MINES OF KOOTENAY

Rossland and Boundary Shipments.

LATEST RETURNS OF OUTPUT

What the Mines Are Doing Over the District—Rossland Doing Well.

The week just past has been the best this year so far. Up to date the camp has been shipping at the rate of over 400,000 tons per annum, a considerable increase over the tonnage of last year. The state of the roads will compel a shut down of the shipments from the Jumbo and from the Rossland Kootenay for some weeks but shipments should be resumed at an increased rate towards the middle or end of next month.

AN UNSUCCESSFUL SORTIE

Russians Trying to Break Out of the Harbour.

RUSSIANS MAKE A STAND AT WIJU

Newchwang Being Fortified by the Rusnians Against a Landing by the Japanese.

St. Petersburg, March 12.—The Russian torpedo boat flotilla left Port Arthur at daylight yesterday morning and attacked the Japanese fleet. One Japanese torpedo boat was sunk and one Russian torpedo destroyer, the Bezposechtchodni, was sunk. The fate of the latter's crew is not known.

Tokio, March 12.—The Wiju Seoul railway concession was signed yesterdav by the Japanese and Korean authorities. The Russians are engaged in building defences at at Wiju, which will co-operate with the fortifications already constructed on the banks of the Yalu. It is reported that the Russians have 15,000 tons of coal at Wiju, which they keep drenched with kerosene in readiness to burn should the Japanese land there.

Tientsin, March 12.—One officer and four Japanese soldiers who recently were captured near Wiju, Korea, were paraded through the streets of Mukden on Tuesday.

One field battery has been installed in the fort at Newchwang and also one company of infantry, while preparations are being made to mount a siege gun. A Chinese refugee from Nshuchen insists that he has seen Russians retreating from the Yalu river and destroying villages enroute

Paris, March 12.—The commander of the French steamer Saighalien on arriving at Marseilles today from Greece, reported that two Russian cruisers and one torpedo boat destroyer were at Piraeus, Greece, about to put to sea for the purpose intercepting Japanese vessels. Six of the latter are at Havre, Nantes and Bordeaux, and others are said to be coaling at English ports.

St. Petersburg, March 12. -Thousands of copies of a revolutionary manifesto appealing to citizens not to contribute to the war fund were distributed about the city yesterday. Some were posted on walls until the police removed them. The manifesto also warns citizens not to support the government because it brought about for dynastic purposes a war which will cost millions and ruin the country.

Mukden, Manchuria, March 12. —It is officially announced that in consequence of the conflicting accounts of the landing of Japanese troops at different points, and the various reports of the intentions of the Japanese commanders, the Russians army corps which had arrived at Harbin will be detained there. It will be most difficult to find accommodation for this great body of troops and their detention at Harbin will entail much hardship on the soldiers.

St. Petersburg, March 12.—The feeling against the war on the part of student bodies and other organizations has grown to such an extent that stern repressive measures to prevent street demonstrations have been adopted in all of the large cities of the Empire.

The Novoe Vremya, in approving the action of the government in deciding not to use privateers, takes occasion to indulge in a fresh display of animosity towards England and the United States, who are represented as playing off against each other the two dangerous powers. It is really of slight importance to either England or America which nation is ultimately successful in the present conflict, as the inevitable result will be that both will be weakened. Therefore, the two powers feel that the combatants should be strengthened at their weakest points, Japan in her finances and Russia in her naval strength. Accordingly, declares the newspaper, Russia is receiving large numbers of applications from Americans and Englishmen who desire privateering papers.

London, March 12.—Confirmation has been secured of the report that a proclamation has been posted at Blagvoestschensk, the capital of the Amur province, Siberia, stating that the Japanese now at Vladivostok and Port Arthur and who previous to the declaration of war were promised by Viceroy Alexeieff absolute protection and immunity from injury should they continue at their regular occupations, were now to be segregated at a remote point in Siberia under military guard and be kept close prisoners.

The governor of Amur province has received a telegram stating that in consequence of the impossibility of sending the Japanese residents of Vladivostok and Port Arthur to Japanese ports on account of lack of transportation, the viceroy has issued an order that they be removed to districts under martial law in the interior of Siberia, probably near Irkutsk. The are not to permitted to traverse the railway line, but are to be conveyed overland.

