Lardeau Mining Review

The representative of the rich Lardeau country. Sent to any address for $2 per an. in advance.

VOL. 1 TROUT LAKE CITY, B.C., JULY 28, 1905. No. 38.

No Shortage of Lead.

JAMES CRONIN SAYS THE SILVER-LEAD INDUSTRY IS NOW ON A SOUND FOOTING. W. H. ALDRIDGE ALSO TALKS.

In an interview with the Nelson News W. H. Aldridge manager of the Trail Smelter, comments on the lead situation as follows:

"What have I to say about the increased duty on lead products? Not much except that it is an excellent arrangement for Canada generally and for the Kootenays in particular. The situation at Trail, from a lead standpoint, has improved greatly. On Monday one of our lead stacks will be blown in, and there is plenty of ore in sight to keep the stack steadily employed. There is no indication now of a lead ore shortage, I am glad to say, and you know what the outlook was a short time ago. Yes, we are enlarging the refinery at Trail, and by the first of September we will be treating 50 tons daily. We may be ready before that date, but by then for certain.

"The lead situation is very satisfactory all round at the present time. The London price that rules the world is good and very steady. We have a good market in Canada now, and the demand for our lead in the markets of Japan and China is really excellent. Australian lead has been diverted to Europe and we have successfully supplanted that commodity in the Orient."

"You'll notice," remarked Mr. Cronin, "that the price of silver is satisfactory this year so far. I don't mean that it is very high, but while it gets down to about 55c. now and then, it always works up around 60 pretty quickly. Generally the tone of the market is good and its steadiness pleases us all. It is the same with lead, only the ruling prices are a little higher in proportion to silver. I think the silver-lead industry is on a sound footing and that the outlook for mining in the Kootenays generally is a good deal better and brighter than it was six months ago."

Stamp Mill for Silver Dollar.

The Elwood Tinworkers Gold Mining Co. owning the Silver Dollar are about to install a compressor and a complete milling plant. A few days ago the lead on this property was tapped at the end of a 241 feet crosscut tunnel. The lead is free gold quartz and is highly mineralized. The milling plant has been purchased from the Merralls Engineering Co., of Toronto. This firm is winning a name for itself for putting in good reliable plants.

Certificates of Improvement.

At the Government office, Trout Lake: July 17, Revenge to Andrew Ferguson. 18th, Goodenough, No. 1, No. 2, J. J. Ross.; Broken Hill, C. T. Porter; Anna, Joseph, Maud, Sunset, C. W. McCrossan; L.B., C.H., C.D., X.Y.Z., Blue Jay, Doubtful, J. J. McGlone.

For a Rossland Syndicate.

Henry Magnuson came down from the Cromwell hill for a trip on Tuesday. He is doing assessment work on the Joe Chamberlain, Matazama, Monon, Durange and Silverton. These properties belong to a syndicate of Rossland people. There is a good showing on the Monon of galena and arsenical iron carrying gold values.

Activity in Mining

AT THE FOOT OF THE LAKE. SOME NICE QUARTZ CONTAINING FREE GOLD IN LARGE QUANTITIES FROM THE LANARK GROUP.

Walter Phelan and J. G. Jenkins came up Monday night from the foot of the lake, where they have been working now for some time.

The Lanark group of three claims owned by Jenkins is showing up fine. A fissure vein three feet wide has been opened up for 30 feet. On the foot-wall a nice stringer of grey copper is exposed, and on the hanging wall the quartz carries free gold and arsenical iron. Samples of ore left at the REVIEW office show up the precious metal in good quantities.

Across from this property and on the same lead is the Gold Bug, Homestake and North Star owned by Walter Phelan, Capt. Fitzsimmons, Fred Elliott and J. Jenkins. The main lead is two and a half feet wide, carrying free gold and arsenical iron, also a fissure vein crossing the formation carrying free gold. The work done consists only of stripping the leads and open cuts.

The value of the above properties is greatly enhanced by reason of cheap transportation and shipping facilities. Both properties are within 500 yards of the C.P.R. station.

On the Blue Grouse group of four claims 40 feet of tunneling has been done as well as open cuts made. The lead is two and a half feet wide, carrying galena and iron. This property is owned by A. Johnson, of Revelstoke, W. King and J. G. Jenkins.

