We repair and sharpen lawn mowers, Bicycles and every kind of machinery. Come with the crowd.

Pacing Record Broken.

Cleveland, Aug. 6.—At the Glenville track The Broncho, the little daughter of Storm Cliffe, and which was recently purchased by Messrs. Rochen & Doble, of Winnipeg, Man., for $10,000, won the three heats of the free-for-all pace in 2:03, 2:03 1-2, and 2:05 3-4, thereby breaking the world's record for three consecutive heats by a quarter of a second, the world's record for pacing mares in a race, and the worlds record for the fastest third heat in a race. Charley Dean, The Broncho's driver, took her away fast, and in each heat was so far ahead of the other four starters that it looked like a parade.

Italian Steamer Sinks.

Three hundred were drowned on August 6 by the sinking of an Italian steamer. The vessel, which was bound from Genoa to Buenos Ayres had on board about 800 passengers, and was wrecked off Hormigas, near Barcelona, Spain.

SUICIDE AT VERNON.

R. J. Holmes, head clerk in the dry goods department of Megaw's store, committed suicide in his rooms some time Sunday night by firing a bullet through his brains. Not a great deal is known locally about the late Mr. Holmes. He was somewhere about 35 years of age and was a native of Orangeville, Ontario, where his people are well to do farmers. At an early age he entered the dry goods business and some years ago came west, being employed at Beaton's in Kamloops. He then moved to Portage La Prairie, and while there became engaged to be married. Early this spring, Holmes came to Vernon to take charge of Megaw's dry goods department. The evidence goes to show that deceased had been drinking for several days before his death. Holmes, before taking his life, wrote two letters, one to a young lady to whom he was engaged to be married and another to an old friend who happened to be in Vernon. The verdict of the jury given at the inquest was that the deed was done while the deceased was in a fit of despondency. Holmes must have very cooly and deliberately planned taking his life. He had endeavored to so arrange it that if by any chance the pistol bullet did not end his existence at once, there would be no escape; for he had gone down into the store and cut five or six feet of rope off a coil. This he placed about his neck in a slip knot, after removing his coat, collar and tie, and then mounting a chair he fastened the other end to a screw above the entrance, on the bedroom side, leading into the sitting room.

LOCAL NOTES.

A young man named A. Munro, was drowned on Monday in Comox lake.

Poor stationery will create a bad impression in the minds of your customers—and that is a sufficient reason why you shouldn't use it. Try some of the PROGRESS kind. Guaranteed to produce a good impression.

A Chicago banking house has collapsed, and president and other officers have absconded. The shortage in accounts amounts to $1,000,000, much of which has gone in real estate speculations.

On the afternoon of Sunday, August 19, there will be a total eclipse of the sun, which is visible throughout the whole of British Columbia and the states to the south of us. Only a small portion of the northern edge of the sun is obscured. It will be noticed late in the afternoon.

We are nothing, if we are not up-to-date on the S. & O. these days. Commencing with Monday last, the C.P.R. will run a Parlor Coach on the daily local. The coach is named Bethlehem, and is in charge of the orthodox colored gentleman, and twenty-five cents each is charged to ride in one of its sumptuous chairs from Sicamous to Okanagan Landing. During these cruel hot days when travelling is a drudge, we are sure that the car will be well patronized. Who has not experienced the luxury of travelling a la "edition de Luxe" "down east"?

That we are at last beginning to appreciate the value of the river is evident. Besides the boats which W. A. Dobson and Dr. T. Verner have had built, and the canoe which H. N. Hendrickson has just received, we understand that two gasolene launches are on the way, and that there is a possibility of a third one being sent for shortly. Pleasure seekers will soon have no need to buy their tickets for any further than Enderby, for we shall be able to give them all the sailing they would wish for.

Hawthornthwaite Speaks.

J. H. Hawthornthwaite, Socialist M. P. P., for Nanaimo in the local legislature, addressed a meeting in the Masonic Hall on Saturday night last week. A good number of supporters of the Socialist party were present, together with a number of citizens holding to other parties. Mr. Hawthornthwaite gave a most interesting talk on Socialism, outlining the principles underlying their party, and showing that according to their idea, besides the working, man the small storekeeper should join the movement and not be as now, its bitterest opponent. For, said the speaker, it would afford them protection from those huge mail order stores, which were slowly, but surely eating away their trade.