THE ELMORE PROCESS.

The report of the chairman of the Canadian Ore Concentration company at the annual meeting recently held in London must be gratifying not alone to the shareholders of that flourishing concern but also to Rosslanders in general The salient features of that report are that an assay of the tailings shewed merely 18 grains gold, 5 pennyweights silver and one-tenth of one per cent. copper, that the ore concentrated 16 to 1, that the cost of operation, even in a small plant and at an expensive point, such a this camp, should not exceed $2 per ton, including royalty and interest, and with a 6 to 8 unit plant should be done eventually at a cost of not more than 75 cents per ton treated. Further that the ore being put through was extremely low grade, not being more than $4 to the ton. The value of the tailings is $1.14 on 16 tons, which is a slightly better recovery than 98 per cent. The mine is getting a 16 tons to 1, which is valued at $63, and which can be cheaply smelted, as there is no silica present and there is a certain amount of flux. The cost of smelting and freight should not be more than $5 per ton of concentrates. Taking the outside cost of concentrating, with the small plant running regularly, at $2 per ton, the company spends $35 to get a return of $63 on their waste dump. If the Le Roi were to apply the same method to their waste dump of 100,000 tons which is valued at $8 per ton a profit of $600,000 could be cleared with a 6 unit plant.

Taking any mine whose ore is running $7 and the cost of mining and development does not exceed $3, a profit of 50 cents a ton can be expected with a fairly large plant. And $5, for all mining purposes, is large when a low grade proposition is considered, inasmuch as there is little development to be done, the ore body usually being found to be so extensive as to permit of cheap mining.

THE COSSACKS.

John McGroarty in the Los Angeles Times has been belauding the very fine fellow, the Cossack of the Don, in triumphant verse. Mr McGroarty would not feel so inclined to poetize were he to pay a visit to the Cossack of the Don in his native haunts. Compared with the "heathen" Jap he is an utter barbarian and a savage. Conveyed to the Orient in the 'tween decks of the Black Sea volunteer fleet his abode was unapproachable unless Mc. McGroarty had a very bad cold which not only dimmed his olfactory but his optic nerves. The man is a nomad and has been so for countless generations. He is a Khirghiz of the Steppe; no more, no less, and is no more a European than a Turk and far less a man of culture than even he. Suffering from their predatory habits the Persians gave these Khirgiz their name, kuzzak, which means merely a robber.

We Shall Spend $500,000

To Give Liquozone Away.

This Company, after testing Liquozone for two years in the most difficult germ diseases, paid $100,000 for the American rights. That is the highest price ever paid for similar rights on any scientific discovery.

We are now spending $500,000 to give the product away—one bottle to each of a million sick ones. We are doing this so that every sick one may let Liquozone itself prove what it can do.

Kills Inside Germs

The greatest value of Liquozone lies in the fact that it kills germs in the body without killing the tissues, too. And no man knows another way to do it. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease, as every physician knows.

Liquozone will do for sick humanity more than all the drugs in the world combined. It does what no skill can accomplish without it. It cures diseases which medicine never cured.

Acts Like Oxygen

Liquozone is the result of a process which, for more than 20 years, has been the constant subject of scientific and chemical research. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 14 days' time, these gases are made part of the liquid product.

The result is a product that does what oxygen does. Oxygen gas, as you know, is the very source of vitality, the most essential element of life. Liquozone is a vitalizing tonic with which no other known product can compare. Yet it is a germicide so certain that we publish on every bottle an offer of $1,000 for a disease germ that it cannot kill.

The reason is that germs are vegetables; and Liquozone, which—like oxygen—is life to an animal, is deadly to vegetal matter. It is carried by the blood to every cell of every tissue, and no touch of impurity, no germ of disease, can exist where Liquozone goes.

Germ Diseases

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever.

50c Bottle Free

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on your local druggist for a full-size bottle, and we will pay your druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquozone is, and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligation whatever.

Liquozone costs 50c. and $1.