On the Beatrice and Millsite, about half a mile below Gerard, a lead of quartz and iron has been exposed by stripping and open cuts. On the foot-wall considerable galena is found. A large amount of stripping and open-cut work has been done on the property, exposing nine different stringers crossing the formation, all carrying values. The same parties own this group.

The work done on the Tenderfoot claims owned by Fred Elliott and Walter Phelan this summer has demonstrated more than ever their value.

Has Confidence in the Property.

W. B. Cochrane, director of the Great Northern Mines, Limited, has been interviewed by the Nelson Tribune. He said the report of a good strike on the Swede group was quite correct. As to the assay, it too was correct as far as it went, but he did not suggest that it represented anything more than the value of a selected specimen. He had personal confidence in the property and the future of the company. The strike was "bona-fide," and had materially assisted in the financial negotiations now afoot. A subsidiary company has been formed to develop the Swede group. The Great Northern Mines, Limited, would retain control of the stock in the new company, and sufficient cash had been subscribed to ensure the erection of all the plant and machinery necessary to fully equip the property and to put it on a profit-earning basis. Mr. Cochrane said the company had had a lot of trouble and an uphill fight, but they had the fullest confidence in their holdings and should stay with them.

General Mining News.

DISTRICT NEWS OF INTEREST TO READERS WATCHING THE PROGRESS OF THE COUNTRY. VISIT MADE BY MINING MEN.

A. B. Ernst, of Seattle, who controls the Black Diamond group, accompanied by his expert, Dr. A. O. Ingalls, of Seattle, paid a visit to the property last week. Some difficulty was encountered owing to the snow in the basin, but enough was seen to satisfy both gentlemen that they had a valuable property. They will return in about a month to make preparations for the development of the property. While here they inspected the Badshot mine at the head of Gainer creek and also the Great Northern properties. They reported themselves as being well pleased with both of these properties, not only as to the showings, but also to the general formation. Mr. Ernst expressed himself as highly pleased with what he had seen both on this and prior trips, and says the Lardeau country is bound to come to the front as a mineral producer.

—o—

The lessees of the I.X.L. adjoin the Triune are doing some good work. The last report from the property stated that about ten ton of ore had been sacked, the average assays running $150 per ton.

—o—

John Y. Cole and Al Houston came up from Poplar Monday night. Mr. Cole is heavily interested in the new company formed to work the Mother Lode. He says ample capital is now ready for the thorough development of the property. Some good ore has been opened up, which encourages them in the belief that steady systematic development will make the Mother Lode a mine.

—o—

C. E. Ehrehart, of Pennsylvania, has been visiting his brother, T. E. Ehrehart. Mr. Ehrehart is heavily interested in the Lucky Boy property, and while here made a thorough examination. He went away thoroughly satisfied that the property was all right. An early resumption of work is looked for.

Ore Body is Continuous.

RECENT STRIKE AT SILVER CUP MINE IS PROVING A BIG THING, WHICH DEMONSTRATES THAT THE ORE GOES DOWN.

The ore strike in the lower workings of the Silver Cup is improving with every shot. Practically the whole face of the tunnel is in ore, giving high silver and gold values. Probably at no time in the history of the camp could this strike have been more opportune.

Through the shutting down of the Five Mile reduction plant, worked in connection with the Silver Cup, for repairs, etc., all the knockers in the country took advantage of the circumstance to condemn the whole business. This strike, therefore, will be the means of restoring confidence in Lardeau's greatest mine. As before stated, there is now over 400 feet of practically virgin ground. A winze had been sunk from the upper workings, 150 ft., showing good ore, and where it has been opened up now in the Sunshine tunnel is over 250 feet below the bottom of the winze.

Hard on the Packer.

Ed. Vipond started off Monday morning with his freighting outfit and 17 head of pack horses for the Mammoth, where he has the contract for getting out a couple of cars of ore. Beaton, however, proved the end of his journey, as between there and Camborne the road was all on fire. The outfit returned and is now packing from the Triune. It is expected the Camborne road will be in shape in a few days.

Reward Ground.

The boiler for the compressor plant at the long tunnel of the Reward Co., is being put in place. Mr. Morton, the manager, has returned from Nelson and Rossland, where he has been in the interests of the company.

