MEN'S WOOL SHIRTS and DRAWERS, from 75c. to $3.00.

Also large range of MEN'S and BOYS' JERSEYS and SWEATERS.

Open Until 9 o'Clock To-Night.

Marshall Smith

W. C. T. U.

On Friday evening, the 21st inst., Mrs. Rutherford, of Toronto, Dominion president of the W. C. T. U., gave a splendid address in the Methodist Church, here, to a small but appreciative audience.

Mrs. Rutherford told of the great difficulty of getting legislation along the line of temperance reform and urged the women of this community to not cease their efforts, especially in view of the coming Dominion elections, and strongly urged all women to become members of the W. C. T. U., and lend their assistance for the safeguarding of the nation and the home. The speaker's strongest and most earnest appeal was for all to use their greatest effort for the abolition of the cigarette, which is undermining the youth of our land—both girls and boys. The speaker told of the great difficulty of getting a bill passed to that effect, notwithstanding the fact that a large majority of the members of parliament declared that it was a great evil.

A meeting has been called for the first Tuesday in November, at 2 o'clock, in the Methodist Church, Ladner, to elect officers for the local union. Let all the women of our community rally for the defence of home and native land. The conditions of membership are: To sign the total abstinence pledge, and pay $1 a year membership fee. Gentlemen may become honorary members on the same conditions.

Election Day on Thursday next.

PHOTOS—Now is the time to have your photos taken at the advertising price of Cabinets, $3 per dozen, regular price, $5. Four days only, Monday, Oct. 31st, last day. Studio next to Robt. May's Tinshop. Fricke & Schenck—Home Office, 61 Cordova street, Vancouver.

Delta Lodge, No. 12, A.O.U.W., meets on Tuesday next, in Oddfellows' Hall, at 8 p.m.

Mr. J. McCallan has returned to Ladner after an enjoyable visit to Alberta. He was much pleased with the country and what he saw. On his return he stopped over at Banff Hot Springs for a few days. Mr. McCallan's health is much improved, and he was around town shaking hands with his numerous friends.

PROGRESSIVE DELTA FARMERS

ASSEMBLE TO LISTEN TO TALKS BY EASTERN FARM EXPERTS.

At the meetings of the Delta Farmers' Institute, held on the 17th and 18th instant, Messrs. McMillan and Reed, of Ontario, delivered the most interesting lectures heard here for some time. Large audiences greeted them and listened very attentively and with profit to themselves. We hope to hear more like them. Their subjects were practically the same both at Ladner and East Delta.

The regular fall meeting of the Delta Farmers' Institute was held in the town hall. In the absence of the president, Mr. A DeR Taylor was voted to the chair. About thirty of the progressive farmers of the Delta were present to try and increase their knowledge of farming by listening to the wise men from the East.

Mr. McMillan was first introduced and commenced a very instructive address on "Breeding and Feeding for Beef," by congratulating his hearers on the fact that "their lines had fallen in pleasant places." He had now seen most of British Columbia, but the Delta far surpassed any other part of the province that he had visited. He thought one reason why so few of the farmers attended these meetings was that they were already rich, and did not need instruction in the art of farming. He felt that it was presumption on his part to come west to try to teach the farmers in British Columbia, especially as the climate and other conditions were so different to what they were in his own Province of Ontario; however, the underlying principles of agriculture were the same everywhere, and he hoped to be able to tell them something, but the best work was the practical work which they did themselves. He advised them to encourage local talent at their institute meetings and to exchange their ideas and the result of their experiences. In breeding cattle or horses as in every other business the success or failure was in the man. We found men in every line of business who were successful, while others failed. The reason for this was that the successful man paid attention to every detail, worked energetically and with determination to succeed.

In breeding for beef, the first requisite was good milking cows. He believed in the general purpose cow. The best milking cow produced the best animal. He then described the points by which a good cow might be known. The second requisite was to breed the cow to a pure bred bull, one with a long line of ancestors, noted for their good qualities and the power to transmit them to their progeny.

