Lardeau Mining Review

The representative of the rich Lardeau country. Sent to any address for $2 per an. in advance.

VOL. 1 TROUT LAKE CITY, B.C., SEPT. 7, 1905. No. 44.

Good Ore On Mammoth.

GOODS NOW BEING SACKED WILL RUN INTO BIG FIGURES. A SAMPLE BROUGHT DOWN ALLEGED TO BE RICHEST IN COUNTRY.

Hugh McLeod, an expert prospector of much experience in different properties in this province who has been prospecting the Mammoth group on Goat mountain for the Edward Baillie Syndicate, has arrived from the property bringing with him samples of ore, that according to his statement, is seldom discovered in this country.

About a month ago, says the Camborne Miner. Mr. McLeod found a lead on the Sirdar, one of the claims forming the group, tracing the lead on the surface for a distance of 100 feet. Since that time the lead has been uncovered and a small shaft has been sunk, which brought to light the richest ore that has yet been discovered in this division, in fact, Mr. McLeod states that the ore is the richest he has seen during his career. Some of the ore has a bright blue cast, which is a sure indication that the values will amount to hundreds of ounces of silver to the ton. The samples that Mr. McLeod brought with him will attract attention anywhere. One piece in particular, weigh 2¼ lbs, and is almost solid grey copper with a large proportion of silver bromides and black sulphates. Seventy-five sacks of the ore has been sacked since the discovery.

The lead, which contains from four to ten inches of clean, solid ore, dips at a good angle, and has every indication of being a permanent one. If such should prove the case, the Edward Baillie Syndicate has a fortune in the Mammoth group.

Messrs. Culver and Benson, two well-known lumber men of Washington, were up at the Beatrice last week for the purpose of making a examination of the mine prior to investing heavily in the company. We understand they left perfectly satisfied with all they had seen.

Mrs. A. C. Cummins and Miss Alma Thomas left Monday for a trip to the coast.

What might have proved a serious accident was narrowly averted near Beaton on Saturday night. The stage had left the landing for Beaton with a full complement of passengers, and the horses became unmanageable. By the prompt action of the driver the team was successfully piloted into the bank. The occupants received a shaking up and the stage was somewhat battered, but this was nothing to what would have happened had the horses been allowed to go a few rods further, as directly in front was a drop of 100 feet. Mr. and Mrs. Noah Abrahamson and family were on the stage, but fortunately received no injuries.

Mr. and Mrs. Manross and Grandpa Manross had a day out among the salmon this week. We believe good sport was had, but we also believe Bert caught a cold.

Lawyer Elliott was at Revelstoke on business Saturday.

Will Waller came down from the Baltimore on Wednesday. He believes it ts the biggest low-grade proposition in the country.

Local Mining Conditions.

OF INTEREST TO THOSE WATCHING THE PROGRESS AND DEVELOPMENT OF THE RICHEST MINERAL SECTION OF THE PROVINCE

A number of men came in on Tuesday night to work on the Silver Cup. During the fall and winter development will be carried on with as large a force as can be put on. The ore showings are the best ever uncovered in the history of the mine.

The Triune is shipping a car of ore this week. Another shipment will be made about the 15th.

Andy Daney is busy hauling ore from the Black Warrior group.

Ed. Vipond is packing ore from the Noble Five to the 8-Mile point on the lake. Good progress is being made on this property.

Packer Higginson has his mule team packing ore from the Mammoth group.

Jim Grant left early in the week to do some work on the Cromwell.

The owners of the Copper Chief are taking out some nice grey copper ore. The government has completed a good trail to the property.

George Carothers is making good progress on the development of the Dewey property on Murray creek.

The work on the Baltimore is showing better results with every foot of ground opened up. The face of the tunnel is seamed with galena and grey copper.

Machine men are in demand at the Big tunnel. The driving of the tunnel is being pushed vigorously under the supervision of Supt. Andy Garrett.

Work on the lower tunnel of the Grand Solo group on Canyon creek is progressing. The property looks good and has all the earmarks of a mine.

Work has been started by the owners on the Calumet and Hecla group on Rapid creek. A shaft will be sunk for 75 or 100 feet on the lead and crosscut at that depth preparatory to the installation of a stamp mill.

J. A. Griffith has been visiting Rossland this week. An interview by the Rossland Miner resulted in a column boost for this section of the country.

The Lardeau Mining Review believes it is justified in attacking the utterances of any journal when such utterances are given in their columns to vent personal spleen. We hold no brief for Pool, but we do for fair play. Mining Record and Nelson Tribune please take note.