We extend the glad hand this week to Phil Shepherd on the advent of a son and heir.

The Sawmill Resumes Work.

The Canadian Timber and Saw Mill Liquidates all Indebtedness. The Whistle to blow in about a Month.

J. D. KENNEDY LOCAL GENERAL MANAGER

Will be a Great Factor in the Prosperity of Trout Lake. Citizens Generally Pleased with Resumption of Work.

It looks good to the people of Trout Lake to see work started once more at the big saw mill. Mr. Leslie Hill, who has been looking after the affairs of the Canadian Timber and Saw Mills Co., says the shareholders have raised the money to pay off all of the company's indebtedness and to make the necessary repairs and improvements to the mill if it is found upon investigation advisable to do so. J. D. Kennedy, who came here from Arrowhead to take charge of the plant, is an old hand at the business and thoroughly understands it.

In an interview with Mr. Kennedy he said it was the intention of the company to dress what lumber there is in the yard and get it ready for the market. Work is now being pushed getting the planing mill in shape, and it is expected to have it running in about a week's time. The mill will also be put into commission temporarily to cut what logs are in the booms. He expects to have the whistle blow not later than a month from now.

When this work is completed and everything found satisfactory, the mill will be closed down and given a thorough overhauling, and the work of getting out timber started. Knowing the proposition as we do, and taking into consideration the favorable markets (see extract from "Lumberman and Contractor" in this issue), we have no hesitancy in saying that under the supervision of Mr. Kennedy and his staff the proposition will be a paying investment.

Canyon Creek Properties.

GOOD AVERAGE ASSAYS OF LINSON VIEW ORE. DRIVING A TUNNEL ON THE GRAND SOLO TO GET UNDER RICH SHOWING.

Tony Lindgren and partners are pushing work on their claims for all they are worth. On Monday morning Tony, Martin Nelson and Nels Bodine left to resume work on the Linson View. Work will be continued sinking and getting out ore. A recent assay brought to the REVIEW office gave values of $280 per ton. This was an average sample taken from the 8-inch paystreak at a depth of 60 feet.

On the Grand Solo a tunnel is being driven to tap the ore shoot at a depth of 100 feet. The tunnel is now in about 40 feet, and it is expected that 10 feet more will bring them under the showing.

On the Jumbo and Black Jack some work has been done by Andrew Boman, N. G. Erickson and N. Nelson. The ore showings are good, principally grey copper.

Mayor Mobbs, of Gerard, has four men working on his property at the forks of the creek, and is meeting with good success.

Sacking the Goods.

Malcolm Mathieson came down from the Copper Chief during the week. Malcolm reports everything going ahead nicely. A good bunch of ore has been taken out and sacked. Jim Livingston has gone up to resume work on the property.

—o—

Struck the Lead.

The Bonanza group, which was leased some time ago to Oscar Nelson is turning fine. During the last few days a lead has been opened up in the tunnel showing 8 inches of solid ore of high grade. The principal owners are Tony Lindgren, Fred Elliott and George Chataway. The old saying that steady and judicious work will tell has been proven true in this case as well as in many others during this summer.

—o—

Splendid Samples.

Alec Oliver came up from Gold Hill on Monday's boat. Alec and Fred Mummery have been doing development work on the Mint Group at Second Crossing for the past few weeks. The work has shown up a splendid body of ore carrying free gold. Specimens brought to town shows gold the size of wheat kernels. More work will have to be done, however, before the extent of the find is fully known.

—o—

FERGUSON.

Jim Snell and Sam Cavanaugh are placering in Lardeau creek about halfway between the twin cities.

Assayer Shannon and Miss Challenger made the trip to the Black Warrior this week. After visiting the tunnel they returned to the spot where they had unsaddled their horses to find that their "trusty" steeds had broken away. They consequently chartered a pair of Shank's ponies for the homeward trip. It is surmised the animals broke ground at the sight of a bear.

The lawyer who defended Coleman was in looking after property turned over by Coleman to him in lieu of services rendered for the defence.

Exceeding Richness.

MINNEAPOLIS MAN VISITS SMITH & ROGERS' PROPERTY. THINKS THE LARDEAU A WONDERFUL MINERAL COUNTRY.

