Lardeau Mining Review

The representative of the rich Lardeau country. Sent to any address for $2 per an. in advance.

VOL. 2 TROUT LAKE CITY B.C., DEC. 28, 1905. No. 9.

Progress in the Development of The Rich Lardeau Country

1905 is drawing to a close, and taking, as it were, a bird's eye view of the operations in the Lardeau during the year and the present conditions, we are more than ever impressed with the immense possibilities of the district The work done during the year has not been such that looked towards rich discoveries, but more along the line of good legitimate development, and for this reason the shipments have not been as large as previous years, when the whole aim of the owners was to ship ore.

OLD GOLD.

Starting at the most northern point up the North Fork on the Old Gold property, the development opened up some good ore in the lower levels, and the management state that next summer their company will be in a position financially to proceed with the work with a larger force of men.

BLACK WARRIOR.

Sam Shannon and his associates are working the Black Warrior under lease. Over 30 tons of ore was shipped giving values of $96 per ton.

SURPRISE GROUP.

On Surprise creek the property owned by Dave Morgan, of Ferguson, and Ald. Foote, of Revelstoke, was thoroughly examined by O. V. Grandin, one of the leading experts of the continent, on behalf of eastern capitalists. We learn on good authority that his report was eminently satisfactory, and that early in the spring the work will be resumed on a large scale. The proposition is a low grade one and will require the installation of reduction works on the ground and the extension of the wagon road from Ferguson. This the new company are prepared to do.

BALTIMORE

This is one of a group of eight claims on the wagon road and within a mile of Ferguson. The Baltimore tunnel was extended 40 to 50 feet and a fine body of concentrating ore shown up. The near proximity to transportation and excellence of situation makes this a most desirable property.

MOHICAN.

Up Gainer creek the Mohican syndicate are engaged in driving a long tunnel to tap the lead at a 300 foot depth Although only a very small capitalized company composed of men of small means they are showing the spirit of "stick-to-it-iveness" which invariably results in success.

THE TRIUNE.

This property shipped during the year 120 tons of ore of an average value of $130 per ton. The development of the lower workings was continued steadily up to about the 1st of November, when work was closed down for the season The vertical depth at the face of the lower tunnel is nearly 500 feet. During the last month the company paid in full for their properties, the Triune mine alone costing $125,000. Work will be resumed as early in the spring as conditions will permit. An average of 15 were employed during the year.

THE "LONG TUNNEL."

Early in the year a few eastern capitalists headed by Jno. Morton. W. White and D. D. White of Minnesota, took up over 20 claims on South Fork around 6-Mile point,

Results Encouraging to Property Owners and Investors.

and consolidated them under the name of the Reward Mining Co Their proposition was to drive a long tunnel in towards the Nettie L., crosscutting the formation and cutting numerous well known surface leads at a good depth. A compressor plant was installed and the work is being pushed rapidly. The line of the tunnel, as surveyed by P.L.S. Wilkie, cuts through a rich piece of ground, and while as yet no definite results are obtained, the project is looked on very favorably. Twelve men have been engaged in mining, while a number have been working on surveys, etc. The proposed length of the tunnel is 5,000 feet, of which 600 has been driven.

RAMBLER.

Adjoining the last mentioned property is the Rambler, with good showings on which Jim Livingston has done, lone handed, a large amount of work.

SILVER CUP AND NETTIE L.

During the first half of the year the Silver Cup and Nettie L. were kept busy supplying the 5-Mile plant with low-grade ore from the dumps and that stored in the drifts. About the 1st of July the supply was exhausted, and the plant employing about 40 men was shut down until the development work at the mine was caught up. The company at the same time closed down the Nettie L., and have since devoted their energies to the development of the Silver Cup. The drift known as the Sunshine tunnel was pushed in, and at a point 1,650 feet from its portal, and 700 feet from the surface, a crosscut was made to the blind lead running parallel about 40 feet distant. In this crosscut ore was encountered and an upraise made (250 feet) to meet a winze (150 feet) sunk from the 300 foot level. The ore continued practically throughout the whole distance. Drifting both ways on the blind lead, also drifting ahead on the Sunshine, ore is opened up at every point of a better grade than found in the upper workings. The shipments made during the year were 550 tons lead concentrates and 104,000 ounces of silver bullion from the mill, and 100 tons of ore from the Silver Cup. At present from 25 to 30 men are employed

FREE COINAGE.

A. J. Gordon is working a crew of men on the Free Coinage, which he has under a lease and bond. He is meeting with good success and by next summer will undoubtedly be on the shipping list.

I.X.L. (SWEDE).

This property was also worked under lease and bond by E. R. Vipond and associates, and eight tons of ore shipped.

NOBLE FIVE.

