Dear Miss Pfefferkorn :

Thank you very much for letting me read that section of your manuscript that bears the title : "To Benefit the Whole Community." It has been read with great interest and is being returned herewith.

The passage from Dr Hurd's speech to which you refer on Page 2 was not quoted verbatim in my own manuscript although I have made many references to his attitude toward district nursing.

The mark on the "i" in the name "Reiba" was a reminder to myself to check the spelling and I evidently forgot to erase it.

The apparent discrepancy in the number of visits paid in the Outside Obstetrical Service is one of the many relatively minor points which I hope to have an opportunity of checking when I have renewed access to the files in October.

The quotation from "The Sun" regarding "The Fiftieth Birthday for the Visiting Nurse" although interesting in itself seems to be better suited for incorporation in your own manuscript since it is outside the chronological range of mine.

With kind regards,

yours sincerely

(Ethel Johns)