Dr. G. G. Eitel, of Minneapolis, put in a few days this week at Rapid creek going over the Smith and Rogers property, on which a bond is held by Minneapolis people, in which he is largely interested. When passing through Trout Lake the doctor was interviewed by a REVIEW man relative to the property. He said there was no doubt as to the richness of some of the veins, but that it had yet to be determined whether the average values of the leads exposed would warrant the installation of a plant. He very tersely sums up the situation by saying that if the samples he has taken, which will give a good average, will run high enough, a ten stamp mill will be put in at once, whereas if the values are small nothing less than a 50 stamp mill would pay, but at present the development work done would not warrant the putting in of such a sized plant. The Doctor is heavily interested in Oregon and other states in the mining industry, and by the samples he was shown here thinks we have a country of exceeding richness. He will pay us another visit later on in the season. He left for the coast on Thursday morning.

Timber Trade Good.

As indicating the activity in the timber business in British Columbia, the revenue from timber sources are a fair criterion. The provincial fiscal year ended June 30, and from present indications the total receipts of the department of timber lands for the year will not be less than $400,000. This will be $150,000 in excess of the estimated revenue from this source. Since the estimate was made a year ago there have been many complaints of a falling off in the lumber industry, but these depressing reports would seem to be given the lie by the cash returns. From an authoritative source it is learned that fully three-fifths of the revenue is from payments for timber licenses. These payments are annual, so that the same amount from the same source will be due for next year if present holders wish to retain the lands covered by their licenses.—Lumberman and Contractor.

There will be no necessity to import potatoes for consumption of Trout Lake people this year, as both Will Abrahamson and Gus Fraser are going to have a big yield on their potato ranches.

O. B. N. Wilkie and force have returned from surveying the J.C. group on Lake mountain. The property is owned by Jack Chism and Alec. Dodds.

As a fruit growing district we have been hiding our light under a bushel, as it were. On John Pullman's ranch 125 crates of strawberries were taken from half an acre, for which he received $375.00.

Sheriff Hambly, of Golden, came in on Saturday night. He is settling up the different seizures made by Deputy Yuill on the mill company's property.

An assortment of confections are displayed at Fraser's that will make your mouth water.

SAFETY.

People with mining stock for sale will tell investors that their money is "safe."

This seems to satisfy the investor, says the Rossland Miner. But what is "safety"? Is it the good will existing between the company and its stockholders, or is it the just intention of the men backing the enterprise to do as they have promised?

Safety would ordinarily imply the ability of the investor to get his money whenever he wanted it. In other words, it means convertibility.

Convertibility is regarded by bankers as the first requisite in securities; not that people who make the investment wish their money, but IF they do, it will be waiting for them.

Stock, to be convertible, must have a market, which may or may not mean that it is listed. In fact, listing is only incidental. What gives stock market value is the worth, the earning capacity—real or contemplated—back of the securities.

A mine may be valuable and not earning. It may have the ore blocked out, and the values of the ore may be known. Some minor reason may retard operations. If the reason is really of small import, what difference does it make to the intrinsic worth of the stock?

Men and women of limited means are often unable to invest in earning securities for the reason that the stock is sold at figures so high that all they could hope to earn would be twice bank interest—if that. Therefore, they look to stocks that will earn in one, two, or even three or four years. But it is not so much a question of what they will earn as "Will they be a safe investment?"

The element of safety scarcely enters into a prospect, but it can be made to enter into it, and often does. While no man can say just how a prospect increases in value as it is developed, every one will admit that the actual intelligent development of the property will bring out values, if there are any there. That is sometimes a speculation, and if it is so understood, no one should complain.

A property that is being developed makes its own market for the stock; but if it is not developed, or if its development is unreasonably retarded, the market conditions become less favorable.

The investor who invests for the honest purpose of assisting that development does not wish to trade in the stock. He does not ask for the opportunity of buying it and selling it without regard to what the company gets out of it. But he wants to know that HE CAN sell it if he desires. If he cannot, he naturally feels that his investment is of no value. If he can sell it at any time for as much as he paid for it—if not more—he is reasonably certain that his investment is safe.

Safety implies worth, and that means that every honest effort is being put forth to make the mine a payer. Safety also signifies honesty. It shows that the management must be deserving, trustworthy.