Turning to the politics of the movement, Mr. Hawthornthwaite explained his stand on some of the questions that came up at the last meeting of the Legislature. He defended the Kaien Island deal, saying it was a good one. He denounced those papers which had made such a "to-do" over it, and said that those papers which had dragged a woman's name into such a controversy had no right to. With regard to their support of the Conservatives the speaker challenged anyone to prove that they had kept them in power; anyway, why should they turn one party out to put another in. The Liberals were not in sympathy with them and so the present government suited them.

Mr. J. F. Johnson was chairman, which position he filled most admirably.

Mrs. McMahon and family and Miss Faulkner returned on Thursday from Tappen Siding Camp.

There will be Choral Evensong at S. George's Church on Sunday next at 7.30 p.m. Sunday School as usual, at 10 a.m.

Mrs. W. P. Gooch returned on Thursday from Kelowna, where she had been camping. We are pleased to learn that Mrs. Gooch is greatly improved in health.

The Columbia Flouring Mills started up again on Wednesday, after a short period of idleness.

The public school will re open on Monday, August 27. So the small boy has just two more weeks unalloyed pleasure—and then lessons again.

Deputy Minister of Agriculture, Anderson, and Professor Shutt, of Ottawa, passed through on Monday on their way down the Valley. Both gentlemen will be in Enderby on Monday afternoon, August 13th, and all who wish to submit samples of soil to, or meet Professor Shutt, are requested to be in Enderby during the afternoon.

COUNCIL BUSINESS.

The city council held their usual weekly meeting on Wednesday evening. All the members were present. No business of any importance came up for discussion.

It was decided to appoint a health inspector, the Mayor to inform Dr. Verner with regard to the matter.

Several small accounts were also passed for payment. The Clerk was instructed to request the Constable to at once collect road tax.

SAD DEATH AT THE LANDING.

The death occurred on Saturday last, at Okanagan Landing, of Miss Lulu VanAntwerp, daughter of Mr. W. F. VanAntwerp, engineer on the S. & O. Death resulted from erysipilas following on a bite from some insect. Readers all along the line extend their sympathy to Mr. VanAntwerp in his sad affliction.

Mrs. C. F. Collins returned on Thursday from a visit to relatives at Michel.

Severe floods have occurred in Texas, with heavy loss of life and property.

A printer has put Sloean City into the hands of a Sheriff. The city owes the newspaper man about $600. Great is the power of the press!

Enderby has at last won a lacrosse game. A team of Armstrong juniors visited town on Saturday evening last week and played a game with the Enderby juniors with the result that the home team won by a score of 5 to 0

Two cases of typhoid fever are reported in town. It is now up to all to be careful and see that their yards and out houses are in a sanitary condition. Dr. Fagan, Provincial Health Officer, said at last night's meeting that he had been looking into the sanitary condition of this town and had found that it was very bad, saying that everything should have a "clean-up". We hope all householders will follow Dr. Fagan's advice.

Rev. A. J. Day, who managed to swindle many benevolent people in British Columbia out of $20,000, has been located in Persia, where he has settled, married and is living like a nabob on his ill gotten gains. He is safe from prosecution for his offence, for there is no extradition treaty between Canada and Persia. It is said that the only way in which he can be punished is for the Canadian Government to furnish the Shah of Persia an account of his misdeeds, and he might think it worth while to cut off Day's head and confiscate his gains. This would be profitable to the Shah, but would be rather disagreeable to Rev. Day.

Notes and Comments

DO SOMETHING.

HAVE any of our readers picked up one of those pamphlets which are issued and circulated by the Boards of Trade of some of the prairie towns, setting forth the many advantages of the particular city or district from which it emanates, and read it carefully?

If you have, you must have noticed many things; and if you haven't, you had better read one, as one of the requirements of your education.

The people who issue these pamphlets, and those who bear the cost of their production, are worshippers at the feet of the "power that does things," whether the power is working through men or through nature. There is preached the gospel of utility. These booklets tell us of men who have built up industries in single weeks or months that made them rich beyond the dreams of avarice, and which industries have in turn built up cities. Especially in that great prairie land are they always doing something. They never seem to sleep. They are always awake to their possibilities. They dare not stop for an extended rest, for their religion forbids it. They never become lethargic, for if they did, they would drop behind in the march of progress, never to catch up. They must always be doing something. That is the gospel which we would like to preach to the people of this town and district. Do something! Do something useful!

