Notes re Can making

1# talls making

Lead used	4055 lbs	
Tin "	3632 "	
Making	7687 "	
Less amount on hand	2380 "	
Used	5307 "	in making 12843 c/s 1# talls which equals .414 lbs per case

In making above solder 10 2/5 % more lead than tin was used.
In making above cans 2 1/8 cans of flux was used, equal to about 1/6 can per 1000 cases talls.

1/2# flats making

Solder used in making 2041 c/s; 1373 lbs which equals .6727 lbs per case.
In making above cans 5/8 of a can of flux was used, equal to about 5/16 of a can per 1000 c/s 1/2# flats.

In making seams talls took 14 drops to 1 oz = 224 drops per lb.
" " " 1/2 flats " 67 " " 1 " = 1072 " " "

At 1072 drops per lb. 1/2# flats take 1 7/16 oz solder per c/s for seams, equal to 90 lbs per 1000 c/s = 183 lbs for 2041 c/s for seams.
1373 lbs less 183 # for seams = 1190 lbs for bottom = .58 3/10 lbs per case, equal to 583 lbs per 1000 c/s. Thus total can would take the following:-

Seams per 1000 c/s		90 lbs
Bottoms "	"	583 "
Tops "	"	583 "
Stop off "	"	
Total "	"	"

Notes re Can making

at 224 drops per lb. 1# Falls takes 3.43 oz solder per C/s for seams equal to 214 3/8 lbs per 1000 C/s = 3132 lbs for 12843 C/s for seams 5307 lbs less 3132 lbs used for seams = 2175 lbs for bottoms = 19 1/4 lbs per C/s equal to 193 lbs per 1000 C/s. Thus total can would take the following

Seams per 1000 C/s		214 3/8 lbs
Bottoms "	"	193 "
Tops "	"	193 "
Stop off "	"
