Dr. E. D. Clark,
Assn of Pacific Fisheries,
#200 Colman Building,
Seattle, Wash.

Dear Dr. Clark;-

When the press announced the Victoria Government had appointed a board to decide whether or not a dam should be built across.Quesnel river regardless of its effect on the sockeye salmon fishery I prepared a brief in protest and sent it to the Minister of Fisheries at Ottawa. A copy was also sent by me to you, and another to the International Pacific Salmon Fisheries Commission.

In acknowledging receipt the Minister took exception to my strictures concerning his Department's officials on their handling of the water rights application hearing re the Nechaco fishery. As a matter of record and to clarify the situation I enclose herewith copy of my letter of 7th inst., replying to his letter to me.

With kindest regards,

Yours faithfully

HD/P.