There are plenty who will talk and have visions, and project in their dreams to the end of the rainbow, where the pot of gold awaits them; but there are too few of the kind who "do things."

Waving hot air signals across the roads leading to surrounding places will not bring anyone to us. It takes more than the seafoam breezes that issue from the mouths of spielers to attract folks. Oratory and tautological word pictures of utopian conditions are very well as amusements, but they will never shovel coal under the boilers that will furnish the steam to "lift."

Yes, those western prairie towns have the idea. They want people—people who do things, and by having people on the spot who do things, they know how to get and do get the people who will do things.

In the east, and in the west, too—the old fellow with the conservatism sticking out like paint on a vaudeville actress, stands back and yells "whoa," and the mule attached to the car of progress, knowing the voice of former masters, stops, and eats grass—for it knows not that there is better grass just beyond.

The time has come for Enderby to do something. Two advances will go down into our history of 1906 that mark a period of "something doing;" we allude to the establishment of a Farmers' Exchang in town, and the installation of a waterworks system. These are good beginnings, but we must not stop.

Even with regard to the Farmers' Exchange, we should apply the motto, "Do Something." For of what use can such an institution be, if its members have nothing to bring for its management to dispose of.

The town and district lacks life, snap, vim vigor and energy—which you may. Each of us looks at the other fellow and wonders why in the dickens he doesn't do something. We never think of doing something ourselves. Let us begin right now!

A CURFEW NEEDED.

We think that many of our readers will admit of the truth of the following, from the Armstrong Advance; for it is equally applicable to Enderby: "We do not know whether or not the municipal council has the power to enforce a curfew law in this an unincorporated town, but we should like to see something of the kind inaugurated if possible, and believe it would be very materially in the interests of the rising generation if such were done. It is nothing unusual to see boys and girls of tender age in groups on the public streets at late hours of the night, while their mothers' hearts are no doubt aching at home for their good. The hope of our country and future generations is in the youth of today. If they get the street habit while young they are almost sure to pick up others of worse nature, that will stay with them through life. Public streets and public houses are poor places for boys and girls (perhaps especially girls) to be after night without the protection of parents.

The provincial government must not relax its provisions governing the inspection of fruit coming from outside of the pro- B. C. orchards are as yet free from any of those pests which are the bane of fruit growers across the border, and it is up to the government to do its utmost to protect the fruit growers of the province against the importation of such such into the province

---

A high compliment has been paid to this province by B. E. Walker, general manager of the Canadian Bank of Commerce, and one which should go a long way to obtain a better relation for her with the Federation.

He declared that the Premier of Canada should realize how much greater are the wants of British Columbia than the provinces of the plains. The Pacific province is an empire in itself, and to develop its resources a great deal of money has to be spent. The bystander, he continued, should not be parsimonious towards British Columbia, which will become the revenue-producing province par excellence of the Dominion.

WE have received Buletin No. 119, from the Laboratory of the Inland Revenue Department, Ottawa. The bulletin contains the report of the analysis of a number of jams and fruit preserves and makes most interesting study. The samples were examined in regard to quality and quantity of fruit used, quality of sugar used, including a determination of the presence of glucose, and also for the presence of preservatives and artificial dyes. The report shows that of the 190 samples collected there were unadulterated, 53; doubtful, 17; adulterated according to act, 67; adulteration disclosed, 30; adulterated, 15; collected by mistake, 8. This is by far one of the most interesting bulletins that have been issued by the department.

As food for reflection for Colonist readers Sunday morning, we draw attention to the quite important statement made yesterday by the general manager of the Canadian Bank of Commerce at Montreal, as reported in the telegraphic despatches. That this province with its illimitable resources is virtually a terra incognita is only too true; and it is a happy circumstance that men of the calibre of Mr. Walker are awakening to the true situation. Throughthe entire extent of the Dominion of Canada today great prosperity prevails—a progress and development which are, perhaps, unparalleled in the history of any similar area on the face of the globe; but with an adequate knowledge of this fact, we have no hesitancy in expressing the view that all progress recorded by the various provinces of the Dominion will be eclipsed by the strides which British Columbia will make when her vast resources shall have been properly computed by agencies which are responsible for the development of a country. British Columbia is coming into her own and we have the confident belief that before many months have passed, there will be evidenced a wave of progress and expansion which will surpass the fondest expectations of the most sanguine.—Colonist.

