. Mules are now used to pack the ore down the mountain, but Messrs. Wright & Co. propose shortly putting in a wire cable road or cars at an early date. The C. P. R. company have put in a siding to the foot of the mines and ore is being shipped daily. The crushing and other machinery recently introduced is being worked and things are booming generally. Messrs. Kennedy and Corbett, also have a force of men at work and are striking it rich. Prospectors are numerous, and everything points to a rich future for Illicillewaet.—*Kamloops Sentinel.*

AN OLDFASHIONED STORM.—One of the most terrific thunder storms ever witnessed by the most ancient inhabitant struck this city shortly after two o'clock yesterday afternoon. Suddenly the heavens grew black with angry-looking clouds, and rain began to fall gently; but no person took much notice of the elementary conflict until a vivid flash of lightning, accompanied by a deafening peal of thunder startled the whole city. Rain then fairly poured down. Inside of 10 minutes there were three terrific explosions of electricity, and during that time sixtenths of an inch of rain fell—equal to 600 tons to the acre. The thermometer fell from 67 to 57. Capt. Peele, who was observing the atmospheric commotion, asserts that the first thunderbolt passed through the Methodist Church, the second struck the river, and the third struck the barn of Mr. Joseph Wise, west of Douglas st. The barn is the only place where the fantastic fluid left its mark. The thunderbolt struck the front door and seems to have run up towards the roof, knocking off several large splinters but doing no damage. Capt. Peele thinks the building was probably saved by the telephone wire which is attached to it. A small quantity of hail fell, and the rain produced quite a flood throughout the city. Drains and culverts were quickly choked, and it will cost not less than $100 to repair the damage. At Vancouver very little rain fell. About 4 miles this side of the Brighton House hail fell to the depth of 4 inches. There was a heavy shower at Ladners, but no rain fell at English's cannery. At Port Haney and up as far as Harrison River there was a slight shower. It is very seldom that the people of this city have the opportunity of witnessing a thunder storm, and it is many years since one equal to that of yesterday has occurred.

Mr. T. C. Borchard, public school teacher, Norland, writes: "During the fall of 1881 I was much troubled with Biliousness and Dyspepsia, and part of the time was unable to attend to the duties of my profession. Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure was recommended to me, and I have much pleasure in stating that I was entirely cured by using one bottle. I have not had an attack of my old complaint since, and have gained fifteen pounds in weight."

THE MINE TO BE FLOODED.—The management of the Vancouver Coal Company have decided to flood the new or diagonal slope of the No. 1 shaft, having come to the conclusion that that is the only practical way to prevent the "heating" bursting out into active flame and destroying that portion of the mine. This will delay the recovery of the bodies now in the mine for some time, as they cannot be recovered till the water is again pumped out. The officers and employees of the company have spared no expense and have run a serious risk to their lives in the endeavor to recover the bodies, but the "heating," or fire as it is generally termed, made the further search impossible for the present. This will be distressing news to those who have the bodies of their beloved ones in the deep recesses of the mine, but it must be some consolation to them to know that the company has spared no expense, and their fellow miners have nobly risked their lives in the recent endeavor to recover the bodies of those now remaining in the new slope of the No. 1 shaft.—*Nanaimo Free Press.*

Mrs. E. H. Perkins, Creek Centre, Warren Co., N. Y., writes: She has been troubled with asthma for four years, had to sit up night after night with it. She has taken two bottles of Dr. Thomas' Eclectric Oil, and is perfectly cured. She strongly recommends it, and wishes to act as agent among her neighbors.

The Sale of Lots.

The following lots were disposed of at the auction sale of city reserves on Saturday evening: Lot 3, blk. A sold to J. G. Jaques, for $505; Lot 19 blk. A sold to F. Devlin, for $505; Lot 3 blk. B sold to J. Cunningham, for $455; Lot 20 blk. H sold to J. Wintemute, for $255; Lot 28 blk. K sold to H. G. Cobb, for $115; Lot 11 blk. I sold to E. Ogle, for $225; Lot 36 blk. K sold to T. Forfar, for $105; Lot 37 blk. K sold to S. G. Tidy, for $105.

Personal.

Wm. Wolfenden, of the firm of Beckett & Co., returned from Victoria yesterday.

A. J. Armsrong, who has been spending several months in Ontario, returned to the city on Friday.

C. M. McNaughten leaves for Harrison Hot Springs to-morrow. Mr. McNaughton will remain there a month.

Horatio Webb, of Chilliwhack, arrived down by the str. Gladys to-day, and will remain in the city till Wednesday.

We understand that Mr. John Kirkland, of Ladners, and Mrs. Kirkland, intend going east shortly to visit their Ontario home.