It paid better to pay four or five dollars for the services of such a bull as he had described than to have the services of a scrub for nothing. He warned them against buying animals in the east from breeders of no note, saying that many a pure breed was no better than a scrub. In order to develop the milking qualities of the beef cow, he recommended milking the cow and feeding the calf, instead of allowing the calf to suck. Another mistake he warned them against, was using a scrub or an inferior animal of any kind on account of the fact that the first conception had an injurious effect on the succeeding progeny. Instance the fact of a Yorkshire boar serving a black sow once, and afterwards used only on his own kind, yet little patches of black or a few black hairs were to be found on his progeny. Another mistake was in using bulls too young; the younger bull had neither the constitution nor the power to transmit that the older bull had. The bull was at his best from eight to ten years of age.

Another very serious mistake was made by crossing two breeds, Ayrshires with Jerseys, or Jerseys with Holsteins. It was a well established principal in breeding that such crosses retrograde, except in the case of crossing with the Durham bull, which stamps their general characteristics on their progeny very much more so than any other breed.

An important point not to be lost sight of was the feeding of the animal. The calf must be kept growing from birth to the block, and the earlier an animal can be brought to maturity the more profit. In the case of the males, they should be castrated before they are a week old. They recover so much more quickly than if left to a later date. There was no doubt that the best calf was got by allowing it to suck, but nearly as good could be had by proper attention and feeding. At first one quart of new milk was ample for the calf, which could be gradually increased to one gallon, never more. In addition he preferred oatmeal porridge with a little flax, clover hay and roots. The calf should be taught to graze the first year of its life, and the best results were to be had from housing them loose, that is, without tying.

In reply to a question, he said, 1,200 lbs. was a good weight for an eighteen months' old animal.

He then went on to speak of breeding heavy horses, remarking that the same conditions were required to breed good horses as good cattle. The mares must conform to the type, have good legs, good oval-shaped feet of a good size, fairly long pastern joint, short from knee to fetlock, sloping shoulders, broad chest, with legs set well under them, well sprung in the rib, short back and a full, mild eye; mare and sire should be sound in wind and limb. One reason why horse-raising was such a success in the British Isles was that they never used anything but the best sire obtainable regardless of the cost. Twenty pounds was no uncommon fee in Great Britain. He advised them to breed only from the best, they required no more feed than the scrub, but they were worth a great deal more.

Mr. Vasey asked if it was true that Canadian horses had poor feet, saying he had read statements to that effect in some farm papers.

Mr. McMillan did not agree to this, saying that Canadian bred horses held a very high place in the English market. They always bought horses from the hilly parts of Scotland, never from the lowlands as they had found those raised on the hills had better legs and feet. He strongly advised them to breed for quality.

He thanked them for their patient hearing, and resumed his seat.

When the applause had subsided the chairman called on Dr. Reed, who spoke on the subject "Influence of Natural Laws in Breeding." He began by saying that Providence had done so much for the Delta farmer that he was inclined to be indolent. He said he had travelled in America and Europe and had never seen such rich land as we had here in the Delta. He strongly denounced the pernicious practice some of our farmers have of burning straw.

Proceeding, he said, that Mr. McMillan had spoken from a practical standpoint on breeding. He wished to speak for a few moments from the theoretical view. A long time ago it was written that "Like begets like." Therefore, said he, breed from the best. Conformation or type are hereditary. It was now generally believed that tuberculosis was not hereditary, but there was a something which left a predisposition to disease which was hereditary. Longevity was hereditary, and so was early maturity. Habits good or bad were also hereditary. We do not take a collie dog to hunt ducks. We should bear these things in mind and always breed from the best.

Mr. McMillan was then called upon for a few words on "Soil Cultivation." He said that while climate and soil conditions were different in different sections of the country, the underlying principles of agriculture were the same everywhere. There were only two sources of plant food, the earth and the air. The soil contained all the elements of plant food, but not always in the same proportion, and, generally speaking, not always available. You might follow a system of rotation of crops which would impoverish the soil, while if another system were followed the soil would be enriched. No matter how rich a soil may be there is only a small percentage of plant

CONTINUED ON SECOND PAGE.

A Jolly Surprise Party.