The KAMLOOPS LUMBER CO., LTD
Enderby, B. C

Tide Turning?

Sir J. S. Randles, Unionist, has been elected to Parliament for the Cockermouth Division of Cumberland, England, succeeding the late Sir Wilfrid Lawson, who died July 1. The successful candidate received 690 votes more than the Hon. F. Guest, his Liberal opponent. At the recent general election Sir Wilfrid Lawson, Liberal, defeated Sir J. S. Randles by 563 votes.

"World" Finds Mare's Nest.

Commissioner Peters reported on Friday regarding the "World" charges and said they were unfounded. The decision is a long one, and reviews the evidence given at length and gives extended deductions of the Commissioner therefrom. Mr. Peters said that two tenders were submitted, one by Percy R. Brown, for Mr. Pendray, of $2,000, and another of $2,100 by Mrs. Logie, stenographer at the Driard Hotel, this being put in by the tenderer, and Mr. Harrison, proprietor of that hotel, who brought the tender shortly before the time of closing. The evidence showed that Mrs. James Anderson did not know the amount of Mr. Brown's tender, as stated, but had been told by her husband that Mr. Murray would figure that it would be about $2,000 She had gone to Mr. Brown's office, and, to quote the report: "She went there for the purpose of getting information upon that point and by the rather sharp ruse of pretending to have information which she did not have she threw Mr. Brown off his guard to such an extent that he actually gave her the required information, and satisfied her that the calculations she already had were correct, so that if knowledge of the Pendray tender was obtained at all it was so obtained—not from Mr. Green but from Mr. Brown. I may say that Mr. Brown now practically admits this to be the case in his evidence."

Bush Fires are Raging.

The woods in the section along the Columbia & Western Railway between Cascade and the Bulldog tunnel are ablaze in places. The flames reached Farron, where they destroyed the station, the roundhouse, the water tank and a large boarding house, inflicting a loss of about $5,000. The employees of the railway at Farron made a strong fight against the flames, which, after destroying the buildings, passed on toward the Bulldog tunnel. They now extend along the road for about twenty miles, and the entire available C.P.R. force from Castle to Robson is engaged in an endeavor to save the trestles, of which there are several which are high and long on this portion of the road. There has been over a month of dry, hot weather, and once a fire is started in the forest it burns itself out, as there is no stopping of it.

Bush fires are raging between New Westminster and Port Moody. No houses have been burned, but one or two are in danger of being consumed by the flames.

Sesious Affray at Golden.

Golden, B. C., Aug. Aug 6.—A serious affray between Chinese and white men has occurred at Lake Louise, near Laggan, in which a driver on a construction outfit named Evans, was seriously injured. The injuries were inflicted by the cook of the C. P. R. hotel with a large frying-pan. A telegram was sent for a doctor to Banff at 7:30 p.m., and it was fifteen hours before medical aid arrived. Meanwhile Evans was bleeding to death. The chef and other Chinamen have been arrested.

Kamloops citizens voted on a sewerage by-law last week, which was carried by a majority of 93.

The Imperial Parliament has adjourned til October 28th.

L. W. Patten, municipal clerk at Armstrong, had a narrow escape on Saturday last week from serious injury by the premature explosion of stumping powder.

B. C. Fruit Admired.

That British Columbia fruit is attracting the usual amount of attention at the big Winnipeg and other fairs on the prairie is evident from the following write-up which appears tn a recent issue of the Winnipeg Free Press: "The British Columbia fruit exhibit is always an attractive spot to visitors at the fair, and all day crowds gather about it to gaze with longing eyes at the luscious fruit, especially tempting during the hot weather. Mr. Palmer, who has charge of the exhibit, has arranged a particularly fine display in the usual corner of the British Columbia building. Two hundred handsome glass jars contain a splendid collection of preserved fruits, including twelve varieties of plums, eight varieties of pears, grapes, peaches, quinces, cherries, crab apples, Logan berries, apricots and nectarines, all of which are immense in size and most tempting to look upon.

Cheaper Spirits soon to be Sold.

