Dear F.

Intended writing tonight but was late getting home. Miss R. & I. went all over this superb new steamer. She is a veritable "floating palace". The saloon drawing room and staterooms are furnished luxuriously. She is 16,850 tonnage. carries a crew of 475 and 1100 passengers. She is supposed to go 18 knots per hr. So the first of the C.P.R. to adopt the turbine system of propulsion. We had afternoon tea onboard served by Chinese waiter. Will write fuller account later.

Yours