Last Friday evening what turned out to be a genuine surprise party took place at the home of Mr. Cullis. The jolly crowd assembled to do honor to Messrs. Stokes and Cullis, our popular butchers. Both gentlemen were home at the time and it was whispered by many of those present that they really were surprised, as Mr. Cullis was busy at some carpenter work, while Mr. Stokes was fixing up the fire and was dressed in his butcher clothes. The merry crowd, after congratulating the surprised gentlemen, proceeded to indulge in games, dancing and singing. Refreshments were served about midnight, and the party disbanded at 3:30, with the guests singing "Auld Lang Syne." The occasion will long be remembered by Messrs. Stokes & Cullis and their friends. There was about seventy people present, among whom were the following:

Mr. and Mrs. Dick Shirley, Mr. and Mrs. Frank Sutherby, Mrs. H. Taylor and daughter, Mr. C. Arthur, who rode tandem (we were unable to learn her (?) name); Mrs. Loney and Miss Johnson, of Mud Bay; Miss L. Davis, Miss S. Duffie, Misses Leona and Lillie Whitworth, Miss B. Welch, Miss F. Fredericks, Miss A. Smith, Miss Everson, The Misses Thirkle and The Misses McWhorter. The gentlemen were Messrs. Wm. Holmes, R., B., and J. Pybus, H. Burr, G. Byrum, W. Byrum, J. Wade, Wm. Dickson, H. Guichon, Wm. Siddel, D. Kane, Fred Sutherby, Mr. McWhorter, Leslie Kerfoot, George Degin, G. Fredericks, Alf Coleman, Mr. Kinsbury, B. Frew and Messrs. Stokes & Cullis.

SUBSCRIPTION, $1.00 per year.

ADVERTISING RATES.

Casual Advertisements, 10 cents per line for the first insertion, and 5 cents per line for each subsequent insertion. The number of lines reckoned by the space occupied, 12 lines to the inch.

Rates for Commercial Advertisements can be had on application at this office.

Reading notices 10 cents per line for each insertion.

Birth and Death notices, 50c., Marriages $1.00.

Any special notice, the object of which is to promote the pecuniary benefit of any individual or company, to be considered an advertisement and charged accordingly.

All advertisements charged for until ordered out and paid for.

Correspondence invited on matters of public interest. Communications to editor must be accompanied by name of writer, not necessarily for publication, but as evidence of good faith. Correspondence must reach this office by Thursday evening.

GEO. R. MANLEY, Manager.

SATURDAY, OCTOBER 29, 1904.

PROGRESSIVE DELTA FARMERS.

CONCLUDED.

food available. This was a wise provision of nature, for if otherwise the plant food would back away and no vegetation could exist. If a soil was deficient in nitrogen it would be improved by cultivation, and also by the growth of clover. To get the best results land must be well drained. The heat required to evaporate the water should be used to warm up the soil. Drainage was a first requisite in successful soil cultivation. A wet soil would never produce a good crop.

Rotation of crops was of prime importance; first for the purpose of destroying weeds, and second to enable the farmer to produce better crops. Clover was the foundation of successful agriculture. A rotation in much favor in the east was, plow down clover in the fall, plant with corn or roots, followed by oats or barley, seeding with clover again.

Mr. McMillan closed a very interesting address by advising his hearers to grow clover.

Mr. Crandall, representing the Farmers' Advocate, was called upon for a few remarks. He said he thought he knew all about farming, but when he came to British Columbia he soon found his mistake. Climate and other conditions were entirely different to what he had been accustomed to. He was proud to be a farmer; there was no nobler calling than agriculture, no more interesting occupation than tilling the soil. Governments were paying more attention to that industry than to any other. He thanked them for the opportunity to say a few words.

On motion of W. H. Ladner, seconded by H. M. Vasey, a vote of thanks was tendered to the speakers, the meeting being brought to a close by an attempt to sing "Auld Lang Syne."

EAST DELTA.