On Brown creek opposite the I.X.L., a magnificent showing of ore was exposed by the locators of the Noble Five group late in the season. Trails were built and about ten tons of ore extracted before snow fell and stopped operations. They will be resumed early in the spring. The paystreak is from 12 to 18 inches in width and carries high values. Six men were employed while operations lasted. J. O. Piper opened up a nice vein of carbonates on the Alice fraction carrying high gold values.

SLINGER GROUP.

On the 8-Mile summit Steve Slinger and partners did a lot of development on their properties adjoining the Winslow, which resulted in the determining of the continuance of the Winslow lead through their adjoining properties.

SILVER PLATE.

A. W. Edge and Andy Daney succeeded in opening up the lead on the Silver Plate, six feet in width of quartz, highly mineralized.

CANYON CREEK.

P. A. Lindgren and associates were busy all summer on the Bonanza on Haskin's creek and Linson View on Canyon creek. Both of these properties are showing up well. From the latter a good sized shipment is sacked ready for the smelter.

BROADVIEW.

Late in October a syndicate of Trout Lakers secured control of the Broadview on Great Northern hill from the Horn-Payne Co. for $10,000. A force of seven men were put on, trails opened, cabins put in shape, old workings cleaned out and at this date over 100 tons of ore taken out and sacked. Before the syndicate had time to know what they really had, an offer of $20,000 was made them, and a deal is now pending whereby a syndicate of the strong mining men of B.C. will take control. If this deal is completed and development proves satisfactory, the hill will be worked on a large scale, and a tramway put in to lay the ore down at the Lake.

LUCKY BOY.

Owing to a change in the personnel of the old Lucky Boy Mining Co., and its subsequent transformation into the Chesnut Hill Mining Co., work on the property was stopped early in the summer. The ore shipments for the year were 56 tons. The new company have been registered and all arrangements completed for an early resumption in the spring.

THE HORSESHOE.

The Horseshoe owned by Andy Craig and Ed Hillman was worked under lease, and ten tons of ore shipped value $125 per ton.

COPPER CHIEF GROUP.

Malcolm Mathieson and associates worked the Copper Chief group all summer and have made a splendid showing. A sample shipment of three tons gave returns of $141 per ton.

I.X.L. (MILLOY)

This property was taken over during the summer by a bunch of Minnesota men, and a small amount of development done.

LAKE PROPERTIES.

At the foot of the lake, Squire Mobbs, Walter Jenkins and Walter Phelan have been developing their claims all summer.

CALUMET AND HECLA.

Some excellent gold values were obtained on these properties. In July last Jack Chism sold one half of his interest to Cap Fitzsimmons and Purser Mullins. A shaft has been sunk on the lead to a depth of 50 feet; good values were obtained all the way down. It is altogether probable that a 5 stamp

When Jimmy Lindsley, of the Reception hotel, Camborne, left town rather mysteriously, it was generally conceded by the local wiseacres that he would return in double harness. He returned on Monday all right, perhaps somwhat "doubled," but the knowing ones with a chivari prepared in extenso will dine exclusively on rice pudding and curry for the next few days. In other words, the oracle did'nt work, and the disappointed ones, to get even, vow that Jimmy got "cold feet." In this they are also wrong, as he only got a "head" on.

Deal on Wagner Group.

W. S. Rugh, Chief accountant of the Le Roi Mining company, has sold to George W. Odell of Spokane, his interest in the Wagner group of mining claims situated in the Trout Lake mining division. The consideration, Mr. Rugh last week stated, was about $20,000. It was the largest individual interest in the company. The other holders of shares in the company include D. W. Henly, W. J. Whayler and C. T. Porter, all of Spokane. There are thirteen claims in the group, which are located near the head of Hall creek. The largest amount of work done on the group is on the Duncan claim, where 250 feet of tunnel and winze work has been done. With this work there has opened up a shoot of silver-lead ore 100 feet long and 12 feet wide. The value of this ore body is variously estimated at $300,000 to $500,000. The ore body is composed mostly of concentrating material, with a seam of clean ore from 1 to 2 feet wide. Assays of the clean run from 90 to 500 ounces of silver to the ton. A general average sample clear across the ledge gives 100 ounces in silver and 60 per cent lead. The greatest depth reached by the workings is 140 feet. $20,000 has been spent in developing the mine.

As to transportation facilities, the Canadian Pacific railway boat now runs to Trout Lake, which is located twelve miles from the Wagner group, and the proposed Hill road will go within four miles of the group. The company intends to build a concentrator next year, and if the proposed Hill road is not built, to build a wagon road down the Duncan river and to ship the ore by water to the Canadian Pacific railway. The Wagner Mines, Limited, owns the Wagner group.

On Top as Usual.