But safety is not a word to juggle with. It is not a term to use freely. It means something, and that something is the keystone of the great arch of successful investment.

Now and then stock that afterwards proves valuable has not the slightest sign of convertible function, but usually, where there are healthy conditions in the property, the stock is safe by reason of its marketableness.

EDITORIAL NOTES.

The recent discovery of high-grade ore in the Sunshine tunnel at the Silver Cup property utterly puts to rout those pessimists who, if they could not knock any other way, would lift their eyebrows and say, "Well, it don't go down, anyway." Of course, the depth attained is only a matter of over 600 feet, but the fact remains that the ore is there and improving as it goes down. We are not, nor is anyone else, in a position to say that it will go down for a thousand feet, but we can far more reasonably assume that it will go down further than at present demonstrated than it will not.

Mining camps and the people in them who are given to bemoaning the dullness of the times, but who make no effort to strike out in new lines and so keep up with the best traditions of the west, must be content to drop down and out of the struggle for existence.—Cranbrook Prospector.

During the past week the thermometer has been climbing towards the limit. The death-rate of the east, however, does not prevail out in the mountains.

Smokers' supplies in great variety.

COMFORT AND WEAR DEPEND ON FIT.

A KEY that nearly fits a lock wont quite open it.

A shoe that nearly, but not quite, fits a foot wont give complete comfort, nor full wear.

A loose shoe chafes—a tight shoe pinches.

An ill-fitting shoe breaks where it wrinkles and wears out where it stretches.

Comfort, and economy, therefore demand shoes that fit "just right."

And fit depends upon the shape of the lasts, as well as on large variety of sizes, half sizes, and widths.

There are 14 up-to-date shapes of Slater Shoes.

In each shape there are 11 half sizes and 6 widths.

This means 924 chances of fitting your feet perfectly.

No other Canadian shoe is made in such large variety of shapes, sizes and widths.

No other Shoes, of any kind, are carried, by the Retailer, in such full assortment of shapes, sizes, and widths, as "The Slater Shoe."

Because "The Slater Shoe" is sold to only one Retailer in each town, who must contract to carry a full representation, in order to secure the Agency.

When you buy "The Slater Shoe" you get more than sure-value every time up to the Makers' price stamped on each pair.

You also get 924 chances of perfect fit against 200 chances of shoes made in the usual limited scale of shapes, sizes and widths.

This is only one of a dozen reasons why three times as many pairs of Slater Shoes are sold, as of any other single make in Canada, at $4.00 or $5.00.

Look for the slate-frame trade-mark, and the Makers' price stamped on the lining.

CANCELLATION OF RESERVE.

NOTICE is hereby given that the reservation established in pursuance of the provisions of the "Columbia and Western Railway Subsidy Act 1896," notices of which were published in the British Columbia Gazette and dated 7th May, 1896, and 5th June 1896, respectively, are hereby cancelled.

Crown lands situated within the area embraced by the said reservation will be opened to sale, settlement, lease and other disposition under the provisions of the "Land Act," three months after the date of the first publication of this notice in the British Columbia Gazette: provided, however, that in all cases where lands are so sold, pre-empted, leased or otherwise alienated by the Government, and are subsequently found, upon the survey of the Columbia and Western Railway Company's blocks, to lie wholly or in part within such blocks, then the persons so acquiring such lands shall acquire their title thereto from the Railway Company, who have agreed to deal with such purchasers, pre-emptors, lessees, etc., on the same terms and conditions as the Government would under the provisions of the "Land Act," except in respect to timber lands on the Company's blocks, which shall be subject to the regulations issued by the Company relative to the cutting of timber on the Columbia and Western Railway Land Grant.

TROUT LAKE CITY

THERE have been fortunes made by judicious investment in Real Estate, and more fortunes will be made than ever the next two or three years. The one who reaps the harvest is the original investor, for he has his money on a certainty.

Now let us point out to you that there is no better spot on the Continent to buy Real Estate than TROUT LAKE.

Trout Lake is the prettiest spot in the Kootenays; as a pleasure resort it has no equal. Boating and fishing may be indulged in the year round; while big game in abundance is to the found on the hills. Its climate is superb, there being no great extremes, it being mild in winter and cool in summer. It can boast of some of the finest hotels and residences in British Columbia. Its streets are well laid out and graded. There are two excellent general stores, and a glance at the advertisements in this journal will show that all trades are fairly well represented. Write with confidence to Agents.