Mr. McMillan was the first speaker, his subject being "Breeding Draft Horses." He began by expressing the pleasure he felt at meeting so many farmers and congratulated them on the fertility of their soil and the congenial climate which they enjoyed, contrasting the difference between our winters and those in the Province of Ontario, where stock has to be housed and fed for six months in the year. He thought farmers should get together oftener than twice for the interchange of ideas and the result of their experiences in their profession. He said Canadian horses were thought very highly of in the cities in the Eastern states, and that previous to the imposition of the high protective tariff imposed by the United States, a profitable business was carried on in breeding and selling horses to our American cousins. One of the reasons for our success in this line was to be attributed to our method of feeding. It was a well established fact that oats were better suited for the making of muscle than corn and Ontario farmers fed their horses oats. Our horses were held in high esteem in England, but the risk to be run in the ocean voyage was a bar to very extensive shipments to that market. With the advent of electric energy some people thought there would be little or no demand for horses, but with all the increased power the demand for horses was greater than ever. The natural result of this was that the man who paid particular attention to every detail in breeding and feeding horses, made more money than could be made with any other kind of live stock. Fillies may be bred at two years old if well grown. He preferred to wait until they were three years old. The care of the foal began with the conception, the mare should be treated with kindness and fed with a suitable ration. Some light work was better than running idle, but heavy loads and jerking should be avoided. It was best to have foal come in the spring, although good foals may be had in the fall. After foaling the mare should not work much while suckling the foal; and great care must be exercised not to allow foal to suck if mare has been heated and a part of the milk has been withdrawn, otherwise the foal is much better kept in the stable than allowed to run with the dam. The foal should be allowed to suck for four months and should have plenty of exercise. The foal should early be taught that the stockman is its best friend, and should be halter broken before it is a month old.

Mr. McMillan closed a most excellent address by urging his hearers to use only the best sires obtainable, if they wished profitable results.

Our Heave Remedy cannot be improved on. Try it. F. J. MacKenzie.

Delta Dyke & Drainage Scheme,

1895, By-Law No. 5.

A by-law to provide for preserving, maintaining, repairing and keeping in repair certain Dyking and Drainage works constructed under and by virtue of the provisions of the Delta Dyke and Drain By-law, 1895, of the Municipality of Delta.

Provisionally adopted on the 13th day of October, A. D. 1904.

Whereas under the said "Delta Dyke and Drain By-law, 1895," certain drainage and dyking works therein mentioned were and are fully made and completed and are now being operated in the said Municipality;

And whereas, under and by virtue of Section 261 of the "Municipal Act, 1897," it is provided that after such works are fully made and completed as aforesaid, it shall be the duty of the said Municipality making such works to preserve, maintain and keep in repair, the same at the expense of the lots, parts of lots, and roads, as the case may be as agreed upon and shown in the by-law when finally passed;

And whereas, under and by virtue of Section 263 of the Municipal Act, 1897," the council may pass a by-law to borrow upon debentures of the said Municipality, the funds necessary for the repairs and works required by said Section 261, and shall assess and levy upon the property benefited, a special rate sufficient for the payment of the principal and interest of the debentures;

And whereas, it is expedient and necessary to preserve, maintain, repair, and keep in repair the said works at the expense of the lots and parts of lots benefited thereby, and the sum of four thousand ($4000.00) dollars is necessary and is required therefor:

Be it therefore enacted by the said Municipal Council of the District Municipality of the Corporation of Delta, pursuant to the provisions of the "Municipal Act, 1897," and Amendment Acts, as follows:

1 That the Reeve of the said District Municipality may borrow on the credit of the Corporation of said District Municipality the sum of $4000.00, being the funds necessary for the said works, and may issue debentures of the said Corporation to that amount in sums of not less than $100.00 each, and payable within eleven years from the date thereof, with interest at the rate of five per cent. per annum, that is to say in eleven equal annual payments, the first of which shall be due and payable on the fifth of October, 1905, and all such debentures to be payable at the Royal Bank of Canada, Ladner, Province of British Columbia, and to have attached to them coupons for the payment of interest.