A. G. Fraser has had a stable and barn erected at the rear of his premises.

Alec. Biggar came down from the Triune this week to do several assessments on his properties.

As we have said before, the REVIEW is worth $2 and costs $2 a year. If you owe us a 2-spot it will certainly make you feel good to pay it. Try it!

Mill Supt. Kennedy has moved into the residence of R. Madden.

A Paying Proposition.

CANADIAN TIMBER AND SAWMILLS, LTD., NOW IN GOOD POSITION TO MAKE MONEY FOR THEIR SHAREHOLDERS.

Owing to the unfortunate entanglement of the financial affairs of the Canadian Timber and Sawmills Company last fall, many on the outside and a number of the pessimists on the inside, believed that the proposition was a failure by reason of the cost involved in the transportation of the product to its markets, and other causes. It is hard to tell how this opinion was arrived at, more especially when it is known that a test shipment was never made. Going into the matter with those who are competent and who are in a position to know, we have no hesitancy in saying that as a profitable enterprise we know of no better.

The company owns some 32 square miles of as good timber as there is to be found in the Kootenay district, There are large areas of cedar which will cut into as fine clear lumber as it is possible to get in any man's country. This line of lumber will easily bring $40 to $45 per thousand on board the cars. The percentage of clear stuff is materially higher than even the coast product. Spruce, fir and hemlock are also in abundance, which material is unequalled for dimension stuff. The location of the mill gives unequalled facilities for log booms. Once tied up there is practically no further cost. The cost of putting logs in the booms does not exceed $4 per thousand, and from many of the limits would be much less.

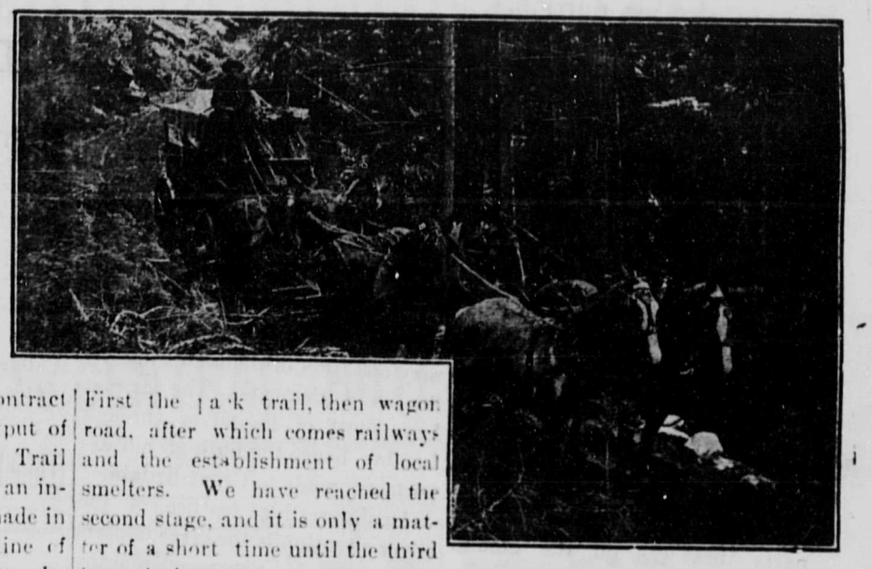
The mill as it stands now can do business at a profit, and it is estimated after certain contemplated changes are made, the cost of cutting, etc., will be reduced another dollar per thousand.

The company has been unfortunate in the past, but we have every confidence that the proposition under its present management will not only reimburse those who have invested, but will pay them big profits on their investment.

Labor Day in town passed off quietly, and most of the holiday makers spent the day with rod and gun. Large bags were obtained within a radius of 5 miles of the town.

Lardeau Transportation Methods.

FIRST STAGE: PACK-TRAIN. SECOND STAGE: FREIGHT TEAM.



THE securing of the contract for a three year's output of the Le Roi mine by the Trail smelter at $3.00 per ton is an indication of the progress made in the Kootenays along the line of transportation and treatment. In 1897 the rate for this mine for a 75,000 ton contract was $13 per ton.

In the Lardeau, while the reduction has not been so pronounced, it has been sufficiently large to allow the handling of ores which in the earlier days was impossible. It is an evolutionary movement. First the pack trail, then wagon road, after which comes railways and the establishment of local smelters. We have reached the second stage, and it is only a matter of a short time until the third is reached.