Ottawa, Aug. 4.—The Minister of Inland Revenue announces a reduction of twenty per cent. in the price of methylated spirits, which is manufactured under Government supervision. His officers are experimenting to discover a means by which it can be further cheapened so as to meet the demand for industrial purposes at a low price. In the United States it can be made for less than twenty-five cents per gallon. Cheap alcohol is demanded for fuel purposes to replace gasolene and coal oil for autos, lamps, etc., but the Minister says it cannot be applied to these purposes unless the Department can procure spirits from distillers at a much cheaper rate than today. Methylated spirits sold by the Government contains a portion of wood alcohol to prevent its use as a beverage.

Germans Refuse to Pay Losses.

The Trans Atlantic Fire Insurance Company of Hamburg, Germany, has refused to pay San Francisco insurance claims approximating $4,000,000. The following statement was given out last night by the local officials of the company: "The Trans-Atlantic Fire Insurance Company denies liability upon the ground that the losses were from an overwhelming catastrophe due to a visitation of Providence, for indemnity against the consequences of which the policy never was intended to provide and does not provide."

Diamonds in Ontario.

A diamond found in West Nipissing, Ontario, is in the possession of A. O. Aubin, M.P.P., of Sturgeon Falls, is believed to be the largest in the world. The country where this immense gem was found has been declared by experts to be diamondiferous and if this discovery is authenticaly reported the big fields of South Africa will pale into insignificance, when compared with New Ontario.

To be Laurier's Successor.

A dispatch to the Toronto World from Montreal says: "An influential Liberal member of the House of Commons, who returned from Ottawa, says that there can be no possible doubt of Hon. Mr Aylesworth's accession, sooner or later, to the leadership. This is the way the M. P. puts it: "The news today is that Aylesworth is full to the running, and that Fielding is out of the race. Sir Wilfrid Laurier has not forgotten that Billy McLean came within an ace of stampeding the Finance Minister in last session's cabinet and he at once decided to get Aylesworth into the ministry for the one reason of preventing the man from Nova Scotia becoming leader and Prime Minister.

Mutiny in Russia.

Some awful stories of mutiny are reaching the outside world of the scenes enacted at Kronstad. Thirty thousand men are now on strike at St. Petersburg. Hundreds have mutinied at Warsaw and other points. Reliable authorities consider that Russia is at last entering upon the civil war, which has been threatening for so long a time. It is said by officials that wealthy Jews are financing the Socialists.

News From Near & Far

The St. George Pulp & Paper Company's sawmill, and lumber estimated at a million feet, were destroyed by fire of unexplained origin. No accurate estimate of the loss is to hand, but it is thought likely to approach $25,000, with no insurance.

Premier McBride and party reached Atlin on Wednesday, and on Thursday night held a public meeting at Discovery, Mr. Jules Eggert in the chair. The premier had a fine reception, as also had Dr. Young, the local member. The party har spent the last two days visiting the creeks, and en route saw Conrad and Winton, where there is considerable mining activity.

The Kootenay Fruit Growers' Association passed by a large majority a resolution recommending the abolition of the $500 head tax on Chinese, so far as agricultural and domestic servants are concerned. The shortage of suitable help for the harvesting of the fruit crop was given as a reason for the abolition.

Fireman Goodhue of the Pere Marquette train and Fireman Hemphill, of the C. P. R. train, were killed in a head-on collision in the city limits of St. Thomas on Saturday morning. The engineers saved themselves by jumping. A baggageman was badly hurt.

Judge Sedgewick Dead.

Judge Sedgewick died at 4.45 on Saturday morning. Judge Sedgewick was Deputy Minister of Justice for five years, and on February 18, 1903, became puisne judge of the Supreme Court. Among the cases he was concerned in during his tenure of office was that between the Dominion Government and the province of British Columbia as to the ownership of precious metals in the railway belt which he argued before the Privy Council. He had much to do with the drafting of the Criminal Code in 1892. He codified subjects of bills of exchange and promissory notes in 1890. In 1891 he went to Washington in connection with the Behring Sea question.

Farm for Sale.

160 acres of land for sale, situate six miles from town, along the Salmon Arm road; forty-five acres is excellent bottom land, unsurpassed for the production of immense crops of hay, grain or vegetables; balance easily cleared. Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section 160 acres or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

TOWN & DISTRICT . NOTES .

Last week's issue of the B. C. Gazette contains the re-definition of the boundaries of the school districts of Enderby and North Enderby.

