A. J. Whitmore, Esq.,
Chief Supervisor of Fisheries,
402 Pender Street,
Vancouver, B. C.

Dear Mr Whitmore: -

I have been working out some data regarding the Fraser river sockeye fishery and would greatly appreciate it if you would favour me with the following information:

1. What month and what years were eggs and/or fry planted in the following spawning areas:

   Adams, Little and Shuswap Lakes
   Stuart Lake
   Chilco Lake
   Stellako River

2. From which hatcheries were these eggs or fry obtained?

3. What has been the yearly return to each locality mentioned as a probable result of these plantings?

4. Where is the Stellako river and what lake waters does it drain?

5. Have any plantings been made in the Quesnel area? Recently I saw it reported the Indians were enjoying an extraordinarily heavy run there.

With kindest regards,

Yours faithfully,