In 1900 the rate from Thomson's Landing to smelter was $22.50: to-day from Trout Lake the rate is $15 per ton on silver-lead ores. In 1900, Ferguson was sixteen miles from transportation; to-day it is only four miles, thus further reducing the cost of handling. We are progressing; "Rome was not built in a day," neither can a big mineral country be opened up in a year. Our illustrations depict our present mode of conveying ore from the mines to Trout Lake. The small illustration is of Packer Vipond's string bringing down "the goods," while one of Andy Daney's six-horse teams are shown in the other.

Dr. and Mrs. Robinson paid a visit to the Baltimore tunnel last Tuesday.

Surveyor Wilkie has a gang with him on the Glooscap, one of the Reward Co's properties.

Mrs. J. C. Kirkpatrick, rode down from Ferguson one day this week.

J. T. Lauthers has finished a large cordwood contract for the big tunnel people.

The British Columbia government has received revenue to the amount exceeding $400,000 from timber for the year ended June 30, 1905. The collections exceed the estimate made at the beginning of the year by more than $150,000. Practically three-fifths of the revenue has accrued from licenses to cut timber upon government lands. Many lumbermen feared that the requirement that all logs cut upon government lands should be manufactured in the province would result in the loss of revenue. The reverse has been the result, as the revenue for the past year is far greater than that for any previous year in the history of the province. —Consul Dudley, Vancouver, British Columbia.

Heaven's Reflex—Lardeau

HORACE GREELEY'S advise to young men was to "Go West!" Millions have followed it and have made their fortunes. If you through force of circumstances are unable to follow it personally, send your money out. Select outfits that will handle it squarely and honestly, and it will return unto you a hundredfold.

If you are looking for an ideal spot to spend your vacation either this year or next, write us for information. We will send you photographs that will show to some extent the beauties of the district.

If you are interested financially in any of our properties, combine business with pleasure and take a look at your investment, and at the same time enjoy a few weeks admiring the glorious works of creation.

It is invigorating, to say the least, to get behind a good four-horse team going at a 12 mile gait down a mountainous road where an accident would mean oblivion. Did you ever try it? If not, come out and do so.

We will take pleasure in supplying any information. Write us.

The 1st of September saw most of the local sportsmen among the birds. Good bags were obtained by Al. Housten, A. Craig, H. Christie, O. Woods, L. Levesque, and T. B. Baker.

The ladies of Ferguson are arranging far special decorations in honor of the labor anniversary service which will be held in the hall Sunday afternoon at 3.

Mrs. Burrell has been unfortunate enough to lose a $10 gold piece. The coin has more value than is surface showing, by reason of it being a souvenir. Mrs. Burrell believes she may have given the coin over the counter in her restaurant by mistake. The finder will be most liberally rewarded on returning the coin.

Are you a laboring man? Then note! There will be a special labor anniversary sermon preached in the Methodist church Sunday morning at 11 a.m. Decorations of a most unique character will be arranged in honor of the occasion. Everyone is cordially invited. Service also in the evening at 7.30.

The O. T. W. mine in Olinghouse canyon, Nevada, on which a large ledge of low-grade ore has been found, has been bonded to W. E. Bingham for $15,000 by J. B. Henderson, the discoverer and owner.

Great Britain is preparing to benefit its millions of inhabitants by applying the principles of municipal ownership to the telephone system of the nation. Six years hence the National Telephone Co., "the monopoly of monopolies," with an issued capital of over $45,000,000, will be bought by the nation at its plant value, and the postoffice will commence its ambitions and difficult task of providing cheap telephones.

E. E. Chipman, the genial gold commissioner, is likely to assume a new role shortly. It is quite on the cards that he will officiate as judge at the proposed baby show at Nelson Fair. Mammas and papa's can now enter the competition with confidence, for what the commissioner doesn't know about babies isn't worth knowing. If the Fair folk will guarantee freight charges we might ship a carload of high-grades from the printeries.

Andy Daney returned from Nelson Monday night, where has been for a few days on business.

Pete Culkeen and Dell Heath came down from the Mohican during the week.

Mr. Davis, of the C. P. R. smelter, paid a visit to the district through the week. While here he visited the Abbott group, Noble Five, Cromwell, Triune, Silver Cup and other properties.

Malcolm Mathieson and Ole Peterson came down from the Copper Chief for a couple of day's outing.

Jim O'Donnell, Henry Jacobson and Sam Underhill came down from the Triune on Tuesday.

FOR SALE.—One of the finest residences in town; good garden. A bargain. Apply, A. W. Edge or J. C. Murray.

Mrs. J. Demick is visiting at Nelson.