In our report of the sad drowning of T. Muffett we omitted to mention that previous to his fatal swim, J. Folkard pulled the deceased man out of the water at the boathouse, Muffett having become exhausted. This was some half an hour before his death.

The road gang are at present engaged in opening up a road between the properties of W. J. Fenton and J. A. Mohr. This road will run east from the Salmon Arm road to the river bank, and has been asked of the government for some six years. This road will accommodate Messrs. Fenton, Strouiger, Salt and Pound. Needless to say, the ranchers affected view with much satisfaction the opening up of this road.

Many enquiries are being made of us as to when work is to be commenced on the upper portion of the Mabel lake road. In an interview with the road boss, Walter Gardner, a representative of the PROGRESS learned that the work on this road will not be re-commenced until all the other work throughout the district is finished. Mr. Gardner says he must work economically and to move the outfit up there before the many smaller jobs are finished would not be a money saving course. He expects, however, to be along very soon, when he will give undivided attention to this much abused road.

H. N. Hendrickson received a fine Peterborough canoe last week, and is now experiencing the delights of sailing on the Spallumcheen river.

An interesting application for a water record was decided by Government Agent Tunstall on Thursday, says the Sentinel. Mr. Heggie, manager of the Stepney ranch applied for a record on the creek on which Mr. Hassard, of Enderby, already holds an old time record. The city of Enderby had also wanted a record on the same creek, but Mr. Hassard's record could not be attacked.

Miss Erma B. Nicol, demonstrator for the Crescent goods, held a reception in Harvey & Dobson's store on Friday and Saturday of last week and which was well attended by many ladies and not a few bachelors! Chief of interest was Maplene, with which anyone can make maple syrup of as good a taste and flavor as the real thing.

As a gentle hint to non-advertisers, the Cranbrook Herald has this to say: "The newspaper man saw a farmer friend of his receiving a set of harness from the freight office, the consignment coming from a Winnipeg mail order house, and remonstrating with him, attempted to prove that he was making a mistake, as many of the local dealers would furnish him the same or better goods just as cheap, and keep the profit home. 'But this is the first time that I have heard that there was a harness shop in this town. I have taken your paper for five years and never seen a line of advertising in it about such an institution in all the time I have been a subscriber. But, you see, the Winnipeg house has kept me posted all the time.'"

It is proposed to hold a regatta at Okanagan Landing shortly.

Rev. J. Calvert, of Salmon Arm, was a visitor to Enderby on Monday and Tuesday, the guest of Mr. and Mrs. F. Pyman.

Mr. and Miss Russell returned on Friday from a visit to re atives at Wharnock, B. C. Mr. and Miss Russell leave shortly for New Zealand.

The alleged "brutal outrage" by Kelowna citizens reported in the coast papers last week, turns out to be an everyday one of "whiskey to Indians," in which a degenerate white man and an imaginative Siwash figured.

Lowery's "Claim" has fallen into disrepute with the postal authorities and has been refused the privileges of the mails. Likewise, has the same happened to the notorious Calgary "Eye-opener."

The PROGRESS was shown a twig from off a plum tree on which were eighteen plums. The twig was not quite five inches long and all the plums were well grown fruit and perfect specimens. They came from Wm. Allan's place, about two miles from town, and show what the country and climate are capable of. This one small branch was but an example of the whole tree.

The bell for which the Ladies of S. George's Guild have been waiting, has now been ordered, and is on the way. A tower will be erected at the south-west corner of the church in which to hang the bell, while the base of the tower will be made into a vestry room, which is a badly felt need at S. George's church.

On Sunday morning last a total eclipse of the moon occurred, the duration of which was three and a half hours, and was visible to dwellers in the Rocky Mountains. The eclipse was remarkable for its long duration, which was owing to the fact that the moon passed almost exactly through the centre of the earth's shadow, and so when it was broadest.

Dr. Fagan, together with R. M. Marpole and Campbell Sweeney, of Vancouver, and Mayor Gordon, of Kamloops, looked over all the available sites for the proposed sanitarium during the week. Several good places will be considered by the society before the choice will be made public.—Standard.

Our neighboring town (pardon, city) of Enderby on Tuesday voted by a handsome majority to instal a waterworks system similar to that possessed by Armstrong. The water is proposed to be taken from Brash's creek where the supply available is said to be fully ample for the requirement. We congratulate the voters there on the wisdom of their decision and wish them every success in the rapid installation of so badly needed a system, the value of which they are as yet unable to fully realize.—Advance.