BOUNDARY.

Joe Taylor is developing the King claim in Summit camp.

The copper matte at the Greenwood smelter is now being converted at the Tacoma smelter.

The Athelstan and Jack Pot properties, Wellington camp, are to be incorporated. The owers are Hunter Bros, and G. H. Collins.

It is anticipated that shipments from the Athelstan will be resumed in about a month.

The Helen claim, adjoining Anaconda townsite, on which considerable work has been done, but which has been idle for some time, is about to resume work.

A well known claim was bonded this week, which is located near Midway. It is known as the Bruce claim, and is one of the oldest locations in the country.

The Frement claim is being worked by the owners, Galloway and Robison, who report it as looking well, and that they have a few tons of ore ready to ship

Development has recently been started on the properties of the Golconda Mines, Ltd., located in South Deadwood camp, by J. C. Haas, M. E., who is interested in the company.

A depth of sixty feet has been attained by the contractors who are sinking on the Dom Pedro in Providence camp, about two miles below Phoenix. The shaft is being well timbered as the work proceeds.

The stay of proceedings obtained by the Bank of Montreal in the sale of the assets of the Winnipeg Mines, Ltd., for mechanics' liens, will come up for hearing in the Supreme Court at Victoria on the first Tuesday in April.

LARDEAU

Another shipment of a car of ore is being made from the Horseshoe, at Trout Lake. Previous shipments have given gross returns of $150 to the ton.

Fine ore has been encountered in the big lead of the Union Jack, near Ferguson. The property is owned by J. C. Kirkpatrick and L. Thompson.

A. P. Garrett, who had a contract to drive 600 feet of tunnel on the Rossland for the Great Northern Mines, Ltd., has relinquished his contract this week, 206 feet being driven to date. The hard nature of the rock in the tunnel made work at the contract price unprofitable. The tunnel will most likely be completed by day labor.

POPLAR

The tunnel of the Lucky Jack is now in 230 feet and an upraise of 200 feet is being run to the surface.

Bed rock was reached last week on the Poplar placer claims and coarse gold is said to have been struck. The owners are now building a flume.

The Cinderella Medford, ore of the new shippers, is rapidly coming to the front. The leasees sent out three cars of high grade ore and have many more in sight.

SLOCAN

The Neepawa at Slocan has been leased to Isaacson Bros. and John Kinman.

The Payne is shipping its magnetized iron, produced by its zinc plant, to Trail smelter.

The Province mine at South Fork shipped two cars of ore this week to Hall Mines Smelter.

The Payne company is placing more powerful magnets in their zinc separator to produce a finer quality of zinc.

The Great Western Mines have more men at work than ever before, pushing the work on their reduction works works to completion.

The Rambler has reduced it working force.

The owners of the Argentite fraction have suspended operations.

F. Stocks has disposed of an interest in his lease on the Chapleau.

To the Merchants

Why Don't You Increase Your Business?

Do not sit down and complain of lack of business, because people are sending out of the city for their goods.

Hustling will Do the Trick

Give them to understand that they can save money by dealing at home.

YOU WILL HAVE TO SHOW THEM

That you can sell them better goods for less money than they can get them for at some Cheap John department store in the east, and keep the money at home.

When you have done this You will get the results

The next question is how to reach the people to tell them what you want them to know

You can do this by keeping your advertisement in

The Evening World....

It reaches all the people and goes in all the homes in the city. Its circulation is increasing every day.

Give it a Trial

And you will not complain as to the results

Lucky Jim.

In writing about the Lucky Jim the Sandon correspondent of the Lead and Zinc News says: "This property comprises eleven claims, with probably the largest surface and underground showings of zinc ore in the province. With a good equipment for milling and separaration this mine should easily output 50 tons a day. The product will range from 45 to 55 per cent. zinc with a low value of silver and a minimum of iron contents. Large specimens of crude ore have been taken from the mine assaying 62 per cent zinc. Considerable zinc ore has already been shipped in previous years to Europe and a good tonnage of lead ore. Under the new conditions this property will furnish a good share of the tonnage of the camp. The cost of mining and putting on the cars is very low.
