2nd October 1957.

Dr. P. A. Larkin,
Director of Fisheries,
University of British Columbia,
Vancouver, B. C.

Dear Dr. Larkin;-

I have for acknowledgment your favour of the 19th ulto., and, as I had expected, note your university press is not yet functioning on material originating from outside sources.

I would be very pleased if I had an extra copy of my RISE AND DECLINE OF THE PACIFIC SALMON FISHERIES to send you but, as you surmised, I only have the one completed copy and must retain same not only for submission to other publishers, (if any), but also to add new material to keep it abreast of the times. For example last year I added to the Alaska section some data concerning the inroads Japanese "mothership" fishing had made in the Behring Sea red salmon runs and I notice by the September 1957 number of Pacific Fisherman the American authorities are now awakening to this very dangerous situation. Also Vancouver press reports just to hand show the hydro-electric power vs. salmon fisheries dog is not dead yet and I may have occasion to add to what I already had written regarding this controversary.

With kindest regards,

Yours faithfully