H. McPherson
Agent
Trout Lake, B.C.

Lots can be obtained on EASY TERMS.

Then call on or write to

IT has never had a "boom"—its growth has been steady. It is the head of navigation, and the terminal of the Lardo branch of the C.P.R. All roads (in the Lardeau) lead to Trout Lake. It is the commercial centre of the richest mineral district on the continent, and has banking facilities provided by the Imperial Bank of Canada; first-class school accommodation under the direction of S. Shannon, B.A.; a good water system; government offices; County Court sittings; Methodist Episcopal and Anglican churches and cottage hospital.

There are valuable ranch lands on the outskirts awaiting settlers. Its lumber resources are magnificent, and a band-saw mill with a capacity of 60,000 ft. per day is at the head of the lake. The mines tributary are proving out bigger producers every year, with new prospects opening up rich bodies of ore.

There will be a big rush this summer, so if you would know more, write at once to either of the agents at the addresses below.

F. B. Wells
General Agent

FERGUSON.

Cliff Edwards has gone out for a trip to Alberta.

Andy Daney has had his house beautified by being painted and a new verandah put on.

Geo. Chataway, of Poplar, paid the town a visit this week.

J. Q. and Mrs. McKinnon and family returned this week from a visit to the Halcyon Hot Springs.

A. J. Gordon is out on the hills prospecting and doing assessments.

Jack Cameron left for Spences Bridge last week, where Sam Sutherland has a contract for building four miles of the new railroad.

Alec. Cummins has received the support of 98 per cent of the citizens in his application for the office of postmaster.

W. A. Skinner and Chas. Foote returned Wednesday from a hunting trip on Cup mountain.

Dave Morgan has returned from doing assessment on Gainer Creek.

Dr. Newcombe is reported to be leaving for Midway shortly.

LOCALS.

BORN.—On the 24th inst., to the wife of P. M. Shepherd, of a son.

The telephone line has been put up between the town and the hospital. This end of the line is in the outer part of the post office, where it is accessible any hour.

H. E. Spohn, who has been for some months teller at the Imperial Bank here, has been transferred to Strathcona. W. J. S. Walker, who has been stationed at Golden, has taken the vacancy here.

Dr. Millov, of Nelson, came up this week on a visit to look after his different mining interests.

J. W. Westfall and Fred Elliott have bought out Geo. Windsor's interest in the Copper Queen and Tom Edwards.

ALBERNI ELECTION.

The Government secures another seat. Alberni gives Manson (Cons.) a majority of 61, with two small places to hear from. This seat was opened through McInnis (Lib.) accepting a federal position. At the general election he had a a big majority, which has now been wiped out and and a Conservative one secured.

IN THE MATTER OF THE "COMPANIES' WINDING UP ACT, 1898, AND AMENDING ACTS," AND IN THE MATTER OF THE SILVER CUP MINES, LIMITED NON-PERSONAL LIABILITY.

The Silver Cup Mines, Limited Non-Personal Liability, has gone into voluntary liquidation under the above Act, and has appointed Erland G. Hadow, of the town of Ferguson, B.C., accountant, its liquidator, for the purposes of such winding up.

The creditors of the above Company, which has its head office in said town of Ferguson, and all others having any claims against said Company, are required on or before the first day of September 1905, to send to Harvey, McCarter & Pinkham, solicitors for said liquidator, at their offices, First Street, Revelstoke, B.C., their names and addresses and descriptions, and the full particulars of their debts or claims verified by oath, and the nature and amount of the securities, if any, held by them, and the specified value of such securities, and if so required by notice in writing from said liquidator or his solicitors, to come in and prove their said debts or claims in the usual way, at such time and place as shall be specified in such notice.

After the said first day of September 1905, the said liquidator will proceed to distribute the assets of the Company among the parties entitled thereto, having regard only to the claims of which he then has had notice, and the liquidator will not then be liable for the assets or any part thereof so distributed to any person of whose claim he had not notice at the time of the distribution thereof.

Dated this 10th day of July, 1905.