Hon. Thos. White arrived at Victoria Saturday night. He will remain there some days, and promised to pay Vancouver a visit on his return.

We understand that Geo. A. Ashwell, now on a visit to England, will leave for home on the 20th inst. He expects to be back for the exhibition.

Passengers per str. Gladys to-day: 3 Indians, T. Dunnville, 2 Chinamen, McClure, McLaghlan, Trommier, Howison, LaCroix, Cooper, O'Brien, Mrs. McLaren, Mrs. McDonald, H. Webb, and several others.

Passengers per str. Rithet yesterday from Victoria: J. A. Laidlaw, M. J. Rowe, W. H. Burr, R. Cotton, Wm. Wolfenden, S. McDonald, R. J. McCann, Peterson, Misses Peterson, Coughlan, Getchamey, Irvin, Gerrard and wife, Howay, Duncan, and others.

About the Horse.

The following article on the horse was picked up on the street this afternoon: "The horse is a pretty large animal; some are as high as a man and others are no larger than a good sized dog. They are very strong and can draw very heavy loads. Some horses have a very bad temper and kick at everybody that comes near them, while others will let you do nearly anything to them. There are race horses that have been known to run a mile a minute, but others are not so fast. We use horses for drawing things. They eat hay and oats and green grass and some will eat straw. The harness is composed of many parts, among the important ones are the collar, tugs, reins and bit. Horses can be kept in nearly any country; they are kept in stables or let run loose. Some men let a band of horses out and after a while they get men called cow-boys to bring them in; they are very hard to catch and have to be lassoed."

Along the C. P. R.

INTERESTING NOTES FROM THE SELKIRKS—MINING NEWS—IMPROVEMENTS, &C.

A gentleman from the interior informed a Columbian representative today that affairs in the Selkirks are very lively this summer. Large numbers of men are constantly arriving and being employed by the C. P. R. in building their snow sheds. Mr. D. McGillivray's snow sheds at Summit Lake are nearing completion. The boom of Illecillewaet is something extraordinary. Houses are being hurriedly built in all parts of the town. Every hotel is full of strangers and every train dischorges a number of miners for the new mines that are being opened up in the vicinity. Mr. G. B. Wright is shipping about 2 carloads of ore weekly to the smelting works at Denver, Colorado. It is said there are more people now in Illecillewaet than there were at Rogers Pass last summer. Big Bend is also looming up. A miner from there exhibited a piece of quartz in which several nuggets of gold were visible. He refused $100 for the specimen. The C. P. R. are making gigantic improvements along the line of railway. Snow sheds are being built, steep cuts and grades are being repaired, the road-bed is being well balasted, and everything possible done to provide against delay and accident. There are about 350 guests at Banff. All other towns along the railway are experiencing a season of prosperity and activity except Revelstoke, which is said to be almost deserted.

Westminster vs. Vancouver.

On Saturday a club of cricketers from this city went over to the salt water terminus to play the Vancouver team. Wickets were pitched at 1:30 and the game was finished about 6:30, Vancouver winning with 93 runs and one innings to spare. The unequal character of the game is explained by the fact that while the Vancouver club has been organized and in practice for some time, Westminster really has no club at all, and those who represented this city had been practising only a very short time. Moreover, three of the players who were expected to take part could not go, and their places had to be supplied as best they could from Vancouver. The players from this city speak in high terms of the manner in which they were received and entertained by the Vancouver club, who, after the game, entertained the visitors to a dinner at the Gold House. The following is the score:

WESTMINSTER.

FIRST INNINGS.

H Tyler, c Beck, b Prenter	5
H Brooke, c Rand, b Clinton	0
M Woods, c Johnson, b Prenter	7
W J Walker, b Clinton	3
A G Gamble, run out	0

C G Johnson, b Woods	3
A Larwell, not out	1
Byes	20
Leg byes	5
Wides	2
No balls	1
Total	139

We understand that it has been arranged to play a return match at this city on Saturday the 20th inst. We have no doubt our players will then give a better account of themselves.

THE LAWS OF THE MEDES AND PERSIANS were not more immutable than those of nature. If we transgress them we suffer. Sometimes, however, we break them inadvertently. Damages frequently take the form of Dyspepsia, Constipation and Biliousness, which can be easily repaired with Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure, the Great Blood Purifier and renovator of the system.

"It's as warm as an oven in here," said a citizen as he entered a lawyer's office. "So it should be, for it is here I make my bread," said a man of deeds.

Holloway's Corn Cure is the medicine to remove all kinds of corns and wartt, and only costs the small sum of twenty-five cents.