Ten little printer men going out to dine,
A cocktail killed the Kaslo scribe—
Then there were nine.
Nine little printer men drinking to their fate,
Down dropped the Camborne man and that left only eight.
Eight jolly scribbler men thought they were in heaven,
A bottle killed the "News" man and that left only seven.
Seven merry printer men playing funny tricks,
The "Mail" began to talk of shop—and then there were six.
Six groggy printer men trying to booze and thrive,
The "Herald" started mixing it, and then there were five.
Five sleepy printer men, their formes upon the floor,
The "Tribune" man gave up the ghost and then there were four.
Four solemn printer men staying with the tea,
One got his habits on, then there were three.
Three valiant save the marks sitting round the brew,
Away rolled Economizer, then there were two.
Two tired printer men very nearly done,
One spoke in praise of Lorry-ay——and then there was one.
One forlorn, but happy scribe, drinking all alone,
He was the Trout Lake man, and he took the whole bunch home.

CHRISTMAS.

Peace on earth ; goodwill toward men !

Such was the message of the Man born 1905 years ago, and as the centuries roll on, being received and acted on more and more by each succeeding generation. As the day of commemoration of the birth of Christ draws near, the spirit of good-fellowship and Charity seem to permeate our whole being Petty jealousies for the time being are laid aside, enmities buried, and the man's best nature brought to the surface.

Many scoff at the religion of the Christ, but all are willing, nay, anxious to live among peoples who acknowledge His supremacy. The world over, where the "Sermon on the Mount" is re-echoed, there will be found civilization in its highest state, liberty in its purest form, and an equality that makes the "fatherhood of God" and the "brotherhood of man" not only an ideal phrase but an actual condition.

Nature is true, and in the doctrines preached by our Christ, there is everything which is attractive and nothing that is repellant. Honor Charity, Love and Truth are the highest attributes of man, each of which is found in their purity in the life of Christ. In His teaching is nothing that cannot be comprehended. Its plainness is its beauty. The child at its mother's knee can see Him plainly as He said : "Suffer the little children to come unto Me" The illiterate does not heed any explanation as he is told the story of the Good Samaritan, while even the most learned can gain inspiration as they study His sayings.

Our Christmas should be a day of rejoicing, and as we shout the refrain, "Peace on earth ; goodwill towards men" on that morn, make up our minds that it is equally applicable each and everyday we enjoy the privileges of a Christian civilization.

The Review staff take their annual holiday next week as usual, therefore the Review will not appear next week.

Don't forget the Minstrel Show next Tuesday night.

Progress in the Development of The Rich Lardeau Country.

mill will be put in at an early date.

GREAT NORTHERN MINES.

At Poplar the company are reported to be putting matters in good shape financially. All the matters in litigation have been settled and a resumption of work is looked for.

MOTHER LODE.

The Mother Lode property was taken over this year by a Laclede, Mont. syndicate, who are going in for straight development. Work is being continued all winter.

PLACERING.

On Lardeau creek, at Trout Lake City, the Spokane Falls Placer Co. have put in about 1,000 feet of flume, and in the only clean-up made prior to frost amounted to $150 for two men shoveling for two days.

Many properties have been worked in a small way and some good showings exposed.

In general there is a feeling that the day of wild catting is over, and that 1906 will usher in a era of prosperity for the camp. The high price of metals and the re opening of the Pilot Bay smelter are factors which will materially enhance the value of properties. Owners, too, show their willingness to dispose of their properties on reasonable terms. Great is the future of the Lardeau !

TROUT LAKE CITY

THERE have been fortunes made by judicious investment in Real Estate, and more fortunes will be made than ever the next two or three years. The one who reaps the harvest is the original investor, for he has his money on a certainty.

Now let us point out to you that there is no better spot on the Continent to buy Real Estate than TROUT LAKE.

Trout Lake is the prettiest spot in the Kootenays; as a pleasure resort it has no equal. Boating and fishing may be indulged in the year round; while big game in abundance is to the found on the hills. Its climate is superb, there being no great extremes, it being mild in winter and cool in summer. It can boast of some of the finest hotels and residences in British Columbia. Its streets are well laid out and graded. There are two excellent general stores, and a glance at the advertisements in this journal will show that all trades are fairly well represented. Write with confidence to Agents.

IT has never had a "boom"—its growth has been steady. It is the head of navigation, and the terminal of the Lardo branch of the C.P.R. All roads (in the Lardeau) lead to Trout Lake. It is the commercial centre of the richest mineral district on the continent, and has banking facilities provided by the Imperial Bank of Canada; first-class school accommodation under the direction of S. Shannon, B.A.; a good water system; government offices; County Court sittings; Methodist Episcopal and Anglican churches and cottage hospital.

There are valuable ranch lands on the outskirts awaiting settlers. Its lumber resources are magnificent, and a band-saw mill with a capacity of 60,000 ft. per day is at the head of the lake. The mines tributary are proving out bigger producers every year, with new prospects opening up rich bodies of ore.

There will be a big rush this year, so if you would know more, write at once to either of the agents at the addresses below.