Mrs. W. Adams, of the Cedar Valley ranch, rode in on Monday.

Mr. and Mrs. W. Schmock are visiting Nelson.

Exhibits for the Nelson Fair which are being sent from the Lardeau must reach this office not later than Wednesday next, the 13th inst. There is still time to bring in samples for the ore and vegetable exhibits.

The examination of the zinc deposits of Kootenay undertaken by the Dominion government began this week.

The average man sums up the termination of hostitities between the Japs and Russians as follows: Japan has the prisoners and the credit; Russia has "peace with honor" and the experience.

H. T. Rainbow, of Kaslo, brother-in-law-elect to Brer Webster of the Kootenaian, was taking in the sights of the town this week.

T. B. Baker and H. McPherson visited the Old Gold this week. Our banker was edified at the amount of ore he saw there. They also visited the Jewel, on which Johnny Kennedy and Bill Griffits are working. A strike of clean ore has just been made on this property which will yield big values.

F. T. Abey has secured the contract for carrying the mails.

Legislative Assembly Library, Victoria, B.C. Sep 12 1905

POOL AND HIS CRITICS.

Editor Lardeau Mining Review.

Sir,—I notice in your issue of Sept. 1st you make some comment on the article which appeared in the August number of the B. C. Mining Record of Victoria, in reference to the meeting of the Great Northern Mines and W. B. Pool. Although an uninterested party in either case, but a believer in British fair play, I quite appreciate the stand you take on behalf of Mr. Pool, and if you will permit me space in your valuable paper I will offer further explanation in the matter.

I happened to be one of the party that was on the ground when the phenomenal rich showing was found on the Lucky Jack (the claim in question), and helped to take out many of the rich specimens which Mr. Pool is alleged to have shown the provincial mineralogist for the purpose of favorably influencing his expected official report, and if this is all that the Mining Record can harp up against Pool's mining promotions in this district, his reputation will stand, par excellence.

Our Provincial Mineralogist at the time he visited the Poplar camp, was keenly criticised by nearly every prospector in the camp for not spending more time with us that he might give us what they are pleased to term an "official report." But, instead, he examined (suspiciously) some of the rich specimens shown him, and spent the balance of his time promenading the railroad grade (the only boulevard the town could boast of at that time) while waiting for the next outgoing train.

At the time of his visit free gold had been found at Cascade creek three miles below Poplar, and up the valley as far as Tenderfoot creek, a distance of about 10 miles. Looking west up Poplar creek is a metaliferous belt of country extending 12 miles back to the granite belt, and in that distance pretty nearly any kind of formation can be found; some so perplexing that it would make a Dana scratch his head. In his "official report" our learned provincial mineralogist did not tell us whether the rich showings in the valley came from the lower depths, or was an enrichment from the higher mountains, or came from the alleged new planet, the Vulcan Star.

In conclusion, I firmly believe Mr. Pool has been conscientious in all his dealings in the district, and the only accusation I could bring against him is that he allowed himself to be carried away too much by other men's enthusiasm whose experience in other gold camps was limited, and, probably now like many of us who follow prospecting and mining as an avocation, has learned by hard-earned experience that things are not what they seem. Thanking you for the valuable space in your esteemed paper, I am, yours respectfully, CHAS. L. COPP.

Triune mine, Ferguson,
Sept. 5, 1905.

THE RISE IN SILVER.

For the first time in six months the price of silver has gone above 60 cents. On August 19 the quotation was 61 cents, which is appreciably more than was reported a year ago. This suggests that the demand in the far east—the largest consumer—is gradually reviving. In July the average price was .58915 cents, which was the highest since February, when .61023 was reached, and in January, .60690 cents. For the seven months this year the average was .58795 cents, and adding the first half of August makes the increase about two cents per ounce, as compared with the corresponding period last year.

The exports of silver from the United States from January to July, inclusive, were valued at $29,362,550; based on an average of 59 cents per ounce, gives a quantity of 54,214,409 ounces. Apparently there has been a decrease of 4,447,375 ounces, or about 8 per cent in this year's shipments, which is explained by the smaller purchases by India, and a temporary cessation of demand from the Straits Settlements. The far east buys most of its silver through London, hence the bulk of our exports are made to Great Britain.

An interesting feature of the silver situation is the large imports this year. In the seven months ending July 31, the United States received $18,121,296, which, compared with $15,156,617 last year, shows an increase of $2,964,679, or over 19 per cent. The greater part of these imports was from Mexico, Central and South America, and consisted of bullion to be refined here for re-export. Evidently silver mining in these countries has received an impetus with the advance in market prices. Americans, it is worthy of remark, share in the profits earned in the mineral industry of neighboring countries, and our bankers are also benefited by the export trade.