In a recent letter to the Colonist, a recently arrived Scottish gentleman says; "Land is easy to acquire here at moderate prices, it being nearly all in the hands of small holders, ready enough to sell as a rule. This is very different to the state of things existing in Scotland, where the land is mostly in the hands of a few people with immense holdings. One of the most surprising things here to a new-comer is the number of people who are owners of land. Every second man you speak to in the hotels or on the train is able and willing to sell either for himself or on behalf of someone else, price suiting. Coming up from Vernon, B. C., to Sicamous, I got into conversation in the smoking compartment of the train with the guard. I remarked to him, over a pipe: 'I wonder that a man like you does not take up a grant of land,' and he replies: 'I have 300 acres.' I get into conversation with a man who looks like a Scottish game-keeper. I find he is a Scot, that he came out here fifteen years ago, and that he now owns 1,000 acres—and so on. You might travel about Scotland for a week without rubbing shoulders with a landowner. In Canada they are to be met with at every turn.

A LARGE STOCK OF BRICKS NOW ON HAND

The best clay in the Valley. Well burnt bricks at reasonable prices. Large or Small Quantities.

The Enderby Brick & Tile Co. ENDERBY, B. C.

Fire has destroyed several buildings comprising the International Exposition now being held in Milan, Italy.

Mrs. R. Bailey visited friends in Vernon the middle of the week.

Hatfield, the rainmaker who was employed by the Yukon Council, failed to produce the goods, and acknowledged a failure.

J. Johnson and F. Franklin left on Tuesday for Mara, where they will find employment in the Rothesay Lumber Co.'s mill at that place. J. Johnson takes the position of foreman, and F. Franklin the position of sawyer.

An ice cream social will be given this afternoon and evening (Friday) by the ladies of S. George's Guild, on Mrs. Moffet's lawn. An impromptu concert will be given during the evening by local talent, consisting of solos, quartettes and pianoforte selections.

J. White met with a nasty accident on Saturday morning, sustaining a badly crushed right leg. He was engaged in working on a hay baler on the Indian Reserve south of town and while putting the hay into the press got his foot and leg caught by it. Though he sustained a bad squeeze, no bones were broken, and with a short rest will soon be all right again.

R. Blackburn, who is running the hay baler belonging to the Stepney ranch, on the Reserve, was the victim of a runaway on Friday afternoon. He was riding on the side of a wagon, which was being driven by another man, when the horses became unmanageable. During the excitement of the runaway his foot in some manner became tangled between the spokes of one of the wheels, pulling him out of the wagon, the wheel running over his ankle Though no bones were broken, Mr. Blackburn sustained a badly wrenched and bruised ankle, from which it will take some little time to recover.

Notice.

STUMPING POWDER.

The Spallumcheen Farmers' Institute have ordered a second car of Stumping Powder, which will be on hand in about two weeks, and can be had from J. B. Bird, the secretary. Price of powder is $6.50 per case to members of the Institute.

Geo. Heggie, Pres.
J. B. Bird, Sec.-Treas.

Whose PROGRESS do you read? If not your own, why not? $1.50 a year.

Mr. Morse says that construction work on the G. T. P. at Edmonton is being delayed on account of the difficulty in securing men.

A farmer east of Edmonton has commenced cutting fall wheat.

Cutting of grain has been general all through the district during the past week. The grain has filled and ripened well and yeilded quite up to the average we expected.

Home grown apples made their first appearance in the stores last week, and were grown within the city limits.

G. Williams left on Tuesday morning on a surveying trip to Shuswap Lake to undertake work for the Kamloops Lumber Company.

On Thursday of last week 68,000 feet of lumber was cut at the Kamloops Lumber Co. mill out of 500 logs. This is, perhaps, the best cut, and highest average per log ever made by this mill. The logs were taken just as they came from the boom, without selection.

B. Gardom has rented I. Johnson's cottage on Russell street and as soon as it has been repaired and painted, will take up his residence there.

J. McDonald was up from Armstrong last week end. Mr. McDonald, who is president of the Armstrong Light & Power Company, says work will be started at once on the power house on Davis creek, and that that town will get electric light in time for the fast approaching dark evenings.