2. For the purpose of paying the sum of $4000.00 being the amount to be charged against the said lands benefited, and which said lands are numbered in schedule "A" of this By-law, and which are the lands numbered and described in the By-law known and described as "Delta Dyke and Drain By-law, 1895, of the Municipality of Delta," and to cover interests thereon for eleven years at the rate of five per centum per annum, and the following special rates, over and above all other rates, shall be assessed and levied in the same manner and at the same time as taxes are levied upon the undermentioned lots an dparts of lots, and which are the lands mentioned and described in the schedule of assessment in the said "Delta Dyke and Drain By-law, 1895, of the Municipality of Delta," and the amount of said special rates and interest assessed against each lot or part of lot, respectively, shall be divided into eleven equal parts, and one such part shall be assessed and levied as aforesaid in each year for eleven years after the final passing of this By-law, during which the said debentures have to run.

SCHEDULE "A."

Schedule of assessment on certain lands in Townships 3, 4, 5 and 6 for preserving, maintaining, and keeping in repair land reclamation, and drainage works for benefits to said Townships.

Nominal Owner of Property.	Description of Property.	No. of Acres.	Value of Improvements.	To Cover Interest for 11 Years at 5 Per Cent.	Total Special Assessment.	Annual Assessment for each year for 11 years.

MARRIED.

CREECH-CORBETT — At Port Guichon, and aboard the s.s. Victorian there, on the evening of Thursday, 27th inst., by Rev. Thos. Oswald, Walter Hamilton Creech of Victoria, to Mabel Bella Corbett of Surrey, B.C.

LOCAL NEWS.

Miss Alice Ladner returned home, Thursday, on the Transfer.

D. A. McKee was among the Transfer's passengers last evening.

Dr. Wilson and wife returned, on Thursday from a visit to Vancouver.

H. D. Benson paid a short visit to New Westminster, on Wednesday.

Mrs. J. Gilchrist, of Crescent Island, paid a visit to Vancouver on Wednesday.

Mrs. Robt. May returned home last evening after spending the day in Westminster on business.

Capt. C. H. DeBeck, of the dredge, King Edward, paid a short visit to Westminster, on Wednesday.

Remember the last night of the month, and keep your eyes on mischievous youngsters; yes, and old ones, too.

Mr. J. R. Wray, representing the Fit Reform Tailoring Co., of Vancouver, was doing business in town Thursday.

Capt. Street, of the Transfer, accompanied by his wife, are spending a couple of weeks' recreation at D. Woodward's.

Miss Richardson, of Mayne Island, returned home yesterday, after spending a few weeks visiting at Mrs. J. McCallan's.

Thanksgiving Day is set for the 27th November, and the King's Birthday, which is the 9th of November, is to be celebrated on the 24th of May, 1905.

W. J. Frederick returned home Thursday, after a few weeks' visit with his parents at Cherry Creek, and with his daughter, Mrs. J. S. H. Darroch, of Kamloops.

Mrs. Harrington left Thursday, for her home in Guelph, Ont., after spending the summer with Mrs. John Kirkland. She will be missed in church and musical circles very much.

J. Tamboline and Jno. Fraser, of Westham Island, have been making real estate purchases at Kensington Prairie, and Mr. Fraser expects to move about the end of the present year.

Jno. Fraser and D. McGregor returned home this week after spending a couple of weeks up the Howe Sound, hunting. Mesdames McGregor and Fraser accompanied them part way.

Now EGGS are valuable do not fail to protect your hens from lice with our "LICE KILLER," and keep them in good condition with a package of POULTRY POWDER—F. J. MacKenzie.

That incorrigible comp. made the serious blunder of omitting the name of Mrs. W. A. Kirkland from the list of those comprising the special choir organized for the Harvest Festival services held in the Methodist Church on the 16th inst., for which we offer an apology.

Alex. Davie and E. A. Bown were among those called for the Grand Jury, and F. Sutherby was on the list of Petit Jurors at the Westminster assizes this week. The docket being light the jurors were dismissed yesterday.

Mr. Tom Ladner paid this office a substantial visit Wednesday afternoon, having subscribed and paid for a year's subscription to the Delta Times. Mr. Ladner sends the paper to his son, who is attending McGill College in Toronto.

A Grand Masquerade Ball will be given by the Ladner Cornet Band on Friday evening, November 18th. A strong committee has been appointed to spare no expense to make this ball an event in Ladner history. See posters.