Summed up it may be argued that the silver market will continue strong as long as there is no change in the managerial policy of the smelter trust, which practically controls the situation in this country, and has a dominant vote in certain directions abroad.—Mining Record.

NOTICE TO CO-OWNERS.

To Robert Foran, or to whomsoever he may have transferred his interest in the J.C., Lone Star, Smuggler and Ukiali mineral claims.

Take notice that I, the undersigned co-owner with you in the J.C., Lone Star, Smuggler and Ukiali mineral claims, situate on head of Lake creek, in the Trout Lake mining division of W. Kootenay, have performed the necessary work and made the necessary expenditure on the above-mentioned claims for the year 1905, in order to hold the same under section 24 of the Mineral Act, and the year for which said work was performed having expired, I hereby give you notice that if within 90 days from the first publication hereof you fail or refuse to contribute your proportionate share of such expenditure and pay the cost of this advertisement your interest in the said mineral claims will become the property of the undersigned under and by virtue of section 4 of the Mineral Act Amendment Act, 1900.

Dated this 6th day of September, A.D. 1905 JOHN W. CHIEM.

TROUT LAKE CITY

THERE have been fortunes made by judicious investment in Real Estate, and more fortunes will be made than ever the next two or three years. The one who reaps the harvest is the original investor, for he has his money on a certainty.

Now let us point out to you that there is no better spot on the Continent to buy Real Estate than TROUT LAKE.

Trout Lake is the prettiest spot in the Kootenays; as a pleasure resort it has no equal. Boating and fishing may be indulged in the year round; while big game in abundance is to the found on the hills. Its climate is superb, there being no great extremes, it being mild in winter and cool in summer. It can boast of some of the finest hotels and residences in British Columbia. Its streets are well laid out and graded. There are two excellent general stores, and a glance at the advertisements in this journal will show that all trades are fairly well represented. Write with confidence to Agents.

H. McPherson

Then call on or write to

IT has never had a "boom"—its growth has been steady. It is the head of navigation, and the terminal of the Lardo branch of the C.P.R. All roads (in the Lardeau) lead to Trout Lake. It is the commercial centre of the richest mineral district on the continent, and has banking facilities provided by the Imperial Bank of Canada; first-class school accommodation under the direction of S. Shannon, B.A.; a good water system; government offices; County Court sittings; Methodist Episcopal and Anglican churches and cottage hospital.

There are valuable ranch lands on the outskirts awaiting settlers. Its lumber resources are magnificent, and a band saw mill with a capacity of 60,000 ft. per day is at the head of the lake. The mines tributary are proving out bigger producers every year, with new prospects opening up rich bodies of ore.

There will be a big rush this summer, so if you would know more, write at once to either of the agents at the addresses below.

NOW, MR. MINING MAN.

The REVIEW has some nice samples of Ore, and we want a good quantity. Our intention is to send a good "Exhibit" to Nelson Fair.

Now, get in and help us out. Bring in good big samples, and we will do the rest. Must ship exhibit by 13th September.

Nothing pays so much as advertising! Get in and drill!!

IN THE MATTER OF THE "COMPANIES' WINDING UP ACT, 1898, AND AMENDING ACTS," AND IN THE MATTER OF THE SILVER CUP MINES, LIMITED NON-PERSONAL LIABILITY.

The Silver Cup Mines, Limited Non-Personal Liability, has gone into voluntary liquidation under the above Act, and has appointed Erland G. Hadow, of the town of Ferguson, B.C., accountant, its liquidator, for the purposes of such winding up.

The creditors of the above Company, which has its head office in said town of Ferguson, and all others having any claims against said Company, are required on or before the first day of September 1905, to send to Harvey, McCarter & Pinkham, solicitors for said liquidator, at their offices, First Street, Revelstoke, B.C., their names and addresses and descriptions, and the full particulars of their debts or claims verified by oath, and the nature and amount of the securities, if any, held by them, and the specified value of such securities, and if so required by notice in writing from said liquidator or his solicitors, to come in and prove their said debts or claims in the usual way, at such time and place as shall be specified in such notice.

After the said first day of September 1905, the said liquidator will proceed to distribute the assets of the Company among the parties entitled thereto, having regard only to the claims of which he then has had notice, and the liquidator will not then be liable for the assets or any part thereof so distributed to any person of whose claim he had not notice at the time of the distribution thereof.

Dated this 10th day of July, 1905.
